**JACOBS ENGINEERING GROUP INC. AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS    UNAUDITED**

**March 31, 2008**

**Basis of Presentation**

Unless the context otherwise requires, references herein to "Jacobs" are to Jacobs Engineering Group Inc. and its predecessors, and references herein to the "Company," "we," "us" or "our" are to both Jacobs Engineering Group Inc. and its consolidated subsidiaries.

The accompanying consolidated financial statements and financial information included herein have been prepared pursuant to the interim period reporting requirements of Form 10-Q. Consequently, certain information and note disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted. Readers of this report should also read our consolidated financial statements and the notes thereto included in our Annual Report on Form 10-K for the fiscal year ended September 30, 2007 ( "2007 Form 10-K" ) as well as Item 7 *Management's Discussion and Analysis of Financial Condition and Results of Operations* also included in our 2007 Form 10-K.

In the opinion of management, the accompanying unaudited consolidated financial statements contain all adjustments (consisting of normal recurring adjustments) necessary for a fair presentation of our consolidated financial statements at March 31, 2008 and for the three and six month periods ended March 31, 2008 and 2007.

Our interim results of operations are not necessarily indicative of the results to be expected for the full fiscal year.

**New Accounting Standards**

In June 2006, the Financial Accounting Standards Board ( "FASB" ) issued Interpretation No. 48 *Accounting for Uncertainty in Income Taxes, an Interpretation of FASB Statement No. 109* ( "FIN 48" ). FIN 48 clarifies the accounting for uncertainty in income taxes recognized in a company's financial statements in accordance with SFAS 109 *Accounting for Income Taxes*. FIN 48 prescribes a recognition threshold and measurement attribute for financial statement disclosure of tax positions taken, or expected to be taken, on an entity's tax return. FIN 48 also provides guidance on derecognition; classification; interest and penalties; accounting in interim periods; disclosure; and transition. FIN 48 is effective for fiscal years beginning after December 15, 2006 and the Company adopted this interpretation effective October 1, 2007.

The adoption of FIN 48 did not have a material effect on the Company's consolidated financial statements.

**Table of Contents**

**JACOBS ENGINEERING GROUP INC. AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS    UNAUDITED**

**March 31, 2008**

**(continued)**

**Business Combination**

On November 2, 2007, the Company completed the acquisition of Carter & Burgess, Inc. ( Carter & Burgess ) for a total purchase price of approximately \$229.6 million. Headquartered in Fort Worth, Texas, Carter & Burgess is an approximately 3,200-person professional services firm providing architecture, engineering, design, and planning services to public and private sector clients operating in the fields of transportation, water, infrastructure programs, building programs, land development, and planning. The purchase price consisted of cash (approximately \$193.7 million) and common stock of Jacobs (approximately \$35.9 million). The Company's consolidated results of operations presented herein include those of Carter & Burgess since the date of acquisition.

Carter & Burgess contributed approximately \$133.0 million and \$217.5 million of revenues and approximately \$2.4 million and \$4.1 million of operating profit during the three and the six months ended March 31, 2008, respectively.

On March 12, 2008, the Company completed the acquisition of a 60% interest in Zamel & Turbag Consulting Engineers ( Zate ) for a total purchase price of approximately \$38.3 million. Located in Saudi Arabia, Zate is an approximately 500-person professional services firm providing engineering and construction management services to clients operating in the oil & gas, refining, and chemicals industries.

Zate did not have a material effect on the financial position or results of operations of the Company for the three and six months ended March 31, 2008.

The purchase price allocations for the Carter & Burgess and Zate acquisitions are preliminary. The final allocations will be determined after receipt of information necessary to complete the valuation of certain assets and liabilities, which may result in a change to the initial estimates.

**Receivables**

Included in Receivables in the accompanying consolidated balance sheets at March 31, 2008 and September 30, 2007 were \$920.6 million and \$790.5 million, respectively, of unbilled receivables. Unbilled receivables represent reimbursable costs and amounts earned under contracts in progress at the respective balance sheet dates. Such amounts become billable according to the contract terms, which usually consider the passage of time, achievement of certain milestones or completion of the project. Included in these unbilled receivables at March 31, 2008 and September 30, 2007 were contract retentions totaling \$40.0 million and \$37.1 million, respectively. Also included in receivables at March 31, 2008 and September 30, 2007 were allowances for doubtful accounts of \$11.5 million and \$6.2 million, respectively.

**Table of Contents****JACOBS ENGINEERING GROUP INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS    UNAUDITED****March 31, 2008****(continued)**

In accordance with industry practice, we include in receivables claims representing the recovery of costs incurred on contracts to the extent it is probable that such claims will result in additional contract revenue and the amount of such additional revenue can be reliably estimated. Such amounts totaled \$63.2 million and \$49.6 million at March 31, 2008 and September 30, 2007, respectively. Included in these amounts at March 31, 2008 and September 30, 2007 is approximately \$41.1 million and \$36.6 million, respectively, relating to one claim involving a waste incineration project performed in Europe. This matter is more fully described in Note 12 *Contractual Guarantees, Litigation, Investigations, and Insurance* of Notes to Consolidated Financial Statements on page F-24 of our 2007 Form 10-K. Due to the timing of when the claim may be settled, the receivable is included in Other Non-current Assets in the accompanying consolidated balance sheets. Although we have initiated litigation against the client and are seeking damages in excess of 40.0 million (approximately \$63.1 million at March 31, 2008), there can be no certainty as to the ultimate outcome of our claim. The client has filed a counterclaim against us, which we believe is without merit.

Amounts due from the United States federal government totaled \$253.7 million and \$153.6 million at March 31, 2008 and September 30, 2007, respectively.

**Property, Equipment and Improvements, Net**

Property, Equipment and Improvements, Net in the accompanying consolidated balance sheets consisted of the following (in thousands):

	<b>March 31, 2008</b>	<b>September 30, 2007</b>
Land	\$ 11,575	\$ 9,581
Buildings	76,386	69,646
Equipment	385,127	351,173
Leasehold improvements	96,633	74,961
Construction in progress	18,054	11,400
	587,775	516,761
Accumulated depreciation and amortization	(363,850)	(324,272)
	\$ 223,925	\$ 192,489

**Revenue Accounting for Contracts / Accounting for Joint Ventures**

In accounting for long-term engineering and construction-type contracts, we follow the provisions of the American Institute of Certified Public Accountants' Statement of Position 81-1 *Accounting for Performance of Construction-Type and Certain Production-Type Contracts* ( SOP 81-1 ). In general, we recognize revenues at the time we provide services. Depending on the commercial terms of the contract, we recognize revenues either when costs are incurred, or using the percentage-of-completion method of accounting by relating contract costs incurred to date to the total estimated costs at completion. Contract losses are provided for in their entirety in the period they become known, without regard to the percentage-of-completion. We recognize as revenues costs associated with claims and unapproved change orders to the extent it is probable that such claims and change orders will result in additional contract revenue, and the amount of such additional revenue can be reliably estimated.

The nature of our business occasionally results in clients, subcontractors and vendors presenting claims against us for recovery of costs they incurred in excess of what they expected to incur, or for which they believe they are not contractually responsible. Similarly, and in the normal course of business, we may present claims and change orders to our clients for costs we have incurred for which we believe we are not

## Edgar Filing: JACOBS ENGINEERING GROUP INC /DE/ - Form 10-Q

contractually responsible or for services provided that were either requested by the client or were otherwise required by the nature of the project. In those situations where a claim against us may result in additional costs to the contract, we include in the total estimated costs of the contract (and therefore, in the estimated amount of margin to be earned under the contract) an estimate, based on all relevant facts and circumstances available, of the additional costs to be incurred. In those situations where a claim we've presented to the client may result in additional revenues, we include in revenues the amount of costs incurred, without profit, to the extent it is probable that the claim will result in additional revenue, and the amount of such additional revenue can be reliably estimated. Costs associated with unapproved change orders are included in revenues using substantially the same criteria used for claims.

Page 9

**Table of Contents**

**JACOBS ENGINEERING GROUP INC. AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS    UNAUDITED**

**March 31, 2008**

**(continued)**

Certain cost-reimbursable contracts with government customers as well as certain commercial clients provide that contract costs are subject to audit and adjustment. In this situation, revenues are recorded at the time services are performed based upon the amounts we expect to realize upon completion of the contracts. Revenues are not recognized for non-recoverable costs. In those situations where an audit indicates that we may have billed a client for costs not allowable under the terms of the contract, we estimate the amount of such nonbillable costs and adjust our revenues accordingly.

As is common with industry practice, we execute certain contracts jointly with third parties through various forms of joint ventures. In general, such contracts fall within the scope of SOP 81-1. We therefore account for these investments in accordance with SOP 81-1 and Emerging Issues Task Force Issue 00-01 *Investor Balance Sheet and Income Statement Display Under the Equity Method for Investments in Certain Partnerships and Other Ventures*. Accordingly, for certain of these joint ventures (i.e., where we have an undivided interest in the assets and liabilities of the joint venture), we recognize our proportionate share of joint venture revenues, costs and operating profit in our consolidated statements of earnings. For other investments in engineering and construction joint ventures, we use the equity method of accounting.

Very few of our joint ventures have employees. Although the joint ventures own and hold the contracts with the clients, the services required by the contracts are typically performed by us and our joint venture partners, or by other subcontractors under subcontracting agreements with the joint ventures. The assets of our joint ventures, therefore, consist almost entirely of cash and receivables (representing amounts due from the clients); and the liabilities of our joint ventures consist almost entirely of amounts due to the joint venture partners (for services provided by the partners to the joint ventures) and other subcontractors. In general, at any given time, the equity of our joint ventures represents the undistributed profits earned under the contracts with clients. None of our joint ventures have credit facilities that allow them to borrow money from banks in order to finance their operations. Our joint ventures, therefore, are simply mechanisms used to deliver engineering and construction services to clients. They generally do not, in and of themselves and with respect to the performance of the contracts they hold, present any additional risk of loss to us or to our partners. Under accounting principles generally accepted in the United States, our share of losses associated with the contracts held by the joint ventures, if and when they occur, are reflected in our consolidated financial statements.

In accordance with the provisions of FASB Interpretation No. 46R *Consolidation of Variable Interest Entities* ( FIN 46R ), we have analyzed our joint ventures and have classified them into two groups: those variable interest entities ( VIEs ) of which we are the primary beneficiary, and those VIEs of which we are not the primary beneficiary. In accordance with FIN 46R and our accounting practices discussed above, we apply the consolidation method of accounting for our investment in material VIEs where we are the primary beneficiary.

At March 31, 2008, the total assets and liabilities of those VIEs for which we are the primary beneficiary were \$70.3 million and \$53.6 million, respectively. At March 31, 2008, the total assets and liabilities of those VIEs for which we are not the primary beneficiary were \$294.3 million and \$266.0 million, respectively.

**Table of Contents****JACOBS ENGINEERING GROUP INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS    UNAUDITED****March 31, 2008****(continued)**

When we are directly responsible for subcontractor labor, or third-party materials and equipment ( pass-through costs ), we reflect the costs of such items in both revenues and costs. On other projects, where the client elects to pay for such items directly and we have no direct responsibility for such items, these amounts are not reflected in either revenues or costs. The amount of such pass-through costs included in revenues during the three and six months ended March 31, 2008 totaled \$719.0 million and \$1,402.8 million, respectively. This compares to pass-through costs of \$675.3 million and \$1,376.6 million for the three and six months ended March 31, 2007, respectively.

**Disclosures About Pension Benefit Obligations**

The components of net periodic benefit costs relating to our defined benefit pension plans are as follows (in thousands):

	<b>Three Months Ended March 31,</b>		<b>Six Months Ended March 31,</b>	
	<b>2008</b>	<b>2007</b>	<b>2008</b>	<b>2007</b>
Service cost	\$ 9,510	\$ 6,474	\$ 15,642	\$ 12,850
Interest cost	12,585	14,903	25,325	25,867
Expected return on plan assets	(13,271)	(15,923)	(26,751)	(27,035)
Amortization of prior unrecognized items	428	2,426	865	4,318
<b>Net periodic benefit cost</b>	<b>\$ 9,252</b>	<b>\$ 7,880</b>	<b>\$ 15,081</b>	<b>\$ 16,000</b>

During the six months ended March 31, 2008, we made cash contributions of approximately \$21.9 million to our plans, and we expect to make cash contributions of an additional \$19.0 million during the remainder of fiscal 2008.

**Earnings Per Share**

The following table reconciles the denominator used to compute basic earnings per share ( EPS ) to the denominator used to compute diluted EPS (in thousands):

	<b>Three Months Ended March 31,</b>		<b>Six Months Ended March 31,</b>	
	<b>2008</b>	<b>2007</b>	<b>2008</b>	<b>2007</b>
Weighted average shares outstanding (denominator used to compute basic EPS)	120,955	118,129	120,520	117,891
Effect of stock options and restricted stock	3,325	3,676	3,629	3,689
<b>Denominator used to compute diluted EPS</b>	<b>124,280</b>	<b>121,805</b>	<b>124,149</b>	<b>121,580</b>

For the three months ended March 31, 2008 and March 31, 2007 we issued 646,106 and 594,011 shares of common stock, respectively, from the exercise of stock options and the release of restricted stock. For the six months ended March 31, 2008 and March 31, 2007 we issued 1,335,576 and 711,420 shares of common stock, respectively, from the exercise of stock options and the release of restricted stock.

**Accounting for and Disclosure of Guarantees, and Contingencies**

Please refer to Note 11 *Commitments and Contingencies, and Derivative Financial Instruments* of Notes to Consolidated Financial Statements beginning on page F-22 of our 2007 Form 10-K for a discussion of the Company's various commitments and contingencies.

On August 1, 2007 the I-35W bridge in Minneapolis, Minnesota suffered a tragic collapse. The bridge was designed and built in the early 1960's. Sverdrup & Parcel and Associates, Inc. ( "Sverdrup & Parcel" ) provided design services to the Minnesota Department of Transportation ( "MnDOT" ) on the bridge. Sverdrup & Parcel was a predecessor company to Sverdrup Corporation, a company acquired by Jacobs in 1999. The National Transportation Safety Board ( "NTSB" ) released an Interim Report identifying certain elements of the design as a possible factor in the collapse. The Company is continuing its close cooperation with the NTSB and MnDOT in their investigation of the collapse. The Company does not expect this matter to have any material adverse effect on its consolidated financial statements.

### **JACOBS ENGINEERING GROUP INC. AND SUBSIDIARIES**

#### **Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.** **General**

The purpose of this Management's Discussion and Analysis (MD&A) is to provide a narrative analysis explaining the reasons for material changes in the Company's (i) financial condition since the most recent fiscal year-end, and (ii) results of operations during the current fiscal year-to-date period and current fiscal quarter as compared to the corresponding periods of the preceding fiscal year. In order to better understand such changes, readers of this MD&A should also read:

The discussion of the critical and significant accounting policies used by the Company in preparing its consolidated financial statements (the most current discussion of our critical accounting policies appears on pages 30 through 33 of our 2007 Annual Report on Form 10-K (the 2007 Form 10-K), and the most current discussion of our significant accounting policies appears on pages F-7 through F-12 of our 2007 Form 10-K);

The Company's fiscal 2007 audited consolidated financial statements and notes thereto included in its 2007 Form 10-K (beginning on page F-1 thereto); and

Item 7 *Management's Discussion and Analysis of Financial Condition and Results of Operations* included in our 2007 Form 10-K (beginning on page 29 thereto).

In addition to historical information, this MD&A contains forward-looking statements that are not based on historical fact. When used in this report, words such as *expects*, *anticipates*, *believes*, *seeks*, *estimates*, *plans*, *intends*, and similar words are intended in part to identify forward-looking statements. You should not place undue reliance on these forward-looking statements. Although such statements are based on management's current estimates and expectations, and currently available competitive, financial, and economic data, forward-looking statements are inherently uncertain and involve risks and uncertainties that could cause our actual results to differ materially from what may be inferred from the forward-looking statements. Some of the factors that could cause or contribute to such differences are listed and discussed in Item 1A *Risk Factors*, included in our 2007 Form 10-K (beginning on page 18 thereto). We undertake no obligation to release publicly any revisions or updates to any forward-looking statements that are contained in this document.

#### **Business Combination**

The Company completed two business combinations during the first six months of fiscal 2008.

As discussed in the Notes to Consolidated Financial Statements included herein, we completed the acquisition of Carter & Burgess, Inc. (Carter & Burgess) during the first quarter of fiscal 2008. Carter & Burgess contributed approximately \$133.0 million and \$217.5 million of revenues and approximately \$2.4 million and \$4.1 million of operating profit during the three and the six months ended March 31, 2008, respectively.

We also completed the acquisition of a 60% interest in Zamel & Turbag Consulting Engineers (Zate) during the second quarter of fiscal 2008. This acquisition did not have a material effect on the financial position or results of operations of the Company for the three and six months ended March 31, 2008.

**Table of Contents****JACOBS ENGINEERING GROUP INC. AND SUBSIDIARIES****Results of Operations**

We recorded net earnings of \$99.3 million, or \$0.80 per diluted share, for the second quarter of fiscal 2008 compared to net earnings of \$67.2 million, or \$0.55 per diluted share, for the second quarter of fiscal 2007.

Net earnings for the second quarter were \$32.1 million, or 47.7%, higher than the amount for the second quarter of fiscal 2007;

Diluted earnings per share for the second quarter of fiscal 2008 increased 45.5% over the prior year. For the six months ended March 31, 2008, we recorded net earnings of \$197.7 million, or \$1.59 per diluted share. Included in this amount is a one-time gain of \$5.4 million, or \$0.04 per diluted share, from the sale of the Company's interest in a company that provides specialized operations and maintenance services.

Excluding the one-time gain:

Net earnings for the six months ended March 31, 2008 totaled \$192.3 million; this represents a \$63.8 million, or 49.7%, increase over the prior year;

Diluted earnings per share for the six months ended March 31, 2008 totaled \$1.55, a 46.2% increase over the prior year. Total revenues for the three months ended March 31, 2008 increased by \$573.1 million, or 27.4%, to \$2.7 billion compared to \$2.1 billion for the second quarter of fiscal 2007. Total revenues for the six months ended March 31, 2008 increased by \$1.0 billion, or 25.0%, to \$5.1 billion compared to \$4.1 billion for the corresponding period last year. The operations of Carter & Burgess contributed \$133.0 million and \$217.5 million in revenues for the three and six months ended March 31, 2008, respectively.

The following table sets forth our revenues by the various types of services we provide for the three and six months ended March 31, 2008 and 2007 (in thousands):

	For the Three Months Ended March 31,		For the Six Months Ended March 31,	
	2008	2007	2008	2007
Project Services	\$ 1,293,003	\$ 954,779	\$ 2,461,576	\$ 1,786,215
Construction	932,856	806,889	1,789,872	1,631,680
Operations and Maintenance ( O&M )	253,613	184,137	542,385	421,172
Process, Scientific and Systems Consulting	185,322	145,899	342,778	271,145
	\$ 2,664,794	\$ 2,091,704	\$ 5,136,611	\$ 4,110,212

Project services revenues for both the three and six months ended March 31, 2008 increased 21.5% and 25.6%, respectively as compared to the corresponding periods last year. These increases exclude the effects of the increase in revenues from the acquisition of Carter & Burgess, all of which was from project services activities. The higher project services revenues reflect increased activity relating to design services, preliminary and detailed engineering services, and architectural services that we provide our clients. These services are more prominent in the earlier phases of projects before the projects enter any construction phase. In general, we believe that the level of project services we provide clients is a precursor to opportunities to provide construction and, ultimately, maintenance services.

## Table of Contents

### JACOBS ENGINEERING GROUP INC. AND SUBSIDIARIES

For the three and six months ended March 31, 2008, we experienced an increase in O&M services revenues of 37.7% and 28.8%, respectively, as compared to the corresponding periods last year. These increases are primarily related to higher O&M activities associated with projects for the United States federal government, particularly as it relates to government test facilities.

For the three months ended March 31, 2008, construction services revenues increased by 15.6% as compared to the corresponding period last year. Construction services are increasing as we transition from the design and engineering phases into the construction phases of projects.

The following table sets forth our revenues by the industry groups and markets in which our clients operate for the three and six months ended March 31, 2008 and 2007 (in thousands):

	For the Three Months Ended March 31,		For the Six Months Ended March 31,	
	2008	2007	2008	2007
Energy & Refining - Downstream	\$ 685,382	\$ 487,582	\$ 1,420,226	\$ 1,009,130
National Government Programs	474,294	370,614	891,713	724,043
Chemicals and Polymers	370,710	426,803	713,814	785,891
Oil & Gas - Upstream	363,686	167,098	631,763	356,767
Infrastructure	260,383	172,166	479,477	318,206
Pharmaceuticals and Biotechnology	241,833	186,043	462,978	391,593
Buildings	178,905	126,349	341,116	230,731
Industrial and Other	89,601	155,049	195,524	293,851
	\$ 2,664,794	\$ 2,091,704	\$ 5,136,611	\$ 4,110,212

For the three and six months ended March 31, 2008, we experienced an increase in revenues from clients operating in many of the industry groups and markets we serve, with the oil & gas, energy & refining, and infrastructure industries and markets posting the highest percentage increases.

Revenues from clients operating in the oil & gas industries increased \$196.6 million, or 117.6%, during the second quarter of fiscal 2008, and \$275.0 million or \$77.1%, during the six months ended March 31, 2008, as compared to the corresponding periods last year. We continue to see strong revenue flows from oil & gas extraction projects, particularly in the oil sands area of Canada. Although such projects may be sensitive to the overall price of oil, we do not believe modest decreases in oil prices will have a material effect on such projects.

Revenues from clients operating in the energy & refining industries increased \$197.8 million, or 40.6%, during the second quarter of fiscal 2008, and \$411.1 million, or \$40.7%, during the six months ended March 31, 2008, as compared to the corresponding periods last year. We continue to see higher capital spending relating to projects involving the reconfiguration and expansion of existing refineries, and addressing the effects of changing crude inputs from lighter crudes to heavier crudes that contain slightly higher levels of sulfur.

Revenues from clients operating in the infrastructure market increased \$88.2 million, or 51.2%, during the second quarter of fiscal 2008, and \$161.3 million or \$50.7% during the six months ended March 31, 2008, as compared to the corresponding period last year. For the three and six months ended March 31, 2008, Carter and Burgess accounted for 75.0% and 67%, respectively, of the increases.

As a percentage of revenues, direct costs of contracts for the three and six months ended March 31, 2008 was 83.7% and 84.0%, respectively. This compares to 86.1% and 86.3%, respectively, for the three and six months ended March 31, 2007.

## **Table of Contents**

### **JACOBS ENGINEERING GROUP INC. AND SUBSIDIARIES**

The decrease in this percentage relationship for the three and six months ended March 31, 2008 as compared to the corresponding periods last year were due primarily to a higher level of project services revenue, relative to construction and maintenance services, combined with higher margin rates realized on our project services activity. The percentage relationship between direct costs of contracts and revenues fluctuates between reporting periods depending on a variety of factors including the mix of business during the reporting periods being compared as well as the level of margins earned from the various types of services provided.

Selling, general and administrative ( SG&A ) expenses for the three months ended March 31, 2008 increased \$92.1 million, or 48.9%, to \$280.4 million compared to \$188.3 million for the three months ended March 31, 2007. For the six months ended March 31, 2008, SG&A expenses increased by \$161.7 million, or 44.3%, to \$527.2 million compared to \$365.4 million for the six months ended March 31, 2007. In general, the increases in SG&A expenses during the current fiscal periods as compared to the corresponding periods last year was due to increased spending in support of the higher level of project services activities. Also, the operations of Carter & Burgess contributed \$50.0 million and \$83.8 million in SG&A expenses for the three and six months ended March 31, 2008, respectively.

Interest income for the three and six months ended March 31, 2008 decreased \$2.0 million and \$1.7 million, respectively, as compared to the corresponding periods last year. These decreases were primarily the result of lower cash balances maintained during the current fiscal periods as compared to the corresponding periods last year, combined with a slight reduction in interest rates. For the six months ended March 31, 2008 the Company used \$230.9 million for the acquisitions of businesses, net of cash received.

Miscellaneous income, net for the six months ended March 31, 2008 increased \$9.5 million to \$7.5 million as compared to the corresponding period last year. Included in this amount is a \$10.6 million gain from the sale, in the first quarter of fiscal 2008, of the Company's interest in a company that provides specialized operations and maintenance services.

### **Backlog Information**

We include in backlog the total dollar amount of revenues we expect to record in the future as a result of performing work under contracts that have been awarded to us. Because of the nature, size, expected duration, funding commitments, and the scope of services required by our contracts, the timing of when backlog will be recognized as revenues can vary greatly between individual contracts. Our policy with respect to O&M contracts, however, is to include in backlog the amount of revenues we expect to receive for one succeeding year, regardless of the remaining life of the contract. For national government programs (other than national government O&M contracts), our policy is to include in backlog the full contract award, whether funded or unfunded, and exclude option periods.

In accordance with industry practice, substantially all of our contracts are subject to cancellation or termination at the option of the client. Historically, we have not experienced cancellations that have had a material effect on the reported backlog amounts. In a situation where a client terminates a contract, we would ordinarily be entitled to receive payment for work performed up to the date of termination and, in certain instances, we may be entitled to allowable termination and cancellation costs. While management uses all information available to it to determine backlog, our backlog at any given time is subject to changes in the scope of services to be provided as well as increases or decreases in costs relating to the contracts included therein.

**Table of Contents****JACOBS ENGINEERING GROUP INC. AND SUBSIDIARIES**

Because certain contracts (for example, contracts relating to large engineering, procurement and construction projects as well as national government programs) can cause large increases to backlog in the fiscal period in which we recognize the award, and because many of our contracts require us to provide services that span over a number of fiscal quarters (and sometimes over fiscal years), we evaluate our backlog on a year-over-year basis, rather than on a sequential, quarter-over-quarter basis.

The following table summarizes our backlog at March 31, 2008 and 2007 (in millions):

	2008	2007
Technical professional services	\$ 7,562.0	\$ 5,835.1
Field services	8,668.5	4,877.1
<b>Total</b>	<b>\$ 16,230.5</b>	<b>\$ 10,712.2</b>

Our backlog increased \$5.5 billion, or 51.5%, to \$16.2 billion at March 31, 2008 from \$10.7 billion at March 31, 2007. Contributing to the growth in backlog were significant awards from clients operating in the energy & refining and oil & gas industries, as well as awards from our national government program and infrastructure clients. Also contributing to the increase was approximately \$392.6 million in backlog acquired as part of the Carter & Burgess acquisition.

**Liquidity and Capital Resources**

At March 31, 2008, our principal source of liquidity consisted of \$392.5 million of cash and cash equivalents, and \$257.4 million of available borrowing capacity under our \$290.0 million, long-term, unsecured revolving credit facility. We finance as much of our operations and growth as possible through cash generated by our operations.

During the first half of fiscal 2008, our cash and cash equivalents decreased by \$220.8 million to \$392.5 million at March 31, 2008. This compares to a net increase in cash and cash equivalents of \$46.8 million, to \$480.9 million, during the corresponding period last year. During the six months ended March 31, 2008, we experienced net cash outflows from investing activities of \$264.2 million. These outflows were offset in part by net cash inflows from operating activities of \$6.4 million, financing activities of \$30.8 million, and the effect of exchange rates of \$6.2 million.

Our operations provided \$6.4 million of cash during the six months ended March 31, 2008 compared to \$121.3 million for the corresponding period last year. The \$114.8 million decrease in cash provided by operations for the six months ended March 31, 2008 when compared to the corresponding period last year was due primarily to a \$164.5 million decrease relating to the timing of cash receipts and payments within our working capital accounts; a \$18.7 million decrease relating to stock based compensation (including the related excess tax benefits); and \$10.6 million of gains relating to sales of investments and other assets (the cash flows from which are reclassified to the investing section within the consolidated statements of cash flows). These decreases in cash flows from operations were offset in part by a \$69.2 million increase in net earnings; a \$6.0 million increase in depreciation and amortization of property, equipment and improvements; a \$1.4 million increase in the amortization of intangible assets, and a \$2.2 million change relating to deferred income taxes.

**Table of Contents**

**JACOBS ENGINEERING GROUP INC. AND SUBSIDIARIES**

We used \$264.2 million of cash for investing activities during the six months ended March 31, 2008 compared to \$77.8 million during the corresponding period last year. The \$186.4 million increase in cash used for investing activities for the six months ended March 31, 2008 when compared to the corresponding period last year was due primarily to \$191.1 million increase in cash used for acquisitions of businesses (net of cash acquired), and a \$10.8 million increase in additions to property and equipment, net of disposals. These uses were offset in part by \$14.1 million of cash received in connection with the sale of the Company's interest in a company that provides specialized operations and maintenance services. During the six months ended March 31, 2008 we used \$230.9 million in cash, net of cash acquired and inclusive of acquisition related costs, primarily to acquire Carter & Burgess and Zate.

Our financing activities provided net cash inflows of \$30.8 million during the six months ended March 31, 2008. This compares to net cash inflows of \$5.4 million during the corresponding period last year. The \$25.3 million net increase in cash provided by financing activities for the six months ended March 31, 2008 when compared to the corresponding period last year was due primarily to a \$26.3 million increase in cash flows attributable to issuances of common stock (including the related excess tax benefits), and a \$9.1 million net increase in cash flows relating to our borrowing activities. These increases in cash outflows were offset in part by a \$10.1 million decrease to other, long-term deferred liabilities.

We believe we have adequate liquidity and capital resources to fund our operations, support our acquisition strategy, and service our debt for the next twelve months. We had \$392.5 million in cash and cash equivalents at March 31, 2008, compared to \$613.4 million at September 30, 2007, and \$480.9 million a year ago. Our consolidated working capital position at March 31, 2008 was \$995.5 million, compared to \$1.0 billion at September 30, 2007, and \$878.9 million at March 31, 2007. We have a long-term, unsecured, revolving credit facility providing up to \$290.0 million of debt capacity, under which \$32.6 million was utilized at March 31, 2008 in the form of direct borrowings. We believe that the capacity, terms and conditions of our long-term revolving credit facility is adequate for our working capital and general business requirements.

**Table of Contents****JACOBS ENGINEERING GROUP INC. AND SUBSIDIARIES****Item 3. Quantitative and Qualitative Disclosures About Market Risk.**

We do not enter into derivative financial instruments for trading, speculation or other purposes that would expose us to market risk. As more fully discussed below and in 1A *Risk Factors* included in our 2007 Form 10-K (beginning on page 18 thereto), our results of operations are exposed to risks associated with fluctuations in interest rates and currency exchange rates.

**Interest Rate Risk**

Our only committed source for long-term credit is a \$290.0 million, long-term, unsecured revolving credit facility. The total amount outstanding under this facility at March 31, 2008 was \$32.6 million. This agreement expires in May 2012, and provides for both fixed-rate and variable-rate borrowings. Our objectives in managing our interest rate risk are to limit the impact of interest rate changes on earnings and cash flows, and to lower our overall borrowing costs.

In connection with the lease of one of our offices in Houston, Texas, we entered into a floating-to-fixed interest rate swap agreement with a large U.S. bank which fixes the amount of our lease payments. At March 31, 2008 the notional amount of this hedge was \$52.2 million. This instrument allows us to receive a floating rate payment tied to the 1-month LIBOR from the counterparty in exchange for a fixed-rate payment from us. We have determined that this contract qualifies as an effective hedge under the provisions SFAS 133 *Accounting for Derivative Instruments and Hedging Activities* ( SFAS 133 ).

**Foreign Currency Risk**

In situations where our operations incur contract costs in currencies other than their functional currency, we attempt to have a portion of the related contract revenues denominated in the same currencies as the costs. In those situations where revenues and costs are transacted in different currencies, we sometimes enter into foreign exchange contracts in order to limit our exposure to fluctuating foreign currencies. We follow the provisions of SFAS 133 in accounting for our derivative contracts. At March 31, 2008, we had the following derivative contracts outstanding ( USD refers to U.S. dollar; GBP , the British Pound):

<b>Hedge</b>		<b>Notional</b>		<b>Settlement</b>
<b>Instrument</b>		<b>Amount</b>	<b>Rate</b>	<b>Year</b>
Euro Put Option		1,115,500	0.8090 / USD	2008
Euro Put Option		11,132,900	1.4510 / GBP	2009

We ve determined these contracts to be highly effective according to the provisions of SFAS 133. The contracts are recognized in our consolidated balance sheets at their fair values. Changes in the fair values of the derivatives are recorded in other comprehensive income.

**Table of Contents**

**JACOBS ENGINEERING GROUP INC. AND SUBSIDIARIES**

Concurrent with the fiscal 2004 acquisition of the Babbie Group Limited, we entered into a forward contract with a large, U.S. bank. The purpose of the contract is to hedge the Company's exposure to fluctuating foreign currency exchange rates on a £39.9 million intercompany loan between Jacobs and one of its subsidiaries. Based on the terms of the contract, we believe the effect of the loan on future earnings at March 31, 2008 should be limited to \$2.3 million of expense. At March 31, 2008, the notional amount of the contract was £39.9 million. It provides for an average exchange rate of 0.5828 GBP-to-USD, and terminates in fiscal 2011. We have determined that this derivative qualifies as a cash flow hedge under the provisions of SFAS 133.

The fair value of derivative contracts included in other deferred liabilities in the accompanying consolidated balance sheets totaled \$11.1 million and \$8.6 million at March 31, 2008 and September 30, 2007, respectively.

**Item 4. Controls and Procedures.**

Under the supervision and with the participation of the Company's management, including the Chief Executive Officer and Chief Financial Officer, the Company evaluated the effectiveness of its disclosure controls and procedures (as defined by Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended) as required by Rule 13a-15(b) of the Securities Exchange Act of 1934, as amended, as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures were effective as of March 31, 2008.

There were no changes in the Company's internal control over financial reporting during the quarter ended March 31, 2008 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

**Table of Contents**

**JACOBS ENGINEERING GROUP INC. AND SUBSIDIARIES**

**PART II - OTHER INFORMATION**

**Item 1. Legal Proceedings.**

In the normal course of business, we are subject to certain contractual guarantees and litigation. The guarantees to which we are a party generally relate to project schedules and plant performance. Most of the litigation involves us as a defendant in workers' compensation; personal injury; environmental; employment/labor; professional liability; and other similar lawsuits.

We maintain insurance coverage for various aspects of our business and operations. We have elected, however, to retain a portion of losses that occur through the use of various deductibles, limits, and retentions under our insurance programs. This situation may subject us to some future liability for which we are only partially insured, or completely uninsured. We intend to mitigate any such future liability by continuing to exercise prudent business judgment in negotiating the terms and conditions of our contracts.

Additionally, as a contractor providing services to agencies of the United States federal government, we are subject to many levels of audits, investigations and claims by, or on behalf of, the United States federal government with respect to our contract performance; pricing; costs; cost allocations; and procurement practices. Furthermore, our income, franchise, and similar tax returns and filings are also subject to audit and investigation by the Internal Revenue Service, most states within the United States as well as by various government agencies representing jurisdictions outside the United States.

In accordance with SFAS No. 5 *Accounting for Contingencies* and Interpretation No. 48 *Accounting for Uncertainty in Income Taxes, an Interpretation of FASB Statement No. 109*, we record in our consolidated balance sheets amounts representing our estimated liability relating to such claims, guarantees, litigation, and audits and investigations. We rely on qualified actuaries to assist us in determining the level of reserves to establish for insurance-related claims that are known and have been asserted against us, and for insurance-related claims that are believed to have been incurred based on actuarial analysis, but have not yet been reported to our claims administrators as of the respective balance sheet dates. We include any adjustments to such insurance reserves in our consolidated results of operations.

Management believes, after consultation with counsel, that such guarantees, litigation, United States federal government contract-related audits, investigations and claims, and income tax audits and investigations should not have any material adverse effect on our consolidated financial statements.

In addition to the matters described above, we are involved in a dispute with a client relating to a large waste incineration project in Europe. The contract was entered into by one of our subsidiaries several years prior to our acquisition of that subsidiary. The dispute involves proper waste feed; content of residues; final acceptance of the plant; and costs of operation and maintenance of the plant. We have initiated litigation against the client and are seeking in excess of \$40.0 million (approximately \$63.1 million) in damages. The client has filed a counterclaim against us, which we believe is without merit. We believe our claims are valid and enforceable and that we will be ultimately successful in obtaining a favorable judgment.

**Table of Contents**

**JACOBS ENGINEERING GROUP INC. AND SUBSIDIARIES**

On August 1, 2007 the I-35W bridge in Minneapolis, Minnesota suffered a tragic collapse. The bridge was designed and built in the early 1960's. Sverdrup & Parcel and Associates, Inc. ( "Sverdrup & Parcel" ) provided design services to the Minnesota Department of Transportation ( "MnDOT" ) on the bridge. Sverdrup & Parcel was a predecessor company to Sverdrup Corporation, a company acquired by Jacobs in 1999. The National Transportation Safety Board ( "NTSB" ) released an Interim Report identifying certain elements of the design as a possible factor in the collapse. The Company is continuing its close cooperation with the NTSB and MnDOT in their investigation of the collapse. The Company does not expect this matter to have any material adverse effect on its consolidated financial statements.

**Item 1A. Risk Factors.**

Please refer to Item 1A *Risk Factors* on pages 18 through 23 of our 2007 Form 10-K, which is incorporated herein by reference. There have been no material changes from those risk factors previously disclosed in our 2007 Form 10-K.

**Table of Contents****JACOBS ENGINEERING GROUP INC. AND SUBSIDIARIES****Item 4. Submission of Matters to a Vote of Security Holders.**

The Company's 2008 Annual Meeting of Shareholders was held at its headquarters on January 24, 2008, as previously announced in its Notice of Annual Meeting of Shareholders and Proxy Statement dated December 19, 2007, copies of which were filed with the Securities and Exchange Commission pursuant to Regulation 14A.

There were two matters voted upon by the stockholders at the Annual Meeting: (i) the election of three directors to hold office until the 2011 annual meeting and (ii) ratification of the appointment of Ernst & Young LLP as the Company's independent registered public accounting firm for the year ending September 30, 2008.

The results of the shareholder voting were as follows (all shares voted were voted by proxy):

	<b>Votes For</b>	<b>Votes Against or Withheld</b>	<b>Abstentions</b>	<b>Broker Non-votes</b>
1. Election of Directors:				
John P. Jumper	105,261,017	2,217,657	-0-	-0-
Linda Fayne Levinson	104,370,658	3,108,016	-0-	-0-
Craig L. Martin	105,352,669	2,126,005	-0-	-0-
2. Ratification of the appointment of Ernst & Young LLP as the Company's independent registered public accounting firm	106,044,605	542,649	891,249	106
