QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934
For the quarterly period ended: September 30, 2010

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934
For the transition period from _____ to _____

Commission File No. 000-53501
DERY CZ SCIENTIFIC, INC.
(Exact name of registrant as specified in its charter)

Nevada
(State or other jurisdiction of incorporation or
organization)

11-3797644
(I.R.S. Employer Identification No.)

1524 Cloverfield Blvd., Suite E, Santa Monica,
California
(Address of principal executive offices)

90404
(Zip Code)

(310) 477-0354
(Registrant's telephone number, including area code)

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company)

Accelerated filer
Smaller reporting company

Edgar Filing: Derycz Scientific Inc - Form 10-Q

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock as of the latest practicable date: As of November 10, 2010, there were 13,096,223 shares of common stock outstanding.

DERY CZ SCIENTIFIC, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
For the Three Months Ended September 30, 2010 and 2009 (Unaudited)

Note 1 — Organization, Nature of Business and Basis of Presentation

(a) Organization

Derycz Scientific, Inc. (the “Company”) was incorporated in the State of Nevada on November 2, 2006. On November 2, 2006 the Company entered into a Share Exchange Agreement with Reprints Desk, Inc., a Delaware corporation formed on January 6, 2006. Derycz was formed to facilitate a holding company structure. At the closing of the transaction contemplated by the Share Exchange Agreement, the Company acquired all of the 550,000 outstanding shares of Reprints from the shareholders of Reprints and issued 8,000,003 of its common shares to the shareholders of Reprints. As the intention behind forming Derycz was the creation of a holding company structure and Derycz had no appreciable assets prior to the acquisition of Reprints, the exchange ratio was determined arbitrarily and was not based on any determination of the value of shares of Derycz common stock as compared to Reprints shares acquired. As each former Reprints shareholder acquired a percentage interest in Derycz equal to the percentage interest such shareholder held in Reprints immediately prior to the transaction, there was no dilution of the interest of any former Reprints shareholder. Following completion of the exchange transaction, Reprints became a wholly owned subsidiary of the Company. The transaction was accounted as a statutory merger of companies under common control. As such, the historical financial statements of the Company are combined with the operations of Reprints since its inception, and the merger shares are accounted for as a stock split as of the inception of Reprints for financial reporting purposes.

(b) Nature of business

Derycz Scientific seeks to facilitate the use of scientific and technical information in both traditional and innovative ways. The Company serves both the publishers who own the rights to use such information and the customers who use it. The Company utilizes web-based platforms as well as traditional delivery channels and is developing products and services that make it easier for our customers to find and use scientific and technical information. The Company operates within the periodicals publishing industry which is a large market. The Company has developed products in the following areas:

- Reprints, ePrints and Article Distribution Systems
- Commercial Printing Services
- Publisher Outsourced Reprint Management
- Logistics Services for copyright and regulatory sensitive documents

(c) Basis of Presentation

The accompanying financial statements are consolidated and include the accounts of the Company and its wholly owned subsidiaries. The consolidated accounts include 100% of assets and liabilities of our wholly owned subsidiaries. Intercompany balances and transactions have been eliminated in consolidation.

Note 2 — Summary of Significant Accounting Policies

(a) Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets

Edgar Filing: Derycz Scientific Inc - Form 10-Q

and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting periods. Actual results could differ from these estimates.

The more significant items subject to such estimates and assumptions include fair value of our equity securities, carrying amount and useful lives of property and equipment, goodwill, other intangible assets, valuations of accounts receivable and accounting for income taxes.

7

(b) Concentration of credit risk

No customers accounted for more than 10% of the revenues for the three months ended September 30, 2010 and one customer accounted for 14% of the revenue for the three months ended September 30, 2009.

As of June 30, 2010, three customers accounted for 14%, 13% and 12% of accounts receivable, and no customers accounted for more than 10% of accounts receivable at September 30, 2010.

During the three months ended September 30, 2010 the Company's purchases from one vendor represented 21% of our content costs.

(c) Impairment of long-lived assets

The Company reviews and evaluates its long-lived assets for impairment when events or changes in circumstances indicate that the related carrying amounts may not be recoverable. Impairment is considered to exist if the total estimated future cash flows on an undiscounted basis are less than the carrying amount of the assets, including goodwill, if any. An impairment loss is measured and recorded based on discounted estimated future cash flows. In estimating future cash flows, assets are grouped at the lowest level for which there are identifiable cash flows that are largely independent of future cash flows from other asset groups.

Based upon management's assessment, there were no indicators of impairment of the Company's long-lived assets as of September 30, 2010 and June 30, 2010.

(d) Stock-based compensation

The Company periodically issues stock options and warrants to employees and non-employees in capital raising transactions, for services and for financing costs. The Company accounts for share-based payments under the guidance as set forth in the Share-Based Payment Topic of the FASB Accounting Standards Codification, which requires the measurement and recognition of compensation expense for all share-based payment awards made to employees, officers, directors, and consultants, including employee stock options based on estimated fair values. The Company estimates the fair value of share-based payment awards to employees and directors on the date of grant using an option-pricing model, and the value of the portion of the award that is ultimately expected to vest is recognized as expense over the required service period in the Company's Statements of Operations. The Company accounts for stock option and warrant grants issued and vesting to non-employees in accordance with the authoritative guidance whereas the value of the stock compensation is based upon the measurement date as determined at either a) the date at which a performance commitment is reached, or b) the date at which the necessary performance to earn the equity instruments is complete. Stock-based compensation is based on awards ultimately expected to vest and is reduced for estimated forfeitures. Forfeitures are estimated at the time of grant and revised, as necessary, in subsequent periods if actual forfeitures differ from those estimates.

(e) Goodwill and intangible assets

Management performs impairment tests of goodwill and indefinite-lived intangible assets whenever an event occurs or circumstances change that indicate impairment has more likely than not occurred. Also, management performs impairment testing of goodwill and indefinite-lived intangible assets at least annually.

The Company accounts for acquisition of a business in accordance with guidance issued by the FASB, which may result in the recognition of goodwill. Goodwill is related to the Company's acquisition of Pools Press. Goodwill is not amortized. Rather, goodwill is assessed for impairment at least annually. Management tests goodwill for impairment at the reporting unit level. The Company has two reporting units. The Company tests goodwill by using a

two-step process. In the first step, the fair value of the reporting unit is compared with the carrying amount of the reporting unit, including goodwill. If the carrying amount of the reporting unit exceeds its fair value, goodwill is considered impaired and a second step is performed to measure the amount of impairment loss, if any.

The Company reviews intangible assets subject to amortization at least annually to determine if any adverse conditions exist or a change in circumstances has occurred that would indicate impairment or a change in the remaining useful life. If the carrying value of an asset exceeds its undiscounted cash flows, the Company writes down the carrying value of the intangible asset to its fair value in the period identified. If the carrying value of assets is determined not to be recoverable, the Company records an impairment loss equal to the excess of the carrying value over the fair value of the assets. The Company's estimate of fair value is based on the best information available, in the absence of quoted market prices. The Company generally calculates fair value as the present value of estimated future cash flows that the Company expects to generate from the asset using a discounted cash flow income approach as described above. If the estimate of an intangible asset's remaining useful life is changed, the Company amortizes the remaining carrying value of the intangible asset prospectively over the revised remaining useful life.

Based upon management's annual assessment, there were no indicators of impairment of the Company's goodwill or intangible assets as of September 30, 2010 or June 30, 2010.

(f) Shipping and handling costs

The Company includes shipping and handling charges billed to its customers in its revenues, and classifies shipping and handling costs of the sale of its products as a component of cost of sales. Those costs were approximately \$95,964 and \$27,668, respectively, for the three months ended September 30, 2010 and 2009.

(g) Net Income (Loss) per share

The FASB requires presentation of basic earnings per share and diluted earnings per share. Basic net income (loss) per share is computed by dividing the net income (loss) by the weighted average number of common shares available. Weighted average number of shares outstanding reflects the equivalent number of shares received as a result of the exchange transaction as if these shares had been outstanding as of the beginning of the earliest period presented. Diluted income (loss) per share is computed similar to basic income (loss) per share except that the denominator is increased to include the number of additional common shares that would have been outstanding if the potential common shares had been issued and if the additional common shares were dilutive. Warrants to purchase 2,855,009 and 2,800,009 shares of common stock have been excluded from the calculation of diluted net loss per share for the three months ended September 30, 2010 and 2009, respectively, and options to purchase 1,401,000 and 1,022,000 shares of common stock outstanding as of September 30, 2010 and 2009, respectively, have been excluded from the calculation as the effect would have been anti-dilutive.

(h) Marketing and advertising expenses

Marketing and advertising expenses are expensed as incurred and consist primarily of various forms of media purchased from Internet-based marketers and search engines. Marketing and advertising expense amounted to \$114,524 and \$38,453 for the three months ended September 30, 2010 and 2009, respectively.

(i) Reclassifications

The Company has reclassified \$181,617 of costs previously included in general administrative costs in the three months ended September 30, 2009 to costs of sales to conform to 2010 presentation.

(j) Recently issued accounting pronouncements

In April 2010, the FASB issued new accounting guidance in applying the milestone method of revenue recognition to research or development arrangements. Under this guidance management may recognize revenue contingent upon the achievement of a milestone in its entirety, in the period in which the milestone is achieved, only if the milestone meets all the criteria within the guidance to be considered substantive. This standard is effective on a prospective basis for research and development milestones achieved in fiscal years, beginning on or after June 15, 2010. Early adoption is permitted; however, adoption of this guidance as of a date other than January 1, 2011 will require the Company to apply this guidance retrospectively effective as of January 1, 2010 and will require disclosure of the effect of this guidance as applied to all previously reported interim periods in the fiscal year of adoption. As the Company plans to implement this standard prospectively, the effect of this guidance will be limited to future transactions. The Company does not expect adoption of this standard to have a material impact on its financial position or results of operations as it has no material research and development arrangements which will be accounted for under the milestone method.

In January 2010, the FASB issued new accounting guidance which requires new disclosures regarding transfers in and out of Level 1 and Level 2 fair value measurements, as well as requiring presentation on a gross basis of information about purchases, sales, issuances and settlements in Level 3 fair value measurements. The guidance also clarifies existing disclosures regarding level of disaggregation, inputs and valuation techniques. The new guidance is effective for interim and annual reporting periods beginning after December 15, 2009. Disclosures about purchases, sales,

issuances and settlements in the roll forward of activity in Level 3 fair value measurements are effective for fiscal years beginning after December 15, 2010. As this guidance requires only additional disclosure, there should be no impact on the consolidated financial statements of the Company upon adoption.

In October 2009, a new accounting consensus was issued for multiple-deliverable revenue arrangements. This consensus amends existing revenue recognition accounting standards. This consensus provides accounting principles and application guidance on whether multiple deliverables exist, how the arrangement should be separated and the consideration allocated. This guidance eliminates the requirement to establish the fair value of undelivered products and services and instead provides for separate revenue recognition based upon management's estimate of the selling price for an undelivered item when there is no other means to determine the fair value of that undelivered item. Previously the existing accounting consensus required that the fair value of the undelivered item be the price of the item either sold in a separate transaction between unrelated third parties or the price charged for each item when the item is sold separately by the vendor. Under the existing accounting consensus, if the fair value of all of the elements in the arrangement was not determinable, then revenue was deferred until all of the items were delivered or fair value was determined. This new approach is effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010. The Company is in the process of evaluating whether the adoption of this standard will have a material effect on its financial position, results of operations or cash flows.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the American Institute of Certified Public Accountants, and the Securities Exchange Commission did not or are not believed by management to have a material impact on the Company's present or future consolidated financial statements.

The Company does not believe that the adoption of the above recent pronouncements will have a material effect on the Company's consolidated results of operations, financial position, or cash flows.

Note 3 — Property and Equipment

Property and equipment consists of the following as of September 30, 2010 and June 30, 2010:

	September 30, 2010	June 30, 2010
Computer equipment	\$ 134,871	\$ 122,687
Software	179,159	176,586
Printing equipment	328,606	329,092
Furniture and fixtures	59,305	58,132
Autos and vans	4,000	4,000
	705,941	690,497
Less accumulated depreciation	(355,012)	(317,629)
	\$ 350,929	\$ 372,868

Printing equipment includes \$91,792 of equipment under capital lease and related accumulated depreciation of \$71,164 and \$53,545 as of September 30, 2010 and June 30, 2010, respectively.

Depreciation expense for the three months ended September 30, 2010 and 2009 was \$37,383 and \$27,090, respectively.

Note 4 — Stockholders' Equity

Stock Options

On December 21, 2007, the Company established the 2007 Equity Compensation Plan (the "Plan"). The Plan was approved by our Board of Directors and security holders holding a majority of the shares of our common stock outstanding. The total amount of shares subject to the Plan is 1,500,000 shares. On December 21, 2007, we granted options to purchase 530,000 shares of common stock at \$1.50 per share to eight employees and one consultant, which expire on December 21, 2017. The options were valued at \$112,000 using a Black-Scholes valuation model and will be amortized over the vesting period. The exercise price for the options was \$1.50 per share and was based on the fair value of the shares on the date of issuance. For the Black-Scholes calculation, the Company assumed no dividend yield, a risk free interest rate of 4.18%, expected volatility of 25% and an expected term for the options of 7 years.

On May 28, 2009, we granted options to purchase 492,000 shares of common stock at \$1.00 per share to nine employees, which expire on May 28, 2019. The options were valued at \$148,327 using a Black-Scholes valuation model and were expensed on the grant date as the options all vested immediately. The exercise price for the options was \$1.00 per share and was based on the fair value of the shares on the date of issuance. For the Black-Scholes calculation, the Company assumed no dividend yield, a risk free interest rate of 3.67%, expected volatility of 83% and an expected term for the options of 10 years.

Edgar Filing: Derycz Scientific Inc - Form 10-Q

On July 27, 2010, the Company issued options to purchase 379,000 shares of the Company's common stock to thirteen employees, which expire on July 27, 2020. These options vest over 3 years, with one-twelfth of the grant vesting on the last day of each calendar quarter through September 30, 2013.

Stock-based compensation expense of \$20,529 and \$0 was recognized during the three months ended September 30, 2010 and 2009, respectively, relating to the vesting of such options. As of September 30, 2010, the unamortized value of these options was \$225,821, which will be amortized as stock-based compensation cost over three years as the options vest. As of September 30, 2010, these options have no intrinsic value.

Edgar Filing: Derycz Scientific Inc - Form 10-Q

At September 30, 2010 options outstanding are as follows:

	Number of Options	Weighted Average Exercise Price
Balance at July 1, 2010	1,022,000	\$ 1.26
Granted	379,000	\$ 1.02
Exercised	—	
Cancelled	—	
Balance at September 30, 2010	1,401,000	\$ 1.19

Additional information regarding options outstanding as of September 30, 2010 is as follows:

Weighted Average Exercise Price	Number Outstanding	Options Outstanding Weighted Average Remaining Contractual Life (Years)	Weighted Average Exercise Price	Options Exercisable Number Exercisable
\$1.19	1,401,000	8	\$ 1.19	1,053,590

Warrants

At September 30, 2010 warrants outstanding are as follows:

	Number of Warrants	Weighted Average Exercise Price
Balance, July 1, 2010	2,855,009	\$ 1.34
Granted	—	\$ —
Exercised	—	
Balance at September 30, 2010	2,855,009	\$ 1.34

On July 1, 2008, the Company issued warrants to acquire 150,000 shares of our stock at an exercise price of \$2.00 per share and a life of five years to a consultant. The warrants were valued at \$43,693 using a Black-Scholes pricing model with the following assumptions; no dividend yield, risk free interest rate of 4.5%, expected volatility of 25%, and an expected term of the warrants of five years.

On October 8, 2009, the Company issued warrants to acquire 55,000 shares of our stock to a consultant at an exercise price of \$1.50 per share and with a life of five years and which vest over a period of one year. The fair market value of the warrants amortized during the year was \$14,437 using a Black-Scholes pricing model with the following assumptions; no dividend yield, risk free interest rate of 4.5%, expected volatility of 25%, and an expected term of the warrants of five years.

The above warrants are fully vested and have a five year contractual life. There was no intrinsic value to these warrants as of September 30, 2010 and June 30, 2010 based on the trading price of the Company's common stock on September 30, 2010 and June 30, 2010.

On November 12, 2010, the Company accepted an unsolicited offer made to the Company on behalf of certain of the holders of the common stock purchase warrants whereby the holders of those warrants offered to exercise those warrants for cash if the Company would issue an additional warrant exercisable for one-half of the number of shares obtained upon the exercise. The Company has agreed to issue new warrants to these holders upon the cash exercise of these warrants on substantially the terms set forth in the offer letter. The Company cannot determine or control how many of those warrants will actually be exercised under these terms.

Shares issued for services

During the three months ended September 30, 2010, the Company issued 19,393 shares of its common stock valued at \$17,648 based on the trading price of the Company's common stock on the date of the grant to a consultant. Such costs are included in operating expenses in our accompanying statement of operations for the three months ended September 30, 2010.

Note 5 — Line of Credit

The Company entered into a Loan and Security Agreement with Silicon Valley Bank (“SVB”) on July 23, 2010, which provides for a \$3,000,000 revolving line of credit that matures on July 23, 2011. The SVB line of credit bears interest at the prime rate plus 2% for periods in which we maintain an account balance with SVB (less all indebtedness owed to SVB) of at least \$800,000 at all times during the prior calendar month (the “Streamline Period”), and at the prime rate plus 4% when a Streamline Period is not in effect. The line of credit is secured by all our and our subsidiaries’ assets. Approximately \$150,000 of the line of credit is committed to our corporate credit cards.

The line of credit is subject to certain financial and performance covenants which the company was in compliance with as of September 30, 2010. The balance outstanding as of September 30, 2010 was \$1,375,000. As of September 30, 2010, \$1,475,000 was available under the line of credit.

Note 6 – Acquisition of Remaining Interest in Pools Press

On August 31, 2010, the Company purchased the remaining 20% interest in Pools Press, which it did not already own. The Company paid \$120,000 in cash for such interest. The accumulated losses attributable to the minority interest in Pools Press at the time of the acquisition was \$34,904. The Company increased the goodwill attributable to Pools Press by \$85,096 at the time of the acquisition, which represents the purchase price of \$120,000 reduced by the accumulated losses attributable to the minority interest of \$34,904.

Note 7 — Contingencies and Commitments

The Company has long-term contractual commitments with several vendors to purchase content during the next several fiscal years. These commitments total in aggregate \$4,650,000, \$4,350,000, \$4,650,000, \$5,000,000, \$5,400,000, and \$2,800,000 for the fiscal years ending June 30, 2011, 2012, 2013, 2014, 2015 and 2016, respectively.

Note 8 — Income Taxes

The reconciliation of the effective income tax rate to the federal statutory rate is as follows:

	Three months Ended September 30,	
	2010	2009
Federal income tax rate	(34.00)%	(34.00)%
State tax, net of federal benefit	(4.31)%	(3.17)%
Permanent differences	0.90%	(0.07)%
Change in valuation allowance	37.41%	9.70%
Benefit for interim period loss not recorded	—%	27.54%
Effective income tax rate	0.00%	0.00%

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial statement purposes and the amounts used for income tax purposes.

The Company has provided a full valuation allowance on the deferred tax assets at September 30, 2010 and June 30, 2010 to reduce such asset to zero since there is no assurance that the Company will generate future taxable income to utilize such asset. Management will review this valuation allowance requirement periodically and make adjustments as warranted.

At September 30, 2010 and June 30, 2010, the Company had federal net operating loss (“NOL”) carryforwards of approximately \$1,461,000 and state NOL carryforwards of approximately \$1,094,000. Federal NOLs could, if unused,

expire in 2030. State NOLs, if unused, could expire in 2020.

Effective January 1, 2007, the Company adopted FASB guidelines that address the determination of whether tax benefits claimed or expected to be claimed on a tax return should be recorded in the financial statements. Under this guidance, we may recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position should be measured based on the largest benefit that has a greater than fifty percent likelihood of being realized upon ultimate settlement. This guidance also provides guidance on derecognition, classification, interest and penalties on income taxes, accounting in interim periods and requires increased disclosures. At the date of adoption, and as of September 30, 2010 and June 30, 2010, the Company did not have a liability for unrecognized tax benefits, and no adjustment was required at adoption.

The Company files income tax returns in the U.S. federal jurisdiction and various states. The Company is subject to U.S. federal or state income tax examinations by tax authorities for years after 2006.

The Company's policy is to record interest and penalties on uncertain tax provisions as income tax expense. As of September 30, 2010 and June 30, 2010, the Company has no accrued interest or penalties related to uncertain tax positions. Additionally, tax years 2006 through 2010 remain open to examination by the major taxing jurisdictions to which the Company is subject.

Note 9 — Subsequent events

On October 12, 2010, the Company purchased a customer list in exchange for 75,000 shares of common stock valued at \$71,250 based on the trading price of the Company's common stock on the date of the grant.

On October 29, 2010, the Company issued warrants to purchase 600,000 shares of the Company's common stock to two consultants for services. All of the warrants have a four year term. 400,000 of the warrants are exercisable at \$1.25 and vest immediately. The remaining 200,000 warrants vest over one year and are exercisable at \$1.75 per share. These warrants were valued using a Black-Scholes option pricing model at \$378,000 and such cost will be recognized as an expense in future periods.

On November 5, 2010, the Company issued warrants to purchase up to 50,000 shares of the Company's common stock at an exercise price of \$1.25 per share to each of General Merrill McPeak, Mr. Scott Ogilvie and Mr. Gregory Suess, in connection with their appointments to the Company's board of directors on that date. Each of the Warrants is subject to the following vesting schedule: 12,500 shares vest and become exercisable under the Warrant on each of December 31, 2010, March 31, 2011, June 30, 2011 and September 30, 2011. Each Warrant expires on November 5, 2015.

On November 12, 2010, the Company accepted an unsolicited offer made to the Company on behalf of certain of the holders of the common stock purchase warrants issued on December 22, 2006 (the "December 2006 Warrants") whereby these holders of the December 2006 Warrants offered to exercise those warrants for cash if the Company would issue an additional warrant exercisable for one-half of the number of shares obtained upon the exercise, with an exercise price of \$2.00 per share, and with an expiration date of November 17, 2013. The Company has agreed to issue new warrants to these holders upon the cash exercise of the December 2006 Warrants on substantially the terms set forth in the offer letter. The Company cannot determine or control how many of the December 2006 Warrants will actually be exercised under these terms, however, the maximum amount of cash proceeds that the Company may receive from the cash exercise of the December 2006 Warrants is \$3,062,500 and the maximum number of shares of common stock issuable upon the exercise of the new warrants that may be issued under these terms (assuming all of the December 2006 Warrants are exercised for cash) is 1,225,000. The December 2006 Warrants expire on December 22, 2010 and cannot be exercised after that date. The Company will undertake to register the shares underlying the new warrants that are issued and the shares of common stock obtained by the holders on the cash exercise of the December 2006 Warrants, on a best efforts basis prior to March 1, 2011.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

MANAGEMENT'S DISCUSSION
AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of our results of operations and financial condition for the three months ended September 30, 2010 and 2009 should be read in conjunction with the notes to those financial statements that are included in Item 1 of Part 1 this Quarterly Report. Our discussion includes forward-looking statements based upon current expectations that involve risks and uncertainties, such as our plans, objectives, expectations and intentions. Actual results and the timing of events could differ materially from those anticipated in these forward-looking statements as a result of a number of factors, including our limited operating history, our ability to compete successfully with existing and new reprint companies, and the sufficiency of our cash and cash equivalents. We use words such as "anticipate," "estimate," "plan," "project," "continuing," "ongoing," "expect," "believe," "intend," "may," "will," "could," and similar expressions to identify forward-looking statements. All forward-looking statements included in this Quarterly Report are based on information available to us on the date hereof and, except as required by law, we assume no obligation to update any such forward-looking statements.

Overview

Derycz Scientific, Inc. (the "Company" or "Derycz") was incorporated in the State of Nevada on November 2, 2006. In November 2006 the Company entered into a Share Exchange Agreement with Reprints Desk, Inc. ("Reprints"). At the closing of the transaction contemplated by the Share Exchange Agreement, the Company acquired all of the outstanding shares of Reprints from the shareholders of Reprints and issued 8,000,003 of its common shares to the shareholders. Following completion of the exchange transaction, Reprints became a wholly-owned subsidiary of the Company.

On February 28, 2007, the Company entered into an agreement with Pools Press, Inc. ("Pools") of Northbrook, Illinois, a privately held company, pursuant to which the Company acquired 75% of the issued and outstanding common stock of Pools for consideration of \$616,080. The Company purchased the remaining interest in Pools that it did not already own on August 31, 2010. Pools is a commercial printer, specializing in reprints of copyrighted articles. The results of Pools Press' operations have been included in the consolidated financial statements since March 1, 2007.

Derycz, through Reprints and Pools, seeks to facilitate the use of scientific and technical information in both traditional and innovative ways. The Company serves both the publishers who own the rights to use the information and the customers who use the information. The Company utilizes web-based platforms as well as traditional delivery channels and is developing products and services that make it easier for our customers to find and use information. The publishers of scientific and technical information publish hundreds of thousands of new articles each year in addition to the tens of millions of existing articles that have been published in the past. Derycz Scientific, through Reprints, provides its customers with access to that published content and related software, systems and services. Our customers use this content for marketing, regulatory or research purposes. Generally, marketing departments order large quantities of printed copies, called "reprints," that they distribute to interested parties, including customers and doctors who may prescribe a customer's products, and electronic copies, called "eprints", for distribution through the Internet and other electronic mechanisms. Researchers and regulatory personnel generally order single copies, called "document delivery", for use in their research activities. In order to use the content, our customers must pay appropriate copyright fees and our services ensure that we have obtained the necessary permissions from the owners of the published content so that our customers' use of the content complies with applicable copyright laws. Our services alleviate the need for our customers to contact multiple publishers in order to obtain the required permissions. Pools Press also offers other commercial printing products, such as the production of documents, and newsletters as well as distribution logistics for printed materials.

Critical Accounting Policies

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements and accompanying notes, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses, and related disclosure of contingent assets and liabilities. When making these estimates and assumptions, we consider our historical experience, our knowledge of economic and market factors and various other factors that we believe to be reasonable under the circumstances. Actual results may differ under different estimates and assumptions.

The accounting estimates and assumptions discussed in this section are those that we consider to be the most critical to an understanding of our financial statements because they inherently involve significant judgments and uncertainties.

(a) Revenue recognition

The Company's primary source of revenue is from information and printing services. The Company recognizes revenue when the sales process is deemed complete and associated revenue has been earned. The Company's policy is to recognize revenue when services have been performed, risk of loss and title to the product transfers to the customer, the selling price is fixed and determinable and collectibility is reasonably assured.

The Company recognizes revenues from printing services when services have been rendered and accepted by the customer while revenues from the re-use of published articles and rights management services are recognized upon shipment or electronic delivery to the customer.

(b) Stock based compensation

The Company adopted FASB guidelines that require that the cost resulting from all share-based payment transactions be recognized in the financial statements. This guidance establishes fair value as the measurement objective in accounting for share-based payment arrangements and requires all entities to apply a fair-value based measurement method in accounting for share-based payment transactions with employees except for equity instruments held by employee share ownership plans. Effective January 1, 2006, we adopted the fair value recognition provisions of the current guidelines of the FASB, using the modified prospective method. Under this method, the provisions of such guidance apply to all awards granted or modified after the date of adoption and all previously granted awards not yet vested as of the date of adoption.

Determining the appropriate fair value model and calculating the fair value of stock-based payment awards require the input of highly subjective assumptions, including the expected life of the stock-based payment awards and stock price volatility. We use the Black-Scholes option-pricing model to value compensation expense. The assumptions used in calculating the fair value of stock-based payment awards represent management's best estimates, but the estimates involve inherent uncertainties and the application of management judgment. As a result, if factors change and we use different assumptions, our stock-based compensation expense could be materially different in the future.

(c) Goodwill and Intangible Assets

As required by the Financial Accounting Standards Board, management performs impairment tests of goodwill and indefinite-lived intangible assets whenever an event occurs or circumstances change that indicate impairment has more likely than not occurred. Also, management performs impairment testing of goodwill and indefinite-lived intangible assets at least annually.

In accordance with guidance of the Financial Accounting Standards Board, management tests goodwill for impairment at the reporting unit level. The Company has only one reporting unit. At the time of goodwill impairment testing, management determines fair value through the use of a discounted cash flow valuation model incorporating discount rates commensurate with the risks involved its reporting unit. If the calculated fair value is less than the current carrying value, impairment of the Company may exist. The use of a discounted cash flow valuation model to determine estimated fair value is common practice in impairment testing in the absence of available domestic and international transactional market evidence to determine the fair value. The key assumptions used in the discounted cash flow valuation model for impairment testing include discount rates, growth rates, cash flow projections and terminal value rates.

In accordance with guidance of the Financial Accounting Standards Board, the Company reviews intangible assets subject to amortization at least annually to determine if any adverse conditions exist or a change in circumstances has occurred that would indicate impairment or a change in the remaining useful life. If the carrying value of an asset exceeds its undiscounted cash flows, the Company writes down the carrying value of the intangible asset to its fair value in the period identified. If the carrying value of assets is determined not to be recoverable, the Company records an impairment loss equal to the excess of the carrying value over the fair value of the assets. The Company's estimate of fair value is based on the best information available, in the absence of quoted market prices. The Company generally calculates fair value as the present value of estimated future cash flows that the Company expects to generate from the asset using a discounted cash flow income approach as described above. If the estimate of an intangible asset's remaining useful life is changed, the Company amortizes the remaining carrying value of the intangible asset prospectively over the revised remaining useful life.

(d) Recently issued accounting pronouncements

In June 2009, the FASB issued authoritative guidance on accounting standards codification and the hierarchy of generally accepted accounting principles.” The FASB Accounting Standards Codification* (“Codification”) has become the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in accordance with GAAP. All existing accounting standard documents are superseded by the Codification and any accounting literature not included in the Codification will not be authoritative. However, rules and interpretive releases of the Securities Exchange Commission (“SEC”) issued under the authority of federal securities laws will continue to be sources of authoritative GAAP for SEC registrants. The FASB authoritative guidance is effective for interim and annual reporting periods ending after September 15, 2009. Therefore, beginning with our quarter ending September 30, 2009, all references made by it to GAAP in its consolidated financial statements now use the new Codification numbering system. The Codification does not change or alter existing GAAP and, therefore, it does not have an impact on our financial position, results of operations and cash flows.

On July 1, 2009, the Company adopted authoritative guidance issued by the FASB on business combinations. The guidance retains the fundamental requirements that the acquisition method of accounting (previously referred to as the purchase method of accounting) be used for all business combinations, but requires a number of changes, including changes in the way assets and liabilities are recognized and measured as a result of business combinations. It also requires the capitalization of in-process research and development at fair value and requires the expensing of acquisition-related costs as incurred. We have applied this guidance to business combinations completed since July 1, 2009. Adoption of the new guidance did not have a material impact on our financial statements.

In October 2009, the FASB issued authoritative guidance on revenue recognition that will become effective for the Company beginning July 1, 2010, with earlier adoption permitted. Under the new guidance on arrangements that include software elements, tangible products that have software components that are essential to the functionality of the tangible product will no longer be within the scope of the software revenue recognition guidance, and software-enabled products will now be subject to other relevant revenue recognition guidance. We believe adoption of this new guidance will not have a material impact on our financial statements.

In May 2009, the FASB issued new requirements for reporting subsequent events. These requirements set forth the period after the balance sheet date during which management of a reporting entity should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements, the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements, and disclosures that an entity should make about events or transactions that occurred after the balance sheet date. Disclosure of the date through which an entity has evaluated subsequent events and the basis for that date is also required.

The Company does not believe that the adoption of the above recent pronouncements will have a material effect on the Company's consolidated results of operations, financial position, or cash flows.

Results of Operations

Three Months Ended September 30, 2010 Compared to the Three Months Ended September 30, 2009:

Sales and Cost of Goods Sold

Our revenues increased significantly from the same period in 2009. We achieved revenue of \$6,016,656 for the three months ended September 30, 2010, compared to revenue of \$4,783,699 for the three months ended September 30, 2009, an increase of 26%.

The revenue of our main operating company, Reprints, increased to \$5,266,277 for the three months ended September 30, 2010 from \$4,025,667 for the three months ended September 30, 2009, an increase of 31%. Revenue from Pools Press decreased slightly from \$758,032 in the 2009 period to \$750,379 in the 2010 period. Approximately 9% of our revenues were derived from new customers in the 2010 period. We expect our revenue growth to continue this year as we continue to aggressively market our products and services.

Our cost of goods sold likewise increased from \$4,067,395 for the three months ended September 30, 2009 to \$5,199,811 for the three months ended September 30, 2010, which represents an increase of 28%. This percentage increase is roughly equivalent to the increase in our revenues. This direct relationship between our cost of goods sold and sales is expected because our costs are incurred when we purchase the rights to content requested by our customers.

However, our overall gross margin percentage decreased from 15% of sales in the 2009 period to 14% in the 2010 period. In general, reprints, or multiple copies of an article have a lower margin, particularly when an individual order is for an amount in excess of \$100,000. Because our customers could order reprints directly from the publisher we must reduce our margins on large orders in order to create incentive for the customer to arrange the order through Reprints. Pools provides reprint printing services for several publishers and much of Pools' revenues are derived from those sales. The margin on these sales is lower than the margin Reprints charges for reprint sales because it is viewed as primarily providing printing services and not other related services.

We expect that our sales will increase in the 2011 fiscal year as a result of our existing customers increasing their spending on existing products as well as new products and from sales to new customers. We expect our gross margin

to remain constant or decline slightly due to the need for aggressive pricing in order to continue to increase our revenues. While we continue to develop and market higher margin products, we face price competition in our core markets for document delivery and reprints as well as commercial printing. Most of our costs are determined by the publishers from whom we purchase media for each individual order and they do not generally grant significant discounts at this time.

Operating Expenses

General and Administrative

Our general and administrative expenses increased 9% from \$945,433 for the three months ended September 30, 2009 to \$1,033,497 for the three months ended September 30, 2010. Pools' share of these expenses was approximately \$52,000 in the 2009 period and \$49,347 for the 2010 period. These expenses include Reprints' administrative salary costs, which were \$701,141 in the 2010 period and \$433,821 in the 2009 period, an increase of \$267,320 or 62%. Our sales and marketing team, information technology team and our accounting team have all increased during the past year. Due to the expansion of our sales volume and in order to continue to develop our computer system and products, we expect to add a small number of new employees in the next twelve months.

Marketing and Advertising

Our marketing and advertising expenses increased from \$38,453 for the three months ended September 30, 2009 to \$114,526 for the three months ended September 30, 2010, an increase of 198%. This increase was due to our expanded marketing efforts during the 2010 period. In 2011, we expect our marketing costs to remain at the current level or increase marginally, to approximately \$500,000 for fiscal 2011. Our marketing costs include advertising, events, direct response and integrated marketing campaigns, public relations and content publicity, search engine optimization and marketing, thought leadership programs, channel alliances training, and analyst relations. In addition, a portion of our marketing expenses are dedicated to research and customer retention.

Depreciation and Amortization

Our depreciation and amortization expense increased approximately 20% from \$49,573 for three months ended September 30, 2009 to \$59,550 for the three months ended September 30, 2010. Our depreciation and amortization expense was primarily attributable to amortization on software and intellectual property licenses as well as depreciation on computer equipment which supports our order processing systems.

Interest Expense

Interest expense was \$15,150 for the three months ended September 30, 2010 and \$1,539 for the three months ended September 30, 2009. The 2010 interest expense was primarily attributable to the interest paid on a credit line with Silicon Valley Bank.

Interest Income

Interest income was \$609 for the three months ended September 30, 2010 and \$1,549 for the three months ended September 30, 2009. We maintain all of our cash in our bank accounts and we do not expect these accounts to earn significant amounts of interest.

Other Income

The Company earned \$0 in other income during the three months ended September 30, 2010, and \$1,069 during the three months ended September 30, 2009. This income represents income we receive from publishers and customers for miscellaneous services.

Net Loss

As a result of these factors, we recorded a net loss of \$405,269 for the three months ended September 30, 2010 compared to a net loss \$310,691 in the 2009 period.

Liquidity and Capital Resources

Since our inception, we have funded our operations primarily through private sales of equity securities, which have provided aggregate net cash proceeds to date of approximately \$5,100,000.

As of September 30, 2010, we had cash and cash equivalents of \$1,997,067, compared to \$1,852,231 as of June 30, 2010. This increase is primarily attributable to an increase in accounts receivable of \$381,887 and a decrease in accounts payable of \$394,762 as well as the net loss of \$405,269 for the period.

Net cash used in operating activities was \$1,086,490 for the three months ended September 30, 2010 compared to cash used in operating activities of \$245,409 for the three months ended September 30, 2009. During the 2010 period, our accounts receivable increased by \$381,887 and our accounts payable decreased by \$394,762, compared to increases of \$550,098 and \$406,042, respectively, in the 2009 period. During the three months ended September 30, 2009, we used \$172,800 of prepaid expenses, compared to use of \$22,235 in the 2010 period.

Net cash used in investing activities was \$135,448 for the three months ended September 30, 2010 compared to net cash used in investing activities of \$25,398 for the three months ended September 30, 2009. This difference was primarily due to the purchase of the remaining interest in Pools Press in the 2010 period.

Net cash provided by financing activities was \$1,366,774 for the three months ended September 30, 2010 compared to net cash used in financing activities of \$4,296 for the corresponding period in 2009. The cash provided by financing activities for the 2010 period was primarily provided by advances on our line of credit.

On July 23, 2010, we entered into a Loan and Security Agreement with Silicon Valley Bank (“SVB”) for a \$3,000,000 line of credit that matures on July 23, 2011. The SVB line of credit bears interest at the prime rate plus 2% for periods in which we maintain an account balance with SVB (less all indebtedness owed to SVB) of at least \$800,000 at all times during the prior calendar month (the “Streamline Period”), and at the prime rate plus 4% when a Streamline Period is not in effect. The line of credit is secured by all our and our subsidiaries’ assets. Approximately \$150,000 of the line of credit is committed to our corporate credit cards. At any time, we may draw on that portion of the remaining \$2,850,000 of the line of credit equal to approximately (i) eighty percent (80%) of our then outstanding accounts receivable, excluding certain accounts in arrears, foreign accounts and accounts for which the debtor is our affiliate, less (ii) amounts then committed under letters of credit and foreign exchange contracts and allocated to SVB’s cash management services (e.g., merchant services, direct deposit of payroll, business credit card and check cashing services). As of September 30, 2010, approximately \$1,475,000 was available for borrowing under the line of credit.

On November 12, 2010, the Company accepted an unsolicited offer made to the Company on behalf of certain of the holders of the common stock purchase warrants issued on December 22, 2006 whereby the holders of those warrants offered to exercise those warrants for cash if the Company would issue an additional warrant exercisable for one-half of the number of shares obtained upon the exercise, with an exercise price of \$2.00 per share. The Company has agreed to issue new warrants to these holders upon the cash exercise of those warrants on substantially the terms set forth in the offer letter. The Company cannot determine or control how many of those warrants will actually be exercised under these terms, however, the maximum amount of cash proceeds that the Company may receive from the cash exercise of those warrants is \$3,062,500

We have significant contractual commitments to vendors to purchase content over the next several fiscal years. Payments of \$3,500,000 are due in the fiscal year ending June 30, 2011, which includes aggregate payments of approximately \$1,400,000 due on or prior to December 31, 2010. Future commitments total in aggregate \$4,350,000, \$4,650,000, \$5,000,000, \$5,400,000, and \$2,800,000 for the fiscal years ending June 30, 2012, 2013, 2014, 2015 and 2016, respectively.

We believe that our current cash resources and cash flow from operations will be sufficient to sustain our current operations for the next twelve months. However, we plan to raise additional funds for general working capital purposes in the next twelve months through equity or debt financings or by other means to support our operations and fund growth initiatives. We can provide no assurances, however, that such financing will be available in an amount or on terms acceptable to us, if at all. The sale of additional equity or debt securities would result in dilution to our shareholders. The issuance of additional debt would result in increased expenses and could subject us to covenants that may have the effect of restricting our operations.

Off-Balance Sheet Arrangements

The Company does not have any off-balance sheet arrangements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Not required.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We carried out an evaluation, under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act (defined below)). Based upon that evaluation, our principal executive officer and principal financial officer concluded that, as of the end of the period covered in this report, our disclosure controls and procedures were effective to ensure that information required to be disclosed in reports filed under the Securities Exchange Act of 1934, as amended (the "Exchange Act") is recorded, processed, summarized and reported within the required time periods and is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Our management, including our principal executive officer and principal financial officer, does not expect that our disclosure controls and procedures or our internal controls will prevent all error or fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints and the benefits of controls must be considered relative to their costs. Due to the inherent limitations in all control

systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected. Accordingly, management believes that the financial statements included in this report fairly present in all material respects our financial condition, results of operations and cash flows for the periods presented.

Changes in Internal Control Over Financial Reporting

In addition, our management with the participation of our Principal Executive Officer and Principal Financial Officer have determined that no change in our internal control over financial reporting (as that term is defined in Rules 13(a)-15(f) and 15(d)-15(f) of the Securities Exchange Act of 1934) occurred during or subsequent to the quarter ended September 30, 2010 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II — OTHER INFORMATION

Item 1. Legal Proceedings

None.

Item 1A. Risk Factors

Not required.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

On May 13, 2010, the Company issued 40,000 shares of its common stock valued at \$46,000 based on the trading price of the Company's common stock on the date of the issuance. The issuance was made to a consultant in consideration of services rendered. The Company did not employ any form of general solicitation or advertising in connection with the issuance of the shares. The issuance was made in reliance on the exemption from registration provided by Section 4(2) of the Securities Act of 1933, as amended (the "Securities Act").

On July 27, 2010, the Company issued options to purchase 379,000 shares of the Company's common stock to thirteen employees, which expire on July 27, 2020. These options vest over 3 years, with one-twelfth of the grant vesting on the last day of each calendar quarter through September 30, 2013. The Company has subsequently registered the underlying shares on a Registration Statement on Form S-8 filed with the SEC on October 8, 2010. The Company did not employ any form of general solicitation or advertising in connection with the issuance of the options. The issuance was made in reliance on the exemption from registration provided by Section 4(2) of the Securities Act.

On August 13, 2010, the Company issued 19,393 shares of the Company's common stock valued at \$17,648 based on the trading price of the Company's common stock on the date of issuance. The issuance was made to a consultant in consideration of services rendered. The Company did not employ any form of general solicitation or advertising in connection with the issuance of the shares. The issuance was made in reliance on the exemption from registration provided by Section 4(2) of the Securities Act.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Removed and Reserved

Item 5. Other Information

- (a) None.
- (b) There were no changes to the procedures by which security holders may recommend nominees to our board of directors.

Item 6. Exhibits

See "Exhibit Index" on the page immediately following the signature page hereto for a list of exhibits filed as part of this report, which is incorporated herein by reference.
