x ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Fiscal Year Ended December 31, 2008

OR

.. TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from to

Commission File Number: 0-25023

FIRST CAPITAL, INC.

(Exact name of registrant as specified in its charter)

Edgar Filing: FIRST CAPITAL INC - Form 10-K

Indiana
(State or other jurisdiction of
incorporation or organization)

35-2056949
(I.R.S. Employer
Identification No.)

220 Federal Drive, N.W., Corydon, Indiana
(Address of principal executive offices)

47112
(Zip Code)

Registrant's telephone number, including area code: (812) 738-2198

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Stock, par value \$0.01 per share	Nasdaq Global Stock Market

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Edgar Filing: FIRST CAPITAL INC - Form 10-K

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "accelerated filer," "large accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

(Check one): Large accelerated filer Accelerated filer
Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the voting and non-voting common equity held by non-affiliates was \$37.3 million, based upon the closing price of \$14.70 per share as quoted on the Nasdaq Stock Market as of the last business day of the registrant's most recently completed second fiscal quarter.

The number of shares outstanding of the registrant's common stock as of March 19, 2009 was 2,782,381.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the 2008 Annual Report of Stockholders and of the Proxy Statement for the 2009 Annual Meeting of Stockholders are incorporated by reference in Parts II and III, respectively, of this Form 10-K.

This report contains certain forward-looking statements within the meaning of the federal securities laws. These statements are not historical facts, rather statements based on First Capital, Inc.'s current expectations regarding its business strategies, intended results and future performance. Forward-looking statements are preceded by terms such as expects, believes, anticipates, intends and similar expressions.

Forward-looking statements are not guarantees of future performance. Management's ability to predict results or the effect of future plans or strategies is inherently uncertain. Numerous risks and uncertainties could cause or contribute to the Company's actual results, performance and achievements to materially differ from those expressed or implied by the forward-looking statements. Factors which could affect actual results include, but are not limited to, interest rate trends; the general economic climate in the specific market area in which First Capital operates, as well as nationwide; First Capital's ability to control costs and expenses; competitive products and pricing; loan delinquency rates and changes in federal and state legislation and regulation; and other factors disclosed periodically in the Company's filings with the Securities and Exchange Commission. These factors should be considered in evaluating the forward-looking statements and undue reliance should not be placed on such statements, whether included in this report or made elsewhere from time to time by the Company or on its behalf. Except as may be required by applicable law or regulation, First Capital assumes no obligation to update any forward-looking statements.

PART I

ITEM 1. BUSINESS

General

First Capital, Inc. (the Company or First Capital) was incorporated under Indiana law on September 11, 1998. On December 31, 1998, the Company became the holding company for First Federal Bank, A Federal Savings Bank (the Bank) upon the Bank's reorganization as a wholly owned subsidiary of the Company resulting from the conversion of First Capital, Inc., M.H.C. (the MHC), from a federal mutual holding company to a stock holding company. On January 12, 2000, the Company completed a merger of equals with HCB Bancorp, the former holding company for Harrison County Bank. The Bank changed its name to First Harrison Bank in connection with the merger. On March 20, 2003, the Company consummated its acquisition of Hometown Bancshares, Inc. (Hometown), a bank holding company located in New Albany, Indiana.

The Company has no significant assets, other than all of the outstanding shares of the Bank and the portion of the net proceeds from the offering retained by the Company, and no significant liabilities. Management of the Company and the Bank are substantially similar and the Company neither owns nor leases any property, but instead uses the premises, equipment and furniture of the Bank in accordance with applicable regulations.

The Bank is regulated by the Office of Thrift Supervision and the Federal Deposit Insurance Corporation. The Bank's deposits are federally insured by the Federal Deposit Insurance Corporation under the Deposit Insurance Fund. The Bank is a member of the Federal Home Loan Bank System.

Availability of Information

The Company's Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and any amendments to such reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 are made available free of charge on the Company's Internet website, www.firstharrison.com, as soon as practicable after the Company electronically files such material with, or furnishes it to, the Securities and Exchange Commission. The contents of the Company's website shall not be incorporated by reference into this Form 10-K or into any reports the Company files with or furnishes to the Securities and Exchange Commission.

Market Area and Competition

The Bank considers Harrison, Floyd, Clark and Washington counties in Indiana its primary market area. All of its offices are located in these four counties, which results in most of the Bank's loans being made in these four counties. The main office of the Bank is located in Corydon, Indiana, 35 miles west of Louisville, Kentucky. The Bank aggressively competes for business with local banks, as well as large regional banks. Its most direct competition for deposit and loan business comes from the commercial banks operating in these four counties. The Bank is the leader in deposit market share in Harrison County, its primary county of operation.

Lending Activities

General. The Bank is in the process of transforming the composition of its balance sheet from that of a traditional thrift institution to that of a commercial bank. On the asset side, this is being accomplished in part by selling in the secondary market the newly-originated qualified fixed-rate residential mortgage loans while retaining variable rate residential mortgage loans in the portfolio. This transformation is also enhanced by an expanded commercial lending staff dedicated to growing commercial real estate and commercial business loans. The Bank also continues to originate consumer loans and residential construction loans for the loan portfolio.

Edgar Filing: FIRST CAPITAL INC - Form 10-K

(1) Includes conventional one- to four-family and multi-family residential loans.

Edgar Filing: FIRST CAPITAL INC - Form 10-K

- (2) Includes construction loans for which the Bank has committed to provide permanent financing.
- (3) Includes loans secured by lawn and farm equipment, mobile homes and other personal property.

Table of Contents

Residential Loans. The Bank's lending activities have concentrated on the origination of residential mortgages, both for sale in the secondary market and for retention in the Bank's loan portfolio. Residential mortgages secured by multi-family properties are an immaterial portion of the residential loan portfolio. Substantially all residential mortgages are collateralized by properties within the Bank's market area.

The Bank offers both fixed-rate mortgage loans and adjustable rate mortgage (ARM) loans typically with terms of 15 to 30 years. The Bank uses loan documents approved by the Federal National Mortgage Corporation (Fannie Mae) and the Federal Home Loan Mortgage Corporation (Freddie Mac) whether the loan is originated for investment or sale in the secondary market.

Historically, the Bank has retained its residential loan originations in its portfolio. Retaining fixed-rate loans in its portfolio subjects the Bank to a higher degree of interest rate risk. See *Item 1A. Risk Factors Above Average Interest Rate Risk Associated with Fixed-Rate Loans* for a further discussion of the risks of rising interest rates. Beginning in 2004, one of the Bank's strategic goals was to expand its mortgage business by originating mortgage loans for sale, while offering a full line of mortgage products to prospective customers. This practice increases the Bank's lending capacity and allows the Bank to more effectively manage its profitability since it is not required to predict the prepayment, credit or interest rate risks associated with retaining either the loan or the servicing asset. During 2005, the Bank hired a mortgage banking manager, charged with hiring more mortgage originators and increasing the Bank's secondary market business in Southern Indiana. For the year ended December 31, 2008, the Bank originated and funded \$33.3 million of residential mortgage loans for sale in the secondary market. The Bank also originated \$1.0 million of residential mortgage loans as an agent for a third-party mortgage company. The third-party mortgage company funded such originations and the Bank received a fee for each loan funded by the third party mortgage company. For a full discussion of the Bank's mortgage banking operations, see *Item 1. Business Mortgage Banking Activities*.

ARM loans originated have interest rates that adjust at regular intervals of one to five years, with up to 2.0% caps per adjustment period and 6.0% lifetime caps, based upon changes in the prevailing interest rates on United States Treasury Bills. The Bank also originates hybrid ARM loans, which are fixed for an initial period three or five years and adjust annually thereafter. The Bank may occasionally use below market interest rates and other marketing inducements to attract ARM loan borrowers. The majority of ARM loans provide that the amount of any increase or decrease in the interest rate is limited to 2.0% (upward or downward) per adjustment period and generally contains minimum and maximum interest rates. Borrower demand for ARMs versus fixed-rate mortgage loans is a function of the level of interest rates, the expectations of changes in the level of interest rates and the difference between the interest rates and loan fees offered for fixed-rate mortgage loans and interest rates and loan fees for ARM loans. The relative amount of fixed-rate and ARM loans that can be originated at any time is largely determined by the demand for each in a competitive environment.

The Bank's lending policies generally limit the maximum loan-to-value ratio on fixed-rate and ARM loans to 80% of the lesser of the appraised value or purchase price of the underlying residential property unless private mortgage insurance to cover the excess over 80% is obtained, in which case the mortgage is limited to 95% (or 97% under a Freddie Mac program) of the lesser of appraised value or purchase price. The loan-to-value ratio, maturity and other provisions of the loans made by the Bank are generally reflected in the policy of making less than the maximum loan permissible under federal regulations, in accordance with established lending practices, market conditions and underwriting standards maintained by the Bank. The Bank requires title, fire and extended insurance coverage on all mortgage loans originated. All of the Bank's real estate loans contain due on sale clauses. The Bank generally obtains appraisals on all its real estate loans from outside appraisers.

Construction Loans. Although the Bank originates construction loans that are repaid with the proceeds of a limited number of mortgage loans obtained by the borrower from another lender, the majority of the construction loans that the Bank originates are permanently financed in the secondary market by the Bank. Construction loans originated without a commitment by the Bank to provide permanent financing are generally originated for a term of six to 12 months and at a fixed interest rate based on the prime rate.

Table of Contents

The Bank originates speculative construction loans to a limited number of builders operating and based in the Bank's primary market area and with whom the Bank has well-established business relationships. At December 31, 2008, speculative construction loans, a construction loan for which there is not a commitment for permanent financing in place at the time the construction loan was originated, amounted to \$2.0 million. The Bank limits the number of speculative construction loans outstanding to any one builder based on the builder's capacity to service the debt.

Most construction loans are originated with a loan-to-value ratio not to exceed 80% of the appraised estimated value of the completed property. The construction loan documents require the disbursement of the loan proceeds in increments as construction progresses. Disbursements are based on periodic on-site inspections by an independent appraiser.

Construction lending is inherently riskier than one- to four-family mortgage lending. Construction loans, on average, generally have higher loan balances than one- to four-family mortgage loans. In addition, the potential for cost overruns because of the inherent difficulties in estimating construction costs and, therefore, collateral values and the difficulties and costs associated with monitoring construction progress, among other things, are major contributing factors to this greater credit risk. Speculative construction loans have the added risk that there is not an identified buyer for the completed home when the loan is originated, with the risk that the builder will have to service the construction loan debt and finance the other carrying costs of the completed home for an extended time period until a buyer is identified. Furthermore, the demand for construction loans and the ability of construction loan borrowers to service their debt depends highly on the state of the general economy, including market interest rate levels and the state of the economy of the Bank's primary market area. A material downturn in economic conditions could be expected to have a material adverse effect on the credit quality of the construction loan portfolio.

Commercial Real Estate Loans. Commercial real estate loans are generally secured by small retail stores, professional office space and, in certain instances, farm properties. Commercial real estate loans are generally originated with a loan-to-value ratio not to exceed 75% of the appraised value of the property. Property appraisals are performed by independent appraisers approved by the Bank's board of directors. The Bank seeks to originate commercial real estate loans at variable interest rates based on the United States Treasury Bill rate for terms ranging from ten to 15 years and with interest rate adjustment intervals of five years. The Bank also originates fixed-rate balloon loans with a short maturity, but a longer amortization schedule.

Commercial real estate lending affords the Bank an opportunity to receive interest at rates higher than those generally available from one- to four-family residential lending. However, loans secured by such properties usually are greater in amount, more difficult to evaluate and monitor and, therefore, involve a greater degree of risk than one- to four-family residential mortgage loans. Because payments on loans secured by multi-family and commercial properties are often dependent on the successful operation and management of the properties, repayment of such loans may be affected by adverse conditions in the real estate market or the economy. The Bank seeks to minimize these risks by limiting the maximum loan-to-value ratio to 75% and strictly scrutinizing the financial condition of the borrower, the quality of the collateral and the management of the property securing the loan. The Bank also obtains loan guarantees from financially capable parties based on a review of personal financial statements.

Commercial Business Loans. Commercial business loans are generally secured by inventory, accounts receivable, and business equipment such as trucks and tractors. Many commercial business loans also have real estate as collateral. The Bank generally requires a personal guaranty of payment by the principals of a corporate borrower, and reviews the personal financial statements and income tax returns of the guarantors. Commercial business loans are generally originated with loan-to-value ratios not exceeding 75%.

Aside from lines of credit, commercial business loans are generally originated for terms not to exceed seven years with variable interest rates based on the prime lending rate. Approved credit lines totaled \$17.5 million at December 31, 2008, of which \$11.1 million was outstanding. Lines of credit are originated at fixed and variable interest rates for one-year renewable terms.

Table of Contents

A director of the Bank is a shareholder of a farm implement dealership that contracts with the Bank to provide sales financing to the dealership's customers. The Bank does not grant preferential credit under this arrangement. During the year ended December 31, 2008, the Bank granted approximately \$739,000 of credit to customers of the dealership and such loans had an aggregate outstanding balance of \$648,000 at December 31, 2008. At December 31, 2008, 10 loans were delinquent 30 days or more with an aggregate outstanding balance of \$78,000.

Commercial business lending generally involves greater risk than residential mortgage lending and involves risks that are different from those associated with residential and commercial real estate lending. Real estate lending is generally considered to be collateral-based lending with loan amounts based on predetermined loan-to-collateral values and liquidation of the underlying real estate collateral is viewed as the primary source of repayment in the event of borrower default. Although commercial business loans are often collateralized by equipment, inventory, accounts receivable or other business assets, the liquidation of collateral in the event of a borrower default is often an insufficient source of repayment because accounts receivable may be uncollectible and inventories and equipment may be obsolete or of limited use, among other things. Accordingly, the repayment of a commercial business loan depends primarily on the creditworthiness of the borrower (and any guarantors), while liquidation of collateral is a secondary, and often insufficient, source of repayment. The Bank has three commercial lenders and one commercial credit analyst committed to growing commercial business loans to facilitate the changes desired in the Bank's balance sheet. The Bank also uses an outside loan review company to review selected commercial credits on a semi-annual basis.

Consumer Loans. The Bank offers a variety of secured or guaranteed consumer loans, including automobile and truck loans, home equity loans, home improvement loans, boat loans, mobile home loans and loans secured by savings deposits. In addition, the Bank offers unsecured consumer loans. Consumer loans are generally originated at fixed interest rates and for terms not to exceed seven years. The largest portion of the Bank's consumer loan portfolio consists of home equity and second mortgage loans followed by automobile and truck loans. Automobile and truck loans are originated on both new and used vehicles. Such loans are generally originated at fixed interest rates for terms up to five years and at loan-to-value ratios up to 80% of the blue book value in the case of used vehicles and 80% of the purchase price in the case of new vehicles.

The Bank originates variable-rate home equity and fixed-rate second mortgage loans generally for terms not to exceed five and ten years, respectively. The loan-to-value ratio on such loans is limited to 95%, taking into account the outstanding balance on the first mortgage loan.

The Bank's underwriting procedures for consumer loans includes an assessment of the applicant's payment history on other debts and ability to meet existing obligations and payments on the proposed loans. Although the applicant's creditworthiness is a primary consideration, the underwriting process also includes a comparison of the value of the security, if any, to the proposed loan amount. The Bank underwrites and originates the majority of its consumer loans internally, which management believes limits exposure to credit risks relating to loans underwritten or purchased from brokers or other outside sources.

Consumer loans generally entail greater risk than do residential mortgage loans, particularly in the case of consumer loans which are unsecured or secured by assets that depreciate rapidly, such as automobiles. In the latter case, repossessed collateral for a defaulted consumer loan may not provide an adequate source of repayment for the outstanding loan and the remaining deficiency often does not warrant further substantial collection efforts against the borrower. In addition, consumer loan collections depend on the borrower's continuing financial stability, and, therefore, are more likely to be adversely affected by job loss, divorce, illness or personal bankruptcy. Furthermore, the application of various federal and state laws, including federal and state bankruptcy and insolvency laws, may limit the amount which can be recovered on such loans. Such loans may also give rise to claims and defenses by the borrower against the Bank as the holder of the loan, and a borrower may be able to assert claims and defenses that it has against the seller of the underlying collateral.

Table of Contents**Loan Maturity and Repricing**

The following table sets forth certain information at December 31, 2008 regarding the dollar amount of loans maturing in the Bank's portfolio based on their contractual terms to maturity, but does not include potential prepayments. Demand loans, which are loans having neither a stated schedule of repayments nor a stated maturity, and overdrafts are reported as due in one year or less. Loan balances do not include undisbursed loan proceeds, unearned income and allowance for loan losses.

	After One Year	After 3 Years	After 5 Years	After 10 Years	After 15 Years	After 15 Years	Total
	Within One Year	Through 3 Years	Through 5 Years	Through 10 Years	Through 15 Years	After 15 Years	Total
(Dollars in thousands)							
Mortgage loans:							
Residential	\$ 12,850	\$ 15,198	\$ 15,423	\$ 34,371	\$ 24,283	\$ 48,451	\$ 150,576
Commercial real estate and land loans	14,144	15,462	9,997	15,680	9,677	9,882	74,842

(1) Includes construction loans for which the Bank has committed to provide permanent financing.

The following table sets forth the dollar amount of all loans due after December 31, 2009, which have fixed interest rates and have floating or adjustable interest rates.

	Fixed Rates	Floating or Adjustable Rates
(Dollars in thousands)		
Mortgage loans:		
Residential	\$ 94,273	\$ 43,453
Commercial real estate and land loans	24,139	36,559
Residential construction		
Consumer loans	31,133	22,060
Commercial business	8,328	5,923
Total gross loans	\$ 157,873	\$ 107,995

Loan Solicitation and Processing. A majority of the Bank's loan originations are made to existing customers. Walk-ins and customer referrals are also a source of loan originations. Upon receipt of a loan application, a credit report is ordered to verify specific information relating to the loan applicant's employment, income and credit standing. A loan applicant's income is verified through the applicant's employer or from the applicant's tax returns. In the case of a real estate loan, an appraisal of the real estate intended to secure the proposed loan is undertaken, generally by an independent appraiser approved by the Bank. The mortgage loan documents used by the Bank conform to secondary market standards.

The Bank requires that borrowers obtain certain types of insurance to protect its interest in the collateral securing the loan. The Bank requires either a title insurance policy insuring that the Bank has a valid first lien on the mortgaged real estate or an opinion by an attorney regarding the validity of title. Fire and casualty insurance is also required on collateral for loans.

Edgar Filing: FIRST CAPITAL INC - Form 10-K

Loan Commitments and Letters of Credit. The Bank issues commitments for fixed- and adjustable-rate single-family residential mortgage loans conditioned upon the occurrence of certain events. Such commitments are made in writing on specified terms and conditions and are honored for up to 60 days from the date of application, depending on the type of transaction. The Bank had outstanding loan commitments of approximately \$11.7 million at December 31, 2008.

Table of Contents

As an accommodation to its commercial business loan borrowers, the Bank issues standby letters of credit or performance bonds usually in favor of municipalities for whom its borrowers are performing services. At December 31, 2008, the Bank had outstanding letters of credit of \$3.0 million.

Loan Origination and Other Fees. Loan fees and points are a percentage of the principal amount of the mortgage loan that is charged to the borrower for funding the loan. The Bank usually charges a fixed origination fee on one- to four-family residential real estate loans and long-term commercial real estate loans. Current accounting standards require loan origination fees and certain direct costs of underwriting and closing loans to be deferred and amortized into interest income over the contractual life of the loan. Deferred fees and costs associated with loans that are sold are recognized as income at the time of sale. The Bank had \$247,000 of net deferred loan costs at December 31, 2008.

Mortgage Banking Activities. Mortgage loans originated and funded by the Bank and intended for sale in the secondary market are carried at the lower of aggregate cost or market value. Aggregate market value is determined based on the quoted prices under a best efforts sales agreement with a third party. Net unrealized losses are recognized through a valuation allowance by charges to income. Realized gains on sales of mortgage loans are included in noninterest income.

Commitments to originate and fund mortgage loans for sale in the secondary market are considered derivative financial instruments to be accounted for at fair value. The Bank's mortgage loan commitments subject to derivative accounting are fixed rate mortgage commitments at market rates when initiated. At December 31, 2008, the Bank had commitments to originate \$2.3 million in fixed-rate mortgage loans intended for sale in the secondary market after the loans are closed. Fair value is estimated based on fees that would be charged on commitments with similar terms.

The Bank also serves as an agent for a third-party mortgage company. In this role, the Bank accepts and processes mortgage loan applications and performs other loan origination activities, except funding, on behalf of the third-party mortgage company. The third-party mortgage company funds such loans and the Bank receives a fee for each loan funded. The fee is typically 1.5% to 2.0% of the loan principal amount.

Delinquencies. The Bank's collection procedures provide for a series of contacts with delinquent borrowers. A late charge is assessed and a late charge notice is sent to the borrower after the 15th day of delinquency. After 20 days, the collector places a phone call to the borrower. When a payment becomes 60 days past due, the collector issues a default letter. If a loan continues in a delinquent status for 90 days or more, the Bank generally initiates foreclosure or other litigation proceedings.

Nonperforming Assets. Loans are reviewed regularly and when loans become 90 days delinquent, the loan is placed on nonaccrual status and the previously accrued interest income is reversed unless, in the opinion of management, the outstanding interest remains collectible. Typically, payments received on a nonaccrual loan are applied to the outstanding principal and interest as determined at the time of collection of the loan when the likelihood of further loss on the loan is remote. Otherwise, the Bank applies the cost recovery method and applies all payments as a reduction of the unpaid principal balance.

Table of Contents

The following table sets forth information with respect to the Bank's nonperforming assets for the dates indicated. At each date shown, the Bank had no restructured loans within the meaning of Statement of Financial Accounting Standards (SFAS) No. 15.

	2008	2007	At December 31,		
			2006	2005	2004
	(Dollars in thousands)				
Loans accounted for on a nonaccrual basis:					
Residential real estate	\$ 2,013	\$ 1,684	\$ 797	\$ 792	\$ 882
Commercial real estate	2,088	2,674	2,192	805	485
Commercial business	82	397	48	92	525
Consumer	258	124	208	217	183
Total	4,441	4,879	3,245	1,906	2,075
Loans past due 90 days on accrual status:					
Residential real estate	735	633	776	663	706
Commercial real estate	27			409	671
Commercial business		23	144	48	70
Consumer	330	160	205	173	38
Total	1,092	816	1,125	1,293	1,485
Foreclosed real estate, net	881	833	941	749	442
Total nonperforming assets	\$ 6,414	\$ 6,528	\$ 5,311	\$ 3,948	\$ 4,002
Total loans delinquent 90 days or more to net loans	1.72%	1.70%	1.31%	0.99%	1.12%
Total loans delinquent 90 days or more to total assets	1.21%	1.26%	0.96%	0.73%	0.84%
Total nonperforming assets to total assets	1.40%	1.44%	1.16%	0.90%	0.94%

The Bank accrues interest on loans over 90 days past due when, in the opinion of management, the estimated value of collateral and collection efforts are deemed sufficient to ensure full recovery. The Bank recognized \$238,000 in interest income on nonaccrual loans for the fiscal year ended December 31, 2008.

Classified Assets. The Office of Thrift Supervision has adopted various regulations regarding problem assets of savings institutions. The regulations require that each insured institution review and classify its assets on a regular basis. In addition, in connection with examinations of insured institutions, Office of Thrift Supervision examiners have the authority to identify problem assets and, if appropriate, require them to be classified. There are three classifications for problem assets: substandard, doubtful and loss. Substandard assets have one or more defined weaknesses and are characterized by the distinct possibility that the insured institution will sustain some loss if the deficiencies are not corrected. Doubtful assets have the weaknesses of substandard assets with the additional characteristic that the weaknesses make collection or liquidation in full on the basis of currently existing facts, conditions and values questionable, and there is a high possibility of loss. An asset classified as loss is considered uncollectible and of such little value that continuance as an asset of the institution is not warranted. If an asset or portion thereof is classified as loss, the insured institution establishes specific allowances for loan losses for the full amount of the portion of the asset classified as loss. All or a portion of general loan loss allowances established to cover possible losses related to assets classified substandard or doubtful can be included in determining an institution's regulatory capital, while specific valuation allowances for loan losses generally do not qualify as regulatory capital.

Table of Contents

Current accounting rules require that impaired loans be measured based on the present value of expected future cash flows discounted at the loan's effective interest rate, or if expedient, at the loan's observable market price or the fair value of collateral if the loan is collateral dependent. A loan is classified as impaired by management when, based on current information and events, it is probable that the Bank will be unable to collect all amounts due in accordance with the terms of the loan agreement. If the fair value, as measured by one of these methods, is less than the recorded investment in the impaired loan, the Bank establishes a valuation allowance with a provision charged to expense. Management reviews the valuation of impaired loans on a quarterly basis to consider changes due to the passage of time or revised estimates. Assets that do not expose the Bank to risk sufficient to warrant classification in one of the aforementioned categories, but which possess some weaknesses, are required to be designated special mention by management.

An insured institution is required to establish and maintain an allowance for loan losses at a level that is adequate to absorb estimated credit losses associated with the loan portfolio, including binding commitments to lend. General allowances represent loss allowances which have been established to recognize the inherent risk associated with lending activities. When an insured institution classifies problem assets as loss, it is required either to establish an allowance for losses equal to 100% of the amount of the assets, or charge off the classified asset. The amount of its valuation allowance is subject to review by the Office of Thrift Supervision, which can order the establishment of additional general loss allowances. The Bank regularly reviews the loan portfolio to determine whether any loans require classification in accordance with applicable regulations.

At December 31, 2008, 2007 and 2006, the aggregate amounts of the Bank's classified assets were as follows:

	At December 31,		
	2008	2007	2006
	(Dollars in thousands)		
Classified assets:			
Loss	\$	\$	\$
Doubtful	4,441	4,879	42
Substandard	9,148	3,857	4,741
Special mention	7,689	5,111	4,421

Loans classified as impaired in accordance with SFAS 114, *Accounting by Creditors for Impairment of a Loan*, included in the above regulatory classifications and the related allowance for loan losses are summarized below at the dates indicated:

	At December 31,		
	2008	2007	2006
	(Dollars in thousands)		
Impaired loans with related allowance	\$ 3,201	\$ 2,678	\$ 1,657
Impaired loans with no allowance	2,332	3,017	2,713
Total impaired loans	\$ 5,533	\$ 5,695	\$ 4,370
Allowance for loan losses:			
Related to impaired loans	\$ 19	\$ 555	\$ 516
Related to other loans	1,943	1,677	1,804

Foreclosed Real Estate. Foreclosed real estate held for sale is carried at the lower of fair value minus estimated costs to sell, or cost. Costs of holding foreclosed real estate are charged to expense in the current period, except for significant property improvements, which are capitalized. Valuations are periodically performed by management and an allowance is established by a charge to non-interest expense if the carrying value exceeds the fair value minus estimated costs to sell. The net income from operations of foreclosed real estate held for sale is reported in non-interest income. At December 31, 2008, the Bank had foreclosed real estate totaling \$881,000.

Allowance for Loan Losses. Loans are the Company's largest concentration of assets and continue to represent the most significant potential risk. In originating loans, the Bank recognizes that losses will be experienced and that the risk of loss will vary with, among other things, the type of loan made, the

Table of Contents

creditworthiness of the borrower over the term of the loan, general economic conditions and, in the case of a secured loan, the quality of the collateral. The Bank maintains an allowance for loan losses to absorb losses inherent in the loan portfolio. The allowance for loan losses represents management's estimate of probable loan losses based on information available as of the date of the financial statements. The allowance for loan losses is based on management's evaluation of the loan portfolio, including historical loan loss experience, delinquencies, known and inherent risks in the nature and volume of the loan portfolio, information about specific borrower situations, estimated collateral values and economic conditions.

The loan portfolio is reviewed quarterly by management to evaluate the adequacy of the allowance for loan losses to determine the amount of any adjustment required after considering the loan charge-offs and recoveries for the quarter. Management applies a systematic methodology that incorporates its current judgments about the credit quality of the loan portfolio. In addition, the Office of Thrift Supervision, as an integral part of its examination process, periodically reviews the Bank's allowance for loan losses and may require the Bank to make additional provisions for estimated losses based on its judgments about information available to the Office of Thrift Supervision at the time of its examination.

The methodology used in determining the allowance for loan losses includes segmenting the loan portfolio by identifying risk characteristics common to groups of loans, determining and measuring impairment of individual loans based on the present value of expected future cash flows or the fair value of collateral, and determining and measuring impairment for groups of loans with similar characteristics by applying loss factors that consider the qualitative factors which may affect the loss rates. Management continues to refine the methodology used to allocate loan losses by category and the methodology for allocating loan loss allowances by type of loan.

Specific allowances related to impaired loans and other classified loans are established where management has identified significant conditions or circumstances related to a loan that management believes indicate that a loss will occur. The identification of these loans results from the loan review process that identifies and monitors credits with weaknesses or conditions which call into question the full collection of the contractual payments due under the terms of the loan agreement. Factors considered by management include payment status, collateral value and the probability of collecting scheduled principal and interest payments when due.

For loans evaluated on a group basis, management applies loss factors to groups of loans with common risk characteristics (*i.e.*, residential mortgage loans, home equity loans and credit card loans). The loss factors are derived from the Bank's historical loss experience or, where the Bank does not have loss experience, the peer group loss experience. Peer group loss experience is used after evaluating the attributes of the Bank's loan portfolio as compared to the peer group. Loss factors are adjusted for significant environmental factors that, in management's judgment, affect the collectibility of the loan portfolio segment. The significant environmental factors include the levels and trends in charge-offs and recoveries, trends in volume and terms of loans, levels and trends in delinquencies, the effects of changes in underwriting standards and other lending practices or procedures, the experience and depth of the lending management and staff, effects of changes in credit concentration, changes in industry and market conditions and national and local economic trends and conditions. Management evaluates these conditions on a quarterly basis and evaluates and modifies the assumptions used in establishing the loss factors.

Table of Contents

The following table sets forth an analysis of the Bank's allowance for loan losses for the periods indicated.

	2008	Year Ended December 31,			2004
		2007	2006	2005	
		(Dollars in thousands)

(1) Includes residential construction loans.

Investment Activities

Federally chartered savings institutions have authority to invest in various types of liquid assets, including United States Treasury obligations, securities of various federal agencies and of state and municipal governments, deposits at the applicable Federal Home Loan Bank, certificates of deposit of federally insured institutions, certain bankers' acceptances and federal funds. Subject to various restrictions, such savings institutions may also invest a portion of their assets in commercial paper, corporate debt securities and mutual funds, the assets of which conform to the investments that federally chartered savings institutions are otherwise authorized to make directly. Savings institutions are also required to maintain minimum levels of liquid assets that vary from time to time. The Bank may decide to increase its liquidity above the required levels depending upon the availability of funds and comparative yields on investments in relation to return on loans.

The Bank is required under federal regulations to maintain a minimum amount of liquid assets and is also permitted to make certain other securities investments. The balance of the Bank's investments in short-term securities in excess of regulatory requirements reflects management's response to the significantly increasing percentage of deposits with short maturities. Management intends to hold securities with short maturities in the Bank's investment portfolio in order to enable the Bank to match more closely the interest-rate sensitivities of its assets and liabilities.

The Bank periodically invests in mortgage-backed securities, including mortgage-backed securities guaranteed or insured by Ginnie Mae, Fannie Mae or Freddie Mac. Mortgage-backed securities generally increase the quality of the Bank's assets by virtue of the guarantees that back them, are more liquid than individual mortgage loans and may be used to collateralize borrowings or other obligations of the Bank. Of the Bank's total mortgage-backed securities portfolio, securities with a book value of \$912,000 have adjustable rates as of December 31, 2008.

At December 31, 2008, neither the Company nor the Bank had an investment in securities (other than United States Government and agency securities), which exceeded 10% of the Company's stockholders' equity at that date.

- (1) Yields are calculated on a fully taxable equivalent basis using a marginal federal income tax rate of 34%. Weighted average yields are calculated using average prepayment rates for the most recent three-month period.
- (2) Securities held to maturity are carried at amortized cost.
- (3) The expected maturities of mortgage-backed securities may differ from contractual maturities because the mortgages underlying the obligations may be prepaid without penalty.

Table of Contents

Deposit Activities and Other Sources of Funds

General. Deposits and loan repayments are the major source of the Bank's funds for lending and investment activities and for its general business purposes. Loan repayments are a relatively stable source of funds, while deposit inflows and outflows and loan prepayments are significantly influenced by general interest rates and money market conditions. Borrowing may be used on a short-term basis to compensate for reductions in the availability of funds from other sources or may also be used on a longer-term basis for interest rate risk management.

Deposit Accounts. Deposits are attracted from within the Bank's primary market area through the offering of a broad selection of deposit instruments, including non-interest bearing checking accounts, negotiable order of withdrawal (NOW) accounts, money market accounts, regular savings accounts, certificates of deposit and retirement savings plans. Deposit account terms vary, according to the minimum balance required, the time periods the funds must remain on deposit and the interest rate, among other factors. In determining the terms of its deposit accounts, the Bank considers the rates offered by its competition, profitability to the Bank, matching deposit and loan products and its customer preferences and concerns. The Bank generally reviews its deposit mix and pricing weekly.

The following table presents the maturity distributions of time deposits of \$100,000 or more as of December 31, 2008.

Maturity Period	Amount at December 31, 2008 (Dollars in thousands)
Three months or less	\$ 6,272
Over three through six months	8,540
Over six through 12 months	15,429
Over 12 months	14,064
Total	\$ 44,305

Borrowings. The Bank has at times relied upon advances from the Federal Home Loan Bank of Indianapolis to supplement its supply of lendable funds and to meet deposit withdrawal requirements. Advances from the Federal Home Loan Bank of Indianapolis are secured by certain first mortgage loans and investment and mortgage-backed securities. The Bank also uses retail repurchase agreements as a source of borrowings.

The Federal Home Loan Bank functions as a central reserve bank providing credit for savings and loan associations and certain other member financial institutions. As a member, the Bank is required to own capital stock in the Federal Home Loan Bank and is authorized to apply for advances on the security of such stock and certain of its mortgage loans and other assets (principally securities which are obligations of, or guaranteed by, the United States) provided certain standards related to creditworthiness have been met. Advances are made pursuant to several different programs. Each credit program has its own interest rate and range of maturities. Depending on the program, limitations on the amount of advances are based either on a fixed percentage of an institution's net worth or on the Federal Home Loan Bank's assessment of the institution's creditworthiness. Under its current credit policies, the Federal Home Loan Bank generally limits advances to 20% of a member's assets, and short-term borrowing of less than one year may not exceed 10% of the institution's assets. The Federal Home Loan Bank determines specific lines of credit for each member institution.

The following table sets forth certain information regarding the Bank's use of Federal Home Loan Bank advances.

Subsidiary Activities

The Bank is the Company's only subsidiary. The Bank is wholly owned by the Company. The Bank has organized three wholly-owned subsidiaries to manage a portion of the investment securities portfolio. First Harrison Investments, Inc. and First Harrison Holdings, Inc. are Nevada corporations that jointly own First Harrison, LLC, a Nevada limited liability corporation that holds and manages an investment securities portfolio. First Harrison REIT, Inc. was incorporated on July 3, 2008 to hold a portion of the Bank's real estate mortgage loan portfolio. First Harrison REIT, Inc. is a wholly-owned subsidiary of First Harrison Holdings, Inc.

Personnel

As of December 31, 2008, the Bank had 122 full-time employees and 19 part-time employees. A collective bargaining unit does not represent the employees and the Bank considers its relationship with its employees to be good.

REGULATION AND SUPERVISION

General

As a savings and loan holding company, the Company is required by federal law to report to, and otherwise comply with the rules and regulations of, the Office of Thrift Supervision. The Bank, as an insured federal savings association, is subject to extensive regulation, examination and supervision by the Office of Thrift Supervision, as its primary federal regulator, and the Federal Deposit Insurance Corporation, as the deposit insurer.

The Bank is a member of the Federal Home Loan Bank System and, with respect to deposit insurance, of the Deposit Insurance Fund managed by the Federal Deposit Insurance Corporation. The Bank must file reports with the Office of Thrift Supervision and the Federal Deposit Insurance Corporation concerning its activities and financial condition and obtain regulatory approvals prior to entering into certain transactions such as mergers with, or acquisitions of, other savings associations. The Office of Thrift Supervision and/or the Federal Deposit Insurance Corporation conduct periodic examinations to test the Bank's safety and soundness and compliance with various regulatory requirements. This regulation and supervision establishes a comprehensive framework of activities in which an institution can engage and is intended primarily for the protection of the insurance fund and depositors. The regulatory structure also gives the regulatory authorities extensive discretion in connection with their supervisory and enforcement activities and examination policies, including policies with respect to the classification of assets and the establishment of adequate loan loss reserves for regulatory purposes. Any change in such regulatory requirements and policies, whether by the Office of Thrift Supervision, the Federal Deposit Insurance Corporation or Congress, could have a material adverse impact on the Company, the Bank and their operations.

Certain regulatory requirements applicable to the Bank and the Company are referred to below or elsewhere herein. The summary of statutory provisions and regulations applicable to savings associations and their

Table of Contents

holding companies set forth below or elsewhere in this document does not purport to be a complete description of such statutes and regulations and their effects on the Bank and the Company and is qualified in its entirety by reference to the actual laws and regulations.

Holding Company Regulation

The Company is a unitary savings and loan holding company within the meaning of federal law. Under prior law, a unitary savings and loan holding company, such as the Company, was not generally restricted as to the types of business activities in which it may engage, provided that the Bank continued to be a qualified thrift lender. See *Federal Savings Association Regulation QTL Test*. The Gramm-Leach-Bliley Act of 1999 provided that no company may acquire control of a savings association after May 4, 1999 unless the company engages only in the financial activities permitted for financial holding companies under the law (which includes those permitted for bank holding companies) or for multiple savings and loan holding companies as described below. Further, the Gramm-Leach-Bliley Act specified that existing savings and loan holding companies may only engage in such activities. The Gramm-Leach-Bliley Act, however, grandfathered the unrestricted authority for activities with respect to unitary savings and loan holding companies existing prior to May 4, 1999, so long as the holding company's savings association subsidiary continues to comply with the QTL Test. The Company does qualify for the grandfathering. Upon any non-supervisory acquisition by the Company of another savings association or savings bank that meets the qualified thrift lender test and is deemed to be a savings association by the Office of Thrift Supervision, the Company would become a multiple savings and loan holding company (if the acquired institution is held as a separate subsidiary) and would generally be limited to activities permissible for bank holding companies under Section 4(c)(8) of the Bank Holding Company Act, subject to the prior approval of the Office of Thrift Supervision, and certain activities authorized by Office of Thrift Supervision regulation. However, the Office of Thrift Supervision has issued an interpretation concluding that multiple savings and loan holding companies may also engage in activities permitted for financial holding companies.

A savings and loan holding company is prohibited from, directly or indirectly, acquiring more than 5% of the voting stock of another savings association or savings and loan holding company, without prior written approval of the Office of Thrift Supervision and from acquiring or retaining control of a depository institution that is not insured by the Federal Deposit Insurance Corporation. In evaluating applications by holding companies to acquire savings associations, the Office of Thrift Supervision considers the financial and managerial resources and future prospects of the company and institution involved, the effect of the acquisition on the risk to the deposit insurance funds, the convenience and needs of the community and competitive effects.

The Office of Thrift Supervision may not approve any acquisition that would result in a multiple savings and loan holding company controlling savings associations in more than one state, subject to two exceptions: (i) the approval of interstate supervisory acquisitions by savings and loan holding companies; and (ii) the acquisition of a savings association in another state if the laws of the state of the target savings association specifically permit such acquisitions. The states vary in the extent to which they permit interstate savings and loan holding company acquisitions.

Although savings and loan holding companies are not currently subject to regulatory capital requirements or specific restrictions on the payment of dividends or other capital distributions, federal regulations do prescribe such restrictions on subsidiary savings associations. The Bank must notify the Office of Thrift Supervision 30 days before declaring any dividend to the Company and comply with the additional restrictions described below. In addition, the financial impact of a holding company on its subsidiary institution is a matter that is evaluated by the Office of Thrift Supervision and the agency has authority to order cessation of activities or divestiture of subsidiaries deemed to pose a threat to the safety and soundness of the institution.

Acquisition of the Company. Under the Federal Change in Control Act, a notice must be submitted to the Office of Thrift Supervision if any person (including a company or savings association), or group acting in concert, seeks to acquire direct or indirect control of a savings and loan holding company or savings association. A change of control may occur, and prior notice is required, upon the acquisition of 10% or more of the Company's outstanding voting stock, unless the Office of Thrift Supervision has found that the acquisition will not result in a change of control of the Company. Under the Change in Control Act, the Office of Thrift Supervision generally has

Table of Contents

60 days from the filing of a complete notice to act, taking into consideration certain factors, including the financial and managerial resources of the acquirer and the anti-trust effects of the acquisition. Any company that acquires control would then be subject to regulation as a savings and loan holding company.

Federal Savings Association Regulation

Business Activities. The activities of federal savings associations are governed by federal law and regulations. Those laws and regulations delineate the nature and extent of the business activities in which federal associations may engage. In particular, certain lending authority for federal associations, *e.g.*, commercial, non-residential real property loans and consumer loans, is limited to a specified percentage of the institution's capital or assets.

Capital Requirements. The Office of Thrift Supervision capital regulations require savings associations to meet three minimum capital standards: a 1.5% tangible capital to total assets ratio; a 4% tier 1 capital to total assets leverage ratio (3% for institutions receiving the highest rating on the CAMELS examination rating system); and an 8% risk-based capital ratio. In addition, the prompt corrective action standards discussed below also establish, in effect, a minimum 2% tangible capital standard, a 4% leverage ratio (3% for institutions receiving the highest CAMELS rating) and, together with the risk-based capital standard itself, a 4% Tier 1 risk-based capital standard. The Office of Thrift Supervision regulations also require that, in meeting the tangible, leverage and risk-based capital standards, institutions must generally deduct investments in and loans to subsidiaries engaged in activities as principal that are not permissible for a national bank.

The risk-based capital standard for savings associations requires the maintenance of Tier 1 (core) and total capital (which is defined as core capital and supplementary capital, less certain specified deductions from total capital such as reciprocal holdings of depository institution capital instruments and equity investments) to risk-weighted assets of at least 4% and 8%, respectively. In determining the amount of risk-weighted assets, all assets, including certain off-balance sheet activities, recourse obligations, residual interests and direct credit substitutes, are multiplied by a risk-weight factor of 0% to 100%, assigned by the Office of Thrift Supervision capital regulation based on the risks believed inherent in the type of asset. Core (Tier 1) capital is generally defined as common stockholders' equity (including retained earnings), certain non-cumulative perpetual preferred stock and related surplus, and minority interests in equity accounts of consolidated subsidiaries less intangibles other than certain mortgage servicing rights and credit card relationships. The components of supplementary capital (Tier 2 capital) include cumulative preferred stock, long-term perpetual preferred stock, mandatory convertible securities, subordinated debt and intermediate preferred stock, the allowance for loan and lease losses limited to a maximum of 1.25% of risk-weighted assets, and up to 45% of unrealized gains on available-for-sale equity securities with readily determinable fair market values. Overall, the amount of supplementary capital included as part of total capital cannot exceed 100% of core capital.

The Office of Thrift Supervision also has authority to establish individual minimum capital requirements in appropriate cases upon a determination that an institution's capital level is or may become inadequate in light of the particular circumstances. At December 31, 2008, the Bank met each of its capital requirements.

The following table presents the Bank's capital position at December 31, 2008.

	Actual Capital	Required Capital	Excess Amount	Capital	
				Actual Percent	Required Percent
				(Dollars in thousands)	
Tangible	\$ 40,854	\$ 6,821	\$ 34,033	8.98%	1.50%
Core (Leverage)	40,854	18,188	22,666	8.98%	4.00%
Risk-based	42,797	23,186	19,611	14.77%	8.00%

Table of Contents

Prompt Corrective Regulatory Action. The Office of Thrift Supervision is required to take certain supervisory actions against undercapitalized institutions, the severity of which depends upon the institution's degree of undercapitalization. Generally, a savings association that has a ratio of total capital to risk weighted assets of less than 8%, a ratio of Tier 1 (core) capital to risk-weighted assets of less than 4% or a ratio of core capital to total assets of less than 4% (3% or less for institutions with the highest examination rating) is considered to be undercapitalized. A savings association that has a total risk-based capital ratio less than 6%, a Tier 1 capital ratio of less than 3% or a leverage ratio that is less than 3% is considered to be significantly undercapitalized and a savings association that has a tangible capital to assets ratio equal to or less than 2% is deemed to be critically undercapitalized. Subject to a narrow exception, the Office of Thrift Supervision is required to appoint a receiver or conservator within specified time frames for an institution that is critically undercapitalized. The regulation also provides that a capital restoration plan must be filed with the Office of Thrift Supervision within 45 days of the date a savings association is deemed to have received notice that it is undercapitalized, significantly undercapitalized or critically undercapitalized. Compliance with the plan must be guaranteed by any parent holding company up to the lesser of 5% of the savings association's total assets when it was deemed to be undercapitalized or the amount necessary to achieve compliance with applicable capital requirements. In addition, numerous mandatory supervisory actions become immediately applicable to an undercapitalized institution, including, but not limited to, increased monitoring by regulators and restrictions on growth, capital distributions and expansion. The Office of Thrift Supervision could also take any one of a number of discretionary supervisory actions, including the issuance of a capital directive and the replacement of senior executive officers and directors. Significantly and critically undercapitalized institutions are subject to additional mandatory and discretionary measures.

Insurance of Deposit Accounts. The Bank's deposits are insured up to applicable limits by the Deposit Insurance Fund of the Federal Deposit Insurance Corporation. The Deposit Insurance Fund is the successor to the Bank Insurance Fund and the Savings Association Insurance Fund, which were merged in 2006. Under the Federal Deposit Insurance Corporation's risk-based assessment system, insured institutions are assigned to one of four risk categories based on supervisory evaluations, regulatory capital levels and certain other factors, with less risky institutions paying lower assessments. An institution's assessment rate depends upon the category to which it is assigned. For 2008, assessments ranged from five to forty-three basis points of assessable deposits. Due to losses incurred by the Deposit Insurance Fund in 2008 as a result of failed institutions, and anticipated future losses, the Federal Deposit Insurance Corporation has adopted, pursuant to a Restoration Plan to replenish the fund, an across the board seven basis point increase in the assessment range for the first quarter of 2009. The Federal Deposit Insurance Corporation has proposed further refinements to its risk-based assessment that would be effective April 1, 2009 and would make the range eight to 77^{1/2} basis points. The Federal Deposit Insurance Corporation may adjust rates uniformly from one quarter to the next, except that no adjustment can deviate more than three basis points from the base scale without notice and comment rulemaking. No institution may pay a dividend if in default of the FDIC assessment.

Due to the recent difficult economic conditions, deposit insurance per account owner has been raised to \$250,000 for all types of accounts until January 1, 2010. In addition, the Federal Deposit Insurance Corporation adopted an optional Temporary Liquidity Guarantee Program by which, for a fee, noninterest bearing transaction accounts would receive unlimited insurance coverage until December 31, 2009 and certain senior unsecured debt issued by institutions and their holding companies between October 13, 2008 and June 30, 2009 would be guaranteed by the Federal Deposit Insurance Corporation through June 30, 2012. The Bank has elected to participate in the unlimited noninterest bearing transaction account coverage and the Bank and the Company have elected not to participate in the unsecured debt guarantee program.

In addition to the assessment for deposit insurance, institutions are required to make payments on bonds issued in the late 1980s by the financing corporation to recapitalize a predecessor deposit insurance funds. That payment is established quarterly and for the year ended December 31, 2008 averaged 1.12 basis points of assessable deposits.

Federal law also provided a one-time credit for eligible institutions based on their assessment base as of December 31, 1996. Subject to certain limitations, credits could be used beginning in 2007 to offset assessments until exhausted. The Bank's remaining one-time credit was \$198,000 and, of that, no credit remains at December 31,

Table of Contents

2008. Federal law also provides for the possibility that the Federal Deposit Insurance Corporation may pay dividends to insured institutions once the Deposit Insurance fund reserve ratio equals or exceeds 1.35% of estimated insured deposits.

The ratio, which is viewed by the Federal Deposit Insurance Corporation as the long term level that the fund should achieve, has been established by the agency at 1.25% for 2009; which was unchanged from 2008.

The Federal Deposit Insurance Corporation has authority to increase insurance assessments. A significant increase in insurance premiums would likely have an adverse effect on the operating expenses and results of operations of the Bank. Management cannot predict what insurance assessment rates will be in the future.

Insurance of deposits may be terminated by the Federal Deposit Insurance Corporation upon a finding that the institution has engaged in unsafe or unsound practices, is in an unsafe or unsound condition to continue operations or has violated any applicable law, regulation, rule, order or condition imposed by the Federal Deposit Insurance Corporation or the Office of Thrift Supervision. The management of the Bank does not know of any practice, condition or violation that might lead to termination of deposit insurance.

Loans to One Borrower. Federal law provides that savings associations are generally subject to the limits on loans to one borrower applicable to national banks. Generally, subject to certain exceptions, a savings association may not make a loan or extend credit to a single or related group of borrowers in excess of 15% of its unimpaired capital and surplus. An additional amount may be lent, equal to 10% of unimpaired capital and surplus, if secured by specified readily-marketable collateral.

QTL Test. Federal law requires savings associations to meet a qualified thrift lender test. Under the test, a savings association is required to either qualify as a domestic building and loan association under the Internal Revenue Code or maintain at least 65% of its portfolio assets (total assets less: (i) specified liquid assets up to 20% of total assets; (ii) intangibles, including goodwill; and (iii) the value of property used to conduct business) in certain qualified thrift investments (primarily residential mortgages and related investments, including certain mortgage-backed securities, but also defined to include education, credit card and small business loans) in at least 9 months out of each 12 month period.

A savings association that fails the qualified thrift lender test is subject to certain operating restrictions and may be required to convert to a bank charter. As of December 31, 2008, the Bank maintained 78% of its portfolio assets in qualified thrift investments and, therefore, met the qualified thrift lender test.

Limitation on Capital Distributions. Office of Thrift Supervision regulations impose limitations upon all capital distributions by a savings association, including cash dividends, payments to repurchase its shares and payments to shareholders of another institution in a cash-out merger. Under the regulations, an application to and prior approval of the Office of Thrift Supervision is required prior to any capital distribution if the institution does not meet the criteria for expedited treatment of applications under Office of Thrift Supervision regulations (*i.e.*, generally, examination and Community Reinvestment Act ratings in the two top categories), the total capital distributions for the calendar year exceed net income for that year plus the amount of retained net income for the preceding two years, the institution would be undercapitalized following the distribution or the distribution would otherwise be contrary to a statute, regulation or agreement with the Office of Thrift Supervision. If an application is not required, the institution must still provide prior notice to the Office of Thrift Supervision of the capital distribution if, like the Bank, it is a subsidiary of a holding company. If the Bank's capital fell below its regulatory requirements or the Office of Thrift Supervision notified it that it was in need of increased supervision, the Bank's ability to make capital distributions could be restricted. In addition, the Office of Thrift Supervision could prohibit a proposed capital distribution by any institution, which would otherwise be permitted by the regulation, if the Office of Thrift Supervision determines that such distribution would constitute an unsafe or unsound practice.

Standards for Safety and Soundness. The federal banking agencies have adopted Interagency Guidelines prescribing Standards for Safety and Soundness in various areas such as internal controls and information systems, internal audit, loan documentation and credit underwriting, interest rate exposure, asset growth and quality, earnings and compensation, fees and benefits. The guidelines set forth the safety and soundness standards that the federal

Table of Contents

banking agencies use to identify and address problems at insured depository institutions before capital becomes impaired. If the Office of Thrift Supervision determines that a savings association fails to meet any standard prescribed by the guidelines, the Office of Thrift Supervision may require the institution to submit an acceptable plan to achieve compliance with the standard.

Transactions with Related Parties. The Bank's authority to engage in transactions with affiliates (e.g., any entity that controls or is under common control with the Bank including the Company and its other subsidiaries) is limited by federal law. The aggregate amount of covered transactions with any individual affiliate is limited to 10% of the capital and surplus of the savings association. The aggregate amount of covered transactions with all affiliates is limited to 20% of the savings association's capital and surplus. Certain transactions with affiliates are required to be secured by collateral in an amount and of a type specified by federal law. The purchase of low quality assets from affiliates is generally prohibited. Transactions with affiliates must generally be on terms and under circumstances that are at least as favorable to the association as those prevailing at the time for comparable transactions with non-affiliated companies. In addition, savings associations are prohibited from lending to any affiliate that is engaged in activities that are not permissible for bank holding companies and no savings association may purchase the securities of any affiliate other than a subsidiary.

The Sarbanes Oxley Act of 2002 generally prohibits loans by the Company to its executive officers and directors. However, the law contains a specific exception for loans by a depository institution to its executive officers and directors in compliance with federal banking laws. Under such laws, the Bank's authority to extend credit to executive officers, directors and 10% shareholders (insiders), as well as entities such persons control, is limited. The laws restrict both the individual and aggregate amount of loans that the Bank, may make to insiders based, in part, on the Bank's capital position and requires that certain board approval procedures be followed. Such loans are required to be made on terms substantially the same as those offered to unaffiliated individuals and not involve more than the normal risk of repayment. There is an exception for loans made pursuant to a benefit or compensation program that is widely available to all employees of the institution and does not give preference to insiders over other employees. Loans to executive officers are subject to additional limitations based on the type of loan involved.

Enforcement. The Office of Thrift Supervision has primary enforcement responsibility over savings associations and has the authority to bring actions against the institution and all institution-affiliated parties, including stockholders, and any attorneys, appraisers and accountants who knowingly or recklessly participate in wrongful action likely to have an adverse effect on an insured institution. Formal enforcement action may range from the issuance of a capital directive or cease and desist order to removal of officers and/or directors to institution of receivership, conservatorship or termination of deposit insurance. Civil penalties cover a wide range of violations and can amount to \$25,000 per day, or even \$1 million per day in especially egregious cases. The Federal Deposit Insurance Corporation has the authority to recommend to the Director of the Office of Thrift Supervision that enforcement action to be taken with respect to a particular savings association. If action is not taken by the Director, the Federal Deposit Insurance Corporation has authority to take such action under certain circumstances. Federal law also establishes criminal penalties for certain violations.

Assessments. Savings associations are required to pay assessments to the Office of Thrift Supervision to fund the agency's operations. The general assessments, paid on a semi-annual basis (including consolidated subsidiaries), are computed based upon the savings association's total assets, financial condition and complexity of its portfolio. The Office of Thrift Supervision assessments paid by the Bank for the fiscal year ended December 31, 2008 totaled \$116,000.

Federal Home Loan Bank System

The Bank is a member of the Federal Home Loan Bank System, which consists of 12 regional Federal Home Loan Banks. The Federal Home Loan Bank provides a central credit facility primarily for member institutions. The Bank, as a member of the Federal Home Loan Bank, is required to acquire and hold shares of capital stock in that Federal Home Loan Bank. The Bank was in compliance with this requirement with an investment in Federal Home Loan Bank stock at December 31, 2008 of \$3.6 million.

Table of Contents

The Federal Home Loan Banks have been required to provide funds for the resolution of insolvent thrifts in the late 1980s and contribute funds for affordable housing programs. These and similar requirements could reduce the amount of dividends that the Federal Home Loan Banks pay to their members and result in the Federal Home Loan Banks imposing a higher rate of interest on advances to their members. If dividends were reduced, or interest on future Federal Home Loan Bank advances increased, the Bank's net interest income would likely also be reduced.

Federal Reserve System

The Federal Reserve Board regulations require savings associations to maintain non-interest earning reserves against their transaction accounts (primarily Negotiable Order of Withdrawal (NOW) and regular checking accounts). For 2009, the regulations provide that reserves be maintained against aggregate transaction accounts as follows: a 3% reserve ratio is assessed on net transaction accounts up to and including \$44.4 million; a 10% reserve ratio is applied above \$44.4 million. The first \$10.3 million of otherwise reservable balances are exempted from the reserve requirements. These amounts are adjusted annually. The Bank complies with the foregoing requirements. In October 2008, the Federal Reserve Board began paying interest on certain reserve balances.

FEDERAL AND STATE TAXATION

Federal Taxation

General. The Company and the Bank report their income on a fiscal year basis using the accrual method of accounting and are subject to federal income taxation in the same manner as other corporations with some exceptions, including particularly the Bank's reserve for bad debts, as discussed below. The following discussion of tax matters is intended only as a summary and does not purport to be a comprehensive description of the tax rules applicable to the Bank or the Company. The Bank has not been audited by the Internal Revenue Service in the past five years.

Bad Debt Reserve. For taxable years beginning after December 31, 1995, the Bank is entitled to take a bad debt deduction for federal income tax purposes which is based on its current or historic net charge-offs by applying the experience reserve method for banks. For tax years beginning prior to December 31, 1995, the Bank as a qualifying thrift had been permitted to establish a reserve for bad debts and to make annual additions to such reserve, which were deductible for federal income tax purposes. Under such prior tax law, generally the Bank recognized a bad debt deduction equal to 8% of taxable income.

Under the 1996 Tax Act, the Bank was required to recapture all or a portion of its additions to its bad debt reserve made subsequent to the base year (which is the Bank's last taxable year beginning before January 1, 1988). This recapture was required to be made, after a deferral period based on certain specified criteria, ratably over a six-year period commencing in the Bank's calendar 1998 tax year. All post-1987 additions to the statutory bad debt reserve have been recaptured in taxable income as of December 31, 2002.

Potential Recapture of Base Year Bad Debt Reserve. The Bank's bad debt reserve as of the base year is not subject to automatic recapture as long as the Bank continues to carry on the business of banking. If the Bank no longer qualifies as a bank, the balance of the pre-1988 reserves (the base year reserves) are restored to income over a six-year period beginning in the tax year the Bank no longer qualifies as a bank. Such base year bad debt reserve is subject to recapture to the extent that the Bank makes non-dividend distributions that are considered as made from the base year bad debt reserve. To the extent that such reserves exceed the amount that would have been allowed under the experience method (Excess Distributions), then an amount based on the amount distributed will be included in the Bank's taxable income. Non-dividend distributions include distributions in excess of the Bank's current and accumulated earnings and profits, distributions in redemption of stock, and distributions in partial or complete liquidation. However, dividends paid out of the Bank's current or accumulated earnings and profits, as calculated for federal income tax purposes, will not be considered to result in a distribution from the Bank's bad debt reserve. Thus, any dividends to the Company that would reduce amounts appropriated to the Bank's bad debt reserve and deducted for federal income tax purposes would create a tax liability for the Bank. The amount of additional taxable income created from an Excess Distribution is an amount that, when reduced by the tax

Table of Contents

attributable to the income, is equal to the amount of the distribution. If the Bank makes a non-dividend distribution, then approximately one and one-half times the amount so used would be includable in gross income for federal income tax purposes, assuming a 34% corporate income tax rate (exclusive of state and local taxes). The Bank does not intend to pay dividends that would result in a recapture of any portion of its bad debt reserve.

Corporate Alternative Minimum Tax. The Internal Revenue Code imposes a tax on alternative minimum taxable income (AMTI) at a rate of 20%. The excess of the bad debt reserve deduction claimed by the Bank over the deduction that would have been allowable under the experience method is treated as a preference item for purposes of computing the AMTI. Only 90% of AMTI can be offset by net operating loss carry-overs, of which the Bank currently has none. AMTI is increased by an amount equal to 75% of the amount by which the Bank's adjusted current earnings exceeds its AMTI (determined without regard to this preference and prior to reduction for net operating losses). In addition, for taxable years beginning after June 30, 1986 and before January 1, 1996, an environmental tax of 0.12% of the excess of AMTI (with certain modifications) over \$2.0 million is imposed on corporations, including the Bank, whether or not an Alternative Minimum Tax (AMT) is paid. The Bank does not expect to be subject to the AMT.

Dividends Received Deduction and Other Matters. The Company may exclude from its income 100% of dividends received from the Bank as a member of the same affiliated group of corporations. The corporate dividends received deduction is generally 70% in the case of dividends received from unaffiliated corporations with which the Company and the Bank will not file a consolidated tax return, except that if the Company or the Bank own more than 20% of the stock of a corporation distributing a dividend, then 80% of any dividends received may be deducted.

Indiana Taxation

Indiana imposes an 8.5% franchise tax based on a financial institution's adjusted gross income as defined by statute. In computing adjusted gross income, deductions for municipal interest, United States Government interest, the bad debt deduction computed using the reserve method and pre-1990 net operating losses are disallowed. During the past five years, the Bank's Indiana state income tax returns for the years 2003 through 2005 were audited, with no changes made.

ITEM 1A. RISK FACTORS

Above average interest rate risk associated with fixed-rate loans

At December 31, 2008, approximately 32.8% of the Bank's assets consisted of residential mortgage loans held for investment. Such loans represented 46.0% of the total loan portfolio at that date. While generally considered to involve less risk than other types of lending, such as commercial mortgage loans, commercial business loans and consumer loans, residential mortgage loans provide relatively lower yields. The Bank's loan portfolio also includes a significant amount of loans with fixed rates of interest. At December 31, 2008, \$196.9 million, or 60.1% of the Bank's total loans receivable, had fixed interest rates all of which were held for investment. The Bank offers ARM loans and fixed-rate loans. Unlike ARM loans, fixed-rate loans carry the risk that, because they do not reprice to market interest rates, their yield may be insufficient to offset increases in the Bank's cost of funds during a rising interest rate environment. Accordingly, a material and prolonged increase in market interest rates could be expected to have a greater adverse effect on the Bank's net interest income compared to other institutions that hold a materially larger portion of their assets in ARM loans or fixed-rate loans that are originated for committed sale in the secondary market. For a discussion of the Bank's loan portfolio, see *Item 1. Business Lending Activities*.

Higher loan losses could require the Company to increase its allowance for loan losses through a charge to earnings.

When we loan money we incur the risk that our borrowers do not repay their loans. We reserve for loan losses by establishing an allowance through a charge to earnings. The amount of this allowance is based on our

Table of Contents

assessment of loan losses inherent in our loan portfolio. The process for determining the amount of the allowance is critical to our financial results and condition. It requires subjective and complex judgments about the future, including forecasts of economic or market conditions that might impair the ability of our borrowers to repay their loans. We might underestimate the loan losses inherent in our loan portfolio and have loan losses in excess of the amount reserved. We might increase the allowance because of changing economic conditions. For example, in a rising interest rate environment, borrowers with adjustable-rate loans could see their payments increase. There may be a significant increase in the number of borrowers who are unable or unwilling to repay their loans, resulting in our charging off more loans and increasing our allowance. In addition, when real estate values decline, the potential severity of loss on a real estate-secured loan can increase significantly, especially in the case of loans with high combined loan-to-value ratios. Our allowance for loan losses at any particular date may not be sufficient to cover future loan losses. We may be required to increase our allowance for loan losses, thus reducing earnings.

Commercial business lending may expose the Company to increased lending risks.

At December 31, 2008, the Bank's commercial business loan portfolio amounted to \$22.9 million, or 7.0% of total loans. Subject to market conditions and other factors, the Bank intends to expand its commercial business lending activities within its primary market area. Commercial business lending is inherently riskier than one- to four-family mortgage lending. Although commercial business loans are often collateralized by equipment, inventory, accounts receivable or other business assets, the liquidation value of these assets in the event of a borrower default is often an insufficient source of repayment because accounts receivable may be uncollectible and inventories and equipment may be obsolete or of limited use, among other things. See *Item 1. Business Lending Activities Commercial Business Loans*.

Commercial real estate lending may expose the Company to increased lending risks.

At December 31, 2008, the Bank's commercial real estate loan portfolio amounted to \$65.4 million, or 20.0% of total loans. Commercial real estate lending is inherently riskier than one- to-four family mortgage lending. Because payments on loans secured by commercial properties often depend upon the successful operation and management of the properties, repayment of such loans may be affected by adverse conditions in the real estate market or the economy, among other things. See *Item 1. Business Lending Activities Commercial Real Estate Loans*.

An economic recession or even modest downturn in the local economy or a decline in real estate values could hurt the Company's profits.

Nearly all of the Bank's loans are secured by real estate or made to businesses in its primary market area. As a result of this concentration, a downturn in the local economy could cause significant increases in nonperforming loans, which would hurt profit. In recent periods, there has been a significant decrease in real estate values in our market area, following a period of significant appreciation in real estate values. A continuing decline in real estate values could cause some of the Bank's mortgages to become inadequately collateralized, which would expose the Company to a greater risk of loss.

Strong competition within the Bank's market area could hurt the Company's profit and growth.

The Bank faces intense competition both in making loans and attracting deposits. This competition has made it more difficult for it to make new loans and at times has forced it to offer higher deposit rates. Price competition for loans and deposits might result in the Bank earning less on loans paying more on deposits, which would reduce net interest income. Competition also makes it more difficult to grow loans and deposits. Some of the institutions with which the Bank competes have substantially greater resources and lending limits than it has and may offer services that the Bank does not provide. Future competition will likely increase because of legislative, regulatory and technological changes and the continuing trend of consolidation in the financial services industry. The Company's profitability depends upon the Bank's continued ability to compete successfully in its market area.

Table of Contents

The Bank and the Company operate in a highly regulated environment and may be adversely affected by changes in laws and regulations.

The Company and the Bank are subject to extensive regulation, supervision and examination by the Office of Thrift Supervision, their chartering authority, and by the Federal Deposit Insurance Corporation, as insurer of the Bank's deposits. The Company and the Bank are both subject to regulation and supervision by the Office of Thrift Supervision. Such regulations and supervision governs the activities in which an institution and its holding company may engage, and are intended primarily for the protection of the insurance fund and depositors. Regulatory authorities have extensive discretion in their supervisory and enforcement activities, including to imposition of restrictions on operations, the classification of assets and determination of the level of allowance for loan losses. Any change in such regulation and oversight, whether in the form of regulatory policy, regulations, legislation or supervisory claim may have a material impact on the Bank's operations.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

Table of Contents**ITEM 2. PROPERTIES**

The following table sets forth certain information regarding the Bank's offices as of December 31, 2008.

- (1) Represents the net value of land, buildings, furniture, fixtures and equipment owned by the Bank.
- (2) Lease expires April 2010.

ITEM 3. LEGAL PROCEEDINGS

At December 31, 2008, neither the Company nor the Bank was involved in any pending legal proceedings believed by management to be material to the Company's financial condition or results of operations. From time to time, the Bank is involved in legal proceedings occurring in the ordinary course of business. Such routine legal proceedings, in the aggregate, are believed by management to be immaterial to the Company's financial condition, results of operations or cash flows.

Table of Contents**ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS**

No matters were submitted to a vote of security holders during the fourth quarter of the fiscal year ended December 31, 2008.

PART II**ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

The common shares of the Company are traded on the NASDAQ Capital Market under the symbol FCAP. As of December 31, 2008, the Company had 1,294 stockholders of record and 2,794,530 common shares outstanding. This does not reflect the number of persons whose shares are in nominee or street name accounts through brokers. See Note 12 in the accompanying Notes to Consolidated Financial Statement for information regarding dividend restrictions applicable to the Company.

The following table lists quarterly market price and dividend information per common share for the years ended December 31, 2008 and 2007 as reported by NASDAQ.

	High Sale	Low Sale	Dividends	Market price end of period
2008:				
First Quarter	\$ 16.89	\$ 15.10	\$ 0.17	\$ 16.25
Second Quarter	16.25	13.84	0.18	14.70
Third Quarter	16.50	12.84	0.18	15.36
Fourth Quarter	15.50	13.08	0.18	15.28
2007:				
First Quarter	\$ 17.15	\$ 15.16	\$ 0.17	\$ 16.50
Second Quarter	18.17	16.04	0.17	16.99
Third Quarter	18.20	17.52	0.17	18.00
Fourth Quarter	18.65	17.57	0.17	17.98

The following table provides certain information with regard to shares repurchased by the Company in the fourth quarter of 2008.

Period	(a) Total Number of Shares Purchased	(b) Average Price Paid Per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
October 1 through October 31, 2008	2,189	15.21	2,189	237,739
November 1 through November 30, 2008	2,710	15.29	2,710	235,029
December 1 through December 31, 2008				235,029
Total	4,899		4,899	235,029

On August 19, 2008, the board of directors authorized the repurchase of up to 240,467 shares of the Company's outstanding common stock. The stock repurchase program will expire upon the purchase of the maximum number of shares authorized under the program, unless the board of directors terminates the program earlier.

Table of Contents**ITEM 6. SELECTED FINANCIAL DATA**

The financial data presented below is qualified in its entirety by the more detailed financial data appearing elsewhere in this report, including the Company's audited consolidated financial statements. The following tables set forth certain information.

FINANCIAL CONDITION DATA:

	At December 31,				
	2008	2007	2006	2005	2004
	<i>(In thousands)</i>				
Total assets	\$ 458,625	\$ 453,179	\$ 457,105	\$ 438,354	\$ 425,302

Nonperforming assets as a percent of total assets (7)	1.40%	1.44%	1.16%	0.90%	0.94%
Allowance for loan losses as a percent of gross loans receivable	0.81%	0.65%	0.68%	0.64%	0.76%

- (1) Net income divided by average assets.
- (2) Net income divided by average equity.
- (3) Dividends declared per share divided by net income per share.
- (4) Difference between weighted average yield on interest-earning assets and weighted average cost of interest-bearing liabilities.
- (5) Net interest income as a percentage of average interest-earning assets.
- (6) Nonperforming loans consist of loans accounted for on a nonaccrual basis and accruing loans 90 days or more past due.
- (7) Nonperforming assets consist of nonperforming loans and real estate acquired in settlement of loans, but exclude restructured loans.

Table of Contents

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION

General

As the holding company for the Bank, the Company conducts its business primarily through the Bank. The Bank's results of operations depend primarily on net interest income, which is the difference between the income earned on its interest-earning assets, such as loans and investments, and the cost of its interest-bearing liabilities, consisting primarily of deposits, retail repurchase agreements and borrowings from the Federal Home Loan Bank of Indianapolis. The Bank's net income is also affected by, among other things, fee income, provisions for loan losses, operating expenses and income tax provisions. The Bank's results of operations are also significantly affected by general economic and competitive conditions, particularly changes in market interest rates, government legislation and policies concerning monetary and fiscal affairs, housing and financial institutions and the intended actions of the regulatory authorities.

Management's discussion and analysis of financial condition and results of operations is intended to assist in understanding the financial condition and results of operations of the Company and the Bank. The information contained in this section should be read in conjunction with the consolidated financial statements and the accompanying notes to consolidated financial statements included elsewhere in this report.

Operating Strategy

The Company is the parent company of an independent community-oriented financial institution that delivers quality customer service and offers a wide range of deposit, loan and investment products to its customers. The commitment to customer needs, the focus on providing consistent customer service, and community service and support are the keys to the Bank's past and future success. The Company has no other material income other than that generated by the Bank and its subsidiaries.

The Bank's primary business strategy is attracting deposits from the general public and using those funds to originate one-to-four-family residential mortgage loans, multi-family residential loans, commercial real estate and business loans and consumer loans. The Bank invests excess liquidity primarily in interest-bearing deposits with the Federal Home Loan Bank of Indianapolis and other financial institutions, federal funds sold, U.S. government and agency securities, local municipal obligations and mortgage-backed securities.

In recent years, the Company's operating strategy has also included strategies designed to enhance profitability by increasing sources of noninterest income and improving operating efficiency while managing its capital and limiting its credit risk and interest rate risk exposures. To accomplish these objectives, the Company has focused on the following:

Control credit risk by focusing on the origination of one-to-four-family residential mortgage loans and consumer loans, consisting primarily of home equity loans and lines of credit, while increasing the market share of commercial real estate and small business loans.

Focus on growth at the branch offices in commercial deposit and loan relationships.

Capitalize on our branch locations to further expand our market share in Southern Indiana.

Increase fee income from secondary market mortgage originations by having dedicated originators serving each office.

Continue to invest in technology to increase productivity and efficiency, increase growth of our Internet banking service, bill payment service, and the Company's ability to provide customer information at our teller lines in minutes versus days.

Table of Contents

Engage in a capital management strategy to repurchase Company stock and pay dividends to enhance shareholder value.

Critical Accounting Policies and Estimates

The accounting and reporting policies of the Company comply with accounting principles generally accepted in the United States of America and conform to general practices within the banking industry. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions. The financial position and results of operations can be affected by these estimates and assumptions, which are integral to understanding reported results. Critical accounting policies are those policies that require management to make assumptions about matters that are highly uncertain at the time an accounting estimate is made; and different estimates that the Company reasonably could have used in the current period, or changes in the accounting estimate that are reasonably likely to occur from period to period, would have a material impact on the Company's financial condition, changes in financial condition or results of operations. Most accounting policies are not considered by management to be critical accounting policies. Several factors are considered in determining whether or not a policy is critical in the preparation of financial statements. These factors include, among other things, whether the estimates are significant to the financial statements, the nature of the estimates, the ability to readily validate the estimates with other information including third parties or available prices, and sensitivity of the estimates to changes in economic conditions and whether alternative accounting methods may be utilized under generally accepted accounting principles.

Significant accounting policies, including the impact of recent accounting pronouncements, are discussed in Note 1 of the Notes to Consolidated Financial Statements. Those policies considered to be critical accounting policies are described below.

Allowances for Loan Losses. Management's evaluation of the adequacy of the allowance for loan losses is the most critical of accounting estimates for a financial institution. The methodology for determining the allowance for loan losses and the related provision for loan losses is described below in Allowance for Loan Losses. This accounting estimate is highly subjective and requires a significant amount of judgment because a multitude of factors can influence the ultimate collection of a loan. The methodology for determining the allowance for loan losses attempts to identify the amount of probable losses in the loan portfolio. However, there can be no assurance that the methodology will successfully identify all probable losses as the factors and conditions that influence the estimate are subject to significant change and management's judgments. As a result, additional provisions for loan losses may be required that would adversely impact earnings in future periods.

Valuation Methodologies. In the ordinary course of business, management applies various valuation methodologies to assets and liabilities that often involve a significant degree of judgment, particularly when active markets do not exist for the items being valued. Generally, in evaluating various assets for potential impairment, management compares the fair value to the carrying value. Quoted market prices are referred to when estimating fair values for certain assets, such as investment securities. However, for those items for which market-based prices do not exist, management utilizes significant estimates and assumptions to value such items. Examples of these items include goodwill and other intangible assets, estimated present value of impaired loans, deferred compensation plans, value ascribed to stock-based compensation and certain other financial investments. The use of different assumptions could produce significantly different results, which could have material positive or negative effects on the Company's results of operations.

Year Ended December 31, 2008 Compared to Year Ended December 31, 2007

Net Income. Net income was \$3.6 million (\$1.27 per share diluted; weighted average common shares outstanding of 2,815,276, as adjusted) for the year ended December 31, 2008 compared to \$3.4 million (\$1.20 per share diluted; weighted average common shares outstanding of 2,836,601, as adjusted) for the year ended December 31, 2007.

Net Interest Income. Net interest income increased \$1.6 million, or 11.6%, from \$13.4 million in 2007 to \$14.9 million in 2008 primarily due to an increase in the interest rate spread.

Total interest income decreased 5.2% from \$27.1 million in 2007 to \$25.7 million in 2008. This decrease was primarily a result of lower yields due to lower market interest rates. Interest on loans decreased

Table of Contents

\$1.3 million as a result of the average tax-equivalent yield on those loans decreasing from 7.03% in 2007 to 6.72% in 2008 and the average balance of loans decreasing from \$333.7 million in 2007 to \$329.9 million in 2008. Interest on investment securities decreased \$8,000 during 2008 due to the average balance of investment securities decreasing from \$78.1 million in 2007 to \$77.0 million in 2008, partially offset by the average tax-equivalent yield of those investments increasing from 4.81% in 2007 to 4.96% in 2008. The average balance of total interest-earning assets increased from \$419.0 million in 2007 to \$420.3 million in 2008. The average tax equivalent yield on interest-earning assets decreased from 6.58% in 2007 to 6.24% in 2008. Management continued to focus loan origination efforts on commercial and consumer loans. The majority of the new commercial loans are adjustable-rate loans. Adjustable-rate loans now comprise 40% of the total loan portfolio, compared to 38% at the end of 2007. As the Federal Open Market Committee (FOMC) of the Federal Reserve lowered interest rates by 400 basis points during 2008, the yield on variable-rate loans scheduled to reprice during the year decreased as did the yield on new originations.

Total interest expense decreased \$3.0 million, from \$13.7 million for 2007 to \$10.7 million for 2008. This decrease was primarily due to an decrease in the average cost of funds from 3.76% in 2007 to 2.94% in 2008. The decrease was primarily due to the average cost of interest-bearing demand deposits which decreased from 2.41% in 2007 to 1.19% in 2008 primarily due to the FOMC rate reductions. The average balances of deposits and borrowed funds were \$300.4 million and \$65.4 million, respectively, for 2008. In 2007, those average balances were \$291.7 million and \$72.9 million. For further information, see *Average Balance Sheets* below. The changes in interest income and interest expense resulting from changes in volume and changes in rates for 2008 and 2007 are shown in the schedule captioned *Rate/Volume Analysis* included herein.

Provision for Loan Losses. The provision for loan losses was \$1.6 million for 2008 compared to \$558,000 for 2007. The consistent application of management's allowance methodology resulted in an increase in the provision for loan losses during 2008 due to increased specific allowances due to deteriorating commercial real estate values and an increase in the general allowances due to deteriorating economic conditions such as depreciating collateral values, job losses and continued pressures on household budgets in the Bank's market area. Nonperforming loans decreased from \$5.7 million at December 31, 2007 to \$5.5 million at December 31, 2008. Net charge offs increased when comparing the two periods, from \$646,000 during 2007 to \$1.1 million during 2008. The provisions were recorded to bring the allowance to the level determined in applying the allowance methodology after reduction for net charge-offs during the year. See *Asset Quality*.

Provisions for loan losses are charges to earnings to maintain the total allowance for loan losses at a level considered reasonable by management to provide for probable known and inherent loan losses based on management's evaluation of the collectibility of the loan portfolio, including the nature of the portfolio, credit concentrations, trends in historical loss experience, specified impaired loans and economic conditions. Although management uses the best information available, future adjustments to the allowance may be necessary due to changes in economic, operating, regulatory and other conditions that may be beyond the Bank's control. While the Bank maintains the allowance for loan losses at a level that it considers adequate to provide for estimated losses, there can be no assurance that further additions will not be made to the allowance for loan losses and that actual losses will not exceed the estimated amounts.

Noninterest income. Noninterest income increased \$49,000 to \$3.6 million for 2008 compared to 2007. Service charges on deposit accounts and the earnings from bank-owned life insurance increased \$83,000 and \$78,000, respectively, when comparing the two periods. The increase in cash surrender value of bank-owned life insurance was due to the purchase of \$3.6 million of bank-owned life insurance in May 2007. Mortgage brokerage fees decreased \$114,000 for 2008 compared to 2007 as the Bank emphasized originating loans for its portfolio rather than for third parties.

Noninterest expense. Noninterest expense increased \$497,000, or 4.4%, to \$11.8 million for 2008 compared to \$11.3 million in 2007. The increase results primarily from increases of \$212,000 in other operating expenses and \$205,000 in compensation and benefits. The increase in other operating expenses was primarily due to an increase in Federal Deposit Insurance Corporation (FDIC) insurance assessments due to the Bank exhausting its one-time FDIC credit assessment on deposits in existence as of December 31, 1996. FDIC insurance assessments are expected to increase substantially in 2009 as the FDIC has announced plans to increase assessments to compensate for recent and expected bank failures. The increase in compensation and benefits is attributable to normal salary increases.

Table of Contents

Income tax expense. Income tax expense for the year ended December 31, 2008 was \$1.5 million compared to \$1.6 million for the year ended December 31, 2007. The effective tax rate for 2007 was 31.8% compared to 30.0% for 2008. The decrease in the effective tax rate for 2008 compared to 2007 was primarily the result of increases in tax-exempt income due to increases in municipal securities and bank-owned life insurance. See Note 12 in the accompanying Notes to Consolidated Financial Statements.

Year Ended December 31, 2007 Compared to Year Ended December 31, 2006

Net Income. Net income was \$3.4 million (\$1.20 per share diluted; weighted average common shares outstanding of 2,836,601, as adjusted) for the year ended December 31, 2007 compared to \$3.7 million (\$1.30 per share diluted; weighted average common shares outstanding of 2,848,229, as adjusted) for the year ended December 31, 2006.

Net Interest Income. Net interest income decreased \$84,000, or 0.6%, from \$13.5 million in 2006 to \$13.4 million in 2007 primarily due to a decrease in the interest rate spread.

Total interest income increased 3.3% from \$26.2 million in 2006 to \$27.1 million in 2007. This increase was primarily a result of higher yields due to higher market interest rates. Interest on loans increased \$544,000 as a result of the average tax-equivalent yield on those loans increasing from 6.82% in 2006 to 7.03% in 2007. Interest on investment securities increased \$181,000 during 2007 due to the average tax-equivalent yield of those investments increasing from 4.56% in 2006 to 4.81% in 2007. The average balance of interest-earning assets changed little, increasing from \$417.9 million in 2006 to \$419.0 million in 2007. The average tax equivalent yield on interest-earning assets increased from 6.38% in 2006 to 6.58% in 2007. Management has focused loan origination efforts on commercial and consumer loans. The majority of the new commercial loans are adjustable-rate loans. Adjustable-rate loans now comprise 38% of the total loan portfolio compared to 36% at the end of 2006. Market interest rates increased during 2006, resulting in scheduled upward repricing of variable-rate loans during 2007, increasing the overall yield on these loans in 2007.

Total interest expense increased \$958,000, from \$12.7 million for 2006 to \$13.7 million for 2007. This increase was primarily due to an increase in the average cost of funds from 3.48% in 2006 to 3.76% in 2007. The increase was primarily due to the average cost of time deposits which increased from 4.05% in 2006 to 4.54% in 2007 primarily due to low cost accounts maturing and repricing at higher current rates. The average balances of deposits and borrowed funds were \$291.7 million and \$72.9 million, respectively, for 2007. In 2006, those average balances were \$290.4 million and \$75.4 million. For further information, see Average Balance Sheets below. The changes in interest income and interest expense resulting from changes in volume and changes in rates for 2007 and 2006 are shown in the schedule captioned Rate/Volume Analysis included herein.

Provision for Loan Losses. The provision for loan losses was \$558,000 for 2007 compared to \$810,000 for 2006. The consistent application of management's allowance methodology resulted in a decrease in the provision for loan losses during 2007 due to the net loan portfolio growth of \$888,000, compared to \$11.1 million in 2006. Nonperforming loans increased from \$4.4 million at December 31, 2006 to \$5.7 million at December 31, 2007. Net charge offs increased slightly comparing the two periods, from \$594,000 during 2006 to \$646,000 during 2007. The provisions were recorded to bring the allowance to the level determined in applying the allowance methodology after reduction for net charge-offs during the year. See Asset Quality.

Provisions for loan losses are charges to earnings to maintain the total allowance for loan losses at a level considered adequate by management to provide for probable known and inherent loan losses based on management's evaluation of the collectibility of the loan portfolio, including the nature of the portfolio, credit concentrations, trends in historical loss experience, specified impaired loans and economic conditions. Although management uses the best information available, future adjustments to the allowance may be necessary due to changes in economic, operating, regulatory and other conditions that may be beyond the Bank's control. While the Bank maintains the allowance for loan losses at a level that it considers adequate to provide for estimated losses, there can be no assurance that further additions will not be made to the allowance for loan losses and that actual losses will not exceed the estimated amounts.

Table of Contents

Noninterest income. Noninterest income increased \$53,000 to \$3.5 million for 2007 compared to 2006. Service charges on deposit accounts and the earnings on bank-owned life insurance increased \$163,000 and \$108,000, respectively, when comparing the two periods. The increase in cash surrender value of life insurance was due to the purchase of \$3.6 million of bank-owned life insurance in May 2007. Other income and commission income decreased \$168,000 and \$140,000, respectively, primarily due to the sale of the Company's insurance agency in December 2006.

Noninterest expense. Noninterest expense increased \$798,000, or 7.6%, to \$11.3 million for 2007 compared to \$10.6 million in 2006. The increase resulted primarily from increases of \$361,000 in compensation and benefits and \$212,000 in other operating expenses. The increase in compensation and benefits is attributable to normal salary increases and the increased staff with the opening of the new office in Salem, Indiana during November 2007. The increase in other operating expenses is primarily due to losses on the sale of foreclosed assets and other expenses associated with those assets.

Income tax expense. Income tax expense for the year ended December 31, 2007 was \$1.6 million compared to \$1.9 million for the year ended December 31, 2006. The effective tax rate for 2006 was 33.5% compared to 31.8% for 2007. The decrease in the effective tax rates for 2007 compared to 2006 was primarily the result of an increase in tax-exempt income due to increases in municipal securities and bank-owned life insurance held in 2007 compared to 2006. See Note 12 in the accompanying Notes to Consolidated Financial Statements.

Table of Contents

The following table sets forth certain information for the periods indicated regarding average balances of assets and liabilities, as well as the total dollar amounts of interest income from average interest-earnings assets and interest expense on average interest-bearing liabilities and average yields and costs. Such yields and costs for the periods indicated are derived by dividing income or expense by the average historical cost balances of assets or liabilities, respectively, for the periods presented and do not give effect to changes in fair value that are included as a separate component of stockholders' equity. Average balances are derived from daily balances. Tax-exempt income on loans and investment securities has been adjusted to a tax equivalent basis using the federal marginal tax rate of 34%.

(Dollars in thousands)	2008			Year Ended December 31, 2007			2006

- (2) Average loan balances include loans held for sale and nonperforming loans.
- (3) Includes taxable debt and equity securities and Federal Home Loan Bank Stock.

Table of Contents

The following table sets forth the effects of changing rates and volumes on net interest income and interest expense computed on a tax-equivalent basis. Information is provided with respect to (i) effects on interest income attributable to changes in volume (changes in volume multiplied by prior rate); (ii) effects attributable to changes in rate (changes in rate multiplied by prior volume); and (iii) effects attributable to changes in rate and volume (change in rate multiplied by changes in volume). Tax exempt income on loans and investment securities has been adjusted to a tax-equivalent basis using the federal marginal tax rate of 34%.

Table of Contents

Comparison of Financial Condition at December 31, 2008 and 2007

Total assets increased 1.2% from \$453.2 million at December 31, 2007 to \$458.6 million at December 31, 2008 primarily due to an increase in investment securities and cash and cash equivalents. Those funds were generated from an increase in deposits.

Net loans decreased 3.6% from \$334.5 million at December 31, 2007 to \$322.4 million at December 31, 2008. The primary factor of the net loan decrease was a reduction of \$11.0 million in residential mortgage loans as the Bank continued to expand its mortgage banking activities and retained fewer residential mortgage loans in the loan portfolio. The Bank originated \$34.3 million in new residential mortgages for sale in the secondary market during 2008 compared to \$34.1 million in 2007. These loans were primarily originated and funded by the Bank and sold in the secondary market. Of this total, \$12.9 million paid off existing loans in the Bank's portfolio. Originating mortgage loans for sale allows the Bank to better manage its interest rate risk, while offering a full line of mortgage products to prospective customers. Consumer loans increased \$2.5 million during 2008 while commercial real estate loans increased \$489,000 during the period. Commercial lending, which is generally considered to carry greater risk of loss but provides a better interest rate spread than residential mortgage lending, has been a key focus of management for the last several years and is expected to remain so for 2009. Residential construction loans decreased \$3.4 million during 2008 as the Bank continued to limit speculative construction lending during the increasingly volatile and weakening housing market.

Securities available for sale, at fair value, consisting primarily of U. S. agency and private mortgage-backed obligations, U. S. agency notes and bonds, and municipal obligations increased \$9.7 million, from \$73.0 million at December 31, 2007 to \$82.7 million at December 31, 2008. Purchases of securities available for sale totaled \$36.5 million in 2008. These purchases were offset by maturities of \$20.7 million and principal repayments of \$6.4 million. The Bank invests excess cash in securities that provide safety, liquidity and yield. Accordingly, the Bank purchases mortgage-backed securities to provide cash flow for loan demand and deposit changes, the Bank purchases federal agency notes for short-term yield and low risk, and municipals are purchased to improve the tax equivalent yield focusing on longer term profitability.

The investment in securities held to maturity, consisting of federal agency mortgage-backed securities and municipal obligations, decreased from \$1.1 million at December 31, 2007 to \$86,000 at December 31, 2008. During 2008, the Bank had maturities of \$953,000 and principal repayments of \$11,000.

Cash and cash equivalents increased from \$15.1 million at December 31, 2007 to \$22.1 million at December 31, 2008. Much of the excess funds came to the Bank late in 2008 in the form of increased deposits and loan payoffs.

Total deposits increased 8.5%, from \$328.2 million at December 31, 2007 to \$355.9 million at December 31, 2008. Interest-bearing demand deposits, money market and savings accounts increased a total of \$37.1 million during 2008 while time deposits decreased \$10.8 million during the period. Part of the increase in interest-bearing demand deposits resulted from a reclassification of some public funds from retail repurchase agreements. Noninterest-bearing demand deposits increased 4.2% to \$36.8 million at December 31, 2008.

Federal Home Loan Bank borrowings decreased \$12.9 million from \$60.7 million at December 31, 2007 to \$47.8 million at December 31, 2008. New advances of \$8.0 million were drawn during the year, primarily to meet short-term liquidity needs. Principal payments on advances totaled \$20.9 million during 2008.

Retail repurchase agreements decreased from \$15.6 million at December 31, 2007 to \$4.6 million at December 31, 2008. This decrease was primarily a result of the reclassification of some public funds previously mentioned.

Total stockholders' equity increased from \$45.7 million at December 31, 2007 to \$47.5 million at December 31, 2008 primarily as a result of retained net income of \$1.6 million and a \$323,000 unrealized gain on available for sale securities. During 2008, the Company also repurchased 23,048 shares of its stock at a weighted average price of \$15.09 per share. As of December 31, 2008, the Company had repurchased

Table of Contents

5,439 shares of the 240,467 authorized by the Board of Directors under the current stock repurchase program which was announced in August 2008, and 333,972 shares since the original repurchase program began in 2001.

Asset Quality

At December 31, 2008, nonperforming assets, consisting of nonaccrual loans, loans 90 days past due and still accruing and real estate owned, totaled \$6.4 million, or 1.40% of total assets compared to a total of \$6.5 million, or 1.44% of total assets, at December 31, 2007. At December 31, 2008 and 2007, impaired loans totaled \$5.5 million and \$5.7 million, respectively, as defined by Statement of Financial Accounting Standards No. 114, *Accounting by Creditors for Impairment of a Loan*. Impaired loans at December 31, 2008 and 2007 included nonaccrual loans of \$4.4 million and \$4.9 million, respectively, and loans 90 days past due still accruing interest of \$1.1 million and \$816,000, respectively. Loans 90 days past due may continue to accrue interest as long as the estimated value of the collateral and collection efforts are deemed sufficient to ensure full recovery. The related allowance for loan losses on impaired loans was \$719,000 at December 31, 2008 and \$555,000 at December 31, 2007. The average carrying value of impaired loans was \$5.4 million and \$5.2 million during the years ended December 31, 2008 and 2007, respectively, and interest income of \$238,000 and \$281,000 was recognized on impaired loans during the period of impairment under the cash receipts method during 2008 and 2007, respectively. The Bank's net charge-offs were \$1.1 million, or 0.35% of average loans outstanding for the year ended December 31, 2008, compared to \$646,000, or 0.19% of average loans outstanding for the year ended December 31, 2007. The allowance for loan losses was \$2.7 million, or 0.81% of total loans, at December 31, 2008 compared to \$2.2 million, or 0.65% of total loans, at December 31, 2007. The increase in the ratio of the allowance for loan losses to total loans primarily results from the increase in the loss provision recorded during 2008 compared to 2007 due to the deteriorating general economic conditions previously mentioned. Foreclosed real estate increased to \$881,000 at December 31, 2008 compared to \$833,000 at December 31, 2007. Foreclosed real estate consists of residential properties held for sale. During 2008 and 2007, foreclosure losses included in net charge-offs to the allowance for loan losses amounted to \$386,000 and \$241,000, respectively.

Table of Contents

The following table presents an analysis of nonperforming assets as of December 31, 2008 and 2007:

(Dollars in thousands)

	2008	2007
Nonaccrual loans:		
Residential real estate	\$ 2,013	\$ 1,684
Commercial real estate and land loans	2,088	2,674
Commercial business	82	397
Consumer	258	124
Total	4,441	4,879
Loans 90 days past due still accruing interest:		
Residential real estate	735	633
Commercial real estate and land loans	27	
Commercial business		23
Consumer	330	160
Total	1,092	816
Total nonperforming loans	5,533	5,695
Foreclosed real estate, net	881	833
Total nonperforming assets	\$ 6,414	\$ 6,528
Nonperforming loans to net loans	1.72%	1.70%
Nonperforming loans to total assets	1.21%	1.26%
Nonperforming assets to total assets	1.40%	1.44%
Allowance for loan losses as a percentage of:		
Outstanding loans	0.81%	0.65%
Nonperforming loans	48.11%	39.19%
Net charge-offs	233.51%	345.51%

Table of Contents

Regulations require that the Bank classify its assets on a regular basis. There are three regulatory classifications for problem assets: substandard, doubtful and loss. Management regularly reviews the loan portfolio to determine whether any loans require classification or a change in classification. At December 31, 2008, the Bank had \$4.4 million in doubtful loans and \$9.1 million in substandard loans, of which all but \$8.2 million are included in total nonperforming loans reported above. In addition to regulatory classifications, the Bank also classifies loans as special mention or watch when they are currently performing in accordance with their contractual terms but exhibit potential weaknesses that must be monitored by management on an ongoing basis. At December 31, 2008, the Bank identified \$7.7 million in loans as special mention or watch loans.

Allowance for Loan Losses

Loans are the Bank's largest concentration of assets and continue to represent the most significant potential risk. In originating loans, the Bank recognizes that losses will be experienced and that the risk of loss will vary with, among other things, the type of loan made, the creditworthiness of the borrower over the term of the loan, general economic conditions and, in the case of a secured loan, the quality of the collateral. The Bank maintains an allowance for loan losses to absorb losses inherent in the loan portfolio. The allowance for loan losses represents management's estimate of probable loan losses based on information available as of the date of the financial statements. The allowance for loan losses is based on management's evaluation of the loan portfolio, including historical loan loss experience, delinquencies, known and inherent risks in the nature and volume of the loan portfolio, information about specific borrower situations, estimated collateral values, and economic conditions.

The loan portfolio is reviewed quarterly by management to evaluate the adequacy of the allowance for loan losses to determine the amount of any adjustment required after considering the loan charge-offs and recoveries for the quarter. Management applies a systematic methodology that incorporates its current judgments about the credit quality of the loan portfolio. In addition, the Office of Thrift Supervision (OTS), as an integral part of its examination process, periodically reviews the Bank's allowance for loan losses and may require the Bank to make additional provisions for estimated losses based on their judgments about information available to them at the time of their examination.

The methodology used in determining the allowance for loan losses includes segmenting the loan portfolio by identifying risk characteristics common to pools of loans, determining and measuring impairment of individual loans based on the present value of expected future cash flows or the fair value of collateral, and determining and measuring impairment for pools of loans with similar characteristics by applying loss factors that consider the qualitative factors which may affect the loss rates.

Specific allowances related to impaired loans and other classified loans are established where management has identified significant conditions or circumstances related to a loan that management believes indicate that a probable loss has been incurred. The identification of these loans results from the loan review process that identifies and monitors credits with weaknesses or conditions which call into question the full collection of the contractual payments due under the terms of the loan agreement. Factors considered by management include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due.

For loans evaluated on a pool basis, management applies loss factors to pools of loans with common risk characteristics (i.e., residential mortgage loans, home equity loans, credit card loans). The loss factors are derived from the Bank's historical loss experience or, where the Bank does not have loss experience, the peer group historical loss experience. Peer group historical loss experience is used after evaluating the attributes of the Bank's loan portfolio as compared to the peer group which is considered to be community banks located in the central region of the United States. Loss factors are adjusted for significant qualitative factors that, in management's judgment, affect the collectibility of the loan portfolio segment. The significant qualitative factors include the levels and trends in charge-offs and recoveries, trends in volume and terms of loans, levels and trends in delinquencies, the effects of changes in underwriting standards and other lending practices or procedures, the experience and depth of the lending management and staff, effects of changes in credit concentration, changes in industry and market conditions and national and local economic trends and conditions. Management evaluates these conditions on a quarterly basis and evaluates and modifies the assumptions used in establishing the loss factors.

Table of Contents**Off-Balance-Sheet Arrangements**

The Company is a party to financial instruments with off-balance-sheet risk including commitments to extend credit under existing lines of credit and commitments to originate loans. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated financial statements.

Off-balance-sheet financial instruments whose contract amounts represent credit and interest rate risk are summarized as follows:

	At December 31,	
	2008	2007
	<i>(In thousands)</i>	
Commitments to originate new loans	\$ 11,661	\$ 9,821
Undisbursed portion of construction loans	2,828	6,431
Unfunded commitments to extend credit under existing commercial and personal lines of credit	31,628	35,007
Standby letters of credit	3,004	2,002

The Company does not have any special purpose entities, derivative financial instruments or other forms of off-balance-sheet financing arrangements.

Commitments to originate new loans or to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Loan commitments generally expire within 30 to 45 days. Most equity line commitments are for a term of 5 to 10 years and commercial lines of credit are generally renewable on an annual basis. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company evaluates each customer's creditworthiness on a case-by-case basis. The amounts of collateral obtained, if deemed necessary by the Company upon extension of credit, are based on management's credit evaluation of the borrower.

Contractual Obligations

The following table summarizes information regarding the Company's contractual obligations as of December 31, 2008:

Contractual Obligations	Total	Payments due by period			
		Less than	1-3 years	3-5 years	More than
		1 year			5 years
		<i>(In thousands)</i>			
Deposits	\$ 355,891	\$ 301,214	\$ 41,964	\$ 12,069	\$ 644
Federal Home Loan Bank advances	47,830	15,054	20,426	12,350	
Retail repurchase agreements	4,552	4,552			
Operating lease obligations	67	39	28		
Total contractual obligations	\$ 408,340	\$ 320,859	\$ 62,418	\$ 24,419	\$ 644

Table of Contents

Liquidity and Capital Resources

Liquidity refers to the ability of a financial institution to generate sufficient cash flow to fund current loan demand, meet deposit withdrawals and pay operating expenses. The Bank's primary sources of funds are new deposits and proceeds from loan repayments and prepayments and from the maturity of securities. The Bank may also borrow from the Federal Home Loan Bank of Indianapolis. While loan repayments and maturities of securities are predictable sources of funds, deposit flows and mortgage prepayments are greatly influenced by market interest rates, general economic conditions and competition. At December 31, 2008, the Bank had cash and interest-bearing deposits with banks of \$22.1 million and securities available for sale with a fair value of \$82.7 million. If the Bank requires funds beyond its ability to generate them internally, it has additional borrowing capacity with the Federal Home Loan Bank of Indianapolis and collateral eligible for repurchase agreements.

The Bank must maintain an adequate level of liquidity to ensure the availability of sufficient funds to support loan growth and deposit withdrawals, to satisfy financial commitments and to take advantage of investment opportunities. At December 31, 2008, the Bank had total commitments to extend credit of \$46.1 million. See Note 16 in the accompanying Notes to Consolidated Financial Statements. At December 31, 2008, the Bank had certificates of deposit scheduled to mature within one year of \$101.3 million. Historically, the Bank has been able to retain a significant amount of its deposits as they mature.

The Bank is required to maintain specific amounts of capital pursuant to OTS regulations. As of December 31, 2008, the Bank was in compliance with all regulatory capital requirements which were effective as of such date with tangible, core and risk-based capital ratios of 9.0%, 9.0% and 14.8%, respectively. See Note 20 in the accompanying Notes to Consolidated Financial Statements.

Effect of Inflation and Changing Prices

The consolidated financial statements and related financial data presented in this report have been prepared in accordance with generally accepted accounting principles, which generally require the measurement of financial position and operating results in terms of historical dollars, without considering the changes in relative purchasing power of money over time due to inflation. The primary impact of inflation is reflected in the increased cost of the Bank's operations. Unlike most industrial companies, virtually all the assets and liabilities of the financial institution are monetary in nature. As a result, interest rates generally have a more significant impact on the financial institutions performance than do general levels of inflation. Interest rates do not necessarily move in the same direction or to the same extent as the prices of goods and services.

Market Risk Analysis

Qualitative Aspects of Market Risk. The Bank's principal financial objective is to achieve long-term profitability while reducing its exposure to fluctuating market interest rates. The Bank has sought to reduce the exposure of its earnings to changes in market interest rates by attempting to manage the mismatch between asset and liability maturities and interest rates. In order to reduce the exposure to interest rate fluctuations, the Bank has developed strategies to manage its liquidity, shorten its effective maturities of certain interest-earning assets and decrease the interest rate sensitivity of its asset base. Management has sought to decrease the average maturity of its assets by emphasizing the origination of short-term commercial and consumer loans, all of which are retained by the Bank for its portfolio. The Bank relies on retail deposits as its primary source of funds. Management believes retail deposits, compared to brokered deposits, reduce the effects of interest rate fluctuations because they generally represent a more stable source of funds.

Quantitative Aspects of Market Risk. The Bank does not maintain a trading account for any class of financial instrument nor does the Bank engage in hedging activities or purchase high-risk derivative instruments. Furthermore, the Bank is not subject to foreign currency exchange rate risk or commodity price risk.

The Bank uses interest rate sensitivity analysis to measure its interest rate risk by computing changes in net portfolio value (NPV) of its cash flows from assets, liabilities and off-balance sheet items in the event of a

Table of Contents

range of assumed changes in market interest rates. NPV represents the market value of portfolio equity and is equal to the market value of assets minus the market value of liabilities, with adjustments made for off-balance sheet items. This analysis assesses the risk of loss in market risk sensitive instruments in the event of a sudden and sustained 100 basis point decrease to a 300 basis point increase in market interest rates with no effect given to any steps that management might take to counter the effect of that interest rate movement. Using data compiled by the OTS, the Bank receives a report that measures interest rate risk by modeling the change in NPV over a variety of interest rate scenarios. This procedure for measuring interest rate risk was developed by the OTS to replace the gap analysis (the difference between interest-earning assets and interest-bearing liabilities that mature or reprice within a specific time period).

The following tables are provided by the OTS and set forth the change in the Bank's NPV at December 31, 2008 and 2007, based on OTS assumptions that would occur in the event of an immediate change in interest rates, with no effect given to any steps that management might take to counteract that change.

Change In Rates	At December 31, 2008				
	Net Portfolio Value			Net Portfolio Value as a Percent of Present Value of Assets	
	Dollar Amount	Dollar Change	Percent Change (Dollars in thousands)	NPV Ratio	Change
300bp	\$ 47,365	\$ (6,200)	(12)%	10.24%	(103)bp
200bp	50,580	(2,985)	(6)	10.81	(46)bp
100bp	52,754	(811)	(2)	11.17	(10)bp
bp	53,565			11.27	bp
(100)bp	52,462	(1,103)	(2)	11.01	(26)bp

Change In Rates	At December 31, 2007				
	Net Portfolio Value			Net Portfolio Value as a Percent of Present Value of Assets	
	Dollar Amount	Dollar Change	Percent Change (Dollars in thousands)	NPV Ratio	Change
300bp	\$ 38,799	\$ (13,312)	(26)%	8.71%	(249)bp
200bp	44,362	(7,749)	(15)	9.80	(140)bp
100bp	49,195	(2,916)	(6)	10.70	(50)bp
bp	52,111			11.20	bp
(100)bp	53,705	1,594	3	11.43	23bp

The preceding tables indicate that the Bank's NPV would be expected to decrease in the event of a sudden and sustained increase or decrease in prevailing market interest rates. The expected decrease in the Bank's NPV given an increase in rates is primarily attributable to the relatively high percentage of fixed-rate loans in the Bank's loan portfolio. At December 31, 2008, approximately 60% of the loan portfolio consisted of fixed-rate loans.

Certain assumptions utilized by the OTS in assessing the interest rate risk of savings associations within its region were utilized in preparing the preceding tables. These assumptions relate to interest rates, loan prepayments, deposit decay rates, and the market values of certain assets under differing interest rate scenarios, among others.

As with any method of measuring interest rate risk, certain shortcomings are inherent in the method of analysis presented in the foregoing tables. For example, although certain assets and liabilities may have similar maturities or periods to repricing, they may react in different degrees to changes in market interest rates. Also, the interest rates on certain types of assets and liabilities may fluctuate in advance of changes in market interest rates, while interest rates on other types may lag behind changes in market rates. Additionally, certain assets, such as adjustable-rate mortgage loans, have features that restrict changes in interest rates on a short-term basis and over the life of the asset. Further, in the event of a change in interest rates, expected rates of prepayments on loans and early withdrawals from certificates of deposit could deviate significantly from those assumed in calculating the tables.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information required by this item is incorporated herein by reference to the section captioned *Management's Discussion and Analysis of Financial Condition and Results of Operations* in this Annual Report on Form 10-K.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The financial statements required by this item begin on page F-1.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A(T). CONTROLS AND PROCEDURES

The management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting. The internal control process has been designed under our supervision to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the Company's financial statements for external reporting purposes in accordance with accounting principles generally accepted in the United States of America.

Management conducted an assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2008, utilizing the framework established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this assessment, management has determined that the Company's internal control over financial reporting as of December 31, 2008 is effective.

Our internal control over financial reporting includes policies and procedures that pertain to the maintenance of records that accurately and fairly reflect, in reasonable detail, transactions and dispositions of assets; and provide reasonable assurances that: (1) transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States; (2) receipts and expenditures are being made only in accordance with authorizations of management and the directors of the Company; and (3) unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the Company's financial statements are prevented or timely detected.

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

This annual report does not include an attestation report of the Company's independent registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's independent registered public accounting firm pursuant to temporary rules of the Securities and Exchange Commission that permit the Company to provide only management's report in this annual report.

There have been no changes in the Company's internal control over financial reporting during the quarter ended December 31, 2008 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

Board of Directors and Stockholders

First Capital, Inc.

Corydon, Indiana

We have audited the accompanying consolidated balance sheets of **First Capital, Inc. and Subsidiaries** as of December 31, 2008 and 2007, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2008. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of **First Capital, Inc. and Subsidiaries** as of December 31, 2008 and 2007, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2008, in conformity with accounting principles generally accepted in the United States of America.

(1) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Operations

First Capital, Inc. (the Company) is the thrift holding company of First Harrison Bank (the Bank), a wholly-owned subsidiary. The Bank is a federally-chartered savings bank which provides a variety of banking services to individuals and business customers through twelve locations in southern Indiana. The Bank's primary source of revenue is real estate mortgage loans. The Bank originates mortgage loans for sale in the secondary market and also serves as a broker. On December 28, 2006, the Bank sold its property and casualty insurance business, but the Bank continues to sell non-deposit investment products through a financial services division. The Bank also has three wholly-owned subsidiaries that manage a portion of its investment securities portfolio. First Harrison Investments, Inc. and First Harrison Holdings, Inc. are Nevada corporations that jointly own First Harrison, LLC, a Nevada limited liability corporation that holds and manages an investment securities portfolio. First Harrison REIT, Inc. was incorporated on July 3, 2008 to hold a portion of the Bank's real estate mortgage loan portfolio. First Harrison REIT, Inc. is a wholly-owned subsidiary of First Harrison Holdings, Inc.

Basis of Consolidation and Reclassifications

The consolidated financial statements include the accounts of the Company and its subsidiaries and have been prepared in accordance with generally accepted accounting principles and conform to general practices in the banking industry. Intercompany balances and transactions have been eliminated. Certain prior year amounts have been reclassified to conform to the current year presentation.

Statements of Cash Flows

For purposes of the statements of cash flows, the Company considers all cash and amounts due from depository institutions, and federal funds sold to be cash and cash equivalents.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Material estimates that are particularly susceptible to significant change relate to the determination of the allowance for loan losses and the valuation of real estate acquired in connection with foreclosures or in satisfaction of loans. In connection with the determination of the allowance for loan losses and foreclosed real estate, management obtains independent appraisals for significant properties.

A majority of the Bank's loan portfolio consists of single-family residential and commercial real estate loans in the southern Indiana area. Accordingly, the ultimate collectibility of a substantial portion of the Bank's loan portfolio and the recovery of the carrying amount of foreclosed real estate are susceptible to changes in local market conditions.

While management uses available information to recognize losses on loans, further reductions in the carrying amounts of loans may be necessary based on changes in local economic conditions. In addition, regulatory agencies, as an integral part of their examination process, periodically review the estimated losses on loans. Such agencies may require the Bank to recognize additional losses based on their judgments about information available to them at the time of their examination. Because of these factors, it is reasonably possible that the estimated losses on loans may change materially in the near term. However, the amount of the change that is reasonably possible cannot be estimated.

FIRST CAPITAL, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED

(1 - continued)

Investment Securities

Securities Available for Sale: Securities classified as available for sale are reported at fair value. Unrealized gains and losses, net of tax, on securities available for sale are included in other comprehensive income and the accumulated unrealized holding gains and losses are reported as a separate component of equity until realized. Realized gains and losses on the sale of securities available for sale are determined using the specific identification method and are included in other noninterest income and, when applicable, are reported as a reclassification adjustment, net of tax, in other comprehensive income. Amortization of premium and accretion of discount are recognized in interest income using methods approximating the interest method over the period to maturity.

Securities Held to Maturity: Debt securities for which the Company has the positive intent and ability to hold to maturity are reported at cost, adjusted for amortization of premium and accretion of discount that are recognized in interest income using methods approximating the interest method over the period to maturity.

Declines in the fair value of individual available for sale and held to maturity securities below their amortized cost that are other than temporary result in write-downs of the individual securities to their fair value. The related write-downs are included in earnings as realized losses. In estimating other-than-temporary impairment losses, management considers (1) the length of time and the extent to which the fair value has been less than amortized cost, (2) the financial condition and near-term prospects of the issuer, and (3) the intent and ability of the Bank to retain its investment for a period of time sufficient to allow for any anticipated recovery in fair value.

Loans and Allowance for Loan Losses

The Bank grants real estate mortgage, commercial business and consumer loans. A substantial portion of the loan portfolio is represented by mortgage loans to customers in southern Indiana. The ability of the Bank's customers to honor their contracts is dependent upon the real estate and general economic conditions in this area.

Loans are stated at unpaid principal balances, less net deferred loan fees and the allowance for loan losses.

Loan origination and commitment fees, as well as certain direct costs of underwriting and closing loans, are deferred and amortized as a yield adjustment to interest income over the lives of the related loans using the interest method. Amortization of deferred loan fees is discontinued when a loan is placed on nonaccrual status.

The recognition of income on a loan is discontinued and previously accrued interest is reversed, when interest or principal payments become ninety (90) days past due unless, in the opinion of management, the outstanding interest remains collectible. Past due status is determined based on contractual terms. Generally, by applying the cash receipts method, interest income is subsequently recognized only as received until the loan is returned to accrual status. The cash receipts method is used when the likelihood of further loss on the loan is remote. Otherwise, the Bank applies the cost recovery method and applies all payments as a reduction of the unpaid principal balance until the loan qualifies for return to accrual status. A loan is restored to accrual status when all principal and interest payments are brought current and the borrower has demonstrated the ability to make future payments of principal and interest as scheduled. The Bank's practice is to charge off any loan or portion of a loan when the loan is determined by management to be uncollectible due to the borrower's failure to meet repayment terms, the borrower's deteriorating or deteriorated financial condition, the depreciation of the underlying collateral, the loan's classification as a loss by regulatory examiners, or for other reasons.

Table of Contents

FIRST CAPITAL, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED

(1 - continued)

The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to earnings. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance.

The allowance for loan losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectibility of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral, and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available.

The allowance consists of specific and general components. The specific component relates to loans that are classified as doubtful, substandard, or special mention. For such loans that are also classified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying value of that loan. The general component covers non-classified loans and is based on historical loss experience adjusted for qualitative factors.

A loan is considered impaired when, based on current information and events, it is probable that the Bank will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan-by-loan basis by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral dependent.

Foreclosed Real Estate

Foreclosed real estate includes both formally foreclosed property and in-substance foreclosed property held for sale. In-substance foreclosed properties are those properties for which the institution has taken physical possession, regardless of whether formal foreclosure proceedings have taken place.

At the time of foreclosure, foreclosed real estate is recorded at the lower of fair value less estimated costs to sell or cost, which becomes the property's new basis. Any write-downs based on the property's fair value at date of acquisition are charged to the allowance for loan losses. After foreclosure, valuations are periodically performed by management and property held for sale is carried at the lower of the new cost basis or fair value less cost to sell. Costs incurred in maintaining foreclosed real estate and subsequent impairment adjustments to the carrying amount of a property, if any, are included in other noninterest expense.

Premises and Equipment

The Company uses the straight line method of computing depreciation at rates adequate to amortize the cost of the applicable assets over their estimated useful lives. Items capitalized as part of premises and equipment are valued at cost. Maintenance and repairs are expensed as incurred. The cost and related accumulated depreciation of assets sold, or otherwise disposed of, are removed from the related accounts and any gain or loss is included in earnings.

Table of Contents

FIRST CAPITAL, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED

(1 - continued)

Goodwill and Other Intangibles

Goodwill recognized in a business combination represents the excess of the cost of the acquired entity over the net of the amounts assigned to assets acquired and liabilities assumed. Goodwill is carried at its implied fair value and is evaluated for possible impairment at least annually or more frequently upon the occurrence of an event or change in circumstances that would more likely than not reduce the fair value of the reporting unit below its carrying amount. Such circumstances could include, but are not limited to: (1) a significant adverse change in legal factors or in business climate, (2) unanticipated competition, or (3) an adverse action or assessment by a regulator. If the carrying amount of the goodwill exceeds its implied fair value, an impairment loss is recognized in earnings equal to that excess amount. The loss recognized cannot exceed the carrying amount of goodwill. After a goodwill impairment loss is recognized, the adjusted carrying amount of goodwill is its new accounting basis.

Other intangible assets consist of acquired core deposit intangibles. Core deposit intangibles are amortized over the estimated economic lives of the acquired core deposits. The carrying amount of core deposit intangibles and the remaining estimated economic life are evaluated annually or whenever events or circumstances indicate the carrying amount may not be recoverable or the remaining period of amortization requires revision. After an impairment loss is recognized, the adjusted carrying amount of the intangible asset is its new accounting basis.

Mortgage Banking Activities

Mortgage loans originated and intended for sale in the secondary market are carried at the lower of aggregate cost or market value. Aggregate market value is determined based on the quoted prices under a best efforts sales agreement with a third party. Net unrealized losses are recognized through a valuation allowance by charges to income. Realized gains on sales of mortgage loans are included in noninterest income. Mortgage loans are sold with servicing released.

Commitments to originate mortgage loans held for sale are considered derivative financial instruments to be accounted for at fair value. The Bank's mortgage loan commitments subject to derivative accounting are fixed-rate mortgage loan commitments at market rates when initiated. At December 31, 2008, the Bank had commitments to originate \$4.3 million in fixed-rate mortgage loans intended for sale in the secondary market after the loans are closed. Fair value is estimated based on fees that would be charged on commitments with similar terms.

Income Taxes

Income taxes are provided for the tax effects of the transactions reported in the financial statements and consist of taxes currently due plus deferred taxes related primarily to differences between the basis of available-for-sale securities, allowance for loan losses, estimated losses on foreclosed real estate, accumulated depreciation, and accrued income and expenses for financial and income tax reporting. The deferred tax assets and liabilities represent the future tax return consequences of those differences, which will either be taxable or deductible when the assets and liabilities are recovered or settled. Deferred tax assets and liabilities are reflected at income tax rates applicable to the period in which the deferred tax assets or liabilities are expected to be realized or settled. As changes in tax laws or rates are enacted, deferred tax assets and liabilities are adjusted through the provision for income taxes.

Stock-Based Compensation

Effective January 1, 2006, the Company adopted the fair value based method of accounting for stock-based compensation prescribed in statement of Financial Accounting Standards (SFAS) 123R, *Share-Based Payment*, for its stock option plan.

Advertising Costs

Advertising costs are charged to operations when incurred.

Recent Accounting Pronouncements

The following are summaries of recently issued accounting pronouncements that impact the accounting and reporting practices of the Company:

In June 2006, the Financial Accounting Standards Board (FASB) issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*, which clarifies the accounting for uncertainty in income taxes recognized in a Company's financial statements in accordance with SFAS 109, *Accounting for Income Taxes*. The Interpretation prescribes a more-likely-than-not recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This Interpretation also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. The provisions of the Interpretation are effective for fiscal years beginning after December 15, 2006 and the cumulative effect of applying the provisions of this Interpretation are recognized as an adjustment to the beginning balance of retained earnings. The Company adopted the Interpretation on January 1, 2007 as required. The Company's federal income tax returns have not been examined in the past five years and the 2005, 2006 and 2007 tax years are subject to federal examination. The Company's state income tax returns for the years 2003, 2004 and 2005 were examined, with no changes made. The Company's state income tax returns for 2006 and 2007 are subject to examination. The Company has no unrecognized tax benefits and does not anticipate any increase in unrecognized tax benefits during the next year relative to any tax positions taken after January 1, 2007. The Company believes that its income tax filing positions and deductions would be sustained upon examination and does not anticipate any adjustments that would result in a material change to its financial position or results of operations. Therefore, no reserves for uncertain income tax positions have been recorded nor did the Company record a cumulative effect adjustment related to the adoption of Interpretation No. 48.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED

(1 - continued)

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements*. The statement defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. The statement does not require any new fair value measurements under existing accounting pronouncements. The definition of fair value retains the exchange price notion found in earlier definitions of fair value and clarifies that the exchange price is the price in an orderly transaction between market participants to sell the asset or transfer the liability in the market in which the reporting entity would transact the sale or transfer. The statement further emphasizes that fair value is a market-based measurement, not an entity-specific measurement. Therefore, the statement provides that fair value measurement should be determined based on the assumptions that market participants would use in pricing the assets or liability. The statement is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years with earlier implementation permitted. The FASB has deferred the effective date of SFAS No. 157 for one year for certain nonfinancial assets and nonfinancial liabilities, except those that are recognized and disclosed in the financial statements on a recurring annual basis. The Company adopted SFAS No. 157 effective January 1, 2008, and the application of this statement did not have a material impact on the Company's financial position or results of operations.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities*, which permits entities to choose to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. The objective is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. The statement also establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. This statement is effective as of the beginning of fiscal years beginning after November 15, 2007, and was adopted by the Company effective January 1, 2008. At the effective date, an entity may elect the fair value option for eligible items that exist at that date. The entity shall report the effect of the first remeasurement to fair value as a cumulative effect adjustment to the opening balance of retained earnings. The adoption of this statement had no material impact on the Company's financial position or results of operations.

In December 2007, the FASB issued Statement No. 160, *Non-controlling Interests in Consolidated Financial Statements - an amendment of ARB No. 51* (SFAS No. 160). This statement applies to all entities that prepare consolidated financial statements, except not-for-profit organizations, but will affect only those entities that have an outstanding non-controlling interest in one or more subsidiaries or that deconsolidate a subsidiary. This statement amends ARB No. 51 to establish accounting and reporting standards for the non-controlling interest in a subsidiary and for the deconsolidation of a subsidiary. This statement is effective for fiscal years beginning after January 1, 2009. The adoption of SFAS No. 160 is not expected to have a material impact on the Company's financial position or results of operations.

FIRST CAPITAL, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED

(1 - continued)

In March 2008, the FASB issued Statement No. 161, *Disclosures about Derivative Instruments and Hedging Activities* an amendment of FASB Statement No. 133 (SFAS No. 161). This statement requires enhanced disclosures about an entity's derivative and hedging activities and thereby improves the transparency of financial reporting. Entities are required to provide enhanced disclosures about (a) how and why an entity uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for under Statement 133 and its related interpretations, and (c) how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. This statement is effective for fiscal years and interim periods beginning after November 15, 2008. The adoption of SFAS No. 161 is not expected to have a material impact on the presentation and disclosures in the Company's financial statements.

In May 2008, the FASB issued Statement No. 162, *The Hierarchy of Generally Accepted Accounting Principles* (SFAS No. 162). This statement identifies the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental entities that are presented in conformity with generally accepted accounting principles (GAAP) in the United States (the GAAP hierarchy). SFAS No. 162 divides the body of GAAP into four categories by level of authority. This statement became effective on November 15, 2008 following the approval of the Securities and Exchange Commission. The adoption of SFAS No. 162 had no material impact on the Company's financial position or results of operations.

(2) RESTRICTION ON CASH AND DUE FROM BANKS

The Bank is required to maintain reserve balances on hand and with the Federal Reserve Bank which are noninterest bearing and unavailable for investment. The average amount of those reserve balances for the years ended December 31, 2008 and 2007 were approximately \$1.2 million and \$2.1 million, respectively.

Table of Contents**FIRST CAPITAL, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED****(3) INVESTMENT SECURITIES**

Debt and equity securities have been classified in the balance sheets according to management's intent. Investment securities at December 31, 2008 and 2007 are summarized as follows:

<i>(In thousands)</i>	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
December 31, 2008:				
Securities available for sale:				
Federal agency and corporate mortgage-backed securities	\$ 31,578	\$ 472	\$ 158	\$ 31,892
Other debt securities:

F-15

Table of Contents**FIRST CAPITAL, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED**

(3 - continued)

<i>(Dollars in thousands)</i>	Number Of Investment Positions	Fair Value	Gross Unrealized Losses
Securities held to maturity:			
Continuous loss position more than twelve months:			
Federal agency mortgage-backed securities	2	\$ 31	\$ 1

Management evaluates securities for other-than-temporary impairment at least quarterly, and more frequently when economic or market concerns warrant such evaluation. Consideration is given to (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, and (3) the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value.

At December 31, 2008, the 39 debt securities in the available for sale classification in a loss position had depreciated approximately 3% from the amortized cost basis. All of the debt securities in a loss position at December 31, 2008 were backed by federal or state governments or secured by mortgage loans. These unrealized losses related principally to current interest rates for similar types of securities. In analyzing an issuer's financial condition, management considers whether the securities are issued by the federal government, its agencies or other governments, whether downgrades by bond rating agencies have occurred, and the results of reviews of the issuer's financial condition and results of operations. At December 31, 2008, the Company also had an unrealized loss of \$155,000 on a mutual fund which invests in floating-rate bank loans. Based on a review of the diversification by industry and issuers and the current and historical default rates, management has concluded that it is not probable that the Company would not recover the cost basis of the investment. As the Company has the intent and ability to hold securities until maturity, or for the foreseeable future if classified as available for sale, no declines are deemed to be other-than-temporary.

(4) LOANS

Loans at December 31, 2008 and 2007 consisted of the following:

<i>(In thousands)</i>	2008	2007
Real estate mortgage loans:		
Residential	\$ 150,576	\$ 161,554
Land	9,475	12,032
Residential construction	9,577	12,963
Commercial real estate	64,255	58,606
Commercial real estate construction	1,112	6,272
Commercial business loans	22,881	24,210
Consumer loans:		
Home equity and second mortgage loans	43,031	41,035
Automobile loans	16,523	15,645

Edgar Filing: FIRST CAPITAL INC - Form 10-K

Gross loans	327,628	342,920
Less:		
Deferred loan origination fees and costs, net	(247)	(205)
Undisbursed portion of loans in process	2,828	6,430
Allowance for loan losses	2,662	2,232
Loans, net	\$ 322,385	\$ 334,463

F-16

Table of Contents**FIRST CAPITAL, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED**

(4 - continued)

At December 31, 2008, residential mortgage loans secured by one-to-four family residential properties without private mortgage insurance or government guarantee and with loan-to-value ratios exceeding 90% amounted to approximately \$4.3 million.

Mortgage loans serviced for the benefit of others amounted to \$457,000 and \$552,000 at December 31, 2008 and 2007, respectively.

An analysis of the allowance for loan losses is as follows:

<i>(In thousands)</i>	2008	2007	2006
Beginning balances	\$ 2,232	\$ 2,320	\$ 2,104
Provision for loan losses	1,570	558	810
Recoveries	196	136	110
Loans charged-off	(1,336)	(782)	(704)
Ending balances	\$ 2,662	\$ 2,232	\$ 2,320

At December 31, 2008 and 2007, the total recorded investment in loans on nonaccrual amounted to approximately \$4.4 million and \$4.9 million, respectively. The total recorded investment in loans past due ninety days or more and still accruing interest amounted to approximately \$1.1 million and \$816,000 at December 31, 2008 and 2007, respectively. Information about impaired loans and the related allowance for loan losses is presented below.

<i>(In thousands)</i>	2008	2007	2006
At end of year:			
Impaired loans with related allowance	\$ 3,201	\$ 2,678	\$ 1,657
Impaired loans with no allowance	2,332	3,017	2,713
Total	\$ 5,533	\$ 5,695	\$ 4,370
Allowance related to impaired loans	\$ 719	\$ 555	\$ 516
Average balance of impaired loans during the year	5,442	5,184	3,678
Interest income recognized in the statements of income during the periods of impairment	81	65	91
Interest income recognized during the periods of impairment cash method	238	281	132

Table of Contents**FIRST CAPITAL, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED**

(4 - continued)

The Bank has entered into loan transactions with certain directors, officers and their affiliates (i.e., related parties). In the opinion of management, such indebtedness was incurred in the ordinary course of business on substantially the same terms, including interest rate and collateral, as those prevailing at the time for comparable transactions with unrelated persons.

The following table represents the aggregate activity for related party loans during the year ended December 31, 2008:

<i>(In thousands)</i>	
Beginning balance	\$ 3,252
New loans	7,494
Payments	(5,178)
Ending balance	\$ 5,568

The Bank has purchased commercial paper from a corporation where a director is considered a related party. In the opinion of management, these transactions were made in the ordinary course of business on substantially the same terms, including interest rate and collateral, as those prevailing at the time for comparable transactions with unrelated parties. During the year ended December 31, 2008, the Bank purchased approximately \$739,000 of loans to customers of the corporation and the aggregate outstanding balance of all loans purchased from the corporation was approximately \$1.7 million and \$1.9 million at December 31, 2008 and 2007, respectively.

(5) PREMISES AND EQUIPMENT

Premises and equipment as of December 31 consisted of the following:

<i>(In thousands)</i>	2008	2007
Land and land improvements	\$ 3,301	\$ 3,190
Leasehold improvements	159	159
Office buildings	9,332	8,367
Furniture, fixtures and equipment	4,536	4,224
	17,328	15,940
Less accumulated depreciation	5,967	5,328
Totals	\$ 11,361	\$ 10,612

Depreciation expense was \$812,000, \$682,000 and \$678,000 for the years ended December 31, 2008, 2007 and 2006, respectively.

Table of Contents**FIRST CAPITAL, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED****(6) FORECLOSED REAL ESTATE**

At December 31, 2008 and 2007, the Bank had foreclosed real estate held for sale of \$881,000 and \$833,000, respectively. During the years ended December 31, 2008, 2007 and 2006, foreclosure losses in the amount of \$386,000, \$241,000 and \$102,000, respectively, were charged off to the allowance for loan losses. Losses on subsequent write downs of foreclosed real estate of \$65,000 and \$35,000 for 2008 and 2007, respectively, are aggregated with realized gains and losses from the sale of foreclosed real estate. No losses on subsequent write downs of foreclosed real estate were recognized in 2006. The net gain or loss on foreclosed real estate is reported in other noninterest income or noninterest expense. Real estate taxes and other expenses of holding foreclosed real estate are included in other noninterest expenses and amounted to \$145,000, \$131,000 and \$93,000 in 2008, 2007 and 2006, respectively.

(7) GOODWILL AND OTHER INTANGIBLES

The Company acquired goodwill in the acquisition of Hometown Bancshares, Inc. during 2003. Goodwill is evaluated for impairment at least annually or more frequently upon the occurrence of an event or when circumstances indicate that the carrying amount is greater than its fair value. No impairment of goodwill was recognized during 2008, 2007 or 2006.

The following is a summary of other intangible assets subject to amortization as of December 31, 2008 and 2007:

<i>(In thousands)</i>	2008	2007
Core deposit intangibles:		
Acquired in branch acquisition	\$ 181	\$ 181
Acquired in Hometown merger	566	566
Gross carrying amount	747	747
Accumulated amortization	(503)	(430)
	\$ 244	\$ 317

Amortization expense was \$73,000 per year for each year during the three year period ended December 31, 2008. Estimated amortization expense for each of the ensuing five years is as follows:

Year ending December 31:	<i>(In thousands)</i>
2009	\$ 73
2010	73
2011	66
2012	32
2013	

Table of Contents**FIRST CAPITAL, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED****(8) DEPOSITS**

The aggregate amount of time deposit accounts with balances of \$100,000 or more was approximately \$44.3 million and \$49.2 million at December 31, 2008 and 2007, respectively.

At December 31, 2008, scheduled maturities of time deposits were as follows:

Year ending December 31:	<i>(In thousands)</i>
2009	\$ 101,282
2010	26,154
2011	15,810
2012	7,323
2013 and thereafter	5,390
 Total	 \$ 155,959

The Bank held deposits of approximately \$5.3 million and \$5.5 million for related parties at December 31, 2008 and 2007, respectively.

(9) RETAIL REPURCHASE AGREEMENTS

Retail repurchase agreements represent overnight borrowings from deposit customers and the debt securities sold under the repurchase agreements are under the control of the Bank. Information concerning borrowings under repurchase agreements is summarized as follows:

<i>(Dollars in thousands)</i>	2008	2007	2006
Weighted average interest rate during the year	2.11%	4.81%	5.00%
Average daily balance	\$ 11,759	\$ 13,137	\$ 16,821
Maximum month-end balance during the year	\$ 17,698	\$ 18,071	\$ 24,346
Debt securities underlying the agreements at December 31:			
Amortized cost	\$ 10,039	\$ 22,584	\$ 26,567
Fair value	\$ 10,232	\$ 22,491	\$ 25,118

Table of Contents**FIRST CAPITAL, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED****(10) ADVANCES FROM FEDERAL HOME LOAN BANK**

At December 31, 2008 and 2007, advances from the Federal Home Loan Bank were as follows:

<i>(Dollars in thousands)</i>	2008		2007	
	Weighted Average Rate	Amount	Weighted Average Rate	Amount
Fixed rate advances	4.68%	\$ 47,830	4.73%	\$ 60,694

At December 31, 2008, advances from the Federal Home Loan Bank totaling \$23.0 million carried a put option whereby the Federal Home Loan Bank will automatically convert the fixed rate advance to a variable rate should the market interest rate exceed a pre-determined strike rate.

The following is a schedule of maturities for advances outstanding as of December 31, 2008:

Due in:	<i>(In thousands)</i>
2009	\$ 15,054
2010	17,047
2011	3,379
2012	7,250
2013	5,100
Thereafter	
Total	\$ 47,830

The advances are secured under a blanket collateral agreement. At December 31, 2008, the carrying value of residential mortgage loans and investment securities pledged as security for the advances was \$117.6 million and \$1.3 million, respectively.

(11) LEASE COMMITMENTS

During 2005, the Bank extended a noncancelable lease agreement for branch office space which expires in 2010. The Bank also has a noncancelable sub-lease agreement for branch office space which expires in 2010.

The subsidiary companies headquartered in Nevada lease office space under sublease agreements that automatically renew for one year periods each October.

The following is a schedule by years of future minimum rental payments required under operating leases that have initial or remaining noncancelable lease terms in excess of one year as of December 31, 2008 for the remaining lease terms in the aggregate:

Year ending December 31:	<i>(In thousands)</i>
2009	\$ 39

2010

28

Total minimum payments required	\$	67
---------------------------------	----	----

Total rental expense for all operating leases for each of the years in the three-year period ended December 31, 2008 was \$49,000.

F-21

Table of Contents**FIRST CAPITAL, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED****(12) INCOME TAXES**

The components of income tax expense were as follows:

<i>(In thousands)</i>	2008	2007	2006
Current	\$ 1,534	\$ 1,654	\$ 2,031
Deferred	(5)	(63)	(159)
Totals	\$ 1,529	\$ 1,591	\$ 1,872

Significant components of the deferred tax assets and liabilities as of December 31, 2008 and 2007 were as follows:

<i>(In thousands)</i>	2008	2007
Deferred tax assets (liabilities):		
Depreciation	\$ (594)	\$ (437)
Deferred loan fees and costs, net	(128)	(120)
Deferred compensation plans	162	170
Federal Home Loan Bank stock dividends	(127)	(127)
Allowance for loan losses	1,042	876
Unrealized (gain) loss on securities available for sale	(170)	28
Acquisition purchase accounting adjustments	(82)	(106)
Other	35	47
Net deferred tax asset	\$ 138	\$ 331

The reconciliation of income tax expense with the amount which would have been provided at the federal statutory rate of 34% follows:

<i>(In thousands)</i>	2008	2007	2006
Provision at federal statutory tax rate	\$ 1,734	\$ 1,701	\$ 1,897
State income tax-net of federal tax benefit	140	184	233
Tax-exempt interest income	(300)	(265)	(266)
Increase in cash value of life insurance	(77)	(51)	(14)
Other	32	22	22
Totals	\$ 1,529	\$ 1,591	\$ 1,872
Effective tax rate	30.0%	31.8%	33.5%

Prior to July 1, 1996, the Bank was permitted by the Internal Revenue Code to deduct from taxable income an annual addition to a statutory bad debt reserve subject to certain limitations. Retained earnings at December 31, 2008 includes approximately \$1.0 million of cumulative deductions for which no deferred federal income tax liability has been recorded. Reduction of these reserves for purposes other than tax bad debt

Edgar Filing: FIRST CAPITAL INC - Form 10-K

losses or adjustments arising from carryback of net operating losses would create income for tax purposes subject to the then current corporate income tax rate. The unrecorded deferred liability on these amounts was approximately \$354,000 at December 31, 2008.

F-22

Table of Contents**FIRST CAPITAL, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED**

(12 - continued)

Federal legislation enacted in 1996 repealed the use of the qualified thrift reserve method of accounting for bad debts for tax years beginning after December 31, 1995. As a result, the Bank discontinued the calculation of the annual addition to the statutory bad debt reserve using the percentage-of-taxable-income method and adopted the experience reserve method for banks. Under this method, the Bank computes its federal tax bad debt deduction based on actual loss experience over a period of years. The legislation also provided that the Bank will not be required to recapture its pre-1988 statutory bad debt reserves if it ceases to meet the qualifying thrift definitional tests as provided under prior law and if the Bank continues to qualify as a bank under existing provisions of the Internal Revenue Code.

(13) EMPLOYEE BENEFIT PLANS**Defined Contribution Plan:**

The Bank has a qualified defined contribution plan available to all eligible employees. The plan allows participating employees to make tax-deferred contributions under Internal Revenue Code Section 401(k). The Bank contributed \$205,000, \$214,000 and \$195,000 to the plan for the years ended December 31, 2008, 2007 and 2006, respectively.

Employee Stock Ownership Plan:

On December 31, 1998, the Company established a leveraged employee stock ownership plan (ESOP) covering substantially all employees. The ESOP trust acquired 61,501 shares of Company common stock financed by a term loan with the Company. The employer loan and the related interest income are not recognized in the consolidated financial statements as the debt is serviced from Company contributions. Dividends payable on allocated shares are charged to retained earnings and are satisfied by the allocation of cash dividends to participant accounts. Dividends payable on unallocated shares are not considered dividends for financial reporting purposes. Shares held by the ESOP trust are allocated to participant accounts based on the ratio of the current year principal and interest payments to the total of the current year and future year's principal and interest to be paid on the employer loan.

Compensation expense is recognized based on the average fair value of shares released for allocation to participant accounts during the year with a corresponding credit to stockholders' equity. Compensation expense recognized for the years ended December 31, 2008, 2007 and 2006 amounted to \$160,000, \$141,000 and \$151,000, respectively.

Company common stock held by the ESOP trust at December 31 was as follows, as restated for the stock dividend declared on June 19, 2006 (see Note 19):

<i>(Dollars in thousands)</i>	2008	2007
Allocated shares	58,140	50,176
Unearned shares		10,661
Total ESOP shares	58,140	60,837
Fair value of unearned shares	\$	\$ 176

FIRST CAPITAL, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED

(14) DEFERRED COMPENSATION PLANS

The Bank has a deferred compensation plan whereby certain former officers are provided specific amounts of income for a period of fifteen years following normal retirement. The benefits under the agreements became fully vested after four years of service beginning with the effective date of the agreements. The Bank has accrued the present value of the benefits so the amounts required will be provided beginning at the normal retirement dates and thereafter.

Assuming normal retirement, the benefits under the plan are paid in varying amounts between 1999 and 2022. The Bank is the owner and beneficiary of insurance policies on the lives of these former officers which may provide funds for a portion of the required payments. Compensation expense for this plan was \$27,000, \$32,000 and \$36,000 for the years ended December 31, 2008, 2007 and 2006, respectively.

The Bank also has a directors' deferred compensation plan whereby a director defers into a retirement account a portion of his monthly director fees for a specified period to provide a specified amount of income for a period of fifteen years following normal retirement. The Bank also accrues the interest cost on the deferred obligation so the amounts required will be provided at the normal retirement dates and thereafter.

Assuming normal retirement, the benefits under the plan are paid in varying amounts between 1995 and 2037. The agreements also provide for payment of benefits in the event of disability, early retirement, termination of service or death. Compensation expense for this plan was \$16,000, \$15,000 and \$14,000 for the years ended December 31, 2008, 2007 and 2006, respectively.

(15) STOCK-BASED COMPENSATION PLANS

At December 31, 2008, the Company has two stock-based compensation plans, which are described below. The compensation cost that has been charged against income for those plans was \$46,000, \$32,000 and \$34,000 for 2008, 2007 and 2006, respectively. The total income tax benefit for stock options exercised was \$17,000 for 2007. No income tax benefit was realized in 2008 or 2006 for stock options exercised.

Stock Option Plan

The Company's stock option plan provides for issuance of up to 209,192 shares of the Company's authorized but unissued common stock to all employees, including any officer or employee-director. Under the plan, the Company may grant both non-qualified and qualified (i.e., incentive) stock options. In the case of incentive stock options, the aggregate fair value of the stock (determined at the time the incentive stock option is granted) for which any optionee may be granted incentive options which are first exercisable during any calendar year shall not exceed \$100,000. Option prices may not be less than the fair market value of the underlying stock at the date of the grant.

Options granted generally vest ratably over five years and are exercisable in whole or in part for a period up to ten years from the date of the grant. Certain stock options provide for accelerated vesting if there is a change in control (as defined in the plan).

Table of Contents**FIRST CAPITAL, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED**

(15 - continued)

The fair market value of stock options granted was determined at the date of grant using the Black-Scholes-Merton option pricing model. Expected volatilities are based on historical volatility of the Company's stock. The expected term of options granted represents the period of time that options are expected to be outstanding and is based on historical trends. The risk free rate for the expected life of the options is based on the U.S. Treasury yield curve in effect at the time of grant. No options were granted during the years ended December 31, 2008, 2007 and 2006.

A summary of option activity under the plan as of December 31, 2008, and changes during the year then ended is presented below:

	Number of Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
<i>(Dollars in thousands except per share data)</i>				
Outstanding at beginning of year	49,964	\$ 10.56		
Granted				
Exercised	2,939	\$ 7.10		
Forfeited or expired	3,722	\$ 18.22		
Outstanding at end of year	43,303	\$ 10.13	1.0	\$ 223
Exercisable at end of year	43,303	\$ 10.13	1.0	\$ 223

The total intrinsic value of options exercised during the years ended December 31, 2008, 2007 and 2006, was \$21,000, \$91,000 and \$28,000, respectively.

Effective January 1, 2006, the Company adopted SFAS 123R, *Share-Based Payment*, a revision of SFAS 123, *Accounting for Stock-Based Compensation*. The Company's stock option plan was previously accounted for in accordance with the provisions of APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and, as such, no stock-based employee compensation cost was reflected in net income because all options granted under the stock option plan had an exercise price equal to the market value of the underlying common stock on the date of grant. The Company adopted SFAS 123R using the modified prospective method and, as such, results from prior periods have not been restated. Under the statement's transition provisions, compensation cost is recognized on or after the effective date for the portion of outstanding awards, for which the requisite service has not yet been rendered, based on the grant date fair value of those awards calculated under the statement.

Table of Contents

FIRST CAPITAL, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED

(15 - continued)

The Company recognized compensation expense of \$46,000, \$32,000 and \$32,000 for the years ended December 31, 2008, 2007 and 2006 respectively, related to the stock option plan as expense is recognized ratably over the five-year vesting period of the options. At December 31, 2008, there was no remaining unrecognized compensation expense related to nonvested stock options.

Restricted Stock Compensation Plan

The Company had a restricted stock compensation plan as an encouragement for directors, officers and key employees to remain in the employment or service of the Company. The plan provided for grants of up to 30,750 shares of the Company's authorized but unissued common stock and all shares have been granted. The shares granted under the plan were in the form of restricted stock vesting over a five-year period beginning one year after the date of grant of the award. Compensation expense has been recognized over the requisite service period with a corresponding credit to stockholders' equity. The requisite service period for restricted shares is the vesting period. The terms of the restricted stock compensation plan included a provision whereby all unearned shares become fully vested upon a change in control as defined in the plan.

The Company had no nonvested restricted shares as of December 31, 2008 and 2007. The aggregate fair value of shares vesting during each of the years ended December 31, 2007 and 2006, was \$2,000.

Table of Contents**FIRST CAPITAL, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED****(16) COMMITMENTS AND CONTINGENCIES**

In the normal course of business, there are outstanding various commitments and contingent liabilities, such as commitments to extend credit and legal claims, which are not reflected in the financial statements.

Commitments under outstanding standby letters of credit totaled \$3.0 million at December 31, 2008.

The following is a summary of the commitments to extend credit at December 31, 2008 and 2007:

<i>(In thousands)</i>	2008	2007
Loan commitments:		
Fixed rate	\$ 7,563	\$ 7,372
Adjustable rate	4,098	2,449
Unused lines of credit on credit cards	2,369	2,308
Undisbursed commercial and personal lines of credit	11,792	14,822
Undisbursed portion of construction loans in process	2,828	6,431
Undisbursed portion of home equity lines of credit	17,467	17,877
Total commitments to extend credit	\$ 46,117	\$ 51,259

(17) FINANCIAL INSTRUMENTS WITH OFF-BALANCE-SHEET RISK

The Bank is a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amounts recognized in the balance sheet.

The Bank's exposure to credit loss in the event of nonperformance by the other party to the financial instruments for commitments to extend credit and standby letters of credit is represented by the contractual notional amount of those instruments (see Note 16). The Bank uses the same credit policies in making commitments and conditional obligations as it does for on-balance-sheet instruments.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Bank evaluates each customer's creditworthiness on a case-by-case basis. The amount and type of collateral obtained, if deemed necessary by the Bank upon extension of credit, varies and is based on management's credit evaluation of the counterparty.

Standby letters of credit are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. Standby letters of credit generally have fixed expiration dates or other termination clauses and may require payment of a fee. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Bank's policy for obtaining collateral, and the nature of such collateral, is essentially the same as that involved in making commitments to extend credit.

The Bank has not been required to perform on any financial guarantees and did not incur any losses on its commitments during the years ended December 31, 2008, 2007 and 2006.

Table of Contents

FIRST CAPITAL, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED

(18) DIVIDEND RESTRICTION

As an Indiana corporation, the Company is subject to Indiana law with respect to the payment of dividends. Under Indiana law, the Company may pay dividends so long as it is able to pay its debts as they become due in the usual course of business and its assets exceed the sum of its total liabilities, plus the amount that would be needed, if the Company were to be dissolved at the time of the dividend, to satisfy any rights that are preferential to the rights of the persons receiving the dividend. The ability of the Company to pay dividends depends primarily on the ability of the Bank to pay dividends to the Company.

The payment of dividends by the Bank is subject to regulation by the Office of Thrift Supervision (OTS). The Bank may not declare or pay a cash dividend or repurchase any of its capital stock if the effect thereof would cause the regulatory capital of the Bank to be reduced below regulatory capital requirements imposed by the OTS or below the amount of the liquidation account established upon completion of the conversion of the Bank's former mutual holding company (First Capital, Inc., MHC) from mutual to stock form on December 31, 1998.

(19) STOCK DIVIDEND

On June 19, 2006, the Company declared a 10% stock dividend payable on or about August 8, 2006 to shareholders of record as of the close of business on July 19, 2006. Based on the number of common shares outstanding on the record date, the Company issued 258,476 new shares. The fair market value of the additional shares issued, aggregating \$4.1 million, was charged to retained earnings with corresponding increases in common stock and additional paid-in capital. All references in the accompanying financial statements to the number of common shares and per share amounts are based on the increased number of shares giving retroactive effect to the stock dividend.

(20) REGULATORY MATTERS

The Bank is subject to various regulatory capital requirements administered by the OTS. Failure to meet minimum capital requirements can initiate certain mandatory-and possibly additional discretionary-actions by regulators, which if undertaken, could have a direct material effect on the Bank and the consolidated financial statements. Under the regulatory capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital guidelines involving quantitative measures of the Bank's assets, liabilities and certain off-balance-sheet items as calculated under regulatory accounting practices. The Bank's capital amounts and classification under the prompt corrective action guidelines are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Bank to maintain minimum amounts and ratios (set forth in the table below) of total risk-based capital and Tier I capital to risk-weighted assets (as defined in the regulations), Tier I capital to adjusted total assets (as defined) and tangible capital to adjusted total assets (as defined). Management believes, as of December 31, 2008, that the Bank meets all capital adequacy requirements to which it is subject.

As of December 31, 2008, the most recent notification from the OTS categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain minimum total risk-based, Tier I risk-based, and Tier I leverage ratios as set forth in the table below. There are no conditions or events since that notification that management believes have changed the institution's categories.

The actual capital amounts and ratios are also presented in the table. No amounts were deducted from capital for interest-rate risk in either year.

Table of Contents**FIRST CAPITAL, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED****(21) DISCLOSURES ABOUT FAIR VALUE OF FINANCIAL INSTRUMENTS**

The following table summarizes the carrying value and estimated fair value of financial instruments at December 31, 2008 and 2007:

<i>(In thousands)</i>	2008		2007	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Financial assets:				
Cash and cash equivalents	\$ 22,149	\$ 22,149	\$ 15,055	\$ 15,055
Securities available for sale	82,733	82,733	72,991	72,991
Securities held to maturity	86	89	1,050	1,139
Loans held for sale	1,244	1,275	258	258
Loans, net of allowance for loan losses	322,385	332,018	334,463	335,026
Federal Home Loan Bank stock	3,551	3,551	3,551	3,551
Accrued interest receivable	2,330	2,330	2,549	2,549
Financial liabilities:				
Deposits	355,891	361,356	328,151	329,935
Retail repurchase agreements	4,552	4,552	15,562	15,562
Advances from Federal Home Loan Bank	47,830	50,375	60,694	61,894
Accrued interest payable	1,415	1,415	1,902	1,902
Off-balance-sheet financial instruments:				
Asset related to commitments to extend credit		12		18

The carrying amounts in the preceding table are included in the consolidated balance sheets under the applicable captions. The contractual or notional amounts of financial instruments with off-balance-sheet risk are disclosed in Note 16.

The following methods and assumptions were used to estimate the fair value of each class of financial instrument for which it is practicable to estimate that value:

Cash and Cash Equivalents

For cash and cash equivalents, including cash and due from banks, interest-bearing deposits with banks, and federal funds sold, the carrying amount is a reasonable estimate of fair value.

Debt and Equity Securities

For marketable equity securities, the fair values are based on quoted market prices. For debt securities, the Company obtains fair value measurements from an independent pricing service and the fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, U.S. government and agency yield curves, live trading levels, trade execution data, market consensus prepayment speeds, credit information, and the security's terms and conditions, among other factors. For Federal Home Loan Bank stock, a restricted equity security, the carrying amount is a reasonable estimate of fair value because it is not marketable.

FIRST CAPITAL, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED

(21 - continued)

Loans

The fair value of loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities. The carrying amount of accrued interest receivable approximates its fair value.

Deposits

The fair value of demand deposits, savings accounts, money market deposit accounts and other transaction accounts is the amount payable on demand at the balance sheet date. The fair value of fixed-maturity certificates of deposit is estimated by discounting the future cash flows using the rates currently offered for deposits of similar remaining maturities. The carrying amount of accrued interest payable approximates its fair value.

Borrowed Funds

The carrying amounts of retail repurchase agreements approximate their fair value. The fair value of advances from Federal Home Loan Bank is estimated by discounting the future cash flows using the current rates at which similar loans with the same remaining maturities could be obtained.

Commitments to Extend Credit

The majority of commitments to extend credit would result in loans with a market rate of interest if funded. The fair value of these commitments are the fees that would be charged to customers to enter into similar agreements. For fixed rate loan commitments, the fair value also considers the difference between current levels of interest rates and the committed rates.

(22) FAIR VALUE MEASUREMENTS

Effective January 1, 2008, the Company adopted the provisions of Statement of Financial Accounting Standards (SFAS) No. 157, *Fair Value Measurements*, for financial assets and financial liabilities. In accordance with Financial Accounting Standards Board Position (FSP) No. 157-2, *Effective Date of FASB Statement No. 157*, the Company will delay application of SFAS No. 157 for nonfinancial assets, such as goodwill and real property held for sale, and nonfinancial liabilities, until January 1, 2009.

SFAS No. 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SFAS No. 157 establishes a fair value hierarchy that prioritizes the use of inputs used in valuation methodologies into the following three levels:

- Level 1: Inputs to the valuation methodology are quoted prices, unadjusted, for identical assets or liabilities in active markets. A quoted market price in an active market provides the most reliable evidence of fair value and shall be used to measure fair value whenever available.
- Level 2: Inputs to the valuation methodology include quoted market prices for similar assets or liabilities in active markets; inputs to the valuation methodology include quoted market prices for identical or similar assets or

Edgar Filing: FIRST CAPITAL INC - Form 10-K

liabilities in markets that are not active; or inputs to the valuation methodology that are derived principally from or can be corroborated by observable market data by correlation or other means.

F-31

Table of Contents**FIRST CAPITAL, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED**

(22 - continued)

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement. Level 3 assets and liabilities include financial instruments whose value is determined using discounted cash flow methodologies, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

A description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below. These valuation methodologies were applied to all of the Company's financial assets carried at fair value or the lower of cost or fair value effective January 1, 2008. The table below presents the balances of assets measured at fair value on a recurring basis and assets measured at fair value on a nonrecurring basis as of December 31, 2008. The Company had no liabilities measured at fair value as of December 31, 2008.

<i>(In thousands)</i>	Carrying Value			
	Level 1	Level 2	Level 3	Total
<i>Assets Measured on a Recurring Basis</i>				
Securities available for sale	\$ 1,504	\$ 81,229	\$	\$ 82,733
<i>Assets Measured on a Nonrecurring Basis</i>				
Impaired loans		3,201		3,201
Residential loans held for sale		1,244		1,244

In general, fair value is based upon quoted market prices, where available. If quoted market prices are not available, fair value is based on internally developed models or obtained from third parties that primarily use, as inputs, observable market-based parameters or a matrix pricing model that employs the Bond Market Association's standard calculations for cash flow and price/yield analysis and observable market-based parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value, or the lower of cost or fair value. These adjustments may include unobservable parameters. Any such valuation adjustments have been applied consistently over time. The Company's valuation methodologies may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. While management believes the Company's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

Securities Available for Sale. Securities classified as available for sale are reported at fair value on a recurring basis. These securities are classified as Level 1 of the valuation hierarchy where quoted market prices from reputable third-party brokers are available in an active market. If quoted market prices are not available, the Company obtains fair value measurements from an independent pricing service. These securities are reported using Level 2 inputs and the fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, U.S. government and agency yield curves, live trading levels, trade execution data, market consensus prepayment speeds, credit information, and the security's terms and conditions, among other factors. Changes in fair value of securities available for sale are recorded in other comprehensive income.

Table of Contents**FIRST CAPITAL, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED**

(22 - continued)

Impaired Loans. Impaired loans are carried at the present value of estimated future cash flows using the loan's existing rate or the fair value of collateral if the loan is collateral dependent. Impaired loans are evaluated and valued at the time the loan is identified as impaired at the lower of cost or market value. For collateral dependent impaired loans, market value is measured based on the value of the collateral securing these loans and is classified as Level 2 in the fair value hierarchy. Collateral may be real estate and/or business assets, including equipment, inventory and/or accounts receivable, and its fair value is generally determined based on real estate appraisals or other independent evaluations by qualified professionals. Impaired loans are reviewed and evaluated on at least a quarterly basis for additional impairment and adjusted accordingly, based on the same factors identified above.

Residential Loans Held for Sale. Residential loans held for sale are reported in the aggregate at the lower of cost or fair value using Level 2 inputs. The fair values are determined by quoted market prices in active markets that are accessible at the measurement date for identical, unrestricted assets.

There were no transfers in or out of the Company's Level 3 financial assets for the year ended December 31, 2008.

The Company also adopted SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities - Including an Amendment of FASB Statement No. 115*, which permits entities to measure many financial instruments and certain other assets and liabilities at fair value on an instrument-by-instrument basis. The fair value option permits all entities to choose to measure eligible items at fair value at specified election dates. An entity will be required to report unrealized gains and losses on items for which the fair value option has been elected in earnings at each subsequent reporting date. The Company did not elect to measure any financial instruments at fair value under SFAS No. 159 upon adoption.

(23) PARENT COMPANY CONDENSED FINANCIAL INFORMATION

Condensed financial information for First Capital, Inc. (parent company only) follows:

Balance Sheets*(In thousands)*

	As of December 31,
