Gilat provides multi-service satellite broadband network with GSM backhauling solution to Nicaragua's largest telecom operator

New SkyEdge system brings latest mobile voice, data and Internet services to customers throughout Nicaragua and Latin America

Petah Tikva, Israel, August 24, 2006 Gilat Satellite Networks Ltd. (Nasdaq: GILT), today announced that it has been selected by Empresa Nicaragüense de Telecomunicaciones (Enitel) to provide a SkyEdge broadband satellite hub station and VSAT terminals.

Enitel will be able to use the new SkyEdge system to provide Nicaraguan and Latin American customers with a bundle of services, including Internet access, rural telephony, GSM trunking, fax and prepaid telephony.

SkyAbis is an integral part of the SkyEdge multi-service platform and uses dynamic bandwidth allocation with high space-segment efficiency for GSM backhaul. SkyAbis enables telecom operators to deploy a hybrid network that extends the reach of their terrestrial and cellular infrastructure to remote communities and provide voice and data services where voice coverage was previously unavailable. This unified system presents a low total cost of ownership solution and expands telecom operators' offerings by providing satellite backhaul services to mobile operators.

Enitel is Nicaragua's largest telecommunications operator. Since 2001, Enitel has deployed Gilat VSAT equipment at hundreds of sites to serve residential and corporate customers.

Erez Antebi, CEO for Gilat Network Systems (GNS) a business unit of Gilat Satellite Networks said, "This agreement demonstrates Enitel's confidence in Gilat and SkyEdge's ability to support the very latest broadband voice and data applications for a large number of users, regardless of their geographic location. As we continue our successful relationship with Enitel, we look forward to helping them maintain their strong reputation for service and selection.

Gilat's SkyEdge is a satellite communications platform that delivers high-end voice, data and video services over a single, powerful system. It represents Gilat's deep knowledge base and field-proven product offering, acquired through nearly two decades of experience. SkyEdge's flexible architecture and efficient space segment utilization make it an ideal platform for operators and service providers.

About Enitel

Enitel is Nicaragua's largest telecommunications operator and has a 100% digital network with approximately 350,000 fixed telephony lines in operation. Enitel is capable of providing high-speed data and Internet services to both consumers and businesses. Enitel also provides mobile telephony services (with GSM technology) covering the national territory and serving more than one million users. Enitel is constantly evaluating and adopting technologies that will enable it to offer multiple communications services with single access.

About Gilat Satellite Networks Ltd.

Gilat Satellite Networks Ltd. (Nasdaq: GILT) is a leading provider of products and services for satellite-based communications networks. The Company operates under three business units: (i) Gilat Network Systems (GNS), which is a provider of network systems and associated professional services to service providers and operators worldwide; (ii) Spacenet Inc., which provides managed services in North America for businesses and governments through its Connexstar service brand and for consumers through its StarBand service brand; (iii) Spacenet Rural Communications, which offers rural telephony and Internet access solutions to remote areas primarily in Latin America.

Gilat was founded in 1987 and has shipped over 600,000 Very Small Aperture Terminals (VSATs) to more than 85 countries across six continents. Gilat's headquarters is located in Petah Tikva, Israel. The Company has 14 local offices and three service facilities worldwide. Gilat markets the SkyEdge Product Family which includes the SkyEdge Pro, SkyEdge IP, SkyEdge Call, SkyEdge DVB-RCS and SkyEdge Gateway. In addition, the Company markets numerous other legacy products.
