PUBLIC COMPANY MANAGEMENT CORPORATION
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 - BASIS OF PRESENTATION

The accompanying unaudited interim financial statements of Public Company Management Corporation (“PCMC”) have been prepared in accordance with accounting principles generally accepted in the United States of America and the rules of the Securities and Exchange Commission (“SEC”), and should be read in conjunction with the audited financial statements and notes thereto filed with the SEC on Form 10-KSB filed with the SEC on December 28, 2006. In the opinion of management, all adjustments necessary for a fair presentation of financial position and the results of operations for the interim periods presented have been reflected herein. The results of operations for interim periods are not necessarily indicative of the results to be expected for the full year. Notes to the financial statements which would substantially duplicate the disclosures contained in the audited financial statements for fiscal year 2006 as reported in the Form 10-KSB have been omitted.

Restatements. PCMC restated the Consolidated Statement of Cash Flows for the six months ended March 31, 2006 to classify Proceeds from Sale of Marketable Securities from Net Cash Provided by Investing Activities to Net Cash Used in Operating Activities. The effect of the restatement on Net Cash Used In Operating Activities and Net Cash Provided by Investing Activities is as follows:

	Six Months Ended March 31, 2006 (unaudited)
As originally reported:	
Net Cash Used in Operating Activities	\$ (134,807)
Net Cash Provided by Investing Activities	114,895
Restated:	
Net Cash Used in Operating Activities	\$ (19,912)
Net Cash Provided by Investing Activities	-

NOTE 2 - COMMON STOCK

During the six months ended March 31, 2007, PCMC issued 194,054 shares, valued at \$55,925, for prior year accrued share-based compensation and 959,450 shares, valued at \$222,675, for the current six month period services rendered. These shares were valued at their fair market value ranging from \$0.13 to \$0.42 per share.

During the six months ended March 31, 2007, PCMC accrued a total of 238,776 shares valued at \$53,100 for services to be paid in stock in the future. This amount is included in accounts payable and accrued expenses to related parties in the accompanying consolidated balance sheets.

NOTE 3 - RELATED PARTY

During the six months ended March 31, 2007, the President and CEO made net advances to PCMC of \$427,598 for funding of operating activities.

NOTE 4 - EMPLOYMENT AGREEMENT

PCMC hired an executive-level employee under a one year agreement, beginning November 1, 2006, with a minimum salary of \$2,000 and 10,000 registered common shares per month which accrue monthly and are paid on a quarterly

basis. At March 31, 2007, the minimum total future commitment due was \$14,000 cash and 70,000 shares. The executive also received 25,000 shares as a signing bonus and is entitled to receive restricted and registered shares of PCMC's common stock based on certain milestones as provided in the agreement.

NOTE 5 - SUBSEQUENT EVENTS

PCMC revised its written agreements with two of its consultants who serve as executive officers subsequent to the current period. The agreements provide for a minimum annual salary (adjustable upwards in some cases based on PCMC's performance) to be paid in cash and registered shares of PCMC's common stock. At March 31, 2007, the minimum total future commitment due under both agreements was cash compensation of \$103,500, stock compensation of 270,000 registered shares, and signing bonuses of 50,000 registered shares. The executives are also entitled to receive restricted and registered shares of PCMC's common stock based on certain milestones as provided in the agreements.

5

Item 2. Management's Discussion and Analysis.

The following discussion may contain “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended (the “Securities Act”), and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), which can be identified by the use of forward-looking terminology such as, “may,” “believe,” “expect,” “intend,” “anticipate,” “estimate,” or “continue” or the negative thereof or other variations thereof or comparable terminology. Although we believe that the expectations reflected in such forward-looking statements are reasonable, we can give no assurance that such expectations will prove to have been correct. Our operations involve a number of risks and uncertainties, including those described under the heading “Risk Factors” in our Annual Report on Form 10-KSB and other documents filed with the Securities and Exchange Commission. Therefore, these types of statements may prove to be incorrect.

Overview

We are a management consulting services firm that educates and assists companies to improve their business, management and regulatory compliance processes. We provide educational materials that help private companies successfully operate their businesses and determine whether they should become public and the appropriate methods available to them, management consulting services and advice as these private companies go through the process of becoming fully reporting, publicly traded companies, and regulatory compliance services aimed at maintaining their public status. In addition, we created the PCMC Bulletin Board 30 Index®, a comprehensive tracking index of OTC bulletin board (“OTCBB”) stocks to increase awareness of the OTCBB as a public equity market and our exposure to small business issuers.

Our clients consist primarily of growing small-to-middle market private companies that:

- Have a business plan showing a potential for profitable operation and above normal growth within three to five years;
- Operate in either established markets, high growth potential niche markets and/or market segments that are differentiated, driven by pricing power or mass scale standardized product/service delivery; and
- Have an experienced management team that owns a significant portion of their current equity.

How We Generate Revenue

We derived revenue from the following activities:

Educational White Papers, Open Lines and Consultations. We have a database of over 140 educational white papers that serve growth-stage business owners and financial executives. We sell these white papers at retail prices ranging from \$9.95 to \$194.95 per paper. We also conduct open lines communications and consultations with potential clients regarding their business, their regulatory compliance and corporate governance processes, and the requirements relating to becoming and remaining a public company. We expect that a certain number of these sales, open lines and consultations will translate into clients, and that we will enter into contracts with them to provide our management consulting and regulatory compliance services.

Management Consulting Services. We currently generate most of our revenue from management consulting services that we provide to our clients in their process to become fully reporting, publicly traded companies. Our rate for these services is \$350 per hour; however, we offer these services pursuant to consulting contracts for a flat-fee consisting of cash and restricted shares of the client’s common stock. We value the restricted shares at the price per share of contemporaneous sales of common stock by our clients to unrelated third parties. When there is no public trading

market and there have been no recent private sales of the common stock, we record the value as deferred revenues. Effective with the second quarter ended March 31, 2005, we adopted a revenue recognition policy in which we recognize a portion of the revenue related to our consulting contracts at the completion of each of the following four milestones:

- (i) initial due diligence of client's business and operations and private round of initial financing (20%);

6

(ii) clients' preparation of a second round of financing in the form of a private placement memorandum or registration statement for filing with the SEC (20%);

(iii) effectiveness of clients' registration statement (25%); and

(iv) clients' qualification for quotation on the OTCBB or listing on a securities market or exchange (35%).

We have determined that each milestone generally requires us to provide a certain amount of hours of management consulting services for our clients to achieve the milestone. When there are delays in our clients achieving milestones, it typically has required us to provide additional services to the clients outside of the direct scope of our consulting contracts. Our contracts allow us to bill our clients by the hour for any and all services that we provide outside of the direct scope of the contract. We are implementing a web-based system for project management and time tracking (discussed below in the section entitled "Known Trends, Events and Uncertainties" under the heading "Technology") in an effort to place more importance on the amount of services hours that we spend on our clients and to bill our clients for additional service hours. During the period covered by this report, we billed one of our clients that has experienced significant delays for such additional services hours and agreed to accept additional shares of the client's common stock in lieu of cash compensation for such services (discussed below in the section entitled "Known Trends, Events and Uncertainties" under the heading "Revenue Recognition").

Compliance Services. We plan to generate more revenue from compliance services under twelve-month contracts with our clients that are required to file periodic and other reports with the SEC. These services will also include corporate governance matters under the Sarbanes-Oxley Act of 2002. Our rate for these services is \$350 per hour; however, historically we have contracted for these services for a flat-fee consisting of cash and restricted shares of the client's common stock. Under our new engagements, we provide these services solely for cash.

Known Trends, Events and Uncertainties

Revenue Recognition

During the period covered by this report, we completed management consulting services for the first milestone for two of our clients. As a result, we generated aggregate revenue of \$506,700 for the first of four milestones during the period. We also received 500,000 shares of common stock of one of these clients during the period covered by this report. We valued the stock at \$4.00 per share (or an aggregate of \$2,000,000) based upon contemporaneous third party sales and included the amount, net the revenue generated from this client, in non-marketable securities with an offset to deferred revenues.

During the period covered by this report, we implemented new client billing policies for additional services that we provide outside of the direct scope of our contracts. We provided approximately two hundred fourteen hours of such additional services due to significant delays that the client has experienced in making it through the process of becoming a fully reporting, publicly traded company. Under our contract with this client, we are allowed to bill \$350 per hour for such additional services. During the period covered by this report, we received an additional 500,000 shares of the clients common stock, which we valued at \$0.15 per share (or an aggregate of \$75,000) based upon contemporaneous third-party sales by the client of its common stock. As a result, we generated revenue of \$75,000 for these additional services. We plan to use the web-based system for project management and time tracking (discussed below under the heading "Technology") to bill other clients in a similar manner and generate revenue in the form of additional shares of common stock of the clients or cash.

We deemed one of our client contracts as inactive during the period covered by this report. We own 500,000 shares of the client's common stock, which we had valued at \$0.075 per share (or an aggregate of \$37,500) and have received \$5,000 in cash from the client. In deeming the client inactive, we impaired the common stock to \$0.00 and recognized

revenue of \$5,000 related to the cash received for services rendered.

7

We have experienced delays in recognizing revenue from our contracts for management consulting services. Whether or not we meet the milestones for recognizing such revenue is dependent on the time it takes for our clients to make it through the process of becoming fully reporting, publicly traded companies. Our clients face obstacles in undertaking this process. The primary obstacles which they face relate to their ability to provide suitable non-financial statement information and financial statement information. In addition, some of our clients have experienced delays in reorganizing or restructuring their organizations to suit that of a public company and others have run out of financial resources due to unexpected events including the delays themselves. For example, we signed a client in March 2005 and earned revenue for the client reaching the first milestone during that same month. The client experienced delays which continue to persist and a run up of costs in reorganizing and providing suitable financial statement information for purposes of a registration statement or a private placement of their common stock, which the client never commenced. As a result, the client's financial statements became unusable for their intended purpose. Although we last earned revenue from this client in March 2005, we have continued to provide management consulting services to the client. The client has improved its business processes, engaged an audit coordinator (discussed below) and is continuing with the process.

Oftentimes the small, privately held companies that we service do not have personnel with the skills necessary to prepare audited financial statements suitable for filing with the SEC. Even when these companies have audited financial statements, generally, the financial statements do not comply with SEC regulations and/or the audit was not performed by an accounting firm that is registered with the Public Company Accounting Oversight Board (the "PCAOB"). The SEC has specific regulations that govern the form and content of and requirements for financial statements required to be filed with the SEC. The Sarbanes-Oxley Act of 2002 prohibits accounting firms that are not registered with the PCAOB from preparing or issuing audit reports on U.S. public companies and from participating in such audits. It is imperative for our clients to become fully reporting, publicly traded companies that their financial statements comply with SEC regulations which require, among other things, that they be audited by an accounting firm registered with the PCAOB. In addition to audited financial statements, in certain circumstances, SEC regulations also require our clients to file unaudited interim financial statements that have been reviewed by the clients' PCAOB registered independent auditor. As discussed above, our clients have faced obstacles in preparing their financial statements.

During fiscal 2006, we introduced audit coordinators into our business model to assist our clients in preparing their financial statements in compliance with SEC regulations. In many cases, we mandate that our clients engage an audit coordinator. Initially, an audit coordinator will interview a client's personnel, and review a client's accounting systems and methodology and financial records to determine their proficiency and level of adherence to accounting standards. If a client does not have suitable personnel, the audit coordinator will recommend early in the process that the client hire someone internally who can fulfill the client's accounting function. Audit coordinators also serve as a liaison between the client and their independent auditor during the audit or financial statement review process. Audit coordinators teach our clients how to accumulate and communicate financial information within their organizations and record, process, summarize and report their financial information within the time periods specified by the SEC. We expect that audit coordinators will shorten the time it takes for our clients to prepare their financial statements and reach milestones, which should have a positive effect on our revenue and results of operations.

National Marketing

During the period covered by this report, we increased our national advertising activities directed at client acquisition. We acquired one new client during this period. We expect to acquire new clients in the future as a result of these activities and our Nevada economic development initiatives discussed below.

We have improved our marketing efforts and prescreening process to engage better quality clients that we believe are more capable of meeting the obstacles and moving through the process of becoming fully reporting, publicly traded companies more quickly than we have seen in the past. Though we anticipate that the newer client engagements will

be potentially more valuable and may have higher contract completion success rates, the frequency of newly signed contracts may decrease as a result of stricter client screening criteria.

8

Nevada Economic Development

According to the Nevada Secretary of State, there are approximately 300,000 corporations domiciled in Nevada. During 2006, at least 41,083 corporations were formed in Nevada. During 2005 and 2004, 39,052 and 35,186 corporations, respectively, were formed in Nevada. We believe that at this time, there are advantages to concentrating our marketing efforts in the State of Nevada because we perceive Nevada as offering the following benefits:

· Favorable securities, corporate and tax laws and regulations for small businesses;

· Large number of small businesses that could benefit from our services;

· Fastest growing State in the U.S.; and

· Largest number of new small businesses in the U.S.

We are increasing our public awareness and client base in the State of Nevada through print advertisements geared towards business professionals by reinforcing our position as an educational resource as well as a service provider. We believe that increased public awareness of our educational materials, services and Nevada roots could bring new resources and create jobs in Nevada as well as assist in turning Nevada into a platform to develop capital markets for small business issuers.

Our President, CEO and majority shareholder and our CFO are both Nevada residents. They have networks of business contacts that can assist us in creating our public awareness in Nevada and assist us in the development of Nevada companies. We established a Nevada Economic Development Advisory Board (“NEDAB”) whose website is located at www.Nevada-EDAB.com.

NEDAB is a council of prominent businesspersons and legislators who share a vision of diversified economic growth through participation in capital markets and are working with other businesses and the government to make that vision a reality. NEDAB believes that Nevada has the potential to become the premier destination in the U.S. for small business issuers looking to enter the capital markets; that Nevada corporations across a variety of industries can benefit from participating in the capital markets as a way to build long-term shareholder value, provide access to capital, increase visibility and improve business practices to meet the standards of being a public company; and that an increased number of Nevada corporations successfully entering and sustaining participation in the capital markets will create diversified economic growth, increase the number of companies that physically relocate to Nevada, create new jobs and increase revenue for the state. NEDAB will consist of approximately ten members (in addition to advisors) who are prominent businesspersons and politicians to aid in our goals of increasing our public awareness and developing a strong client base in Nevada which we believe will contribute to the overall economic growth of the State and further benefit our business. It will also consist of locally-based industry screening committees that will help identify and screen companies that are good candidates for participation in the public markets.

Activities of NEDAB include:

- **Locally-based Industry Screening Committees** to help identify and screen companies that are good candidates for participation in the public markets.
- **Outreach** to other economic development groups, legislators, regulators, business owners, and business and industry leaders.
- **Educational Programs** for companies seeking to learn about capital markets and the advantages of domiciling in Nevada as a private or public company.

· **Policy Research and Recommendations** to make Nevada even more attractive as a home for companies wanting to participate in capital markets.

9

Current members of NEDAB include:

- Mark Daigle, NEDAB Co-Chairman and President and CEO of Colonial Bank N.A. Nevada.
- Paul Henry, Esq., President and CEO of Henry & Associates, LLC.
- Robert Uithoven, President of J3 Strategies and Manager for Jim Gibbons' successful 2006 gubernatorial campaign in Nevada.

Advisors to NEDAB include:

- Bob Beers, PCMC Nevada Client Audit Coordinator, and Nevada State Senator District 6.
- Tim Carlson, NEDAB Economic Development Advisor, CEO of Powered by Renewables and Former Executive Director of Nevada Development Authority & Nevada Commission on Economic Development.
- R. Keith Schwer, Ph.D., NEDAB Research and Development Advisor, Director of the Center for Business and Economic Research at The University of Nevada, Las Vegas (UNLV), and Professor of Economics at UNLV.
- D. Neal Tomlinson, Esq., NEDAB General Counsel, and attorney at Bullivant Houser Bailey PC.

Current industry screening committee members include:

- Dr. Emil Frei III, NEDAB Life Sciences Screening Committee Chair, cancer research pioneer, and former Director and Physician-in-Chief of Dana-Farber Cancer Institute.
- James R. Eells, M.D., NEDAB Life Sciences Screening Committee Associate Chair, Las Vegas internist, and former Chief of Medicine of The United States Air Force.

Technology

We are leading by example and pioneering the use of technology to manage our decentralized, virtual operational infrastructure under a program that we call Always-On Management™. The program addresses the challenges of using technology to manage a geographically disbursed team. While many of these technologies have been available for several years, the management practices around their use are typically not mature in small businesses like us outside of the technology industry. We believe that our use of these technologies allows us to better serve our clients and improve operational efficiency and profitability. We hope that our efforts will create publicity for us and provide us with additional management consulting services opportunities.

We are implementing a web-based system for project planning and time tracking. We will be placing more importance on keeping track of time allocation on client engagements in order to fully identify potential revenue for additional services provided to clients beyond the scope of our basic engagement. We expect that this new system will support our ongoing process of improving operational efficiency and profitability. The system's web-based interface will allow us and the professional service providers who serve our clients to track their time on client engagements. We are integrating the system with our accounting system which we expect will accelerate the accounts receivable process for additional services which we may bill by the hour.

We plan to implement software to help develop our business strategy and track key performance indicators and perform financial ratio analysis. We plan for our executive management team and Global Advisory Board to use the resulting strategy and financial scorecards to identify opportunities for improvement in our business model and to

communicate our progress to shareholders, and the investment community.

10

Results of Operations for the Six Months Ended March 31, 2007 Compared to the Six Months Ended March 31, 2006.

Our revenue increased \$187,171, or 24%, to \$979,331 for the six months ended March 31, 2007, as compared to \$792,160 for the six months ended March 31, 2006. During the six months ended March 31, 2007 we generated most of our revenue from the completion of management consulting services for the first milestone for two of our clients. Historically, our clients have faced obstacles in undertaking the process of becoming fully reporting, publicly traded companies which includes preparing financial and other information and reorganizing their operations. Although, the two clients for which we recognized revenue during the period covered by this report experienced delays in reorganizing their businesses and reaching the first milestone, our engagements with respect to these clients are more valuable than several of our prior engagements which resulted in the increase in our revenue.

General and administrative expense increased \$169,500, or 20%, to \$1,037,051 for the six months ended March 31, 2007, as compared to general and administrative expense of \$867,551 for the six months ended March 31, 2006. The increase in general and administrative expense was primarily due to a \$137,990 increase in business development and marketing expenses related to a rise in our national marketing efforts and our marketing efforts in the State of Nevada via the introduction of NEDAB. We also had an increase in officer compensation of \$146,775 and a net increase in other expenses related to our operations and administrative activities of \$26,325. These increases were offset by a decrease in legal expenses of \$141,590.

Bad debt expense was \$13,058 for the six months ended March 31, 2007, as compared to bad debt expense of \$70,500 for the six months ended March 31, 2006.

Depreciation and amortization expense decreased \$6,247, or 25%, to \$18,393 for the six months ended March 31, 2007, as compared to depreciation and amortization expense of \$24,640 for the six months ended March 31, 2006. The decrease in depreciation and amortization was primarily a result of having certain capitalized website costs and fixed assets becoming fully depreciated.

Total operating expenses increased \$105,811, or 11%, to \$1,068,502 for the six months ended March 31, 2007, as compared to total operating expenses of \$962,691 for the six months ended March 31, 2006, which was primarily due to the increase in general and administrative expense discussed above.

Interest expense decreased \$1,729, or 5%, to \$30,072 for the six months ended March 31, 2007, as compared to interest expense of \$31,801 for the six months ended March 31, 2006. During the six months ended March 31, 2007, the amount of liabilities on which we incurred interest increased, but the resulting interest expense was less than the one-time charge for the consolidation and renewal modification of a note payable during the six months ended March 31, 2006.

Interest income increased to \$970 for the six months ended March 31, 2007, as compared to interest income of \$12 for the six months ended March 31, 2006. The increase in interest income was due to an increase in our cash balances.

We had realized loss on sale of marketable securities of \$10,396 for the six months ended March 31, 2007, as compared to realized gain on sale of marketable securities of \$23,951 for the six months ended March 31, 2006. The change from realized gain to realized loss on sale of marketable securities was due to transactions at a lower market value than book value of securities sold.

Unrealized loss on marketable securities increased \$54,646, or 22%, to \$301,817 for the six months ended March 31, 2007, as compared to unrealized loss on marketable securities of \$247,171 for six months ended March 31, 2006. The increase in unrealized loss on marketable securities was primarily due to changes in the values of marketable securities.

We had an impairment of interest receivable of \$6,428 for the six months ended March 31, 2007, due to a write off. This write-off occurred because no payments of the interest receivable had been made in the twelve month period prior to the write-off. We did not have any impairment of interest receivable for the six months ended March 31, 2006.

Net loss increased \$11,374, or 3%, to \$436,914 (and net loss per share of \$0.02) for the six months ended March 31, 2007, as compared to a net loss of \$425,540 (and net loss per share of \$0.02) for the six months ended March 31, 2006. The increase in net loss was primarily attributable to the increase in unrealized loss on marketable securities and the increase in total operating expenses.

We had an accumulated deficit of \$1,888,027 and total stockholders' equity of \$736,964 as of March 31, 2007.

Liquidity and Capital Resources

We had total current assets of \$1,401,234 as of March 31, 2007, which consisted of cash of \$16,264, net accounts receivable of \$36,487 and marketable securities of \$1,348,483.

We had total current liabilities of \$6,334,803 as of March 31, 2007, which consisted of deferred revenues of \$4,928,155, advances from related party of \$648,022 that we received from Stephen Brock our President and CEO, accounts payable and accrued expenses to related parties of \$380,025, accounts payable and accrued expenses of \$312,571, bank line of credit of \$37,410 and current portion of installment notes payable of \$28,620. During the six-month period covered by this report, we accrued compensation of \$90,000 to Mr. Brock and compensation of \$56,925 to other executive officers payable in cash.

We had negative working capital of \$4,933,569 as of March 31, 2007. The ratio of current assets to current liabilities was 22% as of March 31, 2007.

The underlying driver which impacts our working capital is having clients that have made it through the process of becoming fully reporting, publicly traded companies. Until this time, there is no market for the shares of our clients' common stock which we receive in lieu of cash payments for our services. Our billing rate for these services is \$350 per hour; however, we offer these services for a flat-fee of 22% cash, some of which we apply to cover our overhead and the remainder in restricted shares of the clients' common stock. Until such time as our clients' common stock becomes publicly traded, we classify our shares as non-marketable securities, a long-term asset; however, we classify deferred revenue associated with our contracts as a current liability. As a result, the common stock of any particular client will have a negative effect on our working capital until such time as the client becomes a fully reporting, publicly traded company. As our clients become fully reporting, publicly traded companies, non-marketable securities, which was \$5,576,108 as of March 31, 2007, would become marketable securities, which was \$1,348,483 as of March 31, 2007, and deferred revenues, which was \$4,928,155 as of March 31, 2007, would decrease. Both of these results would have a significant positive impact on our working capital; however, new client contracts would create additional non-marketable securities and deferred revenues which would marginally offset such positive effect. Accounts payable and accrued expenses increased \$185,536 and accounts payable and accrued expenses to related parties increased \$159,113 during the six months ended March 31, 2007, which had an adverse effect on our working capital. Accounts payable and accrued expenses to related parties consisted of compensation payable to Stephen Brock, our President and CEO, and other executive officers. We believe that we could decrease the relative amount of these and other current liabilities as our clients' common stock becomes publicly traded and we are able to sell shares that we own for cash and use that cash to pay expenses.

Having clients that have made it through the process of becoming publicly traded also drives our ability to generate cash flows from operations. We have adopted a policy to sell all marketable securities as quickly as reasonably possible to generate cash for operations. However, even if markets do develop for the shares of client common stock which we hold, those markets will most likely be illiquid and highly volatile. We could continue to face difficulty in

generating positive cash flows from operations from sales of the marketable securities.

12

During the six months ended March 31, 2007, we had a net increase in cash of \$5,221; consisting of \$413,535 provided by financing activities which was partially offset by \$403,120 used in operating activities and \$5,194 used in investing activities.

Net cash used in operating activities was \$403,120 for the six months ended March 31, 2007, consisting of net loss of \$436,914, an increase in marketable and non-marketable securities of \$2,026,110 and an increase in accounts and stock receivable of \$64,779 which were offset by adjustments for share based compensation of \$222,675, depreciation and amortization of \$18,393, bad debt expense of \$13,058 and impairment of interest receivable of \$6,428, an increase in deferred revenue of \$1,519,480, an increase in accounts payable and accrued expenses of \$185,536 and an increase in accounts payable and accrued expenses to related parties of \$159,113.

Net cash used in investing activities was \$5,194 for the six months ended March 31, 2007, which related to the purchase of fixed assets.

Net cash provided by financing activities was \$413,535 for March 31, 2007, consisting of loan proceeds from a related party of \$427,598 which was partially offset by payments on installment notes payable of \$13,810 and net payments on bank line of credit of \$253. Loan proceeds from a related party represents \$448,107 we received from Stephen Brock, our President and CEO less payments of \$20,509.

We believe that we can meet our cash requirements during the next twelve months from sales of marketable securities, new clients, client milestone cash payments and certain capital raising efforts being undertaken. Further, in the past, Stephen Brock has provided personal capital funding to us for operations. Mr. Brock has expressed his intent to continue to support our operations with additional funds in the event other outside funding sources or sales of marketable securities do not provide sufficient funds during the next twelve months; provided, however, that Mr. Brock is financially able to do so, of which there can be no assurance. In addition, we increased our efforts, which involved litigation in some instances, to collect cash payments owed to us from clients who breached our agreements. We plan to continue these efforts during the next twelve months. We do not have any firm commitments or other identified sources of additional capital from third parties or from our officers including Mr. Brock or from shareholders.

During the six months ended March 31, 2007, Stephen Brock provided us with \$448,107 of funding for our operations. Further, we may seek a greater line of credit or private equity capital to finance our operations until more clients' common stock becomes publicly traded and we are able to dispose of our shares of their common stock.

Critical Accounting Policies

Our discussion and analysis of our financial condition and results of operations is based upon our financial statements, which have been prepared in accordance with accounting principals generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of any contingent assets and liabilities. On an on-going basis, we evaluate our estimates. We base our estimates on various assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

We believe the following critical accounting policies affect our more significant judgments and estimates used in the preparation of our financial statements:

Revenue Recognition. Revenue is recognized when the earning process is complete and the risks and rewards of ownership have transferred to the client, which is generally considered to have occurred upon performance of the

services provided. The services provided sometimes take several months. Effective with the second quarter ended March 31, 2005, we adopted a revenue recognition policy for management consulting services based on the value received by our clients at measurable milestones in the public reporting process. We concluded that the relative values of our consulting services for each of the milestones are as follows: (i) initial due diligence of client's business and operations and private round of initial financing (20%), (ii) client's preparation of a second round of financing in the form of a private placement memorandum or a registration statement for filing with the SEC (20%), (iii) effectiveness of client's registration statement (25%) and (iv) client's qualification for quotation on the OTCBB or listing on a securities market or exchange (35%). Revenues are not recognized for the value of securities received as payment for services when there is no public trading market and there have been no recent private sales of the security.

If we find that the relative amount of man hours and other expenditures required by us has materially changed for one or more of the milestones and that this change is of such a nature that it would likely also be incurred by our competitors in the marketplace or would change the relative value received by the clients for that milestone, it could warrant changing the percentages prospectively. As of the period covered by this report, we had nine performing management consulting services contracts with an aggregate value of \$4,237,500 of which \$2,721,180 was included in deferred revenues and subject to changes in the percentage revenue earned for the remaining milestones.

Valuation of marketable securities. Marketable securities are classified as trading securities, which are carried at their fair value based upon quoted market prices of those securities at each period-end; however, if the facts and circumstances do not justify carrying the securities at such value, then we carry them at historical pricing. Accordingly, net realized and unrealized gains and losses on trading securities are included in net income. The marketable securities that we own are traded on the OTCBB and the Pink Sheets. The market price for these securities is subject to wide fluctuations from period to period which may cause fluctuations in our results of operations.

Valuation of non-marketable securities. Non-marketable securities are not publicly traded and therefore do not have a readily determinable fair value. Management estimates the value of non-marketable securities based on contemporaneous third party private sales, the valuation of closely similar companies or independent, third party valuations. Non-marketable securities are reflected on our balance sheet at historical costs. As of March 31, 2007, we had non-marketable securities valued at \$5,576,108 primarily as a result of third party private sales by our clients of their common stock at per share prices ranging from \$0.10 to \$4.00. As our clients become fully reporting, publicly traded companies, non-marketable securities become marketable securities (discussed above). Due to the uncertainty inherent in valuing securities that are not publicly traded, our determinations of fair value of non-marketable securities may differ significantly from the values that would exist if a ready market for these securities existed; therefore, the value of non-marketable securities we own could be significantly different than their value as marketable securities classified as trading securities. We reassess the value of our clients' common stock for purposes of recording impairment, if any, to non-marketable securities.

Item 3. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

Our Chief Executive Officer and our Chief Financial Officer, after evaluating the effectiveness of our "disclosure controls and procedures" (as defined in the Securities Exchange Act of 1934 Rules 13a-15(e) and 15d-15(e)) as of the end of the period covered by this report (the "Evaluation Date"), have concluded that as of the Evaluation Date, our disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act (i) is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure, and (ii) is recorded, processed, summarized and reported within the time periods specified in the Commission's rules and forms.

Changes in Internal Control over Financial Reporting

There were positive changes in our internal control over financial reporting that occurred during the period covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Historically, we had material weaknesses in our internal control over financial reporting related to recording stock-based compensation, revenue recognition, and valuation on non-marketable securities which no longer persist. We have created memoranda to document our policies regarding these matters and devoted more time to quarter-end closing procedures and accounting positions. The additional time has allowed us to engage in more qualitative conference calls to discuss stock-based compensation to consultants and others, items of revenue recognition and client status and to study all stock-based compensation using spread sheets, projections and reports from our transfer agent. During this time, our Chief Executive Officer and our Chief Financial Officer also review and discuss our financial information with our other executive officers, audit coordinator and bookkeeper, and we devote more time to developing and reviewing the section of our reports entitled "Management's Discussion and Analysis."

PART II - OTHER INFORMATION

Item 1. Legal Proceedings.

In April 2006, UgoMedia Interactive Corporation and we entered into a stipulated payment order, which was filed in the District Court of Clark County, Nevada in a breach of contract case which we had brought against UgoMedia in July 2004. Pursuant to the order, UgoMedia was obligated to pay us an aggregate of \$315,000 during the period from April 2006 to October 2006. UgoMedia had paid us \$61,500, but has defaulted on the remainder of the payment as of September 30, 2006. As a result of UgoMedia's failure to make payment, we have the right to immediately enter judgment for the balance then due, less payments previously received, together with interest on the then unpaid balance at the rate of 8% per annum until fully paid. The order also provides that one of the individual defendants is subject to a \$40,000 judgment inclusive of the \$315,000 that was owed to us by UgoMedia; however, this judgment is subject to a dollar-for-dollar credit for all sums paid to us by UgoMedia. We also have the right to enter judgment against the individual, subject to the credit and any amounts paid to us by the individual, if UgoMedia fails to make the scheduled payments or cure such failure. We entered judgment on December 15, 2006 and are attempting to collect, but there can be no assurance.

On September 13, 2006, we filed a lawsuit against Supremacy Financial Corporation in the District Court of Clark County, Nevada for breach of contract among other claims. We provided management consulting services to Supremacy; however, they did not pay us all of the compensation to which we are entitled under the contract. We are seeking specific performance of the contract, declaratory judgment setting forth the rights and responsibilities under the contract, general and special damages, attorney's fees, costs and interest. Supremacy has filed a counterclaim against us for breach of contract and other causes related to our performance under the contract and the lawsuit. Supremacy is seeking general, special and punitive damages, attorney's fees, costs and interest.

We are a party to various litigation that is normally incident to our business and which, individually and in the aggregate, do not involve claims against us for damages, exclusive of interest and costs, in excess of 10% of our current assets.

Item 2. Unregistered Sales of Equity Securities.

The following table lists unregistered sales of our securities during the period covered by this report.

Name	Shares of Common Stock	Consideration	Value	Date⁽¹⁾
William Smith	25,000	Global Advisory Board services	\$ 9,250	02/06/2007
William Smith	125,000	Consulting services rendered	\$ 28,750	03/12/2007
William Smith	75,000	Consulting services rendered	\$ 13,500	03/27/2007
