Forward Looking Statements Safe Harbor Provisions

All statements in this report that address events, developments or results that we expect or anticipate may occur in the future are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934 and the U.S. Private Securities Litigation Reform Act of 1995. In most cases, forward-looking statements may be identified by words such as may, should, expect, intend, plan, goal, contemplate, believe, estimate, predict, project, potential, continue or the negative or other variations and other similar expressions. These statements, which include, without limitation, projections regarding our future performance and financial condition are made on the basis of management's current views and assumptions with respect to future events. Any forward-looking statement is not a guarantee of future performance and actual results could differ materially from those contained in the forward looking information. The forward-looking statements, as well as our prospects as a whole, are subject to risks and uncertainties, including the following:

changes in general financial and political conditions, such as extended national or regional economic recessions, changes in housing demand or mortgage originations, changes in housing values (in particular, further deterioration in the housing, mortgage and related credit markets, which would harm our future consolidated results of operations and could cause losses for our businesses to be worse than expected), changes in the liquidity in the capital markets and the further contraction of credit markets, population trends and changes in household formation patterns, changes in unemployment rates, changes or volatility in interest rates or consumer confidence, changes in credit spreads, changes in the way investors perceive the strength of private mortgage insurers or financial guaranty providers, investor concern over the credit quality and specific risks faced by the particular businesses, municipalities or pools of assets covered by our insurance;

economic changes or catastrophic events in geographic regions where our mortgage insurance or financial guaranty insurance in force is more concentrated;

our ability to successfully obtain additional capital, if necessary, to support our long-term liquidity needs and to protect our credit ratings and the financial strength ratings of Radian Guaranty Inc., our primary mortgage insurance subsidiary;

a decrease in the volume of home mortgage originations due to reduced liquidity in the lending market, tighter underwriting standards and a deterioration in housing markets throughout the U.S.;

our ability to maintain adequate risk-to-capital ratios, leverage ratios and surplus requirements in our mortgage insurance business in light of on-going losses in this business;

a decrease in the volume of municipal bonds, and other public finance and structured finance transactions that we insure, or a decrease in the volume of such transactions for which issuers or investors seek or demand financial guaranty insurance;

the loss of a customer for whom we write a significant amount of mortgage insurance or financial guaranty insurance or the influence of large customers;

reduction in the volume of reinsurance business available to us from one or more of our primary financial guaranty insurer customers due to adverse changes in their ability to generate new profitable direct financial guaranty insurance or their need for us to reinsure their risk;

disruption in the servicing of mortgages covered by our insurance policies;

Edgar Filing: RADIAN GROUP INC - Form 10-Q

the aging of our mortgage insurance portfolio and changes in severity or frequency of losses associated with certain of our products that are riskier than traditional mortgage insurance or financial guaranty insurance policies;

the performance of our insured portfolio of higher risk loans, such as Alternative-A (Alt-A) and subprime loans, and adjustable rate products, such as adjustable rate mortgages and interest-only mortgages, which have resulted in increased losses in 2007 and 2008 and may result in further losses;

Table of Contents

reduced opportunities for loss mitigation in markets where housing values fail to appreciate or begin to decline;

changes in persistency rates of our mortgage insurance policies caused by changes in refinancing activity, in the rate of appreciation or depreciation of home values and changes in the mortgage insurance cancellation requirements of mortgage lenders and investors;

recapture of reinsurance business by the primary insurers under our financial guaranty reinsurance arrangements, which would reduce written and earned premiums in our financial guaranty business and correspondingly reduce the amount of capital required to be held against this risk;

downgrades or threatened downgrades of, or other ratings actions with respect to, our credit ratings or the ratings assigned by the major rating agencies to any of our rated insurance subsidiaries at any time (in particular, our credit rating and the financial strength ratings assigned to Radian Guaranty Inc., which are currently on CreditWatch Negative or negative outlook); which risk is discussed in more detail below in Item 1A of Part II of this report on Form 10-Q;

heightened competition for our mortgage insurance business from others such as the Federal Housing Administration and the Veterans Administration or other private mortgage insurers (in particular those that have been assigned higher ratings from the major ratings agencies);

changes in the charters or business practices of Federal National Mortgage Association (Fannie Mae) and Freddie Mac, the largest purchasers of mortgage loans that we insure, and our ability to retain our Top Tier eligibility requirement from both Freddie Mac and Fannie Mae;

heightened competition for financial guaranty business from other financial guaranty insurers, from other forms of credit enhancement such as letters of credit, guaranties and credit default swaps provided by foreign and domestic banks and other financial institutions, and from alternative structures that may permit insurers to securitize assets more cost-effectively without the need for the types of credit enhancement we offer, or result in our having to reduce the premium we charge for our products;

the application of existing federal or state consumer, lending, insurance, securities and other applicable laws and regulations, or changes in these laws and regulations or the way they are interpreted; including, without limitation: (i) the possibility of private lawsuits or formal investigations by state insurance departments and state attorneys general alleging that services offered by the mortgage insurance industry, such as captive reinsurance, pool insurance and contract underwriting, are violative of the Real Estate Settlement Procedures Act and/or similar state regulations, (ii) legislative and regulatory changes affecting demand for private mortgage insurance or financial guaranty insurance, or (iii) legislation and regulatory changes limiting or restricting our use of (or requirements for) additional capital, the products we may offer, the form in which we may execute the credit protection we provide or the aggregate notional amount of any product we may offer for any one transaction or in the aggregate;

the possibility that we may fail to estimate accurately the likelihood, magnitude and timing of losses in connection with establishing loss reserves for our mortgage insurance or financial guaranty businesses, or the premium deficiency for our first- and second-lien mortgage insurance business, or to estimate accurately the fair value amounts of derivative contracts in our mortgage insurance and financial guaranty businesses in determining gains and losses on these contracts;

volatility in our earnings caused by changes in the fair value of our derivative instruments and our need to reevaluate the premium deficiencies in our mortgage insurance business on a quarterly basis;

Edgar Filing: RADIAN GROUP INC - Form 10-Q

changes in accounting guidance from the Securities and Exchange Commission (SEC) or the Financial Accounting Standards Board;

legal and other limitations on amounts we may receive from our subsidiaries as dividends or through tax and expense sharing arrangements with our subsidiaries; and

vulnerability to the performance of our strategic investments, including in particular, our investment in Sherman Financial Group LLC.

Table of Contents

For more information regarding these risks and uncertainties as well as certain additional risks that we face, you should refer to the Risk Factors detailed in Item 1A of Part I of our Annual Report on Form 10-K for the year ended December 31, 2007 as well as the material changes to these risks discussed in Item 1A of Part II below. We caution you not to place undue reliance on these forward-looking statements, which are current only as of the date on which we filed this report. We do not intend to, and we disclaim any duty or obligation to, update or revise any forward-looking statements made in this report to reflect new information or future events or for any other reason.

Radian Group Inc.

Notes to Unaudited Condensed Consolidated Financial Statements

1. Condensed Consolidated Financial Statements Basis of Presentation

Our condensed consolidated financial statements include the accounts of Radian Group Inc. and its subsidiaries, including its principal mortgage insurance operating subsidiaries, Radian Guaranty Inc. (Radian Guaranty), Amerin Guaranty Corporation (Amerin Guaranty) and Radian Insurance Inc. (Radian Insurance), and its principal financial guaranty operating subsidiaries, Radian Asset Assurance Inc. (Radian Asset Assurance) and Radian Asset Assurance Limited (RAAL). We refer to Radian Group Inc. together with its consolidated subsidiaries as Radian, we, us or our, unless the context requires otherwise. We generally refer to Radian Group Inc. alone, without its consolidated subsidiaries, as the parent company. We own a 46% interest in Credit-Based Asset Servicing and Securitization LLC (C-BASS) and a 21.8% interest in Sherman Financial Group LLC (Sherman), each of which are credit-based consumer asset businesses.

Our condensed consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America (GAAP) and include the accounts of all wholly-owned subsidiaries. We have condensed or omitted certain information and footnote disclosures normally included in consolidated financial statements prepared in accordance with GAAP pursuant to the rules and regulations of the Securities and Exchange Commission (SEC).

The financial information presented for interim periods is unaudited; however, such information reflects all adjustments that are, in the opinion of management, necessary for a fair presentation of the statement of financial position, results of operations, and cash flows for the interim periods. These interim financial statements should be read in conjunction with the audited financial statements and notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2007. The results of operations for interim periods are not necessarily indicative of results to be expected for the full year or for any other period. The year-end condensed balance sheet data was derived from audited financial statements, but does not include all disclosures required by GAAP.

The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. While the amounts included in our condensed consolidated financial statements include our best estimates and assumptions, actual results may vary.

Basic net income per share is based on the weighted average number of common shares outstanding, while diluted net income per share is based on the weighted average number of common shares outstanding and common share equivalents that would be issuable upon the exercise of stock options and other stock-based compensation. As a result of our net loss for the three and six months ended June 30, 2008, 4,371,633 shares of our common stock issued under our stock-based compensation plans were not included in the calculation of diluted earnings per share because they were anti-dilutive.

We adopted Statement of Financial Accounting Standards (SFAS) No. 157, Fair Value Measurement (SFAS No. 157) effective January 1, 2008 with respect to financial assets and liabilities measured at fair value. SFAS No. 157, (i) defines fair value, (ii) establishes a framework for measuring fair value in GAAP and (iii) expands disclosure requirements about fair value measurements. SFAS No. 157 is effective for all financial statements issued for fiscal years beginning after November 15, 2007 on a prospective basis. There was no cumulative impact on retained earnings as a result of the adoption. The impact of SFAS No. 157 is included in the change in fair value of derivative instruments. See Note 2. In accordance with Financial Accounting Standards Board (FASB) Staff Position (FSP) SFAS No. 157-2, Effective Date of FASB Statement No. 157, we have elected to defer the effective date of SFAS No. 157 for nonfinancial assets and nonfinancial liabilities until January 1, 2009.

Table of Contents

Radian Group Inc.

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

We adopted SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities (SFAS No. 159) effective January 1, 2008. SFAS No. 159 permits entities to choose to measure financial instruments and certain other items at fair value. Items eligible for fair value measurement by this statement are (i) recognized financial assets and financial liabilities (with some exceptions), (ii) firm commitments that would otherwise not be recognized at inception and that involve only financial instruments, (iii) nonfinancial insurance contracts and warranties that an insurer can settle by paying a third party to provide those goods or services and (iv) host financial instruments resulting from separation of an embedded nonfinancial derivative instrument from a nonfinancial hybrid instrument. We elected to fair value the consolidated net interest margin securities (NIMS) variable interest entity (VIE) debt at the date the VIEs were consolidated during 2008.

We adopted FSP FASB Interpretation (FIN) No. 39-1 in the first quarter of 2008. FSP FIN No. 39-1, an amendment of FASB Interpretation No. 39, Offsetting of Amounts Related to Certain Contracts (FSP FIN No. 39-1) replaces the terms conditional contracts and exchange contracts with the term derivative instruments and permits a reporting entity to offset fair value amounts recognized for the right to reclaim cash collateral (a receivable), or the obligation to return cash collateral (a payable), against fair value amounts recognized for derivative instruments executed with the same counterparty under the same master netting arrangement that have been offset in the statement of financial position. The implementation of FSP FIN No. 39-1 did not have a material impact on our condensed consolidated financial statements at January 1, 2008.

Certain other prior period balances have been reclassified to conform to the current period presentation. Specifically, effective January 1, 2008, derivative premiums earned are now included in the change in fair value of derivative instruments. This reclassification is being adopted after agreement with member companies of the Association of Financial Guaranty Insurers (AFGI) in consultation with the staffs of the Office of the Chief Accountant and the Division of Corporate Finance of the SEC. This reclassification is being implemented in order to increase comparability of our financial statements with other financial guaranty companies with derivative contracts. The 2007 amounts have been revised to reflect this reclassification. The unrealized loss on the fair value of the long-term debt, previously included in long-term debt at December 31, 2007, has been reclassified to other liabilities.

2. Fair Value of Financial Instruments

Effective January 1, 2008, we adopted SFAS No. 157, which as discussed in Note 1, defines fair value, establishes a fair value hierarchy and requires additional disclosures for financial assets and liabilities measured at fair value. Financial instruments reported in investments (excluding held-to-maturity securities and equity-method investments) and derivative assets and liabilities are measured at fair value. In 2008, we elected to also measure at fair value our variable interest entity debt, as allowed by the provisions of SFAS No. 159.

SFAS No. 157 defines fair value as the current amount that would be exchanged to sell an asset or transfer a liability, other than in a forced liquidation or transfer, and regardless of whether an observable liquid market price exists. SFAS No. 157 requires that a fair value measurement reflect actual or hypothetical assumptions market participants would use in pricing an asset or liability based on the best information available at the measurement date. In addition, SFAS No. 157 explicitly requires that we reflect our own non-performance risk in our fair value measurements of liabilities. We use the parent company credit spreads as our primary market-based input in estimating non-performance risk. The provisions of SFAS No. 157 are reflected prospectively in earnings beginning January 1, 2008.

As required by SFAS No. 157, we established a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to financial instruments using

Table of Contents

Radian Group Inc.

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

unadjusted quoted prices in active markets for identical assets or liabilities (Level I measurements) and the lowest priority to fair value measurements using unobservable inputs (Level III measurements). The three levels of the fair value hierarchy under SFAS No. 157 are described below:

Level I Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level II Quoted prices in markets that are not active or financial instruments for which all significant inputs are observable, either directly or indirectly;

Level III Prices or valuations that require inputs that are both significant to the fair value measurement and unobservable.

Table of Contents**Radian Group Inc.****Notes to Unaudited Condensed Consolidated Financial Statements (Continued)**

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. The following is a list of those assets and liabilities that are measured at fair value by hierarchy level as of June 30, 2008:

(In millions)

| Assets and Liabilities at Fair Value (1) | Level I | Level II | Level III | Total |
|--|--------------|----------------|--------------|----------------|
| Investment Portfolio: | | | | |
| Fixed maturities available for sale | | | | |
| U.S. government and agency securities | \$ | \$ 115.3 | \$ | \$ 115.3 |
| Municipal and state securities | | 3,900.1 | | 3,900.1 |
| Corporate bonds | | 137.4 | 0.3 | 137.7 |

Radian Group Inc.

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

- (1) Excludes fixed maturities held-to-maturity and other invested assets accounted for as equity-method investments as these investments are not measured at fair value.
- (2) Represents consolidated derivative assets related to the residual interests held by the VIE utilized to structure our NIMS credit derivatives that required consolidation due to control provisions in our guarantee contracts.
- (3) Represents consolidated debt issued by the VIE utilized to structure our NIMS credit derivatives that require consolidation upon our becoming the primary beneficiary of the VIE.

The fair value of our financial instruments is determined from market pricing when available; otherwise, fair value is based on estimates using present value or other valuation methodologies. Liability amounts include adjustments related to our own non-performance risk. These estimates result in a fair value estimate of the amount that would be exchanged to transfer the asset or liability to a third party with a similar credit rating in an orderly market, if one existed. Considerable judgment is required to interpret available market data to develop the estimates of fair value. Where market pricing is not available, fair value estimates are reconciled or calibrated to market-based information, if available to us. The estimates presented herein are not necessarily indicative of the amount we could actually realize in a current market exchange. The use of different market assumptions or estimation methodologies may have a material effect on our estimated fair value amounts. Also, changes in our credit spreads over time will have a material effect on our derivative fair values. Following is a description of our valuation methodologies for financial assets and liabilities measured at fair value.

Investments

U.S. Government and agency securities The fair value of U.S government and agency securities is estimated using observed market transactions, including broker-dealer quotes and actual trade activity as a basis for valuation. U.S government and agency securities are categorized in Level II of the fair value hierarchy.

Municipal and state securities The fair value of municipal and state securities is estimated using recently executed transactions, market price quotations and pricing models that factor in, where applicable, interest rate yield curves and credit spreads for similar bonds. These securities are categorized in Level II of the fair value hierarchy.

Money market instruments The fair value of money market instruments is based on daily prices which are published and available to all potential investors. These securities are categorized in Level I of the fair value hierarchy.

Corporate bonds The fair value of corporate bonds is estimated using recently executed transactions and market quotes. In addition, a spread model is used to incorporate early redemption features, when applicable. These securities are categorized in Level II or Level III of the fair value hierarchy.

Asset-Backed Securities (ABS), Commercial Mortgage-Backed Securities (CMBS) and Collateralized Mortgage Obligations (CMOs) The fair value of ABS, CMBS and CMOs is estimated based on prices of comparable securities and spreads obtained from dealers and observable prepayment speeds. These securities are generally categorized in Level II of the fair value hierarchy.

Foreign government securities The fair value of foreign government securities is estimated using observed market yields used to create a maturity curve and observed credit spreads from market makers and broker dealers. These securities are categorized in Level II of the fair value hierarchy.

Table of Contents**Radian Group Inc.****Notes to Unaudited Condensed Consolidated Financial Statements (Continued)**

Hybrid securities These instruments are convertible securities measured at fair value based on observed trading activity and daily quotes. In addition, on a daily basis, dealer quotes are marked against the current price of corresponding underlying stock. These securities are categorized in Level II of the fair value hierarchy. For certain securities, the underlying security price may be adjusted to account for changes in the conversion and investment value from the time the quote was obtained. Such securities are categorized in Level III of the fair value hierarchy.

Equity securities The fair value of these securities is generally estimated using observable market data and bid prices from market makers and broker dealers. Generally, these securities are categorized in Level I of the fair value hierarchy as observable market data is available on these securities and they are frequently traded. Other securities that are not as liquid are categorized in Level II of the fair value hierarchy.

Other investments The fair value of these securities is generally estimated by discounting estimated future cash flows. Also included in this category are residential mortgage-backed securities (RMBS) bonds valued using internally-generated models. These securities are categorized in Level III of the fair value hierarchy.

Derivative Assets and Liabilities

Fair value is defined as the price that would be received in connection with the sale of an asset or that would be paid to transfer a liability. In determining an exit market, we consider the fact that most of our derivative contracts are unconditional and irrevocable, and contractually prohibit us from transferring them to other capital market participants. Accordingly, there is no principal market, as defined by SFAS No. 157, for such highly structured insured credit derivatives. In the absence of a principal market, we value these insured credit derivatives in a hypothetical market where market participants include other monoline financial guaranty insurers with similar credit quality, as if the risk of loss on these contracts could be transferred to other financial guaranty insurance and reinsurance companies, and we believe, in the absence of a principal market, this provides the most relevant information with respect to fair value estimates.

We determine the fair value of our derivative assets and liabilities using internally-generated models. We reconcile or calibrate key inputs to market-based information, when available. Beginning in the first quarter of 2008, in accordance with SFAS No. 157, we made an adjustment to our derivative liabilities valuation methodology to account for our own non-performance risk by incorporating our observable credit default swap spread into the determination of the fair value of our credit derivatives. Our five-year credit default swap spread widened by 2,493 basis points to 2,530 basis points from January 1, 2007 to June 30, 2008. Considerable judgment is required to interpret market data to develop the estimates of fair value. Accordingly, the estimates are not necessarily indicative of amounts we could realize in a current market exchange. The use of different market assumptions and/or estimation methodologies may have a significant effect on the estimated fair value amounts.

Put Options on CPS The fair value of our put options on CPS is estimated based on the present value of the spread differential between the current market rate of issuing a perpetual preferred security and the maximum rate of a perpetual preferred security as specified in our put option agreements. In determining the current market rate, consideration is given to our current CDS spread as well as market observation of similar securities issued, when available. The spread differential is assumed to be fixed in perpetuity at the balance sheet date and the annual differential cost is discounted at our current CDS spread, adjusted for a market-implied recovery rate. The put options on CPS are categorized in Level III of the fair value hierarchy.

The change in fair value of these put options will fluctuate with changes in our CDS spread. As discussed above, our CDS spread has widened significantly since 2007, and given this volatility, it is difficult to predict

Table of Contents**Radian Group Inc.****Notes to Unaudited Condensed Consolidated Financial Statements (Continued)**

with reasonable likelihood the magnitude of future changes. The sensitivity of our CDS spread to our June 30, 2008 fair value, assuming as of June 30, 2008 a 1,000 basis point widening, was an unrealized gain of approximately \$5 million, while a 1,000 basis point tightening would have resulted in an unrealized loss of \$10 million. The put options on CPS are categorized in Level III of the fair value hierarchy.

NIMS credit derivatives and NIMS VIE derivative assets NIMS credit derivatives are financial guarantees we have issued on NIMS which we are required to account for as derivatives. NIMS VIE derivative assets represent derivative assets in the NIMS trusts that we are required to consolidate in accordance with FIN No. 46R, Consolidation of Variable Interest Entities (FIN No. 46R). See Note 4. The gains and losses on these financial instruments are derived from internally-generated models. We use market-based roll rates and internally-developed loss assumptions to estimate losses in each securitization underlying either the NIMS credit derivatives or the NIMS VIE derivative assets. We then project prepayment speeds on the underlying collateral in each securitization, incorporating actual and historical prepayment experience. The estimated loss and prepayment speeds are used to estimate the cash flows for each underlying securitization and NIMS bond, and ultimately, to produce the projected credit losses for each NIMS bond. In addition to expected credit losses, the fair value for each NIMS credit derivative is approximated by incorporating future expected premiums to be received from the NIMS trust. The projected net losses are discounted using a rate of return that incorporates our own non-performance risk, and based on our current credit default swap spread level, results in a significant reduction of the derivative liability. Because NIMS guarantees are not market-traded instruments, considerable judgment is required in estimating fair value. The use of different assumptions and/or methodologies could have a significant effect on estimated fair values. The NIMS credit derivatives are categorized in Level III of the fair value hierarchy. As a result of having to consolidate several NIMS structures, the derivative assets held by the NIMS VIE are also fair valued using the same internally-generated valuation model. Expected losses are estimated for each transaction using projected default rates based on historical experience of similar transactions. There are no collateral recovery rates assumed given the loss position of the NIMS in the transaction structures.

Changes in our expected credit losses on NIMS could have a significant impact on our fair value estimate. The net present value of our expected credit losses, using a risk-free discount rate, was \$450 million as of June 30, 2008, which is our best estimate of settlement value and represents 93% of our total maximum loss exposure of \$485 million. The fair value of our total net liabilities related to NIMS as of June 30, 2008, was \$225 million. Our fair value methodology incorporates a discount rate that is based on our credit default swap spread, which has resulted in a fair value amount that is substantially less than the expected settlement. Changes in the loss estimates will impact the market value directly, reduced only by the present value factor, which is dependent on the timing of the expected losses. Expected losses are estimated for each transaction using projected default rates based on historical experience of similar transactions. There are no collateral recovery rates assumed given the loss position of the NIMS in the transaction structures. The NIMS VIE derivative assets are also categorized in Level III of the fair value hierarchy.

Corporate CDOs The estimated fair value of these direct derivative financial guaranty contracts is derived from internally-generated models. The fair value of each of our Corporate CDO contracts is calculated as the net present value of the difference between the contractual premium and our estimate of the premium that a financial guarantor of similar credit quality would charge us to provide the same credit protection as of the measurement date (the fair premium) when transferring our obligations. Fair value amounts derived from our model are generated using market-based inputs to the extent available; the most significant variable used in determining the fair premium are market spreads identified through the credit default swap index (CDX), which is an industry standard credit default swap index. Credit spreads on individual issuers in our collateral pool are used to derive an equivalent risk tranche on the CDX index. When credit spreads on individual issuers are not available, the average credit spread of similar companies is used. Other factors that are considered before determining the equivalent risk tranche for each transaction include differences between standard CDX collateral and our tailored

Table of Contents**Radian Group Inc.****Notes to Unaudited Condensed Consolidated Financial Statements (Continued)**

portfolios in terms of geographic and sector composition, as well as the remaining life of the transaction. Once the equivalent risk tranche is established, observed changes in those market CDX spreads establish changes to the fair premium for each transaction. The observed changes in the spreads reflect pricing for deals that require collateral posting for changes in fair value that create a payable to our counterparties. Finally, in order to adjust for our non-performance risk, we use the market-implied default probability derived from our CDS spread curve and the relative relationship between a potential underlying collateral default and potential default by us. Because our contracts do not require collateral to be posted against our fair value liabilities, this adjustment for non-performance risk is more significant than other market participants whose contracts do require collateral posting. The present value of our fair premium is determined by discounting the projected fair premium amounts determined as described above using our CDS spread curve plus a risk-free rate.

Our estimated fair value of Corporate CDOs could change significantly given changes in the CDX spread. As of June 30, 2008, a 25 basis point change in the spread on an equivalent risk tranche of the CDX index would have resulted in a change of approximately \$6 million to our fair value asset of \$65 million, assuming our own credit default swap spread remains constant. As of June 30, 2008, a 1,000 basis point widening or tightening in our credit default swap spread, assuming the CDX spread remains constant, would have resulted in an immaterial change to our current fair value. Because our credit default swap spread is at such a wide level, the current fair value amount is relatively insensitive to reasonably likely changes. These credit derivatives are categorized in Level III of the fair value hierarchy.

Non-Corporate CDOs The estimated fair value of these direct financial guaranty derivative contracts relates to our guaranty of Trust Preferred securities (TRUPS) CDOs, RMBS CDOs, CMBS CDOs and CDOs backed by other asset classes such as credit card receivables, municipal bonds, project finance and auto loans. Like our Corporate CDOs, the fair value of our Non-Corporate CDO contracts is calculated as the net present value of the difference between the contractual premium and our estimate of the fair premium. The fair premium is estimated using dealer quotes on similarly structured transactions when available. When dealer quotes are not available, we utilize internal models to estimate fair premium amounts. The methodologies utilized to determine these fair premiums are described below.

For our RMBS and CMBS CDOs, we derive our fair premium amounts by utilizing the observed market spreads of ABX, CMBX and TABX indices, and making adjustments to the indices to account for differences in our collateral. We develop a tranche-collateral sensitivity factor that adjusts the observed tranche price movement from these indices to the collateral price movement by taking into account differences for each deal, such as rating. The resulting spread after adjustment represents the fair premium before considering Radian's non-performance risk adjustment.

The estimated fair values of TRUPS are derived from internally-generated models where the change in fair premium is calculated based on the weighted average CDS spread of a group of investment grade and high yield institutions whose market risk is similar to the specific financial institutions underlying our TRUPS, which do not have observable CDS spreads or other market indices. These collateral CDS spreads, are then used to determine the corresponding change in the spread of the tranche that our contracts insure, by developing a loss curve based on collateral CDS spreads and then using the loss curve to determine implied market spreads on our insured tranche for each transaction. Further adjustments to these spreads are then calculated for each transaction based on its remaining average life. The resulting spread after applying these adjustments is the fair premium before Radian's non-performance risk adjustment.

In instances where dealer quotes are not available and market indices are not available or not appropriate, we utilize an internal model, similar to those used by other monoline insurers, to estimate fair value. This model estimates fair premium based on a market rate of return that would be required for a monoline insurer to

Table of Contents**Radian Group Inc.****Notes to Unaudited Condensed Consolidated Financial Statements (Continued)**

undertake the contract risk. The fair premium amount is calculated as the premium required to achieve a market rate of return over an internally developed economic capital amount, expected losses and other expenses. Expected losses are projected by our model based on current rating, tenor, asset class, and current par outstanding for each deal.

For all of our non-Corporate CDOs, an adjustment to the fair value amounts described above is also made to incorporate our own non-performance risk. This methodology is described above under Corporate CDOs.

Changes in our estimated fair values primarily result from changes in observed indices as discussed above where available. A 25 basis point change in these observed indices would have resulted in a change of \$1 million to our fair value liability of \$237 million as of June 30, 2008. We utilize our CDS spread curve, along with other assumptions regarding the correlation of underlying collateral default to our default as of the end of the valuation period, in order to adjust the fair market value to reflect the market's perception of our non-performance risk. As of June 30, 2008, a 1,000 basis point widening or tightening in our credit default swap spread, assuming other observed index spreads remain constant, would have resulted in an immaterial change to our current fair value. Because our credit default swap spread is at such a wide level, the current fair value amount is relatively insensitive to reasonably likely changes. These credit derivatives are categorized in Level III of the fair value hierarchy.

Assumed financial guaranty credit derivatives In making our own determination of fair value for these credit derivatives, we use information provided to us by our counterparties to these reinsurance transactions, which are the primary insurers (the primaries) of the underlying credits, including the primaries' fair valuations for these credits. The estimated fair value of pooled corporate CDO CDS contracts is based on the primaries' pricing models that use the Dow Jones CDX for domestic corporate CDS contracts and iTraxx for European corporate CDS contracts. Each index provides price quotes for standard attachment and detachment points for contracts with maturities of three, five, seven and ten years. The quoted index price is calibrated by the primaries to the typical attachment points for that type of CDS contract in order to derive the appropriate value. The value of CDS and collateralized loan obligation (CLO) contracts is estimated with reference to the all-in London Interbank Offered Rate (LIBOR) spread in the current published JP Morgan High Yield CLO Triple-A Index, which includes a credit and funding component. The primaries' models used to estimate the fair values of these instruments include a number of factors, including credit spreads, changes in interest rates, changes in correlation assumptions, current delinquencies, recovery rates and the credit ratings of referenced entities. In establishing our fair value marks for these transactions, we assess the reasonableness of the primaries' valuations by (1) reviewing the primaries' publicly available information regarding their mark-to-market processes, including methodology and key assumptions; and (2) discussing the changes in fair value with the primaries where the changes appear unusual or do not appear materially consistent with credit loss related information provided by the primaries for these transactions. In each of these quarters, the change in fair value of our assumed financial guaranty credit derivatives represented less than 2.5% of our cumulative unrealized gains or losses on all credit derivatives at June 30, 2008. These credit derivatives are categorized in Level III of the fair value hierarchy.

Mortgage Insurance domestic and international CDS In determining the estimated fair value of our mortgage insurance domestic CDS, we use the following information: (1) fair value quotes obtained from our counterparties, (2) independent pricing generated internally utilizing observed changes in the ABX index that most closely approximate the collateral underlying our transactions, and (3) on certain transactions, where available, independent price quotes from a nationally recognized pricing firm. In determining the estimated fair value of our mortgage insurance international CDS, we use the following information: (1) fair value quotes from our counterparties, which are based on quotes for transactions with similar underlying collateral from market

Table of Contents**Radian Group Inc.****Notes to Unaudited Condensed Consolidated Financial Statements (Continued)**

makers and other broker dealers, and (2) in the absence of observable market data for these deals, a review of monthly information regarding the performance of the underlying collateral and discussion with our counterparties regarding any unusual or inconsistent changes in fair value. In either case, in the event there are material inconsistencies in the inputs to determination of estimated fair value, they are reviewed and a final determination is made by management in light of the specific facts and circumstances surrounding each price. These credit derivatives are categorized in Level III of the fair value hierarchy.

Changes in our expected credit losses on Mortgage Insurance domestic CDS could have a significant impact on our fair value estimate for this product, with a maximum loss exposure of \$206 million. Changes in the loss estimates will impact the market value directly, reduced only by the present value factor, which is dependent on the timing of the expected losses. However, in light of our comparatively small amount of notional exposure to mortgage insurance domestic CDS, we do not expect changes in the fair value of this product to materially impact the overall fair value of our credit derivatives. The change in fair value of our mortgage insurance international CDS represented less than 2% of our cumulative unrealized gains or losses on all credit derivatives.

The following table is a rollforward of Level III assets and liabilities measured at fair value for the quarter ended June 30, 2008:

| (In millions) | Beginning Balance at March 31, 2008 | Realized Gains/ (Losses) | Unrealized Gains/(Losses) | Purchases, Sales, Issuances & Settlements | Transfers Into (Out of) Level III (2) | Ending Balance at June 30, 2008 |

| Total Level III liabilities, net | \$ (1,297.7) | \$ (23.3) | \$ 35.5 | \$ 691.6 | \$ (19.0) | \$ | \$ (612.9) |

- (1) Included in this amount is a \$30.1 million reduction related to our purchase of NIMS bonds that we guarantee, which is part of our loss mitigation efforts.
- (2) These unearned premiums were reclassified after adoption of an agreement with member companies of the Association of Financial Guaranty Investors (AFGI) in consultation with the staffs of the Office of the Chief Accountant and the Division of Corporate Finance of the SEC. This reclassification was implemented in order to increase comparability of our financial guaranty companies with derivative contracts.
- (3) Transfers are assumed to be made at the end of the period.

At June 30, 2008, our total Level III assets approximated 4.0% of total assets measured at fair value and our total Level III liabilities accounted for 100.0% of total liabilities measured at fair value. Realized and unrealized gains and losses on Level III assets and liabilities in the rollforward represent gains and losses for the periods in which they were classified as Level III. In the first half of 2008, credit spreads on underlying

Edgar Filing: RADIAN GROUP INC - Form 10-Q

collateral, both corporate credit spreads and asset-backed spreads, widened significantly, which resulted in large unrealized losses on these positions. Offsetting these losses, due to the incorporation of our non-performance risk into our

Table of Contents

Radian Group Inc.

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

fair value measurements as required by SFAS No. 157, the fair value of our liabilities was reduced by approximately \$2.0 billion, in the aggregate. The largest component of this reduction in value related to the valuation of our Corporate CDOs. The credit protection we offer on Corporate CDOs is generally senior investment grade debt, which carries a weighted average spread of approximately 112 basis points. Based on the June 30, 2008 parent company CDS spread of 2,530 basis points, the market valuation of our credit protection of these highly rated underlying tranches is minimal at June 30, 2008, resulting in a very low discounted fair premium amount.

At June 30, 2008, we also consolidated certain NIMS transactions requiring the reversal of a \$75.0 million NIMS credit derivative liability and the recognition of VIE debt of \$85.7 million and NIMS derivative assets of \$10.7 million. During the first quarter of 2008, we transferred some of our hybrid securities from Level III to Level II due to the fact that at the time the securities were purchased there was no active market or observable inputs. These securities were more frequently traded, which provided observable inputs for our valuation. Realized and unrealized gains and losses on investments and VIE debt included in Level III are generally recorded in net gains (losses) on other financial instruments; unrealized gains and losses of certain RMBS securities included in other investments were reflected in change in fair value of derivative instruments. Realized and unrealized gains and losses on all other Level III derivative assets and liabilities are recorded in change in fair value of derivative instruments.

SFAS No. 159 permits certain financial assets and liabilities to be measured at fair value. In 2008, we elected to record at fair value the consolidated NIMS VIE debt. We elected to fair value these instruments in order to more accurately reflect a value that reflects our financial guaranty obligations associated with the NIMS. At June 30, 2008, the face value of our consolidated liability is \$149.0 million and includes \$14.8 million that has been issued by our consolidated trusts, but is not guaranteed by us.

3. Derivative Instruments and Hedging Activities

We account for derivatives under SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities* (SFAS No. 133), as amended and interpreted. In general, SFAS No. 133 requires that all derivative instruments be recorded on the balance sheet at their respective fair values and changes in fair value recorded in net income unless the derivatives qualify as hedges. If the derivatives qualify as hedges, depending on the nature of the hedge, changes in the fair value of the derivatives are either offset against the change in fair value of assets, liabilities, or firm commitments through earnings, or are recognized in accumulated other comprehensive income (loss) until the hedged item is recognized in earnings.

All our derivative instruments are recognized in our condensed consolidated balance sheets as either derivative assets or derivative liabilities, depending on the rights or obligations under the contracts. The interest-rate swaps that we had entered into qualified as hedges and were accounted for as fair value hedges. Our credit protection in the form of credit default swaps and other credit derivatives within both our mortgage insurance and financial guaranty segments and NIMS are not designated as hedges under SFAS No. 133, so changes in their fair value are included in current earnings in our condensed consolidated statements of operations. Net unrealized gains and losses on credit default swaps and certain other derivative contracts are included in either derivative assets or derivative liabilities on our condensed consolidated balance sheets.

We apply the guidance of SFAS No. 155, *Accounting for Certain Hybrid Financial Instruments* (SFAS No. 155), an amendment of SFAS Nos. 133 and 140, which (i) permits fair value remeasurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation, (ii) clarifies which interest-only strips and principal-only strips are not subject to the requirements of SFAS No. 133, (iii) establishes a requirement to evaluate interests in securitized financial assets to identify interests that are

Table of Contents**Radian Group Inc.****Notes to Unaudited Condensed Consolidated Financial Statements (Continued)**

freestanding derivatives or that are hybrid financial instruments that contain an embedded derivative requiring bifurcation, (iv) clarifies that concentrations of credit risk in the form of subordination are not embedded derivatives and (v) amends SFAS No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities (SFAS No.140) to eliminate the exemption from applying the requirements of SFAS No. 133 on a qualifying special-purpose entity from holding a derivative financial instrument that pertains to a beneficial interest other than another derivative financial instrument.

Accordingly, certain securities that were previously classified as trading securities or fixed maturities available for sale on our condensed consolidated balance sheets were reclassified to hybrid securities on our condensed consolidated balance sheets at the date of adoption. In addition, as allowed under the provisions of SFAS No. 155, we elected to record convertible securities at fair value with changes in the fair value recorded as net gains or losses on other financial instruments. At adoption, on January 1, 2007, we recorded an after-tax reclassification, which increased retained earnings and decreased other comprehensive income by \$9.8 million, which represented the cumulative adjustment to fair value.

A summary of our derivative assets and liabilities, as of and for the periods indicated, is as follows:

| Balance Sheets (In millions) | June 30 2008 | December 31 2007 |
|---|-------------------------|-----------------------------|
| Derivative assets: | | |
| Financial Guaranty credit derivative assets | \$ 130.2 | \$ 8.0 |
| NIMS VIE derivative assets | 10.7 | |
| Put options on CPS (1) | 110.1 | 35.2 |
| Total derivative assets | 251.0 | 43.2 |
| Derivative liabilities: | | |
| Financial Guaranty credit derivative liabilities | 348.9 | 785.6 |
| NIMS | 149.8 | 433.9 |
| Mortgage Insurance domestic and international CDS | 158.7 | 86.2 |
| Total derivative liabilities | 657.4 | 1,305.7 |
| Total derivative liabilities, net | \$ (406.4) | \$ (1,262.5) |

These amounts represent gross unrealized gains and gross unrealized losses on derivative assets and liabilities.

The notional value of our derivative contracts at June 30, 2008 and December 31, 2007 was \$58,643 million and \$57,707 million, respectively.

The components of the gain (loss) included in change in fair value of derivative instruments are as follows:

| Statements of Operations (In millions) | Three Months Ended June 30 | | Six Months Ended June 30 | |
|--|---------------------------------------|-------------|-------------------------------------|-------------|
| | 2008 | 2007 | 2008 | 2007 |
| Net premiums earned derivatives (2) | \$ 20.9 | \$ 36.9 | \$ 46.1 | \$ 71.5 |
| Financial Guaranty credit derivative liabilities | (13.1) | (32.5) | 567.8 | (7.4) |

Edgar Filing: RADIAN GROUP INC - Form 10-Q

| | | | | |
|---|---------|-----------|----------|-----------|
| NIMS | 58.5 | (60.9) | 155.0 | (59.5) |
| Mortgage Insurance domestic and international CDS | (38.9) | (9.7) | (71.2) | (22.4) |
| Put options on CPS (1) | 30.6 | | 72.0 | |
| Other | (1.8) | | (5.7) | |
| Change in fair value of derivative instruments | \$ 56.2 | \$ (66.2) | \$ 764.0 | \$ (17.8) |

Table of Contents**Radian Group Inc.****Notes to Unaudited Condensed Consolidated Financial Statements (Continued)**

- (1) Prior to the fourth quarter of 2007, this amount was immaterial to the condensed consolidated financial statements.
- (2) In previous periods, net premiums earned on derivatives were reported in premiums earned in our condensed consolidated statements of operations. This reclassification is the result of a financial guaranty industry-wide effort, in consultation with the SEC, to present the results from credit derivative transactions consistently.

The application of SFAS No. 133, as amended, could result in volatility from period to period in gains and losses as reported on our condensed consolidated statements of operations. Generally, these gains and losses result from changes in corporate credit or asset-backed spreads and changes in the creditworthiness of underlying corporate entities or the credit performance of the assets underlying an asset-backed security. Any incurred gains or losses on our financial guaranty contracts that are accounted for as derivatives are recognized as a change in the fair value of derivative instruments. Beginning in the first quarter of 2008, as required by the provisions of SFAS No. 157, we also incorporated factors to include our own non-performance risk. This change in methodology resulted in an increase in the change in fair value of derivative instruments of \$2.0 billion. We cannot reasonably predict the effect the volatility our fair value estimates may have on our financial position or results of operations for future periods.

4. Variable Interest Entities

As a provider of credit enhancement, we periodically transact with entities that may be VIEs. VIEs are corporations, trusts or partnerships that are established for a limited purpose and must be evaluated in accordance with the guidance in FASB Interpretation No. 46, Consolidation of Variable Interest Entities (revised) an interpretation of Accounting Research Bulletin (ARB) No. 51 (FIN No. 46R). Special purpose entities (SPEs), by their nature, are generally not controlled by their equity owners, as the establishing documents govern all material decisions. In accordance with FIN No. 46R, we consolidate VIEs in which we are the primary beneficiary of the variable interests, or a combination of variable interests, that will either (i) absorb a majority of the VIE s expected losses, (ii) receive a majority of the VIE s expected residual returns or (iii) both. To determine if we are the primary beneficiary of a VIE, we review, among other factors, the VIE s design, capital structure, contractual terms, which interests create or absorb variability and related party relationships, if any. Additionally, we may calculate our share of the VIE s expected losses and expected residual returns based upon the VIE s contractual arrangements and/or our position in the VIE s capital structure.

Mortgage Insurance We guarantee the payment of principal and interest on NIMS which are structured as qualifying special purpose entities. There are certain control provisions in our guarantee contracts that give us the ability to call the NIMS upon certain events of contractual non-performance of third parties. Under these circumstances, the VIE would not be exempt from consolidation considerations under FIN No. 46R. At June 30, 2008, there were 13 such transactions requiring consolidation in our condensed consolidated balance sheets. The amount included in other assets and variable interest entity debt related to these trusts was \$10.7 million and \$85.7 million, respectively. The consolidated NIMS assets are treated as derivatives in accordance with SFAS No. 133, and recorded at fair value. The consolidated NIMS VIE debt is recorded at fair value as allowed by the provisions of SFAS No. 159.

Table of Contents**Radian Group Inc.****Notes to Unaudited Condensed Consolidated Financial Statements (Continued)**

The following is summary information related to NIMS trusts as of the dates indicated:

| (in millions) | June 30, 2008 | | |
|--------------------|----------------------------------|--------------------------------------|--|
| | Total NIMS Trust Assets | Radian Exposure to NIMS Assets | Average Rating of Collateral at Inception |
| VIE Assets NIMS | \$ 603.7 | \$ 485.4 | BBB to BB |

| (in millions) | December 31, 2007 | | |
|--------------------|----------------------------------|--------------------------------------|--|
| | Total NIMS Trust Assets | Radian Exposure to NIMS Assets | Average Rating of Collateral at Inception |
| VIE Assets NIMS | \$ 730.2 | \$ 603.7 | BBB to BB |

Financial Guaranty Our involvement with VIEs has a material role in our financial guaranty business as a guarantor of beneficial interests held by third party investors. Our guarantees in the financial guaranty business generally are structured as financial guarantees or credit default swaps guaranteeing principal and interest payments to beneficial interest holders. In certain of these VIEs, we could potentially be the primary beneficiary of the entity's variable interests through our participation in the VIE and certain beneficial interests. Consequently, we would be required to consolidate the assets and liabilities of the VIE. At June 30, 2008, there were no VIEs that required consolidation in our financial guaranty business.

5. Investments

We classify assets in our investment portfolio into one of three main categories: held to maturity, available for sale or trading securities. Fixed-maturity securities for which we have the positive intent and ability to hold to maturity are classified as held to maturity and reported at amortized cost. Investments classified as available for sale are reported at fair value, with unrealized gains and losses (net of tax) reported as a separate component of stockholders' equity as accumulated other comprehensive income. Investments classified as trading securities are reported at fair value, with unrealized gains and losses reported as a separate component of income. Amortization and accretion are calculated principally using the interest method over the term of the investment. Realized gains and losses on investments are recognized using the specific identification method.

In accordance with SFAS No. 155, effective January 1, 2007, all changes in the fair value of the unbifurcated convertible securities are recorded as net gains or losses on other financial instruments in our condensed consolidated statements of operations. Our transition adjustment related to the adoption of SFAS No. 155 increased retained earnings at January 1, 2007 by \$9.8 million, and reduced accumulated other comprehensive income by the same amount. The transition amount includes unrealized gains of \$14.1 million (net of tax) and unrealized losses of \$4.3 million (net of tax) related to convertible securities at December 31, 2006.

For securities in our investment portfolio, we conduct a quarterly evaluation of declines in market value of the securities to determine whether the decline is other-than-temporary. If a security's fair value is below its cost basis, and it is judged to be an other-than-temporary decline, the cost basis of the individual security is written down to fair value through earnings as a realized loss and the fair value becomes the new basis for the security. During the second quarter and six months ended June 30, 2008, we recorded approximately \$23.1 million and \$37.1 million, respectively, of charges related to declines in the fair value of securities (primarily municipal and taxable bonds) considered to be other-than-temporary. During the second quarter and six months ended June 30, 2007, we recorded \$0.2 million and \$0.8 million, respectively, of charges related to declines in the fair value of securities considered to be other-than-temporary. At June 30, 2008 and 2007, there were no other investments held in the portfolio that were determined to be other-than-temporarily impaired.

Table of Contents**Radian Group Inc.****Notes to Unaudited Condensed Consolidated Financial Statements (Continued)**

Our evaluation of price declines in fair value for other-than-temporary impairment is performed by management on a case-by-case basis. We consider a wide range of factors regarding the security and use our best judgment in evaluating the cause of the decline in the estimated fair value of the security and in assessing the prospects for near-term recovery. Considerations used by us in the impairment evaluation process include, but are not limited to: (i) the length of time and the extent to which the market value has been below cost or amortized cost, (ii) the potential for impairments of securities when the issuer is experiencing significant financial difficulties, (iii) the potential for impairments in an entire industry sector or sub-sector, (iv) the potential for impairments in certain economically depressed geographic locations, (v) the potential for impairments of securities where the issuer, series of issuers or industry has suffered a catastrophic type of loss or has exhausted natural resources, (vi) our ability and intent to hold the security for a period of time sufficient to allow for the full recovery of its value to an amount equal to or greater than cost or amortized cost, (vii) unfavorable changes in forecasted cash flows on asset-backed securities, and (viii) other subjective factors, including concentrations and information obtained from regulators and rating agencies.

The following table shows the gross unrealized losses and fair value of our investments with unrealized losses that are not deemed to be other-than-temporarily impaired, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, at June 30, 2008.

| (In thousands) | Less Than 12 Months | | 12 Months or Greater | | Total | |
|----------------------------------|---------------------|-------------------|----------------------|-------------------|--------------|-------------------|
| | Fair Value | Unrealized Losses | Fair Value | Unrealized Losses | Fair Value | Unrealized Losses |
| Description of Securities | | | | | | |
| U.S. government securities | \$ 12,206 | \$ 252 | \$ 200 | \$ 3 | \$ 12,406 | \$ 255 |
| State and municipal obligations | 1,042,104 | 44,526 | 497,638 | 41,772 | 1,539,742 | 86,298 |
| Corporate bonds and notes | 73,541 | 2,549 | 12,705 | 1,090 | 86,246 | 3,639 |
| Asset-backed securities | 173,678 | 2,868 | 34,843 | 1,109 | 208,521 | 3,977 |
| Private placements | 7,267 | 246 | 1,536 | 88 | 8,803 | 334 |
| Foreign governments | 32,314 | 502 | 35,689 | 1,500 | 68,003 | 2,002 |
| Equity securities | 102,380 | 8,005 | 428 | 146 | 102,808 | 8,151 |
| Total | \$ 1,443,490 | \$ 58,948 | \$ 583,039 | \$ 45,708 | \$ 2,026,529 | \$ 104,656 |

U.S. government securities

The unrealized losses of 12 months or greater duration as of June 30, 2008 on our investments in U.S. Treasury obligations were caused by interest rate movement. The contractual terms of these investments do not permit the issuer to settle the securities at a price less than the par value of the investment. Because we have the ability and intent to hold these investments until a full recovery of fair value, which may be maturity, we do not consider these investments to be other-than-temporarily impaired at June 30, 2008.

State and municipal obligations

The unrealized losses of 12 months or greater duration as of June 30, 2008 on our investments in tax-exempt state and municipal securities were caused primarily by interest rate movement. Some securities with exposures to certain sectors, particularly those insured by monoline insurers, experienced credit spread widening during 2007 and 2008. We do not own any securities with underlying non-investment grade ratings that are insured by monoline insurance companies. Because we have the ability and intent to hold these investments until a full recovery of fair value, which may be maturity, we do not consider these investments to be other-than-temporarily impaired at June 30, 2008.

Corporate bonds and notes

The unrealized losses of 12 months or greater duration as of June 30, 2008 on the majority of the securities in this category were caused by market interest rate movement. Certain securities, mainly those issued by

Table of Contents**Radian Group Inc.****Notes to Unaudited Condensed Consolidated Financial Statements (Continued)**

financial firms with exposure to subprime residential mortgages, experienced spread widening during 2007 and 2008. Because we have the ability and intent to hold these investments until a full recovery of fair value, which may be maturity, we do not consider these investments to be other-than-temporarily impaired at June 30, 2008.

Asset-backed securities

The unrealized losses of 12 months or greater duration as of June 30, 2008 on the securities in this category were caused by market interest rate movement. The ABS in our investments are senior tranche positions, collateralized by pools of credit card, auto loan and equipment lease receivables. The ratings of these investments are supported by credit enhancements which include subordination, over-collateralization and reserve accounts. Most of our ABS investments are rated AAA by Standard & Poor's Ratings Service (S&P). Three securities carry S&P investment grade ratings below AAA due to recent ratings downgrades of the financial guarantors for these securities. Because we have the ability and intent to hold these investments until a full recovery of fair value, which may be maturity, we do not consider the investment in these securities to be other-than-temporarily impaired at June 30, 2008.

Private placements

The unrealized losses of 12 months or greater duration as of June 30, 2008 on the majority of the securities in this category were caused by market interest rate movement. Because we have the ability and intent to hold these investments until a full recovery of fair value, which may be maturity, we do not consider the investment in these securities to be other-than-temporarily impaired at June 30, 2008.

Foreign governments

The unrealized losses of 12 months or greater duration as of June 30, 2008 on the majority of the securities in this category were caused by market interest rate movement. We believe that credit quality did not impact security pricing due to the relative high quality of the holdings (i.e., the majority of the securities were highly-rated governments and government agencies or corporate issues with minimum ratings of single-A). Because we have the ability and intent to hold these investments until a full recovery of fair value, which may be maturity, we do not consider these investments to be other-than-temporarily impaired at June 30, 2008.

For all investment categories, unrealized losses of less than 12 months in duration were generally attributable to interest rate movement. In addition, certain securities experienced spread widening due to issuers' exposure to subprime residential mortgages. All securities were evaluated in accordance with our impairment recognition policy covering various time and price decline scenarios. Because we have the ability and intent to hold these investments until a full recovery of fair value, which may be maturity, we do not consider the investment in these securities to be other-than-temporarily impaired at June 30, 2008.

The contractual maturity of securities in an unrealized loss position at June 30, 2008 was as follows:

| (In thousands) | Fair Value | Amortized Cost | Unrealized Loss |
|-------------------|--------------|----------------|-----------------|
| 2008 | \$ 2,786 | \$ 2,807 | \$ 21 |
| 2009 - 2012 | 80,787 | 81,960 | 1,173 |
| 2013 - 2017 | 155,816 | 159,950 | 4,134 |
| 2018 and later | 1,684,332 | 1,775,509 | 91,177 |
| Equity securities | 102,808 | 110,959 | 8,151 |
| Total | \$ 2,026,529 | \$ 2,131,185 | \$ 104,656 |

Table of Contents**Radian Group Inc.****Notes to Unaudited Condensed Consolidated Financial Statements (Continued)****6. Segment Reporting**

We have three reportable segments: mortgage insurance, financial guaranty and financial services. We allocate corporate income and expenses to each of the segments. We evaluate operating segment performance based principally on net income. Summarized financial information concerning our operating segments, as of and for the year-to-date periods indicated, are as follows:

| | Three Months Ended | | Six Months Ended | |
|---|---------------------|--------------------|---------------------|------------------|
| | June 30 | | June 30 | |
| Mortgage Insurance (In thousands) | 2008 | 2007 | 2008 | 2007 |
| Net premiums written insurance (1) | \$ 199,030 | \$ 197,507 | \$ 410,281 | \$ 403,918 |
| Net premiums earned insurance | \$ 205,096 | \$ 185,588 | \$ 409,361 | \$ 365,831 |
| Net investment income | 38,941 | 36,287 | 77,786 | 71,846 |
| Change in fair value of derivative instruments | 25,173 | (49,410) | 96,942 | (45,072) |
| Net gains (losses) on other financial instruments | 10,444 | 19,356 | (26,289) | 30,479 |
| Other income | 2,999 | 2,726 | 6,490 | 5,575 |
| Total revenues | 282,653 | 194,547 | 564,290 | 428,659 |

- (1) With the exception of trade credit reinsurance products, net premiums written in our financial guaranty reinsurance business are recorded using actual information received from cedants on a one month lag basis. Accordingly, the net premiums written for any given period exclude those from the last month of that period and include those from the last month of the immediately preceding period. The use of information from cedants does not require us to make significant judgments or assumptions because historic collection rates and counterparty strength make collection of all assumed premiums highly likely. There were no material trade credit reinsurance premiums written for the six months ended June 30, 2008 or 2007.

Edgar Filing: RADIAN GROUP INC - Form 10-Q

For the quarters ended June 30, 2008 and 2007, our domestic premiums earned from all of our segments were \$256.9 million and \$245.9 million, respectively, and our premiums earned attributable to foreign countries were approximately \$13.1 million and \$9.0 million, respectively. For the six months ended June 30, 2008 and 2007, our domestic premiums earned from all of our segments were \$513.4 million and \$484.8 million, respectively, and our premiums earned attributable to foreign countries were approximately \$23.7 million and \$19.2 million, respectively. In addition, long-lived assets located in foreign countries were immaterial for the periods presented.

Table of Contents**Radian Group Inc.****Notes to Unaudited Condensed Consolidated Financial Statements (Continued)**

In the mortgage insurance segment, the highest state concentration of primary risk in force at June 30, 2008, was California at 9.5%, compared to 8.4% at June 30, 2007. At June 30, 2008, California accounted for 12.1% of the mortgage insurance segment's total direct primary insurance in force, compared to 11.9% at June 30, 2007, and 11.5% of the mortgage insurance segment's total pool risk in force at June 30, 2008, compared to 11.6% at June 30, 2007. California also accounted for 13.1% of the mortgage insurance segment's primary new insurance written in the six months ended June 30, 2008 compared to 21.0% for the six months ended June 30, 2007.

The largest single customer of our mortgage insurance segment (including branches and affiliates of such customer), measured by primary new insurance written, accounted for 21.5% of primary new insurance written during the six months ended June 30, 2008 compared to 26.3% for the six months ended June 30, 2007.

The financial guaranty segment derives a substantial portion of its premiums written from a small number of direct primary insurers. For the six months ended June 30, 2008, two primary insurers accounted for approximately \$28.2 million or 34.1% of the financial guaranty segment's gross written premiums. For the six months ended June 30, 2007, two primary insurers accounted for approximately \$36.7 million or 34.5% of the financial guaranty segment's gross written premiums. No other primary insurer accounted for more than 10% of the financial guaranty segment's gross written premiums during the six months ended June 30, 2008 or 2007. Gross written premiums and net written premiums are not materially different because we do not cede a material amount of business to reinsurers.

7. Investment in Affiliates

We have a 46.0% equity interest in C-BASS and a 21.8% equity interest in Sherman.

The following table shows the components that make up the investment in affiliates balance:

| (In thousands) | June 30 2008 | December 31 2007 |
|----------------|-------------------|---------------------|
| Sherman | \$ 112,644 | \$ 104,315 |
| Other | 39 | 39 |
| Total | \$ 112,683 | \$ 104,354 |

C-BASS

Historically, C-BASS had been engaged as a mortgage investment and servicing company specializing in the credit risk of subprime single-family residential mortgages. As a result of the disruption in the subprime mortgage market during 2007, C-BASS ceased purchasing mortgages and mortgage securities and its securitization activities in the third quarter of 2007 and sold its loan servicing portfolio in the fourth quarter of 2007. On July 29, 2007, we concluded that there were indicators that a material charge for impairment of our investment in C-BASS was required under GAAP. In November 2007, we received financial statements from C-BASS as of September 30, 2007, at which point we made a final determination with respect to impairment.

We account for our investment in C-BASS under the equity method of accounting in accordance with Accounting Principles Board (APB) Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock* (APB Opinion No. 18). During the third quarter of 2007, C-BASS incurred a loss of \$935 million and in accordance with APB Opinion No. 18, we recognized our portion of losses of approximately \$441 million. This resulted in a reduction in our equity investment in C-BASS from \$468 million to \$27 million at September 30, 2007. In addition to the recognition of losses, we completed an impairment analysis which resulted in the charge-off of the remaining carrying value of \$27 million in the equity investment in C-BASS at September 30, 2007.

Table of Contents**Radian Group Inc.****Notes to Unaudited Condensed Consolidated Financial Statements (Continued)**

Emerging Issues Task Force (EITF) No. 98-13, Accounting by an Equity Method Investor for Investee Losses When the Investor Has Loans to and Investments in Other Securities of the Investee (EITF No. 98-13), requires that when the recognition of equity losses reduces our equity investment to zero, we should continue to report our share of equity method losses in our income statement and should apply those equity method losses to our other investments in C-BASS. As a result of the additional losses at C-BASS, and continued application of APB Opinion No. 18 and EITF No. 98-13, we recorded a full write-off of our \$50 million credit facility with C-BASS. The ultimate collectibility of this loan is uncertain.

Sherman

2007 Sale of Partial Interest. On September 19, 2007, we sold to Sherman Capital, L.L.C. (Sherman Capital), an entity owned by the management of Sherman: (1) all of our preferred interests in Sherman and (2) 1,672,547 Class A Common Units in Sherman, representing approximately 43.4% of our total common interests in Sherman, for a cash purchase price of approximately \$277.6 million, plus a future contingent payment. The amount of the contingent payment, if any, will depend on the extent that Sherman Capital's after-tax return on 1,425,335 of the Class A Common Units acquired in the transaction exceeds approximately 16% annually. The contingent payment is payable to us on December 31, 2013 or earlier upon the closing of a sale of Sherman. We recorded a gain of \$181.7 million on the sale of our interest in Sherman in the third quarter of 2007.

2007 Option Granted to Sherman's Management. On September 19, 2007, in connection with the sale of a portion of our equity interests in Sherman, we entered into an Option Agreement with Meeting Street Investments LLC (MS LLC), an entity owned by Sherman's management. Under the Option Agreement, we granted to MS LLC an irrevocable option (the Call Option) to require us to sell to MS LLC all of our interests in Sherman at any time during the one year period following September 19, 2007. The purchase price under the Call Option, if exercised, will be equal to: (1) the product of (a) our ownership percentage in Sherman as of the date of sale under the Option Agreement and (b) \$1.5 billion, minus (2) 50% of all future distributions made by Sherman with respect to our remaining interests in Sherman through the date of sale under the Option Agreement. The Option Agreement terminates one year from September 19, 2007. We estimated that this call option had a fair value of \$0 at June 30, 2008 and December 31, 2007.

| Balance at June 30, 2008, net | 1,944,737 |
| Add Reinsurance recoverables | 175,840 |
| Balance at June 30, 2008 | \$ 2,120,577 |

Table of Contents**Radian Group Inc.****Notes to Unaudited Condensed Consolidated Financial Statements (Continued)**

We have protected against some of the future losses that may occur related to non-prime and riskier products by reinsuring our exposure through transactions (referred to as Smart Home) that effectively transfer risk to investors in the capital markets. Smart Home ceded losses recoverable were \$44.7 million at June 30, 2008. In addition to Smart Home, we transfer a portion of our risk to captive reinsurance companies affiliated with our lender-customers. Ceded losses recoverable related to captive transactions were \$131.1 million at June 30, 2008. The change in reinsurance recoverables on Smart Home and captive transactions is reflected in the provision for losses.

9. Reserve for Premium Deficiency

The reserve for premium deficiency is comprised of a \$421.8 million reserve for first-lien loans and a \$161.7 million reserve for second-lien loans.

The following table reconciles our mortgage insurance segment's beginning and ending reserve for premium deficiency for the six months ended June 30, 2008 (in thousands):

| | |
|---|------------|
| Balance at January 1, 2008 | \$ 195,646 |
| Add: | |
| Net increase in expected ultimate second-lien losses | 9,676 |
| Net decrease in expected ultimate second-lien premiums and unearned premium reserve | 23,374 |
| Recognition of first-lien premium deficiency | 421,825 |
| Deduct: | |
| Increase in second-lien reserves | (66,978) |
| Balance at June 30, 2008 | \$ 583,543 |

We perform a quarterly evaluation of our expected profitability for in force contracts, by business line, over the life of the business. A premium deficiency is established, if necessary, when the present value of expected losses and expenses exceeds the present value of expected future premiums and existing reserves. Our first- and second-lien products are considered separate lines of business as each product is managed separately, priced differently and has a different customer base.

During the second quarter of 2008, we determined that a premium deficiency existed on our first-lien products. We recorded a premium deficiency reserve of \$421.8 million. The gross amount of expected losses and expenses was \$5.9 billion, which were offset by the gross amount of expected premiums of \$2.8 billion and reinsurance recoverables of \$740 million. The net present value of expected losses and expenses was \$4.7 billion offset by the present value of expected future premiums of \$2.5 billion and already established reserves of \$1.8 billion. The rate of return used to arrive at these discounted amounts was 4.21% at June 30, 2008, which is our expected portfolio yield over the average duration of our first-lien portfolio. Expected losses include an assumed claim rate of approximately 14% on our total first-lien risk in force, including 10% on prime and 23% on subprime and Alt-A. There is significant uncertainty regarding ultimate claim frequency, and minor changes in home prices can have a significant impact on the claim rate and resulting losses.

We believe a 3% change in the ultimate claim frequency of 14% indicated above is reasonably possible given the uncertainty inherent in present market conditions. If claim rates were to increase by 3% to a total of 17%, the premium deficiency reserve would increase to \$1.1 billion. If claim rates were to decrease by a similar percentage to a total of 10%, no premium deficiency reserve would be required.

Table of Contents**Radian Group Inc.****Notes to Unaudited Condensed Consolidated Financial Statements (Continued)****10. Long-Term Debt and Other Borrowings**

The composition of our long-term debt and other borrowings at June 30, 2008 and December 31, 2007 was as follows:

| (In thousands) | June 30 2008 | December 31 2007 |
|--|-------------------|---------------------|
| 5.625% Senior Notes due 2013 | \$ 259,457 | \$ 254,292 |
| 7.75% Debentures due 2011 | 249,639 | 249,585 |
| 5.375% Senior Notes due 2015 | 249,666 | 249,647 |
| Borrowings under unsecured revolving credit facility | 200,000 | 200,000 |
| | \$ 958,762 | \$ 953,524 |

In February 2003, we issued \$250 million of unsecured senior notes. These notes bear interest at the rate of 5.625% per annum, payable semi-annually on February 15 and August 15. These notes mature in February 2013. We have the option to redeem some or all of the notes at any time with not less than 30 days' notice at a redemption price equal to the greater of the principal amount of the notes or the sum of the present values of the remaining scheduled payments of principal and interest on the notes to be redeemed. In April 2004, we entered into interest-rate swap contracts that effectively convert the interest rate on this fixed-rate debt to a variable rate based on a spread over the six-month LIBOR. We terminated these swaps in January 2008. The basis adjustment of \$11.5 million that was recorded as an increase to the long-term debt carrying value is being amortized to interest expense.

We have a \$250 million revolving credit facility, with \$200 million in outstanding loans. On August 7, 2008, we and the necessary lenders signed an amendment to our credit facility to allow us to, among other things, contribute our equity interest in Radian Asset Assurance to Radian Guaranty. In exchange for this and certain other flexibility, the amendment requires us, among other things, (a) to further reduce the total outstanding principal amount from \$200 million to \$150 million (with further reductions to a minimum of \$100 million to take place if certain repayment events occur) and (b) to pledge our equity interest in Sherman to secure our obligations to our lenders prior to the time that we contribute our equity interests in Radian Asset Assurance. In addition, we agreed to pay a fee to the administrative agent for the facility. We expect to satisfy all amendment closing requirements during the third quarter of 2008 and to correspondingly reduce the outstanding loan by \$50 million. Previously, on April 30, 2008, we entered into an amendment to this credit facility, which became effective May 15, 2008. The amendment modified the credit agreement and related loan documents, among other things, by (a) reducing the commitment size from the original \$400 million to \$250 million (with further reductions to a minimum of \$150 million to take place if certain repayment events occur), (b) increasing the pricing under the credit agreement, (c) eliminating the ratings covenant contained in Section 6.10 of the credit agreement, and (d) securing the credit agreement with a security interest in certain collateral. This security interest was affected primarily through a lien in favor of the lenders to the facility in (i) our ownership interests in certain of our first-tier subsidiaries and (ii) substantially all our other personal property. In addition, we granted a lien in our ownership interest in Radian Guaranty in favor of the lenders to the facility and the holders of the securities issued under our public indentures.

Under the amended credit agreement, we and our material subsidiaries are subject to a number of other business and financial covenants and events of default, including without limitation, maintaining at all times a Consolidated Net Worth (as defined in the amended credit agreement) of not less than \$1.75 billion, plus an amount equal to 75% of the net proceeds of any equity issuance following the effective date of the amendment, subject to certain limited qualifications. The credit agreement, as amended, contains limitations on indebtedness,

Radian Group Inc.

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

liens, mergers, consolidations, liquidations and sales, payment of dividends, investments, loans and advances and optional payments and modifications of subordinated and other debt instruments.

11. Income Taxes

We provide for income taxes in accordance with the provisions of SFAS No. 109, *Accounting for Income Taxes* (SFAS No. 109). As required under SFAS No. 109, our deferred tax assets and liabilities are recognized under the liability method which recognizes the future tax effect of temporary differences between the amounts recorded in the condensed consolidated financial statements and the tax bases of these amounts. Deferred tax assets and liabilities are measured using the enacted tax rates expected to apply to taxable income in the periods in which the deferred tax asset or liability is expected to be realized or settled.

Given our inability to accurately estimate our pre-tax loss, which directly affects our ability to project an effective tax rate for the full year, we believe it is appropriate to book our income tax expense based on the actual results of operations as of June 30, 2008.

As of June 30, 2008, we have a net deferred tax asset (DTA) in the amount of \$171.6 million. We believe that it is more likely than not that these assets will be realized. As such, no valuation allowance was established. The following factors were considered in reaching this conclusion:

\$270 million of taxable income is available in tax return carryback years. This would yield a recovery of approximately \$94.5 million of deferred tax assets.

Approximately \$71.4 million of the net DTA relates to mark-to-market losses on our financial guaranty derivative instruments, which we expect will result in very limited claim payments. We intend to hold these instruments until maturity and believe that the associated DTA will reverse over time as credit spreads relating to these instruments tighten.

We performed a taxable income projection in a hypothetical extraordinary loss scenario and concluded that our projected taxable income from insurance operations, our investment portfolio, and our affiliated investments will be sufficient to recover our deferred tax assets.

The need for a valuation allowance will continue to be reviewed on a quarterly basis and no assurances can be made with regard to whether a valuation allowance will be needed in the future.

12. Recent Accounting Pronouncements

In May 2008, the FASB issued SFAS No. 163, *Accounting for Financial Guarantee Insurance Contracts*, an interpretation of FASB Statement No. 60 (SFAS No. 163). SFAS No. 163 clarifies how SFAS No. 60, *Accounting and Reporting by Insurance Enterprises* (SFAS No. 60) applies to financial guarantee insurance contracts, including the recognition and measurement to be used to account for premium revenue and claim liabilities. The scope of SFAS No. 163 is limited to financial guarantee insurance (and reinsurance) contracts issued by insurance enterprises included within the scope of SFAS No. 60. SFAS No. 163 requires that an insurance enterprise recognize a claim liability prior to an event of default (insured event) when there is evidence that credit deterioration has occurred in an insured financial obligation. SFAS No. 163 does not apply to financial

Table of Contents**Radian Group Inc.****Notes to Unaudited Condensed Consolidated Financial Statements (Continued)**

guarantee insurance contracts accounted for as derivative contracts under SFAS No. 133. SFAS No. 163 is effective for financial statements issued for fiscal years beginning after December 15, 2008, and all interim periods within those fiscal years, except for some disclosures about the insurance enterprise's risk-management activities. Accordingly, we will adopt SFAS No. 163 effective January 1, 2009 and include disclosures regarding our risk-management activities in the third quarter ending September 30, 2008. Management is currently evaluating the impact of the adoption of SFAS No. 163, which could be material.

In March 2008, the FASB issued SFAS No. 161, "Disclosures about Derivative Instruments and Hedging Activities" an amendment of FASB Statement No. 133 (SFAS No. 161). SFAS No. 161 requires increased qualitative, quantitative and credit risk disclosures including: (a) how and why an entity is using a derivative instrument or hedging activity, (b) how the entity is accounting for its derivative instrument and hedged items under SFAS No. 133 and (c) how the instrument affects the entity's financial position, financial performance and cash flows. SFAS No. 161 also amends SFAS No. 107, "Disclosures about Fair Value of Financial Instruments" (SFAS No. 107) to clarify that derivative instruments are subject to SFAS No. 107's concentration of credit risk disclosures. SFAS No. 161 is effective for fiscal years and interim periods beginning after November 15, 2008. Management currently is considering the impact and disclosure requirements that may result from the adoption of SFAS No. 161.

In December 2007, the FASB issued SFAS No. 160, "Noncontrolling Interests in Consolidated Financial Statements, an amendment of APB No. 51" (SFAS No. 160). The objective of SFAS No. 160 is to improve the relevance, comparability, and transparency of the financial information that a reporting entity provides in consolidated financial statements by establishing accounting and reporting standards. These standards require that: (i) the ownership interests in subsidiaries held by parties other than the parent be clearly identified, labeled, and presented in the consolidated statement of financial position within equity, but separate from the parent's equity; (ii) the amount of consolidated net income attributable to the parent and to the noncontrolling interest be clearly identified and presented on the face of the consolidated statement of operations; (iii) changes in a parent's ownership interest while the parent retains its controlling financial interest in its subsidiary be accounted for consistently; (iv) when a subsidiary is deconsolidated, any retained noncontrolling equity investment in the former subsidiary be initially measured at fair value; and (v) entities provide sufficient disclosures that clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners. SFAS No. 160 is effective for fiscal years beginning on or after December 15, 2008. Management currently is considering the impact and disclosure requirements that may result from the adoption of SFAS No. 160.

13. Selected Financial Information of Registrant Radian Group Inc.

The following is selected financial information for the parent company:

| (In thousands) | June 30 2008 | December 31 2007 |
|---|-------------------------|-----------------------------|
| Investment in subsidiaries, at equity in net assets | \$ 3,148,516 | \$ 3,496,089 |
| Total assets | 3,448,337 | 3,709,285 |
| Long-term debt and other borrowings | 958,762 | 953,524 |
| Total liabilities | 992,430 | 988,549 |
| Total stockholders' equity | 2,455,907 | 2,720,736 |
| Total liabilities and stockholders' equity | 3,448,337 | 3,709,285 |

Table of Contents**Radian Group Inc.****Notes to Unaudited Condensed Consolidated Financial Statements (Continued)****14. Commitments and Contingencies**

As previously disclosed, in August and September 2007, two purported stockholder class action lawsuits, *Cortese v. Radian Group Inc.* and *Maslar v. Radian Group Inc.*, were filed against Radian Group Inc. and individual defendants in the U.S. District Court for the Eastern District of Pennsylvania. The complaints, which are substantially similar, allege that we were aware of and failed to disclose the actual financial condition of C-BASS prior to our declaration of a material impairment to our investment in C-BASS. On January 30, 2008, the Court ordered that the cases be consolidated into *In re Radian Securities Litigation* and appointed the Institutional Investors Iron Workers Local No. 25 Pension Fund (Iron Workers) and the City of Ann Arbor Employees Retirement System (Ann Arbor) Lead Plaintiffs in the case. On April 16, 2008, a consolidated and amended complaint was filed, adding one additional defendant. On June 6, 2008, we filed a motion to dismiss this case, which plaintiffs have opposed in a memorandum of law filed with the court on July 25, 2008. While it is still very early in the pleadings stage, we do not believe that the allegations in the consolidated cases have any merit and we intend to defend against this action vigorously.

As previously disclosed, in April 2008, a purported class action lawsuit was filed against Radian Group, the Compensation and Human Resources Committee of our board of directors and individual defendants in the U.S. District Court for the Eastern District of Pennsylvania. The complaint alleges violations of the Employee Retirement Income Securities Act as it relates to our Savings Incentive Plan. The named plaintiff is a former employee of ours. On July 25, 2008, we filed a motion to dismiss this case. We believe that the allegations are without merit, and intend to defend against this action vigorously.

On June 26, 2008, we filed a complaint for declaratory judgment in the United States District Court for the Eastern District of Pennsylvania, naming IndyMac Bank (IndyMac), Deutsche Bank National Trust Company, Financial Guaranty Insurance Company (FGIC), AMBAC Assurance Corporation and MBIA Insurance Corporation as defendants. The suit involves three Radian pool policies covering second-lien mortgages, entered into in late 2006 and early 2007 with respect to loans originated by IndyMac. We are in a second loss position behind IndyMac and in front of three defendant financial guaranty companies. We are alleging that the representations and warranties made to us to induce us to issue the policies were materially false, and that as a result, the policies should be void. The total amount of our claim liability is approximately \$77 million. We have established loss reserves equal to the total amount of our exposure to these transactions. On June 27, 2008, IndyMac filed a suit against us in California State Court in Los Angeles on the same policies, alleging that we have wrongfully denied claims or rescinded coverage on the underlying loans. We are moving to have that suit removed to federal court and stayed pending our suit in the Eastern District of Pennsylvania. There are related suits between FGIC and IndyMac in California and the Southern District of New York which may also be consolidated with our suit at a later date.

In addition to the above litigation, we are involved in litigation that has arisen in the normal course of our business. We are contesting the allegations in each such pending action and believe, based on current knowledge and after consultation with counsel, that the outcome of such litigation will not have a material adverse effect on our condensed consolidated financial position, results of operations or cash flows.

As previously disclosed, on October 3, 2007, we received a letter from the staff of the Chicago Regional Office of the Securities Exchange Commission stating that the staff is conducting an investigation involving Radian Group and requesting production of certain documents. We believe that the investigation generally relates to the proposed merger with MGIC Investment Corporation (MGIC) and Radian's investment in C-BASS. We are cooperating with the requests of the SEC. The SEC staff has informed us that this investigation should not be construed as an indication by the Commission or its staff that any violation of the securities laws has occurred, or as a reflection upon any person, entity or security.

Table of Contents

Radian Group Inc.

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

Securities regulations became effective in 2005 that impose enhanced disclosure requirements on issuers of asset-backed (including mortgage-backed) securities. To allow our customers to comply with these regulations, we typically are required, depending on the amount of credit enhancement we are providing, to provide (1) audited financial statements for the insurance subsidiary participating in the transaction or (2) a full and unconditional holding-company-level guarantee for our insurance subsidiaries' obligations in such transactions. To date, Radian Group Inc. has guaranteed two structured transactions for Radian Guaranty involving approximately \$363.3 million of remaining credit exposure.

As a result of the termination of our Pension Plan in June 2007, we expect to make a final contribution to the plan in the third quarter of 2008, of approximately \$15 million.

Under our change of control agreements with our executive officers, upon a change of control of Radian Group Inc. or Radian Asset Assurance, as the case may be, we are required to fund an irrevocable rabbi trust to the extent of our obligations under these agreements. The total maximum amount that we would be required to place in trust is approximately \$17.0 million as of June 30, 2008.

As part of the non-investment-grade allocation component of our investment program, we have committed to invest \$55 million in alternative investments (\$22.8 million of unfunded commitments at June 30, 2008) that are primarily private equity securities. These commitments have capital calls over a period of at least six years, and certain fixed expiration dates or other termination clauses.

We also utilize letters of credit to back assumed reinsurance contracts, medical insurance policies and an excise tax-exemption certificate used for ceded premiums from our domestic operations to our international operations. These letters of credit are with various financial institutions, have terms of one-year and will automatically renew unless we specify otherwise. The letters of credit outstanding at June 30, 2008 and December 31, 2007 were \$8.9 million and \$10.8 million, respectively.

Our mortgage insurance business utilizes its underwriting skills to provide an outsourced underwriting service to its customers. We give recourse to our customers on loans we underwrite for compliance. Typically, we agree that if we make a material error in underwriting a loan, we will remedy, indemnify, make whole, repurchase, or place additional mortgage insurance coverage on the loan. Providing these remedies means we assume some credit risk and interest-rate risk if an error is found during the limited remedy period in the agreements governing these services. We paid losses for sales and remedies from reserves in the first six months of 2008 of approximately \$11.7 million, and our reserve for such expenses at June 30, 2008 was \$12.1 million. We closely monitor this risk and negotiate our underwriting fee structure and recourse agreements on a client-by-client basis.

Our financial guaranty insurance business has entered into reinsurance agreements with several monoline financial guaranty primary insurers. These reinsurance agreements generally are subject to termination (i) upon written notice by either party (ranging from 90 to 120 days) before the specified deadline for renewal, (ii) at the option of the ceding company if we fail to maintain applicable ratings or certain financial, regulatory and rating agency criteria, or (iii) upon certain changes of control. Upon termination under the conditions set forth in (ii) and (iii) above, we may be required (under some of our reinsurance agreements) to return to the ceding company all unearned premiums, less ceding commissions, attributable to reinsurance ceded pursuant to such agreements. Upon the occurrence of the conditions set forth in (ii) above, regardless of whether or not an agreement is terminated, we may be required to obtain a letter of credit or alternative form of security to collateralize our obligation to perform under such agreement or we may be obligated to increase the level of ceding commission paid.

Table of Contents

Radian Group Inc.

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

A downgrade of the ratings assigned to our financial guaranty subsidiaries below certain levels (both A- and below investment grade for S&P and below A3 for Moody's Investor Service (Moody's)) would allow counterparties in five of our synthetic credit default swap transactions, representing an aggregate notional amount of approximately \$683.9 million, to terminate these transactions. Upon the termination of any such transaction following a downgrade trigger, the transaction would be settled on a mark-to-market basis, meaning that if, based on third-party bids received, a replacement counterparty would require amounts in addition to the payments we receive under the transaction in order to take over our position in the transaction, we would be required to pay such amounts to our counterparty, and if such third party would pay our counterparty to take over our position, our counterparty would pay such amount to us upon termination. The maximum amount that we could be required to pay on all these transactions in the aggregate is: \$161.9 million in the event of a downgrade below investment grade by S&P, including \$58.7 million that could be payable in the event of a downgrade below A- by S&P and \$8.0 million that could be payable in the event of a downgrade below A3 by Moody's.

Following the recent downgrades of Radian Asset Assurance, in July, 2008, we initiated a plan to reduce our financial guaranty workforce commensurate with our current limited prospects for originating new financial guaranty business. In order to maintain a portion of the workforce needed to effectively manage this business, we have put into place retention and severance agreements for certain surveillance, risk management and finance personnel at an estimated cost of \$26 million, which we expect will be paid by the end of 2009.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.**

The following analysis should be read in conjunction with our condensed consolidated financial statements and the notes thereto included in this report and our audited financial statements, notes thereto and Management's Discussion and Analysis of Financial Condition and Results of Operations included in our Form 10-K for the fiscal year ended December 31, 2007 for a more complete understanding of our financial position and results of operations.

Business Summary

Our principal business segments are mortgage insurance, financial guaranty and financial services.

Mortgage Insurance

Our mortgage insurance segment provides credit-related insurance coverage, principally through private mortgage insurance, and risk management services to mortgage lending institutions located throughout the U.S. and in select countries outside the U.S. We provide these products and services mainly through our wholly-owned subsidiaries, Radian Guaranty Inc., Amerin Guaranty Corporation, and Radian Insurance Inc. (which we refer to as Radian Guaranty, Amerin Guaranty, and Radian Insurance, respectively). Private mortgage insurance protects mortgage lenders from all or a portion of default-related losses on residential mortgage loans made mostly to home buyers who make down-payments of less than 20% of the home's purchase price. Private mortgage insurance also facilitates the sale of these mortgage loans in the secondary mortgage market, most of which are sold to Freddie Mac and Federal National Mortgage Association (Fannie Mae). We refer to Freddie Mac and Fannie Mae as Government Sponsored Enterprises or GSEs.

Traditional Mortgage Insurance. Our mortgage insurance segment, through Radian Guaranty, offers primary and pool mortgage insurance coverage on residential first-lien mortgages. At June 30, 2008, primary insurance on domestic first-lien mortgages made up approximately 91.9% of our total domestic first-lien mortgage insurance risk in force, and pool insurance on domestic first-lien mortgages made up approximately 8.1% of our total domestic first-lien mortgage insurance risk in force.

Non-Traditional Mortgage Credit Enhancement. In addition to traditional mortgage insurance, we have used Radian Insurance to provide other forms of credit enhancement on residential mortgage assets. These products include second-lien mortgages, credit enhancement on net interest margin securities (which we refer to as NIMS), domestic and international credit default swaps (CDS) and international mortgage insurance (collectively, we refer to the risk associated with these transactions as other risk). Until recently, these products were a growing part of our total mortgage insurance business. However, in light of the housing and credit market turmoil, we stopped writing all non-traditional business other than international mortgage insurance, although our prospects for writing this business are limited as discussed below. We also have used Amerin Guaranty to insure second-lien mortgages.

International Mortgage Insurance. Our existing international mortgage insurance business was written through Radian Insurance. As a result of recent downgrades of Radian Insurance, our counterparties to each of our active international transactions have the right to terminate these transactions. On March 4, 2008, Standard Chartered Bank in Hong Kong informed us that they wished to terminate their contract with Radian Insurance, effective immediately. There is a possibility that Radian Insurance could be required to return to Standard Chartered Bank, or to transfer to another insurer, unearned premiums related to this transaction. Unless extended, this transaction was expected to expire at the end of 2009. In addition, one Australian transaction was novated and the portfolio transferred to Radian Guaranty, effective June 30, 2008. Two other Australian transactions are expected to be novated and the portfolios transferred to Radian Guaranty in the third quarter of 2008. If our remaining international transactions are terminated, we could be required to return or transfer to another insurer additional unearned premiums. The recent downgrades of Radian Insurance have significantly reduced our ability to continue to write international mortgage insurance business.

Table of Contents

Financial Guaranty

Our financial guaranty business mainly insures and reinsures credit-based risks through our wholly-owned subsidiary, Radian Asset Assurance Inc. (Radian Asset Assurance), and through its wholly-owned subsidiary, Radian Asset Assurance Limited (RAAL), located in the United Kingdom. Financial guaranty insurance typically provides an unconditional and irrevocable guaranty to the holder of a financial obligation of full and timely payment of principal and interest when due.

We have traditionally offered the following financial guaranty products:

Public Finance. Insurance of public finance obligations, including tax-exempt and taxable indebtedness of states, counties, cities, special service districts, other political subdivisions and tribal finance and for enterprises such as airports, public and private higher education and health care facilities, project finance and private finance initiative assets in sectors such as schools, healthcare and infrastructure projects. The issuers of public finance obligations we insure were typically rated investment-grade at the time we issued our insurance policy, without the benefit of our insurance.

Structured Finance. Insurance of structured finance obligations, including collateralized debt obligations (CDOs) and asset-backed securities (ABS), consisting of funded and non-funded (synthetic) obligations that are payable from or tied to the performance of a specific pool of assets. Examples of the pools of assets that underlie structured finance obligations include corporate loans and bonds, residential and commercial mortgages, a variety of consumer loans, tax credits, equipment receivables and real and personal property leases. The structured finance obligations we insure were generally rated investment-grade at the time we issued our insurance policy, without the benefit of our insurance.

Financial Solutions. Financial solutions products (which we include as part of our structured finance business), including guaranties of securities exchange clearinghouses, excess-Securities Investor Protection Corporation (SIPC) insurance for customers of brokerage firms and excess-Federal Deposit Insurance Corporation (FDIC) insurance for customers of banks.

Reinsurance. Reinsurance of domestic and international public finance obligations, including those issued by sovereign and sub-sovereign entities, as well as reinsurance of structured finance and financial solutions obligations.

In October 2005, we exited the trade credit reinsurance line of business. Accordingly, this line of business has been placed into run-off and we have ceased initiating new trade credit reinsurance contracts.

In March 2008, we discontinued, for the foreseeable future, writing new insurance on synthetic CDOs and significantly reduced our structured products operations, primarily in areas related to CDOs. This decision was based on the deterioration and uncertainties in the credit markets in which we and other financial guarantors participate, which has significantly reduced the volume of CDOs and other structured products that are available for our insurance. However, we may enter into a limited number of synthetic CDO structured finance transactions to commute, restructure, hedge or terminate synthetic and other structured product transactions, for purposes of mitigating losses, reducing uncertainty or improving our position relative to existing credit exposures.

In June 2008, the financial strength ratings of our financial guaranty subsidiaries were downgraded by both Standard & Poor's Ratings Service (S&P) and Moody's Investor Service (Moody's). See Ratings Recent Ratings Actions below. These downgrades, combined with the difficult market conditions for financial guaranty insurance, have severely limited our ability to write new direct insurance and reinsurance both domestically and internationally. Although we cannot be certain of the extent and duration of any continued deterioration, disruptions or uncertainty in credit markets or other sectors of the economy in which our financial guaranty business participates, we believe these conditions are likely to persist for the foreseeable future. As a result, in the third quarter of 2008, we initiated plans to reduce our financial guaranty operations, including a reduction of our workforce commensurate with our current limited prospects for originating new business.

Table of Contents

We continue to maintain a large insured portfolio, including a significant portfolio of CDOs as discussed below under Results of Operations Financial Guaranty Quarter and Six Months Ended June 30, 2008 Compared to Quarter and Six Months Ended June 30, 2007.

International Financial Guaranty Insurance. RAAL accounted for \$4.0 million and \$7.8 million of financial guaranty’s direct premiums written in the second quarter and first six months of 2008 (or 17.0% and 16.8% of the financial guaranty’s direct premiums written in the second quarter and first six months of 2008, respectively), compared to \$3.2 million (or 11.9%) and \$6.8 million (or 11.7%) of financial guaranty’s direct premiums written in the second quarter and first six months of 2007, respectively.

Financial Services

Our financial services segment mainly consists of our 21.8% interest in Sherman Financial Group LLC (Sherman), a consumer asset and servicing firm. This segment also includes our 46% interest in Credit-Based Asset Servicing and Securitization LLC (C-BASS), a mortgage investment company whose operations are currently in run-off.

Sherman. Sherman specializes in charged-off and bankruptcy plan consumer assets, which are generally unsecured. Sherman typically purchases these assets at deep discounts from national financial institutions and major retail corporations and subsequently seeks to collect upon them. In addition, Sherman originates subprime credit card receivables through its subsidiary CreditOne and has a variety of other similar ventures related to consumer assets. The management of Sherman currently holds an option to purchase our remaining equity interest in Sherman at any time before September 19, 2008. See Note 7 of Notes to Condensed Consolidated Financial Statements.

C-BASS. Historically, C-BASS had been engaged as a mortgage investment and servicing company specializing in the credit risk of subprime single-family residential mortgages. As a result of the disruption in the subprime mortgage market during 2007, C-BASS ceased purchasing mortgages and mortgage securities and its securitization activities in the third quarter of 2007 and sold its loan-servicing platform in the fourth quarter of 2007. The orderly run-off of C-BASS’s business is dictated by an override agreement under which we and all of C-BASS’s owners and creditors are parties. The agreement provides the basis for the collection and distribution of cash generated from C-BASS’s whole loans and securities portfolio, as well as the sale of certain assets, including the loan-servicing platform. We recorded a full write-off of our entire equity interest in C-BASS in the third quarter of 2007 and wrote-off our \$50 million credit facility with C-BASS in the fourth quarter of 2007. See Note 7 of Notes to Condensed Consolidated Financial Statements.

Ratings

Our ratings are critical to our ability to market our products and to maintain our competitive position and customer confidence in our products.

Radian Group Inc. currently has a senior debt rating of BBB (CreditWatch with negative implications) from S&P and Ba1 (negative outlook) from Moody’s. Our principal operating subsidiaries have been assigned the following ratings:

| | MOODY’S | MOODY’S OUTLOOK | S&P | S&P OUTLOOK |
|--------------------------------|----------------|----------------------------|----------------|----------------------------|
| Radian Guaranty | A2 | Negative | A | (1) |
| Radian Insurance | Baa1 | Negative | BBB | (1) |
| Amerin Guaranty | A2 | Negative | A | (1) |
| Radian Asset Assurance | A3 | Negative | A | (1) |
| Radian Asset Assurance Limited | A3 | Negative | A | (1) |

Table of Contents

(1) Each S&P rating for our mortgage insurance and financial guaranty subsidiaries is currently on CreditWatch Negative. On May 2, 2008, Fitch Ratings (Fitch) withdrew its ratings for Radian Group Inc. and all of our insurance subsidiaries, citing a lack of adequate information regarding these entities. We had requested that Fitch withdraw these ratings in September 2007, following Fitch's downgrade of Radian Group Inc. and our financial guaranty subsidiaries.

Recent Ratings Actions. On June 16, 2008, S&P lowered its financial strength ratings on Radian Asset Assurance and RAAL to A from AA, citing a decline in the business prospects and financial flexibility of Radian Asset Assurance and uncertainty regarding its competitive position. S&P also cited the impact of credit losses in our mortgage insurance business as having an adverse affect on Radian Asset Assurance's financial flexibility.

On June 25, 2008, Moody's lowered its senior debt rating on Radian Group Inc. to Ba1 from A2 and its insurance financial strength ratings on Radian Guaranty and Amerin Guaranty to A2 from Aa3. In downgrading our mortgage insurance subsidiaries, Moody's cited meaningful deterioration in our insured portfolio, including NIMS and second-liens. Moody's further stated that our ability to retain our status as a Tier 1 mortgage insurer with the GSEs will continue to be an important rating consideration for our mortgage insurance subsidiaries going forward. Moody's lowered its insurance financial strength rating on Radian Insurance to Baa1 (two notches below Radian Guaranty) from Aa3 as a result of the higher-risk nature of its insurance portfolio of second-liens and NIMS and Moody's view that Radian Insurance is no longer strategically important to our overall mortgage insurance business.

Also on June 25, 2008, Moody's lowered its insurance financial strength rating on Radian Asset Assurance and RAAL to A3 from Aa3, citing the likelihood that Radian Asset Assurance will cease writing new business going-forward and the possible diversion of capital from Radian Asset Assurance to support our mortgage insurance business.

Our current ratings and the threat of further ratings actions could have a significant impact on our business and results of operations. For a discussion of these risks, see Part II, Item 1A. Risk Factors below.

Overview of Business Results

As a seller of credit protection, our results are subject to macroeconomic conditions and specific events that impact the production environment and credit performance of our underlying insured assets. The current mortgage and credit cycle, characterized by a continuing decline in home prices in certain markets, deteriorating credit performance of mortgage assets particularly Alternative A (Alt-A) and subprime and reduced liquidity for many participants in the mortgage and financial services industries, has had, and we believe will continue to have, a significant negative impact on the business environment and results of operations for each of our business segments. In addition, the June 2008 ratings downgrades of our financial guaranty subsidiaries and the on-going disruption in the credit markets have severely limited our ability to write new financial guaranty insurance and reinsurance.

Mortgage Insurance

Traditional Mortgage Insurance

Defaults. Further deterioration in the U.S. housing and mortgage credit markets resulted in an 11.0% increase in first-lien primary defaults added during the second quarter of 2008, which compares favorably to the 13.6% increase in first-lien defaults added during the first quarter of 2008 and the 20.1% increase during the fourth quarter of 2007. Overall, the underlying trend of higher defaults continues to be driven by poor performance of the late 2005 through 2007 vintage books of business, a lack of refinancing capacity in the current mortgage market, which has been forcing many borrowers into default, and from home price depreciation in certain markets. While losses generally have increased across all mortgage insurance product lines, a significant percentage of our increased losses are

Table of Contents

attributable to Alt-A mortgages. Ongoing deterioration in markets in California and Florida, where housing values are expected to continue to decline significantly and where Alt-A and adjustable rate mortgage (ARM) products are prevalent, continue to have a significant negative impact on our mortgage insurance business results.

Loss Provision/First-Lien Premium Deficiency. In addition to the increase in new defaults during the first half of 2008, our mortgage insurance loss provision at June 30, 2008 continued to be negatively impacted by higher loan balances on delinquent loans, higher rates of defaults moving into claim status, a decrease in the cure rate of defaults and an increase in claims paid. Claims paid increased in the three months ended June 30, 2008 to \$208.8 million, compared to \$190.2 million in the first quarter of 2008 and \$112.1 million for the second quarter of 2007. We expect to pay total mortgage insurance claims (including second-liens) between \$275 million and \$300 million in the third quarter of 2008 and approximately \$1.0 billion in total in 2008. Based on our current assumptions regarding home price appreciation and unemployment as of June 30, 2008, we estimate that the ultimate losses from our mortgage insurance portfolio will be approximately \$5.9 billion and there will be a significant increase in first-lien claim payments throughout 2008, 2009 and into 2010. We expect these losses to be partially offset by expected future premiums of approximately \$2.8 billion from this portfolio and significant recoveries from Smart Home and captive reinsurance arrangements as discussed below. In light of our current estimates, we established a premium deficiency of \$421.8 million for our first-lien portfolio as of June 30, 2008. See Critical Accounting Policies Reserve for Premium Deficiency below.

Smart Home/Captives. We have protected against some of the future losses that may occur related to non-prime and riskier products by reinsuring our exposure through transactions (referred to as Smart Home) that effectively transfer risk to investors in the capital markets. Approximately 4.4% of our primary mortgage insurance risk in force was included in Smart Home transactions at June 30, 2008. In these transactions, we reinsure the middle layer risk positions, while retaining a significant portion of the total risk comprising the first-loss and most remote risk positions. Ceded premiums written and earned related to Smart Home for the three and six month periods ended June 30, 2008 were \$3.7 million and \$6.9 million, respectively. The provision for losses for the six months ended June 30, 2008 includes a \$34.9 million reduction related to Smart Home. Ceded losses recoverable related to Smart Home were \$44.7 million at June 30, 2008. In addition to Smart Home, we transfer a substantial portion of our risk to captive reinsurance companies affiliated with our lender-customers. We had approximately 54 active captive reinsurance agreements in place at June 30, 2008, covering approximately 41.7% of our primary risk in force. Ceded premiums earned related to captives for the three and six month periods ended June 30, 2008 were \$34.1 million and \$69.8 million, respectively. The provision for losses for the six months ended June 30, 2008 includes a \$127.2 million reduction related to captive transactions. Ceded losses recoverable on captive transactions were \$131.1 million at June 30, 2008. In light of the significant amount of ultimate losses we expect to incur in our mortgage insurance business, we estimate that we will receive total reinsurance recoveries from Smart Home and captive reinsurance of approximately \$740 million.

New Insurance Written. We experienced an 11.3% decrease and a 5.8% increase in traditional flow business during the three and six month periods ended June 30, 2008, respectively, compared to the same periods of 2007. Overall, primary new insurance written, which includes both structured and flow business, decreased by 42.8% and 33.7% in the three and six month periods ended June 30, 2008, respectively, compared to the same periods of 2007, largely due to the significant decline in structured business written in 2008. The market turmoil in 2007 and 2008 has led to a tightening of our customers mortgage underwriting standards as well as a decrease in the volume of mortgage originations. In the fourth quarter of 2007 and in the first half of 2008, we implemented a series of changes to our insurance guidelines aimed at improving the long-term profitability of our business. As a result of these changes, we have experienced a positive shift in our overall business mix. In the second quarter of 2008, approximately 93% of our new business production was prime business, compared to 90% in the first quarter of 2008 and 49% in the second quarter of 2007, respectively.

Table of Contents

Persistency. The persistency rate, which is defined as the percentage of insurance in force that remains on our books after any twelve-month period, was 81.2% for the twelve months ended June 30, 2008, compared to 71.1% for the twelve months ended June 30, 2007. This increase was mainly due to a decline in refinancing activity from the high levels in 2005 and 2006, as a result of home price depreciation, tighter underwriting standards and an overall decrease in the lending capacity among mortgage originators. In particular, we continue to see increased demand for our traditional mortgage insurance product as alternative products, such as 80-10-10 mortgages, which were a common alternative to mortgage insurance in 2005 and 2006, have declined significantly. The persistency rate for structured products during the twelve months ended June 30, 2008 was 81.1% compared to 81.3% for our flow business. We expect that persistency rates will continue to remain at elevated levels for as long as the current disruption in the housing and mortgage credit markets continues to persist.

Discontinued Non-Traditional Products

NIMS. Our exposure to NIMS was \$485 million at June 30, 2008, down from \$604 million at December 31, 2007, as a result of buybacks and paydowns. The loans underlying the NIMS bonds that we insure continued to deteriorate during the first half of 2008. Of the \$485 million in total exposure to NIMS, approximately \$450 million represents the present value of our total expected principal credit losses related to NIMS (discounted at a risk-free rate, as opposed to the risk-adjusted rate used for Statement of Financial Accounting Standards (SFAS) No. 157, Fair Value Measurement (SFAS No. 157) purposes)). The carrying value of our total net liabilities related to NIMS as of June 30, 2008 was \$225 million. Our current carrying value is less than the net present value of our total expected credit losses due to the incorporation of the market's perception of our non-performance risk, in accordance with SFAS No. 157. In the fourth quarter of 2007, as a risk mitigation initiative, we began purchasing NIMS that we insure at a discount to par. These efforts continued during the first six months of 2008, resulting in an overall reduction of our risk in force related to NIMS of \$50.1 million during 2008. We did not purchase any NIMS prior to the fourth quarter of 2007. The NIMS purchased are accounted for as derivative assets and are recorded at fair value in accordance with SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities (SFAS No. 133), as amended and interpreted. Upon purchase, our liability representing the unrealized loss associated with the purchased NIMS is eliminated. The difference between the amount we pay for the NIMS and the sum of the fair value of the NIMS and the eliminated liability represents the net positive impact to earnings. Since the fourth quarter of 2007, the overall impact to our financial statements as a result of these purchases has been immaterial.

Second-lien Mortgages. We experienced further deterioration in our second-lien insured portfolio during the first six months of 2008, which resulted in a \$66.1 million increase in second-lien reserves during this period to approximately \$178.9 million. Our premium deficiency reserve for second-liens decreased during the first half of 2008 by approximately \$33.9 million (which partially offset the impact of the reserve increase), resulting in a total premium deficiency reserve for second-liens of approximately \$161.7 million at June 30, 2008. As of June 30, 2008, our total exposure to second-liens was approximately \$772.4 million, down from \$924.7 million at December 31, 2007. As of June 30, 2008, we held reserves, including a premium deficiency reserve, of approximately \$341 million against our total second-lien mortgage portfolio, representing approximately 44% of the total exposure.

Credit Default Swaps. As of June 30, 2008, our total risk in force exposure to domestic credit default swaps on residential mortgage-backed securities (RMBS) was approximately \$206 million. The fair value at June 30, 2008, under SFAS No. 157, is \$139.4 million, which we believe approximates the future realized credit related losses. In the fourth quarter of 2005, we wrote \$7.3 billion in notional value of credit protection in international credit default swap form on two large AAA tranches of mortgage-backed securities, one in Germany and one in Denmark. As of June 30, 2008, we had \$19.3 million of cumulative unrealized mark-to-market losses on these transactions. Despite the large notional exposure to this business, which has increased to \$8.6 billion at June 30, 2008 due to foreign currency rate

Table of Contents

changes, the remaining subordination for these transactions is substantial and performance to date has been good, and we do not currently foresee any reasonable scenario under which we would be liable for credit losses with respect to such exposures.

Financial Guaranty

New Business Production. A difficult business production environment for financial guaranty continued to exist in the first half of 2008. These conditions included the widening of credit spreads, a lack of price transparency and illiquidity in some of the structured products obligations that we insure, losses by financial guarantors on RMBS, CDOs of ABS and other credit positions, uncertainty as to the extent of future losses among all financial guarantors and perceived instability in the franchise values and ratings of many of the financial guarantors, including us. In addition, ratings actions on financial guaranty industry participants, including the June 2008 ratings downgrades of our financial guaranty subsidiaries, and uncertainty regarding future actions by rating agencies have further limited the financial guaranty business production environment. These conditions have materially diminished the financial benefit that our credit protection provides to issuers in the current market of both public and structured finance transactions and to our primary insurer customers and have reduced the perceived benefit of our insurance to holders of insured debt. Many transactions that would normally have been marketed with some form of financial guaranty insurance are either not going to market or are being sold without the benefit of financial guaranty insurance. As a result, there has been a significant reduction in the volume of transactions for which financial guaranty insurance is a viable option, which makes it more difficult for us and other financial guarantors to write new business. These conditions also resulted in fewer opportunities to obtain reinsurance transactions from our primary insurance customers. Consequently, new business production across all of our financial guaranty product lines has been significantly reduced in 2008 and is likely to remain minimal for the foreseeable future, if not permanently.

Credit Performance. The overall credit performance of our financial guaranty portfolio has remained relatively stable during the first half of 2008. In the first quarter of 2008, financial guaranty paid claims included \$100 million related to our entire exposure on the one direct market value extendable note program in our financial guaranty portfolio. See Results of Operations Financial Guaranty Quarter and Six Months Ended June 30, 2008 Compared to Quarter and Six Months Ended June 30, 2007 below for a discussion of our exposure to RMBS and commercial mortgage-backed securities (CMBS).

Financial Services

Net income for Sherman was down by approximately 7.3% for the first six months of 2008 compared to the same period of 2007. Higher revenues, particularly from the credit card origination business were more than offset by a higher loan loss provision and higher operating expenses. In addition, the decrease in our ownership percentage from a year ago as a result of the sale of a portion of our interest in Sherman contributed to reducing our equity in earnings from Sherman to \$30.8 million for the first half of 2008, from \$62.6 million for the same period of 2007.

Our investment in C-BASS, including our \$50 million credit facility with C-BASS, has been fully written off as of December 31, 2007.

Table of Contents**Results of Operations**

Our financial results for the first six months of 2008 were significantly impacted by unrealized gains and losses on our hybrid securities and our derivative assets and liabilities. Credit spreads on underlying collateral, both corporate credit spreads and asset-backed spreads, widened significantly during the first half of 2008, which resulted in large unrealized losses on these positions. Offsetting these losses, however, is the impact of a change to our valuation methodology, adopted prospectively, that incorporates the market's perception of our non-performance risk. This change in methodology is required under the provisions of SFAS No. 157. Given the significant widening of our credit default swap spread over the past year, the reduction in the valuation of our derivative liabilities related to our non-performance risk more than offset the credit spread widening on underlying collateral for the first half of 2008. These two drivers of our fair values can move in tandem or opposite directions, which could result in significant continued volatility of our operating results.

The following table summarizes the pretax and after tax impact of unrealized gains and losses, including the total impact of the incorporation of our non-performance risk, related to our derivatives and hybrid securities that are carried at fair value:

| (In millions) | Three Months Ended June 30 | | Six Months Ended June 30 | |
|--|-------------------------------|-----------|-----------------------------|-----------|
| | 2008 | 2007 | 2008 | 2007 |
| Hybrid securities | \$ (9.8) | \$ 6.4 | \$ (65.7) | \$ 2.8 |
| Financial guaranty credit derivatives | 103.0 | (32.5) | (1,227.0) | (7.4) |
| Mortgage insurance domestic and international CDS | (38.0) | (9.7) | (70.3) | (22.4) |
| NIMS | (17.9) | (60.9) | (44.9) | (59.5) |
| Soft capital put options on committed preferred securities (CPS) | 32.0 | | 74.8 | |
| Impact of SFAS No. 157 fair value methodology change related to non-performance risk | | | 2,034.5 | |
| Pretax gain (loss) | 69.3 | (96.7) | 701.4 | (86.5) |
| Income tax provision (benefit) | 24.3 | (33.8) | 245.5 | (30.3) |
| After-tax gain (loss) | \$ 45.0 | \$ (62.9) | \$ 455.9 | \$ (56.2) |

Table of Contents**Results of Operations Consolidated****Quarter and Six Months Ended June 30, 2008 Compared to Quarter and Six Months Ended June 30, 2007**

The following table summarizes our consolidated results of operations for the three and six months ended June 30, 2008 and 2007:

| (In millions) | Three Months Ended | | % Change 2008 vs. 2007 | Six Months Ended | | % Change 2008 vs. 2007 |
|---|--------------------|-----------------|---------------------------|------------------|-----------------|---------------------------|
| | June 30 2008 | June 30 2007 | | June 30 2008 | June 30 2007 | |
| Net (loss) income | \$ (392.5) | \$ 21.1 | n/m | \$ (196.9) | \$ 134.6 | n/m |
| Net premiums written insurance | 222.6 | 242.4 | (8.2)% | 467.0 | 490.9 | (4.9)% |
| Net premiums earned insurance | 249.1 | 218.0 | 14.3 | 491.1 | 432.5 | 13.5 |
| Net investment income | 65.1 | 62.7 | 3.8 | 131.1 | 123.7 | 6.0 |
| Change in fair value of derivative instruments | 56.2 | (66.2) | n/m | 764.0 | (17.8) | n/m |
| Net (losses) gains on other financial instruments | (8.3) | 25.7 | n/m | (63.1) | 39.4 | n/m |
| Other income | 3.2 | 3.1 | 3.2 | 6.8 | 6.9 | (1.4) |
| Provision for losses | 458.9 | 174.0 | 163.7 | 1,041.6 | 281.0 | 270.7 |
| Provision for premium deficiency | 369.8 | | n/m | 387.9 | | n/m |
| Policy acquisition costs | 76.0 | 24.2 | 214.0 | 99.9 | 52.5 | 90.3 |
| Other operating expenses | 63.8 | 57.6 | 10.8 | 119.0 | 115.3 | 3.2 |
| Interest expense | 13.8 | 12.4 | 11.3 | 26.3 | 25.4 | 3.5 |
| Equity in net income of affiliates | 15.7 | 49.5 | (68.3) | 28.2 | 72.3 | (61.0) |
| Income tax (benefit) provision | (208.6) | 3.5 | n/m | (119.6) | 48.2 | n/m |

n/m = not meaningful

Net (Loss) Income. Our net loss for the three and six months ended June 30, 2008 was \$392.5 million and \$196.9 million, respectively, or \$4.91 and \$2.46 per share (diluted), compared to net income of \$21.1 million and \$134.6 million, respectively, or \$0.26 and \$1.68 per share (diluted) for the corresponding periods of 2007. The on-going disruption in the housing and credit markets continued to negatively affect each of our operating segments during the first half of 2008. In particular, our results for 2008 have been negatively impacted by a significant increase in the provision for losses in our mortgage insurance segment, a provision for premium deficiency for our first-lien business during the second quarter of 2008, the acceleration of policy acquisition cost amortization on our first-lien business as a result of a premium deficiency reserve and an increase in net losses on other financial instruments due to a continued widening of credit spreads and losses on other-than-temporarily-impaired securities. These losses were partially offset by an increase in the change in fair value of derivative instruments as a result of the implementation of SFAS No. 157 of \$2.0 billion. The net after-tax impact of unrealized gains and losses on derivatives and hybrid securities for the second quarter and six months ended June 30, 2008 was \$45.0 million and \$455.9 million, respectively.

Net Premiums Written and Earned. Consolidated net premiums written for the three and six months ended June 30, 2008 were \$222.6 million and \$467.0 million, respectively, compared to \$242.4 million and \$490.9 million, respectively, for the corresponding periods of 2007. Consolidated net premiums earned were \$249.1 million and \$491.1 million, respectively, for the three and six months ended June 30, 2008 compared to \$218.0 million and \$432.5 million, respectively, for the corresponding periods of 2007. Earned premiums increased primarily as a result of the high volume of primary new mortgage insurance written in 2007 and the higher persistency rates experienced in 2007 and 2008.

Net Investment Income. Net investment income was \$65.1 million and \$131.1 million, respectively, for the three and six months ended June 30, 2008 compared to \$62.7 million and \$123.7 million, respectively, for the corresponding periods of 2007. This increase was mainly due to an increase in invested assets.

Table of Contents

Change in Fair Value of Derivative Instruments. For the three and six months ended June 30, 2008, the change in fair value of derivative instruments was a net gain of \$56.2 million and \$764.0 million, respectively, compared to net losses of \$66.2 million and \$17.8 million, respectively, for the corresponding periods of 2007. Change in fair value of derivative instruments for 2008 reflects the impact of the adoption of SFAS No. 157. The change in fair value of derivative instruments for the three and six months ended June 30, 2008 was mainly a result of a \$13.1 million increase and a \$567.8 million decrease, respectively, in the cumulative unrealized loss on financial guaranty derivatives, a \$58.5 million and \$155.0 million decrease, respectively, in the cumulative unrealized loss related to our NIMS portfolio and a \$30.6 million and \$72.0 million gain, respectively, related to the value of the put options on our CPS. We also had a \$38.9 million and \$71.2 million increase, respectively, in the cumulative unrealized loss on domestic and international credit default swaps. Included in the change in fair value of derivative instruments were earned premiums on derivative contracts of \$20.9 million and \$46.1 million, respectively, for the three and six months ended June 30, 2008, compared to \$36.9 million and \$71.5 million, respectively, for the comparable periods of 2007.

Net (Losses) Gains on Other Financial Instruments. Net losses on other financial instruments for the three and six months ended June 30, 2008 were \$8.3 million and \$63.1 million, respectively, compared to net gains on other financial instruments of \$25.7 million and \$39.4 million, respectively, for the corresponding periods of 2007. Included in the three and six months ended June 30, 2008 was \$21.1 million of gains related to the change in fair value of the NIMS variable interest entities (VIE) debt that was required to be consolidated at March 31, 2008. Also included in the six months ended June 30, 2008 was \$74.2 million of net losses related to changes in the fair value of hybrid securities, primarily convertible bonds, and trading securities. Also impacting the first half of 2008 were \$19.5 million of net realized gains on the sales of hybrid securities. We also wrote down \$37.1 million of other-than-temporarily-impaired available for sale securities in the six month period ended June 30, 2008, which was partially offset by \$4.4 million in realized gains on sales of available for sale securities. Included in the three and six months ended June 30, 2007 were \$7.2 million and \$3.5 million of gains related to changes in the fair value of convertible securities and equity securities and a \$23.2 million net gain related to the sale of hybrid securities.

Other Income. Other income was \$3.2 million and \$6.8 million, respectively, for the three and six months ended June 30, 2008 compared to \$3.1 million and \$6.9 million, respectively, for the corresponding periods of 2007. Other income mostly includes income related to contract underwriting services.

Provision for Losses. The provision for losses for the three and six months ended June 30, 2008 was \$458.9 million and \$1,041.6 million, respectively, compared to \$174.0 million and \$281.0 million, respectively, for the corresponding periods of 2007. Our mortgage insurance segment experienced a significant increase in claim rates and claims paid in the first half of 2008 compared to the same period a year ago, as well as an increase in delinquent loan sizes and a general aging of defaults and pending claims, which require a higher reserve. See Results of Operations Mortgage Insurance Quarter and Six Months Ended June 30, 2008 Compared to Quarter and Six Months Ended June 30, 2007 Provision for Losses below. The provision for losses for our financial guaranty segment increased in the first half of 2008 to \$21.3 million compared to (\$12.0) million in the first half of 2007, due primarily to favorable loss development on the trade credit reinsurance business and structured finance business in 2007 that did not occur to the same extent in 2008. In addition, the 2008 provision for losses includes a higher provision as a result of assumed mortgage exposures.

Provision for Premium Deficiency. The provision for premium deficiency was \$369.8 million and \$387.9 million, respectively, for the three and six months ended June 30, 2008. There was no premium deficiency recorded in the comparable periods of 2007. We reassess our expectations for premiums, losses and expenses for our businesses each quarter and record a premium deficiency reserve, if necessary. In the first half of 2008, we recorded a provision for second-lien premium deficiency of (\$33.9) million as a result of relatively stable expected losses and expected premiums compared to our year end 2007 projections, which was offset by an increase in the provision for second-lien losses. In the second quarter of 2008 we established a first-lien premium deficiency reserve of \$421.8 million as a result of our analysis of the future profitability of that business based on a more severe house price depreciation projection.

Table of Contents

Policy Acquisition Costs. Policy acquisition costs were \$76.0 million and \$99.9 million, respectively, for the three and six months ended June 30, 2008 compared to \$24.2 million and \$52.5 million, respectively, for the corresponding periods of 2007. In our mortgage insurance segment, estimates of expected gross profit, which are driven in part by persistency and loss development for each underwriting year and product type, are used as a basis for amortization and are evaluated regularly. The increase in policy acquisition costs during the second quarter of 2008 was due to the acceleration of \$50.8 million of deferred policy acquisition cost amortization in our mortgage insurance segment as a result of the establishment of a first-lien premium deficiency reserve. The total periodic amortization recorded to date is adjusted by a charge or credit to our condensed consolidated statements of operations if actual experience or other evidence suggests that earlier estimates should be revised. During the first quarter of 2008 and the three and six months ended June 30, 2007, amortization expense was impacted by both changes in persistency rates and updates to our projected loss ratio assumptions.

Other Operating Expenses. Other operating expenses were \$63.8 million and \$119.0 million, respectively, for the three and six months ended June 30, 2008 compared to \$57.6 million and \$115.3 million, respectively, for the corresponding periods of 2007. The increase in other operating expenses in 2008 is mostly due to an increase in the contract underwriting reserve, audit and legal fees. Included in the three and six month periods of 2007 were \$9.4 million and \$12.7 million, respectively, of merger related expenses.

Interest Expense. Interest expense was \$13.8 million and \$26.3 million, respectively, for the three and six months ended June 30, 2008, compared to \$12.4 million and \$25.4 million, respectively, for the corresponding periods of 2007. Included in interest expense for the three and six months ended June 30, 2008 was \$2.6 million and \$4.6 million, respectively, of interest related to the \$200 million that we drew down from our unsecured revolving credit facility on August 15, 2007. On January 18, 2008, we terminated the interest rate swaps that we entered into in 2004, which converted the interest rate on our 5.625% Senior Notes due 2013 to a variable rate based on a spread over the London Interbank Offered Rate (LIBOR). The basis adjustment of \$11.5 million that was recorded as an increase to the long-term debt carrying value is being amortized to interest expense.

Equity in Net Income of Affiliates. Equity in net income of affiliates was \$15.7 million and \$28.2 million, respectively, for the three and six months ended June 30, 2008, down from \$49.5 million and \$72.3 million, respectively, in the corresponding periods of 2007. Sherman represents the only contribution to equity in net income of affiliates in 2008. Sherman contributed \$26.3 million and \$55.9 million, respectively, for the three and six months ended June 30, 2007. Included in equity in net income of affiliates for the three and six months ended June 30, 2007 was \$23.2 million and \$16.4 million, respectively, in earnings related to C-BASS. For more information, see Results of Operations Financial Services below.

Income Tax (Benefit) Provision. We recorded an income tax benefit of \$208.6 million and \$119.6 million, respectively, for the three and six months ended June 30, 2008, compared to a provision of \$3.5 million and \$48.2 million, respectively, for the corresponding periods of 2007. The consolidated effective tax rate was 34.7% and 37.8% for the three and six months ended June 30, 2008, compared to 14.3% and 26.4% for the corresponding periods of 2007. The higher tax rates for 2008 reflect a decrease in the percentage of income generated from the tax-advantaged securities compared to income generated from operations.

Table of Contents**Results of Operations Mortgage Insurance****Quarter and Six Months Ended June 30, 2008 Compared to Quarter and Six Months Ended June 30, 2007**

The following table summarizes our mortgage insurance segment's results of operations for the three and six months ended June 30, 2008 and 2007:

| (In millions) | Three Months Ended | | | Six Months Ended | | |
|---|--------------------|-----------|---------------------------|------------------|---------|---------------------------|
| | 2008 | 2007 | % Change 2008 vs. 2007 | 2008 | 2007 | % Change 2008 vs. 2007 |
| Net (loss) income | \$ (434.2) | \$ (28.2) | n/m | \$ (660.6) | \$ 16.5 | n/m |
| Net premiums written insurance | 199.0 | 197.5 | 0.8% | 410.3 | 403.9 | 1.6% |
| Net premiums earned insurance | 205.1 | 185.6 | 10.5 | 409.4 | 365.8 | 11.9 |
| Net investment income | 38.9 | 36.3 | 7.2 | 77.8 | 71.8 | 8.4 |
| Change in fair value of derivative instruments | 25.2 | (49.4) | n/m | 96.9 | (45.1) | n/m |
| Net gains (losses) on other financial instruments | 10.4 | 19.4 | (46.4) | (26.3) | 30.5 | n/m |
| Other income | 3.0 | 2.7 | 11.1 | 6.5 | 5.6 | 16.1 |
| Provision for losses | 449.3 | 180.2 | 149.3 | 1,020.3 | 293.0 | 248.2 |
| Provision for premium deficiency | 369.8 | | n/m | 387.9 | | n/m |
| Policy acquisition costs | 63.7 | 12.6 | n/m | 77.1 | 29.1 | n/m |
| Other operating expenses | 48.7 | 43.0 | 13.3 | 82.9 | 82.6 | 0.4 |
| Interest expense | 7.3 | 6.3 | 15.9 | 14.4 | 13.2 | 9.1 |
| Income tax benefit | (222.0) | (19.3) | n/m | (357.7) | (5.7) | n/m |

n/m = not meaningful

Net (Loss) Income. Our mortgage insurance segment recorded net losses for the three and six months ended June 30, 2008 of \$434.2 million and \$660.6 million, respectively, compared to a \$28.2 million net loss and \$16.5 million of net income, respectively, for the corresponding periods of 2007. The loss in the first half of 2008 was mainly due to the on-going deterioration in the U.S. housing and mortgage credit markets, which again has resulted in a significant increase in our provision for losses, the establishment of a first-lien premium deficiency reserve during the second quarter of 2008 and the acceleration of policy acquisition cost amortization. Also affecting the net loss in the second quarter and first six months of 2008 was an increase in net losses on other financial instruments due to the write-down of other-than-temporarily-impaired securities and unrealized losses on convertible securities, partially offset by a gain on consolidated VIE debt.

Net Premiums Written and Earned. Net premiums written were \$199.0 million and \$410.3 million, respectively, for the three and six months ended June 30, 2008 compared to \$197.5 million and \$403.9 million, respectively, for the three and six months ended June 30, 2007. Net premiums earned for the three and six months ended June 30, 2008 were \$205.1 million and \$409.4 million, respectively, compared to \$185.6 million and \$365.8 million, respectively, in the corresponding periods of 2007. The increase in premiums earned resulted from the higher volume of primary new insurance written during 2007 and the higher persistency rates experienced in 2007 and 2008. We ceased writing new second-lien business in the second half of 2007, which has resulted in a decrease in premiums written and earned related to this product in 2008.

Table of Contents

The following table provides additional information related to insurance premiums written and earned for the three and six month periods indicated:

| | Three Months Ended | | Six Months Ended | |
|--|--------------------|-------------------|-------------------|-------------------|
| | June 30 2008 | June 30 2007 | June 30 2008 | June 30 2007 |
| Premiums written (in thousands) (1) | | | | |
| Primary and Pool Insurance | \$ 191,769 | \$ 184,492 | \$ 392,246 | \$ 376,600 |
| Seconds | 2,905 | 6,450 | 6,386 | 17,629 |
| International | 4,356 | 6,565 | 11,649 | 9,689 |

(1) Excludes premiums written and earned on credit derivatives. Premiums written on credit derivatives for the three and six months ended June 30, 2008 were \$5.6 million and \$14.5 million, respectively, compared to \$19.5 million and \$35.4 million, respectively, for the corresponding periods of 2007. Premiums earned on credit derivatives for the three and six months ended June 30, 2008 were \$5.8 million and \$18.9 million, respectively, compared to \$21.1 million and \$36.8 million, respectively, for the corresponding periods of 2007. These premiums are now reported in change in fair value of derivative instruments. In previous periods, these were reported as premiums written and earned in the condensed consolidated statements of operations. This reclassification is the result of an effort by the financial guaranty industry in consultation with the Securities and Exchange Commission (SEC) to provide consistency in disclosure of credit derivative contracts.

Net Investment Income. Net investment income attributable to our mortgage insurance segment for the three and six months ended June 30, 2008 was \$38.9 million and \$77.8 million, respectively, compared to \$36.3 million and \$71.8 million, respectively, for the corresponding periods of 2007. The increase in investment income during the first six months of 2008 reflects an increase in invested assets.

Change in Fair Value of Derivative Instruments. The change in the fair value of derivative instruments were gains of \$25.2 million and \$96.9 million, respectively, for the three and six months ended June 30, 2008, compared to losses of \$49.4 million and \$45.1 million, respectively, for the corresponding periods of 2007. The increase in the first six months of 2008 compared to 2007 was mainly due to a \$155.0 million decrease in the cumulative unrealized loss on our NIMS credit derivatives, which was primarily attributable to the incorporation of our non-performance risk under SFAS No. 157. Partially offsetting this gain in the first half of 2008 was an additional cumulative unrealized loss of \$71.2 million related to credit default swaps in our domestic and international mortgage insurance businesses as a result of further market deterioration.

Net (Losses) Gains on Other Financial Instruments. Our mortgage insurance business had net gains of \$10.4 million and net losses of \$26.3 million, respectively, for the three and six months ended June 30, 2008, compared to \$19.4 million and \$30.5 million of net gains, respectively, for the corresponding periods of 2007. Included in the three and six months ended June 30, 2008 was \$21.1 million in gains related to the change in fair value of the NIMS VIE debt that was required to be consolidated at March 31, 2008. Also included in the six months ended June 30, 2008 are losses related to changes in the fair value of hybrid securities and trading

Table of Contents

securities of \$54.1 million, which was partially offset by net realized gains on the sales of hybrid securities of approximately \$14.7 million. The 2008 amounts also include approximately \$7.7 million and \$14.8 million of losses on investment securities that were other-than-temporarily impaired during the three and six months ended June 30, 2008, respectively. Included in the three and six months ended June 30, 2007 were gains related to changes in the fair value of convertible securities and equity securities of \$5.4 million and \$3.7 million, respectively. Also included in the first six months of 2007 is a net realized gain of approximately \$15.3 million on the sale of hybrid securities.

Other Income. Other income for the three and six months ended June 30, 2008 was \$3.0 million and \$6.5 million, respectively, compared to \$2.7 million and \$5.6 million for the corresponding periods of 2007. Other income mostly includes income related to contract underwriting services, which was slightly higher in the first half of 2008 as a result of an increase in contract underwriting volume.

Provision for Losses. The provision for losses for the three and six month periods ended June 30, 2008 was \$449.3 million and \$1,020.3 million, respectively, compared to \$180.2 million and \$293.0 million, respectively, for the corresponding periods of 2007. The increase in 2008 was mainly attributable to increases in defaults and claims paid, the aging of existing defaults, larger loan balances, and a higher ratio at which defaults are moving to claim and increased severity.

Provision for Premium Deficiency. The provision for premium deficiency was \$369.8 million and \$387.9 million, respectively, for the three and six months ended June 30, 2008. There was no premium deficiency recorded in the comparable periods of 2007. We reassess our expectations for premiums, losses and expenses for our first- and second-lien businesses each quarter and record an appropriate premium deficiency. In the first half of 2008, we recorded a provision for second-lien premium deficiency of (\$33.9) million as a result of relatively stable expected losses and expected premiums compared to our year end 2007 projections, which was offset by an increase in the provision for second-lien losses. In the second quarter of 2008, we established a first-lien premium deficiency reserve of \$421.8 million.

Policy Acquisition Costs. Policy acquisition costs were \$63.7 million and \$77.1 million, respectively, for the three and six month periods ended June 30, 2008, compared to \$12.6 million and \$29.1 million, respectively, for the corresponding periods of 2007. During the first quarter of 2008 and both periods of 2007, amortization expense was impacted by changes in persistency rates and updates to our loss ratios assumptions. In the second quarter of 2008, we accelerated \$50.8 million of deferred policy acquisition cost amortization as a result of the establishment of a first-lien premium deficiency reserve.

Other Operating Expenses. Other operating expenses were \$48.7 million and \$82.9 million, respectively, for the three and six months ended June 30, 2008, compared to \$43.0 million and \$82.6 million, respectively, for the corresponding periods of 2007. The increase in other operating expenses in 2008 was primarily due to a \$10 million increase in our reserve for contract underwriting. Contract underwriting expenses for the three and six months ended June 30, 2008, including the impact of reserves for remedies in other operating expenses, were \$15.6 million and \$21.3 million, respectively, compared to \$6.0 million and \$11.1 million, respectively, for the corresponding periods of 2007. During the first six months of 2008, loans underwritten via contract underwriting for flow business accounted for 11.7% of applications, 10.9% of commitments for insurance and 9.8% of insurance certificates issued, compared to 12.5%, 11.8% and 10.2%, respectively, for the first six months of 2007. Also included in operating expenses for the three and six months ended June 30, 2007 were \$9.0 million and \$12.3 million, respectively, of merger related expenses.

Interest Expense. Interest expense attributable to our mortgage insurance segment for the three and six months ended June 30, 2008 was \$7.3 million and \$14.4 million, respectively, compared to \$6.3 million and \$13.2 million, respectively, for the corresponding periods of 2007. Both periods include interest on our long-term debt that was allocated to the mortgage insurance segment. The 2007 amount includes the impact of interest-rate swaps that were terminated in January 2008.

Table of Contents

Income Tax Benefit. We recorded an income tax benefit for the three and six months ended June 30, 2008 of \$222.0 million and \$357.7 million, respectively, compared to \$19.3 million and \$5.7 million, respectively, for the corresponding periods of 2007. The effective tax rate for the three and six months ended June 30, 2008 was 33.8% and 35.1%, respectively, compared to 40.7% and 53.4%, respectively, for the corresponding periods of 2007. The lower tax rates for 2008 reflect an increase in the percentage of income generated from tax-advantaged securities.

The following tables provide selected information as of and for the periods indicated for our mortgage insurance segment. Certain statistical information included in the following tables is recorded based on information received from lenders and other third parties.

During the second quarter of 2008, non-prime business accounted for \$0.7 billion or 7.2% of new primary insurance written by our mortgage insurance segment, compared to \$8.6 billion or 51.0% for the second quarter of 2007, largely reflecting a significant decrease in the amount of structured business written in 2008. Of the \$0.7 billion of non-prime business written for the second quarter of 2008, \$0.5 billion or 69% was Alt-A.

Direct primary insurance in force was \$151.2 billion at June 30, 2008, compared to \$146.9 billion at March 31, 2008 and \$128.3 billion at June 30, 2007. At June 30, 2008, non-prime insurance in force was \$46.1 billion or 30.5% of total primary mortgage insurance in force, compared to \$47.3 billion or 36.9% at June 30, 2007. Of the \$46.1 billion of non-prime insurance in force at June 30, 2008, \$34.2 billion or 74.2% was Alt-A.

(1) Includes approximately 272, 1,504 and 2,318 defaults at June 30, 2008, March 31, 2008 and June 30, 2007, respectively, where reserves had not been established because no claim payment was anticipated.

(2) Includes approximately 20,880, 20,417 and 16,101 defaults at June 30, 2008, March 31, 2008 and June 31, 2007, respectively, where reserves had not been established because no claim payment was anticipated.

The default and claim cycle in our mortgage insurance business begins with our receipt of a default notice from the insured. Generally, the insured notifies us of a default within 15 days after the loan has become 60 days past due. For reporting and internal tracking purposes, we do not consider a loan to be in default until the loan has been past due for 60 days. During the first quarter of 2008, we learned that one of our largest servicers had

Table of Contents

not previously properly reported certain 60-day defaults to us and other private mortgage insurers. This was corrected in April 2008. In the second quarter of 2008, we recorded an additional \$35 million related to approximately 2,000 defaults that were not reported to us previously.

The total number of loans in default increased from 96,203 at December 31, 2007 to 113,244 at June 30, 2008. The average loss reserve per default increased from \$13,986 at December 31, 2007 to \$18,726 at June 30, 2008. Primary and pool defaults at June 30, 2008 included approximately 272 and 20,880 defaults, respectively, on loans where reserves have not been established because no claim payment was anticipated. At December 31, 2007, primary and pool defaults included approximately 2,595 and 20,193 defaults, respectively, on loans where no reserve had been established. Excluding those defaults without a related reserve, the average loss reserve per default was \$23,027 and \$18,327 at June 30, 2008 and December 31, 2007, respectively. The loss reserve as a percentage of risk in force was 4.5% at June 30, 2008 and 3.0% at December 31, 2007.

| Seconds | 34.2 | 34.6 | 27.8 | 34.3 | 28.2 |
| Total | \$ 38.2 | \$ 38.2 | \$ 30.9 | \$ 38.2 | \$ 30.8 |

Claim activity is not spread evenly throughout the coverage period of a book of business. Historically, relatively few claims on prime business are received during the first two years following issuance of a policy and on non-prime business during the first year. Claim activity on prime loans has historically reached its highest level in the third through fifth years after the year of policy origination, and on non-prime loans this level occurs in the second through fourth years. Based on these trends, approximately 65.4% of our primary risk in force and approximately 18.6% of our pool risk in force at June 30, 2008 had not yet reached its highest claim frequency years. The late 2005 through 2007 business has experienced default and claim activity sooner than has been the case for historical books of business. Because it is difficult to predict both the timing of originating new business and the cancellation rate of existing business, it is also difficult to predict, at any given time, the percentage of risk in force that will reach its highest claim frequency years on any future date.

Table of Contents

| (\$ in thousands) | Three Months Ended | | | Six Months Ended | |
|----------------------------------|--------------------|------------------|-----------------|------------------|-----------------|
| | June 30 2008 | March 31 2008 | June 30 2007 | June 30 2008 | June 30 2007 |
| States with highest claims paid: | | | | | |
| California | \$ 26,401 | \$ 16,771 | \$ 2,618 | \$ 43,172 | \$ 3,657 |
| Michigan | 16,623 | 15,466 | 11,623 | 32,089 | 21,885 |
| Georgia | 9,293 | 10,917 | 6,136 | 20,210 | 13,891 |
| Ohio | 10,043 | 10,032 | 11,142 | 20,075 | 19,787 |
| Texas | 10,472 | 9,268 | 8,386 | 19,740 | 17,175 |
| Percentage of total claims paid: | | | | | |
| California | 12.6% | 8.8% | 2.9% | 10.8% | 2.1% |
| Michigan | 8.0 | 8.1 | 10.4 | 8.0 | 10.5 |
| Georgia | 4.4 | 5.7 | 5.5 | 5.1 | 6.7 |
| Ohio | 4.8 | 5.3 | 9.9 | 5.0 | 9.5 |
| Texas | 5.0 | 4.9 | 7.5 | 4.9 | 8.3 |

A higher proportion of new defaults in 2007 and 2008 were from loans in California and Florida, which would indicate that claims paid in those states will likely increase, perhaps significantly throughout the remainder of 2008.

| Policy acquisition costs | 12.3 | 11.6 | 6.0 | 22.7 | 23.4 | (3.0) |
| Other operating expenses | 15.0 | 12.9 | 16.3 | 35.8 | 27.1 | 32.1 |
| Interest expense | 6.5 | 4.5 | 44.4 | 11.7 | 9.1 | 28.6 |
| Income tax provision | 6.8 | 2.8 | n/m | 226.0 | 26.8 | n/m |

n/m = not meaningful

Net Income. Net income for the three and six months ended June 30, 2008 was \$32.5 million and \$448.0 million, respectively, compared to \$22.0 million and \$79.9 million, respectively, for the corresponding periods of 2007. The increase in net income for the first half of 2008 was mainly due to an increase in the change in fair value of derivative instruments as a result of the implementation of SFAS No. 157. Partially offsetting this was an increase in the provision for losses, an increase in other operating expenses, higher net losses on other financial instruments and a higher tax provision due to higher pretax income.

Net Premiums Written and Earned. Net premiums written for the second quarter and first six months of 2008 were \$23.6 million and \$56.7 million, respectively, compared to \$44.9 million and \$86.9 million, respectively, for the corresponding periods of 2007. Net premiums earned for the second quarter and first six months of 2008 were \$44.0 million and \$81.7 million, respectively, compared to \$32.4 million and \$66.7 million, respectively, for the corresponding periods of 2007. The decrease in net premiums written was attributable primarily to a decrease in our public finance production on both a direct and assumed basis. Included in net premiums earned for the second quarter and first six months of 2008 were refundings (both direct and assumed) of \$16.7 million and \$28.3 million, respectively, compared to \$5.2 million and \$11.8 million, respectively, for the same periods of 2007.

Table of Contents

The following table shows the breakdown of insurance premiums written and earned by our financial guaranty segment's various products for each period:

| | Three Months Ended June 30 | | Six Months Ended June 30 | |
|---|-------------------------------|------------------|-----------------------------|------------------|
| | 2008 | 2007 | 2008 | 2007 |
| | (In thousands) | | | |
| Net premiums written: (1) | | | | |
| Public finance direct | \$ 7,876 | \$ 18,130 | \$ 13,479 | \$ 30,910 |
| Public finance reinsurance | 7,221 | 17,495 | 24,762 | 35,649 |
| Structured direct | 3,006 | 2,789 | 7,188 | 8,036 |
| Structured reinsurance | 5,411 | 5,693 | 10,853 | 11,605 |
| Trade credit reinsurance | 101 | 805 | 388 | 731 |
| Total net premiums written insurance | \$ 23,615 | \$ 44,912 | \$ 56,670 | \$ 86,931 |
| Net premiums earned: (1) | | | | |
| Public finance direct | \$ 12,004 | \$ 9,961 | \$ 29,814 | \$ 21,546 |
| Public finance reinsurance | 22,965 | 11,692 | 32,835 | 22,792 |
| Structured direct | 3,760 | 4,389 | 7,642 | 9,080 |
| Structured reinsurance | 5,092 | 5,742 | 10,691 | 11,936 |
| Trade credit reinsurance | 220 | 638 | 715 | 1,332 |
| Total net premiums earned insurance | \$ 44,041 | \$ 32,422 | \$ 81,697 | \$ 66,686 |

(1) Excludes premiums written on credit derivatives for the three and six months ended June 30, 2008, which were \$13.0 million and \$25.9 million, respectively, compared to \$5.6 million and \$18.9 million, respectively, for the three and six months ended June 30, 2007. Also excluded are premiums earned on credit derivatives for the three and six months ended June 30, 2008, which were \$13.5 million and \$27.2 million, respectively, compared to \$15.8 million and \$34.7 million, respectively, for the three and six months ended June 30, 2007. These premiums are now reported in change in fair value of derivative instruments. This reclassification is the result of an effort by the financial guaranty industry, in consultation with the SEC, to provide consistency in disclosure of credit derivative contracts.

Net Investment Income. Net investment income attributable to our financial guaranty segment was \$26.2 million and \$53.3 million, respectively, for the second quarter and first six months of 2008 compared to \$26.3 million and \$51.8 million, respectively, for the corresponding periods of 2007.

Change in Fair Value of Derivative Instruments. Change in the fair value of derivative instruments was a gain of \$31.0 million and \$667.1 million, respectively, for the second quarter and first six months of 2008 compared to a loss of \$16.8 million and a gain of \$27.2 million for the corresponding periods of 2007. The total net unrealized gain on derivatives for the first half of 2008 was \$648.2 million, which was driven primarily by the \$1.8 billion impact of our own non-performance risk in our derivative valuation. Our 5-year credit default swap spread widened from 37 basis points at January 1, 2007 to 2,530 basis points at June 30, 2008. Also included in the change in fair value of derivative instruments in the first half of 2008 is a \$72.0 million increase in the change in the fair value of put options on CPS.

Net (Losses) Gains on Other Financial Instruments. Net losses on other financial instruments were \$18.7 million and \$36.9 million, respectively, for the second quarter and first six months of 2008, compared to \$5.6 million and \$8.4 million of net gains, respectively, for the corresponding periods of 2007. Included in the first six months of 2008 are losses related to changes in the fair value of hybrid securities and trading securities of \$20.0 million, which were partially offset by net realized gains on the sale of hybrid securities of \$4.8 million. The second quarter and six months ended June 30, 2008 also included approximately \$15.3 million and \$22.2 million, respectively, of losses on investment securities that were other-than-temporarily impaired. The amount reported for the second quarter and first six months of 2007 includes a \$1.8 million gain and a \$0.2 million loss, respectively, related to changes in the fair value of convertible securities.

Table of Contents

Provision for Losses. The provision for losses was \$9.6 million and \$21.3 million, respectively, for the three and six month periods ended June 30, 2008 compared to (\$6.2) million and (\$12.0) million, respectively, for the corresponding periods of 2007. The provision for losses reported for the first half of 2007 reflects favorable loss development on trade credit reinsurance and structured finance products. The 2008 provision for losses includes a higher provision in the structured finance reinsurance business as a result of exposures to assumed credits of RMBS.

We closely monitor our financial guaranty obligations and we use an internal classification process to identify and track troubled credits. We classify credits as intensified surveillance credits when we determine that continued performance is questionable and, in the absence of a positive change, may result in a claim. At June 30, 2008 and 2007, the financial guaranty segment had the following exposure on credits classified as intensified surveillance credits:

| (\$ in millions) | June 30 2008 | | June 30 2007 | |
|--------------------|-----------------|--------------------|-----------------|--------------------|
| | # of credits | Par Outstanding | # of credits | Par Outstanding |
| Less than \$25 | 39 | \$ 270 | 21 | \$ 169 |
| \$25-\$100 | 6 | 211 | 3 | 130 |
| Greater than \$100 | 1 | 103 | | |
| Total | 46 | \$ 584 | 24 | \$ 299 |

We establish loss reserves on our non-derivative financial guaranty contracts as discussed in Critical Accounting Policies Reserve for Losses. We have allocated non-specific reserves of \$63.1 million on 32 of the intensified surveillance credits (representing an aggregate par amount of \$453.3 million) identified at June 30, 2008. We expect that we will suffer losses with respect to these insured obligations approximately equal to the total amount reserved. At June 30, 2007, we had allocated non-specific reserves of \$27.7 million to seven credits with an aggregate par amount of \$106.2 million.

There is one credit at June 30, 2008 for which we have not established an allocated non-specific reserve that, without a positive change, may default in the near-term and could potentially result in a claim. Based on currently available information, we expect that any claim from this credit, should one arise, would range from a minimal amount up to approximately 50% of the \$51.5 million in total par outstanding. The potential amount of any claim is not estimable at this point, in part, because of the availability of a number of strategic alternatives currently under consideration and other mitigating factors that could reduce or delay any payment from us. In addition, remediation efforts have added substantial additional collateral security for the insured obligation, which could reduce the amount of any claim we may be required to pay. We continue to collect and analyze additional information regarding that transaction.

We also have reinsured several primary financial guaranty insurers obligations with respect to \$304.5 million in par outstanding related to Jefferson County, Alabama sewer bonds. As a result of a commutation of exposure with one of these insurers, effective July 28, 2008, our exposure has been reduced by approximately \$21.0 million to \$283.5 million. We placed this credit on intensified surveillance during the first quarter of 2008, and in the second quarter of 2008, we placed this credit on our Case Reserve List. The County currently faces increased financing costs on their debt and could possibly face more rapid amortization on their bank liquidity support, which has contributed to financial stress on the County's sewer system. The County and certain primary insurers entered into forbearance agreements with the liquidity banks, which are currently scheduled to expire on November 17, 2008, but could expire as early as August 29, 2008 if certain actions are not taken by the Alabama governor and legislature on a timely basis. These agreements prevent the banks from demanding increased interest and more rapid amortization of principal under their liquidity agreements until the expiration of such agreements. Certain primary financial guaranty insurers have been working with the County and other parties to structure a resolution to the financial problems of the County's sewer system. However, at this point, it is
