## Item 2.02 Results of Operations and Financial Condition

The information included in this Current Report on Form 8-K is being furnished, not filed, pursuant to Item 2.02 of Form 8-K.

On November 8, 2006, PG&E Corporation issued the press release attached hereto as Exhibit 99.1 announcing its financial results and the financial results of its subsidiary, Pacific Gas and Electric Company (Utility), for the quarter ended September 30, 2006. Additional supplemental information relating to PG&E Corporation and the Utility is attached as Exhibit 99.2. Much of this information is derived from PG&E Corporation's and the Utility's combined Quarterly Report on Form 10-Q for the quarter ended September 30, 2006, to be filed by PG&E Corporation and the Utility with the Securities and Exchange Commission (SEC), and should be read in conjunction with such Form 10-Q.

Exhibits 99.1 and 99.2 to this report also will be posted on the "Investors" section of PG&E Corporation's website at [www.pge-corp.com](http://www.pge-corp.com).

PG&E Corporation presents results and guidance on an "earnings from operations" basis in order to provide investors with a measure that reflects the underlying financial performance of the business and offers investors a basis on which to compare performance from one period to another, exclusive of items that, in management's judgment, are not reflective of the normal course of operations.

The attached exhibits contain forward-looking statements regarding management's guidance for PG&E Corporation's 2006 and 2007 earnings per share from operations, 2006 and 2007 rate base, and 2006 and 2007 earnings sensitivities. These statements are based on current expectations and various assumptions which management believes are reasonable, including that the Utility earns its authorized rate of return on equity of 11.35% on anticipated rate base for 2006 and 2007. These statements and assumptions are necessarily subject to various risks and uncertainties, the realization or resolution of which are outside of management's control. Actual results may differ materially. Factors that could cause actual results to differ materially include:

- Unanticipated changes in operating expenses or capital expenditures, which may affect the Utility's ability to earn its authorized rate of return;
  - How the Utility manages its responsibility to procure electric capacity and energy for its customers;
- The adequacy and price of natural gas supplies, and the ability of the Utility to manage and respond to the volatility of the natural gas market for its customers;
- The operation of the Utility's Diablo Canyon nuclear power plant, which could cause the Utility to incur potentially significant environmental costs and capital expenditures, and the extent to which the Utility is able to timely increase its spent nuclear fuel storage capacity at Diablo Canyon;
- Whether the Utility is able to recognize the benefits expected to result from its efforts to improve customer service through implementation of specific initiatives to streamline business processes and deploy new technology;
- The outcome of proceedings pending at the Federal Energy Regulatory Commission (FERC) and the California Public Utilities Commission (CPUC), including the Utility's 2007 General Rate Case and the Utility's application for approval of new long-term generation resource commitments;
- How the CPUC administers the capital structure, stand-alone dividend, and first priority conditions of the CPUC's decisions permitting the establishment of holding companies for the California investor-owned electric utilities, and the outcome of the CPUC's new rulemaking proceeding concerning the relationship between the California

investor-owned energy utilities and their holding companies and non-regulated affiliates;

- The impact of the recently adopted Energy Policy Act of 2005 and future legislative or regulatory actions or policies affecting the energy industry;
  - Whether the Utility is determined to be in compliance with all applicable rules, regulations, tariffs and orders relating to electricity and natural gas utility operations, including those relating to the procurement of renewable energy, resource adequacy, greenhouse gas emissions, electric reliability standards, and billing and collection practices, and the extent to which a finding of non-compliance could result in customer refunds, penalties or other non-recoverable expenses;
    - Increased municipalization and other forms of bypass in the Utility's service territory; and
    - Other factors discussed in PG&E Corporation's SEC reports.
-

**Item 7.01 Regulation FD Disclosure**

The information included in Exhibit 99.2 is incorporated by reference in response to this Item 7.01, and is deemed to be furnished, not filed, pursuant to Item 7.01 of Form 8-K.

**Item 9.01 Financial Statements and Exhibits**
