Financing Plan Considerations

Contemplating structure such that the required refinancing is only ~\$4B

A negotiated deal with NRG can be structured such that \$4.7B of NRG bonds remain in place with no change in

terms, but with substantially improved credit metrics for those bondholders

Exelon has existing relationships with many banks holding ~\$4B of other NRG debt; should facilitate refinancing in connection with a negotiated deal with NRG.

Financing commitments are well underway to prepay or refinance the ~\$4B

The NRG direct lien program for power marketing could be left in place

14

Conclusion

Consistent with what has made Exelon successful
a disciplined approach to managing risk and
building future growth

Combined company will have many key credit

positives that will enhance Exelon's ability to
succeed in an increasingly volatile energy market

Committed to strong investment grade credit ratings

Provides NRG Bondholders with better metrics and, we
believe, better ratings than what they currently have
today
