PECO Energy Company Default Service Program: Spring 2010 Procurement Results for Large Commercial & Industrial Fixed-Price Product

Pursuant to its Default Service Program, which was approved by the Pennsylvania Public Utility Commission (PAPUC) on April 16, 2009, PECO Energy Company (PECO) has completed its Spring 2010 power procurement. On May 26, 2010, the PAPUC approved the winning bids. Part of this solicitation included a one-time procurement for a fixed-price full-requirements product (including energy, capacity, ancillary services and renewable energy portfolio standard requirements) to serve participating Large Commercial & Industrial customers (i.e., those with annual peak demands greater than 500 kW) from January 1, 2011 through December 31, 2011. The average winning wholesale bid price for this product was \$77.55/MWh.

PECO is sending fixed-price retail generation service offers based on this result to all Large Commercial & Industrial customers who enrolled prior to the procurement to receive these offers. The offers will be held open for a 30-day election period. After electing to accept the offer, a customer may leave the service without penalty at any time before or during the delivery period, but cannot return to the fixed-price offer. Customers not selecting the fixed-price offer or who leave the service during the delivery period will be served either through licensed electric generation suppliers or PECO's default hourly rate.

In accordance with Default Service Program guidelines for reporting procurement results, summary information about the remaining winning bids -- for residential and small- and medium-size commercial customer classes -- from the Spring 2010 procurement will be released on or after June 23, 2010.
