Municipal High Income Fund Inc.

Dear Shareholder:

Enclosed herein is the quarterly report for the Municipal High Income Fund Inc. ("Fund") for the nine months ended July 31, 2002. In this report, we summarize what we believe to be the period's prevailing economic and market conditions and outline our investment strategy. A detailed summary of the Fund's performance can be found in the appropriate sections that follow. We hope you find this report useful and informative.

Performance Update

During the nine months ended July 31, 2002, the Fund distributed income dividends to shareholders totaling \$0.43 per share. The table below details the annualized distribution rate and the nine-month total return for the Fund based on its July 31, 2002 net asset value ("NAV") per share and the New York Stock Exchange ("NYSE") closing price.(1)

Price Per Share	Annualized Distribution Rate(2)	Nine-Month Total Return(2)
-----	-----	-----
\$8.44 (NAV)	6.61%	2.59%
\$8.16 (NYSE)	6.84%	(0.47)%

- 
- (1) The NAV is calculated by subtracting total liabilities from the closing value of all securities held by the Fund (plus all other assets) and dividing the results (total net assets) by the total number of shares outstanding. The NAV fluctuates with changes in the value of the securities in which the Fund has invested. However, the price at which the investor may buy or sell shares of the Fund is at their market (NYSE) price as determined by supply and demand.
  - (2) Total returns are based on changes in NAV or the market price, respectively. Total returns assume the reinvestment of all dividends and/or capital-gains distributions in additional shares. Annualized distribution rate is the Fund's current monthly income dividend rate,

## Edgar Filing: MUNICIPAL HIGH INCOME FUND INC - Form N-30B-2

annualized, and then divided by the NAV or the market price noted in this report. The annualized distribution rate assumes a current monthly income dividend rate of \$0.0465 for 12 months. This rate is as of July 31, 2002 and is subject to change. The important difference between a total return and an annualized distribution rate is that the total return takes into consideration a number of factors including the fluctuation of the NAV or the market price during the period reported. The NAV fluctuation includes the effects of unrealized appreciation or depreciation in the Fund. Accordingly, since an annualized distribution rate only reflects the current monthly income dividend rate annualized, it should not be used as the sole indicator to judge the return you receive from your Fund investment. Past performance is not indicative of future results.

1

=====  
===== [CLIP ART] =====

During the nine months ended July 31, 2002, the Fund generated a total return based on NAV of 2.59%. In comparison, the Fund's Lipper Inc. ("Lipper") peer group of high-yield municipal debt closed-end funds returned 2.94% based on NAV for the same period.(3)

### Investment Strategy

The Fund seeks to maximize current income exempt from federal income tax(4) by investing, under normal market conditions, at least 80% of the value of its net assets, plus any borrowings for investment purposes, in intermediate-term and long-term municipal securities.(5)

### Economic and Market Overview

The U.S. campaign against terrorism, mixed economic signals as well as a multitude of high profile U.S. corporate scandals resulted in heightened investor apprehension and extended stock market volatility. As a result, the U.S. Treasury market directly benefited from this volatility as investors sought a "safe haven." Municipal bond prices also fared well in this environment. However, total returns for municipal bonds lagged U.S. Treasuries during the second half of 2001 as a heavy calendar of tax-exempt new issues prevented municipal prices from keeping pace with their taxable counterparts. State and local governments combined to issue large amounts of municipal debt to fund new projects and refinance outstanding issues during the period.

Total returns in the high yield segment of the municipal market were also significantly below those on better quality paper as the "flight to quality" placed a great deal of emphasis on high grade debt with shorter maturities. This trend caused the yield curve(6) to steepen (yields on short-term paper declined far more dramatically than yields on long-term bonds) and credit quality spreads (the difference in yield between higher quality and lower quality bonds) to widen. One part of the market that was particularly hard hit, as a direct result of the September 11th terrorist attacks was special airport facilities financings for airlines. However, our expectation of a

- 
- (3) Source: Lipper Inc. Average annual total returns are based on nine-month period as of July 31, 2002, calculated among 12 funds in the closed-end high-yield municipal debt fund category, as defined by Lipper Inc., with reinvestment of dividends and capital gains, excluding sales charges.
  - (4) Certain investors may be subject to the Federal Alternative Minimum Tax ("AMT"), and state and local taxes may apply. Capital gains, if any, are

Edgar Filing: MUNICIPAL HIGH INCOME FUND INC - Form N-30B-2

fully taxable.

- (5) The Fund's investments are subject to interest rate and credit risks. Portfolio holdings may include lower-quality securities that present greater risk of loss of principal and interest than higher-rated securities. Investments in high-yield securities commonly known as "junk bonds" involve a greater risk of loss than an investment in investment-grade securities and are considered speculative.
- (6) The yield curve is the graphical depiction of the relationship between the yield on bonds of the same credits quality but different maturities.

2

=====

===== [CLIP ART] =====

gradually improving economy may alleviate credit quality concerns, which we anticipate may enhance the relative performance prospects of high yield municipals.

The new calendar year commenced with a decline in short-term rates due to seasonal technical factors arising from the "January effect." The January effect describes a temporary increase in the demand for money-market instruments caused by an influx of cash from maturing bonds and coupon interest chasing a dearth of supply.

A significant rise in yields occurred during March, as a shift in monetary-policy sentiment coupled with positive economic data roiled the money markets. However at the conclusion of the March, May and June Federal Open Market Committee ("FOMC") (7) meetings, the U.S. Federal Reserve Board ("Fed") held the federal funds rate ("fed funds rate") (8) steady. As the bond market continued its rise, tax-free instruments continued to look attractive.

Treasury yields were lower at the end of the reporting period than they were at the end of the first quarter due to continued weakness in the U.S. equities market as well as geopolitical concerns. The equities market stabilized during the first quarter of 2002 as the result of positive growth in Gross Domestic Product ("GDP"), (9) but subsequently suffered through one of the worst quarters in recent history during the second quarter. The U.S. Treasury market continued to experience large inflows as a result of equity market uncertainty.

Market and Economic Outlook

Although the economy may struggle for another quarter or so, we believe it is on the road to recovery and should gain momentum by late 2002. We also expect inflation to remain subdued. Therefore, we believe the FOMC will not raise the fed funds rate through the end of the calendar year. While we have some concerns about an improving economy putting pressure on bonds, we anticipate that fixed income markets should perform well as long as geopolitical risk is high and corporate malaise continues.

We feel one obstacle to this recovery could be lingering skepticism among some investors about truthfulness in corporate accounting practices. However, we also feel corporate profits could improve enough by late 2002 and early 2003 to exceed investor expectations.

-----

- (7) The FOMC is a policy-making body of the Federal Reserve System responsible for the formulation of a policy designed to promote economic growth, full employment, stable prices, and a sustainable pattern of international trade and payments.

Edgar Filing: MUNICIPAL HIGH INCOME FUND INC - Form N-30B-2

- (8) The fed funds rate is the interest rate that banks with excess reserves at a Federal Reserve district bank charge other banks that need overnight loans. The fed funds rate often points to the direction of U.S. interest rates.
- (9) GDP is a market value of goods and services produced by labor and property in a given country.

=====

===== [CLIP ART] =====

Municipal-bond market pundits are predicting a record year for new-issue financing, as state and local governments are expected to take advantage of a renewed low interest-rate environment. This large amount of supply may keep price levels low, a point which could help municipal bonds offer competitive returns versus many other securities in the fixed-income market.

We continue to pay close attention to credit quality, as many states and municipalities face future budget challenges caused by a depressed stock market and shrinking tax revenues. In our opinion this weaker revenue picture may have credit rating implications for many states, especially states that rely heavily on capital gains taxes as a source of income.

In closing, thank you for investing in the Municipal High Income Fund Inc. We look forward to continuing to help you meet your investment objectives.

Sincerely,

/s/ Heath B. McLendon

/s/ Peter M. Coffey

Take Advantage of the Fund's Dividend Reinvestment Plan!

Did you know that Fund investors may reinvest their dividends in an effort to take advantage of what can be one of the most effective wealth-building tools available today? When the Fund achieves its objectives, systematic investments

Edgar Filing: MUNICIPAL HIGH INCOME FUND INC - Form N-30B-2

by shareholders put time to work for them through the strength of compounding.

As an investor in the Fund, you can participate in its Dividend Reinvestment Plan ("Plan"), a convenient, simple and efficient way to reinvest your dividends and capital gains, if any, in additional shares of the Fund. A more complete description of the Plan begins on page 27. Below is a short summary of how the Plan works.

Plan Summary

If you are a Plan participant who has not elected to receive your dividends in the form of a cash payment, then your dividend and capital gain distributions will be reinvested automatically in additional shares of the Fund.

The number of common stock shares in the Fund you will receive in lieu of a cash dividend is determined in the following manner. If the market price of the common stock is equal to or higher than 98% of the net asset value ("NAV") per share on the date of valuation, you will be issued shares for the equivalent of either 98% of the most recently determined NAV per share or 95% of the market price, whichever is greater.

If 98% of the NAV per share at the time of valuation is greater than the market price of the common stock, or if the Fund declares a dividend or capital gains distribution payable only in cash, the Fund will buy common stock for your account in the open market or on the New York Stock Exchange.

If the Fund begins to purchase additional shares in the open market and the market price of the shares subsequently rises above 98% of the NAV before the purchases are completed, the Fund will attempt to cancel any remaining orders and issue the remaining dividend or distribution in shares at 98% of the Fund's NAV per share. In that case, the number of Fund shares you receive will be based on the weighted average of prices paid for shares purchased in the open market and the price at which the Fund issues the remaining shares.

To find out more detailed information about the Plan and about how you can participate, please call PFPC Global Fund Services at (800) 331-1710.

[CLIP ART]

Municipal High Income Fund Inc.  
Bond Ratings (unaudited)

The definitions of the applicable ratings symbols are set forth below:

Standard & Poor's Ratings Service ("Standard & Poor's") -- Ratings from "AA" to "CC" may be modified by the addition of a plus (+) or a minus (-) sign to show relative standings within the major rating categories.

## Edgar Filing: MUNICIPAL HIGH INCOME FUND INC - Form N-30B-2

- AAA -- Bonds rated "AAA" have the highest rating assigned by Standard & Poor's. Capacity to pay interest and repay principal is extremely strong.
- AA -- Bonds rated "AA" have a very strong capacity to pay interest and repay principal and differ from the highest rated issue only in a small degree.
- A -- Bonds rated "A" have a strong capacity to pay interest and repay principal although it is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than debt in higher rated categories.
- BBB -- Bonds rated "BBB" are regarded as having an adequate capacity to pay interest and repay principal. Whereas they normally exhibit adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay interest and repay principal for debt in this category than in higher rated categories.
- BB, B, CCC and CC -- Bonds rated "BB", "B", "CCC" and "CC" are regarded, on balance, as predominantly speculative and with respect to capacity to pay interest and repay principal in accordance with the terms of the obligation. "BB" represents a lower degree of speculation than "B", and "CC" the highest degree of speculation. While such bonds will likely have some quality and protective characteristics, these are outweighed by large uncertainties or major risk exposures to adverse conditions.

Moody's Investors Service ("Moody's") -- Numerical modifiers 1, 2 and 3 may be applied to each generic rating from "Aa" to "Ca," where 1 is the highest and 3 the lowest rating within its generic category.

- Aaa -- Bonds rated "Aaa" are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as "gilt edge." Interest payments are protected by a large or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues.
- Aa -- Bonds rated "Aa" are judged to be of high quality by all standards. Together with the "Aaa" group they comprise what are generally known as high grade bonds. They are rated lower than the best bonds because margins of protection may not be as large in "Aaa" securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long-term risks appear somewhat larger than in "Aaa" securities.
- A -- Bonds rated "A" possess many favorable investment attributes and are to be considered as upper medium grade obligations. Factors giving security to principal and interest are considered adequate but elements may be present which suggest a susceptibility to impairment some time in the future.

16

[CLIP ART]

Municipal High Income Fund Inc.  
Bond Ratings (unaudited) (continued)

- Baa -- Bonds rated "Baa" are considered as medium grade obligations, i.e., they are neither highly protected nor poorly secured. Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such

Edgar Filing: MUNICIPAL HIGH INCOME FUND INC - Form N-30B-2

bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.

- Ba -- Bonds rated "Ba" are judged to have speculative elements; their future cannot be considered as well assured. Often the protection of interest and principal payments may be very moderate thereby not well safeguarded during both good and bad times over the future. Uncertainty of position characterizes bonds in this class.
- B -- Bonds rated "B" generally lack characteristics of desirable investments. Assurance of interest and principal payments or of maintenance of other terms of the contract over many long period of time may be small.
- Caa -- Bonds that are rated "Caa" are of poor standing. These issues may be in default, or there may be present elements of danger with respect to principal or interest.
- Ca -- Bonds rated "Ca" represent obligations which are speculative in a high degree. Such issues are often in default or have other marked shortcomings.

Fitch IBCA, Duff & Phelps ("Fitch") -- Ratings from "BBB" to "C" may be modified by the addition of a plus (+) sign or minus (-) to show relative standings with the major ratings categories.

- BBB -- Bonds rated "BBB" by Fitch currently have a low expectation of credit risk. The capacity for timely payment of financial commitments is considered to be adequate. Adverse changes in economic conditions and circumstances, however, are more likely to impair this capacity. This is the lowest investment grade category assigned by Fitch.
- BB -- Bonds rated BB by Fitch carry the possibility of credit risk developing, particularly as the result of adverse economic change over time. Business or financial alternatives may, however, be available to allow financial commitments to be met. Securities rated in this category are not considered by Fitch to be investment grade.
- CCC, CC and C -- Default on bonds rated "CCC", "CC" and "C" by Fitch is a real possibility. The capacity to meet financial commitments depends solely on a sustained, favorable business and economic environment. Default of some kind on bonds rated "CC" appears probable, a "C" rating indicates imminent default.
- NR -- Indicates that the bond is not rated by Standard & Poor's, Moody's or Fitch.

Short-Term Bond Ratings (unaudited)

=====

- A-1 -- Standard & Poor's highest commercial paper and variable-rate demand obligation (VRDO) rating indicating that the degree of safety regarding timely payment is either overwhelming or very strong; those issues determined to possess overwhelming safety characteristics are denoted with a plus (+) sign.
- VMIG 1 -- Moody's highest rating for issues having a demand feature -- VRDO.

Notes to Financial Statements (unaudited)

### 1. Significant Accounting Policies

Municipal High Income Fund Inc. ("Fund"), a Maryland corporation, is registered under the Investment Company Act of 1940, as amended, as a diversified, closed-end management investment company.

The significant accounting policies consistently followed by the Fund are: (a) security transactions are accounted for on trade date; (b) securities are valued at the mean between the bid and asked prices provided by an independent pricing service. Securities with no readily obtainable market quotations are valued at fair value as determined by an independent pricing service under the supervision of the Fund's Board of Directors; (c) securities maturing within 60 days are valued at cost plus accreted discount, or minus amortized premium, which approximates value; (d) gains or losses on the sale of securities are calculated by using the specific identification method; (e) interest income, adjusted for amortization of premium and accretion of discount, is recorded on an accrual basis; (f) dividends and distributions to shareholders are recorded on the ex-dividend date; (g) the Fund intends to comply with the applicable provisions of the Internal Revenue Code of 1986, as amended, pertaining to regulated investment companies and to make distributions of taxable income sufficient to relieve it from substantially all Federal income and excise taxes; (h) the character of income and gains to be distributed are determined in accordance with income tax regulations which may differ from accounting principles generally accepted in the United States of America; and (i) estimates and assumptions are required to be made regarding assets, liabilities and changes in net assets resulting from operations when financial statements are prepared. Changes in the economic environment, financial markets and any other parameters used in determining these estimates could cause actual results to differ.

In November 2000, the American Institute of Certified Public Accountants ("AICPA") issued a revised version of the AICPA Audit and Accounting Guide for Investment Companies ("Guide"). This revised version is effective for financial

Edgar Filing: MUNICIPAL HIGH INCOME FUND INC - Form N-30B-2

statements issued for fiscal years beginning after December 15, 2000. The revised Guide requires the Fund to amortize premium and accrete all discounts on all fixed-income securities. The Fund adopted this requirement November 1, 2001. This change does not affect the Fund's net asset value, but does change the classification of certain amounts in the statement of operations. For the nine months ended July 31, 2002, interest income increased by \$56,335, net realized loss increased by \$6,257 and the change in net unrealized depreciation of investments increased by \$50,078. In addition, the Fund recorded adjustments to increase the cost of securities and increase undistributed net investment income by \$125,262 to reflect the cumulative effect of this change up to the date of the adoption.

Notes to Financial Statements (unaudited) (continued)  
 =====

2. Exempt-Interest Dividends and Other Distributions

The Fund intends to satisfy conditions that will enable interest from municipal securities, which is exempt from Federal income tax, to retain such tax-exempt status when distributed to the shareholders of the Fund.

Capital gains distributions, if any, are taxable to shareholders, and are declared and paid at least annually.

3. Investment Advisory Agreement, Administration Agreement and Other Transactions

Smith Barney Fund Management LLC ("SBFM"), a subsidiary of Salomon Smith Barney Holdings Inc. ("SSBH"), which, in turn, is a subsidiary of Citigroup Inc. ("Citigroup"), acts as investment adviser to the Fund. The Fund pays SBFM an advisory fee calculated at an annual rate of 0.40% of the average daily net assets. SBFM also acts as the administrator of the Fund for which it receives a fee calculated at an annual rate of 0.20% of the average daily net assets. These fees are calculated daily and paid monthly.

All officers and two Directors of the Fund are employees of Citigroup or its affiliates.

4. Investments

During the nine months ended July 31, 2002, the aggregate cost of purchases and proceeds from sales of investments (including maturities, but excluding short-term securities) were as follows:

Purchases .....	\$50,117,112
	=====
Sales .....	\$49,204,453
	=====

At July 31, 2002, the aggregate gross unrealized appreciation and depreciation of investments for Federal income tax purposes were substantially as follows:

Gross unrealized appreciation .....	\$ 4,708,071
Gross unrealized depreciation .....	(18,162,674)
	-----
Net unrealized depreciation .....	\$(13,454,603)

5. Capital Loss Carryforwards

At October 31, 2001, the Fund had, for Federal income tax purposes, approximately \$4,340,000 of capital loss carryforwards available to offset future capital gains. To the extent that these capital loss carryforwards are used to offset capital gains, it is probable that the gains so offset will not be distributed. The amount and expiration of the carryforwards are indicated below. Expiration occurs on October 31 of the year indicated:

	2002	2003	2004	2005	2007	2008	2009
	-----	-----	-----	-----	-----	-----	-----
Carryforward amounts .....	\$1,198,000	\$270,000	\$205,000	\$400,000	\$786,000	\$748,000	\$730,000

6. Capital Shares

At July 31, 2002, the Fund had 500,000,000 shares of capital stock authorized with a par value of \$0.01 per share. Capital stock transactions were as follows:

	Nine Months Ended July 31, 2002		Year Ended October 31, 2001	
	Shares	Amount	Shares	Amount
	-----	-----	-----	-----
Shares issued on reinvestment .....	150,097	\$1,241,152	235,025	\$2,166,492

Municipal High Income Fund Inc.  
 Dividend Reinvestment Plan (unaudited)

=====

The Fund's policy, which may be changed by the Fund's Board of Directors, is generally to make monthly distributions of substantially all its net investment income (i.e., income other than net realized capital gains) to the holders of the Fund's common stock. From time to time, when the Fund makes a substantial capital gains distribution, it may do so in lieu of paying its regular monthly dividend, net income of the Fund consists of all interest income accrued on portfolio assets less all expenses of the Fund. Expenses of the Fund are accrued each day. Net realized capital gains, if any, will be distributed to the shareholders at least once a year.

Under the Fund's Dividend Reinvestment Plan ("Plan"), a shareholder whose common stock is registered in his or her own name will have all distributions reinvested automatically by PFPC Global Fund Services ("PFPC"), as purchasing agent under the Plan, unless the shareholder elects to receive cash. Distributions with respect to shares registered in the name of a broker-dealer or other nominee (that is, in "street name") will be reinvested by the broker or nominee in additional shares under the Plan, unless the service is not provided by the broker or nominee or the shareholder elects to receive distributions in cash. Investors who own common stock registered in street name should consult their broker-dealers for details regarding reinvestment. All distributions to shareholders who do not participate in the Plan will be paid by check mailed

## Edgar Filing: MUNICIPAL HIGH INCOME FUND INC - Form N-30B-2

directly to the record holder by or under the direction of PFPC, as dividend-paying agent.

The number of shares of common stock distributed to participants in the Plan in lieu of a cash dividend is determined in the following manner. Whenever the market price of the common stock is equal to or exceeds 98% of net asset value ("NAV") per share on the determination date (generally, the record date for the distribution), participants will be issued shares of common stock valued at the greater of (1) 98% of the NAV or (2) 95% of the market price. To the extent that the Fund issues shares to participants in the Plan at a discount to NAV, the interests of remaining shareholders (i.e., those who do not participate in the Plan) in the Fund's net assets will be proportionately diluted.

If 98% of the NAV per share of the common stock at the time of valuation (which is the close of business on the determination date) exceeds the market price of common stock, or if the Fund declares a dividend or capital gains distribution payable only in cash, PFPC will buy common stock in the open market, on the NYSE or elsewhere, for the participants' accounts. If, following the commencement of the purchases and before PFPC has completed its purchases, the market price exceeds 98% of what the NAV per share of the common stock was at the valuation time, PFPC will attempt to terminate purchases in the open market and cause the Fund to issue the remaining portion of the dividend or distribution by issuing shares at a price equal to the greater of (1) 98% of the NAV per share as of the valuation time, or (2) 95% of the then current market price. In this case, the number of shares of common stock received by a Plan participant will be based on the

27

[CLIP ART]

Municipal High Income Fund Inc.  
Dividend Reinvestment Plan (unaudited) (continued)

=====

weighted average of prices paid for shares purchased in the open market and the price at which the Fund issues the remaining shares. To the extent PFPC is unable to stop open market purchases and cause the Fund to issue the remaining shares, the average per share price paid by PFPC may exceed 98% of the NAV per share of the common stock. PFPC will begin to purchase common stock on the open market as soon as practicable after the payment date of the dividend or capital gains distribution, but in no event shall such purchases continue later than 30 days after that date, except when necessary to comply with applicable provisions of the Federal securities laws.

PFPC maintains all shareholder accounts in the Plan and furnishes written confirmations of all transactions in each account, including information needed by a shareholder for personal and tax records. The automatic reinvestment of dividends and capital gains distributions will not relieve Plan participants of any income tax that may be payable on the dividends or capital gains distributions. Common stock in the account of each Plan participant will be held by PFPC in uncertificated form in the name of the Plan participant.

Plan participants are subject to no charge for reinvesting dividends and capital gains distributions under the Plan. PFPC's fees for handling the reinvestment of dividends and capital gains distributions will be paid by the Fund. No brokerage charges shall apply with respect to shares of common stock issued directly by the Fund under the Plan. Each Plan participant will, however, bear a pro-rata share of brokerage commissions actually incurred with respect to any open market purchases made under the Plan.

Experience under the Plan may indicate that changes to it are desirable.

Edgar Filing: MUNICIPAL HIGH INCOME FUND INC - Form N-30B-2

The Fund reserves the right to amend or terminate the Plan as applied to any dividend or capital gains distribution paid subsequent to written notice of the change sent to participants at least 30 days before the record date for the dividend or capital gains distribution. The Plan also may be amended or terminated by PFPC or the Fund on at least 30 days' written notice to Plan participants. All correspondence concerning the Plan should be directed by mail to PFPC Global Fund Services, P.O. Box 8030, Boston, Massachusetts 02266-8030 or by telephone at 1-800-331-1710.

-----

Notice is hereby given in accordance with Section 23(c) of the Investment Company Act of 1940, as amended, that from time to time the Fund may purchase at market prices shares of its common stock in the open market. As of July 31, 2002, the Fund has not repurchased any shares.
