ANNUAL REPORT JULY 31, 2008 2

A Letter to Shareholders

Dear Shareholder

For more than a year, investors have been besieged by a weak housing market, the bursting of the credit bubble that has troubled the financial sector, and surging food and oil prices, which have stoked inflation concerns. Healthy nonfinancial corporate profits and robust exporting activity remained among the few bright spots, helping the economy to grow at a modest, but still positive, pace.

The Federal Reserve Board (the "Fed") has been aggressive in its attempts to stimulate economic growth and stabilize financial markets. In addition to slashing the target federal funds rate 325 basis points (3.25%) between September 2007 and April 2008, the central bank introduced the new Term Securities Lending Facility, granted broker-dealers access to the discount window and used its own balance sheet to help negotiate the sale of Bear Stearns. However, the end of the period saw a pause in Fed action; the central bank held the target rate steady at 2.0% as it attempted to balance weak growth and inflationary pressures.

The Fed's bold response to the financial crisis helped mitigate credit stress and investor anxiety, albeit temporarily. U.S. equity markets sank sharply over the reporting period, notwithstanding a brief rally in the spring and another in mid-summer, and international markets followed suit.

Treasury securities also traded in a volatile fashion, but generally rallied (yields fell as prices correspondingly rose), as the broader flight-to-quality theme persisted. The yield on 10-year Treasury issues, which fell to 3.34% in March, climbed to the 4.20% range in mid-June as investors temporarily shifted out of Treasury issues in favor of riskier assets (such as stocks and other high-quality fixed income sectors), then reversed course and declined to 3.99% by period-end when credit fears re-emerged. Meanwhile, tax-exempt issues underperformed their taxable counterparts, as problems among municipal bond insurers and the failure in the market for auction rate securities continued to pressure the group.

Overall, the major benchmark indexes generated results that reflected heightened risk aversion:

Total Returns as of July 31, 2008

U.S. equities (S&P 500 Index)	(7.08)%
Small cap U.S. equities (Russell 2000 Index)	0.86
International equities (MSCI Europe, Australasia, Far East Index)	(5.04)
Fixed income (Lehman Brothers U.S. Aggregate Index)	(0.63)
Tax-exempt fixed income (Lehman Brothers Municipal Bond Index)	(0.85)
High yield bonds (Lehman Brothers U.S. Corporate High Yield 2% Issuer Capped Index)	(0.80)

Past performance is no guarantee of future results. Index performance shown for illustrative purposes only.

You cannot invest directly in an index.

Shortly before this shareholder report mailing, the investment landscape was dramatically altered as the ongoing credit crisis intensified, resulting in a widespread breakdown in the financial services sector and unprecedented government intervention. Through periods of market turbulence, as ever, BlackRock's full resources are dedicated to the management of our clients' assets. For our most current views on the economy and financial markets, we invite you to visit www.blackrock.com/funds. As always, we thank you for entrusting BlackRock with your investment assets, and we look forward to continuing to serve you in the months and years ahead.

Sincerely,

/s/ Rob Kapito

THIS PAGE NOT PART OF YOUR FUND REPORT

Fund Summary as of July 31, 2008 BlackRock MuniHoldings Insured Fund II, Inc.

Investment Objective

BlackRock MuniHoldings Insured Fund II, Inc. (MUE) (the "Fund") seeks to provide shareholders with current income exempt from federal income taxes by investing primarily in a portfolio of long-term, investment grade municipal obligations the interest on which, in the opinion of bond counsel to the issuer, is exempt from federal income taxes.

#### Performance

For the 12 months ended July 31, 2008, the Fund returned (4.13)% based on market price and (1.77)% based on net asset value ("NAV"). For the same period, the closed-end Lipper Insured Municipal Debt Funds (Leveraged) category posted an average return of (2.65)% on a NAV basis. All returns reflect reinvestment of dividends. Several key factors influenced performance during the year. A positive contributor to performance was the Fund's significant overweight in pre-refunded bonds in the one- to five-year maturity range, as the yield curve steepened and these issues outperformed. Conversely, problems within the monoline insurance industry had a negative impact on the entire insured

3

municipal market, hampering the performance of the Fund and its peers.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

#### Fund Information

Symbol on New York Stock Exchange	MUE
Initial Offering Date	February 26, 1999
Yield on Closing Market Price as of July 31, 2008 (\$11.30) 1	5.31%
Tax Equivalent Yield 2	8.17%
Current Monthly Distribution per share of Common Stock 3	\$0.05
Current Annualized Distribution per share of Common Stock 3	\$0.60
Leverage as of July 31, 2008 4	44%

- Yield on closing market price is calculated by dividing the current annualized distribution per share by the closing market price.

  Past performance does not guarantee future results.
- 2 Tax equivalent yield assumes the maximum federal tax rate of 35%.
- 3 The distribution is not constant and is subject to change.
- As a percentage of total managed assets, which is the total assets of the Fund (including any assets attributable to Auction Market Preferred Stock ("Preferred Stock") and tender option bond trusts ("TOBs")) minus the sum of accrued liabilities.

The table below summarizes the changes in the Fund's market price and net asset value per share:

4 ANNUAL REPORT JULY 31, 2008

Fund Summary as of July 31, 2008 BlackRock MuniYield Insured Fund, Inc.

Investment Objective

BlackRock MuniYield Insured Fund, Inc. (MYI) (the "Fund") seeks to provide shareholders with as high a level of current income exempt from federal income taxes as is consistent with its investment policies and prudent investment management by investing primarily in a portfolio of long-term, investment grade municipal obligations the interest on which, in the opinion of bond counsel to the issuer, is exempt from federal income taxes.

#### Performance

For the 12 months ended July 31, 2008, the Fund returned (5.32)% based on market price and (8.44)% based on NAV. For the same period, the closed-end Lipper Insured Municipal Debt Funds (Leveraged) category posted an average return of (2.65)% on a NAV basis. All returns reflect reinvestment of dividends. A long duration posture during a period of rising municipal bond yields detracted from Fund performance over the year. Overweight positions in lower-rated bonds and issues subject to the alternative minimum tax ("AMT") also negatively affected results, as yield spreads in both sectors widened significantly. Moreover, Bond Market Association ("BMA") swaps, utilized by management to reduce Fund duration, underperformed the municipal cash market for much of the annual period, which further hampered performance.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

The Benefits and Risks of Leveraging

BlackRock MuniHoldings Insured Fund II, Inc. and BlackRock MuniYield Insured Fund, Inc. (each a "Fund" and, collectively, the "Funds") utilize leverage to seek to enhance the yield and NAV of their Common Stock. However, these objectives cannot be achieved in all interest rate environments.

To leverage, each Fund issues Preferred Stock, which pays dividends at prevailing short-term interest rates, and invests the proceeds in long-term municipal bonds. The interest earned on these investments is paid to Common Stock shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share net asset value of each Fund's Common Stock. However, in order to benefit Common Stock shareholders, the yield curve must be positively sloped; that is, short- term interest rates must be lower than long-term interest rates. At the same time, a period of generally declining interest rates will benefit Common Stock shareholders. If either of these conditions change, then the risks of leveraging will begin to outweigh the benefits.

To illustrate these concepts, assume a fund's Common Stock capitalization of \$100 million and the issuance of Preferred Stock for an additional \$50 million, creating a total value of \$150 million available for investment in long-term municipal bonds. If prevailing short-term interest rates are approximately 3% and long-term interest rates are approximately 6%, the yield curve has a strongly positive slope. The fund pays dividends on the \$50 million of Preferred Stock based on the lower short-term interest rates. At the same time, the fund's total portfolio of \$150 million earns income based on long-term interest rates.

In this case, the dividends paid to Preferred Stock shareholders are significantly lower than the income earned on the fund's long-term investments, and therefore the Common Stock shareholders are the beneficiaries of the incremental yield. However, if short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental yield pickup on the Common Stock will be reduced or eliminated completely. At the same time, the market value of the fund's Common Stock (that is, its price as listed on the New York Stock Exchange) may, as a result, decline. Furthermore, if long-term interest rates rise, the Common Stock's NAV will reflect the full decline in the price of the portfolio's investments, since the value of the fund's Preferred Stock does not fluctuate. In addition to the decline in NAV, the market value of the fund's Common Stock may also decline.

In addition, the Funds may from time to time leverage their assets through the use of tender option bond ("TOB") programs. In a typical TOB program, the Fund transfers one or more municipal bonds to a TOB trust, which issues short-term variable rate securities to third-party investors and a residual interest to the Fund. The cash received by the TOB trust from the issuance of the short-term securities (less transaction expenses) is paid to the Fund, which invests the cash in additional portfolio securities. The distribution rate on the short-term securities is reset periodically (typically every seven days) through a remarketing of the short-term securities. Any income earned on the bonds in the TOB trust, net of expenses incurred by the TOB trust, that is not paid to the holders of the short-term securities is paid to the Fund. In connection with managing the Funds' assets, the Funds' investment advisor may at any time retrieve the bonds out of the TOB trust typically within seven days. TOB investments generally will provide the Funds with economic benefits in periods of declining short-term interest rates, but expose the Funds to risks during periods of rising short-term interest rates similar to those associated with Preferred Stock issued by the Funds, as described above. Additionally, fluctuations in the market value of municipal securities deposited into the TOB trust may adversely affect the Funds' NAVs per share. (See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to TOB

Under the Investment Company Act of 1940, the Funds are permitted to issue Preferred Stock in an amount of up to 50% of their total managed assets at the time of issuance. Each Fund also anticipates that its total economic leverage from Preferred Stock and TOBs will not exceed 50% of its total managed assets. As of July 31, 2008, BlackRock MuniHoldings Insured Fund II, Inc. and BlackRock MuniYield Insured Fund, Inc. had leverage from Preferred Stock and TOBs of 44% and 43% of their total managed assets, respectively.

#### Swap Agreements

The Funds may invest in swap agreements, which are over-the-counter contracts in which one party agrees to make periodic payments based on the change in market value of a specified bond, basket of bonds, or index in return for periodic payments based on a fixed or variable interest rate or the change in market value of a different bond, basket of bonds or index. Swap agreements may be used to obtain exposure to a bond or market without owning or taking physical custody of securities. Swap agreements involve the risk that the party with whom each Fund has entered into a swap will default on its obligation to pay the Fund and

the risk that the Fund will not be able to meet its obligations to pay the other party to the agreement.

Gross unrealized appreciation	
Net unrealized depreciation	\$ (7,664,294)

- (a) AMBAC Insured.
- (b) U.S. government securities, held in escrow, are used to pay interest on this security as well as to retire the bond in full at the date indicated, typically at a premium to par.
- (c) MBIA Insured.
- (d) FHA Insured.
- (e) FSA Insured.
- (f) FGIC Insured.
- (g) Radian Insured.
- (h) FNMA/GNMA Collateralized.
- (i) FHLMC Collateralized.
- (j) Variable rate security. Rate shown is as of report date. Maturity shown is the final maturity date.
- (k) Assured Guaranty Insured.
- (1) Represents a zero-coupon bond. Rate shown reflects the effective yield at the time of purchase.
- (m) XL Capital Insured.
- (n) Securities represent bonds transferred to a tender option bond trust in exchange for which the Fund acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to tender option bond trusts.
- (o) Investments in companies considered to be an affiliate of the Fund, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, were as follows:

\_\_\_\_\_

Affiliate	Net Activity	Income
Merrill Lynch Institutional Tax-Exempt Fund	24,498,147	\$304,246

(p) Represents the current yield as of report date.

See Notes to Financial Statements.
