-

Item 2.05 Costs Associated with Exit or Disposal Activities

On November 17, 2011, KEMET Corporation (the Company) issued a news release announcing a cost savings initiative which includes facility closures in Italy that will commence during fiscal year 2013. The cost savings initiative is a continuation of the Company's efforts to restructure its manufacturing operations within Europe, primarily within its Film and Electrolytic segment. Construction will start in the near-term on a new manufacturing facility in Pontecchio, Italy, that will allow the closure and consolidation of multiple manufacturing operations located in Italy. The Company will also evaluate whether an impairment charge may be required related to the carrying value of the facilities to be affected by a closure in the future and it is also reviewing the value of certain manufacturing assets within Europe. The one-time termination benefits to be incurred are estimated to be \$6.5 million to \$7.0 million and are expected to be accrued in the quarter ending December 31, 2011. The expected future cash expenditures are estimated to be \$6.5 million to \$7.0 million and are expected to occur in several quarters during fiscal years 2013 and 2014.
