Filed Pursuant to Rule 424(b)(4)

Registration No. 333-132728

8,000,000 Shares

Hercules Offshore, Inc.

Common Stock

We are selling 1,600,000 shares of our common stock and the selling stockholders are selling 6,400,000 shares of our common stock. Our common stock is listed on the NASDAQ National Market under the symbol HERO. The last reported sale price of our common stock on the NASDAQ National Market on April 11, 2006 was \$36.37 per share. We will not receive any of the proceeds from the shares of common stock sold by the selling stockholders.

The underwriters have an option to purchase a maximum of 1,200,000 additional shares from the selling stockholders to cover over-allotments of shares.

As described in this prospectus, in order to enable us to comply with U.S. shipping laws, our certificate of incorporation limits to 20% the aggregate ownership of our common stock by non-United States citizens.

Investing in our common stock involves risks. See Risk Factors beginning on page 10.

	Price to Public	Underwriting Discounts and Commissions	Proceeds to Hercules	Proceeds to Selling Stockholders
Per Share	\$36.00	\$1.62	\$34.38	\$34.38
Total	\$288,000,000	\$12,960,000	\$55,008,000	\$220,032,000

Delivery of the shares of common stock will be made on or about April 18, 2006.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

Industry and Market Data

In this prospectus, we rely on and refer to information regarding our industry from the U.S. Energy Information Administration, the U.S. Minerals Management Service, Bloomberg L.P., John S. Herold, Inc. and ODS-Petrodata, Inc. Erland P. Bassoe and Jonathan Fairbanks, selling stockholders in the offering, are affiliates of ODS-Petrodata. These organizations are not affiliated with us and are not aware of and have not consented to being named in this prospectus. We believe this information is reliable. In addition, in many cases we have made statements in this prospectus regarding our industry and our position in the industry based on our experience in the industry and our own evaluation of market conditions.

Non-GAAP Financial Measures

The body of accounting principles generally accepted in the United States is commonly referred to as GAAP. A non-GAAP financial measure is generally defined by the U.S. Securities and Exchange Commission, or SEC, as one that purports to measure historical or future financial performance, financial position or cash flows, but excludes or includes amounts that would not be so adjusted in the most comparable GAAP measures. In this prospectus, we disclose Adjusted EBITDA, a non-GAAP financial measure. Adjusted EBITDA is calculated as net income before interest expense, taxes, depreciation and amortization and loss on early retirement of debt. Adjusted EBITDA is not a substitute for the GAAP measures of earnings and cash flow.

Financial Statements

We were formed in July 2004 to provide drilling and liftboat services to the oil and natural gas exploration and production industry. Since our formation, we have acquired our fleet of jackup rigs and liftboats in a number of separate asset acquisitions, including the acquisition of:

five jackup rigs and the assumption of the management of another jackup rig in August 2004;

22 liftboats in October 2004;

two jackup rigs in January 2005, one of which we had been managing since August 2004;

17 liftboats, one of which we have sold, and a jackup rig in June 2005;

a newly constructed liftboat and an additional jackup rig in August and September 2005, respectively;

seven liftboats in November 2005, four of which are currently operating offshore Nigeria; and

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

a jackup rig in February 2006.

As a result of our recent formation, we have limited operating history upon which you can base an evaluation of our current business and our future earnings prospects. This prospectus includes audited financial statements only as of and for the period from inception (July 27, 2004) to December 31, 2004 and as of and for the year ended December 31, 2005. In this prospectus, we refer to the period from inception (July 27, 2004) to December 31, 2004 as the period from inception to December 31, 2004. We have not completed or provided in this prospectus any stand-alone pre-acquisition financial statements for the assets we acquired in the transactions described above. As described under Management's Discussion and Analysis of Financial Condition and Results of Operations Acquisition History and Financial Statement Presentation, we have concluded that we are not required to include such pre-acquisition financial statements in this prospectus, and we do not believe that separate audited financial statements for the assets we acquired for any date or period prior to our acquisition of those assets would be meaningful to investors. As a result, and given our recent date of formation, we have not provided in this prospectus three years of audited financial statements that normally would be included in a prospectus forming part of an SEC registration statement.

Table of Contents**Index to Financial Statements****PROSPECTUS SUMMARY**

This summary highlights selected information contained elsewhere in this prospectus. This summary is not complete and does not contain all of the information that is important to you or that you should consider before investing in our common stock. You should read carefully the entire prospectus, including the risk factors, financial data and financial statements included herein, and the documents we incorporate by reference before making a decision about whether to invest in our common stock. Unless the context requires otherwise or we specifically indicate otherwise, the information in this prospectus assumes that the underwriters do not exercise their over-allotment option, and the terms Hercules, our company, we, our, ours and us refer to Hercules Offshore, Inc. and its subsidiaries.

Our Company

We provide shallow-water drilling and liftboat services to the oil and natural gas exploration and production industry primarily in the U.S. Gulf of Mexico. We currently own a fleet of nine jackup rigs that are capable of drilling in maximum water depths ranging from 85 to 250 feet and a fleet of 46 liftboats with leg lengths ranging from 105 to 260 feet. In the U.S. Gulf of Mexico, we have the fourth-largest fleet of jackup rigs operating in water depths of 250 feet and less and the largest fleet of liftboats with leg lengths greater than 100 feet. We contract our jackup rigs and liftboats to major integrated energy companies and independent oil and natural gas operators.

Our jackup rigs are mobile, self-elevating drilling platforms equipped with legs that can be lowered to the ocean floor until a foundation is established to support the drilling platform. Our rigs are used primarily for exploration and development drilling in the shallow waters of the U.S. Gulf of Mexico. Six of our jackup rigs have a cantilever design that permits the drilling platform to be extended out from the hull to perform drilling or workover operations over certain types of preexisting platforms or structures. Three of our jackup rigs have a slot-type design, which requires drilling operations to take place through a slot in the hull. Historically, jackup rigs with a cantilever design have maintained higher levels of utilization than rigs with a slot-type design, which are primarily used for exploratory drilling. However, one of our slot-type rigs has a competitive advantage in very shallow water as it is one of the few jackup rigs in the world that can drill in water depths as shallow as nine feet.

The following table contains information regarding our jackup rig fleet as of March 1, 2006.

Rig	Type	Maximum/Minimum		Location	Status
		Water Depth	Rated Drilling		
Name(1)		Rating (feet)	Depth (feet)(2)		
11	Mat-supported, cantilever	200/21	20,000(3)	U.S. Gulf of Mexico	Contracted
15	Independent leg, slot	85/9	20,000	U.S. Gulf of Mexico	Contracted
16	Independent leg, cantilever	170/16	16,000	Middle East	Shipyard
20	Mat-supported, cantilever	100/20	25,000	U.S. Gulf of Mexico	Contracted
21	Mat-supported, cantilever	120/22	20,000	U.S. Gulf of Mexico	Shipyard
22	Mat-supported, cantilever	173/22	15,000	U.S. Gulf of Mexico	Contracted
26	Independent leg, cantilever	150/12	16,000	U.S. Gulf of Mexico	Shipyard
30	Mat-supported, slot	250/25	20,000	U.S. Gulf of Mexico	Contracted

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

31	Mat-supported, slot	250/25	20,000	Asia	Shipyard
----	---------------------	--------	--------	------	----------

- (1) The table does not include *Rig 25*, which was severely damaged in connection with Hurricane Katrina and is no longer operable. We expect to receive approximately \$48.8 million under our insurance policies related to the rig, and we are attempting to salvage some of its equipment.
- (2) Rated drilling depth means drilling depth stated by the manufacturer of the rig. Depending on deck space and other factors, a rig may not have the actual capacity to drill at the rated drilling depth.
- (3) Rated workover depth. *Rig 11* is currently configured for workover activity, which includes maintenance and repair or modification of wells that have already been drilled and completed to enhance or resume the well's production.

Table of Contents**Index to Financial Statements**

Rig 16 is undergoing a major refurbishment and upgrade in a shipyard in the United Arab Emirates. On February 23, 2006, we entered into a letter of intent to contract *Rig 16* for work offshore Qatar. The letter of intent is conditioned upon, among other things, the completion of a definitive drilling contract. Under the letter of intent, the dayrate would escalate from a rate of \$49,500, which would apply from the date of the customer's acceptance of the rig to May 31, 2006. From June 1, 2006 until the end of the contract term, the dayrate would be \$69,500. We would also receive a stand-by rate of \$30,000 per day, commencing on the date of the letter of intent and continuing until the earlier of the acceptance of the rig or May 1, 2006. The term of the contract would be two years commencing on the date the rig is under tow from the shipyard and is accepted by the customer. The customer may terminate the contract, and not pay the stand-by rate, if the rig is not under tow from the shipyard and accepted by June 1, 2006.

Rig 21 is undergoing refurbishment in a shipyard in Mississippi primarily for repairs of damage sustained during Hurricane Katrina. We expect to complete the repairs and the other refurbishment work in the second quarter of 2006. *Rig 26* is undergoing a major refurbishment and upgrade in a shipyard in Louisiana. We expect to complete the work on *Rig 26* in the first quarter of 2007.

Rig 31 is undergoing a major refurbishment and upgrade in a shipyard in Malaysia. On March 31, 2006, we entered into a letter of award to contract *Rig 31* for work offshore India. The letter of award is conditioned upon, among other things, the completion of a definitive drilling contract. The drilling contract, if completed, would cover the drilling of seven wells with five one-well options, and would commence in September 2006. The dayrate under the contract would be \$110,000 for the first well and \$140,000 for each additional well.

Our liftboats are self-propelled, self-elevating vessels with a large open deck space, which provides a versatile, mobile and stable platform to support a broad range of offshore maintenance and construction services throughout the life of an oil or natural gas well. Once a liftboat is in position, typically adjacent to an offshore production platform or well, third-party service providers perform inspection, maintenance or construction service on the platform or well. Unlike larger and more costly alternatives, such as jackup rigs or construction barges, our liftboats are self-propelled and can quickly reposition at a worksite or move to another location without third-party assistance. The following table contains information regarding our liftboat fleet as of March 1, 2006.

Leg Length/ Liftboat Class (feet)	Number of Liftboats(1)	Average Deck Area (square feet)	Average Maximum Deck Load (pounds)
260	1	8,170	729,000
229-230	3	5,100	666,667
190-215	4	4,331	675,000
140-170	8	2,564	245,625
120-130	16	1,791	134,500
105	14	1,346	107,143

(1) The table does not include the liftboats we have agreed to acquire from Laborde Marine Lifts, Inc., subject to the terms and conditions of our purchase agreement with Laborde. See Recent Developments.

We generally contract our jackup rigs and liftboats under daily rental agreements that provide for a fixed rental rate while operating, which we refer to as a dayrate. To date, most of our contracts in the U.S. Gulf of Mexico have been on a short-term basis of less than one year. Our

contracts in international markets have been longer-term.

Table of Contents

Index to Financial Statements

Our Industry and Recent Trends

The drilling and liftboat service industry is cyclical and typically driven by general economic activity and changes in actual or anticipated oil and natural gas prices. In general, demand for our rigs is correlated to our customers' expectations of energy prices, particularly natural gas prices. As a result, we expect that sustained high energy prices generally would have a positive impact on our earnings, whereas sustained low energy prices generally would have a negative impact on our earnings. Demand for liftboats historically has been less cyclical than demand for jackup rigs, although demand for liftboats and for jackup rigs generally is affected by the same factors. We believe that recent trends in the industry, including the following, should benefit our operations:

favorable commodity price environment relative to historical levels;

growing U.S. demand for natural gas and maturing natural gas fields;

increasing capital budgets of oil and natural gas producers;

reduced supply of jackup rigs in the U.S. Gulf of Mexico; and

aging production infrastructure in the U.S. Gulf of Mexico.

For further information on our industry and recent trends, please read [Industry Overview](#).

Our Strengths

We believe our operations benefit from a number of competitive strengths, including the following:

Favorable Niche Position in the U.S. Gulf of Mexico Shallow-Water Jackup Rig Market. We believe that our fleet of jackup rigs fills an important niche in the shallow-water drilling market of the U.S. Gulf of Mexico. Three of our rigs have design features making them capable of working in special drilling situations encountered in the U.S. Gulf of Mexico.

Leading Provider of Liftboat Services in the U.S. Gulf of Mexico. We operate the largest fleet of liftboats in the U.S. Gulf of Mexico with leg lengths greater than 100 feet. Our liftboat fleet comprises a broad range of liftboat sizes and capabilities and is deployed across the major producing areas of the U.S. Gulf of Mexico continental shelf.

Operation of Jackup Rigs and Liftboats Provides Balance to Our Business. Utilization and dayrates for jackup rigs, which are used primarily for exploration and development drilling, tend to be more closely correlated with oil and natural gas price expectations and drilling activity levels than utilization and dayrates for liftboats, which are typically used throughout the life of an oil and natural gas

field. We believe that our liftboats help us balance our exposure to commodity prices and drilling activity levels that we experience with our jackup rigs.

Strong Relationships with a Diversified Customer Base. Our customer base provides exposure to the spending patterns of major integrated energy companies, which are more stable, and of smaller independent exploration and production companies, which are more commodity-driven and subject to wider fluctuations. We benefit from our management's long-standing relationships with many of our customers, and in some instances, we have developed preferred service provider relationships with our clients.

Experienced and Incentivized Management Team. Our senior and operating level management team has extensive industry experience in the U.S. Gulf of Mexico and internationally, with an average of approximately 25 years of experience in the oil service industry. We believe that their considerable knowledge of and experience in our industry enhances our ability to operate effectively throughout industry cycles. Our management also has substantial experience in identifying and completing asset acquisitions. Our incentive compensation plans are designed to align our management's interests with our operating, financial and safety performance.

Table of Contents

Index to Financial Statements

For further information on our strengths, please read [Business](#) [Our Strengths](#).

Our Strategies

Our goal is to be a leading provider of drilling and liftboat services, primarily in shallow water markets, to the oil and natural gas exploration and production industry. We intend to employ the following strategies to achieve our goal:

Focus on Drilling and Liftboat Services. As one of the largest operators of shallow-water jackup rigs and liftboats in the U.S. Gulf of Mexico, we believe we are well-positioned to benefit from any increased levels of drilling and production maintenance activity. We also intend to continue pursuing expansion opportunities in international markets with characteristics similar to the shallow-water U.S. Gulf of Mexico, such as West Africa, the Middle East and the Asia-Pacific region.

Maintain Our Status as an Efficient, Low-Cost Service Provider. We strive to maintain an organizational structure and asset base that allow us to be an efficient, low-cost service provider in the industry. Because of the smaller rig and crew sizes required to operate our jackup fleet as compared to higher specification assets, we believe our rigs have an operating and capital cost advantage. In addition, our liftboat operations are organized to allow for the integration of future liftboat acquisitions without significant incremental overhead.

Pursue Strategic Growth Opportunities. We believe that opportunities remain to acquire shallow-water rigs from service providers that are more focused on higher specification assets needed to service customers operating in the deepwater market segment or drilling complex ultra-deep wells. We also believe that opportunities exist to acquire liftboats from smaller-scale operators as those operators may opt for consolidation given the economic and operational advantages associated with operating a larger fleet. From time to time, we review, and may have outstanding bids or be in discussions with potential sellers regarding, possible acquisitions of assets or other similar transactions. Any such acquisitions may require significant capital commitments.

Remain Financially Disciplined and Conservative. We use return on capital employed in evaluating new investments and intend to pursue only those investments that we believe will produce strong returns on capital employed throughout an entire industry cycle. Furthermore, we intend to maintain a conservative capital structure and sufficient liquidity to operate throughout the industry cycle.

For further information on our strategies, please read [Business](#) [Our Strategies](#).

Risks Related to Our Business and Our Strategies

Prospective investors should carefully consider the matters described under [Risk Factors](#), including that our business depends on the level of activity in the oil and natural gas industry; our business is concentrated in the shallow-water U.S. Gulf of Mexico, where market conditions are highly cyclical and subject to rapid change; our industry is highly competitive, with intense price competition; our business involves numerous operating hazards, including loss or damage from severe weather; and our acquisition strategy may be unsuccessful. One or more of these matters could negatively impact our business and our ability to implement successfully our business strategies.

Recent Developments

Initial Public Offering. We completed our initial public offering of 10,580,000 shares of common stock at \$20.00 per share on November 1, 2005. We offered 6,250,000 shares of common stock, while the remaining 4,330,000 shares were offered by selling stockholders. We received approximately \$115.1 million of proceeds from the offering, net of underwriting discounts and commissions and estimated expenses. We used \$44.0 million of the proceeds to complete the acquisition of a fleet of seven liftboats in November 2005. In addition,

Table of Contents

Index to Financial Statements

we repaid \$45.0 million of the senior secured term loan plus accrued interest of \$0.3 million. We used the remaining proceeds for the refurbishment of and upgrades to *Rig 16* and *Rig 31* and the acquisition of *Rig 26*.

Acquisition of Rig 26. In February 2006, we acquired the jackup rig *Rig 26* for a purchase price of \$20.1 million. This rig is capable of drilling in water depths of up to 150 feet. We are currently refurbishing the rig in a shipyard in Louisiana and expect to spend approximately \$20.0 million on that refurbishment. We expect the rig to be available in the first quarter of 2007. We intend to seek work for the rig under a longer-term contract in a suitable international location.

Liftboat Acquisition from Laborde. On April 3, 2006, we agreed to acquire five liftboats from Laborde Marine Lifts, Inc. (Laborde). In addition, we have agreed to assume the construction of an additional liftboat pursuant to a construction agreement to be assigned to us by Laborde at the closing. The total purchase price to be paid in connection with the transaction is \$52.0 million. The purchase price will be reduced by the total amount remaining due under the construction agreement as of the closing date. We expect to close the transaction in the second quarter of 2006.

The liftboats, including the liftboat under construction, have leg lengths ranging from 105 to 200 feet and are located in the U.S. Gulf of Mexico. We intend to integrate the liftboats into our existing liftboat operations and seek work for them in the U.S. Gulf of Mexico or suitable international locations.

We intend to apply the \$48.8 million of expected insurance proceeds related to *Rig 25* to the purchase price in the Laborde transaction. The balance would be paid from cash on hand, which may include net proceeds to us from this offering. The acquisition is subject to various closing conditions that may not be satisfied, and we may not complete the acquisition in the second quarter or at all.

Recent Hurricanes. Two of our jackup rigs, *Rig 21* and *Rig 25*, sustained damage during Hurricane Katrina. *Rig 21* sustained substantial damage to its mat and was moved to a shipyard in Mississippi to repair the damage. We expect that the cost to repair *Rig 21* will be within insured values and that the rig will be available in the second quarter of 2006. *Rig 25* was severely damaged in connection with Hurricane Katrina and is no longer operable. We expect to receive approximately \$48.8 million under our insurance policies related to the rig, and we are attempting to salvage some of its equipment. None of our rigs or liftboats sustained any material damage during Hurricane Rita.

Principal Executive Offices

Our principal executive offices are located at 11 Greenway Plaza, Suite 2950, Houston, Texas 77046, and our telephone number is (713) 979-9300. Our corporate website address is www.herculesoffshore.com. The information contained in or accessible from our corporate website is not part of this prospectus.

Table of Contents

Index to Financial Statements

The Offering

Common stock offered by us	1,600,000 shares
Common stock offered by the selling stockholders	6,400,000 shares
Common stock to be outstanding after the offering	31,852,750 shares
Common stock held by the selling stockholders after the offering	12,865,400 shares (11,665,400 shares if the underwriters exercise the over-allotment option in full).
Use of proceeds	We estimate that the net proceeds to us from this offering, after deducting underwriter discounts and commissions and our estimated offering expenses, will be approximately \$54.3 million. We intend to use the net proceeds from this offering to repay a portion of the amounts outstanding under our term loan and for other corporate purposes, which may include the refurbishment of <i>Rig 26</i> and <i>Rig 31</i> and the acquisition and refurbishment of additional rigs and liftboats (including the Laborde liftboats). We will not receive any proceeds from the sale of common stock by the selling stockholders. See Use of Proceeds.
Over-allotment option	The selling stockholders have granted the underwriters a 30-day option to purchase a maximum of 1,200,000 additional shares of our common stock at the price to public set forth on the cover page of this prospectus to cover over-allotments, if any.
Risk factors	You should consider carefully all of the information set forth in this prospectus and, in particular, the specific factors set forth under Risk Factors below, before deciding whether to invest in our common stock.
Dividend policy	We do not intend to declare or pay regular dividends on our common stock in the foreseeable future.
NASDAQ National Market symbol for our common stock	HERO

The number of shares of our common stock to be outstanding after this offering excludes 2,370,100 shares of common stock reserved for issuance under our 2004 long-term incentive plan, of which options to purchase 1,839,500 shares at a weighted average exercise price of \$11.38 per share had been issued as of December 31, 2005.

Index to Financial Statements

Summary Consolidated Financial Data

We have derived the following consolidated financial information as of and for the period from inception to December 31, 2004 and as of and for the year ended December 31, 2005 from our audited consolidated financial statements included elsewhere in this prospectus.

We were formed in July 2004 and commenced operations in August 2004. From our formation to December 31, 2005, we completed several significant asset acquisitions that impact the comparability of our historical financial results. Our financial results reflect the impact of the assets only after the date of their acquisition. This prospectus does not include any financial information relating to the assets for periods prior to their acquisition date. As described under Management's Discussion and Analysis of Financial Condition and Results of Operations Acquisition History and Financial Statement Presentation, we have concluded that we are not required to include such pre-acquisition financial statements in this prospectus, and we believe that separate audited financial statements for the assets we acquired as of any date or for any period prior to our acquisition of those assets would not be meaningful to investors.

In addition, in connection with our initial public offering, we converted from a Delaware limited liability company to a Delaware corporation on November 1, 2005. Prior to the conversion, our owners elected to be taxed at the member unitholder level rather than at the company level. As a result, we did not recognize any tax provision on our income prior to the conversion. Upon completion of the conversion, we recorded a tax provision of \$12.1 million related to the recognition of deferred taxes equal to the tax effect of the difference between the book and tax basis of our assets and liabilities as of the effective date of the conversion.

You should read the following information in conjunction with Selected Consolidated Financial Data, Management's Discussion and Analysis of Financial Condition and Results of Operations and our consolidated financial statements and the related notes included elsewhere in this prospectus.

Table of Contents**Index to Financial Statements**

- (1) Adjusted EBITDA consists of net income before interest expense, taxes, depreciation and amortization and loss on early retirement of debt. See Non-GAAP Financial Measures. Adjusted EBITDA is included in this prospectus because our management considers it an important supplemental measure of our performance and believes that it is frequently used by securities analysts, investors and other interested parties in the evaluation of companies in our industry, some of which present EBITDA and Adjusted EBITDA when reporting their results. We regularly evaluate our performance as compared to other companies in our industry that have different financing and capital structures and/or tax rates by using Adjusted EBITDA. In addition, we utilize Adjusted EBITDA in evaluating acquisition targets. Management also believes that Adjusted EBITDA is a useful tool for measuring our ability to meet our future debt service, capital expenditures and working capital requirements, and Adjusted EBITDA is commonly used by us and our investors to measure our ability to service indebtedness. Adjusted EBITDA is not a substitute for the GAAP measures of earnings or of cash flow and is not necessarily a measure of our ability to fund our cash needs. In addition, it should be noted that companies calculate EBITDA and Adjusted EBITDA differently and, therefore, Adjusted EBITDA as presented for us may not be comparable to EBITDA and Adjusted EBITDA reported by other companies. Adjusted EBITDA has material limitations as a performance measure because it excludes interest expense, taxes, depreciation and amortization and loss on early retirement of debt. The following tables reconcile Adjusted EBITDA with our net income and with our net cash provided by (used in) operating activities.

Reconciliation of Adjusted EBITDA

	Year Ended December 31, 2005	Period from Inception to December 31, 2004
	(dollars in thousands)	
Net income	\$ 27,456	\$ 8,065
Plus: interest expense	9,880	2,070
Plus: income tax provision	15,369	
Plus: depreciation and amortization	13,790	2,016
Plus: loss on early retirement of debt	4,078	
Adjusted EBITDA	70,573	12,151
Less: interest expense	(9,880)	(2,070)
Less: income tax provision	(15,369)	
Plus: amortization of deferred financing fees	890	215
Plus: allowance for doubtful accounts	(519)	519
Plus: stock based compensation expense	78	
Plus: deferred income taxes	15,247	
Less: increase in current assets	(28,184)	(22,379)
Plus: increase in current liabilities	19,927	5,069
Net cash (used in) provided by operating activities	\$ 52,763	\$ (6,495)

- (2) Average revenue per rig or liftboat per day in the table above and elsewhere in this prospectus is defined as revenue earned by our rigs or liftboats, as applicable, in the period divided by the total number of days our rigs or liftboats, as applicable, were under contract, known as operating days, in the period.
- (3) Utilization for our fleet shown in the table above and elsewhere in this prospectus is defined as the total number of operating days for our rigs or liftboats, as applicable, in the period as a percentage of the total number of available days in the period. Days during which our rigs and liftboats were undergoing major refurbishments, upgrades or construction, which included *Rig 16*, *Rig 21*, *Rig 25*, *Rig 31* and the *Whale Shark*, or cold-stacked units, which included three of our liftboats, are not counted as available days. Days during which our liftboats are in the shipyard undergoing drydocking or inspection are considered available days for the purposes of calculating utilization.

RISK FACTORS

You should carefully consider each of the following risks and all of the information set forth in this prospectus and in the documents we incorporate by reference before deciding to invest in our common stock. If any of the following risks and uncertainties develop into actual events, our business, financial condition, results of operations or cash flows could be materially adversely affected. In that case, the trading price of our common stock could decline and you may lose all or part of your investment.

*This prospectus also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of the risks faced by us described below. See *Forward-Looking Information*.*

Risks Related to Our Business

Our business depends on the level of activity in the oil and natural gas industry, which is significantly affected by volatile oil and natural gas prices.

Our business depends on the level of activity in oil and natural gas exploration, development and production primarily in the U.S. Gulf of Mexico, and in particular, the level of exploration, development and production expenditures of our customers. Oil and natural gas prices and our customers' expectations of potential changes in these prices significantly affect this level of activity. In particular, changes in the price of natural gas materially affect our operations because drilling in the shallow-water U.S. Gulf of Mexico is primarily focused on developing and producing natural gas reserves. Oil and natural gas prices are extremely volatile. Since mid-December 2005, natural gas prices have declined sharply. Commodity prices are affected by numerous factors, including the following:

the demand for oil and natural gas in the United States and elsewhere;

the cost of exploring for, producing and delivering oil and natural gas;

economic and weather conditions in the United States and elsewhere;

expectations regarding future prices;

advances in exploration, development and production technology;

the ability of the Organization of Petroleum Exporting Countries, commonly called OPEC, to set and maintain production levels and pricing;

the level of production in non-OPEC countries;

the policies of various governments regarding exploration and development of their oil and natural gas reserves; and

the worldwide military and political environment, uncertainty or instability resulting from an escalation or additional outbreak of armed hostilities or other crises in the Middle East and other oil and natural gas producing regions or further acts of terrorism in the United States, or elsewhere.

Depending on the market prices of oil and natural gas, companies exploring for oil and natural gas may cancel or curtail their drilling programs, thereby reducing demand for drilling services. Any reduction in the demand for drilling and liftboat services may materially erode dayrates and utilization rates for our units, which would adversely affect our financial condition and results of operations.

Table of Contents

Index to Financial Statements

Our business is concentrated in the shallow-water U.S. Gulf of Mexico, where market conditions are highly cyclical and subject to rapid change. The mature nature of this region could result in less drilling activity in the area, thereby reducing demand for our services.

Historically, the offshore service industry has been highly cyclical, with periods of high demand and high dayrates often followed by periods of low demand and low dayrates. Periods of low demand intensify the competition in the industry and often result in rigs or liftboats being idle for long periods of time. We may be required to idle rigs or liftboats or enter into lower dayrate contracts in response to market conditions in the future. In the U.S. Gulf of Mexico, contracts are generally short term, and oil and natural gas companies tend to respond quickly to upward or downward changes in prices. Due to the short-term nature of most of our contracts, changes in market conditions can quickly affect our business. In addition, customers generally have the right to terminate our contracts with little or no notice, and without penalty. As a result of the cyclical nature of our industry, we expect our results of operations to be volatile.

In addition, the U.S. Gulf of Mexico, and in particular the shallow-water region of the U.S. Gulf of Mexico, is a mature oil and natural gas production region that has experienced substantial seismic survey and exploration activity for many years. Because a large number of oil and natural gas prospects in this region have already been drilled, additional prospects of sufficient size and quality could be more difficult to identify. According to the U.S. Energy Information Administration, the average size of the U.S. Gulf of Mexico discoveries has declined significantly since the early 1990s. In addition, the amount of natural gas production in the shallow-water U.S. Gulf of Mexico has declined over the last decade. Moreover, oil and natural gas companies may be unable to obtain financing necessary to drill prospects in this region. The decrease in the size of oil and natural gas prospects, the decrease in production or the failure to obtain such financing may result in reduced drilling activity in the U.S. Gulf of Mexico and reduced demand for our services.

Our industry is highly competitive, with intense price competition. Our inability to compete successfully may reduce our profitability.

Our industry is highly competitive. Our contracts are traditionally awarded on a competitive bid basis. Pricing is often the primary factor in determining which qualified contractor is awarded a job. Dayrates also depend on the supply of vessels. Generally, excess capacity puts downward pressure on dayrates. Excess capacity can occur when newly constructed vessels enter the market, when vessels are mobilized between market areas and when non-marketed vessels are re-activated. Many other companies in the drilling industry are larger than we are and have more diverse fleets, or fleets with generally higher specifications, and greater resources than we have. In addition, the competitive environment has intensified as recent mergers among oil and natural gas companies have reduced the number of available customers. Finally, competition among shallow-water drilling and marine service providers is also affected by each provider's reputation for safety and quality. We may not be able to maintain our competitive position, and we believe that competition for contracts will continue to be intense in the foreseeable future. Our inability to compete successfully may reduce our profitability.

Our business involves numerous operating hazards, and our insurance may not be adequate to cover our losses.

Our operations are subject to the usual hazards inherent in the drilling and operation of oil and natural gas wells, such as blowouts, reservoir damage, loss of production, loss of well control, punchthroughs, craterings, fires and pollution. The occurrence of these events could result in the suspension of drilling or production operations, claims by the operator, severe damage to or destruction of the equipment involved and injury or death to rig or liftboat personnel. We may also be subject to personal injury and other claims of rig or liftboat personnel as a result of our drilling and liftboat operations. Operations also may be suspended because of machinery breakdowns, abnormal operating conditions, failure of subcontractors to perform or supply goods or services and personnel shortages.

Table of Contents

Index to Financial Statements

In addition, our drilling and liftboat operations are subject to perils peculiar to marine operations, including capsizing, grounding, collision and loss or damage from severe weather. Tropical storms, hurricanes and other severe weather prevalent in the U.S. Gulf of Mexico, such as Hurricane Rita in September 2005, Hurricane Katrina in August 2005 and Hurricane Ivan in September 2004, could have a material adverse effect on our operations. During such severe storms, our liftboats typically leave location and cease to earn a full dayrate. Under U.S. Coast Guard guidelines, the liftboats cannot return to work until the weather improves and seas are less than five feet.

In August 2005, two of our jackup rigs, *Rig 21* and *Rig 25*, sustained damage during Hurricane Katrina. *Rig 25* was severely damaged in connection with Hurricane Katrina and is no longer operable. We expect to receive approximately \$48.8 million under our insurance policies related to the rig, and we are attempting to salvage some of its equipment. *Rig 21* suffered extensive damage to its mat as a result of the storm, and we expect that the rig will not be available for service until the second quarter of 2006. In addition, our liftboats were required to leave location during Hurricanes Katrina and Rita and did not earn any dayrate for an average of five days per vessel.

Damage to the environment could result from our operations, particularly through oil spillage or extensive uncontrolled fires. We may also be subject to property, environmental and other damage claims by oil and natural gas companies and other businesses operating offshore and in coastal areas. Our insurance policies and contractual rights to indemnity may not adequately cover losses, and we may not have insurance coverage or rights to indemnity for all risks. Moreover, pollution and environmental risks generally are not totally insurable.

As a result of a number of recent catastrophic events like the terrorist attacks on September 11, 2001 and Hurricanes Ivan, Katrina and Rita, insurance underwriters increased insurance premiums for many of the coverages historically maintained and issued general notices of cancellation and significant changes for a wide variety of insurance coverages. The oil and natural gas industry suffered extensive damage from Hurricanes Ivan, Katrina and Rita. As a result, we anticipate that our insurance costs will increase significantly after the end of our current policy period in July 2006. It is likely that insurers will require higher retention levels and will limit the amount of insurance proceeds that are available after a major wind storm in the event that our rigs or liftboats experience damage. If storm activity in 2006 is as severe as it was in 2005, insurance underwriters may no longer insure U.S. Gulf of Mexico assets against weather-related damage. A number of our customers that produce oil and natural gas have previously maintained business interruption insurance for their production. This insurance may cease to be available in the future, which could adversely impact our customers' business prospects in the U.S. Gulf of Mexico and reduce demand for our services.

If a significant accident or other event resulting in damage to our rigs or liftboats, including severe weather, terrorist acts, war, civil disturbances, pollution or environmental damage, occurs and is not fully covered by insurance or a recoverable indemnity from a customer, it could adversely affect our financial condition and results of operations. Moreover, we may not be able to maintain adequate insurance in the future at rates we consider reasonable or be able to obtain insurance against certain risks.

A single customer accounts for a significant portion of our revenues, the loss of which could adversely affect our financial condition and results of operations.

We derive a significant amount of our revenue from a single major integrated energy company. Chevron Corporation represented approximately 33.1% and 28.6% of our drilling services revenues for the period from inception to December 31, 2004 and the year ended December 31, 2005, respectively. Chevron represented approximately 40.1% and 33.6% of our domestic marine services revenues for the period from inception to December 31, 2004 and the year ended December 31, 2005, respectively. Our financial condition and results of operations will be materially adversely affected if Chevron curtails its activities in the U.S. Gulf of Mexico or Nigeria, terminates its contracts with us, fails to renew its existing contracts or refuses to award new contracts to us and we are unable to enter into contracts with new customers at comparable dayrates.

Table of Contents

Index to Financial Statements

Re-activation of non-marketed rigs or liftboats, mobilization of rigs or liftboats back to the U.S. Gulf of Mexico or new construction of rigs or liftboats could result in excess supply in the region, and our dayrates and utilization could be reduced.

If market conditions continue to improve, inactive rigs and liftboats that are not currently being marketed could be reactivated to meet an increase in demand, and the recent hurricanes have resulted in the reactivation of a number of shallow-water rigs that have been cold-stacked for the past several years. Improved market conditions, particularly relative to other markets, could also lead to jackup rigs, other mobile offshore drilling units and liftboats being moved into the U.S. Gulf of Mexico or could lead to increased construction and upgrade programs by our competitors. Some of our competitors have already announced plans to upgrade existing equipment or build additional jackup rigs with higher specifications than our rigs. According to ODS-Petrodata, as of February 2006, 51 jackup rigs had been ordered by industry participants, national oil companies and financial investors for delivery through 2009. As of March 2006, we believe there were also ten liftboats under construction or on order in the United States that may be used in the U.S. Gulf of Mexico. A significant increase in the supply of jackup rigs, other mobile offshore drilling units or liftboats could adversely affect both our utilization and dayrates.

Upgrade, refurbishment and repair projects are subject to risks, including delays and cost overruns, which could have an adverse impact on our available cash resources and results of operations.

We make upgrade, refurbishment and repair expenditures for our fleet from time to time, including when we acquire units or when repairs or upgrades are required by law, in response to an inspection by a governmental authority or when a unit is damaged. We are currently refurbishing *Rig 16*, a rig that we recently acquired and that has not worked for approximately six years. We also are refurbishing the recently acquired *Rig 26* and *Rig 31*. We expect to spend a total of approximately \$44.3 million in refurbishment costs for *Rig 16*, *Rig 26* and *Rig 31* prior to placing the rigs into service. In addition, *Rig 21*, which suffered extensive damage to its mat as a result of Hurricane Katrina, was moved into a shipyard to repair the damage it sustained.

Upgrade, refurbishment and repair projects are subject to the risks of delay or cost overruns inherent in any large construction project, including costs or delays resulting from the following:

- unexpectedly long delivery times for key equipment and materials;
- shortages of skilled labor and other shipyard personnel necessary to perform the work;
- unforeseen increases in the cost of equipment, labor and raw materials, particularly steel;
- unforeseen engineering problems;
- unanticipated actual or purported change orders;
- work stoppages;

financial or other difficulties at shipyards;

adverse weather conditions; and

inability to obtain required permits or approvals.

Significant cost overruns or delays would adversely affect our financial condition and results of operations. Additionally, capital expenditures for rig upgrade and refurbishment projects could exceed our planned capital expenditures.

Our jackup rigs are at a relative disadvantage to higher specification rigs, which may be more likely to obtain contracts than lower specification jackup rigs such as ours.

Many of our competitors have jackup fleets with generally higher specification rigs than those in our jackup fleet. Particularly during market downturns when there is decreased rig demand, higher specification rigs may be

Table of Contents

Index to Financial Statements

more likely to obtain contracts than lower specification jackup rigs such as ours. In addition, higher specification rigs may be more adaptable to different operating conditions and therefore have greater flexibility to move to areas of demand in response to changes in market conditions. Because a majority of our rigs were designed specifically for drilling in the shallow-water U.S. Gulf of Mexico, our ability to move them to other regions in response to changes in market conditions is limited. Furthermore, in recent years, an increasing amount of exploration and production expenditures have been concentrated in deepwater drilling programs and deeper formations, including deep natural gas prospects, requiring higher specification jackup rigs, semisubmersible drilling rigs or drillships. This trend is expected to continue and could result in a decline in demand for lower specification jackup rigs like ours, which could have an adverse impact on our financial condition and results of operations.

Our acquisition strategy may be unsuccessful if we incorrectly predict operating results, are unable to identify and complete future acquisitions, fail to successfully integrate acquired assets or businesses we acquire, or are unable to obtain financing for acquisitions on acceptable terms.

The acquisition of assets or businesses that are complementary to our drilling and liftboat operations is an important component of our business strategy. We believe that acquisition opportunities may arise from time to time, and any such acquisition could be significant. At any given time, discussions with one or more potential sellers may be at different stages. For instance, we have recently signed an agreement with Laborde to acquire five liftboats and one liftboat under construction. However, any such discussions may not result in the consummation of an acquisition transaction and we may not be able to identify or complete any acquisitions. In addition, we cannot predict the effect, if any, that any announcement or consummation of an acquisition, including the Laborde acquisition, would have on the trading price of our common stock.

Any future acquisitions could present a number of risks, including:

the risk of incorrect assumptions regarding the future results of acquired operations or assets or expected cost reductions or other synergies expected to be realized as a result of acquiring operations or assets;

the risk of failing to integrate the operations or management of any acquired operations or assets successfully and timely; and

the risk of diversion of management's attention from existing operations or other priorities.

In addition, we may not be able to obtain, on terms we find acceptable, sufficient financing that may be required for any such acquisition or investment.

If we are unsuccessful in completing acquisitions of other operations or assets, our financial condition could be adversely affected and we may be unable to implement an important component of our business strategy successfully. In addition, if we are unsuccessful in integrating our acquisitions in a timely and cost-effective manner, our financial condition and results of operations could be adversely affected.

Failure to employ a sufficient number of skilled workers or an increase in labor costs could hurt our operations.

We require skilled personnel to operate and provide technical services and support for our rigs and liftboats. In periods of increasing activity and when the number of operating units in the U.S. Gulf of Mexico increases, either because of new construction, re-activation of idle units or the mobilization of units into the region, shortages of qualified personnel could arise, creating upward pressure on wages and difficulty in staffing our units. In addition, our ability to expand our operations depends in part upon our ability to increase the size of our skilled labor force. We will need to hire additional vessel-based employees in connection with the commencement of operations of *Rig 16*, *Rig 26* and *Rig 31*, and possibly in connection with the Laborde acquisition if completed. Moreover, our labor costs increased significantly in 2005, and we anticipate that this trend will continue in 2006.

Although our employees are not covered by a collective bargaining agreement, the marine services industry has been targeted by maritime labor unions in an effort to organize U.S. Gulf of Mexico employees. A significant increase in the wages paid by competing employers or the unionization of our U.S. Gulf of Mexico employees

Table of Contents

Index to Financial Statements

could result in a reduction of our skilled labor force, increases in the wage rates that we must pay, or both. If either of these events were to occur, our capacity and profitability could be diminished and our growth potential could be impaired.

Governmental laws and regulations may add to our costs or limit drilling activity and liftboat operations.

Our operations are affected in varying degrees by governmental laws and regulations. The industries in which we operate are dependent on demand for services from the oil and natural gas industry and, accordingly, are also affected by changing tax and other laws relating to the energy business generally. We are also subject to the jurisdiction of the United States Coast Guard, the National Transportation Safety Board and the United States Customs and Border Protection Service, as well as private industry organizations such as the American Bureau of Shipping. We may be required to make significant capital expenditures to comply with laws and the applicable regulations and standards of those authorities and organizations. Moreover, the cost of compliance could be higher than anticipated. Similarly, our international operations are subject to certain international conventions and the laws, regulations and standards of other foreign countries in which we operate. It is also possible that these conventions, laws, regulations and standards may in the future add significantly to our operating costs or limit our activities.

In addition, as our vessels age, the costs of drydocking the vessels in order to comply with government laws and regulations and to maintain their class certifications are expected to increase, which could have an adverse effect on our financial condition and results of operations.

Compliance with or a breach of environmental laws can be costly and could limit our operations.

Our operations are subject to regulations that require us to obtain and maintain specified permits or other governmental approvals, control the discharge of materials into the environment, require the removal and cleanup of materials that may harm the environment or otherwise relate to the protection of the environment. For example, as an operator of mobile offshore drilling units and liftboats in navigable U.S. waters and some offshore areas, we may be liable for damages and costs incurred in connection with oil spills or other unauthorized discharges of chemicals or wastes resulting from those operations. Laws and regulations protecting the environment have become more stringent in recent years, and may in some cases impose strict liability, rendering a person liable for environmental damage without regard to negligence or fault on the part of such person. Some of these laws and regulations may expose us to liability for the conduct of or conditions caused by others or for acts that were in compliance with all applicable laws at the time they were performed. The application of these requirements, the modification of existing laws or regulations or the adoption of new requirements, both in U.S. waters and internationally, could have a material adverse effect on our financial condition and results of operations.

Our business would be adversely affected if we failed to comply with the provisions of U.S. law on coastwise trade, or if those provisions were modified, repealed or waived.

We are subject to U.S. federal laws that restrict maritime transportation, including liftboat services, between points in the United States to vessels built and registered in the United States and owned and manned by U.S. citizens. We are responsible for monitoring the ownership of our common stock. If we do not comply with these restrictions, we would be prohibited from operating our liftboats in U.S. coastwise trade, and under certain circumstances we would be deemed to have undertaken an unapproved foreign transfer, resulting in severe penalties, including permanent loss of U.S. coastwise trading rights for our liftboats, fines or forfeiture of the liftboats.

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

During the past several years, interest groups have lobbied Congress to repeal these restrictions to facilitate foreign flag competition for trades currently reserved for U.S.-flag vessels under the federal laws. We believe that interest groups may continue efforts to modify or repeal these laws currently benefiting U.S.-flag vessels. If these efforts are successful, it could result in increased competition, which could adversely affect our results of operations.

Table of Contents

Index to Financial Statements

We will be subject to additional political, economic, and other uncertainties as we expand our international operations.

An element of our business strategy is to continue to expand into international oil and natural gas producing areas such as West Africa, the Middle East and the Asia-Pacific region, including India. We currently own four liftboats operating offshore Nigeria, and we are marketing three of our jackup rigs to work in international markets following completion of refurbishment and upgrade projects on the rigs. Our international operations are subject to a number of risks inherent in any business operating in foreign countries, including:

political, social and economic instability, war and acts of terrorism;

potential seizure or nationalization of assets;

damage to our equipment or violence directed at our employees;

increased operating costs;

modification or renegotiation of contracts;

limitations on insurance coverage, such as war risk coverage in certain areas;

import-export quotas;

confiscatory taxation;

restrictions on currency repatriations;

currency fluctuations and devaluations; and

other forms of government regulation and economic conditions that are beyond our control.

As our international operations expand, the exposure to these risks will increase. Our financial condition and results of operations could be susceptible to adverse events beyond our control that may occur in the particular country or region in which we are active.

Our debt could adversely affect our ability to operate our business and make it difficult to meet our debt service obligations.

As of December 31, 2005, we have total outstanding debt of approximately \$94.7 million. This debt represents approximately 30.5% of our total capitalization. We have up to \$25 million of available capacity under our revolving credit facility, under which we may continue to borrow to fund working capital or other needs in the near term. Our debt and the limitations imposed on us by our existing or future debt agreements could have significant consequences on our business and future prospects, including the following:

we may not be able to obtain necessary financing in the future for working capital, capital expenditures, acquisitions, debt service requirements or other purposes;

we may be exposed to risks inherent in interest rate fluctuations because our borrowings generally are at variable rates of interest, which would result in higher interest expense in the event of increases in interest rates; and

we could be more vulnerable in the event of a downturn in our business that would leave us less able to take advantage of significant business opportunities and to react to changes in our business and in market or industry conditions.

Our ability to make payments on and to refinance our indebtedness and to fund planned capital expenditures will depend on our ability to generate cash in the future, which is subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control. Our future cash flows may be insufficient to meet all of our debt obligations and commitments, and any insufficiency could negatively impact our business. To the extent we are unable to repay our indebtedness as it becomes due or at maturity with cash on hand or from other sources, we will need to refinance our debt, sell assets or repay the debt with the proceeds

Table of Contents

Index to Financial Statements

from further equity offerings. Additional indebtedness or equity financing may not be available to us in the future for the refinancing or repayment of existing indebtedness, and we may not be able to complete asset sales in a timely manner sufficient to make such repayments.

Our senior secured credit agreement imposes significant operating and financial restrictions, which may prevent us from capitalizing on business opportunities and taking some actions.

Our senior secured credit agreement imposes significant operating and financial restrictions on us. These restrictions limit our ability to:

make investments and other restricted payments, including dividends;

incur additional indebtedness;

create liens;

restrict dividend or other payments by our subsidiaries to us;

sell our assets or consolidate or merge with or into other companies;

engage in transactions with affiliates; and

make capital expenditures.

These limitations are subject to a number of important qualifications and exceptions. Our credit agreement also requires us to maintain a minimum interest coverage ratio and a maximum leverage ratio. These covenants may adversely affect our ability to finance our future operations and capital needs and to pursue available business opportunities. A breach of any of these covenants could result in a default in respect of the related debt. If a default were to occur, the relevant lenders could elect to declare the debt, together with accrued interest and other fees, immediately due and payable and proceed against any collateral securing that debt.

Risks Related to Our Limited Operating History

Because we have a limited operating history and we have not provided three years of audited financial statements that normally would be required in an SEC registration statement, you may not be able to evaluate our current business and future earnings prospects accurately.

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

We were formed in July 2004 to provide drilling and liftboat services to the oil and natural gas exploration and production industry. As a result, we have limited operating history upon which you can base an evaluation of our current business and our future earnings prospects.

In addition, this prospectus includes audited financial statements only as of and for the year ended December 31, 2005 and as of and for the period from inception to December 31, 2004. We have acquired our fleet of jackup rigs and liftboats in a number of separate asset acquisitions since our formation in July 2004. We have not completed or provided in this prospectus any stand-alone pre-acquisition financial statements for the assets we acquired in these transactions. As a result, and given our recent date of formation, we have not provided in this prospectus three years of audited financial statements that normally would be included in a prospectus forming part of an SEC registration statement. Accordingly, you have limited information upon which to make your decision to invest in our common stock.

Risks Related to Our Principal Stockholder, the Securities Markets and Ownership of Our Common Stock

Following this offering, our largest stockholder will exert significant influence over us.

Following this offering, LR Hercules Holdings, LP (Lime Rock) will hold 22.9% of the outstanding common stock of our company (or 20.7% if the underwriters exercise the over-allotment option in full). As a

Table of Contents

Index to Financial Statements

result of its ownership, Lime Rock will be able to exert significant influence over us. Investors in this offering, by themselves, will not be able to affect the outcome of any stockholder vote.

Our interests may conflict with those of Lime Rock and its affiliates with respect to our past and ongoing business relationships, and because of their ownership, we may not be able to resolve these conflicts on terms commensurate with those possible in arms-length transactions.

Our interests may conflict with those of Lime Rock and its affiliates in a number of areas relating to our past and ongoing relationships, including:

the timing and manner of any sales or distributions by Lime Rock of all or any portion of its ownership interests in us;

business opportunities that may be presented to Lime Rock and to our directors associated with Lime Rock;

competition between Lime Rock and us within the same lines of business; and

our dividend policy.

We may not be able to resolve any potential conflicts with Lime Rock and its affiliates, and even if we do, the resolution may be less favorable than if we were dealing with an unaffiliated party.

We limit foreign ownership of our company, which could reduce the price of our common stock.

Our certificate of incorporation limits the percentage of outstanding common stock and other classes of capital stock that can be owned by non-United States citizens within the meaning of statutes relating to the ownership of U.S.-flagged vessels. Applying the statutory requirements applicable today, our certificate of incorporation provides that no more than 20% of our outstanding common stock may be owned by non-United States citizens and establishes mechanisms to maintain compliance with these requirements. These restrictions may have an adverse impact on the liquidity or market value of our common stock because holders may be unable to transfer our common stock to non-United States citizens. Any attempted or purported transfer of our common stock in violation of these restrictions will be ineffective to transfer such common stock or any voting, dividend or other rights in respect of such common stock.

Restrictions on the percentage ownership of our outstanding capital stock by non-U.S. citizens may subject the shares held by such non-U.S. citizens to restrictions, limitations and redemption.

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

Our certificate of incorporation provides that any transfer, or attempted or purported transfer, of any shares of our capital stock that would result in the ownership or control of in excess of 20% of our outstanding capital stock by one or more persons who are not U.S. citizens for purposes of U.S. coastwise shipping will be void and ineffective as against us. In addition, if at any time persons other than U.S. citizens own shares of our capital stock or possess voting power over any shares of our capital stock in excess of 20%, we may withhold payment of dividends, suspend the voting rights attributable to such shares and redeem such shares.

Substantial sales of our common stock by Lime Rock or us could cause our stock price to decline and issuances by us may dilute the ownership interest in our company of our existing stockholders.

We are unable to predict whether significant amounts of our common stock will be sold by Lime Rock after the offering. Any sales of substantial amounts of our common stock in the public market by Lime Rock or us, or the perception that these sales might occur, could lower the market price of our common stock. Further, if we issue additional equity securities to raise additional capital, your ownership interest in our company may be diluted and the value of your investment may be reduced. Please read [Shares Eligible for Future Sale](#).

Index to Financial Statements

We have no plans to pay regular dividends on our common stock, so you may not receive funds without selling your common stock.

We do not intend to declare or pay regular dividends on our common stock in the foreseeable future. Instead, we generally intend to invest any future earnings in our business. Subject to Delaware law, our board of directors will determine the payment of future dividends on our common stock, if any, and the amount of any dividends in light of any applicable contractual restrictions limiting our ability to pay dividends, our earnings and cash flows, our capital requirements, our financial condition, and other factors our board of directors deems relevant. Our senior secured credit agreement restricts our ability to pay dividends or other distributions on our equity securities. Accordingly, you may have to sell some or all of your common stock in order to generate cash flow from your investment. You may not receive a gain on your investment when you sell our common stock and may lose the entire amount of your investment.

The price of our common stock may be volatile.

The market price of our common stock could be subject to significant fluctuations after this offering and may decline below the offering price. You may not be able to resell your shares at or above the offering price. Among the factors that could affect the price of our common stock are:

our operating and financial performance and prospects;

quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;

changes in revenue or earnings estimates;

publication of research reports by analysts;

speculation in the press or investment community;

strategic actions by us or our competitors, such as acquisitions or restructurings;

sales of our common stock by stockholders;

actions by institutional investors or Lime Rock;

fluctuations in oil and natural gas prices;

general market conditions; and

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

U.S. and international economic, legal and regulatory factors unrelated to our performance.

The stock markets in general have experienced extreme volatility that has at times been unrelated to the operating performance of particular companies. These broad market fluctuations may adversely affect the trading price of our common stock.

Provisions in our charter documents or Delaware law may inhibit a takeover, which could adversely affect the value of our common stock.

Our certificate of incorporation, bylaws and Delaware corporate law contain provisions that could delay or prevent a change of control or changes in our management that a stockholder might consider favorable. These provisions will apply even if the offer may be considered beneficial by some of our stockholders. If a change of control or change in management is delayed or prevented, the market price of our common stock could decline. Please read [Description of Capital Stock](#) for a description of these provisions.

FORWARD-LOOKING INFORMATION

Certain of the statements contained in this prospectus are forward-looking statements. All statements other than statements of historical fact are, or may be deemed to be, forward-looking statements. Forward-looking statements include information concerning our possible or assumed future financial performance and results of operations, including statements about the following subjects:

our strategy, including our plans, expectations and any effects of focusing on shallow-water drilling and liftboat services in the U.S. Gulf of Mexico and international locations, pursuing efficient, low-cost operations, pursuing strategic growth opportunities and maintaining a conservative capital structure and sufficient liquidity;

our ability to enter into new contracts for our rigs and liftboats, including *Rig 16* and *Rig 31*, and future utilization rates for the units;

the correlation between demand for our rigs and our liftboats and our earnings and customers' expectations of energy prices;

future capital expenditures and refurbishment costs;

amounts expected to be paid by insurance proceeds for *Rig 21* and *Rig 25*;

expected time to complete the refurbishment of *Rig 16*, *Rig 26* and *Rig 31*;

sufficiency of funds for required capital expenditures, working capital and debt service;

our ability to complete the Laborde acquisition;

our plans regarding increased international operations;

our expectations regarding the availability and costs of insurance coverage for our rigs and liftboats;

expected useful lives of our rigs and liftboats;

liabilities under laws and regulations protecting the environment;

expected outcomes of litigation, claims and disputes and their expected effects on our financial condition and results of operations; and

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

expectations regarding improvements in offshore drilling activity, continuation of current market conditions, demand for our rigs and liftboats, inspection and repair work for our liftboats, operating revenues, operating and maintenance expense, insurance expense and deductibles, interest expense, debt levels and other matters with regard to outlook.

We have based these statements on our assumptions and analyses in light of our experience and perception of historical trends, current conditions, expected future developments and other factors we believe are appropriate in the circumstances. Forward-looking statements by their nature involve substantial risks and uncertainties that could significantly affect expected results, and actual future results could differ materially from those described in such statements. Although it is not possible to identify all factors, we continue to face many risks and uncertainties. Among the factors that could cause actual future results to differ materially are the risks and uncertainties described under **Risk Factors** above and the following:

oil and natural gas prices and industry expectations about future prices;

demand for offshore jackup rigs and liftboats;

our ability to enter into and the terms of future contracts;

the impact of governmental laws and regulations;

the adequacy of sources of liquidity;

uncertainties relating to the level of activity in offshore oil and natural gas exploration, development and production;

competition and market conditions in the contract drilling and liftboat industries;

Table of Contents

Index to Financial Statements

the availability of skilled personnel;

labor relations and work stoppages;

operating hazards such as severe weather and seas, fires, cratering, blowouts, war, terrorism and cancellation or unavailability of insurance coverage;

the effect of litigation and contingencies; and

our inability to achieve our plans or carry out our strategy.

Many of these factors are beyond our ability to control or predict. Any of these factors, or a combination of these factors, could materially affect our future financial condition or results of operations and the ultimate accuracy of the forward-looking statements. These forward-looking statements are not guarantees of our future performance, and our actual results and future developments may differ materially from those projected in the forward-looking statements. Management cautions against putting undue reliance on forward-looking statements or projecting any future results based on such statements or present or prior earnings levels. In addition, each forward-looking statement speaks only as of the date of the particular statement, and we undertake no obligation to publicly update or revise any forward-looking statements.

USE OF PROCEEDS

We estimate that our net proceeds from the sale of 1,600,000 shares of our common stock in this offering will be approximately \$54.3 million, after deducting underwriting discounts and commissions and our estimated offering expenses. We will not receive any of the proceeds from any sale of shares of our common stock by the selling stockholders.

Under our senior secured term loan, we are required to use 25% of the net proceeds to us from this offering, totaling \$13.6 million, to prepay outstanding amounts under the term loan, provided that the holders of the term loan may reject such prepayment. If we use all \$13.6 million to prepay amounts under the term loan, we would also pay accrued and unpaid interest to the repayment date of approximately \$47,000. We intend to use the net proceeds not used in the mandatory prepayment for other corporate purposes, which may include the refurbishment of *Rig 26* and *Rig 31* and the acquisition and refurbishment of additional rigs and liftboats, including the Laborde liftboats.

In June 2005, we entered into a senior secured credit agreement with a syndicate of financial institutions. The agreement provided for a \$140.0 million term loan and a \$25.0 million revolving credit facility. We used the proceeds from the term loan to repay all outstanding amounts under two credit facilities, including accrued interest, fees and applicable prepayment premiums, to fund the purchase price of the jackup rig *Rig 16* and for general corporate purposes. We terminated both of those credit facilities in connection with the repayment. We repaid \$45.0 million of principal amount of the term loan with a portion of the net proceeds to us from our initial public offering in November 2005.

Amounts outstanding under our senior secured term loan currently bear interest at a rate equal to, at our option, either (1) the highest of (a) the lead lender's base rate, (b) the three-month certificate of deposit rate plus 0.5% and (c) the Federal funds effective rate plus 0.5%, in each case plus 2.25%, or (2) LIBOR plus 3.25%. As of April 3, 2006, \$94.0 million of the principal amount of the term loan was outstanding, and the interest rate was 8.24%. In accordance with the credit agreement, in July 2005, we entered into hedge transactions with the purpose and effect of fixing the interest rate on \$70.0 million of the outstanding principal amount of the term loan at 7.54% for three years. In addition, we entered into hedge transactions with the purpose and effect of capping the interest rate on an additional \$20.0 million of such principal amount at 8.25% for three years. Principal payments of \$350,000 are due quarterly, and the outstanding principal balance of the term loan is payable in full in June 2010. For additional information about the term loan, please read "Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources" in this prospectus.

PRICE RANGE OF COMMON STOCK AND DIVIDEND POLICY

Our common stock is traded on the NASDAQ National Market under the symbol HERO. As of March 17, 2006, there were 28 stockholders of record. The following table sets forth, for the periods indicated, the range of high and low sales prices for our common stock:

	<u>Price</u>	
	<u>High</u>	<u>Low</u>
2005		
Fourth Quarter(1)	\$ 29.26	\$ 20.60
2006		
First Quarter	\$ 36.70	\$ 27.68
Second Quarter(2)	\$ 38.83	\$ 34.02

(1) Reflects trading activity from October 27, 2005 through December 31, 2005.

(2) Reflects trading activity through April 11, 2006.

On April 11, 2006, the last reported sale price of our common stock on the NASDAQ National Market was \$36.37 per share.

We do not intend to declare or pay regular dividends on our common stock in the foreseeable future. Instead, we generally intend to invest any future earnings in our business. Subject to Delaware law, our board of directors will determine the payment of future dividends on our common stock, if any, and the amount of any dividends in light of:

any applicable contractual restrictions limiting our ability to pay dividends;

our earnings and cash flows;

our capital requirements;

our financial condition; and

other factors our board of directors deems relevant.

Our senior secured credit agreement restricts our ability to pay dividends or other distributions on our equity securities.

Table of ContentsIndex to Financial Statements

CAPITALIZATION

We have provided in the table below our consolidated cash and cash equivalents and capitalization as of December 31, 2005: (1) on an actual basis and (2) on an as adjusted basis after giving effect to this offering and the use of the net proceeds to us to prepay \$13.6 million of amounts outstanding under our senior secured term loan, together with accrued and unpaid interest to the repayment date of approximately \$47,000, as described under "Use of Proceeds" as if these transactions had occurred as of December 31, 2005. This table should be read in conjunction with "Selected Consolidated Financial Data," "Management's Discussion and Analysis of Financial Condition and Results of Operations" and our consolidated financial statements and related notes appearing elsewhere in this prospectus.

	December 31, 2005	
	Actual	As Adjusted
	(in thousands, except par values)	
Cash and cash equivalents(1)	\$ 47,575	\$ 88,222
Long-term debt, including current portion:		
Senior secured credit facility	\$ 94,650	\$ 81,085
Total long-term debt, including current portion	94,650	81,085
Stockholders' equity:		
Preferred stock, par value \$0.01 per share; 50,000 shares authorized; no shares issued and outstanding	302	318
Common stock, par value \$0.01 per share; 200,000 shares authorized; 30,243 shares issued and outstanding on an actual basis; 31,843 shares issued and outstanding as adjusted	184,698	238,940
Additional paid-in capital	(1,322)	(1,322)
Restricted stock (unearned compensation)	476	476
Accumulated other comprehensive income	31,789	31,548(2)
Retained earnings		
Total stockholders' equity	215,943	269,960
Total capitalization	\$ 310,593	\$ 351,045

(1) Does not give effect to our payment in February 2006 of \$20.1 million in cash to fund the purchase price of *Rig 26*.

(2) Includes a charge of \$0.4 million, consisting of the write-off of deferred financing costs related to the portion of our term loan that will be retired. The after-tax impact of the write-off on stockholders' equity is \$0.2 million.

Index to Financial Statements

SELECTED CONSOLIDATED FINANCIAL DATA

We have derived the following consolidated financial information as of and for the period from inception to December 31, 2004 and as of and for the year ended December 31, 2005 from our audited consolidated financial statements included elsewhere in this prospectus.

We were formed in July 2004 and commenced operations in August 2004. From our formation to December 31, 2005, we completed several significant asset acquisitions that impact the comparability of our historical financial results. Our financial results reflect the impact of the assets only after the date of their acquisition. This prospectus does not include any financial information relating to the assets for periods prior to their acquisition date. As described under Management's Discussion and Analysis of Financial Condition and Results of Operations Acquisition History and Financial Statement Presentation, we have concluded that we are not required to include such pre-acquisition financial statements in this prospectus, and we believe that separate audited financial statements for the assets we acquired as of any date or for any period prior to our acquisition of those assets would not be meaningful to investors.

In addition, in connection with our initial public offering, we converted from a Delaware limited liability company to a Delaware corporation on November 1, 2005. Prior to the conversion, our owners elected to be taxed at the member unitholder level rather than at the company level. As a result, we did not recognize any tax provision on our income prior to the conversion. Upon completion of the conversion, we recorded a tax provision of \$12.1 million related to the recognition of deferred taxes equal to the tax effect of the difference between the book and tax basis of our assets and liabilities as of the effective date of the conversion.

You should read the following information in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations and our consolidated financial statements and the related notes included elsewhere in this prospectus.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with Selected Consolidated Financial Data and our consolidated financial statements and notes thereto appearing elsewhere in this prospectus. This discussion and analysis contains forward-looking statements that involve risks and uncertainties. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of certain factors, including those set forth under Risk Factors and elsewhere in this prospectus and the documents we incorporate by reference. See Forward-Looking Information.

Overview

We provide shallow-water drilling and liftboat services to the oil and natural gas exploration and production industry primarily in the U.S. Gulf of Mexico. We provide these services to major integrated energy companies and independent oil and natural gas operators. We report our business activities in three business segments, Contract Drilling Services, Domestic Marine Services and International Marine Services. Prior to the fourth quarter of 2005, during which we acquired our international liftboats, we did not report an International Marine Services segment.

Contract Drilling Services. We own a fleet of nine jackup rigs that can drill in maximum water depths ranging from 85 to 250 feet, and one jackup rig that was severely damaged in Hurricane Katrina and is no longer operable. Under most of our contract drilling service agreements, we are paid a fixed daily rental rate called a dayrate, and we are required to pay all costs associated with our own crews as well as the upkeep and insurance of the rig and equipment.

Marine Services. We own a fleet of 46 liftboats in our Domestic and International Marine Services segments. Our Domestic Marine Services segment includes 42 liftboats operating in the U.S. Gulf of Mexico, and our International Marine Services segment includes four liftboats operating offshore Nigeria. Our liftboats are used to provide a wide range of offshore support services, including platform maintenance, platform construction, well intervention and decommissioning services, and can be moved from location to location within a short period of time. Under most of our liftboat contracts, we are paid a fixed dayrate for the rental of the vessel, which typically includes the costs of a small crew of four to eight employees, and we also receive a variable rate for reimbursement of other operating costs such as catering, fuel and rental equipment and other items.

Our revenues are affected primarily by dayrates, fleet utilization and the number and type of units in our fleet. Utilization and dayrates, in turn, are influenced principally by the demand for rig and liftboat services from the exploration and production sectors of the oil and natural gas industry. Our contracts in the U.S. Gulf of Mexico tend to be short-term in nature and are heavily influenced by changes in the supply of units relative to the fluctuating expenditures for both drilling and production activity. Our contracts in Nigeria are longer-term in nature, with the existing contracts being for a two-year term expiring in August 2006.

Our operating costs are primarily a function of fleet configuration and utilization levels. The most significant direct operating costs for our Contract Drilling Services segment are wages paid to crews, maintenance and repairs to the rigs, and marine insurance. These costs do not vary significantly whether the rig is operating under contract or idle, unless we believe that the rig is unlikely to work for a prolonged period of time, in which case we may decide to cold-stack the rig. Cold-stacking is a common term used to describe a rig that is expected to be idle for a protracted period and typically for which routine maintenance is suspended and the crews are either redeployed or laid-off. When a rig is cold-stacked, operating expenses for the rig are greatly reduced because the crew is smaller and maintenance activities are suspended. Rigs that have been cold-stacked typically require a lengthy reactivation project that can involve significant expenditures, particularly if the rig has been cold-stacked for a long period of time.

Table of Contents**Index to Financial Statements**

The most significant costs for our Marine Services segments are the wages paid to crews and the amortization of regulatory drydocking costs. Unlike our Contract Drilling Services segment, a significant portion of the expenses incurred with operating each liftboat are paid for or reimbursed by the customer under contractual terms and prices. This includes catering, fuel, oil, rental equipment, crane overtime and other items. We record reimbursements from customers as revenues and the related expenses as operating costs. Our liftboats are required to undergo regulatory inspections every year and to be drydocked two times every five years; the drydocking expenses and time of drydock vary depending on the condition of the vessel. All costs associated with regulatory inspections, including related drydocking costs, are deferred and amortized over a period of 12 to 24 months.

Industry Background and Trends

Market conditions improved during 2005 compared to 2004. Our jackup rigs were contracted at dayrates ranging from approximately \$31,000 to \$70,000 in 2005, as compared to dayrates ranging from approximately \$23,000 to \$37,000 for the period from inception to December 31, 2004. Our liftboats were contracted at dayrates ranging from approximately \$2,200 to \$20,500 in 2005, as compared to dayrates ranging from approximately \$3,300 to \$13,700 for the period from inception to December 31, 2004. Dayrates for our jackup rigs and liftboats have continued to increase in the first quarter of 2006, with dayrates for our jackup rigs ranging from approximately \$53,000 to \$75,000 for the first two months of 2006, and dayrates for our liftboats ranging from approximately \$4,800 to \$28,000 in the same period. As discussed under Outlook below, we believe that current commodity prices support the recent increases in rig and liftboat dayrates. However, concerns over the level of oil supplies and natural gas in storage could lead to moderation or even a decline in dayrates.

The following table compares utilization rates for our jackup rigs, as operated by us or previous owners, with rates for similar units in the U.S. Gulf of Mexico for the years ended December 31, 2005, 2004, 2003, 2002 and 2001. The industry utilization rates for jackup rigs presented below are based on data provided by ODS-Petrodata and include the total number of jackup rigs of the specified type in the U.S. Gulf of Mexico. No industry data is available with respect to utilization rates of liftboats in the U.S. Gulf of Mexico or Nigeria; however, we believe that the utilization rates for our liftboats are comparable to those for similar vessels in our industry. The rates for our rigs and liftboats in the table below are presented on a pro forma basis as to the acquisitions of the rigs and liftboats currently in our fleet, excluding *Rig 16* and *Rig 31*, which were located in international markets for all periods presented, *Rig 26*, which was cold-stacked in the U.S. Gulf of Mexico for all periods presented, *Rig 25*, which was severely damaged during Hurricane Katrina and is no longer operable, and the *Whale Shark*, which was acquired in August 2005 and is newly constructed. The rates therefore include utilization data for such units when owned and operated by prior owners. As a result, the utilization rates for our rigs and liftboats presented below may not be indicative of the utilization rates that we would have achieved had we owned the assets for all of the periods presented or that we will achieve in the future. In addition, because the utilization rates for our rigs and liftboats presented below are on a pro forma basis, those rates differ from the historical utilization rates for our rigs and liftboats presented elsewhere in this prospectus. Utilization shown in the table below equals the total number of operating days for all rigs or liftboats of the specified type in the period as a percentage of the total number of calendar days in the period.

PRO FORMA UTILIZATION RATES

	Year Ended December 31,				
	2001	2002	2003	2004	2005
Jackup Rigs:					
U.S. Gulf of Mexico					
250-foot mat slot jackup rigs	63.1%	12.9%	34.6%	48.5%	66.4%

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

200-foot mat cantilever jackup rigs	85.2	61.2	84.9	98.2	98.2
Hercules rigs (1)	81.9	78.4	88.6	87.4	97.5
Liftboats:					
Hercules liftboats (2)	73.2%	76.4%	60.7%	64.1%	79.7%

Table of Contents

Index to Financial Statements

- (1) Excludes *Rig 16* and *Rig 31*, which were located in international markets for all periods presented, *Rig 16*, which was cold-stacked in the U.S. Gulf of Mexico for all periods presented, *Rig 25*, which was severely damaged during Hurricane Katrina and is no longer operable. *Rig 16*, *Rig 26* and *Rig 31* were not marketed and were stacked for all periods presented. Utilization rates for *Rig 25* were 83.0%, 98.1%, 100.0%, 68.0% and 100.0% for the years ended December 31, 2001, 2002, 2003 and 2004 and the period in 2005 prior to Hurricane Katrina, respectively.
- (2) Excludes the *Whale Shark*, which was acquired in August 2005 and is newly constructed. Liftboats, unlike jackup rigs, are required to undergo annual inspections as well as more thorough inspections requiring drydocking two times every five years. As a result, we believe that utilization rates of approximately 90% represent effectively full utilization of our liftboat fleet.

During February 2006, utilization of our drilling rigs and liftboats was 84.9% and 86.0%, respectively.

Recent Developments

Initial Public Offering

We completed our initial public offering of 10,580,000 shares of common stock at \$20.00 per share on November 1, 2005. We offered 6,250,000 shares of common stock, while the remaining 4,330,000 shares were offered by selling stockholders. We received approximately \$115.1 million of proceeds from the offering, net of underwriting discounts and commissions and estimated expenses. We used \$44.0 million of the proceeds to complete the acquisition of a fleet of seven liftboats from Danos & Curole Marine Contractors LLC, discussed below. In addition, we repaid \$45.0 million of the senior secured term loan plus accrued interest of \$0.3 million, discussed below. We used the remaining proceeds for the refurbishment of and upgrades to *Rig 16* and *Rig 31* and the acquisition of *Rig 26*.

On November 1, 2005, in connection with our initial public offering, we converted from a limited liability company to a corporation (the Conversion). Upon the Conversion, each outstanding membership unit of the limited liability company was converted into 350 shares of common stock of the corporation. Prior to the Conversion, we elected to be taxed as a partnership. As such, the members of our company were taxed on their proportionate share of net income prior to the Conversion and no provision or liability for income taxes was included in our consolidated financial statements. When we became a taxable entity in the Conversion, a provision of approximately \$12.1 million was made reflecting the tax effect of the difference between the book and tax basis of our assets and liabilities as of November 1, 2005, the effective date of the Conversion.

Amendment to Credit Agreement

In December 2005, we formed Hercules International Holdings, Ltd. (Holdings), a Cayman Islands subsidiary, and three additional Cayman Islands subsidiaries to support our international operations. We transferred ownership of *Rig 16* and *Rig 31* to Holdings in December 2005 and acquired *Rig 26* with Holdings in February 2006.

In January 2006, we amended our credit agreement to provide for, among other things, the release of the guaranty, security agreement and vessel mortgages recently entered into by two of our Cayman subsidiaries in connection with the transfer of *Rig 16* and *Rig 31*. In addition, we are permitted to advance up to \$20.0 million to these two Cayman subsidiaries and to invest an additional \$25.0 million in our foreign subsidiaries.

We also amended the credit agreement to extend the termination date of the 1% prepayment premium (that is applicable to certain prepayments of the term loan) from June 29, 2006 to December 31, 2006.

Distribution to Former Members

In February 2006, in accordance with the terms of the limited liability company operating agreement governing our company prior to the Conversion, we made a distribution of \$3.7 million to the former members of

Table of Contents

Index to Financial Statements

our company for taxes in respect of the ten-month period ended upon the Conversion. The former members did not receive any other distributions prior to the Conversion, and other than this required distribution relating to taxes, the earnings generated by our company were retained by us as part of our stockholders' equity balance upon the Conversion. We have no further obligation under the operating agreement to make any such distributions.

Acquisition of Rig 26

In February 2006, we acquired the jackup rig *Rig 26* for a purchase price of \$20.1 million. This rig is capable of drilling in water depths of up to 150 feet. We are currently refurbishing the rig in a shipyard in Louisiana and expect to spend approximately \$20.0 million on that refurbishment. We expect the rig to be available in the first quarter of 2007. We intend to seek work for the rig under a longer-term contract in a suitable international location.

Liftboat Acquisition from Laborde

On April 3, 2006, we agreed to acquire five liftboats from Laborde Marine Lifts, Inc. (*Laborde*). In addition, we have agreed to assume the construction of an additional liftboat pursuant to a construction agreement to be assigned to us by Laborde at the closing. The total purchase price to be paid in connection with the transaction is \$52.0 million. The purchase price will be reduced by the total amount remaining due under the construction agreement as of the closing date. We expect to close the transaction in the second quarter of 2006.

The liftboats, including the liftboat under construction, have leg lengths ranging from 105 to 200 feet and are located in the U.S. Gulf of Mexico. We intend to integrate the liftboats into our existing liftboat operations and seek work for them in the U.S. Gulf of Mexico or suitable international locations.

We intend to apply the \$48.8 million of expected insurance proceeds related to *Rig 25* to the purchase price in the Laborde transaction. The balance would be paid from cash on hand, which may include net proceeds to us from this offering. The acquisition is subject to various closing conditions that may not be satisfied, and we may not complete the acquisition in the second quarter or at all.

Rig 16 and Rig 31

Rig 16 is undergoing a major refurbishment and upgrade in a shipyard in the United Arab Emirates. On February 23, 2006, we entered into a letter of intent to contract *Rig 16* for work offshore Qatar. The letter of intent is conditioned upon, among other things, the completion of a definitive drilling contract. Under the letter of intent, the dayrate would escalate from a rate of \$49,500, which would apply from the date of the customer's acceptance of the rig to May 31, 2006. From June 1, 2006 until the end of the contract term, the dayrate would be \$69,500. We would also receive a stand-by rate of \$30,000 per day, commencing on the date of the letter of intent and continuing until the earlier of the acceptance of the rig or May 1, 2006. The term of the contract would be two years commencing on the date the rig is under tow from the shipyard and is accepted by the customer. The customer may terminate the contract, and not pay the stand-by rate, if the rig is not under tow from the shipyard and accepted by June 1, 2006.

Rig 31 is undergoing a major refurbishment and upgrade in a shipyard in Malaysia. On March 31, 2006, we entered into a letter of award to contract *Rig 31* for work offshore India. The letter of award is conditioned upon, among other things, the completion of a definitive drilling contract. The drilling contract, if completed, would cover the drilling of seven wells with five one-well options, and would commence in September 2006. The dayrate under the contract would be \$110,000 for the first well and \$140,000 for each additional well.

Recent Hurricanes

Two of our jackup rigs, *Rig 21* and *Rig 25*, sustained damage during Hurricane Katrina. *Rig 21* sustained substantial damage to its mat and was moved to a shipyard in Mississippi to repair the damage. We expect the rig will be available in the second quarter of 2006. *Rig 25* was severely damaged in connection with Hurricane

Table of Contents

Index to Financial Statements

Katrina and is no longer operable. We expect to receive approximately \$48.8 million under our insurance policies related to the rig, and we are attempting to salvage some of its equipment. None of our rigs or liftboats sustained any material damage during Hurricane Rita.

Critical Accounting Policies

Critical accounting policies are those that are important to our results of operations, financial condition and cash flows and require management's most difficult, subjective or complex judgments. Different amounts would be reported under alternative assumptions. We have evaluated the accounting policies used in the preparation of the consolidated financial statements and related notes appearing elsewhere in this prospectus. We apply those accounting policies that we believe best reflect the underlying business and economic events, consistent with accounting principles generally accepted in the United States. We believe that our policies are generally consistent with those used by other companies in our industry.

We periodically update the estimates used in the preparation of the financial statements based on our latest assessment of the current and projected business and general economic environment. Our significant accounting policies are summarized in Note 1 to our consolidated financial statements. We believe that our more critical accounting policies include those related to property and equipment, revenue recognition, allowance for doubtful accounts, deferred charges and stock-based compensation. Inherent in such policies are certain key assumptions and estimates.

Property and Equipment

Property and equipment represents 69.7% of our total assets as of December 31, 2005. Property and equipment is stated at cost, less accumulated depreciation. Expenditures that substantially increase the useful lives of our assets are capitalized and depreciated, while routine expenditures for maintenance items are expensed as incurred, except for expenditures for drydocking our liftboats. Drydock costs are capitalized at cost as other non-current assets on the consolidated balance sheet and amortized on the straight-line method over a period of 12 to 24 months (see *Deferred Charges* below). Depreciation is computed using the straight-line method over the useful life of the asset, which is typically 15 years for our rigs and liftboats. We review our property and equipment for potential impairment when events or changes in circumstances indicate that the carrying value of any asset may not be recoverable. For property and equipment, the determination of recoverability is made based on the estimated undiscounted future net cash flows of the assets being reviewed. Any actual impairment charge would be recorded using the estimated discounted value of future cash flows. Our estimates, assumptions and judgments used in the application of our property and equipment accounting policies reflect both historical experience and expectations regarding future industry conditions and operations. Using different estimates, assumptions and judgments, especially those involving the useful lives of our rigs and liftboats and expectations regarding future industry conditions and operations, would result in different carrying values of assets and results of operations. For example, a prolonged downturn in the drilling industry in which utilization and dayrates were significantly reduced could result in an impairment of the carrying value of our jackup rigs.

Revenue Recognition

Revenues are generated from our rigs and liftboats working under dayrate contracts as the services are provided. Some of our contracts also allow us to recover additional direct costs, including mobilization and demobilization costs, additional labor and additional catering costs. Under most of our liftboat contracts, we receive a variable rate for reimbursement of costs such as catering, fuel, oil, rental equipment, crane overtime and other items. Revenue for the recovery or reimbursement of these costs is recognized when the costs are incurred except for mobilization

revenues, which are amortized over the related drilling contract.

Allowance for Doubtful Accounts

Accounts receivable represents approximately 10.8% of our total assets and 38.4% of our current assets as of December 31, 2005. We continuously monitor our accounts receivable from our customers to identify any collectability issues. An allowance for doubtful accounts is established when a review of customer accounts

Table of Contents

Index to Financial Statements

indicates that a specific amount will not be collected. We establish an allowance for doubtful accounts based on the actual amount we believe is not collectable. As of December 31, 2005, there was no allowance for doubtful accounts.

Deferred Charges

All of our liftboats are required to undergo regulatory inspections on an annual basis and to be drydocked two times every five years to ensure compliance with U.S. Coast Guard regulations for vessel safety and vessel maintenance standards. Costs associated with these inspections, which generally involve setting the vessels on a drydock, are deferred, and the costs are amortized over a period of 12 to 24 months. As of December 31, 2005, our net deferred charges related to regulatory inspection costs totaled \$3.9 million. The amortization of the regulatory inspection costs was reported as part of our depreciation and amortization expense.

Stock Based Compensation

Stock-based compensation arrangements are accounted for using the intrinsic value method as prescribed in Accounting Principles Board Opinion No. 25 Accounting for Stock Issued to Employees (APB Opinion 25) and related interpretations. Accordingly, compensation cost for options granted to employees is measured as the excess, if any, of the fair value of shares at the date of grant over the exercise price an employee must pay to acquire the shares. No compensation cost has been recognized in the accompanying consolidated financial statements related to stock option awards.

In December 2004, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 123 (revised 2004) Share-Based Payment (SFAS No. 123R), which replaces SFAS No. 123, Accounting for Stock-Based Compensation and supersedes APB Opinion 25. SFAS No. 123R requires all share-based payments to employees, including grants of employee stock options, to be recognized in the financial statements based on the fair values beginning with the first interim period in fiscal year 2006, with early adoption encouraged. The pro forma disclosures previously permitted under SFAS No. 123 no longer will be an alternative to financial statement recognition.

We adopted SFAS No. 123R on January 1, 2006 using the modified prospective method in which compensation cost is recognized beginning with the effective date (a) based on the requirements of SFAS No. 123R for all share-based payments granted after January 1, 2006 and (b) on the requirements of SFAS No. 123 for all awards granted to employees prior to January 1, 2006 that remain unvested on January 1, 2006. We are estimating the cost relating to stock options using the Trinomial Lattice model. Under the new standard, our estimate of compensation expense will require a number of complex and subjective assumptions including our stock price volatility, employee exercise patterns (expected life of the options), future forfeitures and related tax effects. We are estimating that the cost relating to stock options granted through 2005 will be approximately \$2.3 million for the year ended December 31, 2006 and \$4.2 million over the remaining vesting period; however, due to the uncertainty of the level of share-based payments to be granted in the future, these amounts are estimates and subject to change.

Acquisition History and Financial Statement Presentation

Acquisitions from Parker Drilling and Assumption of Management of Rig 30

In August 2004, we acquired five jackup rigs, four platform rigs and related assets from Parker Drilling Company for \$39.3 million. The four platform rigs and related assets that we acquired are not core to our business. We have sold three of the four platform rigs for net proceeds of \$0.8 million, and we intend to sell the fourth, which is inactive. In January 2005, we acquired another jackup rig and related assets from Parker Drilling for \$21.5 million. The jackup rigs acquired ranged in age from 22 years to 33 years, with an average expected remaining useful life of approximately 15 years.

Each of the jackup rigs we acquired from Parker Drilling was, at the time we acquired it, operating under a short-term contract with a customer. We assumed the obligation to perform these contracts and completed each

Table of Contents

Index to Financial Statements

of them within 90 days of our acquisition of the rigs. Thereafter, the rigs began working under contracts that we negotiated with our customers. We did not acquire any rights to the Parker Drilling name in the acquisitions, and we have not marketed the rigs under the Parker Drilling name.

Immediately following the August 2004 acquisition, we hired 248 rig-based employees who had been employed by Parker Drilling. Seven out of the 27 members of our headquarters staff following the acquisition were employed by Parker Drilling immediately prior to the acquisition; however, none of our senior management, and only one salesperson in our marketing staff, had been employed by Parker Drilling immediately prior to the acquisition. Other than this salesperson, we did not hire any financial, legal, human resources, information technology, marketing, safety, training, payroll, purchasing, warehouse, transportation or environmental employees or managers from Parker Drilling. The substantial majority of the Parker Drilling employees that we hired were rig-based, hourly compensated employees.

Concurrent with the August 2004 closing, we hired two operations management personnel and four office employees who had been employed by Hercules Offshore Corporation (Unrelated HOC). Unrelated HOC was formed in March 2001 by Thomas J. Seward II, the former president of our drilling company subsidiary, and Thomas E. Hord, the current vice president, operations and chief operating officer of that subsidiary, to manage a single jackup rig, *Rig 30* (formerly named the *Odin Victory*), under a rig management contract with Porterhouse Offshore L.P., the owner of the rig. We do not own or control Unrelated HOC.

At the closing, Unrelated HOC and Porterhouse Offshore terminated the rig management contract, and Porterhouse Offshore entered into a new contract with us under which we were reimbursed for all of our expenses plus \$100 per day. Aside from the rig management contract with Porterhouse Offshore, we did not acquire any other assets or liabilities of Unrelated HOC, and the rig-based crews operating *Rig 30* remained employees of Unrelated HOC until we hired them in January 2005 in connection with our acquisition of the rig as described below.

Acquisition from Global Industries

In October 2004, we acquired 22 liftboats and related assets from Global Industries, Ltd. for \$53.5 million, including a property in New Iberia, Louisiana, which we use as an operational office. At the time of the acquisition, some of the liftboats were operating under short-term contracts with customers, with the remaining liftboats available for work. We assumed those contracts and completed them within 30 days of our acquisition of the units. Thereafter, the units began working under short-term contracts that we negotiated with our customers. We did not acquire any rights to the Global Industries name in the acquisition, and we have not marketed the rigs under the Global Industries name. The liftboats acquired ranged in age from four years to 26 years, with an expected average remaining useful life of approximately 15 years.

Under a transition services agreement, for six months following the acquisition, Global Industries was to perform the accounting and marketing/sales functions related to the liftboat operations on our behalf. Subsequent to closing, however, we began hiring our own accounting and administrative support personnel, some of whom were former Global Industries employees, and terminated the transition services agreement in February 2005. In connection with the closing of the acquisition, we hired 151 vessel-based employees, five mechanics, the general manager of the group and a liftboat operations manager who had been employed by Global Industries immediately prior to the acquisition. We did not hire any financial, legal, human resources, information technology, marketing, safety, training, payroll, purchasing, warehouse, transportation or environmental employees or managers from Global Industries. The substantial majority of Global Industries employees that we hired were vessel-based, hourly compensated employees.

Acquisition from Porterhouse Offshore

In January 2005, we acquired the jackup rig *Rig 30* and related assets from Porterhouse Offshore for \$20.0 million. At the time of acquisition, the age of the rig was 26 years, with an expected remaining useful life of approximately 15 years, and was operating under a short-term contract. As described above, we had managed the

Table of Contents

Index to Financial Statements

rig under the management contract entered into with Porterhouse Offshore concurrent with the closing of the August 2004 Parker Drilling acquisition. We hired the rig-based personnel operating the rig, who were employees of Unrelated HOC, at the time of the acquisition of the rig. We did not acquire any personnel from Porterhouse Offshore.

Acquisition from Superior

In June 2005, we acquired 17 liftboats and related assets from Superior Energy Services, Inc. for \$19.8 million. In August 2005, we sold one of the liftboats for \$0.3 million. At the time of the acquisition, ten of the liftboats were operating under short-term contracts with customers, three of the vessels were stacked, and the remaining four liftboats were available for work. We completed such contracts within 30 days of our acquisition of the units. Thereafter, any work for the units is under contracts that we negotiate with our customers. We did not acquire any rights to the Superior Energy name in the acquisition, and we have not marketed the liftboats under the Superior Energy name. The liftboats acquired ranged in age from 20 years to 33 years, with an expected remaining average useful life of approximately 15 years. Average utilization of these liftboats during the first quarter of 2005 was approximately 61%. The average utilization of the 13 actively marketed liftboats during that period was 80%.

In connection with the closing of the acquisition, we hired 35 vessel-based employees who had been employed by Superior Energy immediately prior to the acquisition. These employees were all hourly compensated employees. We did not hire any financial, legal, human resources, information technology, marketing, safety, training, payroll, purchasing, warehouse, transportation or environmental employees or managers from Superior Energy.

Acquisition from Transocean

In June 2005, we acquired the jackup rig *Rig 16* from Transocean Inc. for a purchase price of \$20.0 million. This rig is capable of drilling in water depths of up to 170 feet. We are currently refurbishing the rig in the United Arab Emirates and expect to spend approximately \$9.2 million on that refurbishment. We expect the rig to be available in the second quarter of 2006. We recently entered into a letter of intent to contract the rig for work offshore Qatar. See Recent Developments Rig 16 and Rig 31. At the time of acquisition, the age of the rig was 24 years, with an expected remaining useful life of approximately 15 years. We did not acquire any customer contracts from Transocean and did not hire any employees from Transocean in connection with the acquisition.

Acquisition from CS Liftboats

In August 2005, we acquired the liftboat *Whale Shark* from CS Liftboats, Inc. for a purchase price of \$12.5 million. The liftboat has a leg length of 260 feet and was substantially complete at the time of acquisition. However, a number of design changes made by the previous owner required additional engineering to obtain operating certificates from the U.S. Coast Guard. We obtained all required certificates in the first quarter of 2006, and the liftboat was placed in service in the U.S. Gulf of Mexico. We spent approximately \$0.5 million on the engineering and regulatory equipment after the acquisition. We did not acquire any customer contracts from CS Liftboats and did not hire any employees from CS Liftboats in connection with the acquisition.

Acquisition from Hydrocarbon Capital

In September 2005, we acquired the jackup rig *Rig 31* from Hydrocarbon Capital II LLC for a purchase price of \$12.6 million. This rig is capable of drilling in water depths of up to 250 feet. We are currently refurbishing the rig in Malaysia and expect to spend approximately \$15 million on that refurbishment. We expect the rig to be available in the third quarter of 2006. We recently entered into a letter of award to contract the rig for work offshore India. See Recent Developments Rig 16 and Rig 31. At the time of acquisition, the age of the rig was 26 years, with an expected remaining useful life of approximately 15 years. We did not acquire any customer contracts from Hydrocarbon Capital and did not hire any employees from Hydrocarbon Capital in connection with the acquisition.

Table of Contents

Index to Financial Statements

Liftboat Acquisitions from Danos & Curole Marine Contractors LLC

In November 2005, we completed the acquisition of a fleet of seven liftboats and related assets from Danos & Curole Marine Contractors LLC for \$44.0 million. Three of these liftboats, which have leg lengths ranging from 130 to 230 feet, are located in the U.S. Gulf of Mexico. At the time of the acquisition, these liftboats were operating under short-term contracts with customers. We assumed those contracts and completed them within 30 days of our acquisition of the units. Thereafter, the units began working under short-term contracts that we negotiated with our customers. Four liftboats, which have leg lengths ranging from 130 to 170 feet, are currently operating in Nigeria under longer-term contracts, which expire in August 2006. Danos & Curole continues to operate these four vessels under an operating agreement with us until we can establish our own operations in Nigeria. This operating agreement expires in September 2006 and can be terminated by us earlier upon 30 days notice to Danos & Curole. We did not acquire any rights to the Danos & Curole name in the acquisition, and we have not marketed the liftboats under the Danos & Curole name. The liftboats acquired ranged in age from four years to 19 years, with an expected average remaining useful life of approximately 15 years.

An additional liftboat subject to the purchase agreement, the *Andre Danos*, was damaged as a result of Hurricane Katrina. Danos & Curole is currently salvaging the vessel. We have agreed to reimburse Danos & Curole up to \$0.5 million of the salvage costs. Danos & Curole insured the *Andre Danos* for \$3.6 million, with a deductible of \$1.5 million. Once the vessel is salvaged, Danos & Curole and its insurers will determine whether the vessel is a constructive total loss or can be repaired. If the vessel is determined to be a constructive total loss, a portion of the \$44.0 million purchase price equal to the amount of insurance proceeds Danos & Curole recovers, net of the deductible, will be refunded by Danos & Curole to us. However, if the vessel can be repaired, Danos & Curole will conduct the repairs until the insurance proceeds received are completely expended, and will thereafter deliver the vessel to us in such condition without additional payment of any consideration. We believe the liftboat is likely to be declared a constructive total loss.

In connection with the closing of the acquisition, we hired 46 vessel-based employees who had been employed by Danos & Curole immediately prior to or on the date of the acquisition. These employees were all hourly compensated employees. Following the acquisition, we hired two marketing employees, one human resource manager, two Nigeria-based operational supervisors and two maintenance managers. We did not hire any financial, legal, information technology, safety, training, payroll, purchasing, warehouse, transportation or environmental employees or managers from Danos & Curole.

Acquisition from Aries Offshore Partners Ltd.

In February 2006, we acquired the jackup rig *Rig 26* from Aries Offshore Partners Ltd. for a purchase price of \$20.1 million. This rig is capable of drilling in water depths of up to 150 feet. We are currently refurbishing the rig in a shipyard in Louisiana and expect to spend approximately \$20.0 million on that refurbishment. We expect the rig to be available in the first quarter of 2007. We intend to seek work for the rig under a longer-term contract in a suitable international location. We are contractually restricted until 2015 from using the rig for drilling operations in U.S. waters. At the time of acquisition, the age of the rig was 26 years, with an expected remaining useful life of approximately 15 years. We did not acquire any customer contracts from Aries Offshore and did not hire any employees from Aries Offshore in connection with the acquisition.

Nature of Acquisitions

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

We believe that the acquisitions described above represent the acquisition of assets, not of businesses within the meaning of applicable accounting guidance. We did not acquire separate entities, subsidiaries or divisions. Although we hired rig- and vessel-based personnel, and some shore-based staff, we did not acquire from the sellers most of the personnel who had performed management functions of overseeing and supporting the assets that were sold to us. As of December 31, 2005, we employed approximately 400 people in our drilling operations and 330 people in our liftboat operations, exclusive of headquarters staff. Approximately 60% of

Table of Contents

Index to Financial Statements

those employees were employees of Parker Drilling, Global Industries, Superior Energy or Danos & Curole immediately prior to our related acquisition of assets from those companies.

We have independently developed the operating rights necessary to operate the assets, including the establishment of our own operating privileges with the U.S. Coast Guard, U.S. Minerals Management Service and Nigerian authorities. We did not acquire any of our processes and systems from any of the sellers. Instead, we have independently developed the material systems we use in operating our business, including systems related to management; accounting; payroll; benefits; health, safety and environment; training; marketing and sales; maintenance; and project management. We did not acquire any intangible assets or intellectual property from any of the sellers. Without the systems we have developed, we could not successfully access our customer base to generate revenue.

Financial Statements

Since we have concluded that the acquisitions of rigs and liftboats described above do not constitute the acquisition of businesses, we have not provided audited stand-alone pre-acquisition financial statements of the assets acquired. We do not believe that separate audited financial statements for the assets acquired for any date or period prior to our acquisition of those assets would be meaningful to investors. There are significant differences between the organization, operation and overhead structures of our company, on the one hand, and of each of the sellers, on the other hand. In addition, Parker Drilling had held the assets we acquired from them for sale and accounted for their operations as discontinued operations since 2003. We believe, therefore, that for an extended period such assets did not receive the same management attention, marketing effort or maintenance as other assets operated by Parker Drilling or that we provide to the rigs and our other assets.

Table of Contents**Index to Financial Statements****Results of Operations**

The following table sets forth our operating days, average utilization rates, average revenue and expenses per day, revenues and operating expenses by operating segment and other selected information for the periods indicated:

	For the Year Ended December 31, 2005	Period from Inception to December 31, 2004
(Dollars in thousands, except per day amounts)		
Contract Drilling Services Segment:		
Number of rigs (as of end of period)	9	5
Operating days	2,192	748
Available days	2,309	751
Utilization (1)	94.9%	99.6%

Table of Contents**Index to Financial Statements**

- (1) Utilization is defined as the total number of days our rigs or liftboats, as applicable, were under contract, known as operating days, in the period as a percentage of the total number of available days in the period. Days during which our rigs and liftboats were undergoing major refurbishments, upgrades or construction, which included *Rig 16*, *Rig 21*, *Rig 25*, *Rig 31* and the *Whale Shark*, or cold-stacked units, which included three of our liftboats, are not counted as available days. Days during which our liftboats are in the shipyard undergoing drydocking or inspection are considered available days for the purposes of calculating utilization.
- (2) Average revenue per rig or liftboat per day is defined as revenue earned by our rigs or liftboats, as applicable, in the period divided by the total number of operating days for our rigs or liftboats, as applicable, in the period.
- (3) Average operating expense per rig or liftboat per day is defined as operating expenses, excluding depreciation and amortization, incurred by our rigs or liftboats, as applicable, in the period divided by the total number of available days in the period. We use available days to calculate average operating expense per rig or liftboat per day rather than operating days, which are used to calculate average revenue per rig or liftboat per day, because we incur operating expenses on our rigs and liftboats even when they are not under contract and earning a dayrate. In addition, the operating expenses we incur on our rigs and liftboats per day when they are not under contract are typically lower than the per-day expenses we incur when they are under contract.
- (4) Includes a \$1.0 million loss for accrual of the deductible for insurance proceeds to repair *Rig 21* for the year ended December 31, 2005.

Our operations generally are affected by the seasonal differences in weather patterns in the U.S. Gulf of Mexico. These differences may result in increased operations in the spring, summer and fall periods and a decrease in the winter months. The rainy weather, tropical storms, hurricanes and other storms prevalent in the U.S. Gulf of Mexico during the year, such as Hurricane Rita in September 2005, Hurricane Katrina in August 2005 and Hurricane Ivan in September 2004, may also affect our operations. During such severe storms, our liftboats typically leave location and cease to earn a full dayrate. Under U.S. Coast Guard guidelines, the liftboats cannot return to work until the weather improves and seas are less than five feet. Accordingly, our operating results may vary from quarter to quarter, depending on factors outside of our control.

We have presented below a comparison of certain daily operating and financial information and utilization for the year ended December 31, 2005 and the period from inception to December 31, 2004 because we believe it provides the most meaningful comparative analysis of our results of operations for those periods and provides meaningful trend information over those periods. We have not provided a comparison of the full period results. We do not believe such a comparison would be meaningful since our results of operations for the period from inception to December 31, 2004 include only the results from five rigs and 22 liftboats for all or a portion of a five-month period as compared with the results from nine rigs and 46 liftboats for all or a portion of a full year period in 2005. We also have not provided a comparison of our International Marine Services segment, because that segment was created in the fourth quarter of 2005 in connection with our acquisition of liftboats operating offshore Nigeria in November 2005.

Year Ended December 31, 2005 Compared with the Period from Inception to December 31, 2004***Average Revenue per Day***

Contract Drilling Services Segment. Average revenue per rig per day for our Contract Drilling Services segment increased to \$47,177 for the year ended December 31, 2005 (the Current Period) compared with \$32,098 for the period from inception to December 31, 2004 (the Prior Period), an increase of 47%. The increase resulted from higher dayrates on our rigs and the January 2005 acquisition of *Rig 30*, which earned dayrates during the Current Period higher than the average for the rest of our fleet.

Domestic Marine Services Segment. Average revenue per liftboat per day for our Domestic Marine Services segment increased to \$6,503 for the Current Period compared with \$5,720 for the Prior Period, an increase of

Table of Contents

Index to Financial Statements

14%. This increase resulted from higher dayrates for our liftboats, partially offset by the impact of Hurricanes Katrina and Rita, where we experienced 374 days of weather, cumulative for our liftboat fleet, resulting in half dayrates.

Average Operating Expense per Day

Contract Drilling Services Segment. Average operating expense per rig per day for our Contract Drilling Services segment increased to \$20,932 for the Current Period compared with \$17,046 for the Prior Period, an increase of 23%. The increase resulted primarily from an increase in labor expenses, which increased \$1,686 per day, an increase in insurance costs, which increased \$819 per day, and an increase in rig maintenance costs, which increased \$558 per day. The insurance cost was impacted by the \$1.0 million loss for the accrual of the deductible for insurance proceeds to repair *Rig 21*. The increase in operating expense per rig per day is due in part to the inclusion of operating expenses for *Rig 21* while the rig was undergoing repairs for damage sustained during Hurricane Katrina. During that time, the rig was not considered available and therefore no available days for the rig were included in the calculation of average operating expense per rig per day.

Domestic Marine Services Segment. Average operating expense per liftboat per day for our Domestic Marine Services segment increased to \$2,590 for the Current Period compared with \$2,144 for the Prior Period, an increase of 21%. This increase resulted primarily from an increase in labor expenses, which increased \$279 per day, an increase in insurance costs, which increased \$45 per day, and an increase in liftboat maintenance costs, which increased \$100 per day.

Utilization and Operating Days

Contract Drilling Services Segment. Utilization for our Contract Drilling Services segment was 94.9% for the Current Period compared with 99.6% for the Prior Period. Operating days for the Current Period totaled 2,192 compared with 748 for the Prior Period. The Current Period reflects our ownership of nine jackup rigs, following the acquisitions of *Rig 25* and *Rig 30* in January 2005, *Rig 16* in June 2005 and *Rig 31* in September 2005. *Rig 16* and *Rig 31* were undergoing refurbishment during the Current Period. The Prior Period reflects our ownership of only five jackup rigs.

Domestic Marine Services Segment. Utilization for our Domestic Marine Services segment was 78.1% for the Current Period compared with 68.9% for the Prior Period. Operating days for the Current Period totaled 8,571 compared with 1,350 for the Prior Period. The Current Period reflects our ownership of 42 liftboats in the segment following the acquisitions 17 liftboats in June 2005, the *Whale Shark* in August 2005 and three liftboats in November 2005 and the sale of one liftboat in August 2005. The Prior Period reflects our ownership of 22 liftboats for approximately three months in 2004.

Rig Information

We did not own any jackup rigs at the beginning of the Prior Period. We acquired five jackup rigs and assumed the management of another jackup rig from an unrelated party in August 2004. During the Prior Period, those jackup rigs were contracted at dayrates ranging from approximately \$23,000 to \$37,000.

We owned five jackup rigs and managed a sixth jackup rig at the beginning of the Current Period. We acquired two jackup rigs, including the jackup rig that we had been managing since August 2004, in January 2005, and an additional jackup rig in each of June 2005 and September 2005. Our jackup rigs were contracted at dayrates ranging from approximately \$32,000 to \$37,900 from January 1, 2005 to the date of the acquisition of the two jackup rigs in January 2005. Following the January 2005 acquisition but prior to the June 2005 acquisition, our jackup rigs were contracted at dayrates ranging from approximately \$33,000 to \$46,000. Following the June 2005 acquisition but prior to the September 2005 acquisition, our jackup rigs were contracted

Table of Contents

Index to Financial Statements

at dayrates ranging from approximately \$33,000 to \$53,000. Our jackup rigs were contracted at dayrates ranging from approximately \$48,000 to \$70,000 from the date of the acquisition of our ninth jackup rig in September 2005 to the end of the Current Period.

Liftboat Information

We did not own any liftboats at the beginning of the Prior Period. We acquired 22 liftboats in October 2004. During the Prior Period, those liftboats were contracted at dayrates ranging from approximately \$3,300 to \$13,700.

We owned 22 liftboats at the beginning of the Current Period. We acquired 17 liftboats in June 2005, one liftboat in August 2005 and seven liftboats in November 2005, and we sold one liftboat in August 2005. Our liftboats were contracted at dayrates ranging from approximately \$2,800 to \$13,000 from January 1, 2005 to the date of the acquisition in June 2005. Following the June 2005 acquisition but prior to the August 2005 acquisition, our liftboats were contracted at dayrates ranging from approximately \$2,900 to \$12,400. Following the August 2005 acquisition but prior to the November 2005 acquisition, our liftboats were contracted at dayrates ranging from approximately \$2,200 to \$13,500. Our liftboats were contracted at dayrates ranging from approximately \$4,000 to \$20,500 from the date of the November 2005 acquisition to the end of the Current Period.

Year Ended December 31, 2005

Revenues

Consolidated. Total revenues for the Current Period were \$161.3 million. Total revenues were positively impacted by increasing jackup dayrates and additional operating days in our Domestic Marine Services segment as a result of the June 2005 liftboat acquisition and higher activity levels in our Domestic Marine Services segment following Hurricane Katrina and Hurricane Rita. Total revenues included \$4.6 million in reimbursements from our customers for expenses paid by us.

Contract Drilling Services Segment. Revenues for our Contract Drilling Services segment were \$103.4 million for the Current Period. Average revenue per rig per day was \$47,177, operating days were 2,192 and average utilization was 94.9%. Revenues for our Contract Drilling Services segment included \$2.3 million in reimbursements from our customers for expenses paid by us.

Domestic Marine Services Segment. Revenues for our Domestic Marine Services segment were \$55.7 million for the Current Period. Average revenue per liftboat per day was \$6,503, operating days were 8,571 and average utilization was 78.1%. The liftboats in our Domestic Marine Services segment increased from 22 to 42 liftboats in the Current Period. Average revenue per liftboat per day was negatively impacted by the liftboats acquired in June 2005, which are smaller and earned lower average dayrates than the remaining fleet. Revenues for our Domestic Marine Services segment included \$2.3 million in reimbursements from our customers for expenses paid by us.

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

International Marine Services Segment. Our International Marine Services segment comprises the four liftboats acquired in November 2005 that are operating in Nigeria. Revenues for our International Marine Services segment were \$2.2 million for the Current Period. Average revenue per liftboat per day was \$10,243, operating days were 212 and average utilization was 100.0%. Revenues in our International Marine Services segment do not include any reimbursements from our customers for expenses paid by us.

Operating Expenses

Consolidated. Total operating expenses, excluding depreciation and amortization, for the Current Period were \$77.8 million. Operating expenses in our Contract Drilling Services segment were impacted by increasing

Table of Contents

Index to Financial Statements

labor costs attributable to wage increases paid to our crews, and increasing insurance costs, including a \$1.0 million deductible accrued for the repair of *Rig 21*. Operating expenses in our Domestic Marine Services segment were impacted during the Current Period by expenses associated with the liftboats acquired in June 2005 and additional expenses due to higher utilization on the remaining liftboat fleet.

Contract Drilling Services Segment. Operating expenses, excluding depreciation and amortization, for our Contract Drilling Services segment were \$48.3 million for the Current Period. Average operating expenses per rig per day were \$20,932. Average labor costs per rig per day, which include wages and benefits paid to crews, were \$11,317. Average rig maintenance expenses per rig per day, excluding capitalized costs, were \$3,066. Average insurance expense per rig was \$1,807 per day, which includes the \$1.0 million deductible accrued for the repair of *Rig 21*. Other rig expenses, which include catering, rentals, communications, and mobilization costs, averaged \$4,742 per rig per day.

Domestic Marine Services Segment. Operating expenses, excluding depreciation and amortization, for our Domestic Marine Services segment were \$28.4 million for Current Period. Operating expenses on our liftboats averaged \$2,590 per liftboat per day in the period, ranging from \$1,360 per liftboat per day for the smaller vessels to \$4,313 per liftboat per day for the larger vessels. Average labor costs per liftboat per day, which includes wages and benefits paid to crews, were \$1,378. Average maintenance expenses per liftboat per day, excluding capitalized costs, were \$356. Average insurance expense per liftboat per day was \$271. Other operating expenses, which include catering, rentals and communication costs, averaged \$585 per liftboat per day.

International Marine Services Segment. Following our acquisition in November 2005, the four liftboats comprising the International Marine Services segment were operated by the sellers under a vessel operating agreement that expires in September 2006. The operating agreement provides for a monthly management fee of \$125,000. Costs reflected in the segment include actual operating costs for the liftboats and the management fee charged to us by the sellers. The management fee for 2005 totaled \$0.2 million. Operating expenses, excluding depreciation and amortization, for our International Marine Services segment were \$1.1 million for Current Period. Operating expenses on our liftboats averaged \$5,052 per liftboat per day in the period. Average labor costs per liftboat per day, which includes wages and benefits paid to crews, were \$945. Average maintenance expenses per liftboat per day, excluding capitalized costs, were \$1,745. Average insurance expense per liftboat per day was \$673. Other operating expenses, which include catering, rentals and communication costs, averaged \$1,689 per liftboat per day.

Depreciation and Amortization Expenses

Total depreciation and amortization expenses were \$13.8 million for the Current Period. Results for the Current Period included \$5.5 million of depreciation expense for our drilling fleet, \$4.3 million of depreciation expense for our liftboat fleet and \$3.9 million of amortization of regulatory inspections and related drydockings.

General and Administrative Expenses

General and administrative expenses, excluding depreciation and amortization, were \$13.9 million for the Current Period. Our Contract Drilling Services, Domestic Marine Services and International Marine Services segments incurred general and administrative expenses of \$5.5 million, \$1.9 million and \$0.3 million, respectively. General and administrative expenses for our corporate office were \$6.2 million. Expenses related to our initial public offering totaling \$2.2 million are included in our corporate general and administrative expense.

Interest Expense

Interest expense was \$9.9 million for the Current Period. Results for the period included \$2.0 million of interest expense associated with the \$28.0 million in borrowings incurred in the acquisition of five drilling rigs in August 2004, \$1.0 million associated with the \$28.0 million in borrowings incurred in the acquisition of 22

Table of Contents

Index to Financial Statements

liftboats in October 2004, \$1.6 million associated with \$25.0 million of borrowings incurred in the acquisitions of *Rig 25* and *Rig 30* in January 2005, \$0.1 million associated with the \$20.0 million in borrowings incurred in the acquisition of liftboats in June 2005 and \$5.2 million associated with \$140.0 million in borrowings incurred in refinancing our debt in June 2005.

Other Income

Other income was \$0.9 million for the Current Period. Results for the period included \$0.6 million of interest income associated with short-term investments of cash.

Period from Inception to December 31, 2004

Revenues

Consolidated. Total revenues were \$31.7 million for the Prior Period. Revenues for the period include activity for the five jackup rigs acquired in August 2004 and for the 22 liftboats acquired in October 2004. Total revenues included \$0.9 million in reimbursements from our customers for expenses paid by us.

Contract Drilling Services Segment. Revenues for our Contract Drilling Services segment were \$24.0 million for the Prior Period. Segment revenues included activity for the five jackup rigs beginning on August 2, 2004. Average revenue per rig per day was \$32,098, operating days were 748 and average utilization was 99.6%. Revenues for our Contract Drilling Services segment included \$0.6 million in reimbursements from our customers for expenses paid by us.

Domestic Marine Services Segment. Revenues for our Domestic Marine Services segment were \$7.7 million for the Prior Period. Segment revenues included activity for the 22 liftboats beginning on October 2, 2004. Average revenue per liftboat per day was \$5,720, operating days were 1,350 and average utilization was 68.9%. Revenues for our Domestic Marine Services segment included \$0.3 million in reimbursements from our customers for expenses paid by us. We did not have an International Marine Services segment in the Prior Period.

Operating Expenses

Consolidated. Total operating expenses, excluding depreciation and amortization, were \$17.0 million for the Prior Period. Total operating expenses included expenses for five jackup rigs beginning on August 2, 2004 and for 22 liftboats beginning on October 2, 2004.

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

Contract Drilling Services Segment. Operating expenses, excluding depreciation and amortization, for our Contract Drilling Services segment were \$12.8 million for the Prior Period. Average operating expenses per rig were \$17,046 per day. Average labor costs per rig, which include wages and benefits paid to crews, were \$9,631 per day. Rig maintenance expenses per rig, excluding capitalized costs, were \$2,508 per day. Other rig expenses, which included catering, rentals, communications, insurance and mobilization costs, averaged \$4,907 per rig per day.

Domestic Marine Services Segment. Operating expenses, excluding depreciation and amortization, for our Domestic Marine Services segment were \$4.2 million for the Prior Period. Segment expenses included three months of activity from the inception of the segment on October 2, 2004 with the acquisition of 22 liftboats. Our most significant operating expenses were labor (\$2.2 million), vessel maintenance, excluding capital expenditures and drydocking costs (\$0.5 million), and insurance (\$0.4 million). Operating expenses on our liftboats averaged \$2,144 per liftboat per day in the period, ranging from \$1,158 per day for the smaller vessels to \$3,014 per day for the larger vessels.

Depreciation and Amortization Expenses

Total depreciation and amortization expenses were \$2.0 million for the Prior Period and included \$1.1 million of depreciation expense associated with the acquisition of five jackup rigs in August 2004, \$0.8 million

Table of Contents

Index to Financial Statements

of depreciation expense associated with the 22 liftboats in October 2004 and \$0.1 million of amortization of regulatory inspections and related drydockings.

General and Administrative Expenses

General and administrative expenses, excluding depreciation and amortization, were \$2.8 million for the Prior Period. Our Contract Drilling Services and Domestic Marine Services segments incurred general and administrative expenses of \$2.0 million and \$0.6 million, respectively. General and administrative expenses for our corporate office were \$0.2 million.

Interest Expense

Interest expense was \$2.1 million for the Prior Period, which represented interest due on a \$28.0 million term loan used to fund the acquisition of five jackup rigs in August 2004 and an additional \$28.0 million term loan used to fund the acquisition of 22 liftboats in October 2004.

Outlook

Our industry is cyclical and is typically driven by general economic activity and changes in actual or anticipated oil and natural gas prices. In addition, most of our rigs and liftboats are located in the shallow waters of the U.S. Gulf of Mexico, which is a market characterized by short-term contracts for our rigs and liftboats to support drilling and production primarily of natural gas. Throughout 2005, oil and natural gas prices were high relative to historical levels and, as a result, we experienced strong demand for our rigs and liftboats.

In addition to the favorable commodity price environment, two other factors positively impacted the market conditions for our rigs and liftboats during 2005. First, a number of jackup rigs have been mobilized out of the U.S. Gulf of Mexico over the past five years, and several of our competitors have announced the mobilization of a number of additional rigs from the U.S. Gulf of Mexico to international locations in 2006. Second, because of the significant damage to rigs, production platforms, pipelines and other equipment in the U.S. Gulf of Mexico caused by Hurricanes Katrina and Rita, demand for our liftboats for inspection and repair work has increased significantly compared to the beginning of 2005. We anticipate that the additional inspection and repair work will continue into 2006. We also expect increased demand for our well intervention capabilities to assist our customers in restoring production from wells damaged by the hurricanes. Plug and abandonment and platform decommissioning work is also expected to increase in 2006.

Since mid-December 2005, natural gas prices have declined sharply. Commodity prices continue to remain relatively strong, however, compared to average prices over the past five years. We believe that the current favorable market conditions will continue for at least the near term and that current commodity prices support the recent increases in rig and liftboat dayrates. However, demand for our rigs and liftboats could be negatively impacted by a number of factors, including among others increases in the supply of rigs and liftboats in the U.S. Gulf of Mexico, unexpected changes in oil and natural gas prices, increases in insurance costs for both our assets and for our customers' production assets, the cost and availability of labor and regulatory changes. In addition, concerns over the level of oil supplies and natural gas in storage could lead to moderation or even a decline in dayrates. Sensitivity to natural gas price changes varies for each of our customers, but even the expectation of weaker prices may influence their decision to contract our rigs and liftboats.

According to ODS-Petrodata, as of February 2006, 51 jackup rigs have been ordered by industry participants, national oil companies and financial investors for delivery through 2009. We do not anticipate that these rigs will compete directly with our fleet, but they may indirectly impact us through competition in other markets. In addition, nine idle jackups in the U.S. Gulf of Mexico owned by our competitors have been cold stacked for all of 2005, and in some cases, several years earlier. We believe that these idle jackup rigs will require extensive capital expenditures to refurbish and bring back into service, but given the current tight market

Table of Contents

Index to Financial Statements

conditions, our competitors may begin reactivating at least some of these rigs. As of March 2006, we believe there were also ten liftboats under construction or on order in the U.S. that may be used in the U.S. Gulf of Mexico. Once delivered, these liftboats may impact the demand for our liftboat fleet.

Liquidity and Capital Resources

Sources and Uses of Cash

Sources and Uses of Cash for the Year Ended December 31, 2005

Net cash provided by operating activities for the year ended December 31, 2005 was \$52.8 million, which was primarily attributable to net income of \$27.5 million plus depreciation and amortization of \$13.8 million, an increase in accounts payable and other current liabilities of \$19.9 million, a deferred income tax provision of \$15.2 million, \$0.1 million in stock based compensation and a \$4.1 million loss on the early retirement of debt, partially offset by a \$27.8 million increase in accounts receivable and other current assets. The increase in accounts receivable was due to increased revenue from higher average dayrates for our Contract Drilling Services and Domestic Marine Services segments and the revenue from the liftboats acquired in 2005.

Net cash used in investing activities for the year ended December 31, 2005 was \$173.0 million. The net cash investments during the period included the acquisition in January 2005 of *Rig 25* and *Rig 30* for an aggregate of \$41.5 million, the acquisitions in June 2005 of 17 liftboats for an aggregate of \$19.8 million and *Rig 16* for \$20.0 million, the acquisition in August 2005 of the *Whale Shark* liftboat for \$12.5 million, the acquisition in September 2005 of *Rig 31* for \$12.6 million and the acquisition in November 2005 of seven liftboats for \$44.0 million. The acquisition of *Rig 25* was funded in part by a \$2.0 million deposit paid in 2004, which was applied towards the purchase price at closing. Capital expenditures for our rigs and liftboats in 2005 included \$5.7 million for the refurbishment of *Rig 16*, \$2.9 million for the refurbishment of *Rig 31* and \$7.4 million for drydockings of liftboats and \$4.3 million for general rig refurbishments.

Net cash provided by financing activities for the year ended December 31, 2005 totaled \$153.3 million. This amount included \$116.3 million of net proceeds from our initial public offering in November 2005 (which amount does not take into account \$1.2 million of estimated offering expenses), borrowings of \$45.0 million under two of our credit facilities for the acquisitions of *Rig 25* and *Rig 30* and the liftboats acquired in June 2005 and \$140.0 million under our new senior secured term loan. In addition, we received contributions from owners prior to our initial public offering totaling \$4.3 million. We repaid \$101.0 million outstanding under our then-existing credit facilities with proceeds from our new term loan, and we repaid \$45.0 million of our outstanding term loan with the proceeds from our initial public offering and made a \$0.4 million principal payment in October 2005. We also paid \$6.0 million in fees and expenses in connection with our debt agreements.

Sources and Uses of Cash for the Period from Inception to December 31, 2004

Net cash used in operating activities for the period from inception to December 31, 2004 was \$6.5 million. Net income for the period totaled \$8.1 million, which was offset by the adjustments to net income representing a reduction in cash of \$14.6 million. The adjustments to reconcile net income to net cash used by operating activities included an increase in accounts receivable and other current assets totaling \$21.7 million

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

partially offset by depreciation of \$2.0 million and an increase in accounts payable and other current liabilities of \$5.1 million. The increases in both the current assets and the current liabilities were attributable to the start-up of our business activities.

Net cash used in investing activities for the period from inception to December 31, 2004 was \$96.2 million. The net cash investments during the period included the acquisition of five jackup and four platform rigs in August 2004 for \$39.3 million, the acquisition of a fleet of 22 liftboats in October 2004 for \$53.5 million, an increase in deferred drydocking expenses of \$0.6 million and a deposit of \$2.0 million related to the purchase of *Rig 25*, which closed in January 2005. Additionally, in November 2004 we sold three of the platform rigs for \$0.8 million that we had purchased in August 2004. We accounted for this sale as a reduction in the original purchase price of the assets.

Table of Contents

Index to Financial Statements

Net cash provided by financing activities for the period from inception to December 31, 2004 totaled \$117.2 million. This included contributions from owners of \$63.0 million and proceeds from borrowings under our term loans totaling \$56.0 million, less lenders fees and expenses totaling \$1.8 million.

Liquidity and Financing Arrangements

Contributions from owners and borrowings from our creditors represented our primary source of liquidity for the period from inception to December 31, 2004. For the same period, our primary uses of cash were the acquisitions of jackup and platform rigs and 22 liftboats. Proceeds from our initial public offering, borrowings from our creditors, and cash from operations represented our primary sources of liquidity for the year ended December 31, 2005. For the same period, our primary uses of cash were the acquisitions of additional rigs and liftboats for our fleet.

We believe that our current cash on hand and our cash flow from operations through December 31, 2006, together with availability under our revolving credit facility and insurance recoveries, will be adequate during such period to repay our debts as they become due, to make normal recurring capital additions and improvements, to meet working capital requirements, to refurbish *Rig 16*, *Rig 26* and *Rig 31*, to repair *Rig 21*, to complete the Laborde acquisition and otherwise to operate our business. Our ability to make payments on our indebtedness and to fund planned capital expenditures in the future will depend on our ability to generate cash, which is subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control. Our future cash flows may be insufficient to meet all of our debt obligations and commitments, and any insufficiency could negatively impact our business. To the extent we are unable to repay our indebtedness as it becomes due or at maturity with cash on hand or from other sources, we will need to refinance our debt, sell assets or repay the debt with the proceeds from further equity offerings. Additional indebtedness or equity financing may not be available to us in the future for the refinancing or repayment of existing indebtedness, and we can provide no assurance as to the timing of any asset sales or the proceeds that could be realized by us from any such asset sale.

As a result of the damage sustained by the oil and natural gas industry from Hurricanes Ivan, Katrina and Rita, we anticipate that our insurance costs will increase significantly after the end of our current policy period on July 31, 2006. Competitors with assets in the Gulf of Mexico that have already completed their renewals in 2006 are experiencing a difficult market environment with insurance underwriters, and are likely to have increased premium costs, higher levels of retention and limits on the aggregate damage they may claim in a major windstorm. To obtain access to adequate insurance coverage we may terminate our current policy early to accelerate the renewal process. If storm activity in 2006 is as severe as it was in 2005, insurance underwriters may no longer insure U.S. Gulf of Mexico assets against weather-related damage.

Cash

Cash balances as of December 31, 2005 totaled \$47.6 million. This represented an increase of \$33.1 million from the cash balances of \$14.5 million as of December 31, 2004. The increase was due to aggregate borrowings of \$185.0 million under our various term loans, net proceeds from the sale of common stock in our initial public offering of \$115.1 million, contributions from owners totaling \$4.3 million and cash flow generated from operations of \$52.8 million. The amounts were partially offset by debt repayments of \$146.4 million and the acquisition of rigs and liftboats for a total of \$168.0 million.

Debt

Our current debt structure is used to fund our business operations, and our revolving credit facility is a source of liquidity. As of December 31, 2005, we had outstanding long-term debt of \$94.7 million, including current maturities of \$1.4 million.

In June 2005, we entered into a senior secured credit agreement with a syndicate of financial institutions. This agreement provides for a \$140.0 million term loan and a \$25.0 million revolving credit facility. We may

Table of Contents**Index to Financial Statements**

seek commitments to increase the amount available under the credit agreement by an additional \$25.0 million if the amount outstanding under the term loan is no more than \$105.0 million and our leverage ratio, after giving effect to the incurrence of the additional \$25.0 million of borrowings, is no greater than 2.5 to 1. We used \$54.6 million of the proceeds from the term loan to repay all outstanding amounts under the credit facility of our drilling company subsidiary and \$47.5 million of the proceeds to repay all outstanding amounts under the credit facility of our liftboat company subsidiary, in each case including accrued interest, fees and applicable prepayment premiums. We terminated both of those credit facilities in connection with the repayment. In addition, we used \$20.0 million of the remaining proceeds from the term loan to fund the purchase price of *Rig 16*. In connection with the repayment of the two credit facilities, we recognized in the second quarter of 2005 pretax charges of \$2.8 million, consisting of a prepayment penalty and the write-off of deferred financing costs related to the retired debt. In addition, we repaid \$45.0 million of the outstanding amount under the term loan, together with the accrued and unpaid interest of \$0.3 million, with proceeds from our initial public offering. We recognized a pretax charge of \$1.3 million in connection with the repayment in the fourth quarter of 2005.

The revolving credit facility provides for swing line loans of up to \$2.5 million and for the issuance of up to \$5.0 million of letters of credit. The revolving loans bear interest at a rate equal to, at our option, either (1) the highest of (a) Comerica Bank's base rate, (b) the three-month certificate of deposit rate plus 0.5% and (c) the Federal funds effective rate plus 0.5%, in each case plus 2.25%, or (2) LIBOR plus 3.25%. We may prepay the revolving loans at any time without premium or penalty. The revolving loans mature in June 2008. We are required to pay a commitment fee of 0.50% on the average daily amount of the unused commitment amount of the revolving credit facility and a letter of credit fee of 3.25%, plus a fronting fee of 0.13%, with respect to the undrawn amount of each issued letter of credit. As of December 31, 2005, no amounts were outstanding and no letters of credit had been issued under the revolving credit facility.

The term loan bears interest at a rate equal to, at our option, either (1) the highest of (a) Comerica Bank's base rate, (b) the three-month certificate of deposit rate plus 0.5% and (c) the Federal funds effective rate plus 0.5%, in each case plus 2.25%, or (2) LIBOR plus 3.25%. As of December 31, 2005, \$94.7 million of the principal amount of the term loan was outstanding, and the interest rate was 7.3%. In accordance with the credit agreement, in July 2005, we entered into hedge transactions with the purpose and effect of fixing the interest rate on \$70.0 million of the outstanding principal amount of the term loan at 7.54% for three years. In addition, we entered into hedge transactions with the purpose and effect capping the interest rate on an additional \$20.0 million of such principal amount at 8.25% for three years. Principal payments of \$350,000 are due quarterly, and the outstanding principal balance of the term loan is payable in full in June 2010. We may prepay the term loan at any time without premium or penalty, except that prepayments made before December 31, 2006 with proceeds from debt issuances or in connection with a repricing of the term loan will be made at 101% of the principal repaid.

We are required to prepay the term loan with:

the proceeds from sales of certain assets;

the proceeds from casualties or condemnations of assets to the extent that the net cash proceeds from any such casualty or condemnation exceed \$1.0 million and are not reinvested within one year;

the net proceeds of certain debt for borrowed money;

25% of the net proceeds to us of any public or private offering of our equity securities, including the shares offered by us in this offering, provided that holders of the term loan may reject the mandatory prepayment; and

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

50% of excess cash flow if either our leverage ratio is above 3.0 to 1.0 or the outstanding principal balance of the term loan is greater than \$110.0 million.

Our obligations under the credit agreement are secured by our liftboats, all of our domestic rigs and substantially all of our other personal property, including all the equity of our domestic subsidiaries and

Table of Contents

Index to Financial Statements

two-thirds of the equity of certain of our foreign subsidiaries. All of our domestic material subsidiaries guarantee our obligations under the agreement and have granted similar liens on substantially all of their assets.

The credit agreement contains financial covenants relating to leverage and interest coverage. Other covenants contained in the agreement restrict, among other things, repurchases of equity interests, mergers, asset dispositions, guaranties, debt, liens, acquisitions, dividends, distributions, investments, affiliate transactions, prepayments of other debt and capital expenditures. The credit agreement permits us to advance up to \$20.0 million to two of our Cayman subsidiaries and permits us to invest an additional \$25.0 million in our foreign subsidiaries. We are currently in compliance in all material respects with our covenants under the credit agreement. The credit agreement contains customary events of default.

Capital Expenditures

We expect to spend approximately \$52 million in 2006 in connection with the Laborde acquisition, including the construction of an additional liftboat pursuant to a construction contract assumed in such transaction. In addition, we expect to spend approximately \$46.2 million in 2006 on the refurbishment and upgrade of our rigs and liftboats. Rigs or liftboats that have been idle for long periods of time will often require a substantial amount of work to restore the rig or liftboat into operating condition. This often entails replacing or rebuilding much of the operating equipment, and is often costly. We describe this process as a refurbishment, and we capitalize the costs of restoring a unit to operating condition.

We differentiate a refurbishment from an upgrade, in which we materially increase the operating capabilities of a rig or liftboat. This can be accomplished by a number of means, including adding new or higher specification equipment to the unit, increasing the water depth capabilities or increasing the size of the living quarters capacity, or a combination of each. As part of our acquisitions of *Rig 16*, *Rig 31* and *Rig 26*, we had to undertake both a major refurbishment project and upgrade of each rig to make them competitive with rigs that are already in operation.

We expect to spend approximately \$9.2 million to upgrade *Rig 16* and expect to complete the upgrade in the second quarter of 2006. The commissioning of the *Whale Shark* was completed in the first quarter of 2006 for total expenditures of \$0.5 million. We expect to spend approximately \$15.0 million to refurbish and upgrade *Rig 31* and to complete the project by the third quarter of 2006. We expect to spend approximately \$20.0 million to refurbish and upgrade *Rig 26* and to complete the project in early 2007. Additionally, we expect the cost to repair *Rig 21* to be within insured values. In addition to the repairs from hurricane damage, we are performing additional maintenance to *Rig 21* while it is in the shipyard totaling approximately \$3.2 million. These maintenance costs will not be covered by insurance proceeds. We also expect to spend approximately \$2.0 million to refurbish the *Corina* and the *Pike*, two liftboats in our fleet that are currently inactive.

Over the remainder of 2006, we will continue to incur expenditures to upgrade and refurbish our rigs and our liftboats. In addition, we are required to inspect and drydock our liftboats on a periodic basis to meet U.S. Coast Guard requirements. During 2005, we spent approximately \$13.9 million on rig refurbishments and \$7.4 million on liftboat drydockings. We expect these amounts to increase as we acquire additional rigs and liftboats and as our fleet ages. The amount of expenditures is impacted by a number of factors, including among others our ongoing maintenance expenditures, adverse weather, changes in regulatory requirements and operating conditions. In addition, from time to time we agree to perform modifications to our rigs and liftboats as part of a contract with a customer. When market conditions allow, we attempt to recover these costs as part of the contract cash flow.

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

The timing and amounts we actually spend in connection with our plans to upgrade and refurbish other selected rigs and liftboats are subject to our discretion and will depend on our view of market conditions and our cash flows. From time to time, we may review possible acquisitions of rigs, liftboats or businesses, joint ventures, mergers or other business combinations, and we may have outstanding from time to time bids to acquire certain assets from other companies. We may not, however, be successful in our acquisition efforts. If we do complete any such acquisitions, we may make significant capital commitments for such purposes. Any such

Table of Contents**Index to Financial Statements**

transactions could involve the payment by us of a substantial amount of cash. We would likely fund the cash portion of such transactions, if any, through cash balances on hand, the incurrence of additional debt, or sales of assets, equity interests or other securities or a combination thereof. If we acquire additional assets, we would expect that the ongoing capital expenditures for our company as a whole would increase in order to maintain our equipment in a competitive condition.

Our ability to fund capital expenditures would be adversely affected if conditions deteriorate in our business, we experience poor results in our operations or we fail to meet covenants under our senior secured credit facility.

Contractual Obligations

The following table summarizes our contractual obligations as of December 31, 2005:

Contractual Obligations (1)	Payments due by period ending December 31,				Total
	2006	2007 to 2008	2009 to 2010	Thereafter	
	(in thousands)				
Long-term debt obligations	\$ 1,400	\$ 2,800	\$ 90,450	\$	\$ 94,650
Management compensation obligations	1,550	609			2,159
Obligation to former members	3,732				3,732
Operating lease obligations	651	632	487	33	1,803
Total contractual obligations	\$ 7,333	\$ 4,041	\$ 90,937	\$ 33	\$ 102,344

(1) As of December 31, 2005, we did not have any material purchase obligations for goods or services.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements.

Quantitative and Qualitative Disclosures About Market Risk

We are exposed to interest rate risk with respect to our variable rate debt. All of the debt under our term loan is at variable rates. As of December 31, 2005, the interest rate for the \$94.7 million outstanding under the term loan was 7.3%. In accordance with the credit agreement, in

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

July 2005, we entered into hedge transactions with the purpose and effect of fixing the interest rate on \$70.0 million of the outstanding principal amount of the term loan at 7.54% for three years. In addition, we entered into hedge transactions with the purpose and effect of capping the interest rate on an additional \$20.0 million of such principal amount at 8.25% for three years. We entered into these instruments other than for trading purposes. A hypothetical 100 basis point increase in the average interest rate on our variable rate debt outstanding as of December 31, 2005 would increase our annual interest expense by approximately \$0.9 million.

INDUSTRY OVERVIEW

The drilling and liftboat service industry is cyclical and typically driven by general economic activity and changes in actual or anticipated oil and natural gas prices. In general, demand for our rigs is correlated to our customers' expectations of energy prices, particularly natural gas prices. As a result, we expect that sustained high energy prices generally would have a positive impact on our earnings, whereas sustained low energy prices generally would have a negative impact on our earnings. Demand for liftboats historically has been less cyclical than demand for jackup rigs, although demand for liftboats and for jackup rigs generally is affected by the same factors. We believe that recent trends in the industry, including the trends identified below, should benefit our operations.

Favorable Commodity Price Environment Relative to Historical Levels. Currently, oil and natural gas prices are high relative to historical levels. As illustrated in the charts below, the rolling twelve-month average price of oil has increased from \$18.42 per barrel as of January 1, 1996 to \$59.90 per barrel as of March 31, 2006, and the rolling twelve-month average price of natural gas has increased from \$1.72 per mmbtu to \$9.22 per mmbtu over the same period. Oil and natural gas prices are extremely volatile, and since mid-December 2005, natural gas prices have declined sharply. Current commodity prices continue to remain high relative to historical levels, however. We believe that high oil and natural gas prices, if sustained, could result in increased exploration and development drilling activity and higher demand and dayrates for drilling and liftboat service companies.

Growing U.S. Demand for Natural Gas and Maturing Natural Gas Fields. Most of our customers in the shallow-water U.S. Gulf of Mexico are drilling or maintaining natural gas wells. Currently, approximately one-quarter of domestic natural gas production comes from the U.S. Gulf of Mexico. According to the Energy Information Administration, or EIA, from 1988 to 2005 U.S. demand for natural gas grew by 10.8 billion cubic feet per day, equal to an annual rate of 1.2%, while domestic supply grew by 4.7 billion cubic feet per day, equal to an annual rate of 0.4%. Over the next two decades, the EIA projects a need for a 15% growth in domestic natural gas production (from approximately 18 trillion cubic feet to 21 trillion cubic feet per year) and an increase in liquefied natural gas, or LNG, imports from abroad in order to meet growing demand for natural gas.

Source: EIA. As of December 31, 2005.

Table of Contents

Index to Financial Statements

As illustrated in the chart below, although the overall number of natural gas wells drilled in the United States has increased in recent years, a corresponding increase in production has not been realized. We believe that a further increase in drilling activity for natural gas will be required as a result of the expected increasing demand for natural gas and the increasing production decline rates of natural gas wells in the United States.

Source: EIA. As of December 31, 2005.

Increasing Capital Budgets of Oil and Natural Gas Producers. With commodity prices relatively high, many oil and natural gas exploration and production companies are generating cash flow that exceeds their recent levels of capital investment. Many of these companies have been using a portion of their excess cash flow to increase capital budgets in an attempt to meet rising demand for oil and natural gas and to mitigate production and reserve declines. We believe that a portion of these increased capital expenditures by these companies will be incurred to drill new wells, work over existing wells and construct new or repair existing offshore platforms, which would increase the demand for our services.

Reduced Supply of Jackup Rigs in the U.S. Gulf of Mexico. Increased international demand for jackup rigs has caused some contract drillers to redeploy rigs from the U.S. Gulf of Mexico to international areas, in many cases under multi-year contracts. According to ODS-Petrodata, the number of marketed jackup rigs in the U.S. Gulf of Mexico has declined from 149 rigs in March 2001 to 94 rigs in April 2006, a decline of approximately 39%. In addition, several competitors have recently announced the mobilization of a total of eight jackup rigs from the U.S. Gulf of Mexico to the Middle East and South America by the first quarter of 2007. As illustrated in the charts below, this redeployment, together with attrition, has reduced the overall supply of jackup rigs in the U.S. Gulf of Mexico (see first chart below) and has created a more favorable operating environment for service companies, with increased utilization and higher dayrates for the remaining rigs (see second chart below). In addition, we believe a substantial majority of the newbuild jackup rigs recently ordered in the industry, which according to ODS-Petrodata have estimated construction costs per rig ranging from approximately \$90.0 million to \$175.0 million, are intended to service the rising demand in international drilling markets.

Source: ODS-Petrodata. As of April 1, 2006.

Aging Production Infrastructure in the U.S. Gulf of Mexico. The aging of production platforms in the U.S. Gulf of Mexico is expected to increase the demand for the types of maintenance and decommissioning services provided from our liftboat fleet. Currently, there are approximately 3,900 production platforms in the U.S. Gulf of Mexico, of which approximately 58% are more than 15 years old and 83% are in water depths of 180 feet or less, which is within the operating capability of our liftboat fleet. These production platforms are generally subject to extensive and detailed periodic inspections and require frequent maintenance. Accordingly, we believe the aging of the U.S. Gulf of Mexico production platforms will provide a source of demand for liftboat services that is less discretionary, and more stable, than drilling activity. In addition, according to the U.S. Minerals Management Service, as a result of Hurricane Rita and Hurricane Katrina, 115 offshore production platforms in the Gulf of Mexico were destroyed and 52 other platforms suffered significant damage. The need for inspections and repairs of offshore installations following major storm events like these recent hurricanes has resulted in increased demand for liftboat services in the U.S. Gulf of Mexico.

BUSINESS

Overview

We provide shallow-water drilling and liftboat services to the oil and natural gas exploration and production industry primarily in the U.S. Gulf of Mexico. We currently own a fleet of nine jackup rigs that are capable of drilling in maximum water depths ranging from 85 to 250 feet and a fleet of 46 liftboats with leg lengths ranging from 105 to 260 feet. We contract our jackup rigs and liftboats to major integrated energy companies and independent oil and natural gas operators.

We acquired six jackup rigs in two separate transactions completed in August 2004 and January 2005. We acquired a seventh jackup rig in January 2005 that we had previously operated under a management agreement with the rig's prior owner. In June 2005, we acquired an eighth jackup rig located in the Middle East, *Rig 16*. We are currently refurbishing *Rig 16* in the United Arab Emirates. On February 23, 2006, we entered into a letter of intent to contract *Rig 16* for work offshore Qatar. The letter of intent is conditioned upon, among other things, the completion of a definitive drilling contract. Under the letter of intent, the dayrate would escalate from a rate of \$49,500, which would apply from the date of the customer's acceptance of the rig to May 31, 2006. From June 1, 2006 until the end of the contract term, the dayrate would be \$69,500. We would also receive a stand-by rate of \$30,000 per day, commencing on the date of the letter of intent and continuing until the earlier of the acceptance of the rig or May 1, 2006. The term of the contract would be two years commencing on the date the rig is under tow from the shipyard and is accepted by the customer. The customer may terminate the contract, and not pay the stand-by rate, if the rig is not under tow from the shipyard and accepted by June 1, 2006.

We acquired *Rig 31* in September 2005. We are currently refurbishing the rig in Malaysia. On March 31, 2006, we entered into a letter of award to contract *Rig 31* for work offshore India. The letter of award is conditioned upon, among other things, the completion of a definitive drilling contract. The drilling contract, if completed, would cover the drilling of seven wells with five one-well options, and would commence in September 2006. The dayrate under the contract would be \$110,000 for the first well and \$140,000 for each additional well.

In February 2006, we acquired *Rig 26*, and we have started a refurbishment project for the rig that we expect to take up to one year to complete. We intend to seek work for *Rig 26* in suitable international locations.

Rig 25, which we acquired in January 2005, was severely damaged in connection with Hurricane Katrina. *Rig 25* was severely damaged in connection with Hurricane Katrina and is no longer operable. We expect to receive approximately \$48.8 million under our insurance policies related to the rig, and we are attempting to salvage some of its equipment.

We acquired 22 of our liftboats in October 2004, 16 of our liftboats in June 2005, and one of our liftboats in August 2005. In November 2005, we acquired an additional seven liftboats, four of which are operating offshore Nigeria. On April 3, 2006, we agreed to acquire five liftboats from Laborde. In addition, we have agreed to assume the construction of an additional liftboat pursuant to a construction agreement to be assigned to us by Laborde at the closing.

Our Strengths

Favorable Niche Position in the U.S. Gulf of Mexico Shallow-Water Jackup Rig Market. We believe that our fleet of jackup rigs fills an important niche in the shallow-water drilling market of the U.S. Gulf of Mexico. Three of our rigs have design features making them capable of working in special drilling situations encountered in the U.S. Gulf of Mexico. Our *Rig 21* and *Rig 22* are the only jackup drilling rigs in the U.S. Gulf of Mexico with square mats, which allow these rigs to approach a platform from all four sides. This characteristic is particularly important in the U.S. Gulf of Mexico where many platforms have pipelines beneath the structure.

Table of Contents

Index to Financial Statements

Rig 15 is one of the few jackup rigs in the U.S. Gulf of Mexico capable of working in water depths as shallow as nine feet. We believe these characteristics contribute to the utilization of our rig fleet.

Leading Provider of Liftboat Services in the U.S. Gulf of Mexico. We operate the largest fleet of liftboats in the U.S. Gulf of Mexico with leg lengths greater than 100 feet. Our liftboat fleet comprises a broad range of liftboat sizes and capabilities, which allows us to provide customers with an effective and cost-efficient liftboat for a particular application. Our large liftboat fleet is deployed across the major producing areas of the U.S. Gulf of Mexico continental shelf, permitting us more effectively to respond to customer demand and minimize travel time between jobs. We believe our liftboat captains and crews are some of the most experienced in the industry.

Operation of Jackup Rigs and Liftboats Provides Balance to Our Business. Jackup rigs are used primarily for exploration and development drilling. Consequently, utilization and dayrates for jackup rigs tend to be more closely correlated with oil and natural gas price expectations and drilling activity levels than utilization and dayrates for liftboats. In contrast, liftboats are used throughout the life of an oil and natural gas field. As a result, utilization and dayrates for liftboats tend to be more stable than for jackup rigs. We believe that our liftboats help us balance our exposure to commodity prices and drilling activity levels that we experience with our jackup rigs.

Strong Relationships with a Diversified Customer Base. Our customer base includes major integrated energy companies and independent exploration and production companies. This customer base provides exposure to the spending patterns of major integrated energy companies, which are more stable, and of smaller independent exploration and production companies, which are more commodity-driven and subject to wider fluctuations. We benefit from our management's long-standing relationships with many of our customers, and in some instances, we have developed preferred service provider relationships with our clients.

Experienced and Incentivized Management Team. Our senior and operating level management team has extensive industry experience in the U.S. Gulf of Mexico and internationally, with an average of approximately 25 years of experience in the oil service industry. We believe that their considerable knowledge of and experience in our industry enhances our ability to operate effectively throughout industry cycles. Our management also has substantial experience in identifying and completing asset acquisitions. Our incentive compensation plans are designed to align our management's interests with our operating, financial and safety performance.

Our Strategies

Focus on Drilling and Liftboat Services. We view our core business as providing shallow-water drilling and liftboat services to the exploration and production industry. As one of the largest operators of shallow-water jackup rigs and liftboats in the U.S. Gulf of Mexico, we believe we are well-positioned to benefit from any increased levels of drilling and production maintenance activity. We also intend to continue pursuing expansion opportunities in international markets with characteristics similar to the shallow-water U.S. Gulf of Mexico, such as West Africa, the Middle East and the Asia-Pacific region.

Maintain Our Status as an Efficient, Low-Cost Service Provider. We strive to maintain an organizational structure and asset base that allow us to be an efficient, low-cost service provider in the industry. Because of the smaller rig and crew sizes required to operate our jackup fleet as compared to higher specification assets, we believe our rigs have an operating and capital cost advantage. In addition, our liftboat operations are organized to allow for the integration of future liftboat acquisitions without significant incremental overhead.

Pursue Strategic Growth Opportunities. We believe that opportunities remain to acquire shallow-water rigs from service providers that are more focused on higher specification assets needed to service customers operating in the deepwater market segment or drilling complex ultra-deep wells. We also believe that opportunities exist to acquire liftboats from smaller-scale operators as those operators may opt for consolidation given the economic and operational advantages associated with operating a larger fleet. From time to time, we review, and may have outstanding bids or be in discussions with potential sellers regarding, possible acquisitions of assets or other similar transactions. Any such acquisitions may require significant capital commitments.

Table of Contents**Index to Financial Statements**

Remain Financially Disciplined and Conservative. We use return on capital employed in evaluating new investments and intend to pursue only those investments that we believe will produce strong returns on capital employed throughout an entire industry cycle. Furthermore, we intend to maintain a conservative capital structure and sufficient liquidity to operate throughout the industry cycle.

Our Fleet**Jackup Rigs**

As of March 1, 2006, five of our jackup rigs were operating under contracts ranging in duration from well-to-well to six months, at an average dayrate of approximately \$64,285. The following table contains information regarding our jackup rig fleet as of March 1, 2006. The table does not include *Rig 25*.

Rig Name	Type	Year Built	Maximum/Minimum Water Depth Rating (feet)	Rated Drilling Depth (feet) (1)	Location	Status
11	Mat-supported, cantilever	1980	200/21	20,000(2)	U.S. Gulf of Mexico	Contracted
15	Independent leg, slot	1982	85/9	20,000	U.S. Gulf of Mexico	Contracted
16	Independent leg, cantilever	1981	170/16	16,000	Middle East	Shipyard
20	Mat-supported, cantilever	1980	100/20	25,000	U.S. Gulf of Mexico	Contracted
21	Mat-supported, cantilever	1980	120/22	20,000	U.S. Gulf of Mexico	Shipyard(3)
22	Mat-supported, cantilever	1971	173/22	15,000	U.S. Gulf of Mexico	Contracted
26	Independent leg, cantilever	1979	150/12	16,000	U.S. Gulf of Mexico	Shipyard
30	Mat-supported, slot	1979	250/25	20,000	U.S. Gulf of Mexico	Contracted
31	Mat-supported, slot	1979	250/25	20,000	Asia	Shipyard

- (1) Rated drilling depth means drilling depth stated by the manufacturer of the rig. Depending on deck space and other factors, a rig may not have the actual capacity to drill at the rated drilling depth.
- (2) Rated workover depth. *Rig 11* is currently configured for workover activity, which includes maintenance and repair or modification of wells that have already been drilled and completed to enhance or resume the well's production.
- (3) *Rig 21* is undergoing refurbishment in a shipyard in Mississippi primarily for repairs of damage sustained during Hurricane Katrina. We expect to complete the repairs and other refurbishment work in the second quarter of 2006.

Jackup rigs are mobile, self-elevating drilling platforms equipped with legs that can be lowered to the ocean floor until a foundation is established to support the drilling platform. Once a foundation is established, the drilling platform is jacked further up the legs so that the platform is above the highest expected waves. The rig hull includes the drilling rig, jackup system, crew quarters, loading and unloading facilities, storage areas for bulk and liquid materials, helicopter landing deck and other related equipment.

Jackup rig legs may operate independently or have a lower hull referred to as a mat attached to the lower portion of the legs in order to provide a more stable foundation in soft bottom areas, similar to those encountered in certain of the shallow-water areas of the U.S. Gulf of Mexico. Mat rigs generally are able to more quickly position themselves on the worksite and more easily move on and off location than independent leg rigs.

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

Our rigs are used primarily for exploration and development drilling in the shallow waters of the U.S. Gulf of Mexico. Six of our jackup rigs are mat-supported. Six have a cantilever design that permits the drilling platform to be extended out from the hull to perform drilling or workover operations over some types of preexisting platforms or structures. Three have a slot-type design, which requires drilling operations to take place through a slot in the hull. Slot-type rigs are usually used for exploratory drilling rather than development drilling, in that their configuration makes them difficult to position over existing platforms or structures. Historically, jackup rigs with a cantilever design have maintained higher levels of utilization than rigs with a slot-type design. However, one of our slot-type rigs has a competitive advantage in very shallow water as it is one of the few jackup rigs in the world that can drill in water depths as shallow as nine feet.

Table of Contents**Index to Financial Statements*****Liftboats***

The following table contains information regarding our liftboats as of March 1, 2006:

Liftboat Name (1)	Year Built	Leg Length (feet)	Deck Area (square feet)	Maximum Deck Load (pounds)	Location	Gross Tonnage
Whale Shark	2005	260	8,170	729,000	U.S. Gulf of Mexico	99

- (1) The *Snapper*, *Corina* and *Pike* are currently stacked. We have commenced the reactivation of the *Corina* and the *Pike*, and expect them to be available by the third quarter of 2006. We are evaluating the *Snapper*'s condition to determine whether to reactivate or scrap it. All other liftboats are either available or operating.

Table of Contents

Index to Financial Statements

Liftboats are self-propelled, self-elevating work platforms complete with legs, cranes and living accommodations, and with a large open deck space, which provide a versatile, mobile and stable platform to support a broad range of offshore maintenance and construction services throughout the life of an oil or natural gas well. Once on location, a liftboat hydraulically lowers its legs to the ocean floor and then jacks up until the work platform is elevated above the anticipated wave action. Once the liftboats are positioned, their stability, open deck area, crane capacity and relatively low costs of operation make them ideal work platforms for a wide range of offshore support services, such as:

production platform construction, inspection, maintenance and removal;

well intervention and workover;

well plug and abandonment;

crane lift services;

pipeline installation and maintenance; and

offshore crew accommodation.

Unlike larger and more costly alternatives, such as jackup rigs or construction barges, our liftboats are self-propelled and can quickly reposition at a worksite or move to another location without third-party assistance. Our liftboats are ideal working platforms to support platform and pipeline inspection and maintenance tasks because of their ability to maneuver efficiently and support multiple activities at different working heights. Diving operations may also be performed from our liftboats in connection with underwater inspections and repair. In addition, our liftboats provide an effective platform from which to perform well-servicing activities such as mechanical wireline, electrical wireline and coiled tubing operations. Technological advances, such as coiled tubing, allow more well-servicing procedures to be conducted from liftboats. Moreover, during both platform construction and removal, smaller platform components can be installed and removed more efficiently and at a lower cost using a liftboat crane and liftboat-based personnel than with a specialized construction barge or jackup rig. Liftboats are typically moved to a port during severe weather to avoid the winds and waves they would be exposed to in open water.

The length of the legs is the principal measure of capability for a liftboat, as it determines the maximum water depth in which the liftboat can operate. The Coast Guard restricts the operation of liftboats to water depths less than 180 feet, so boats with longer leg lengths are useful primarily on taller platforms. Eight of our liftboats in the U.S. Gulf of Mexico have leg lengths of 190 feet or greater, which allows us to service approximately 83% of the 3,800 existing production platforms in the U.S. Gulf of Mexico. In addition, the capability to reposition at a work site or to move to another location within a short time adds to their versatility. Each of our liftboats is staffed with two full-time crews that are available to work 24 hours per day, seven days per week, and rotate based on either a seven days on and seven days off schedule or a 14 days on and seven days off schedule. Currently, we own 42 liftboats in the U.S. Gulf of Mexico and four liftboats in Nigeria.

Competition

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

The U.S. Gulf of Mexico shallow-water market is highly competitive. Drilling and liftboat contracts are traditionally short term in nature and are awarded on a competitive bid basis. Pricing is often the primary factor in determining which qualified contractor is awarded a job, although technical capability of service and equipment, unit availability, unit location, safety record and crew quality may also be considered. Many of our competitors in the U.S. Gulf of Mexico shallow-water market have greater financial and other resources than we have and may be better able to make technological improvements to existing equipment or replace equipment that becomes obsolete.

Customers

Our customers primarily include major integrated energy companies and independent oil and natural gas operators in the U.S. Gulf of Mexico. Our largest drilling services customers for the year ended December 31, 2005

Table of Contents

Index to Financial Statements

were Chevron Corporation, Bois d Arc Energy, Inc. and Noble Energy, Inc., which accounted for 28.6%, 16.5% and 11.0%, respectively, of our drilling services revenues for that period. Our largest drilling services customers for the period from inception to December 31, 2004 were Chevron, Bois d Arc Energy and Petroquest Energy, Inc., which accounted for 33.1%, 19.4% and 10.7%, respectively, of our drilling services revenues for that period. Our largest liftboat customers for the year ended December 31, 2005 were Chevron and Gulf Offshore Logistics, LLC, which accounted for 33.6% and 12.9%, respectively, of our domestic marine services revenues for that period. Our largest liftboat customers for the period from inception to December 31, 2004 were Chevron and Bois d Arc Energy, which accounted for 40.1% and 12.5%, respectively, of our domestic marine services revenues for that period. Chevron and Bois d Arc Energy accounted for 31% and 12%, respectively, of our consolidated revenues for the year ended December 31, 2005 and 31% and 15%, respectively, of our consolidated revenues for the period from inception to December 31, 2004. No other customer accounted for more than 10% of our consolidated revenues for either period.

Contracts

Our contracts to provide services are individually negotiated and vary in their terms and provisions. We obtain most of our contracts through competitive bidding against other contractors. In general, contracts provide for payment on a dayrate basis, with higher rates while the unit is operating and lower rates for periods of mobilization or when operations are interrupted or restricted by equipment breakdowns, adverse weather conditions or other factors. To date, most of our contracts in the U.S. Gulf of Mexico have been on a short-term basis of less than one year.

A dayrate drilling contract generally extends over a period of time covering the drilling of a single well or group of wells or covering a stated term. These contracts typically can be terminated by the customer under various circumstances such as the loss or destruction of the drilling unit or the suspension of drilling operations for a specified period of time as a result of a breakdown of major equipment. In addition, customers generally have the right to terminate our contracts with little or no notice, and without penalty. The contract term in some instances may be extended by the customer's exercising options for the drilling of additional wells or for an additional term, or by exercising a right of first refusal.

A liftboat contract generally is based on a flat dayrate for the vessel and crew. Our liftboat dayrates are determined by prevailing market rates, vessel availability and historical rates paid by the specific customer. Under most of our liftboat contracts, we receive a variable rate for reimbursement of costs such as catering, fuel, oil, rental equipment, crane overtime and other items. Liftboat contracts in the U.S. Gulf of Mexico generally are for shorter terms than are drilling contracts. Our liftboat contracts in Nigeria are on a longer-term basis.

On larger contracts, particularly outside the United States, we may be required to arrange for the issuance of a variety of bank guarantees, performance bonds or letters of credit. The issuance of such guarantees may be a condition of the bidding process imposed by our customers for work outside the United States. The customer would have the right to call on the guarantee, bond or letter of credit in the event we default in the performance of the services. The guarantees, bonds and letters of credit would typically expire after we complete the services.

In certain countries, we also may be required to post bonds or letters of credit in order to temporarily import equipment, including our drilling rigs and liftboats, into the country. These temporary importation bonds would secure the amount of the import duty that is payable if the equipment fails to leave the country within the time frame permitted by the local jurisdiction for the temporary importation of equipment. When the equipment is exported out of the local jurisdiction, the bond or letter of credit generally would be returned to us. Currently, we have arranged for a bank in Nigeria to issue a letter of credit in the amount of approximately \$440,000 with respect to our liftboats in that country, and we have executed a counter-indemnity agreement with the Nigerian bank for any liability incurred by the bank under that letter of credit.

Employees

As of December 31, 2005, we had approximately 750 employees. We require skilled personnel to operate and provide technical services and support for our rigs and liftboats. As a result, we conduct extensive personnel

Table of Contents

Index to Financial Statements

recruiting, training and safety programs. We will need to hire additional vessel-based employees in connection with the commencement of operations of *Rig 16*, *Rig 26* and *Rig 31*, and possibly in connection with the Laborde acquisition if completed. As of December 31, 2005, none of our employees was working under collective bargaining agreements. Efforts have been made from time to time, however, to unionize portions of the offshore workforce in the U.S. Gulf of Mexico. We believe that our employee relations are good.

Insurance

We maintain insurance coverage that includes physical damage, third party liability, maritime employers liability, pollution and other coverage. Our primary marine package provides for hull and machinery coverage for our rigs and liftboats up to a scheduled value for each asset. Rig coverages include a \$1.0 million deductible per occurrence; liftboat deductibles vary from \$150,000 to \$500,000 depending on the insured value of the particular vessel. There is no deductible in the event of a total loss. The protection and indemnity coverage under the primary marine package has a \$5.0 million limit per occurrence with excess liability up to \$100.0 million. The primary marine package also provides coverage for cargo and charterer's legal liability. Vessel pollution is covered under a Water Quality Insurance Syndicate policy. In addition to our marine package, we have separate policies providing coverage for general domestic liability, employer's liability, domestic auto liability and non-owned aircraft liability, with customary deductibles and coverages. Insurance premiums under our program are approximately \$8.0 million for the twelve-month policy period ending July 31, 2006.

As a result of the damage sustained by the oil and natural gas industry from Hurricanes Ivan, Katrina and Rita, we anticipate that our insurance costs will increase significantly after the end of our current policy period on July 31, 2006. Competitors with assets in the Gulf of Mexico that have already completed their renewals in 2006 are experiencing a difficult market environment with insurance underwriters, and are likely to have increased premium costs, higher levels of retention and limits on the aggregate damage they may claim in a major windstorm. To obtain access to adequate insurance coverage, we may terminate our current policy early to accelerate the renewal process.

We believe that our insurance coverage is customary for the industry and adequate for our business. However, there are risks that such insurance will not adequately protect us against or not be available to cover all the liability from all of the consequences and hazards we may encounter in our operations.

Regulation

Our operations are affected in varying degrees by governmental laws and regulations. Our industry is dependent on demand for services from the oil and natural gas industry and, accordingly, is also affected by changing tax and other laws relating to the energy business generally. We are also subject to the jurisdiction of the U.S. Coast Guard, the National Transportation Safety Board, the U.S. Customs and Border Protection Service, as well as private industry organizations such as the American Bureau of Shipping. The Coast Guard and the National Transportation Safety Board set safety standards and are authorized to investigate vessel accidents and recommend improved safety standards, and the U.S. Customs Service is authorized to inspect vessels at will. Coast Guard regulations also require annual inspections and periodic drydock inspections or special examinations of our vessels.

The shorelines and shallow water areas of the U.S. Gulf of Mexico are ecologically sensitive. Heightened environmental concerns in these areas have led to higher drilling costs, a more difficult and lengthy well permitting process and, in general, have adversely affected drilling decisions of oil and natural gas companies. In the United States, regulations applicable to our operations include regulations that require us to obtain and

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

maintain specified permits or governmental approvals, control the discharge of materials into the environment, require removal and cleanup of materials that may harm the environment or otherwise relate to the protection of the environment. For example, as an operator of mobile offshore units in navigable U.S. waters and some offshore areas, we may be liable for damages and costs incurred in connection with oil spills or other

unauthorized discharges of chemicals or wastes resulting from or related to those operations. Laws and

Table of Contents

Index to Financial Statements

regulations protecting the environment have become more stringent and may in some cases impose strict liability, rendering a person liable for environmental damage without regard to negligence or fault on the part of such person. Some of these laws and regulations may expose us to liability for the conduct of or conditions caused by others or for acts which were in compliance with all applicable laws at the time they were performed. The application of these requirements or the adoption of new or more stringent requirements could have a material adverse effect on our financial condition and results of operations.

The U.S. Federal Water Pollution Control Act of 1972, commonly referred to as the Clean Water Act, prohibits the discharge of specified substances into the navigable waters of the United States without a permit. The regulations implementing the Clean Water Act require permits to be obtained by an operator before specified exploration activities occur. Offshore facilities must also prepare plans addressing spill prevention control and countermeasures. Violations of monitoring, reporting and permitting requirements can result in the imposition of civil and criminal penalties. A March 2005 United States district court decision could result in certain of our vessels being required to obtain Clean Water Act permits for the discharge of ballast water. Under current Clean Water Act regulations, our vessels are exempt from such permitting requirements; however, in *Northwest Environmental Advocates v. EPA*, the federal district court in California ordered the Environmental Protection Agency to repeal the exemption. Under the court's ruling, owners and operators of vessels would be required to comply with the Clean Water Act permitting requirements or face penalties. The remedy phase of the proceeding is ongoing; however, we expect to incur certain costs to obtain Clean Water Act permits for certain of our vessels if the permitting exemption is repealed. Because we do not yet know how or when this matter will ultimately be resolved, we cannot estimate its potential financial impact at this time. However, we believe that any financial impacts resulting from the repeal of the permitting exemption for ballast water discharge will not be material.

The U.S. Oil Pollution Act of 1990 (OPA) and related regulations impose a variety of requirements on responsible parties related to the prevention of oil spills and liability for damages resulting from such spills. Few defenses exist to the liability imposed by OPA, and the liability could be substantial. Failure to comply with ongoing requirements or inadequate cooperation in the event of a spill could subject a responsible party to civil or criminal enforcement action. OPA also requires owners and operators of all vessels over 300 gross tons to establish and maintain with the U.S. Coast Guard evidence of financial responsibility sufficient to meet their potential liabilities under OPA. The U.S. Coast Guard has implemented regulations requiring evidence of financial responsibility in the amount of \$900 per gross ton. Under OPA, an owner or operator of a fleet of vessels is required only to demonstrate evidence of financial responsibility in an amount sufficient to cover the vessel in the fleet having the greatest maximum liability under OPA. Vessel owners and operators may evidence their financial responsibility by showing proof of insurance, surety bond, self-insurance or guarantee. We have obtained the necessary OPA financial assurance certifications for each of our vessels subject to such requirements.

The Coast Guard and Maritime Transportation Act of 2004 (the CGMTA) amended OPA to require the owner or operator of any non-tank vessel of 400 gross tons or more that carries oil of any kind as a fuel for main propulsion to prepare and submit a response plan that covers each applicable vessel by August 8, 2005. For vessels that have International Tonnage Certificates, gross tonnage is based on the certificate, which may vary from the standard U.S. gross tonnage for the vessel reflected in our liftboat table above. The vessel response plan must include detailed information on actions to be taken by vessel personnel to prevent or mitigate any discharge or substantial threat of discharge. We submitted the required plans to the Coast Guard prior to the August 2005 deadline.

The U.S. Outer Continental Shelf Lands Act authorizes regulations relating to safety and environmental protection applicable to lessees and permittees operating on the outer continental shelf. Included among these are regulations that require the preparation of spill contingency plans and establish air quality standards for certain pollutants, including particulate matter, volatile organic compounds, sulfur dioxide, carbon monoxide and nitrogen oxides. Specific design and operational standards may apply to outer continental shelf vessels, rigs, platforms, vehicles and structures. Violations of lease conditions or regulations related to the environment issued pursuant to the Outer Continental Shelf Lands Act can result in substantial civil and criminal penalties, as well as

Table of Contents

Index to Financial Statements

potential court injunctions curtailing operations and canceling leases. Such enforcement liabilities can result from either governmental or citizen prosecution.

The U.S. Comprehensive Environmental Response, Compensation, and Liability Act, also known as CERCLA or the Superfund law, imposes liability without regard to fault or the legality of the original conduct on some classes of persons that are considered to have contributed to the release of a hazardous substance into the environment. These persons include the owner or operator of a facility where a release occurred, the owner or operator of a vessel from which there is a release, and companies that disposed or arranged for the disposal of the hazardous substances found at a particular site. Persons who are or were responsible for releases of hazardous substances under CERCLA may be subject to joint and several liability for the cost of cleaning up the hazardous substances that have been released into the environment and for damages to natural resources. Prior owners and operators are also subject to liability under CERCLA. It is also not uncommon for third parties to file claims for personal injury and property damage allegedly caused by the hazardous substances released into the environment.

Recent terrorist actions have spurred a variety of initiatives intended to enhance vessel security. In October 2003, the U.S. Coast Guard finalized regulations required to implement the Maritime Transportation and Security Act of 2002. These regulations required, among other things, the development of vessel security plans and on-board installation of automatic information systems, or AIS, to enhance vessel-to-vessel and vessel-to-shore communications. We believe that our vessels are in substantial compliance with all vessel security regulations.

Although significant capital expenditures may be required to comply with these governmental laws and regulations, such compliance has not materially adversely affected our earnings or competitive position. We believe that we are currently in compliance in all material respects with the environmental regulations to which we are subject.

Our operations are primarily conducted in the U.S. domestic trade, which is governed by the coastwise laws of the United States. The U.S. coastwise laws reserve marine transportation, including liftboat services, between points in the United States to vessels built in and documented under the laws of the United States and owned and manned by U.S. citizens. Generally, an entity is deemed a U.S. citizen for these purposes so long as:

it is organized under the laws of the United States or a state;

each of its president or other chief executive officer and the chairman of its board of directors is a U.S. citizen;

no more than a minority of the number of its directors necessary to constitute a quorum for the transaction of business are non-U.S. citizens;

at least 75% of the interest and voting power in the corporation is held by U.S. citizens free of any trust, fiduciary arrangement or other agreement, arrangement or understanding whereby voting power may be exercised directly or indirectly by non-U.S. citizens; and

in the case of a limited partnership, the general partner meets U.S. citizenship requirements for U.S. coastwise trade.

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

Because we could lose our privilege of operating our liftboats in the U.S. coastwise trade if non-U.S. citizens were to own or control in excess of 25% of our outstanding interests, our certificate of incorporation restricts foreign ownership and control of our common stock to not more than 20% of our outstanding interests. Two of our liftboats rely on an exemption from the Jones Act in order to operate in the U.S. Gulf of Mexico. If these liftboats were to lose this exemption, we would be unable to use them in the U.S. Gulf of Mexico and would be forced to seek opportunities for them in international locations.

The United States is one of approximately 165 member countries to the International Maritime Organization (IMO), a specialized agency of the United Nations that is responsible for developing measures to improve the safety and security of international shipping and to prevent marine pollution from ships. Among the various

Table of Contents

Index to Financial Statements

international conventions negotiated by the IMO is the International Convention for the Prevention of Pollution from Ships (MARPOL). MARPOL imposes environmental standards on the shipping industry relating to oil spills, management of garbage, the handling and disposal of noxious liquids, harmful substances in packaged forms, sewage and air emissions.

Annex VI to MARPOL, which became effective internationally on May 19, 2005, sets limits on sulfur dioxide and nitrogen oxide emissions from ship exhausts and prohibits deliberate emissions of ozone depleting substances. Annex VI also imposes a global cap on the sulfur content of fuel oil and allows for specialized areas to be established internationally with more stringent controls on sulfur emissions. For vessels over 400 gross tons, platforms and drilling rigs, Annex VI imposes various survey and certification requirements. For this purpose, gross tonnage is based on the International Tonnage Certificate for the vessel, which may vary from the standard U.S. gross tonnage for the vessel reflected in our liftboat table above. The United States has not yet ratified Annex VI. Any vessels we operate internationally would, however, become subject to the requirements of Annex VI in those countries that have implemented its provisions. We believe the rigs we currently offer for international projects are generally exempt from the more costly compliance requirements of Annex VI and the liftboats we currently offer for international projects are generally exempt from or otherwise substantially comply with those requirements. Accordingly, we do not anticipate incurring significant costs to comply with Annex VI in the near term. If the United States does elect to ratify Annex VI in the future, we could be required to incur potentially significant costs to bring certain of our vessels into compliance with these requirements.

Properties

We maintain our principal executive offices in Houston, Texas, which is under lease, and have an operational office in New Iberia, Louisiana, which we own. We also lease temporary office space in Lafayette, Louisiana and a warehouse in Broussard, Louisiana.

Legal Proceedings

We and our subsidiaries are routinely involved in litigation, claims and disputes arising in the ordinary course of our business. We do not believe that ultimate liability, if any, resulting from any such pending litigation will have a material adverse effect on our financial condition or results of operations.

Table of Contents**Index to Financial Statements****MANAGEMENT****Executive Officers and Directors**

The following table sets forth information concerning our executive officers and directors, including their ages, as of March 1, 2006:

<u>Name</u>	<u>Age</u>	<u>Position</u>	<u>Director</u> <u>Class</u>
John T. Reynolds	35	Chairman of the Board	Class III
Randall D. Stilley	52	Chief Executive Officer, President and Director	Class I
Steven A. Manz	40	Chief Financial Officer	N/A
John T. Rynd	48	Senior Vice President, Hercules Offshore and President, Hercules Drilling Company, LLC	N/A
Randal R. Reed	49	President, Hercules Liftboat Company, LLC	N/A
Thomas E. Hord	53	Vice President, Operations and Chief Operating Officer, Hercules Drilling Company, LLC	N/A
James W. Noe	33	Vice President, General Counsel, Chief Compliance Officer and Secretary	N/A
Renee M. Pitre	44	Vice President, Finance, Hercules Liftboat Company, LLC	N/A
Don P. Rodney	58	President, Hercules International Holdings Ltd.	N/A
Leslie K. Taylor	46	Vice President, Human Resources	N/A
Johnny K. Vincent	43	Vice President and Corporate Controller	N/A
Thomas R. Bates, Jr.	56	Director	Class II
Thomas J. Madonna	59	Director	Class II
F. Gardner Parker	63	Director	Class III
V. Frank Pottow	42	Director	Class III
Steven A. Webster	54	Director	Class I

John T. Reynolds has served as Chairman of our Board of Directors since August 2004. Mr. Reynolds is co-founder and a managing director of Lime Rock Management LP, an energy-focused private equity firm. Prior to co-founding Lime Rock Management in 1998, Mr. Reynolds was a Vice President at Goldman Sachs & Co., an investment banking firm. He was a senior analyst for oil services in the Investment Research department at Goldman Sachs, where he worked from 1992 to 1998.

Randall D. Stilley has served as Chief Executive Officer, President and a director since October 2004. Prior to joining Hercules, Mr. Stilley was Chief Executive Officer of Seitel, Inc., an oilfield services company, from January 2004 to October 2004. From 2000 until he joined Seitel, Mr. Stilley was an independent business consultant and managed private investments. From 1997 until 2000, Mr. Stilley was President of the Oilfield Services Division at Weatherford International, Inc., an oilfield services company. Prior to joining Weatherford in 1997, Mr. Stilley served in a variety of positions at Halliburton Company, an oilfield services company. Mr. Stilley is a member of the Energy Steering Committee at the Houston Technology Center. He is a registered professional engineer in the state of Texas and a member of the Society of Petroleum Engineers.

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

Steven A. Manz has served as Chief Financial Officer since January 2005. Prior to joining Hercules, Mr. Manz worked at Noble Corporation, a contract drilling company, from May 1995 to January 2005 in a number of roles, including Managing Director of the Noble Technology Services Division from May 2003 to January 2005, Vice President of Strategic Planning from August 2000 to May 2003, Director of Accounting and Investor Relations from March 1997 to August 2000 and Internal Audit Manager from May 1995 to March 1997. Prior to joining Noble, Mr. Manz served as senior auditor of Cooper Industries, an electrical products manufacturer, from May 1993 to May 1995 and as a member of the Audit Group of Price Waterhouse LLP from August 1989 to May 1993.

Table of Contents

Index to Financial Statements

John T. Rynd became Senior Vice President of Hercules Offshore and President of Hercules Drilling Company, LLC in October 2005. Prior to joining Hercules, Mr. Rynd worked at Noble Drilling Services Inc., a wholly owned subsidiary of Noble Corporation, a contract drilling company, as Vice President Investor Relations from October 2000 to September 2005 and as Vice President Marketing and Contracts from September 1994 to September 2000. From June 1990 to September 1994, Mr. Rynd worked for Chiles Offshore Corporation, a contract drilling company, including as Vice President Marketing.

Randal R. Reed has served as President of our subsidiary, Hercules Liftboat Company, LLC, since October 2004. From 1995 to October 2004, Mr. Reed was manager of the fleet of liftboats, diveboats and crewboats of Global Industries, Ltd., an oilfield services company.

Thomas E. Hord has served as Vice President, Operations and Chief Operating Officer of Hercules Drilling Company, LLC since August 2004. Prior to joining our company, Mr. Hord supervised rig operations and marketing for Unrelated HOC and its predecessor companies since 1982.

James W. Noe has served as Vice President, General Counsel, Chief Compliance Officer and Secretary since October 2005. From July 2002 to October 2005, Mr. Noe was Corporate Counsel for BJ Services Company, a worldwide oilfield services company. He was also in private practice from October 1997 to July 2002. On several occasions during 2000 and 2001 while still in private practice, Mr. Noe served as counsel for Single Buoy Moorings, a company that designs, owns and operates floating production systems.

Renee M. Pitre has served as Vice President, Finance of Hercules Liftboat Company, LLC since November 2004. From 1997 to November 2004, she was controller over four divisions of Global Industries, Ltd. From 1992 to 1997, Ms. Pitre was controller for the Americas region for Subsea International, an offshore oilfield services company.

Don P. Rodney has served as President of Hercules International Holdings Ltd. since December 2005. From July 2004 to December 2005, Mr. Rodney served as Vice President, Finance of Hercules Drilling Company, LLC. From October 2003 to June 2004, Mr. Rodney was Chief Financial Officer of Unrelated HOC. Mr. Rodney was retired from July 2003 to October 2003. From November 2002 to July 2003, he was Treasurer of TODCO, a contract drilling company. Mr. Rodney was Controller, Inland Water Division of Transocean from February 2001 until October 2002. From November 1992 until January 2001, Mr. Rodney served as Vice President, Finance for R&B Falcon Drilling USA, Inc., a marine contract drilling company, and its predecessors. From 1976 to November 1992, Mr. Rodney worked for Atlantic Pacific Marine Corp., a marine contract drilling company, in a number of positions, including as Controller from 1983 until November 1992.

Leslie K. Taylor has served as Vice President, Human Resources since October 2005. Prior to joining Hercules, Ms. Taylor worked at Calpine Corporation, an independent power producer, as the Director of Human Resources from July 2000 to September 2005 and as Manager of Human Resources from December 1999 to July 2000. From December 1998 to December 1999, Ms. Taylor worked for Columbia Energy Services, a natural gas and power trading company, as Manager of Human Resources.

Johnny K. Vincent has served as Vice President and Corporate Controller since November 2005. Prior to joining Hercules, Mr. Vincent worked at Dell Inc., an information technology supplier, as Controller, State and Local Government Sales from October 2004 to October 2005, Senior Manager of Corporate Internal Audit from July 2002 to October 2004, and Finance Consultant roles in the U.S. Consumer and Small Business Sales segments from March 1999 to July 2002. Prior to joining Dell, Mr. Vincent served as Director of Business Development at Complete RX, Ltd., a pharmacy management firm, from April 1998 to March 1999 and Director of Operations at Cardinal Health, a pharmaceutical company, from January 1996 to April 1998. Mr. Vincent also worked at Cooper Industries, an electrical products manufacturer, from August 1990 to

January 1996 in a number of audit and accounting roles.

Table of Contents

Index to Financial Statements

Thomas R. Bates, Jr. has served as a director since our formation. Mr. Bates has been a managing director at Lime Rock Management LP, an energy-focused private equity firm, since October 2001. From February 2000 through September 2001, Mr. Bates was a business consultant. From June 1998 through January 2000, Mr. Bates was President of the Discovery Group of Baker Hughes Incorporated, an oilfield services company. From June 1997 to May 1998, he was President and Chief Executive Officer of Weatherford/Enterra, Inc., an oilfield services company. From March 1992 to May 1997, Mr. Bates was President of Anadrill at Schlumberger Limited, an oilfield services company. Mr. Bates was Vice President of Sedco Forex at Schlumberger from February 1986 to March 1992. Mr. Bates serves on the board of directors of NATCO Group Inc.

Thomas J. Madonna has served as a director since our initial public offering in November 2005. Mr. Madonna has been Manager of Finance and Human Resources of Menil Foundation, Inc., a major art museum, since November 2002. From 1969 until December 2001, Mr. Madonna worked at PricewaterhouseCoopers LLP in a number of roles, including as Assurance Partner from 1982 until his retirement in 2001.

F. Gardner Parker has served as a director since our initial public offering in November 2005. From 1970 until 1984, Mr. Parker worked at Ernst & Ernst (now Ernst & Young LLP), an accounting firm, and was a partner at that firm from 1978 until 1984. Mr. Parker has been Managing Outside Trust Manager with Camden Property Trust, a real estate investment trust, since 1998. He serves as director of Carrizo Oil and Gas, Inc., Crown Resources Corporation, Sharps Compliance Corp. and Blue Dolphin Energy Company.

V. Frank Pottow has served as a director since October 2004. Mr. Pottow joined Greenhill & Co., an investment banking and merchant banking firm, as a managing director in July 2002 and has served as a member of the Investment Committee of Greenhill Capital Partners since July 2002. From October 1997 to July 2002, he was a managing director of SG Capital Partners, LLC, a private equity firm. From June 1996 to October 1997, he was a managing director of Thayer Capital Partners, a private equity firm. From January 1992 to March 1996, he was a Principal of Odyssey Partners, L.P., an investment firm.

Steven A. Webster has served as a director since May 2005. Mr. Webster has been President and Co-Managing Partner of Avista Capital Partners LP, a partnership focusing on private equity investments in energy, media, healthcare and other industries, since June 2005. Since 2000, he has been a consultant to Global Energy Partners, an affiliate of Credit Suisse Securities (USA) LLC, which has specialized in private equity investments in the energy industry. From 2000 to June 2005, he served as Chairman of Global Energy Partners. From 1998 to 1999, he served as President and CEO of R&B Falcon Corporation, a marine contract drilling company. From 1988 through 1997, Mr. Webster was Chairman and CEO of Falcon Drilling Company Inc., a company he founded. Mr. Webster has been a financial intermediary since 1979 and an active investor since 1984 in the energy sector. He serves as Chairman of Carrizo Oil & Gas Inc., Basic Energy Services and Crown Resources Corporation. He is also a trust manager of Camden Property Trust and a director of Brigham Exploration Company, Geokinetics Inc., Grey Wolf, Inc., Goodrich Petroleum Corporation and SEACOR Holdings Inc.

Table of Contents**Index to Financial Statements****SELLING STOCKHOLDERS**

The following table sets forth information as of the date of this prospectus regarding shares beneficially owned by all selling stockholders. To our knowledge, except as indicated in the footnotes to this table or as provided by applicable community property laws, upon consummation of this offering, the persons named in the table have sole investment and voting power with respect to the shares of common stock indicated.

Name and Address of Beneficial Owners	Shares Beneficially Owned	Number of Shares to be Sold in Offering	Maximum Number of Shares to be Sold Upon Exercise of Over-Allotment Option(1)	Percentage Beneficially Owned		
				Before Offering	After Offering (Assuming No Exercise of Over- Allotment Option)	After Offering (Assuming Exercise of Over- Allotment Option in Full)

- (8) Includes 103,750 shares subject to options that are exercisable within 60 days of the date of this prospectus.
- (9) Includes 163,100 shares held by the Thomas J. Seward II Profit Sharing Plan and 43,750 shares held by Harbour Capital Consultants, Inc.

We are paying the expenses of the offering by the selling stockholders, including up to \$100,000 of the fees and expenses of one law firm representing the selling stockholders, other than the underwriting discounts, commissions and taxes with respect to shares of common stock sold by the selling stockholders and the fees and expenses of any other attorneys, accountants and other advisors separately retained by them.

We have entered into a registration rights agreement with the members of our company at the time of the Conversion. Under the agreement, holders of at least 25% of the registrable securities subject to the agreement may require us to file a registration statement under the Securities Act to register the sale of shares of our common stock, subject to certain limitations, including that the reasonably anticipated gross proceeds must be at least \$15.0 million. These stockholders may request a total of three such demand registrations and only one in any six-month period. These holders also have the right to cause us to register their registrable securities on Form S-3, when it becomes available to us, if the reasonably anticipated gross proceeds would be at least \$10.0 million. In addition, if we propose to register securities under the Securities Act, then the holders who are party to the agreement will have piggy-back rights, subject to quantity limitations determined by underwriters if the offering involves an underwriting, to request that we register their registrable securities. There is no limit to the number of these piggy-back registrations in which these holders may request their shares be included. The offering of shares of common stock by the selling stockholders contemplated by this prospectus constitutes an exercise of these piggy-back rights. We generally will bear the registration expenses incurred in connection with registrations. We have agreed to indemnify these stockholders against certain liabilities, including liabilities under the Securities Act, in connection with any registration effected under the agreement. These registration rights will terminate at the earlier of (a) seven years from the closing date of our initial public offering or (b) with respect to any holder, the date that all registrable securities held by that holder may be sold in a three-month period without registration under Rule 144 of the Securities Act and such registrable securities represent less than one-percent of all outstanding shares of our capital stock.

DESCRIPTION OF CAPITAL STOCK

Our authorized capital stock consists of 200,000,000 shares of common stock, par value \$.01 per share, and 50,000,000 shares of preferred stock, par value \$.01 per share. The following describes our common stock, preferred stock, certificate of incorporation and bylaws and the rights agreement we have entered into with American Stock Transfer & Trust Company, as rights agent. This description is a summary only. We encourage you to read the complete text of our certificate of incorporation and bylaws and the rights agreement, which we have filed as exhibits to the registration statement of which this prospectus is a part.

Common Stock

Each share of common stock entitles the holder to one vote on all matters on which holders are permitted to vote, including the election of directors. There are no cumulative voting rights. Accordingly, holders of a majority of shares entitled to vote in an election of directors are able to elect all of the directors standing for election.

Subject to preferences that may be applicable to any outstanding preferred stock, the holders of the common stock share equally on a per share basis any dividends when, as and if declared by the board of directors out of funds legally available for that purpose. If we are liquidated, dissolved or wound up, the holders of our common stock will be entitled to a ratable share of any distribution to stockholders, after satisfaction of all of our liabilities and of the prior rights of any outstanding class of our preferred stock. Our common stock carries no preemptive or other subscription rights to purchase shares of our stock and is not convertible, redeemable or assessable or entitled to the benefits of any sinking fund. Our common stock is subject to certain restrictions and limitations on ownership by non-United States citizens. See Certificate of Incorporation and Bylaws Foreign Ownership.

Preferred Stock

Our board of directors has the authority, without stockholder approval, to issue shares of preferred stock from time to time in one or more series and to fix the number of shares and terms of each such series. The board may determine the designation and other terms of each series, including, among others:

dividend rates;

whether dividends will be cumulative or non-cumulative;

redemption rights;

liquidation rights;

sinking fund provisions;

conversion or exchange rights; and

voting rights.

In addition, our preferred stock is subject to certain restrictions and limitations on ownership by non-United States citizens. See Certificate of Incorporation and Bylaws Foreign Ownership.

The issuance of preferred stock, while providing us with flexibility in connection with possible acquisitions and other corporate purposes, could reduce the relative voting power of holders of our common stock. It could also affect the likelihood that holders of our common stock will receive dividend payments and payments upon liquidation.

For purposes of the rights plan described below, our board of directors has designated 2,000,000 shares of preferred stock to constitute the Series A Junior Participating Preferred Stock. For a description of the rights plan, please read Stockholder Rights Plan.

Table of Contents

Index to Financial Statements

The issuance of shares of capital stock, or the issuance of rights to purchase shares of capital stock, could be used to discourage an attempt to obtain control of our company. For example, if, in the exercise of its fiduciary obligations, our board of directors determined that a takeover proposal was not in the best interest of our stockholders, the board could authorize the issuance of preferred stock or common stock without stockholder approval. The shares could be issued in one or more transactions that might prevent or make the completion of the change of control transaction more difficult or costly by:

diluting the voting or other rights of the proposed acquiror or insurgent stockholder group;

creating a substantial voting block in institutional or other hands that might undertake to support the position of the incumbent board;
or

effecting an acquisition that might complicate or preclude the takeover.

In this regard, our certificate of incorporation grants our board of directors broad power to establish the rights and preferences of the authorized and unissued preferred stock. Our board could establish one or more series of preferred stock that entitle holders to:

vote separately as a class on any proposed merger or consolidation;

cast a proportionately larger vote together with our common stock on any transaction or for all purposes;

elect directors having terms of office or voting rights greater than those of other directors;

convert preferred stock into a greater number of shares of our common stock or other securities;

demand redemption at a specified price under prescribed circumstances related to a change of control of our company; or

exercise other rights designed to impede a takeover.

Alternatively, a change of control transaction deemed by the board to be in the best interest of our stockholders could be facilitated by issuing a series of preferred stock having sufficient voting rights to provide a required percentage vote of the stockholders.

Certificate of Incorporation and Bylaws

Election and Removal of Directors

Our board of directors consists of between one and 16 directors, excluding any directors elected by holders of preferred stock pursuant to provisions applicable in the case of defaults. The exact number of directors is fixed from time to time by resolution of the board. Our board of directors is divided into three classes serving staggered three-year terms, with only one class being elected each year by our stockholders. At each annual meeting of stockholders, directors are elected to succeed the class of directors whose terms have expired. This system of electing and removing directors may discourage a third party from making a tender offer or otherwise attempting to obtain control of our company, because it generally makes it more difficult for stockholders to replace a majority of the directors. In addition, no director may be removed except for cause, and directors may be removed for cause by an affirmative vote of shares representing a majority of the shares then entitled to vote at an election of directors. Any vacancy occurring on the board of directors and any newly created directorship may be filled only by a majority of the remaining directors in office.

Stockholder Meetings

Our certificate of incorporation and our bylaws provide that special meetings of our stockholders may be called only by the chairman of our board of directors or a majority of the directors. Our certificate of incorporation and our bylaws specifically deny any power of any other person to call a special meeting.

Table of Contents

Index to Financial Statements

Stockholder Action by Written Consent

Our certificate of incorporation and our bylaws provide that holders of our common stock are not able to act by written consent without a meeting, unless such consent is unanimous.

Amendment of Certificate of Incorporation

The provisions of our certificate of incorporation described above under Election and Removal of Directors, Stockholder Meetings and Stockholder Action by Written Consent may be amended only by the affirmative vote of holders of at least 75% of the voting power of our outstanding shares of voting stock, voting together as a single class. The affirmative vote of holders of at least a majority of the voting power of our outstanding shares of stock will generally be required to amend other provisions of our certificate of incorporation.

Amendment of Bylaws

Our bylaws may generally be altered, amended or repealed, and new bylaws may be adopted, with:

the affirmative vote of a majority of directors present at any regular or special meeting of the board of directors called for that purpose, provided that any alteration, amendment or repeal of, or adoption of any bylaw inconsistent with, specified provisions of the bylaws, including those related to special and annual meetings of stockholders, action of stockholders by written consent, classification of the board of directors, nomination of directors, special meetings of directors, removal of directors, committees of the board of directors and indemnification of directors and officers, requires the affirmative vote of at least 75% of all directors in office at a meeting called for that purpose; or

the affirmative vote of holders of 75% of the voting power of our outstanding shares of voting stock, voting together as a single class.

Other Limitations on Stockholder Actions

Our bylaws also impose some procedural requirements on stockholders who wish to:

make nominations in the election of directors;

propose that a director be removed;

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

propose any repeal or change in our bylaws; or

propose any other business to be brought before an annual or special meeting of stockholders.

Under these procedural requirements, in order to bring a proposal before a meeting of stockholders, a stockholder must deliver timely notice of a proposal pertaining to a proper subject for presentation at the meeting to our corporate secretary along with the following:

a description of the business or nomination to be brought before the meeting and the reasons for conducting such business at the meeting;

the stockholder's name and address;

any material interest of the stockholder in the proposal;

the number of shares beneficially owned by the stockholder and evidence of such ownership; and

the names and addresses of all persons with whom the stockholder is acting in concert and a description of all arrangements and understandings with those persons, and the number of shares such persons beneficially own.

Table of Contents

Index to Financial Statements

To be timely, a stockholder must generally deliver notice:

in connection with an annual meeting of stockholders, not less than 120 nor more than 180 days prior to the date on which the annual meeting of stockholders was held in the immediately preceding year, but in the event that the date of the annual meeting is more than 30 days before or more than 60 days after the anniversary date of the preceding annual meeting of stockholders, a stockholder notice will be timely if received by us not later than the close of business on the later of (1) the 120th day prior to the annual meeting and (2) the 10th day following the day on which we first publicly announce the date of the annual meeting; or

in connection with the election of a director at a special meeting of stockholders, not less than 40 nor more than 60 days prior to the date of the special meeting, but in the event that less than 55 days' notice or prior public disclosure of the date of the special meeting of the stockholders is given or made to the stockholders, a stockholder notice will be timely if received by us not later than the close of business on the 10th day following the day on which a notice of the date of the special meeting was mailed to the stockholders or the public disclosure of that date was made.

In order to submit a nomination for our board of directors, a stockholder must also submit any information with respect to the nominee that we would be required to include in a proxy statement, as well as some other information. If a stockholder fails to follow the required procedures, the stockholder's proposal or nominee will be ineligible and will not be voted on by our stockholders.

Limitation of Liability of Directors and Officers

Our certificate of incorporation provides that no director will be personally liable to us or our stockholders for monetary damages for breach of fiduciary duty as a director, except as required by applicable law, as in effect from time to time. Currently, Delaware law requires that liability be imposed for the following:

any breach of the director's duty of loyalty to our company or our stockholders;

any act or omission not in good faith or which involved intentional misconduct or a knowing violation of law;

unlawful payments of dividends or unlawful stock repurchases or redemptions as provided in Section 174 of the Delaware General Corporation Law; and

any transaction from which the director derived an improper personal benefit.

As a result, neither we nor our stockholders have the right, through stockholders' derivative suits on our behalf, to recover monetary damages against a director for breach of fiduciary duty as a director, including breaches resulting from grossly negligent behavior, except in the situations described above.

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

Our bylaws provide that, to the fullest extent permitted by law, we will indemnify any officer or director of our company against all damages, claims and liabilities arising out of the fact that the person is or was our director or officer, or served any other enterprise at our request as a director, officer, employee, agent or fiduciary. We will reimburse the expenses, including attorneys' fees, incurred by a person indemnified by this provision when we receive an undertaking to repay such amounts if it is ultimately determined that the person is not entitled to be indemnified by us. Amending this provision will not reduce our indemnification obligations relating to actions taken before an amendment. We have entered into indemnification agreements with each of our directors that provide that we will indemnify the indemnitee against, and advance certain expenses relating to, liabilities incurred in the performance of such indemnitee's duties on our behalf to the fullest extent permitted under Delaware law and our bylaws.

Foreign Ownership

In order to continue to enjoy the benefits of U.S. flag registry for our liftboats, we must maintain U.S. citizenship for U.S. coastwise trade purposes as defined in the Merchant Marine Act of 1936, the Shipping Act of 1916 and applicable federal regulations. Under these regulations, to maintain U.S. citizenship and, therefore, be qualified to engage in U.S. coastwise trade:

our president or chief executive officer, our chairman of the board and a majority of a quorum of our board of directors must be U.S. citizens; and

Table of Contents

Index to Financial Statements

at least 75% of the ownership and voting power of each class of our stock must be held by U.S. citizens free of any trust, fiduciary arrangement or other agreement, arrangement or understanding whereby voting power may be exercised directly or indirectly by non-U.S. citizens, as defined in the Merchant Marine Act, the Shipping Act and applicable federal regulations.

In order to protect our ability to register our liftboats under federal law and operate our liftboats in U.S. coastwise trade, our certificate of incorporation contains provisions that limit foreign ownership of our capital stock to a fixed percentage that is equal to 5% less than the percentage that would prevent us from being a U.S. citizen (currently 25%) for purposes of the Merchant Marine Act and the Shipping Act. We refer to the percentage limitation on foreign ownership as the permitted percentage. The permitted percentage is currently 20%.

Our certificate of incorporation provides that:

any transfer, or attempted or purported transfer, of any shares of our capital stock that would result in the ownership or control in excess of the permitted percentage by one or more persons who is not a U.S. citizen for purposes of U.S. coastwise shipping will be void and ineffective as against us; and

if, at any time, persons other than U.S. citizens own shares of our capital stock or possess voting power over any shares of our capital stock, in each case (either of record or beneficially) in excess of the permitted percentage, we may withhold payment of dividends on and suspend the voting rights attributable to such shares.

Certificates representing our common stock may bear legends concerning the restrictions on ownership by persons other than U.S. citizens. In addition, our certificate of incorporation permits us to:

require, as a condition precedent to the transfer of shares of capital stock on our records, representations and other proof as to the identity of existing or prospective stockholders;

establish and maintain a dual stock certificate system under which different forms of certificates may be used to reflect whether the owner thereof is a U.S. citizen; and

redeem any shares held by non-U.S. citizens that exceed the permitted percentage at a price based on the then-current market price of the shares.

Anti-Takeover Effects of Some Provisions

Some provisions of our certificate of incorporation and bylaws could make the following more difficult:

acquisition of control of us by means of a proxy contest or otherwise, or

removal of our incumbent officers and directors.

These provisions, as well as our ability to issue preferred stock, are designed to discourage coercive takeover practices and inadequate takeover bids. These provisions are also designed to encourage persons seeking to acquire control of us to first negotiate with our board of directors. We believe that the benefits of increased protection give us the potential ability to negotiate with the proponent of an unfriendly or unsolicited proposal to acquire or restructure us, and that the benefits of this increased protection outweigh the disadvantages of discouraging those proposals, because negotiation of those proposals could result in an improvement of their terms.

Stockholder Rights Plan

We have adopted a preferred share purchase rights plan. Under the plan, each share of our common stock includes one right to purchase preferred stock. The rights will separate from the common stock and become exercisable (1) ten days after public announcement that a person or group of affiliated or associated persons has

Table of Contents

Index to Financial Statements

acquired, or obtained the right to acquire, beneficial ownership of 15% of our outstanding common stock or (2) ten business days following the start of a tender offer or exchange offer that would result in a person's acquiring beneficial ownership of 15% of our outstanding common stock. A 15% beneficial owner is referred to as an "acquiring person" under the plan. The plan provides that Lime Rock and Greenhill and their respective affiliates will not be acquiring persons under the plan, and therefore, future acquisitions by them would not be subject to the antitakeover effects of the plan.

Our board of directors can elect to delay the separation of the rights from the common stock beyond the ten-day periods referred to above. The plan also confers on our board the discretion to increase or decrease the level of ownership that causes a person to become an acquiring person. Until the rights are separately distributed, the rights will be evidenced by the common stock certificates and will be transferred with and only with the common stock certificates.

After the rights are separately distributed, each right will entitle the holder to purchase from us one one-hundredth of a share of Series A Junior Participating Preferred Stock for a purchase price of \$90.00. The rights will expire at the close of business on the tenth anniversary of the effective date of the agreement, unless we redeem or exchange them earlier as described below.

If a person becomes an acquiring person, the rights will become rights to purchase shares of our common stock for one-half the current market price, as defined in the rights agreement, of the common stock. This occurrence is referred to as a "flip-in event" under the plan. After any flip-in event, all rights that are beneficially owned by an acquiring person, or by certain related parties, will be null and void. Our board of directors will have the power to decide that a particular tender or exchange offer for all outstanding shares of our common stock is fair to and otherwise in the best interests of our stockholders. If the board makes this determination, the purchase of shares under the offer will not be a flip-in event.

If, after there is an acquiring person, we are acquired in a merger or other business combination transaction or 50% or more of our assets, earning power or cash flow are sold or transferred, each holder of a right will have the right to purchase shares of the common stock of the acquiring company at a price of one-half the current market price of that stock. This occurrence is referred to as a "flip-over event" under the plan. An acquiring person will not be entitled to exercise its rights, which will have become void.

Until ten days after the announcement that a person has become an acquiring person, our board of directors may decide to redeem the rights at a price of \$.01 per right, payable in cash, shares of our common stock or other consideration. The rights will not be exercisable after a flip-in event until the rights are no longer redeemable.

At any time after a flip-in event and prior to either a person's becoming the beneficial owner of 50% or more of the shares of our common stock or a flip-over event, our board of directors may decide to exchange the rights for shares of our common stock on a one-for-one basis. Rights owned by an acquiring person, which will have become void, will not be exchanged.

Other than provisions relating to the redemption price of the rights, the rights agreement may be amended by our board of directors at any time that the rights are redeemable. Thereafter, the provisions of the rights agreement other than the redemption price may be amended by the board of directors to cure any ambiguity, defect or inconsistency, to make changes that do not materially adversely affect the interests of holders of rights (excluding the interests of any acquiring person), or to shorten or lengthen any time period under the rights agreement. No amendment to lengthen the time period for redemption may be made if the rights are not redeemable at that time.

The rights have certain anti-takeover effects. The rights will cause substantial dilution to any person or group that attempts to acquire us without the approval of our board of directors. As a result, the overall effect of the rights may be to render more difficult or discourage any attempt to acquire us even if the acquisition may be

Table of Contents

Index to Financial Statements

favorable to the interests of our stockholders. Because the board of directors can redeem the rights or approve a tender or exchange offer, the rights should not interfere with a merger or other business combination approved by the board.

Delaware Business Combination Statute

We have elected to be subject to Section 203 of the Delaware General Corporation Law, which regulates corporate acquisitions. Section 203 prevents an interested stockholder, which is defined generally as a person owning 15% or more of a corporation's voting stock, or any affiliate or associate of that person, from engaging in a broad range of business combinations with the corporation for three years after becoming an interested stockholder unless:

the board of directors of the corporation had previously approved either the business combination or the transaction that resulted in the stockholder's becoming an interested stockholder;

upon completion of the transaction that resulted in the stockholder's becoming an interested stockholder, that person owned at least 85% of the voting stock of the corporation outstanding at the time the transaction commenced, other than statutorily excluded shares; or

following the transaction in which that person became an interested stockholder, the business combination is approved by the board of directors of the corporation and holders of at least two-thirds of the outstanding voting stock not owned by the interested stockholder.

Under Section 203, the restrictions described above also do not apply to specific business combinations proposed by an interested stockholder following the announcement or notification of designated extraordinary transactions involving the corporation and a person who had not been an interested stockholder during the previous three years or who became an interested stockholder with the approval of a majority of the corporation's directors, if such extraordinary transaction is approved or not opposed by a majority of the directors who were directors prior to any person becoming an interested stockholder during the previous three years or were recommended for election or elected to succeed such directors by a majority of such directors.

Section 203 may make it more difficult for a person who would be an interested stockholder to effect various business combinations with a corporation for a three-year period. Section 203 also may have the effect of preventing changes in our management and could make it more difficult to accomplish transactions which our stockholders may otherwise deem to be in their best interests.

Listing of Common Stock

Our common is listed on the NASDAQ National Market under the symbol HERO.

Transfer Agent and Registrar

The transfer agent and registrar for our common stock is American Stock Transfer & Trust Company.

Table of Contents

Index to Financial Statements

SHARES ELIGIBLE FOR FUTURE SALE

After this offering, we will have 31.9 million shares of our common stock outstanding. All of the shares of our common stock sold in this offering will be freely tradable without restriction under the Securities Act, except for any shares that may be acquired by one of our affiliates, as that term is defined in Rule 144 under the Securities Act. Affiliates are individuals or entities that directly, or indirectly through one or more intermediaries, control, are controlled by, or are under common control with, us and may include our directors and officers as well as our significant stockholders.

Upon completion of the offering, approximately 13.2 million shares will be deemed restricted securities as defined in Rule 144, and may not be sold other than through registration under the Securities Act or under an exemption from registration, such as the one provided by Rule 144.

In general, a stockholder subject to Rule 144 who has owned common stock of an issuer for at least one year may, within any three-month period, sell up to the greater of:

1% of the total number of shares of common stock then outstanding; and

the average weekly trading volume of the common stock during the four calendar weeks preceding the filing with the SEC of the stockholder's required notice of sale.

Rule 144 requires stockholders to aggregate their sales with other affiliated stockholders for purposes of complying with this volume limitation. Sales under Rule 144 are also subject to other requirements regarding the manner of sale, notice and availability of current public information about us. A stockholder who has owned common stock for at least two years, and who has not been an affiliate of the issuer for at least 90 days, may sell common stock free from the manner of sale, public information, volume limitation and notice requirements of Rule 144.

Each of our company, our executive officers and directors, the selling stockholders and certain other persons has agreed that, without the prior written consent of Credit Suisse Securities (USA) LLC and Citigroup Global Markets Inc. on behalf of the underwriters, it will not, for a period of 90 days after the date of this prospectus, sell shares of common stock or take other related actions, subject to limited exceptions, all as described under Underwriting. These lock-up agreements cover approximately 13.3 million shares outstanding upon completion of the offering. Credit Suisse Securities (USA) LLC and Citigroup Global Markets Inc. have no current intent or arrangement to release any shares subject to these lock-up agreements. The release of any lock-up will be considered on a case-by-case basis. In considering whether to release any shares, Credit Suisse Securities (USA) LLC and Citigroup Global Markets Inc. would consider the particular circumstances surrounding the request, including the length of time before the lock-up expires, the number of shares requested to be released, the reasons for the request, the possible impact on the market for our common stock, and whether the holder of our shares requesting the release is an officer, director or other affiliate of our company.

In addition, the members of our company prior to the Conversion have registration rights with respect to their shares. See Selling Stockholders.

Table of Contents**Index to Financial Statements****UNDERWRITING**

Under the terms and subject to the conditions contained in an underwriting agreement dated April 11, 2006, we and the selling stockholders have agreed to sell to the underwriters named below, for whom Credit Suisse Securities (USA) LLC and Citigroup Global Markets Inc. are acting as representatives, the following respective numbers of shares of common stock:

Underwriter	Number of Shares
Credit Suisse Securities (USA) LLC	2,616,250
Citigroup Global Markets Inc.	2,616,250
Deutsche Bank Securities Inc.	373,750
Hibernia Southcoast Capital, Inc.	373,750
Howard Weil Incorporated	373,750
Jefferies & Company, Inc.	373,750
Simmons & Company International	373,750
UBS Securities LLC	373,750
Petrie Parkman & Co. Inc.	100,000
Raymond James & Associates, Inc.	100,000
Sterne, Agee & Leach, Inc.	100,000
Morgan Keegan & Company, Inc.	75,000
Johnson Rice & Company, LLC	50,000
Pickering Energy Partners, Inc.	50,000
Calyon Securities (USA) Inc.	25,000
Pritchard Capital Partners, LLC	25,000
Total	8,000,000

The underwriting agreement provides that the underwriters are obligated to purchase all the shares of common stock in this offering if any are purchased, other than those shares covered by the over-allotment option described below. The underwriting agreement also provides that if an underwriter defaults the purchase commitments of the non-defaulting underwriters may be increased, subject to certain limitations, or this offering may be terminated.

The selling stockholders have granted to the underwriters a 30-day option to purchase on a pro rata basis up to 1,200,000 additional outstanding shares from the selling stockholders at the price to public set forth on the cover page of this prospectus less the underwriting discounts and commissions. The option may be exercised only to cover any over-allotments of common stock.

The underwriters propose to offer the shares of common stock at the price to public set forth on the cover page of this prospectus, and to selling group members at that price less a selling concession of \$0.972 per share. The underwriters and selling group members may allow a discount of \$0.100 per share on sales to other broker/dealers. After the initial offering of the shares to the public, the representatives may change the public offering price and concession and discount to broker/dealers.

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

The following table summarizes the compensation and estimated expenses we and the selling stockholders will pay:

	Per Share		Total	
	Without	With	Without	With
	Over-allotment	Over-allotment	Over-allotment	Over-allotment
Underwriting Discounts and Commissions paid by us	\$ 1.620	\$ 1.620	\$ 2,592,000	\$ 2,592,000
Expenses payable by us	\$ 0.469	\$ 0.469	\$ 750,000	\$ 750,000
Underwriting Discounts and Commissions paid by selling stockholders	\$ 1.620	\$ 1.620	\$ 10,368,000	\$ 12,312,000
Expenses payable by selling stockholders				

Table of Contents

Index to Financial Statements

We estimate that our out-of-pocket expenses for this offering will be approximately \$750,000.

The representatives have informed us that the underwriters do not expect sales to accounts over which the underwriters have discretionary authority to exceed 5% of the shares of common stock being offered.

We have agreed that we will not offer, sell, contract to sell, pledge or otherwise dispose of, directly or indirectly, or file with the Securities and Exchange Commission a registration statement under the Securities Act relating to, any shares of our common stock or securities convertible into or exchangeable or exercisable for any shares of our common stock, or publicly disclose the intention to make any offer, sale, pledge, disposition or filing, without the prior written consent of Credit Suisse Securities (USA) LLC and Citigroup Global Markets Inc. for a period of 90 days after the date of this prospectus, except with respect to common stock issued or issuable pursuant to stock options outstanding on the date of this prospectus and common stock and other stock-based awards issued or issuable pursuant to our 2004 long-term incentive plan. However, in the event that either (1) during the last 17 days of the lock-up period, we release earnings results or material news or a material event relating to us occurs or (2) prior to the expiration of the lock-up period, we announce that we will release earnings results during the 16-day period beginning on the last day of the lock-up period, then in either case the expiration of the lock-up will be extended until the expiration of the 18-day period beginning on the date of the release of the earnings results or the occurrence of the material news or event, as applicable, unless Credit Suisse Securities (USA) LLC and Citigroup Global Markets Inc. waive, in writing, such an extension.

Our officers and directors, the selling stockholders and certain other persons have agreed that they will not offer, sell, contract to sell, pledge or otherwise dispose of, directly or indirectly, any shares of our common stock or securities convertible into or exchangeable or exercisable for any shares of our common stock, enter into a transaction that would have the same effect, or enter into any swap, hedge or other arrangement that transfers, in whole or in part, any of the economic consequences of ownership of our common stock, whether any of these transactions are to be settled by delivery of our common stock or other securities, in cash or otherwise, or publicly disclose the intention to make any offer, sale, pledge or disposition, or to enter into any transaction, swap, hedge or other arrangement, without, in each case, the prior written consent of Credit Suisse Securities (USA) LLC and Citigroup Global Markets Inc. for a period of 90 days after the date of this prospectus. However, in the event that either (1) during the last 17 days of the lock-up period, we release earnings results or material news or a material event relating to us occurs or (2) prior to the expiration of the lock-up period, we announce that we will release earnings results during the 16-day period beginning on the last day of the lock-up period, then in either case the expiration of the lock-up will be extended until the expiration of the 18-day period beginning on the date of the release of the earnings results or the occurrence of the material news or event, as applicable, unless Credit Suisse Securities (USA) LLC and Citigroup Global Markets Inc. waive, in writing, such an extension.

We and the selling stockholders have agreed to indemnify the underwriters against liabilities under the Securities Act, or contribute to payments that the underwriters may be required to make in that respect.

Our common stock is listed on the NASDAQ National Market.

Some of the underwriters and their affiliates have engaged in transactions with, and performed commercial and investment banking financial advisor or lending services for, us and our affiliates from time to time, for which they have received customary compensation and may do so in the future. Affiliates of Credit Suisse Securities (USA) LLC and Citigroup Global Markets Inc. are arrangers and agents under our credit facility and receive fees customary for performing these services and interest on such. In addition, affiliates of Citigroup Global Markets Inc., Hibernia Southcoast Capital, Inc. and UBS Securities LLC are lenders under our credit facility, a portion of which may be repaid with the net proceeds from this offering. See Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources Liquidity and Financing Arrangements Debt.

Table of Contents

Index to Financial Statements

In connection with the offering the underwriters may engage in stabilizing transactions, over-allotment transactions, syndicate covering transactions and penalty bids in accordance with Regulation M under the Securities Exchange Act of 1934 (the Exchange Act).

Stabilizing transactions permit bids to purchase the underlying security so long as the stabilizing bids do not exceed a specified maximum.

Over-allotment involves sales by the underwriters of shares in excess of the number of shares the underwriters are obligated to purchase, which creates a syndicate short position. The short position may be either a covered short position or a naked short position. In a covered short position, the number of shares over-allotted by the underwriters is not greater than the number of shares that they may purchase in the over-allotment option. In a naked short position, the number of shares involved is greater than the number of shares in the over-allotment option. The underwriters may close out any covered short position by either exercising their over-allotment option and/or purchasing shares in the open market.

Syndicate covering transactions involve purchases of the common stock in the open market after the distribution has been completed in order to cover syndicate short positions. In determining the source of shares to close out the short position, the underwriters will consider, among other things, the price of shares available for purchase in the open market as compared to the price at which they may purchase shares through the over-allotment option. If the underwriters sell more shares than could be covered by the over-allotment option, a naked short position, the position can only be closed out by buying shares in the open market. A naked short position is more likely to be created if the underwriters are concerned that there could be downward pressure on the price of the shares in the open market after pricing that could adversely affect investors who purchase in the offering.

Penalty bids permit the representatives to reclaim a selling concession from a syndicate member when the common stock originally sold by the syndicate member is purchased in a stabilizing or syndicate covering transaction to cover syndicate short positions.

These stabilizing transactions, syndicate covering transactions and penalty bids may have the effect of raising or maintaining the market price of our common stock or preventing or retarding a decline in the market price of the common stock. As a result, the price of our common stock may be higher than the price that might otherwise exist in the open market. These transactions may be effected on the NASDAQ National Market or otherwise and, if commenced, may be discontinued at any time.

A prospectus in electronic format may be made available on the web sites maintained by one or more of the underwriters, or selling group members, if any, participating in this offering and one or more of the underwriters participating in this offering may distribute prospectuses electronically. The representatives may agree to allocate a number of shares to underwriters and selling group members for sale to their online brokerage account holders. Internet distributions will be allocated by the underwriters and selling group members that will make Internet distributions on the same basis as other allocations.

In relation to each Member State of the European Economic Area which has implemented the Prospectus Directive (each, a Relevant Member State), each underwriter represents and agrees that with effect from and including the date on which the Prospectus Directive is implemented in that Relevant Member State (the Relevant Implementation Date) it has not made and will not make an offer of shares to the public in that Relevant Member State prior to the publication of a prospectus in relation to the shares which has been approved by the competent authority in that Relevant Member State or, where appropriate, approved in another Relevant Member State and notified to the competent authority in that Relevant Member State, all in accordance with the Prospectus Directive, except that it may, with effect from and including the Relevant Implementation Date, make an offer of shares to the public in that Relevant Member State at any time:

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

(a) to legal entities which are authorized or regulated to operate in the financial markets or, if not so authorized or regulated, whose corporate purpose is solely to invest in securities;

Table of Contents

Index to Financial Statements

(b) to any legal entity which has two or more of (1) an average of at least 250 employees during the last financial year; (2) a total balance sheet of more than £43,000,000 and (3) an annual net turnover of more than £50,000,000, as shown in its last annual or consolidated accounts;

(c) to fewer than 100 natural or legal persons (other than qualified investors as defined in the Prospectus Directive) subject to obtaining the prior consent of the manager for any such offer; or

(d) in any other circumstances which do not require the publication by us of a prospectus pursuant to Article 3 of the Prospectus Directive.

For the purposes of this provision, the expression "an offer of shares to the public" in relation to any shares in any Relevant Member State means the communication in any form and by any means of sufficient information on the terms of the offer and the shares to be offered so as to enable an investor to decide to purchase or subscribe the shares, as the same may be varied in that Member State by any measure implementing the Prospectus Directive in that Member State, and the term "Prospectus Directive" means Directive 2003/71/EC and includes any relevant implementing measure in each Relevant Member State.

NOTICE TO CANADIAN RESIDENTS

Resale Restrictions

The distribution of our common stock in Canada is being made only on a private placement basis exempt from the requirement that we prepare and file a prospectus with the securities regulatory authorities in each province where trades of common stock are made. Any resale of the common stock in Canada must be made under applicable securities laws which will vary depending on the relevant jurisdiction, and which may require resales to be made under available statutory exemptions or under a discretionary exemption granted by the applicable Canadian securities regulatory authority. Purchasers are advised to seek legal advice prior to any resale of the common stock.

Representations of Purchasers

By purchasing common stock in Canada and accepting a purchase confirmation a purchaser is representing to us and the dealer from whom the purchase confirmation is received that:

the purchaser is entitled under applicable provincial securities laws to purchase the common stock without the benefit of a prospectus qualified under those securities laws,

where required by law, that the purchaser is purchasing as principal and not as agent,

the purchaser has reviewed the text above under Resale Restrictions, and

the purchaser acknowledges and consents to the provision of specified information concerning its purchase of the common stock to the regulatory authority that by law is entitled to collect the information.

Rights of Action Ontario Purchasers Only

Under Ontario securities legislation, certain purchasers who purchases a security offered by this prospectus during the period of distribution will have a statutory right of action for damages, or while still the owner of the common stock, for rescission against us in the event that this prospectus contains a misrepresentation without regard to whether the purchaser relied on the misrepresentation. The right of action for damages is exercisable not later than the earlier of 180 days from the date the purchaser first had knowledge of the facts giving rise to the cause of action and three years from the date on which payment is made for the common stock. The right of action for rescission is exercisable not later than 180 days from the date on which payment is made for the common stock. If a purchaser elects to exercise the right of action for rescission, the purchaser will have no right of action for damages against us. In no case will the amount recoverable in any action exceed the price at which the common stock was offered to the purchaser and if the purchaser is shown to have purchased the securities with knowledge of the misrepresentation, we will have no liability. In the case of an action for damages, we will not be liable for all or any portion of the damages that are proven to not represent the depreciation in value of the common stock as a result of the misrepresentation relied upon. These rights are in

addition to, and without derogation from, any other rights or remedies available at law to an Ontario purchaser. The foregoing is a summary of the rights available to an Ontario purchaser. Ontario purchasers should refer to the complete text of the relevant statutory provisions.

Enforcement of Legal Rights

All of our directors and officers as well as the experts named herein may be located outside of Canada and, as a result, it may not be possible for Canadian purchasers to effect service of process within Canada upon us or those persons. All or a substantial portion of our assets and the assets of those persons may be located outside of Canada and, as a result, it may not be possible to satisfy a judgment against us or those persons in Canada or to enforce a judgment obtained in Canadian courts against us or those persons outside of Canada.

Taxation and Eligibility for Investment

Canadian purchasers of common stock should consult their own legal and tax advisors with respect to the tax consequences of an investment in the common stock in their particular circumstances and about the eligibility of the common stock for investment by the purchaser under relevant Canadian legislation.

MATERIAL UNITED STATES FEDERAL TAX CONSIDERATIONS FOR NON-U.S. HOLDERS

The following is a summary of material United States federal income and estate tax considerations applicable to non-U.S. holders relating to the purchase, ownership and disposition of our common stock, which does not purport to be a complete analysis of all the potential tax considerations relating thereto. The rules governing the United States federal income and estate taxation of non-U.S. holders are complex, and no attempt will be made in this prospectus to provide more than a summary of certain of those rules. This summary is based on the Internal Revenue Code of 1986, as amended, Treasury regulations, rulings and pronouncements of the Internal Revenue Service, and judicial decisions as of the date of this prospectus. These authorities may be changed, perhaps retroactively, so as to result in United States federal income and estate tax consequences different from those described in this summary. We have not sought any ruling from the IRS with respect to the statements made and conclusions reached in this summary, and there can be no assurance that the IRS will agree with these statements and conclusions.

This summary is addressed only to persons who are non-U.S. holders who hold our common stock as a capital asset. As used in this discussion, non-U.S. holder means a beneficial owner of our common stock that for United States federal income tax purposes is not:

an individual who is a citizen or resident of the United States;

a partnership, or any other entity treated as a partnership for United States federal income tax purposes;

a corporation, or any other entity taxable as a corporation for United States federal income tax purposes, created or organized in or under the laws of the United States, any state thereof or the District of Columbia;

an estate whose income is subject to United States federal income taxation regardless of its source; or

a trust (1) if it is subject to the primary supervision of a court within the United States and one or more United States persons have the authority to control all substantial decisions of the trust or (2) that has a valid election in effect under applicable Treasury regulations to be treated as a United States person.

An individual is treated as a resident of the United States in any calendar year for United States federal income tax purposes if the individual is present in the United States for at least 31 days in that calendar year and for an aggregate of at least 183 days during the three-year period ending on the last day of the current calendar year. For purposes of the 183-day calculation, all of the days present in the current year, one-third of the days present in the immediately preceding year and one-sixth of the days present in the second preceding year are counted. Residents are taxed for United States federal income tax purposes as if they were United States citizens.

This summary does not address the tax considerations arising under the laws of any foreign, state or local jurisdiction or the effect of any tax treaty. In addition, this discussion does not address tax considerations that are the result of a holder's particular circumstances or of special rules, such as those that apply to holders subject to the alternative minimum tax, financial institutions, tax-exempt organizations, insurance companies, dealers or traders in securities or commodities, regulated investment companies, real estate investment trusts, certain former citizens or former long-term residents of the United States, or persons who will hold our common stock as a position in a hedging transaction, straddle or conversion transaction. If a partnership (or any other entity treated as a partnership for United States federal income tax purposes) holds our common stock, then the United States federal income tax treatment of a partner will generally depend on the status of the partner and the

activities of the partnership. Such a partner is encouraged to consult its tax advisor as to its consequences.

THIS DISCUSSION DOES NOT CONSTITUTE LEGAL ADVICE TO ANY PROSPECTIVE PURCHASER OF OUR COMMON STOCK. INVESTORS CONSIDERING THE PURCHASE OF OUR COMMON STOCK ARE ENCOURAGED TO CONSULT THEIR OWN TAX ADVISORS WITH RESPECT TO THE APPLICATION OF THE UNITED STATES FEDERAL TAX LAWS TO THEIR PARTICULAR SITUATIONS AS WELL AS TO ANY TAX CONSEQUENCES ARISING UNDER THE LAWS OF ANY OTHER TAXING JURISDICTION OR UNDER ANY APPLICABLE TAX TREATY.

Table of Contents

Index to Financial Statements

Distributions on Our Common Stock

Distributions on our common stock will constitute dividends for United States federal income tax purposes to the extent paid from our current or accumulated earnings and profits, as determined under United States federal income tax principles. To the extent not paid from our current or accumulated earnings and profits, distributions on our common stock will constitute a return of capital and will first be applied against and reduce a holder's adjusted basis in our common stock, but not below zero, and then the excess, if any, will be treated as gain from the sale of common stock.

Dividends paid on our common stock to a non-U.S. holder generally will be subject to withholding of United States federal income tax at a 30% rate or a lower rate specified by an applicable treaty. However, dividends that are effectively connected with the conduct of a trade or business within the United States by the non-U.S. holder (and, where a tax treaty applies, are attributable to a United States permanent establishment of the non-U.S. holder) are not subject to the withholding tax, provided certain certification and disclosure requirements are satisfied. Instead, such dividends are subject to United States federal income tax on a net income basis in the same manner as if the non-U.S. holder were a United States person as defined under the Internal Revenue Code. Any such effectively connected dividends received by a foreign corporation may be subject to an additional branch profits tax at a 30% rate or a lower rate specified by an applicable treaty.

A non-U.S. holder of our common stock who wishes to claim the benefit of an applicable treaty rate and avoid backup withholding, as discussed below, for dividends will generally be required to complete IRS Form W-8BEN (or valid substitute or successor form) and certify under penalties of perjury that such holder is not a United States person as defined under the Internal Revenue Code. Special certification and other requirements apply to certain non-U.S. holders that are pass-through entities and to non-U.S. holders whose stock is held through certain foreign intermediaries.

A non-U.S. holder of our common stock eligible for a reduced rate of United States withholding tax pursuant to a treaty may obtain a refund or credit of any excess amounts withheld by timely filing an appropriate claim with the IRS.

Dispositions of Our Common Stock

A non-U.S. holder will generally not be subject to United States federal income tax on any gain realized on the sale, exchange, redemption, retirement or other disposition of our common stock unless:

the gain is effectively connected with the conduct of a trade or business in the United States (and, where a tax treaty applies, is attributable to a United States permanent establishment of the non-U.S. holder); in these cases, the non-U.S. holder will be subject to tax on the net gain derived from the disposition in the same manner as if the non-U.S. holder were a United States person as defined in the Internal Revenue Code, and if the non-U.S. holder is a foreign corporation, it may be subject to the additional branch profits tax at a 30% rate or a lower rate specified by an applicable treaty;

the non-U.S. holder is an individual present in the United States for 183 days or more in the taxable year in which the disposition occurs and certain other conditions are met; in these cases, the individual non-U.S. holder will be subject to a flat 30% tax on the gain derived from the disposition, which tax may be offset by United States source capital losses, even though the individual is not

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

considered a resident of the United States; or

we are or have been a United States real property holding corporation for United States federal income tax purposes at any time during the shorter of the non-U.S. holder's holding period for our common stock and the five year period ending on the date of disposition.

We are not currently and do not anticipate becoming a United States real property holding corporation for United States federal income tax purposes. If we become a United States real property holding corporation, a non-U.S. holder may, in certain circumstances, be subject to United States federal income tax on the disposition of our common stock.

Table of Contents

Index to Financial Statements

Certain United States Federal Estate Tax Considerations

Our common stock beneficially owned by an individual who is not a citizen or resident of the United States (as defined for United States federal estate tax purposes) at the time of death will generally be includable in the decedent's gross estate for United States federal estate tax purposes, unless an applicable treaty provides otherwise.

Information Reporting and Backup Withholding

Dividends paid to a non-U.S. holder may be subject to information reporting and United States backup withholding. A non-U.S. holder will be exempt from backup withholding if such non-U.S. holder properly provides IRS Form W-8BEN (or valid substitute or successor form) certifying that such stockholder is a non-U.S. person or otherwise meets documentary evidence requirements for establishing that such stockholder is a non-U.S. person or otherwise qualifies for an exemption.

The gross proceeds from the disposition of our common stock may be subject to information reporting and backup withholding. If a non-U.S. holder sells its common stock outside the United States through a non-U.S. office of a non-U.S. broker and the sales proceeds are paid to such stockholder outside the United States, then the United States backup withholding and information reporting requirements generally will not apply to that payment. However, United States information reporting will generally apply to a payment of sale proceeds, even if that payment is made outside the United States, if a non-U.S. holder sells our common stock through a non-U.S. office of a broker that:

is a United States person for United States tax purposes;

derives 50% or more of its gross income in specific periods from the conduct of a trade or business in the United States;

is a controlled foreign corporation for United States tax purposes; or

is a foreign partnership, if at any time during its tax year (1) one or more of its partners are United States persons who in the aggregate hold more than 50% of the income or capital interests in the partnership; or (2) the foreign partnership is engaged in a United States trade or business,

unless the broker has documentary evidence in its files that the non-U.S. holder is a non-U.S. person and certain other conditions are met, or the non-U.S. holder otherwise establishes an exemption. In such circumstances, backup withholding will not apply unless the broker has actual knowledge or reason to know that the seller is not a non-U.S. holder.

If a non-U.S. holder receives payments of the proceeds of a sale of our common stock to or through a United States office of a broker, the payment is subject to both United States backup withholding and information reporting unless such non-U.S. holder properly provides IRS Form W-8BEN (or valid substitute or successor form) certifying that such stockholder is a non-U.S. person or otherwise establishes an exemption.

A non-U.S. holder generally may obtain a refund of any amounts withheld under the backup withholding rules that exceed such stockholder's United States tax liability by timely filing a properly completed claim for refund with the IRS.

LEGAL MATTERS

Certain legal matters in connection with this offering will be passed upon for us by Baker Botts L.L.P., Houston, Texas, for the selling stockholders by Fulbright & Jaworski L.L.P., Houston, Texas, and for the underwriters by Vinson & Elkins L.L.P., Houston, Texas.

EXPERTS

The consolidated balance sheet of Hercules Offshore, Inc. and its subsidiaries as of December 31, 2004 and 2005 and the related consolidated statements of operations, comprehensive income, stockholders' equity and cash flows for the period from inception (July 27, 2004) to December 31, 2004 and for the year ended December 31, 2005 have been audited by Grant Thornton LLP, independent registered public accounting firm, given on the authority of said firm as experts in accounting and auditing.

WHERE YOU CAN FIND MORE INFORMATION

We have filed with the SEC a registration statement on Form S-1 under the Securities Act with respect to the shares of common stock offered by this prospectus. In this prospectus we refer to that registration statement, together with all amendments, exhibits and schedules to that registration statement, as the registration statement.

As is permitted by the rules and regulations of the SEC, this prospectus, which is part of the registration statement, omits some information, exhibits, schedules and undertakings set forth in the registration statement. For further information with respect to us, and the securities offered by this prospectus, please refer to the registration statement.

We are required to file current, quarterly and annual reports, proxy statements and other information with the SEC. You may read and copy those reports, proxy statements and other information at the public reference facility maintained by the SEC at 100 F Street, N.E., Washington, D.C. 20549. Copies of this material may also be obtained from the Public Reference Room of the SEC at 100 F Street, N.E., Washington, D.C. 20549 at prescribed rates. Information on the operation of the Public Reference Room may be obtained by calling the SEC at (800) 732-0330. The SEC maintains a Web site at <http://www.sec.gov> that contains reports, proxy and information statements and other information regarding registrants that make electronic filings with the SEC using its EDGAR system.

The SEC allows us to incorporate by reference the information we have filed with it, which means that we can disclose important information to you by referring you to those documents. The information we incorporate by reference is an important part of this prospectus. We incorporate by reference the documents listed below:

our annual report on Form 10-K for the year ended December 31, 2005, as filed with the SEC on March 9, 2006;

our proxy statement for our annual meeting of stockholders, as filed with the SEC on March 24, 2006; and

our current reports on Form 8-K as filed with the SEC on January 30, 2006, March 2, 2006, April 4, 2006 and April 7, 2006.

We will provide to each person, including any beneficial owner, to whom a prospectus is delivered a copy of these filings, other than an exhibit to these filings unless we have specifically incorporated that exhibit by reference into the filing, upon written or oral request and at no cost.

Board of Directors

Hercules Offshore, Inc.

We have audited the accompanying consolidated balance sheets of Hercules Offshore, Inc. and subsidiaries as of December 31, 2005 and 2004, and the related consolidated statements of operations, comprehensive income, stockholders' equity and cash flows for the year ended December 31, 2005 and for the period from July 27, 2004 (inception) to December 31, 2004. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Hercules Offshore, Inc. and subsidiaries as of December 31, 2005 and 2004, and the results of their operations and their cash flows for the year ended December 31, 2005 and the period from July 27, 2004 (inception) to December 31, 2004, in conformity with accounting principles generally accepted in the United States of America.

/s/ GRANT THORNTON LLP

HERCULES OFFSHORE, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 NATURE OF BUSINESS AND SIGNIFICANT ACCOUNTING POLICIES

Organization

Hercules Offshore, LLC was formed in July 2004 as a Delaware limited liability company. On November 1, 2005 in connection with its initial public offering, Hercules Offshore, LLC was converted to a Delaware corporation named Hercules Offshore, Inc. (the Conversion). Upon the Conversion, each outstanding membership unit of the limited liability company was converted into 350 shares of common stock of the corporation. Unless the context indicates otherwise, references to the Company are to Hercules Offshore, LLC for periods prior to the Conversion and to Hercules Offshore, Inc. for periods after the Conversion.

The Company provides shallow-water drilling and liftboat services to the oil and gas exploration and production industry in the U.S. Gulf of Mexico and international markets through its Contract Drilling Services, Domestic Marine Services and International Marine Services segments. The Company owns one platform rig, ten jackup drilling rigs and 46 liftboat vessels. One of the jackup rigs was severely damaged in a hurricane and is likely to be declared a constructive total loss. (see NOTE 13)

For the period from inception (July 27, 2004) to December 31, 2004 (period from inception to December 31, 2004), the Company owned five jackup drilling rigs and four platform rigs that were purchased on August 2, 2004 for \$39,250,000. The consolidated results of operations for the period from inception to December 31, 2004 include the operation during such period of those five jackup rigs. Three of the four platform rigs were sold in November 2004 and the fourth was classified as an asset held for sale as of December 31, 2005 (see Assets Held for Sale). Also included in the consolidated results of operations for the period from inception to December 31, 2004 is a fleet of 22 liftboats acquired from Global Industries, Ltd. (Global) for \$53,500,000 in addition to an operating facility in New Iberia, Louisiana. Following the purchase of the liftboats from Global, Global had performed invoicing and other administrative functions for the Company under a transition services agreement until the Company could assume these functions.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. All intercompany account balances and transactions have been eliminated.

Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, demand deposits with banks and all highly liquid investments with original maturities of three months or less.

Revenue Recognition

Revenue generated from the operation of the Company's drilling rigs and liftboats is recognized under dayrate contracts as services are performed. Certain contracts include provisions for the recovery of direct costs, including mobilization and demobilization costs, extra labor and extra catering. Under most of its liftboat contracts, the Company receives a variable rate for reimbursement of costs such as catering, fuel, oil, rental equipment, crane overtime and other items. Revenue for recovery of these costs is recognized when the costs are incurred. For certain Contract Drilling Services contracts, the Company may receive lump-sum fees for the mobilization of equipment and personnel. Mobilization fees received and costs incurred to mobilize a rig from one market to another under contracts longer than one month are recognized over the term of the related drilling contract.

Table of Contents**Index to Financial Statements**

The Company records reimbursements from customers for out-of-pocket expenses as revenues and the related cost as direct operating expenses. Total revenues from such reimbursements included \$4,627,525 and \$892,700 for the year ended December 31, 2005 and the period from inception to December 31, 2004, respectively.

Supplemental Cash Flow Information

	Year Ended December 31, 2005	Period from inception to December 31, 2004

Interest	\$ 7,688	\$ 1,484
Income taxes	\$	\$
Non-cash financing activity:		
Accrued distribution	\$ 3,732	\$

Stock-Based Compensation

Stock-based compensation arrangements are accounted for using the intrinsic value method as prescribed in Accounting Principles Board Opinion No. 25 Accounting for Stock Issued to Employees (APB Opinion 25) and related interpretations. Accordingly, compensation cost for options granted to employees is measured as the excess, if any, of the fair value of shares at the date of grant over the exercise price an employee must pay to acquire the shares. No compensation cost has been recognized in the accompanying consolidated financial statements related to stock option awards.

In December 2004, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 123 (revised 2004) Share-Based Payment (SFAS No. 123R), which replaces SFAS No. 123, Accounting for Stock-Based Compensation and supersedes APB Opinion 25. SFAS No. 123R requires all share-based payments to employees, including grants of employee stock options, to be recognized in the financial statements based on the fair values beginning with the first interim period in fiscal year 2006, with early adoption encouraged. The pro forma disclosures previously permitted under SFAS No. 123 no longer will be an alternative to financial statement recognition.

The Company adopted SFAS No. 123R on January 1, 2006 using the modified prospective method in which compensation cost is recognized beginning with the effective date (a) based on the requirements of SFAS No. 123R for all share-based payments granted after January 1, 2006 and (b) on the requirements of SFAS No. 123 for all awards granted to employees prior to January 1, 2006 that remain unvested on January 1, 2006. The Company is estimating that the cost relating to stock options granted through 2005 will be \$2,278,631 for the year ended December 31, 2006 and \$4,177,490 over the remaining vesting period; however, due to the uncertainty of the level of share-based payments to be granted in the future, these amounts are estimates and subject to change.

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

The Company's 2004 Long-Term Incentive Plan (the 2004 Plan) provides for the granting of stock options, restricted stock, performance stock awards and other stock-based awards to selected employees and non-employee directors of the Company. At December 31, 2005, 540,500 shares were available for grant or award under the 2004 Plan. The Nominating, Governance and Compensation Committee of the Company's Board of Directors selects participants from time to time and, subject to the terms and conditions of the 2004 Plan, determines all terms and conditions of awards. Options granted prior to the Company's initial public offering on November 1, 2005 became fully vested at that date. Options issued at the time of and after the Company's initial public offering under the 2004 Plan have a 10-year term and vest in four equal installments, one-fourth on the effective date of grant and one-fourth thereafter on the anniversary of the grant date for the next three years.

F-9

Table of Contents

Index to Financial Statements

The following table summarizes stock option activity under the 2004 Plan:

	Year Ended		Period from inception to	
	December 31, 2005		December 31, 2004	
	Number of Shares Underlying Options	Weighted Average Exercise Price	Number of Shares Underlying Options	Weighted Average Exercise Price
Outstanding at beginning of year		\$		\$
Granted	1,839,500	11.38		
Exercised				
Forfeited				
Outstanding at end of year	1,839,500	\$ 11.38		\$
Exercisable at end of year	1,168,625	\$ 6.44		\$

The following table summarizes information about stock options outstanding at December 31, 2005:

	Options Outstanding			Options Exercisable	
	Number Outstanding	Weighted Average Remaining Life (Years)	Weighted Average Exercise Price	Number Exercisable	Weighted Average Exercise Price
Exercise Prices					
\$2.86	822,500	8.83	\$ 2.86	822,500	\$ 2.86
5.71	122,500	9.33	5.71	122,500	5.71
20.00	894,500	9.83	20.00	223,625	20.00
	1,839,500	9.35	\$ 11.38	1,168,625	\$ 6.44

The following table reflects pro forma net income and earnings per share had we elected to adopt the fair value approach of SFAS No. 123R (dollars in thousands):

Year Ended	Period from inception to
December 31, 2005	

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

		<u>December 31, 2004</u>
Net income-as reported	\$ 27,456	\$ 8,065
Compensation expense, net of tax, as reported	51	
Compensation expense, net of tax, pro forma	(1,752)	
	<u>25,755</u>	<u>8,065</u>
Net income-pro forma	\$	\$
	<u>25,755</u>	<u>8,065</u>
Earnings per share:		
Basic-as reported	\$ 1.10	\$ 0.55
Basic-pro forma	\$ 1.03	\$ 0.55
Diluted-as reported	\$ 1.08	\$ 0.55
Diluted-pro forma	\$ 1.01	\$ 0.55

The above pro forma amounts are not indicative of future results. The fair value of the options granted under the 2004 Plan at the time of and after the Company's initial public offering was estimated on the date of grant using the Trinomial Lattice option pricing model with the following assumptions used:

	Year Ended	Period from inception to
	December 31, 2005	December 31, 2004
Dividend yield		
Expected price volatility	35.00%	
Risk-free interest rate	4.40%	
Expected life of options in years	8.08	
Weighted-average fair value of options granted	\$ 9.45	

Table of Contents

Index to Financial Statements

In October 2005, we awarded an employee 70,000 restricted shares that vest one-third per year over a three-year period commencing on the first anniversary date of the award.

Allowance for Doubtful Accounts

Management of the Company monitors the accounts receivable from its customers for any collectability issues. An allowance for doubtful accounts is established based on reviews of individual customer accounts, recent loss experience, current economic conditions, and other pertinent factors. Accounts deemed uncollectable are charged to the allowance. During the period from inception to December 31, 2004, the Company recorded a provision for bad debts of \$519,165. During the second quarter of 2005, the Company recorded an additional provision for bad debts of \$318,967. The Company received payment for the full amount of the receivable of \$838,132 during September 2005, and the allowance was reversed. There was no allowance at December 31, 2005.

Deposits

Deposits at December 31, 2004 include \$2,000,000 placed in escrow for the purchase of the jackup drilling rig, *Rig 25*. The purchase was consummated in January 2005 and the deposit was applied to the purchase price. There were no material deposits at December 31, 2005.

Prepaid Expenses and Other Current Assets

Prepaid expenses and other current assets consist of claims receivable, prepaid insurance and other. Claims receivable include amounts the Company has incurred related to insurance claims the Company will file under its insurance policies related to Hurricanes Katrina and Rita to repair damage sustained by *Rig 21*, the salvage costs for *Rig 25* and costs related to the clean-up efforts at the Company's New Iberia facilities. At December 31, 2005, \$5,919,308 was outstanding for claims receivable related to Hurricanes Katrina and Rita. There were no claims receivable at December 31, 2004. At December 31, 2005 and December 31, 2004, prepaid insurance totaled \$6,101,284 and \$2,299,956, respectively.

Property and Equipment

Property and equipment are stated at cost, less accumulated depreciation. Expenditures for property and equipment and items that substantially increase the useful lives of existing assets are capitalized at cost and depreciated. Routine expenditures for repairs and maintenance are expensed as incurred, except for expenditures for drydocking the Company's liftboats. Drydock costs are capitalized at cost in other non-current assets on the consolidated balance sheet and amortized on the straight-line method over a period of 12 to 24 months (see below). Depreciation is computed using the straight-line method over the useful lives of the assets. Amortization of leasehold improvements is computed utilizing the straight-line method over the life of the lease.

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

The useful lives of property and equipment for the purposes of computing depreciation are as follows:

	<u>Years</u>
Drilling rigs and marine equipment	15
Drilling machinery and equipment	3
Furniture and fixtures	5
Computer equipment	3
Automobiles and trucks	3
Building	20

Assets Held for Sale

Assets are classified as held for sale when the Company has a plan for disposal and those assets meet the held for sale criteria of SFAS No. 144, Accounting for Impairment or Disposal of Long-Lived Assets . During

F-11

Table of Contents**Index to Financial Statements**

the first quarter of 2005, the Company's Contract Drilling Services segment committed to a plan to sell *Rig 41*, a platform rig, in connection with the Company's efforts to dispose of certain non-strategic assets. The rig has been idle since being acquired on August 2, 2004. The rig was classified as an asset held for sale in March 2005. The estimated fair value of the rig less its selling costs exceeded the rig's carrying value of approximately \$2,000,000 at December 31, 2005 and, as such, no loss has been recognized for the year ended December 31, 2005. The Company entered into a definitive agreement to sell the *Rig 41* in October 2005 and received a deposit of \$181,250. The buyer terminated the agreement in December 2005 and the Company recorded the deposit to other income on the consolidated statement of operations. The Company believes that *Rig 41* continues to meet the criteria of SFAS No. 144, Accounting for Impairment or Disposal of Long-Lived Assets and the rig continues to be classified as an asset held for sale at December 31, 2005. During the second quarter of 2005, the Company's Domestic Marine Services segment committed to a plan to sell the *Moonfish*, a liftboat, in connection with the Company's effort to dispose of certain non-strategic assets. The liftboat had been idle since being acquired on June 1, 2005. The *Moonfish* was sold in August 2005. No gain or loss was recognized on the transaction.

Impairment of Long-Lived Assets

The carrying value of long-lived assets, principally property and equipment, is reviewed for potential impairment when events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. For property and equipment held for use, the determination of recoverability is made based upon the estimated undiscounted future net cash flows of the related asset or group of assets being evaluated. Actual impairment charges are recorded using an estimate of discounted future cash flows. There were no impairment charges for the year ended December 31, 2005 or for the period from inception to December 31, 2004.

Other Assets

Other assets consist of drydocking costs for liftboats, financing fees and unrealized gain on hedge transactions. The drydock costs are capitalized at cost and amortized on the straight-line method over a period of 12 to 24 months. Drydocking costs, net of accumulated amortization, at December 31, 2005 and December 31, 2004 were \$3,906,106 and \$452,256, respectively. Accumulated amortization of drydocking costs at December 31, 2005 and December 31, 2004 was \$2,967,062 and \$149,228, respectively. Amortization expense for drydocking costs was \$3,915,142 and \$149,228 for the year ended December 31, 2005 and the period from inception to December 31, 2004, respectively.

Financing fees are deferred and amortized over the life of the applicable debt instrument. Unamortized deferred financing fees at December 31, 2005 were \$2,531,966, net of accumulated amortization of \$398,806. Unamortized deferred financing fees at December 31, 2004 were \$1,577,793, net of accumulated amortization of \$215,283. All unamortized deferred financing fees outstanding at December 31, 2004 were expensed in conjunction with the refinancing of the Company's long-term debt in June 2005, and the portion outstanding as of the date of the refinancing, totaling \$2,190,709, is included in the loss on early retirement of debt in the statement of operations for the year ended December 31, 2005. In addition, the Company repaid \$45,000,000 of the outstanding balance of the term loan (see NOTE 6) in November 2005 with proceeds from its initial public offering. The portion of outstanding deferred financing fees expensed and included in loss on early retirement of debt in the statement of operations related to this repayment is \$1,291,922. The amortization expense related to the deferred financing fees is included in interest expense on the statement of operations. Amortization expense for financing fees was \$890,848 and \$215,285 for the year ended December 31, 2005 and the period from inception to December 31, 2004, respectively. All financing fees at December 31, 2005 and December 31, 2004 relate to debt obtained through credit agreements dated July 30, 2004, October 1, 2004 and June 29, 2005 (see NOTE 6).

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

The Company entered into several transactions to hedge its variable rate debt with the purpose and effect of fixing the interest rate on a portion of the outstanding principal of the term loan (see NOTE 7).

Index to Financial Statements

Income Taxes

The Company was a limited liability company until its conversion to a Delaware corporation on November 1, 2005. Prior to the Conversion, the Company elected to be taxed as a partnership. As such, the members of the Company were taxed on their proportionate share of net income prior to the Conversion and no provision or liability for income taxes is included in the Company's accompanying financial statements for periods prior to the Conversion. When the Company became a taxable entity in the Conversion, a provision of \$12,145,040 was made reflecting the tax effect of the difference between the book and tax basis of assets and liabilities as of November 1, 2005, the effective date of the Conversion. Following the Conversion, income taxes have been provided based upon the tax laws and rates in effect in the countries and states in which operations are conducted and income is earned.

In February 2006, in accordance with the terms of the limited liability company operating agreement governing the Company prior to the Conversion (the "Operating Agreement"), the Company made a distribution of \$3,731,660 to the former members of the Company for taxes in respect of the ten-month period ended upon the Conversion. The former members did not receive any other distributions prior to the Conversion, and other than this required distribution relating to taxes, the earnings generated by the Company were retained by the Company as part of its stockholders' equity balance upon the Conversion. The Company has no further obligation under the Operating Agreement to make any such distributions.

Use of Estimates

In preparing financial statements in conformity with accounting principles generally accepted in the United States, management makes estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Fair Value of Financial Instruments

The carrying amounts of the Company's financial instruments, which include cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities, approximate fair values because of the short-term nature of the instruments. The carrying amount of long-term debt is equal to the fair market value because the debt bears interest at market rates.

NOTE 2 PROPERTY AND EQUIPMENT

The following is a summary of property and equipment at cost, less accumulated depreciation (in thousands):

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

F-13

Table of Contents**Index to Financial Statements****NOTE 3 EARNINGS PER SHARE**

The reconciliation of the numerator and denominator used for the computation of basic and diluted earnings per share is as follows (net income in thousands):

	Year Ended	Period from Inception
	December 31, 2005	to December 31, 2004
Numerator:		
Net income	\$ 27,456	\$ 8,065
Denominator:		
Weighted average basic shares	24,919,273	14,689,724
Add effect of stock options	512,549	
Weighted average diluted shares	25,431,822	14,689,724
Basic earnings per share	\$ 1.10	\$ 0.55
Diluted earnings per share	\$ 1.08	\$ 0.55

The Company calculates earnings per share by dividing net income by the weighted average number of shares outstanding. On November 1, 2005, in connection with our initial public offering, we converted from a limited liability company to a corporation. Upon the Conversion, each outstanding membership unit of the limited liability company was converted into 350 shares of common stock of the corporation. Share-based information contained herein assumes that the Company had effected the conversion of each outstanding member unit into 350 shares of common stock for all periods prior to the Conversion. Diluted earnings per share include the dilutive effects of any outstanding stock options calculated under the treasury method. Options with an exercise price equal to or in excess of the average market price of the Company's shares are excluded from the calculation of the dilutive effect of stock options for diluted earnings per share calculations.

NOTE 4 ASSET ACQUISITIONS

During January 2005, the Company completed the purchase of two jackup drilling rigs, *Rig 25* and *Rig 30*, for \$21,500,000 and \$20,000,000, respectively. These purchases were partially funded by a \$25,000,000 term loan under the Lehman Credit Agreement (as defined in NOTE 6 below). In connection with this new term loan, the Lehman Credit Agreement was amended in January 2005 to increase the amount of credit available to the Company from \$28,000,000 to \$53,000,000 (see NOTE 6).

In June 2005, the Company purchased 17 liftboats for \$19,725,000. One of these liftboats was being held for sale and was sold in August 2005 (see NOTE 1). The transaction was funded by an increase in the Company's term loan under the Comerica Credit Agreement (as defined in NOTE 6), which was amended to increase the amount of credit available to the Company under the term loan to \$47,000,000. In June 2005, the Company purchased a jackup rig, *Rig 16*, for \$20,000,000. A \$2,000,000 refundable escrow account was funded by the Company in May 2005. The Company funded the purchase price with proceeds from its new term loan under the Company's senior secured credit agreement (see NOTE 6).

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

In August 2005, the Company purchased the liftboat *Whale Shark* for \$12,500,000. The Company funded the purchase with available cash.

In September 2005, the Company purchased *Rig 31* for \$12,600,000. The Company funded the purchase with available cash.

In November 2005, the Company purchased seven liftboats and related assets for \$44,000,000. Three of the acquired liftboats are located in the U.S. Gulf of Mexico and are included in the Domestic Marine Services segment. The remaining four liftboats are currently operating in Nigeria and are included in the International

F-14

Table of Contents**Index to Financial Statements**

Marine Services segment. The sellers will continue to operate these four vessels under an operating agreement until the Company has established its own operations in Nigeria. This operating agreement expires in September 2006, and can be terminated earlier by the Company upon 30 days notice to the sellers.

In February 2006, the Company purchased *Rig 26* for \$20,100,000. *Rig 26* has been cold stacked for the past six years. The Company will begin a reactivation project that it expects will take up to one year and cost approximately \$20,000,000. Upon completion of the reactivation, the Company plans to deploy the rig in a suitable international market.

NOTE 5 BENEFIT PLANS

The Company has established a 401(k) plan for its employees. Participation is available to all employees beginning two months from the date of hire. Participants can contribute up to a maximum of \$14,000 each year, and the Company matches participant contributions equal to 100% of the first 3% and 50% of the next 2% of a participant's salary. The Company made matching contributions of \$917,733 and \$167,858 for the year ended December 31, 2005 and for the period from inception to December 31, 2004, respectively.

NOTE 6 LONG-TERM DEBT

Long-term debt is comprised of the following (dollars in thousands):

	December 31, 2005	December 31, 2004
	<u> </u>	<u> </u>
Senior secured term loan due June 2010	\$ 94,650	\$
12.5% senior secured term loan (Lehman) due December 2006		28,000
Senior secured term loan (Comerica) due October 2009		28,000
	<u> </u>	<u> </u>
Total debt	94,650	56,000
Less debt due within one year	1,400	3,000
	<u> </u>	<u> </u>
Total long-term debt	<u>\$ 93,250</u>	<u>\$ 53,000</u>

Aggregate principal repayments of long-term debt for the next five years and thereafter are as follows (in thousands):

	2006	2007	2008	2009	2010	Thereafter
	<u> </u>	<u> </u>	<u> </u>	<u> </u>	<u> </u>	<u> </u>
Senior secured term loan due June 2010	\$ 1,400	\$ 1,400	\$ 1,400	\$ 1,400	\$ 89,050	\$

Lehman Commercial Paper Inc. term loan

On July 30, 2004, one of the Company's subsidiaries entered into a credit agreement with Lehman Commercial Paper Inc. (the "Lehman Credit Agreement") providing for a \$28,000,000 term loan. On January 4, 2005, the Lehman Credit Agreement was amended, providing for an additional \$25,000,000 term loan, which increased the total amount outstanding under the Lehman Credit Agreement to \$53,000,000. The term loan bore interest at 12.5% per annum with interest payable monthly. The term loan was repaid in full in June 2005.

Comerica Bank term loan

On October 1, 2004, one of the Company's subsidiaries entered into a credit agreement with Comerica Bank providing for a \$28,000,000 term loan and a \$4,000,000 revolving credit line (the "Comerica Credit Agreement"). At December 31, 2004, the entire balance of the term loan was outstanding and no amount was drawn on the revolving credit line. The term loan and the revolving credit line bore interest at a prime rate determined by the agent to the Comerica Credit Agreement plus a margin derived from the ratio of funded debt.

Table of Contents

Index to Financial Statements

to EBITDA. The average interest rates for the period ended December 31, 2004 were approximately 5.7 percent under the term loan and 6.1 percent under the revolving credit line. The Comerica Credit Agreement was amended on June 1, 2005 to increase the amount of credit available to the subsidiary by \$20,000,000, of which \$19,725,000 was used to fund the liftboat acquisition in June 2005 (see NOTE 4). The term loan was repaid in full in June 2005.

Senior secured credit agreement

In June 2005, the Company entered into a senior secured credit agreement with a syndicate of financial institutions. This agreement provides for a \$140,000,000 term loan and a \$25,000,000 revolving credit facility. The Company may seek commitments to increase the amount available under the credit agreement by an additional \$25,000,000 if the amount outstanding under the term loan is no more than \$105,000,000 and the Company's leverage ratio, after giving effect to the incurrence of the additional \$25,000,000 of borrowings, is no greater than 2.5 to 1.

The revolving credit facility provides for swing line loans of up to \$2,500,000 and for the issuance of up to \$5,000,000 of letters of credit. The revolving loans bear interest at a rate equal to, at the option of the Company, either (1) the highest of (a) Comerica Bank's base rate, (b) the three-month certificate of deposit rate plus 0.5% and (c) the Federal funds effective rate plus 0.5%, in each case plus 2.25%, or (2) LIBOR plus 3.25%. The Company may repay the revolving loans at any time without premium or penalty. The revolving loans mature in June 2008. The Company is required to pay a commitment fee of 0.50% on the average daily amount of the unused commitment amount of the revolving credit facility and a letter of credit fee of 3.25%, plus a fronting fee of 0.13% with respect to the undrawn amount of each issued letter of credit. As of December 31, 2005, no amounts were outstanding and no letters of credit had been issued under the revolving credit facility.

The term loan bears interest at a rate equal to, at the option of the Company, either (1) the highest of (a) Comerica Bank's base rate, (b) the three-month certificate of deposit rate plus 0.5% and (c) the Federal funds effective rate plus 0.5%, in each case plus 2.25%, or (2) LIBOR plus 3.25%. Principal payments of \$350,000 are due quarterly, and the outstanding principal balance of the term loan is payable in full in June 2010. The Company may prepay the term loan at any time without premium or penalty, except that any prepayments made before December 31, 2006 with proceeds from debt issuances or in connection with a repricing of the term loan will be made at 101% of the principal repaid. The Company is required to make prepayments on the term loan in certain cases. As of December 31, 2005, \$94,650,000 of the principal amount of the term loan was outstanding, and the interest rate was 7.3%. In accordance with the credit agreement, in July 2005, the Company entered into hedge transactions with the purpose and effect of fixing the interest rate on \$70,000,000 of the outstanding principal amount of the term loan at 7.54% for three years. In addition, the Company entered into hedge transactions with the purpose and effect of capping the interest rate on an additional \$20,000,000 of such principal amount at 8.25% for three years. (See NOTE 7). In November 2005, the Company repaid \$45,000,000 of the outstanding amount under the term loan, together with the accrued and unpaid interest of \$273,750, with proceeds from the Company's initial public offering. The Company recognized a pretax charge of \$1,291,921 related to the write off of deferred financing fees in connection with the repayment in the fourth quarter of 2005.

The Company's obligations under the credit agreement are secured by its liftboats, all of its domestic rigs and substantially all of its other personal property, including all the equity of its domestic subsidiaries and two-thirds of the equity of certain foreign subsidiaries. All of the Company's material domestic subsidiaries guarantee the Company's obligations under the agreement and have granted similar liens on substantially all of their assets.

The credit agreement contains financial covenants relating to leverage and interest coverage. Other covenants contained in the agreement restrict, among other things, repurchases of equity interests, mergers, asset dispositions, guaranties, debt, liens, acquisitions, dividends, distributions, investments, affiliate transactions,

Table of Contents

Index to Financial Statements

prepayments of other debt and capital expenditures. The credit agreement permits the Company to advance up to \$20,000,000 to two of its Cayman subsidiaries and permits the Company to invest an additional \$25,000,000 in its foreign subsidiaries. Management believes that the Company is in compliance in all material respects with its covenants under the credit agreement. The credit agreement contains customary events of default.

Amounts outstanding under the Lehman Credit Agreement and Comerica Credit Agreement were repaid with proceeds from the new senior secured term loan, and the Company terminated the credit agreements upon the repayment. All unamortized deferred financing fees outstanding at December 31, 2004 were expensed in conjunction with the refinancing of the Company's long-term debt in June 2005, and the portion outstanding as of the date of the refinancing is included in loss on early retirement of debt in the consolidated statements of operations.

NOTE 7 DERIVATIVE INSTRUMENTS AND HEDGING

In July 2005, the Company entered into several transactions to hedge its variable rate debt with the purpose and effect of fixing the interest rate on a portion of the outstanding principal of the term loan. The Company entered into two floating-to-fixed interest rate swaps on a total of \$70,000,000 of the term loan principal under which the Company receives an interest rate of three-month LIBOR and pays a fixed coupon over three years, with the terms of the swaps matching those of the term loan. The Company also entered into two purchased interest rate caps hedging interest payments made on a total of \$20,000,000 of the term loan principal at a strike price of 5.0% over three years. The counterparty is obligated to pay the Company in any quarter that actual LIBOR resets above the strike price, with the terms of the caps matching those of the term loan. All hedge transactions have payment dates of October 1, January 1, April 1 and July 1. These hedging arrangements effectively fix the interest rate on \$70,000,000 of the principal amount at 7.54% for three years and cap the interest rate on \$20,000,000 of the principal amount at 8.25% for three years.

These hedge transactions are being accounted for as cash flow hedges under SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended by SFAS No. 138, *Accounting for Certain Derivative Instruments and Certain Hedging Activities* (an amendment of FASB Statement no. 133), and SFAS No. 149, *Amendment of Statement 133 on Derivative Instruments and Hedging Activities*. The cumulative net unrealized gain on these hedging instruments was \$732,903 at December 31, 2005 and is included in other assets in the consolidated balance sheet at December 31, 2005 and in accumulated other comprehensive income, net of tax of \$256,516. The Company expects to realize \$208,414 of unrealized gain in the consolidated statements of operations for the year ended December 31, 2006. The Company did not recognize a gain or loss due to hedge ineffectiveness in its consolidated statements of operations for the year ended December 31, 2005 related to these hedging instruments. The Company recognized losses of \$112,966 in interest expense in the consolidated statements of operations for the year ended December 31, 2005 related to the interest rate swaps.

NOTE 8 CONCENTRATION OF CREDIT RISK

The Company maintains its cash in bank deposit accounts at high credit quality financial institutions as permitted by its credit agreement. The balances, at times, may exceed federally insured limits.

The Company provides services to a diversified group of customers in the oil and natural gas exploration and production industry. Credit is extended based on an evaluation of each customer's financial condition. The Company maintains an allowance for doubtful accounts receivable based on expected collectability and establishes a reserve when required payment is unlikely to occur. In addition, Chevron Corporation

accounts for 100% of the revenue for the Company's International Marine Services segment.

F-17

Table of Contents**Index to Financial Statements****NOTE 9 SALES TO MAJOR CUSTOMERS**

The customer base for the Company is primarily concentrated in the oil and natural gas exploration and production industry. Sales to customers exceeding 10 percent or more of the Company's total revenue are as follows:

	Year Ended December 31, 2005	Period from Inception to December 31, 2004
Chevron Corporation	31%	31%
Bois d'Arc Energy, Inc.	12%	15%

NOTE 10 COMPREHENSIVE INCOME

Balance at July 27, 2004 (Inception)	\$
Other comprehensive gain	_____
Balance at December 31, 2004	_____
Reclassification of losses included in net income	73
Other comprehensive gain	403

Balance at December 31, 2005	\$ 476

NOTE 11 INCOME TAXES

The Company was a limited liability company until its conversion to a Delaware corporation on November 1, 2005. Prior to the Conversion, the Company elected to be taxed as a partnership. As such, the members of the Company were taxed on their proportionate share of net income prior to the Conversion and no provision or liability of income taxes was included in the Company's financial statements for periods prior to the Conversion. When the Company became a taxable entity in the Conversion, a provision of approximately \$12,145,000 was made reflecting the tax effect of the difference between the book and tax basis of assets and liabilities as of November 1, 2005, the effective date of the Conversion.

Income before income taxes consisted of the following (in thousands):

During 2005, the Company generated a net operating loss of \$2,200,000 for United States income tax purposes. This loss can be carried forward 20 years. The Company currently does not have significant unremitted earnings of foreign subsidiaries.

NOTE 12 SEGMENTS

The Company's operations are aggregated into three reportable segments: (i) Contract Drilling Services, (ii) Domestic Marine Services and (iii) International Marine Services. The Contract Drilling Services segment consists of jackup rigs used in support of offshore drilling activities. The Marine Services segments consist of liftboats used in offshore support services. The Domestic Marine Services segment consists of liftboats operated in the U.S. Gulf of Mexico while the International Marine Services Segment consists of liftboats operated outside of the U.S. Gulf of Mexico (which currently consists of the Company's liftboats operating in Nigeria). Accounting policies of the segments are the same as those described under "Nature of Business and Significant Accounting Policies" in NOTE 1. The Company eliminates intersegment revenue and expenses, if any.

Legal Proceedings

Edgar Filing: HERCULES OFFSHORE, INC. - Form 424B4

The Company is involved in various claims and lawsuits in the normal course of business. Management does not believe any accruals are necessary in accordance with SFAS No. 5, Accounting for Contingencies .

Insurance

The Company is self-insured for the deductible portion of its insurance coverage. Management believes adequate accruals have been made on known and estimated exposures up to the deductible portion of the Company's insurance coverage. Management believes that claims and liabilities in excess of the amounts accrued are adequately insured.

The Company maintains insurance coverage that includes physical damage, third party liability, maritime employers liability, pollution and other coverage. The primary marine package provides for hull and machinery coverage for the Company's rigs and liftboats up to a scheduled value for each asset. Rig coverages include a \$1,000,000 deductible per occurrence; liftboat deductibles vary from \$150,000 to \$500,000 per occurrence, depending on the insured value of the particular vessel. There is no deductible in the event of a total loss of the vessel. The protection and indemnity coverage under the primary marine package has a \$5,000,000 limit per occurrence with excess liability up to \$100,000,000. The primary marine package also provides coverage for cargo and charterer's legal liability. Vessel pollution is covered under a Water Quality Insurance Syndicate

Table of Contents**Index to Financial Statements**

policy. In addition to the marine package, the Company has separate policies providing coverage for general domestic liability, employer's liability, domestic auto liability and non-owned aircraft liability, with customary deductibles and coverage. Insurance premiums under the Company's program are approximately \$8,000,000 for the twelve-month policy period ending July 31, 2006.

In connection with the renewal of certain of the Company's insurance policies, the Company entered into an agreement to finance annual insurance premiums. A total of \$5,953,264 was financed through this arrangement. The interest rate is 5.047% and the note matures in May 2006. The outstanding balance was \$2,400,580 at December 31, 2005 and is recorded in other liabilities on the consolidated balance sheets. The corresponding prepaid insurance has been recorded in prepaid expenses and other current assets.

Recent Hurricanes

In August 2005, two of the Company's jackup rigs, *Rig 21* and *Rig 25*, sustained damage during Hurricane Katrina. The Company believes that *Rig 25* is likely to be declared a constructive total loss under its insurance policies. Salvage efforts are complete on *Rig 25* and the Company filed a notice of abandonment with its insurance underwriter in February 2006. If *Rig 25* is declared a constructive total loss, the Company would recognize a gain equal to the excess of the insurance proceeds received over the rig's carrying value of \$20,451,923. *Rig 25* is insured for \$50,000,000, and insurance proceeds received would be reduced for salvage proceeds. *Rig 21* suffered extensive damage to its mat as a result of the storm. The rig is currently in drydock in a shipyard in Pascagoula, Mississippi undergoing repairs to a section of the mat. The rig is expected to be ready for service in the first quarter of 2006 and all repairs are expected to be within insured values. As a result of the damage to *Rig 21*, the Company recognized a \$1,000,000 loss in the year ended December 31, 2005 representing its insurance deductible. The loss is included in operating expenses for drilling services in the consolidated statements of operations.

NOTE 14 UNAUDITED INTERIM FINANCIAL DATA

Unaudited interim financial information for the year ended December 31, 2005 and the period from inception to December 31, 2004 is as follows (dollars in thousands, except per share amounts):

	Quarter Ended			
	March 31	June 30	September 30	December 31
2005

NOTE 15 RELATED PARTIES

A former manager of the Company is a principal in Bassoe Offshore USA. The Company paid \$200,000 in the year ended December 31, 2005 to Bassoe Offshore USA for rig brokerage fees in connection the acquisition by the Company of a jackup rig. The Company paid \$442,250 in the period from inception to December 31, 2004 for such rig brokerage fees. The services were bid under competitive marketplace conditions. The Company believes that these transactions were on terms that were reasonable and in the best interest of the Company.

In January 2005, the Company purchased *Rig 30* from Porterhouse Offshore, LP (Porterhouse). Two of the Company s officers and a manager of the Company at the time of acquisition were partners in Porterhouse, which owned and sold *Rig 30* to the Company. The Company believes that this transaction was on terms that were reasonable and in the best interest of the Company. In the transaction, these individuals received membership interests in the Company valued at \$211,209, \$211,209 and \$422,338, respectively.

During 2005, a subsidiary of the Company purchased an aggregate of approximately \$167,000 in rig equipment monitoring products and services from MBH Datasource, Inc. Thomas E. Hord, Vice President, Operations and Chief Operating Officer of the subsidiary, holds a 50% ownership interest in MBH Datasource, Inc. The Company believes that the transactions were on terms that were reasonable and in its best interest, although the transactions may not have been on or have terms as favorable to the Company as it could have obtained from unaffiliated third-parties in arms-length transactions.
