Item 8.01 Other Events

On February 22, 2016, Pacific Gas and Electric Company (the “Utility”), a subsidiary of PG&E Corporation, filed supplemental testimony in its 2017 General Rate Case (“GRC”) pending at the California Public Utilities Commission (“CPUC”). In the GRC, the CPUC will determine the Utility’s revenue requirements for its electric distribution, natural gas distribution, and electric generation operations for 2017 through 2019. The Utility’s supplemental testimony reduces the Utility’s previously requested 2017 revenue requirement increase of \$457 million (as compared to the 2016 authorized amount) to \$333 million, representing a \$124 million reduction from the previous request. The requested increase for 2018 is reduced from \$489 million to \$469 million and the requested increase for 2019 is reduced from \$390 million to \$368 million. The revised request reflects the impact of the recent five-year extension of the federal tax code provisions regarding bonus depreciation (comprising \$78 million of the \$124 million reduction), the tax-deductibility of repair costs (comprising \$38 million of the \$124 million reduction) and other minor adjustments (comprising \$8 million of the \$124 million reduction). The impact of this reduction on the Utility’s forecast of rate base over the GRC period has been included in the investor materials associated with PG&E Corporation’s webcast conference call held on February 18, 2016 to discuss its financial results for the quarter and year ended December 31, 2015. These materials were attached as Exhibit 99.2 to the Current Report on Form 8-K that was furnished by PG&E Corporation and the Utility to the Securities and Exchange Commission on February 18, 2016. These materials are also available at PG&E Corporation’s website at www.pgecorp.com under the Investors tab.
