The exact applicable price and effective date may not be as set forth in the table above, in which case:

- if the actual applicable price is between two applicable prices listed in the table above, or the actual effective date is between two effective dates listed in the table above, the Issuer will determine the number of additional shares by linear interpolation between the numbers of additional shares set forth for the higher and lower applicable prices, or for the earlier and later effective dates based on a 365-day year, as applicable;
- if the actual applicable price is greater than \$30.00 per share (subject to adjustment in the same manner as the applicable prices in the table above), the Issuer will not increase the conversion rate; and
- if the actual applicable price is less than \$6.11 per share (subject to adjustment in the same manner as the applicable prices in the table above), the Issuer will not increase the conversion rate.

However, the Issuer will not increase the conversion rate as described above to the extent the increase will cause the conversion rate to exceed 163.6661 shares per \$1,000 principal amount of Notes. The Issuer will adjust this maximum conversion rate in the same manner in which, and for the same events for which, the Issuer must adjust the conversion rate as described under Description of notes Conversion rights Adjustments to the conversion rate in the Preliminary Prospectus Supplement.
