**This release contains certain forward-looking statements that involve risks and uncertainties that could cause actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. Such forward-looking statements include statements regarding the proposed transaction, Discovery Partner International's (DPI) and the combined company's net cash at closing, the trading of the combined company's shares on the NASDAQ National Market, the potential value created by the proposed merger for DPI's and Infinity's stockholders, DPI's deployment of its resources and ability to engage in strategic transactions or divest its various business units, the efficacy, safety, and intended utilization of Infinity's product candidates, the conduct and results of discovery efforts and clinical trials, and plans regarding regulatory filings, future research and clinical trials and plans regarding current and future collaborative activities. Factors that may cause actual results to differ materially include the risk that DPI and Infinity may not be able to complete the proposed transaction, the risk that Infinity's product candidates and compounds that appeared promising in early research and clinical trials do not demonstrate safety and/or efficacy in clinical trials, the risks associated with reliance on collaborative partners for further clinical trials and other development activities, risks involved with development and commercialization of product candidates, the risk that DPI may be unable to divest itself of or otherwise transfer ownership of some or all of its business units on satisfactory terms or at all, the risk that DPI's net cash at closing will be lower than currently anticipated, and risks and other uncertainties more fully described in DPI's annual report on Form 10-K for the year ended December 31, 2005 as filed with the Securities and Exchange Commission and DPI's other SEC reports. You are urged to consider statements that include the words may, will, would, could, should, believes, estimates, projects, potential, expects, plans, anticipates, intends, continues, forecast, designed, goal, or the negative of those words or other comparable words to be uncertain and forward-looking. The transaction is subject to customary closing conditions, including approval of DPI's and Infinity's stockholders.**

**Any forward-looking statements are made pursuant to Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and, as such, speak only as of the date made. DPI undertakes no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise.**
