REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders

Horace Mann Educators Corporation:

We have reviewed the accompanying consolidated balance sheet of Horace Mann Educators Corporation and subsidiaries (the Company) as of March 31, 2009, and the related consolidated statements of operations and comprehensive loss, changes in shareholders' equity and cash flows for the three-month periods ended March 31, 2009 and 2008. These consolidated financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of the Company as of December 31, 2008, and the related consolidated statements of operations and comprehensive income (loss), changes in shareholders' equity, and cash flows for the year then ended (not presented herein); and in our report dated March 2, 2009, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying consolidated balance sheet as of December 31, 2008, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it was derived.

As discussed in Note 1 to the December 31, 2008 consolidated financial statements, the Company adopted American Institute of Certified Public Accountants (AICPA) Statement of Position (SOP) 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection with Modifications or Exchanges of Insurance Contracts*, effective January 1, 2007. As discussed in Note 7 to the consolidated financial statements, the Company adopted FASB Interpretation (FIN) No. 48, *Accounting for Uncertainty in Income Taxes - an interpretation of FASB Statement No 109*, effective January 1, 2007. As discussed in Note 9 to the consolidated financial statements, the Company adopted Statement of Financial Accounting Standards No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans*, as of December 31, 2006.

HORACE MANN EDUCATORS CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

March 31, 2009 and 2008

(Dollars in thousands, except per share data)

Note 1 - Basis of Presentation

The accompanying unaudited consolidated financial statements of Horace Mann Educators Corporation (HMEC ; and together with its subsidiaries, the Company or Horace Mann) have been prepared in accordance with United States (U.S.) generally accepted accounting principles (GAAP) and with the rules and regulations of the Securities and Exchange Commission (SEC), specifically Regulation S-X and the instructions to Form 10-Q. Certain information and note disclosures normally included in financial statements prepared in accordance with GAAP have been condensed or omitted. The Company believes that these consolidated financial statements contain all adjustments (consisting of normal recurring accruals) which are, in the opinion of management, necessary to present fairly the Company s consolidated financial position as of March 31, 2009 and the consolidated results of operations, comprehensive loss, changes in shareholders equity and cash flows for the three months ended March 31, 2009 and 2008. The preparation of consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect (1) the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and (2) the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The subsidiaries of HMEC market and underwrite tax-qualified retirement annuities and private passenger automobile, homeowners, and life insurance products, primarily to K-12 teachers, administrators and other employees of public schools and their families. The Company s principal operating subsidiaries are Horace Mann Life Insurance Company, Horace Mann Insurance Company, Teachers Insurance Company, Horace Mann Property & Casualty Insurance Company and Horace Mann Lloyds.

These consolidated financial statements should be read in conjunction with the consolidated financial statements and the related notes to consolidated financial statements included in the Company s Annual Report on Form 10-K for the year ended December 31, 2008.

The results of operations for the three months ended March 31, 2009 are not necessarily indicative of the results to be expected for the full year.

Table of Contents

Note 1 - Basis of Presentation-(Continued)

Adopted Accounting Standards

Adoption of SFAS No. 163

Effective January 1, 2009, the Company adopted Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards (SFAS or FAS) No. 163, Accounting for Financial Guarantee Insurance Contracts an interpretation of FASB Statement No. 60 . This statement applies to financial guarantee insurance and reinsurance contracts, including the recognition and measurement of premium revenue and claim liabilities. The adoption of this SFAS did not have an effect on the results of operations or financial position of the Company.

Adoption of FSP APB 14-1

Effective January 1, 2009, the Company adopted FASB Staff Position (FSP) No. Accounting Principles Board (APB) 14-1, Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement) . FSP No. APB 14-1 requires issuers of convertible debt instruments that may be settled in cash upon conversion to separately account for the liability and equity components in a manner that will reflect the entity s nonconvertible debt borrowing rate when interest cost is recognized in subsequent periods. The adoption of this FSP did not have a material effect on the results of operations or financial position of the Company.

Adoption of FSP FAS 142-3

Effective January 1, 2009, the Company adopted FSP No. FAS 142-3, Determination of the Useful Life of Intangible Assets . This FSP requires companies estimating the useful life of a recognized intangible asset to consider their historical experience in renewing or extending similar arrangements or, in the absence of historical experience, to consider assumptions that market participants would use about renewal or extension as adjusted for FASB SFAS No. 142, Goodwill and Other Intangible Assets . The adoption of this FSP did not have an effect on the results of operations or financial position of the Company.

Adoption of FSP FAS 140-3

Effective January 1, 2009, the Company adopted FSP No. FAS 140-3, Accounting for Transfers of Financial Assets and Repurchase Financing Transactions . This FSP presumes that an initial transfer of a financial asset and a repurchase financing are considered part of the same arrangement unless four conditions are all met. Transactions that meet all four criteria are accounted for separately from repurchase financings. The adoption of this FSP did not have an effect on the results of operations or financial position of the Company.

Table of Contents

Note 1 - Basis of Presentation-(Continued)

Recent Accounting Changes

FSP FAS 157-4

In April 2009, the Financial Accounting Standards Board (FASB) issued FASB Staff Position (FSP) No. Statement of Financial Accounting Standards (SFAS or FAS) 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly . This FSP provides additional guidance for estimating fair value in accordance with FASB SFAS No. 157, Fair Value Measurements , when the volume and level of activity for the asset or liability have significantly decreased and also includes guidance on identifying circumstances that indicate a transaction is not orderly. Under FSP FAS No. 157-4, if there has been a significant decrease in the volume and level of activity for the asset or the liability in relation to the normal market activity for the asset or liability (or similar assets or liabilities), then transactions or quoted prices may not accurately reflect fair value. In addition, if there is evidence that the transaction for the asset or liability is not orderly, little weight, if any, should be placed on that transaction price as an indicator of fair value. FSP FAS No. 157-4 is effective for periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. Management elected not to adopt this FSP early and is currently assessing its potential effect on the results of operations and financial position of the Company.

FSP FAS 115-2 and FAS 124-2

In April 2009, the FASB issued FSP No. FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairments . This FSP amends the other-than-temporary impairment guidance for debt securities to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities. The FSP separates an other-than-temporary impairment of a debt security into two components when there are credit related losses associated with the impaired debt security for which management asserts that it does not have the intent to sell the security, and it is more likely than not that it will not be required to sell the security before recovery of its cost basis. The amount of the total other-than-temporary impairment related to other factors is recognized in other comprehensive income, net of applicable taxes. FSP FAS No. 115-2 and FAS 124-2 is effective for periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. Management elected not to adopt this FSP early and is currently assessing its potential effect on the results of operations and financial position of the Company.

FSP FAS 107-1 and APB 28-1

In April 2009, the FASB issued FSP No. FAS 107-1 and Accounting Principle Board (APB) 28-1, Interim Disclosures about Fair Value of Financial Instruments . This FSP requires disclosures about the fair value of its financial instruments whenever it issues summarized financial information for interim reporting periods. FSP FAS No. 107-1 and APB 28-1 are effective for periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. Because the requirements of this FSP relate only to financial statement disclosures, its adoption will not have an effect on the results of operations or financial position of the Company.

Table of Contents**Note 2 - Investments***Fixed Maturity Securities and Equity Securities*

The following table presents the composition and value of the Company's fixed maturity securities and equity securities portfolios by rating category. At March 31, 2009, 95.2% of these securities were investment grade, with an overall average quality rating of A+. The Company has classified the entire fixed maturity securities and equity securities portfolios as available for sale, which are carried at fair value.

Rating (1)	Percent of Total Carrying Value		March 31, 2009	
	March 31, 2009	December 31, 2008	Carrying Value (2)	Amortized Cost

Not rated (4)	2.5	3.7	1,197	1,487
Total	100.0%	100.0%	\$ 47,333	\$ 72,634

- (1) Ratings are as assigned primarily by Standard & Poor's Corporation (S&P) when available, with remaining ratings as assigned on an equivalent basis by Moody's Investors Service, Inc. (Moody's). Ratings for publicly traded securities are determined when the securities are acquired and are updated monthly to reflect any changes in ratings.
- (2) Carrying values are equal to fair values, with fair values based on quoted market prices, when available. Fair values for private placements and certain other securities that are infrequently traded are estimated by the Company with the assistance of its investment advisors utilizing recognized valuation methodology, including cash flow modeling. See also Note 3 Fair Value Measurements.
- (3) This category includes \$88 (fair value) of private placement securities not rated by either S&P or Moody's. The National Association of Insurance Commissioners (NAIC) has rated 60.8% of these private placement securities as investment grade. The remaining \$25 (fair value) of securities in this category were obtained in partial settlement of a default that occurred in

2002 and are not rated by S&P, Moody's or the NAIC.

- (4) This category represents common stocks that are not rated by either S&P or Moody's.

Table of Contents**Note 2 - Investments-(Continued)**

The following table presents the distribution of the Company's fixed maturity securities portfolio by estimated expected maturity. Estimated expected maturities differ from contractual maturities, reflecting assumptions regarding borrowers' utilization of the right to call or prepay obligations with or without call or prepayment penalties. For structured securities, including mortgage-backed securities and other asset-backed securities, estimated expected maturities consider broker dealer survey prepayment assumptions and are verified for consistency with the interest rate and economic environments.

	Percent of Total Fair Value		March 31, 2009	
	March 31, 2009	December 31, 2008	Fair Value	Amortized Cost
Due in 1 year or less	5.0%	7.1%	\$ 169,955	\$ 186,801
Due after 1 year through 5 years	26.2	30.0	882,258	969,706
Due after 5 years through 10 years	30.8	30.7	1,038,192	1,141,096
Due after 10 years through 20 years	13.8	10.6	465,611	511,762
Due after 20 years	24.2	21.6	816,341	897,256
Total	100.0%	100.0%	\$ 3,372,357	\$ 3,706,621

The average option adjusted duration for the Company's fixed maturity securities was 6.4 years at March 31, 2009 and 5.9 years at December 31, 2008. The increase in duration was primarily driven by a reduction in mortgage-backed securities, which have a lower duration, as the Company completed an opportunistic capital gains program during the first three months of 2009.

In the first quarter of 2009, pretax net realized investment losses were \$847, including \$15,857 of impairment charges. These charges were comprised of \$13,450 of impairment write-downs, primarily below investment grade perpetual preferred stocks, and \$2,407 of impairments on securities that the Company no longer intends to hold until the value fully recovers, primarily high-yield bonds. In addition, the Company recorded \$1,625 of realized impairment losses on securities that were disposed of during the quarter, primarily high-yield investments. These losses were largely offset by \$16,635 of realized gains on security sales.

Table of Contents**Note 2 - Investments-(Continued)**

The following table presents the fair value and gross unrealized losses of fixed maturity securities and equity securities in an unrealized loss position at March 31, 2009 and December 31, 2008, respectively. The Company views the decrease in value of all of the securities with unrealized losses at March 31, 2009 which was driven largely by spread widening, market illiquidity and changes in interest rates as temporary, expects recovery in fair value in a reasonable timeframe, anticipates continued payments under the contractual terms of the securities, and has the intent and ability to hold these securities until maturity or a recovery in fair value occurs. Therefore, no other-than-temporary impairment of these securities was recorded at March 31, 2009.

Note 3 - Fair Value Measurements

The Company is required under GAAP to disclose estimated fair values for certain financial instruments. Fair values of the Company's insurance contracts other than annuity contracts are not required to be disclosed. However, the fair values of liabilities under all insurance contracts are taken into consideration in the Company's overall management of interest rate risk through the matching of investment maturities with amounts due under insurance contracts. Effective January 1, 2008, the Company adopted SFAS No. 157, which provides a framework for measuring fair value in accordance with GAAP. FSP No. FAS 157-2 deferred the effective date of SFAS No. 157 for one year for nonfinancial assets and nonfinancial liabilities that are not disclosed at fair value in the consolidated financial statements on a recurring basis. Effective January 1, 2009, the Company adopted the fair value disclosure requirements for these nonfinancial assets and nonfinancial liabilities.

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. SFAS No. 157 also establishes a fair value hierarchy, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities. Level 1 assets and liabilities include debt and equity securities (both common stock and preferred stock) that are traded in an active exchange market, as well as U.S. Treasury securities.

Level 2 Unadjusted observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for the assets or liabilities. Level 2 assets and liabilities include debt securities with quoted prices that are traded less frequently than exchange-traded instruments. This category generally includes certain U.S. Government and agency mortgage-backed debt securities, non-agency structured securities, corporate debt securities and preferred stocks.

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation. This category generally includes certain private debt and equity investments.

As required by SFAS No. 157, when the inputs used to measure fair value fall within different levels of the hierarchy, the level within which fair value measurement is categorized is based on the lowest level input that is significant to the fair value measurement in its entirety. As a result, a Level 3 fair value measurement may include inputs that are observable (Level 1 or Level 2) and unobservable (Level 3). Net transfers in (out) of Level 3 are reported as having occurred at the end of the reporting period in which the transfers were determined.

Table of Contents**Note 3 - Fair Value Measurements-(Continued)**

The following discussion describes the valuation methodologies used for financial assets measured at fair value. The techniques utilized in estimating the fair values are affected by the assumptions used, including discount rates and estimates of the amount and timing of future cash flows. The use of different methodologies, assumptions and inputs may have a material effect on the estimated fair values of the Company's securities holdings. Care should be exercised in deriving conclusions about the Company's business, its value or financial position based on the fair value information of financial assets presented below.

Fair value estimates are made at a specific point in time, based on available market information and judgments about the financial asset, including estimates of timing, amount of expected future cash flows and the credit standing of the issuer. In some cases, the fair value estimates cannot be substantiated by comparison to independent markets. In addition, the disclosed fair value may not be realized in the immediate settlement of the financial asset. In addition, the disclosed fair values do not reflect any premium or discount that could result from offering for sale at one time an entire holding of a particular financial asset. In periods of market disruption, the ability to observe prices and inputs may be reduced for many instruments. This condition could cause an instrument to be reclassified from Level 1 to Level 2 or from Level 2 to Level 3. Potential taxes and other expenses that would be incurred in an actual sale or settlement are not reflected in amounts disclosed.

Investments

Fair values for the Company's fixed maturity securities are based on prices provided by its investment managers and its custodian bank. Both the investment managers and the custodian bank use a variety of independent, nationally recognized pricing sources to determine market valuations. Each designate specific pricing services or indexes for each sector of the market based upon the provider's expertise. Typical inputs used by these pricing sources include, but are not limited to, reported trades, benchmark yields, issuer spreads, bids, offers, and/or estimated cash flows and prepayment speeds. When the pricing sources cannot provide fair value determinations, the Company obtains non-binding price quotes from broker-dealers. The broker-dealers' valuation methodology is sometimes matrix-based, using indicative evaluation measures and adjustments for specific security characteristics and market sentiment. The Company analyzes market valuations received to verify reasonableness, to understand the key assumptions used and their sources, to conclude the prices obtained are appropriate, and to determine an appropriate SFAS No. 157 fair value hierarchy level based upon trading activity and the observability of market inputs. Based on this evaluation and investment class analysis, each price is classified into Level 1, 2, or 3. The Company has in place certain control processes to determine the reasonableness of the financial asset fair values. These processes are designed to ensure the values received are accurately recorded and that the data inputs and valuation techniques utilized are appropriate, consistently applied, and that the assumptions are reasonable and consistent with the objective of determining fair value. For example, on a continuing basis, the Company assesses the reasonableness of individual security values received from pricing sources that vary from certain thresholds. Historically, the control processes have not resulted in adjustments to the valuations provided by pricing sources. The Company's fixed maturity securities portfolio is primarily publicly traded, which allows for a high percentage of the portfolio to be priced through pricing services. Approximately 94% of the portfolio was priced through pricing services or index priced as of March 31, 2009. The remainder of the portfolio

Table of Contents**Note 3 - Fair Value Measurements-(Continued)**

was priced by broker-dealers, and these inputs were generally Level 2. There were no significant changes to the valuation process during the first three months of 2009.

Fair values of equity securities have been determined by the Company from observable market quotations, when available. Private placement securities and equity securities where a public quotation is not available are valued by using non-binding broker quotes or through the use of internal models or analysis. These inputs are based on assumptions deemed appropriate given the circumstances and are believed to be consistent with what other market participants would use when pricing such securities.

Short-term investments are comprised of short-term fixed income securities. Because of the nature of these assets, carrying amounts approximate fair values, which have been determined from public quotations, when available.

Separate Account

Separate Account assets represent variable annuity contractholder funds invested in various mutual funds. Fair values of these assets have been determined from public quotations.

The following table presents the Company's fair value hierarchy for those assets and liabilities measured at fair value on a recurring and nonrecurring basis as of March 31, 2009. At March 31, 2009, Level 3 assets comprised approximately 0.7% of the Company's total investment portfolio fair value.

	Carrying Amount	Fair Value	Fair Value Measurements at Reporting Date Using		
			Level 1	Level 2	Level 3
March 31, 2009					
Financial Assets

(1) Short-term investments are included in Short-term and Other Investments in the Consolidated Balance Sheet.

Table of Contents**Note 3 - Fair Value Measurements-(Continued)**

The following table presents a reconciliation for all Level 3 assets measured at fair value on a recurring basis for the period January 1, 2009 to March 31, 2009.

	Fixed Maturities	Equity Securities	Total
Financial Assets			
Beginning balance, January 1, 2009	\$ 30,439	\$ 455	\$ 30,894
Total net gains (losses) (all unrealized)	(4,680)	-	(4,680)
Paydowns and maturities	(603)	-	(603)
Purchases, sales, issuances and settlements	-	-	-
Transfers in (out) of Level 3	-	-	-
Ending balance, March 31, 2009	\$ 25,156	\$ 455	\$ 25,611

For the period January 1, 2009 to March 31, 2009, there were no realized gains or losses included in earnings that were attributable to Level 3 assets still held at March 31, 2009.

The following table presents a reconciliation for all Level 3 assets measured at fair value on a non-recurring basis for the period January 1, 2009 to March 31, 2009.

	Goodwill
For the Three Months Ended March 31, 2009	
Nonfinancial Assets	
Beginning balance, January 1, 2009	\$ 47,396
Total net gains (losses) (realized/unrealized)	-
Paydowns and maturities	-
Purchases, sales, issuances and settlements	-
Transfers in (out) of Level 3	-
Ending balance, March 31, 2009	\$ 47,396

Note 4 - Debt

Indebtedness outstanding was as follows:

	March 31, 2009	December 31, 2008
Short-term debt:		
Bank Credit Facility	\$ 38,000	\$ 38,000
Long-term debt:		
6.05% Senior Notes, due June 15, 2015. Aggregate principal amount of \$75,000 less unaccrued discount of \$165 and \$172 (6.1% imputed rate)	74,835	74,828

6.85% Senior Notes, due April 15, 2016. Aggregate principal amount of \$125,000 less unaccrued discount of \$269 and \$279 (6.9% imputed rate)	124,731	124,721
Total	\$ 237,566	\$ 237,549

The Bank Credit Facility, 6.05% Senior Notes due 2015 (Senior Notes due 2015) and 6.85% Senior Notes due 2016 (Senior Notes due 2016) are described in Notes to Consolidated Financial Statements Note 5 Debt of the Company s Annual Report on Form 10-K for the year ended December 31, 2008.

Table of Contents**Note 5 - Pension Plans and Other Postretirement Benefits**

The Company has the following retirement plans: a defined contribution plan; a 401(k) plan; a defined benefit plan for employees hired on or before December 31, 1998; and certain employees participate in a supplemental defined contribution plan or a supplemental defined benefit plan or both. Additional information regarding the Company's retirement plans is contained in Notes to Consolidated Financial Statements Note 9 Pension Plans and Other Postretirement Benefits of the Company's Annual Report on Form 10-K for the year ended December 31, 2008.

The following table summarizes the components of net periodic pension cost recognized for the defined benefit plan and the supplemental defined benefit plans for the three months ended March 31, 2009 and 2008.

	Defined Benefit Plan Three Months Ended March 31,		Supplemental Defined Benefit Plans Three Months Ended March 31,	
	2009	2008	2009	2008
Components of net periodic pension expense:				
Service cost	\$ -	\$ -	\$ (13)	\$ (11)
Interest cost	1,973	249	254	235
Expected return on plan assets	(2,301)	(289)	-	-
Recognized net actuarial loss	401	136	66	146
Settlement loss	784	57	-	-
Net periodic pension expense	\$ 857	\$ 153	\$ 307	\$ 370

Consistent with disclosure in Notes to Consolidated Financial Statements Note 9 Pension Plans and Other Postretirement Benefits of the Company's Annual Report on Form 10-K for the year ended December 31, 2008, the Company expects to contribute approximately \$1,100 to the supplemental defined benefit plans in 2009, of which \$284 was contributed during the three months ended March 31, 2009. There is no minimum funding requirement for the Company's defined benefit pension plan in 2009. At the time of this Quarterly Report on Form 10-Q, the Company expects to contribute between \$2,700 and \$5,600 to the defined benefit plan in 2009, of which \$0 was contributed during the three months ended March 31, 2009. At the time of the Company's Annual Report on Form 10-K for the year ended December 31, 2008, the Company expected to contribute approximately \$5,400 to the defined benefit plan in 2009.

In addition to providing pension benefits, the Company also provides certain health care and life insurance benefits to retired employees, who meet the Plan's eligibility requirements, and their eligible dependents. As described in Notes to Consolidated Financial Statements Note 9 Pension Plans and Other Postretirement Benefits of the Company's Annual Report on Form 10-K for the year ended December 31, 2008, effective January 1, 2007, the Company eliminated the previous health care benefits for retirees 65 years of age and over and established a defined contribution plan with a Health Reimbursement Account (HRA) for each eligible retired participant. Funding of HRA accounts was \$209 and \$288 for the three months ended March 31, 2009 and 2008, respectively.

Table of Contents**Note 5 - Pension Plans and Other Postretirement Benefits-(Continued)**

The following table summarizes the components of the net periodic benefit gain for postretirement benefits other than pension for the three months ended March 31, 2009 and 2008.

	Three Months Ended March 31,	
	2009	2008
Components of net periodic gain:		
Service cost	\$ -	\$ 1
Interest cost	10	38
Amortization of prior service cost	(72)	(527)
Recognized net actuarial gain	(25)	(110)
Net periodic benefit gain	\$ (87)	\$ (598)

Consistent with disclosure in Notes to Consolidated Financial Statements Note 9 Pension Plans and Other Postretirement Benefits of the Company's Annual Report on Form 10-K for the year ended December 31, 2008, the Company expects to contribute approximately \$700 to the defined benefit postretirement benefit plans other than pensions in 2009, of which \$238 was contributed during the three months ended March 31, 2009.

Note 6 - Reinsurance

The Company recognizes the cost of reinsurance premiums over the contract periods for such premiums in proportion to the insurance protection provided. Amounts recoverable from reinsurers for unpaid claims and claim settlement expenses, including estimated amounts for unsettled claims, claims incurred but not reported and policy benefits, are estimated in a manner consistent with the insurance liability associated with the policy. The effects of reinsurance on premiums written and contract deposits; premiums and contract charges earned; and benefits, claims and settlement expenses were as follows:

	Gross Amount	Ceded	Assumed	Net
Three months ended				
<u>March 31, 2009</u>				
Premiums written and contract deposits	\$ 228,850	\$ 8,451	\$ 918	\$ 221,317
Premiums and contract charges earned	170,424	9,022	1,061	162,463
Benefits, claims and settlement expenses	108,962	2,205	983	107,740
Three months ended				
<u>March 31, 2008</u>				
Premiums written and contract deposits	\$ 232,283	\$ 7,877	\$ 181	\$ 224,587

Edgar Filing: HORACE MANN EDUCATORS CORP /DE/ - Form 10-Q

Premiums and contract charges earned	170,841	8,618	326	162,549
Benefits, claims and settlement expenses	109,165	2,582	331	106,914

Table of Contents**Note 7 - Segment Information**

The Company conducts and manages its business through four segments. The three operating segments, representing the major lines of insurance business, are: property and casualty insurance, principally personal lines automobile and homeowners products; annuity products, principally individual, tax-qualified fixed and variable deposits; and life insurance. The Company does not allocate the impact of corporate level transactions to the insurance segments, consistent with the basis for management's evaluation of the results of those segments, but classifies those items in the fourth segment, corporate and other. In addition to ongoing transactions such as debt service, realized investment gains and losses and certain public company expenses, within the past six years such items have included debt retirement costs/gains and restructuring charges. Summarized financial information for these segments is as follows:

	Three Months Ended March 31,	
	2009	2008
Insurance premiums and contract charges earned		
Property and casualty	\$ 135,022	\$ 132,987
Annuity	3,180	4,775
Life	24,261	24,787
Total	\$ 162,463	\$ 162,549
Net investment income		
Property and casualty	\$ 8,301	\$ 9,180
Annuity	34,828	33,055
Life	14,996	14,627
Corporate and other	5	23
Intersegment eliminations	(267)	(272)
Total	\$ 57,863	\$ 56,613
Net income (loss)		
Property and casualty	\$ 12,446	\$ 13,035
Annuity	1,184	2,938
Life	3,447	2,635
Corporate and other	(3,646)	(4,352)
Total	\$ 13,431	\$ 14,256
Amortization of intangible assets, pretax (included in segment net income)		
Value of acquired insurance in force		
Annuity	\$ -	\$ 918

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

(Dollars in millions, except per share data)

Forward-looking Information

Statements made in the following discussion that state the Company's or management's intentions, hopes, beliefs, expectations or predictions of future events or the Company's future financial performance are forward-looking statements and involve known and unknown risks, uncertainties and other factors. Horace Mann is not under any obligation to (and expressly disclaims any such obligation to) update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. It is important to note that the Company's actual results could differ materially from those projected in forward-looking statements due to, among other risks and uncertainties inherent in the Company's business, the following important factors:

Changes in the composition of the Company's assets and liabilities which may result from occurrences such as acquisitions, divestitures, impairment in asset values or changes in estimates of insurance reserves.

Fluctuations in the fair value of securities in the Company's investment portfolio and the related after-tax effect on the Company's shareholders' equity and total capital through either realized or unrealized investment losses, as well as the potential impact on the ability of the Company's insurance subsidiaries to distribute cash to the holding company and/or need for the holding company to make capital contributions to the insurance subsidiaries. In addition, the impact of fluctuations in the financial markets on the Company's defined benefit pension plan assets and the related after-tax effect on the Company's operating expenses, shareholders' equity and total capital.

The impact of fluctuations in the financial markets on the Company's variable annuity fee revenues, valuations of deferred policy acquisition costs, and the level of guaranteed minimum death benefit reserves.

The impact of fluctuations in the capital markets on the Company's ability to refinance outstanding indebtedness or repurchase shares of the Company's common stock.

Defaults on interest or dividend payments in the Company's investment portfolio due to credit issues and the resulting impact on investment income.

Prevailing interest rate levels, including the impact of interest rates on (1) unrealized gains and losses in the Company's investment portfolio and the related after-tax effect on the Company's shareholders' equity and total capital, (2) the book yield of the Company's investment portfolio, (3) the Company's ability to maintain appropriate interest rate spreads over the fixed rates guaranteed in the Company's life and annuity products and (4) valuations of deferred policy acquisition costs.

The cyclical nature of the insurance industry and the related effects of changes in price competition and industry-wide underwriting results.

Table of Contents

The frequency and severity of catastrophes such as hurricanes, earthquakes, storms and wildfires and the ability of the Company to provide accurate estimates of ultimate catastrophe costs in its consolidated financial statements in light of such factors as: the proximity of the catastrophe occurrence date to the date of the consolidated financial statements; potential inflation of property repair costs in the affected area; the occurrence of multiple catastrophes in a geographic area over a relatively short period of time; the outcome of litigation which may be filed against the Company by policyholders, state attorneys general and other parties relative to loss coverage disputes and loss settlement payments; and the ability of state insurance facilities to assess participating insurers when financial deficits occur.

The Company's risk exposure to catastrophe-prone areas. Based on full year 2008 property and casualty direct earned premiums, the Company's ten largest states represented 58% of the segment total. Included in this top ten group are certain states which are considered more prone to catastrophe occurrences: Florida, California, North Carolina, Texas, Louisiana, South Carolina and Georgia.

The potential near-term, adverse impact of underwriting actions to mitigate the Company's risk exposure to catastrophe-prone areas on premium, policy and earnings growth.

The ability of the Company to maintain a favorable catastrophe reinsurance program considering both availability and cost; and the collectibility of reinsurance receivables.

Adverse development of property and casualty loss and loss adjustment expense reserve experience and its impact on estimated claims and claim settlement expenses for losses occurring in prior years.

Adverse changes in market appreciation, interest spreads, business persistency and policyholder mortality and morbidity rates and the resulting impact on both estimated reserves and the valuations of deferred policy acquisition costs.

Changes in insurance regulations, including (1) those affecting the ability of the Company's insurance subsidiaries to distribute cash to the holding company and (2) those impacting the Company's ability to profitably write property and casualty insurance policies in one or more states.

Changes in federal income tax laws and changes resulting from federal tax audits affecting corporate tax rates or taxable income.

Changes in federal and state laws and regulations, which affect the relative tax and other advantages of the Company's life and annuity products to customers, including, but not limited to, changes in IRS regulations governing Section 403(b) plans.

The resolution of legal proceedings and related matters including the potential adverse impact on the Company's reputation and charges against the Company's earnings resulting from legal defense costs, a settlement agreement and/or an adverse finding or findings against the Company from the proceedings.

The Company's ability to maintain favorable claims-paying ability ratings.

The Company's ability to maintain favorable financial strength and debt ratings.

The Company's ability to profitably expand its property and casualty business in highly competitive environments.

The competitive impact of the new Section 403(b) tax-qualified annuity regulations, including (1) their potential to lead plan sponsors to restrict the number of providers and (2) the possible entry into the 403(b) market of larger competitors experienced in 401(k) plans.

Table of Contents

The Company's ability to develop and expand its marketing operations, including agents and other points of distribution, as well as the Company's ability to maintain and secure sponsorships by local, state and national education associations.

The Company's dated and complex information systems, which are difficult to upgrade and more prone to error than advanced technology systems.

Disruptions of the general business climate, investments, capital markets and consumer attitudes caused by pandemics or geopolitical acts such as terrorism, war or other similar events.

Executive Summary

Horace Mann Educators Corporation (HMEC ; and together with its subsidiaries, the Company or Horace Mann) is an insurance holding company. Through its subsidiaries, HMEC markets and underwrites personal lines of property and casualty insurance, retirement annuities and life insurance in the U.S. The Company markets its products primarily to K-12 teachers, administrators and other employees of public schools and their families.

For the three months ended March 31, 2009, the Company's net income of \$13.4 million represented a decrease of \$0.9 million compared to the prior year. After-tax net realized investment gains and losses improved by \$1.0 million between periods. The current period included transition costs of approximately \$3.1 million after tax related to the Company's property and casualty claims office consolidation and distribution strategies. Catastrophe costs decreased \$0.6 million after tax; however, non-catastrophe weather-related losses increased somewhat compared to the prior year. In addition, compared to the first quarter of 2008, net income in the current period increased by \$0.4 million due to a modest increase in the level of favorable prior years' property and casualty reserve development. Including all factors, the property and casualty combined ratio was 94.6% for the first quarter of 2009 compared to 93.5% for the same period in 2008. Annuity segment net income decreased \$1.8 million compared to the first three months of 2008, as current year improvements in the interest margin were more than offset by the adverse impact of the financial markets on the level of contract charges earned, the valuation of deferred policy acquisition costs and the Company's guaranteed minimum death benefit reserve. Life segment net income increased \$0.8 million compared to a year earlier, reflecting growth in investment income and a decrease in mortality costs.

Premiums written and contract deposits declined a modest 1% compared to the first three months of 2008, primarily reflecting a 7% decrease in annuity deposit receipts in the current period. New automobile sales units for the current quarter were 5% less than the first three months of 2008, although average agent true new automobile sales productivity increased compared to a year earlier. The automobile new business decrease was offset by favorable policy retention and growth in average premium per policy. Life segment insurance premiums and contract deposits decreased slightly compared to the prior year.

Table of Contents

Critical Accounting Policies

The preparation of consolidated financial statements in conformity with U.S. generally accepted accounting principles (GAAP) requires the Company s management to make estimates and assumptions based on information available at the time the consolidated financial statements are prepared. These estimates and assumptions affect the reported amounts of the Company s consolidated assets, liabilities, shareholders equity and net income. Certain accounting estimates are particularly sensitive because of their significance to the Company s consolidated financial statements and because of the possibility that subsequent events and available information may differ markedly from management s judgements at the time the consolidated financial statements were prepared. Management has discussed with the Audit Committee the quality, not just the acceptability, of the Company s accounting principles as applied in its financial reporting. The discussions generally included such matters as the consistency of the Company s accounting policies and their application, and the clarity and completeness of the Company s consolidated financial statements, which include related disclosures. For the Company, the areas most subject to significant management judgements include: fair value measurements, other-than-temporary impairment of investments, goodwill, deferred policy acquisition costs for annuity and interest-sensitive life products, deferred taxes, liabilities for property and casualty claims and claim settlement expenses, liabilities for future policy benefits and valuation of assets and liabilities related to the defined benefit pension plan.

Table of Contents

Fair Value Measurements

The Company adopted Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards (SFAS) No. 157, Fair Value Measurements , effective January 1, 2008. SFAS No. 157 established a framework for measuring fair value that includes a hierarchy used to classify the inputs used in measuring fair value. The hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three levels. The level in the fair value hierarchy within which the fair value measurement falls is determined based on the lowest level input that is significant to the fair value measurement. The levels of the fair value hierarchy are as follows:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities. Level 1 assets and liabilities include debt and equity securities (both common stock and preferred stock) that are traded in an active exchange market, as well as U.S. Treasury securities.

Level 2 Unadjusted observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for the assets or liabilities. Level 2 assets and liabilities include debt securities with quoted prices that are traded less frequently than exchange-traded instruments. This category generally includes certain U.S. Government, agency mortgage-backed debt securities, non-agency structured securities, corporate debt securities and preferred stocks.

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation. This category generally includes certain private debt and equity investments.

At March 31, 2009, Level 3 assets comprised approximately 0.7% of the Company's total investment portfolio fair value. For additional detail, see Notes to Consolidated Financial Statements Note 3 Fair Value Measurements .

Valuation of Significant Investments

Fair values for the Company's fixed maturity securities are based on prices provided by its investment managers and its custodian bank. Both the investment managers and the custodian bank use a variety of independent, nationally recognized pricing sources to determine market valuations. Each designate specific pricing services or indexes for each sector of the market based upon the provider's expertise. Typical inputs used by these pricing sources include, but are not limited to, reported trades, benchmark yields, issuer spreads, bids, offers, and/or estimated cash flows and prepayment speeds. When the pricing sources cannot provide fair value determinations, the Company obtains non-binding price quotes from broker-dealers. The broker-dealers' valuation methodology is sometimes matrix-based, using indicative evaluation measures and adjustments for specific security characteristics and market sentiment. The Company analyzes market valuations received to verify reasonableness, to understand the key assumptions used and their sources, to conclude the

Table of Contents

prices obtained are appropriate, and to determine an appropriate SFAS No. 157 fair value hierarchy level based upon trading activity and the observability of market inputs. Based on this evaluation and investment class analysis, each price is classified into Level 1, 2 or 3. The Company has in place certain control processes to determine the reasonableness of the financial asset fair values. These processes are designed to ensure the values received are accurately recorded and that the data inputs and valuation techniques utilized are appropriate, consistently applied, and that the assumptions are reasonable and consistent with the objective of determining fair value. For example, on a continuing basis, the Company assesses the reasonableness of individual security values received from pricing sources that vary from certain thresholds. Historically, the control processes have not resulted in adjustments to the valuation provided by pricing sources. The Company's fixed maturity securities portfolio is primarily publicly traded, which allows for a high percentage of the portfolio to be priced through pricing services. Approximately 94% of the portfolio was priced through pricing services or index priced as of March 31, 2009. The remainder of the portfolio was priced by broker-dealers, and these inputs were generally Level 2. There were no significant changes to the valuation process during the first three months of 2009.

Fair values of equity securities have been determined by the Company from observable market quotations, when available. Private placement securities and equity securities where a public quotation is not available are valued by using non-binding broker quotes or through the use of internal models or analysis. These inputs are based on assumptions deemed appropriate given the circumstances and are believed to be consistent with what other market participants would use when pricing such securities.

Other-Than-Temporary Impairment of Investments

The Company's methodology of assessing other-than-temporary impairments is based on security-specific facts and circumstances as of the date of the reporting period. Based on these facts, if management believes it is probable that amounts due will not be collected according to the contractual terms of a debt security, or if the Company does not have the ability and intent to hold a debt or equity security with an unrealized loss until it matures or recovers in value, an other-than-temporary impairment is considered to have occurred. As a general rule, if the fair value of a debt security has fallen below 80% of book value, this security will be reviewed for an other-than-temporary impairment. Also as a general rule, if the fair value of an equity security has declined below cost, this security will be reviewed for an other-than-temporary impairment including an assessment of whether recovery in fair value is likely to occur within a reasonable period of time. Additionally, if events become known that call into question whether the security issuer has the ability to honor its contractual commitments, whether or not such security has been trading above an 80% fair value to book value relationship, such security holding will be evaluated to determine whether or not such security has suffered an other-than-temporary decline in value.

The Company reviews the fair value of all investments in its portfolio on a monthly basis to assess whether an other-than-temporary decline in value has occurred. These reviews, in conjunction with the Company's investment managers' monthly credit reports and relevant factors such as (1) the financial condition and near-term prospects of the issuer, (2) the length of time and extent to which the fair value has been less than amortized cost for fixed maturity securities or cost for equity securities, (3) the Company's ability and intent to retain the investment long enough to allow for the anticipated recovery in fair value or until it matures, (4) the stock price trend of the issuer, (5) the market leadership position of the issuer, (6) the debt ratings of the issuer, (7) the cash flows of the issuer or the underlying cash flows for asset-

Table of Contents

backed securities and (8) a near-term recovery period for equity securities, are all considered in the impairment assessment. A write-down of an investment is recorded when a decline in the fair value of that investment is deemed to be other-than-temporary, with a realized investment loss charged to income for the period.

With respect to fixed income securities involving securitized financial assets primarily asset backed and commercial mortgage backed securities in the Company's portfolio which fall under the provisions of Emerging Issues Task Force (EITF) Issue No. 99-20, Recognition of Interest Income and Impairment on Purchased Beneficial Interests and Beneficial Interests that Continue to be Held by a Transferor in Securitized Financial Assets , all of the Company's securitized financial assets fair values are determined by observable inputs. In addition, the securitized financial asset securities underlying collateral cash flows are stress tested to determine if there has been any adverse change in the expected cash flows.

The Company's intent and ability to hold securities requires the Company to consider at each accounting period end its broad portfolio management objectives such as asset/liability duration management, issuer and industry segment exposures, interest rate views and the overall total return focus. In following these portfolio management objectives, changes in facts and circumstances that were present in past reporting periods may trigger a decision to sell securities that were held in prior reporting periods. The Company attempts to anticipate these types of changes and if a sale decision has been made on an impaired security and that security is not expected to recover prior to the expected time of sale, the security will be deemed other-than-temporarily impaired in the period that the sale decision was made and an other-than-temporary impairment loss will be recognized.

A decline in fair value below amortized cost is not assumed to be other-than-temporary for fixed maturity investments with unrealized losses due to spread widening, market illiquidity or changes in interest rates where there exists a reasonable expectation based on the Company's consideration of all objective information available that the Company will recover all amounts due under the contractual terms of the security and the Company has the intent and ability to hold the investment until maturity or a market recovery is realized. An other-than-temporary impairment loss will be recognized based upon all relevant facts and circumstances for each investment, as appropriate.

Goodwill

Financial Accounting Standards Board SFAS No. 142, Goodwill and Other Intangible Assets , requires that goodwill balances be reviewed for impairment at least annually or more frequently if events occur or circumstances change that would indicate that a triggering event, as defined in SFAS No. 142, has occurred. A reporting unit is defined as an operating segment or one level below an operating segment. The Company's reporting units, for which goodwill has been allocated, are equivalent to the Company's operating segments.

Table of Contents

The goodwill impairment test follows a two step process as defined in SFAS No. 142. In the first step, the fair value of a reporting unit is compared to its carrying value. If the carrying value of a reporting unit exceeds its fair value, the second step of the impairment test is performed for purposes of measuring the impairment. In the second step, the fair value of the reporting unit is allocated to all of the assets and liabilities of the reporting unit to determine an implied goodwill value. If the carrying amount of the reporting unit goodwill exceeds the implied goodwill value, an impairment loss would be recognized in an amount equal to that excess, and the charge could have a material adverse effect on the Company's results of operations and financial position.

Management's determination of the fair value of each reporting unit incorporates multiple inputs including discounted cash flow calculations, the level of the Company's own share price and assumptions that market participants would make in valuing the reporting unit. Other assumptions include levels of economic capital, future business growth, earnings projections, assets under management for reporting units and the discount rate utilized.

The Company completed its annual goodwill assessment for the individual reporting units as of December 31, 2008. The conclusion reached as a result of the annual goodwill impairment testing was that the fair value of each reporting unit, for which goodwill had been allocated, was in excess of the respective reporting unit's carrying value, and therefore determined not to be impaired.

As part of the Company's December 31, 2008 goodwill analysis, the Company compared the fair value of the aggregated reporting units to the market capitalization of the Company using the December 31, 2008 common stock price. The difference between the aggregated fair value of the reporting units and the market capitalization of the Company was attributed to transaction premium. The amount of the transaction premium was determined to be reasonable based on recent insurance transactions and specific facts and circumstances related to the Company.

There were no events or material changes in circumstances during the three months ended March 31, 2009 that indicated that a triggering event had occurred. However, if current market conditions persist during 2009, in particular if the Company's share price remains below book value per share, or if the Company's actions to limit risk associated with its products or investments causes a significant change in any one reporting unit's fair value, the Company may need to reassess goodwill impairment at the end of each future quarter as part of an interim impairment test. Subsequent reviews of goodwill could result in an impairment of goodwill during 2009.

Deferred Policy Acquisition Costs for Annuity and Interest-sensitive Life Products

Policy acquisition costs, consisting of commissions, policy issuance and other costs, which vary with and are primarily related to the production of business, are capitalized and amortized on a basis consistent with the type of insurance coverage. For all investment (annuity) contracts, acquisition costs are amortized over 20 years in proportion to estimated gross profits. Capitalized acquisition costs for interest-sensitive life contracts are also amortized over 20 years in proportion to estimated gross profits.

Table of Contents

The most significant assumptions that are involved in the estimation of annuity gross profits include interest rate spreads, future financial market performance, business surrender/lapse rates, expenses and the impact of realized investment gains and losses. For the variable deposit portion of the annuity segment, the Company amortizes policy acquisition costs utilizing a future financial market performance assumption of a 10% reversion to the mean approach with a 200 basis point corridor around the mean during the reversion period, representing a cap and a floor on the Company's assumed long-term assumption. The Company's practice with regard to returns on separate accounts assumes that long-term appreciation in equity markets is not changed by short-term market fluctuations, but is only changed when sustained interim deviations are experienced. The Company monitors these changes and only changes the assumption when its long-term expectation changes. The effect of an increase/(decrease) by 100 basis points in the assumed future rate of return is reasonably likely to result in a decrease/(increase) in the deferred policy acquisition costs balance of approximately \$1 million. At March 31, 2009, the ratio of capitalized annuity policy acquisition costs to the total annuity accumulated cash value was approximately 6%.

In the event actual experience differs significantly from assumptions or assumptions are significantly revised, the Company may be required to record a material charge or credit to amortization expense for the period in which the adjustment is made. As noted above, there are key assumptions involved in the valuation of capitalized policy acquisition costs. In terms of the sensitivity of this amortization to two of the more significant assumptions, assuming all other assumptions are met, (1) a 10 basis point deviation in the annual targeted interest rate spread assumption would currently impact amortization between \$0.10 million and \$0.20 million and (2) a 1% deviation from the targeted financial market performance for the underlying mutual funds of the Company's variable annuities would currently impact amortization between \$0.15 million and \$0.25 million. These results may change depending on the magnitude and direction of the deviations but represent a range of reasonably likely experience for the noted assumptions. Detailed discussion of the impact of adjustments to the amortization of capitalized acquisition costs is included in Results of Operations - Amortization of Policy Acquisition Expenses and Intangible Assets .

Deferred Taxes

Deferred tax assets and liabilities represent the tax effect of the differences between the financial statement carrying value of existing assets and liabilities and their respective tax bases. In accordance with SFAS No. 109, Accounting for Income Taxes , the Company evaluates deferred tax assets periodically to determine if they are realizable. Factors in the determination include the performance of the business including the ability to generate capital gains from a variety of sources and tax planning strategies. If, based on available information, it is more likely than not that the deferred income tax asset will not be realized, then a valuation allowance must be established with a corresponding charge to net income.

If current market conditions persist during 2009, a deferred tax asset valuation allowance may be necessary. Charges to establish a valuation allowance could have a material adverse effect on the Company's results of operations and financial position.

Table of Contents

Liabilities for Property and Casualty Claims and Claim Settlement Expenses

Underwriting results of the property and casualty segment are significantly influenced by estimates of the Company's ultimate liability for insured events. There is a high degree of uncertainty inherent in the estimates of ultimate losses underlying the liability for unpaid claims and claim settlement expenses. This inherent uncertainty is particularly significant for liability-related exposures due to the extended period, often many years, that transpires between a loss event, receipt of related claims data from policyholders and ultimate settlement of the claim. Reserves for property and casualty claims include provisions for payments to be made on reported claims (case reserves), claims incurred but not yet reported (IBNR) and associated settlement expenses (together, loss reserves). The process by which these reserves are established requires reliance upon estimates based on known facts and on interpretations of circumstances, including the Company's experience with similar cases and historical trends involving claim payments and related patterns, pending levels of unpaid claims and product mix, as well as other factors including court decisions, economic conditions and public attitudes.

Reserves are reestimated quarterly. Changes to reserves are recorded in the period in which development factor changes result in reserve reestimates. Detailed discussion of the process utilized to estimate loss reserves, risk factors considered and the impact of adjustments recorded during recent years is included in Notes to Consolidated Financial Statements Note 4 Property and Casualty Unpaid Claims and Claim Expenses of the Company's Annual Report on Form 10-K for the year ended December 31, 2008. Due to the nature of the Company's personal lines business, the Company has no exposure to claims for toxic waste cleanup, other environmental remediation or asbestos-related illnesses other than claims under homeowners insurance policies for environmentally related items such as mold.

Based on the Company's products and coverages, historical experience, and modeling of various actuarial methodologies used to develop reserve estimates, the Company estimates that the potential variability of the property and casualty loss reserves within a reasonable probability of other possible outcomes may be approximately plus or minus 6%, which equates to plus or minus approximately \$11 million of net income based on reserves as of March 31, 2009. Although this evaluation reflects the most likely outcomes, it is possible the final outcome may fall below or above these estimates.

There are a number of assumptions involved in the determination of the Company's property and casualty loss reserves. Among the key factors affecting recorded loss reserves for both long-tail and short-tail related coverages, claim severity and claim frequency are of particular significance. Management estimates that a 2% change in claim severity or claim frequency for the most recent 36-month period is a reasonably likely scenario based on recent experience and would result in a change in the estimated loss reserves of between \$6.0 million and \$10.0 million for long-tail liability related exposures (automobile liability coverages) and between \$3.0 million and \$4.0 million for short-tail liability related exposures (homeowners and automobile physical damage coverages). Actual results may differ, depending on the magnitude and direction of the deviation.

Table of Contents

The Company's loss and loss adjustment expense actuarial analysis is discussed with management. As part of this discussion, the indicated point estimate of the IBNR loss reserve by line of business (coverage) is reviewed. The Company actuaries also discuss any indicated changes to the underlying assumptions used to calculate the indicated point estimate. Review of the variance between the indicated reserves from these changes in assumptions and the previously carried reserves takes place. After discussion of these analyses and all relevant risk factors, management determines whether the reserve balances require adjustment. The Company's best estimate of loss reserves may change depending on a revision in the underlying assumptions.

The Company's liabilities for property and casualty unpaid claims and claim settlement expenses were as follows:

	March 31, 2009			December 31, 2008		
	Case Reserves	IBNR Reserves	Total (1)	Case Reserves	IBNR Reserves	Total (1)
Automobile liability	\$ 69.5	\$ 130.9	\$ 200.4	\$ 70.3	\$ 129.5	\$ 199.8
Automobile other	4.5	1.8	6.3	6.1	1.6	7.7
Homeowners	13.2	45.7	58.9	15.1	46.6	61.7
All other	3.7	23.8	27.5	3.9	24.7	28.6
Total	\$ 90.9	\$ 202.2	\$ 293.1	\$ 95.4	\$ 202.4	\$ 297.8

(1) These amounts are gross, before reduction for ceded reinsurance reserves.

The facts and circumstances leading to the Company's reestimate of reserves relate to revisions of the development factors used to predict how losses are likely to develop from the end of a reporting period until all claims have been paid. Reestimates occur because actual loss amounts are different than those predicted by the estimated development factors used in prior reserve estimates. At March 31, 2009, the impact of a reserve reestimation resulting in a 1% increase in net reserves would be a decrease of approximately \$2 million in net income. A reserve reestimation resulting in a 1% decrease in net reserves would increase net income by approximately \$2 million.

Favorable reserve reestimates increased net income for the three months ended March 31, 2009 by approximately \$2.2 million, primarily the result of favorable frequency and severity trends in voluntary automobile loss and loss adjustment expense emergence for accident years 2007 and 2008. The lower than expected claims and expense emergence and resultant lower expected loss ratios caused the Company to lower its reserve estimate.

Information regarding the Company's property and casualty claims and claims settlement expense reserve development table as of December 31, 2008 is located in Business Property and Casualty Segment Property and Casualty Reserves of the Company's Annual Report on Form 10-K for the year ended December 31, 2008. Information regarding property and casualty reserve reestimates for each of the three years ended December 31, 2008 is located in Management's Discussion and Analysis of Financial Condition and Results of Operations for the Three Years Ended December 31, 2008 Benefits, Claims and

Settlement Expenses of the Company's Annual Report on Form 10-K for the year ended December 31, 2008.

Table of Contents

Liabilities for Future Policy Benefits

Liabilities for future benefits on life and annuity policies are established in amounts adequate to meet the estimated future obligations on policies in force. Liabilities for future policy benefits on certain life insurance policies are computed using the net level premium method and are based on assumptions as to future investment yield, mortality and withdrawals. Mortality and withdrawal assumptions for all policies have been based on actuarial tables which are consistent with the Company's own experience. In the event actual experience is worse than the assumptions, additional reserves may be required. This would result in a charge to income for the period in which the increase in reserves occurred. Liabilities for future benefits on annuity contracts and certain long-duration life insurance contracts are carried at accumulated policyholder values without reduction for potential surrender or withdrawal charges.

Valuation of Assets and Liabilities Related to the Defined Benefit Pension Plan

Effective April 1, 2002, participants stopped accruing benefits under the defined benefit pension plan but continue to retain the benefits they had accrued to that date.

The Company's cost estimates for its defined benefit pension plan are determined annually based on assumptions which include the discount rate, expected return on plan assets, anticipated retirement rate and estimated lump sum distributions. A discount rate of 6.27% was used by the Company for estimating accumulated benefits under the plan at December 31, 2008, which was based on the average yield for long-term, high grade securities having maturities generally consistent with the defined benefit pension payout period. To set its discount rate, the Company looks to leading indicators, including the Citigroup Pension Discount Curve. The expected annual return on plan assets assumed by the Company at December 31, 2008 was 7.5%. The assumption for the long-term rate of return on plan assets was determined by considering actual investment experience during the lifetime of the plan, balanced with reasonable expectations of future growth considering the various classes of assets and percentage allocation for each asset class. Management believes that it has adopted reasonable assumptions for investment returns, discount rates and other key factors used in the estimation of pension costs and asset values.

To the extent that actual experience differs from the Company's assumptions, subsequent adjustments may be required, with the effects of those adjustments charged or credited to income and/or shareholders' equity for the period in which the adjustments are made. Generally, a change of 50 basis points in the discount rate would inversely impact pension expense and accumulated other comprehensive income (AOCI) by approximately \$0.1 million and \$1.0 million, respectively. In addition, for every \$1 million increase (decrease) in the value of pension plan assets, there is a comparable increase (decrease) in AOCI.

Total	\$ 162.5	\$ 162.5	-	\$ -

N.M. Not meaningful.

For the first three months of 2009, the Company's premiums written and contract deposits decreased 1.5% compared to the prior year, primarily reflecting decreases in annuity deposit receipts in the current period. Voluntary property and casualty business represents policies sold through the Company's marketing organization and issued under the Company's underwriting guidelines. Involuntary property and casualty

business consists of allocations of business from state mandatory insurance facilities and assigned risk business.

The Company's dedicated agency force totaled 675 at March 31, 2009, reflecting a decrease of 10.9% compared to 758 agents at March 31, 2008 and an increase of 0.7% compared to 670 at December 31, 2008. In addition to agents, the Company's total points of distribution include licensed producers who work with the agents. At March 31, 2009, there were 412 licensed producers, compared to 284 at March 31, 2008 and 394 at December 31, 2008. Including these licensed producers, the Company's total points of distribution increased to 1,087 at March 31, 2009, a growth of 4.3% compared to 12 months earlier. At the time of this Quarterly Report on Form 10-Q, management anticipates that over the next several quarters the agent count will increase modestly during the Company's continued transition to its Agency Business Model and Exclusive Agent agreement, with a further increase in total points of distribution resulting from the growing number of licensed producers supporting agents who adopt the new models.

Table of Contents

In 2006, the Company began the transition from a single-person agent operation to its Agency Business Model, with agents in outside offices with support personnel and licensed producers, designed to remove capacity constraints and increase productivity. Building on the foundation of the Agency Business Model, in the fourth quarter of 2008 the Company introduced its Exclusive Agent agreement which is designed to place agents in the position to become business owners and invest their own capital to grow their agencies. By January 1, 2009, the first 71 individuals migrated from being employee agents to functioning as independent Exclusive Agents and by March 31, 2009, 91 individuals were appointed as Exclusive Agents. See additional description in Business Corporate Strategy and Marketing Dedicated Agency Force of the Company's Annual Report on Form 10-K for the year ended December 31, 2008.

For the first three months of 2009, total new automobile sales units were 5.4% less than the prior year, including a 5.2% decrease in true new automobile sales units. New homeowners sales units increased 7.1% compared to the first quarter of 2008. For the Company, as well as other personal lines property and casualty companies, new business levels have been impacted by the economy and the decreases in automobile and home sales. Annuity new business increased 49.9% compared to the first quarter of 2008, reflecting new business growth in the Company's core scheduled deposit business (on an annualized basis at the time of sale, compared to the reporting of new contract deposits which are recorded as cash is received) of 98.9% coupled with a 30.3% increase in single premium and rollover deposits, including both Horace Mann and partner company products. Growth in annuity new business has been supported by the Company's approved 403(b) payroll reduction capabilities. The Company has payroll slots in approximately one-third of the 15,500 public school districts in the United States and maintained that position through the 2008 transition to the new IRS regulations governing section 403(b) plans. Life new business decreased 12.9% compared to the prior year due in part to current economic conditions. For the first three months of 2009, total new business sales increased 28.4% compared to a year earlier. In total, dedicated agent sales for the first three months of 2009 increased 20.9% compared to the prior year. Average overall productivity per agent increased compared to the first three months of 2008 reflecting improvements from both annuity and automobile sales. Average agent productivity is measured as new sales premiums from the dedicated agent force per the average number of dedicated agents for the period.

Total voluntary automobile and homeowners premium written increased 1.3%, or \$1.6 million, in the first three months of 2009, including a \$0.7 million increase in catastrophe reinsurance premiums for 2009. The automobile and homeowners average written premium per policy each increased compared to the prior year, with the change in average premium for both lines moderated by the improved quality of the books of business. For the first three months of 2009, approved rate increases for the Company's automobile and homeowners business were minimal, similar to rate actions in the prior year. At March 31, 2009, there were 532,000 voluntary automobile and 263,000 homeowners policies in force, for a total of 795,000 policies, compared to a total of 798,000 policies at December 31, 2008 and 799,000 policies at March 31, 2008.

Based on policies in force, the voluntary automobile 6-month retention rate for new and renewal policies was 91.1% at March 31, 2009 compared to 90.8% at March 31, 2008. The property 12-month new and renewal policy retention rate was 88.8% at March 31, 2009 compared to 88.6% a year earlier.

Table of Contents

Voluntary automobile premium written increased 1.2% (\$1.1 million) compared to the first three months of 2008. This premium growth was driven by a modest increase in average premium per policy. Average earned premium per policy also increased modestly. Automobile policies in force at March 31, 2009 decreased 3,000 compared to December 31, 2008 and 2,000 compared to March 31, 2008. The number of educator policies increased throughout the periods.

Voluntary homeowners premium written increased 1.4% (\$0.5 million) compared to the first quarter of 2008 including the higher amount of catastrophe reinsurance premiums noted above. Homeowners average written premium per policy increased 3% compared to the first quarter of 2008, while average earned premium per policy increased 4% compared to a year earlier. Homeowners policies in force at March 31, 2009 were equal to December 31, 2008 and decreased 2,000 compared to a year earlier, as growth in the number of educator policies was offset by expected reductions, primarily in non-educator policies, due to the Company's risk mitigation programs, including actions in catastrophe-prone coastal areas. The Company continues to evaluate and implement actions to further mitigate its risk exposure in hurricane-prone areas. Such actions could include, but are not limited to, non-renewal of homeowners policies, restricted agent geographic placement, limitations on agent new business sales, further tightening of underwriting standards and increased utilization of third-party vendor marketing alliances.

For the three months ended March 31, 2009, the Company's results have been impacted by ongoing and recurring proceedings in North Carolina challenging private passenger automobile rates. This has required the Company to escrow premiums received pending resolution of these proceedings, adversely impacting earned premiums and pretax income by \$0.2 million for the first quarter of 2009. Based on information available at the time of this Quarterly Report on Form 10-Q, management anticipates an adverse impact of approximately \$2 million for full year 2009.

Annuity deposits received decreased 7.0% for the three months ended March 31, 2009 compared to the same period in 2008. In the first three months of 2009, scheduled annuity deposits decreased 14.6% compared to the prior year while single premium and rollover deposits increased 12.1%. In the first three months of 2009, new deposits to variable accounts decreased 26.4%, or \$9.4 million, and new deposits to fixed accounts increased 11.0%, or \$4.2 million, compared to the prior year. In addition to external contractholder deposits, annuity new deposits include contributions and transfers by the Company's employees in the Company's 401(k) group annuity contract.

The Company utilizes a nationwide network of independent agents who comprise a supplemental distribution channel for the Company's 403(b) tax-qualified annuity products. The independent agent distribution channel included 1,176 authorized agents at March 31, 2009. During the first three months of 2009, this channel generated \$10.1 million in annualized new annuity sales for the Company compared to \$5.0 million for the first quarter of 2008, reflecting increases in both single and rollover deposit business.

Table of Contents

Total annuity accumulated cash value of \$3.2 billion at March 31, 2009 decreased 9.8% compared to a year earlier, as the increase from new deposits received and favorable retention were more than offset by unfavorable financial market performance over the 12 months. At March 31, 2009, the number of annuity contracts outstanding of 175,000 increased 2.3%, or 4,000 contracts, compared to December 31, 2008 and increased 4.2%, or 7,000 contracts, compared to March 31, 2008.

Variable annuity accumulated balances were 36.5% lower at March 31, 2009 than at March 31, 2008, primarily reflecting financial market performance, and accordingly, annuity segment contract charges earned decreased 31.9%, or \$1.5 million, compared to the first three months of 2008.

Life segment premiums and contract deposits decreased slightly compared to the first three months of 2008. The ordinary life insurance in force lapse ratio was 5.5% for the 12 months ended March 31, 2009 compared to 5.7% for the 12 months ended March 31, 2008.

Net Investment Income

For the three months ended March 31, 2009, pretax investment income of \$57.9 million increased 2.3%, or \$1.3 million, (1.6%, or \$0.6 million, after tax) compared to the prior year. The increase primarily reflected growth in the size of the average investment portfolio on an amortized cost basis. Average invested assets (excluding securities lending collateral) increased 2.8% over the 12 months ended March 31, 2009. The average pretax yield on the investment portfolio was 5.46% (3.69% after tax) for the first three months of 2009, compared to pretax yields of 5.49% (3.73% after tax) a year earlier. The current period yield was adversely impacted by the elevated level of short-term investment holdings. Management anticipates reinvesting the majority of these funds in long-term bonds by June 30, 2009.

Net Realized Investment Gains and Losses

Net realized investment losses (pretax) were \$0.8 million for the first three months of 2009 compared to net realized investment losses of \$2.4 million in the prior year's first quarter. The net gains and losses in all periods were realized from recording of impairment charges and ongoing investment portfolio management activity. In addition, the first quarter of 2008 included \$1.1 million of litigation proceeds on previously impaired WorldCom, Inc. debt securities, with no similar amounts received in the current period.

In the first quarter of 2009, pretax net realized investment losses were \$0.8 million, including \$15.8 million of impairment charges. These charges were comprised of \$13.4 million of impairment write-downs, primarily below investment grade perpetual preferred stocks, and \$2.4 million of impairments on securities that the Company no longer intends to hold until the value fully recovers, primarily high-yield bonds. In addition, the Company recorded \$1.6 million of realized impairment losses on securities that were disposed of during the quarter, primarily high-yield investments. These losses were largely offset by \$16.6 million of realized gains on security sales.

Table of Contents

In the first quarter 2008, impairment write-downs of \$2.7 million were recorded, primarily related to certain below investment grade fixed maturity securities, with \$2.3 million of the write-downs attributable to 6 securities of telecommunications and telecommunications-related media issuers, which at March 31, 2008 the Company no longer intended to hold until the value fully recovered. In addition to write-downs, net realized losses in the first quarter of 2008 included \$3.9 million of realized other-than-temporary impairment losses, primarily on financial institution and below investment grade fixed maturity securities that were disposed of during the quarter. Net realized investment losses in the first three months of 2008 included gains of \$0.1 million from sales of securities for which impairment charges were recorded in 2007.

The Company, from time to time, sells invested assets subsequent to the balance sheet date that were considered temporarily impaired at the balance sheet date. Such sales are generally due to events occurring subsequent to the balance sheet date that result in a change in the Company's intent or ability to hold an invested asset. The types of events that may result in a sale include significant changes in the economic facts and circumstances related to the invested asset, significant unforeseen changes in liquidity needs, or changes in the Company's investment strategy.

There were securities priced below 80% of book value at March 31, 2009 that were not impaired. The illiquidity in the marketplace, continued concern over economic weakness, continued write-offs related to mortgage and structured securities, distressed sellers in the marketplace and spread widening for certain asset classes related to demand for increased risk premiums contributed to the decline in security valuations. With respect to fixed income securities involving securitized financial assets, the underlying collateral cash flows were stress tested to determine there was no adverse change in the expected cash flows. Management views the decrease in value of all of these securities as temporary, anticipates continued payments under the contractual terms of the securities and has the intent and ability to hold these securities until maturity or a recovery in fair value occurs.

Table of Contents

The table below presents the Company's fixed maturity securities and equity securities portfolios as of March 31, 2009 by major asset class, including the ten largest sectors of the Company's corporate bond holdings (based on fair value) and the sectors of the equity securities holdings. In the first three months of 2009, the continued uncertainty and volatility in the financial markets caused additional spread-widening for certain asset classes and interest rate volatility, which had an adverse effect on the fair value of investments. The Company's pretax net unrealized loss at March 31, 2009 was spread over numerous asset classes and commercial mortgage-backed securities, investment grade bonds and financial institution securities (both bonds and preferred stocks) were most impacted.

- (1) The All Other Corporates category contains 22 additional industry classifications. Cable, broadcasting and media, automobiles, industrial, technology and defense represented \$245.6 million of fair value at March 31, 2009, with the remaining 16 classifications each representing less than \$30 million.
- (2) Based on fair value, 75.4% of the collateralized debt obligation securities were rated investment grade by Standard and Poor's Corporation (S&P) and/or Moody's Investors Service, Inc. (Moody's) at March 31, 2009.

Table of Contents

At March 31, 2009, the Company's diversified fixed maturity securities portfolio consisted of 1,472 investment positions, issued by 1,171 entities, and totaled approximately \$3.4 billion in fair value. This portfolio was 95.4% investment grade, based on fair value, with an average quality rating of A+.

At March 31, 2009, the Company had limited exposure to subprime and Alt-A mortgage loans. The Company had three subprime securities with a fair value of \$3.3 million and an unrealized loss of \$0.1 million at March 31, 2009. The Alt-A mortgage loan exposure was comprised of five securities with a total fair value of approximately \$6.6 million, of which \$4.6 million was vintage year 2004 and prior, with an unrealized loss of approximately \$0.9 million at March 31, 2009.

At March 31, 2009, the Company had \$238.5 million fair value in commercial mortgage-backed securities (CMBS), primarily in the annuity and life portfolios, with a net unrealized loss of \$115.8 million. CMBS spreads widened slightly more during the quarter, particularly for the more recent vintages. The Company's CMBS portfolio continues to be 100% investment grade, with an overall credit rating of AA, and is well diversified by property type, geography and sponsor. Based on fair value, over 22% (13% based on amortized cost) of these holdings are comprised of multi-family housing projects that are directly backed by the Government National Mortgage Association. Another 16% (12% amortized cost) is made up of fully amortizing loans to finance military housing, where rental payments are appropriated by the U.S. government. Approximately 10% (8% amortized cost) of the CMBS portfolio is represented by cell tower revenue and timberland securitizations, which offer further diversification. The traditional conduit fusion portion of the portfolio is 49% (64% amortized cost) of the Company's CMBS holdings, with 68% (71% amortized cost) of those securities in the more seasoned 1997 through 2005 vintages. Of the remaining 2006 to 2008 vintage loans, approximately 95% (77% amortized cost) are AAA rated.

At March 31, 2009, the Company had \$237.0 million fair value in financial institution bonds and preferred stocks with a net unrealized loss of \$69.6 million. The Company's holdings in this sector are primarily large, well recognized institutions, which have been broadly supported by government intervention.

At March 31, 2009, the Company had \$617.2 million fair value invested in municipal bonds, primarily in the portfolios of the property and casualty insurance subsidiaries, with an unrealized loss of \$3.7 million. The overall credit quality of these securities was AA, with approximately 55% of the value insured at March 31, 2009. This represents approximately 9% of the Company's total investment portfolio that is guaranteed by the mono-line credit insurers. When selecting securities, the Company focuses primarily on the quality of the underlying security and does not place significant reliance on the additional insurance benefit. Excluding the effect of insurance, the credit quality of the underlying municipal bond portfolio was AA at March 31, 2009.

Table of Contents

At March 31, 2009, the fixed maturity securities and equity securities portfolio had \$427.4 million pretax of gross unrealized losses related to 832 positions. The following table provides information regarding all fixed maturity securities and equity securities that had an unrealized loss at March 31, 2009, including the length of time that the securities have continuously been in an unrealized loss position.

Table of Contents

The 329 securities with fair values below 80% of book value at March 31, 2009 represented approximately 11.6% of the Company's total investment portfolio at fair value. Approximately 27.9% of those securities have been below 80% of book value for three months or less as of March 31, 2009. Of the total securities trading below 80% of book value, 96 securities had fair values less than 50% of book value, representing 1.8% of the Company's total investment portfolio, with a pretax unrealized loss of \$143.5 million. Commercial mortgage-backed securities represented \$86.1 million of the pretax unrealized loss from securities with fair value less than 50% of book value at March 31, 2009.

The Company views the decrease in value of all of the securities with unrealized losses at March 31, 2009 which was driven largely by spread widening, market illiquidity and changes in interest rates as temporary, expects recovery in fair value in a reasonable timeframe, anticipates continued payments under the contractual terms of the securities including expected underlying cash flows, and has the intent and ability to hold these securities until maturity or a recovery in fair value occurs. Therefore, no impairment of these securities was recorded at March 31, 2009. Future changes in circumstances related to these and other securities could require subsequent recognition of other-than-temporary impairment losses. The Company's investment guidelines generally limit single corporate issuer concentrations to 1.0% of invested assets for AA or AAA rated securities, 0.75% of invested assets for A rated securities, 0.5% of invested assets for BBB rated securities, and 0.2% of invested assets for non-investment grade securities.

Effect of catastrophe costs, included above	3.3%	4.1%

(1) Shows the amounts by which the Company decreased its reserves in each of the periods indicated for claims occurring in previous periods to reflect subsequent information on such claims and changes in their projected final settlement costs.

For the three months ended March 31, 2009, the Company's benefits, claims and settlement expenses were comparable to the prior year, as a decrease in catastrophe losses, a modestly larger decrease in estimated reserves for property and casualty claims occurring in prior years, and favorable life mortality experience were more than offset by current period costs of approximately \$3 million related to consolidation of the Company's property and casualty claims offices.

For the three months ended March 31, 2009, catastrophe losses decreased compared to a year earlier; however non-catastrophe weather-related losses were greater than those in the first quarter of 2008.

The current period favorable development of prior years' property and casualty reserves of \$3.4 million was the result of actual and remaining projected losses for prior years being below the level anticipated in the December 31, 2008 loss reserve estimate, primarily the result of favorable frequency and severity trends in voluntary automobile loss and loss adjustment expense emergence for accident years 2007 and 2008.

Table of Contents

In the first three months of 2008, favorable development of prior years property and casualty reserves of \$2.7 million was the result of actual and remaining projected losses for prior years, primarily accident years 2006 and prior, being below the level anticipated in the December 31, 2007 loss reserve estimate for the voluntary automobile, homeowners and other liability lines of business. The favorable development was driven by emerging trends related to educator excess liability claim frequency, as well as favorable voluntary automobile and homeowners loss adjustment expense emergence.

For the three months ended March 31, 2009, the voluntary automobile loss ratio of 70.6% decreased by 0.6 percentage points compared to the same period a year earlier, including a 1.3 percentage point decrease due to the higher level of favorable development of prior years reserves in the current period. The homeowners loss ratio of 66.8% for the three months ended March 31, 2009 increased 0.8 percentage points compared to a year earlier, including a 2.6 percentage point decrease due to the lower level of catastrophe costs. Catastrophe costs represented 9.5 percentage points of the homeowners loss ratio for the current period compared to 12.1 percentage points for the prior year. The homeowners loss ratio reflected a moderate increase in non-catastrophe weather-related losses in 2009. In addition to the above ongoing factors, the loss ratios in 2009 included increases due to costs of consolidating the Company's claims offices. For total property and casualty, the \$3.1 million of costs represented 2.3 percentage points of the loss ratio for the three months ended March 31, 2009.

For the annuity segment, benefits in the current quarter were comparable to the prior year. The Company's guaranteed minimum death benefits (GMDB) reserve was \$1.8 million at March 31, 2009, compared to \$1.3 million at December 31, 2008 and \$0.1 million at March 31, 2008. The increases in this reserve in both the current period and 2008 reflected the impact of poor financial markets performance.

For the life segment, benefits in the current quarter decreased \$1.1 million compared to a year earlier, primarily reflecting lower mortality costs in the current period.

Interest Credited to Policyholders

	Three Months Ended March 31,		Change From Prior Year	
	2009	2008	Percent	Amount
Annuity	\$ 24.0	\$ 22.6	6.2%	\$ 1.4
Life	9.7	9.5	2.1%	0.2
Total	\$ 33.7	\$ 32.1	5.0%	\$ 1.6

Compared to the first three months of 2008, the current period increase in annuity segment interest credited reflected a 7.0% increase in average accumulated fixed deposits and a 2 basis point increase in the average annual interest rate credited to 4.29%. Life insurance interest credited increased as a result of the growth in interest-sensitive life insurance reserves.

Table of Contents

The net interest spread on fixed annuity account value on deposit measures the difference between the rate of income earned on the underlying invested assets and the rate of interest which policyholders are credited on their account values. The net interest spreads for the three months ended March 31, 2009 and 2008 were 143 basis points and 151 basis points, respectively.

As of March 31, 2009, fixed annuity account values totaled \$2.3 billion, including \$2.1 billion of deferred annuities. Of the deferred annuity account values, 21% had minimum guaranteed interest rates of 3% or lower while 69% had minimum guaranteed rates of 4.5% or greater. For \$1.7 billion of the deferred annuity account values, the credited interest rate was equal to the minimum guaranteed rate. The annuity net interest spread decreased 8 basis points compared to the first three months of 2008, primarily due to a current decrease in the Company's investment portfolio yield reflecting the adverse impact of the elevated level of short-term investments in the portfolio related to the economic environment. Management anticipates reinvesting the majority of these funds in long-term bonds by June 30, 2009.

Amortization of Policy Acquisition Expenses

Amortized policy acquisition expenses were \$23.0 million for the first three months of 2009 compared to \$21.0 million for the same period in 2008. The March 31, 2009 valuation of annuity deferred policy acquisition costs resulted in an increase in amortization of \$3.0 million, reflecting a \$2.1 million adverse impact of financial market performance and the remainder primarily due to the impact of investment gains related to this segment recognized in the three months ended March 31, 2009. Amortization increased \$2.3 million from a similar valuation at March 31, 2008. For the life segment, the March 31, 2009 valuation of deferred policy acquisition costs resulted in a \$0.1 million increase in amortization compared to no change to scheduled amortization at March 31, 2008.

Operating Expenses

For the first three months of 2009, operating expenses increased 2.6%, or \$0.9 million, compared to the prior year. The current period increase was attributable primarily to increased strategic investments in distribution initiatives. The property and casualty expense ratio of 25.3% for the first three months ended March 31, 2009 increased 0.8 percentage point compared to the prior year, reflecting the majority of the cost increase related to investments in distribution initiatives partially offset by expense decreases due to the Company's overall expense control discipline.

Amortization of Intangible Assets

Amortization of intangible assets was \$0.2 million and \$1.2 million for the three months ended March 31, 2009 and 2008, respectively. The amortization of the value of annuity business acquired in the 1989 acquisition of the Company was completed as of December 31, 2008. The remaining \$0.2 million of value of acquired insurance in force for the life segment was amortized in the first three months of 2009.

Table of Contents

Income Tax Expense

The effective income tax rate on the Company's pretax income, including net realized investment gains and losses, was 28.0% and 28.1% for the three months ended March 31, 2009 and 2008, respectively. Income from investments in tax-advantaged securities reduced the effective income tax rate 8.9 and 8.3 percentage points for the three months ended March 31, 2009 and 2008, respectively. Income from tax-advantaged securities decreased somewhat compared to the first three months of 2008.

The Company records liabilities for uncertain tax filing positions where it is more-likely-than-not that the position will not be sustainable upon audit by taxing authorities. These liabilities are reevaluated routinely and are adjusted appropriately based upon changes in facts or law. The Company has no unrecorded liabilities from uncertain tax filing positions.

At March 31, 2009, the Company had income tax returns for the 2005, 2006 and 2007 tax years still open and subject to adjustment upon examination by taxing authorities. The Company has recorded \$1.3 million of uncertain tax position liabilities including interest related to all open tax years.

Net Income

For the three months ended March 31, 2009, the Company's net income of \$13.4 million represented a decrease of \$0.9 million compared to the prior year. After-tax net realized investment gains and losses improved by \$1.0 million between periods. The current period included transition costs of approximately \$3.1 million after tax related to the Company's property and casualty claims office consolidation and distribution strategies. Catastrophe costs decreased \$0.6 million after tax; however, non-catastrophe weather-related losses increased somewhat compared to the prior year. In addition, compared to the first quarter of 2008, net income in the current period increased by \$0.4 million due to a modest increase in the level of favorable prior years' property and casualty reserve development. Including all factors, the property and casualty combined ratio was 94.6% for the first quarter of 2009 compared to 93.5% for the same period in 2008. Annuity segment net income decreased \$1.8 million compared to the first three months of 2008, as current year improvements in the interest margin were more than offset by the adverse impact of the financial markets on the level of contract charges earned, the valuation of deferred policy acquisition costs and the Company's guaranteed minimum death benefit reserve. Life segment net income increased \$0.8 million compared to a year earlier, reflecting growth in investment income and a decrease in mortality costs.

Table of Contents

Net income by segment and net income per share were as follows:

	Three Months Ended March 31,		Change From Prior Year	
	2009	2008	Percent	Amount
Analysis of net income (loss) by segment:				
Property and casualty	\$ 12.4	\$ 13.0	-4.6%	\$ (0.6)
Annuity	1.2	3.0	-60.0%	(1.8)
Life	3.4	2.6	30.8%	0.8
Corporate and other (1)	(3.6)	(4.3)	-16.3%	0.7
Net income	\$ 13.4	\$ 14.3	-6.3%	\$ (0.9)
Effect of catastrophe costs, after tax, included above	\$ (2.9)	\$ (3.5)	-17.1%	\$ 0.6
Effect of realized investment gains (losses), after tax, included above	\$ (0.6)	\$ (1.6)	-62.5%	\$ 1.0
Diluted:				
Net income per share	\$ 0.33	\$ 0.34	-2.9%	\$ (0.1)
Weighted average number of shares and equivalent shares (in millions)	40.4	42.1	-4.0%	(1.7)
Property and casualty combined ratio:				
Total	94.6%	93.5%	N.M.	1.1%
Effect of catastrophe costs, included above	3.3%	4.1%	N.M.	-0.8%

N.M. Not meaningful.

(1) The corporate and other segment includes interest expense on debt, realized investment gains and losses, certain public company expenses and other corporate level items. The Company does not allocate the impact of corporate level transactions to the insurance segments, consistent with the basis for management's evaluation of the results of those segments.

For the three months ended March 31, 2009, the changes in net income for the property and casualty, annuity and life segments are described above.

For the corporate and other segment, the current period decrease in net loss compared to the first quarter 2008 was due largely to a reduced amount of net realized investment losses compared to the first quarter of 2008.

Return on shareholders' equity based on net income was 2% and 11% for the trailing 12 months ended March 31, 2009 and 2008, respectively.

The accounting guidance adopted by the Company effective January 1, 2009 is described in Notes to Consolidated Financial Statements Note 1 Basis of Presentation Adopted Accounting Standards. The adoptions did not have a material effect on the results of operations or financial position of the Company.

Table of Contents

Outlook for 2009

At the time of this Quarterly Report on Form 10-Q, management estimates that 2009 full year net income before realized investment gains and losses will be within a range of \$1.45 to \$1.65 per diluted share. This projection anticipates, for the Company's property and casualty segment, a return to more normal catastrophe levels, a reduced level of favorable prior years' reserve development and a modest increase in underlying combined ratios; and, for the annuity segment, a return to historical market appreciation levels for 2009. As described in "Critical Accounting Policies", certain of the Company's significant accounting measurements require the use of estimates and assumptions. As additional information becomes available, adjustments may be required. Those adjustments are charged or credited to income for the period in which the adjustments are made and may impact actual results compared to management's current estimate. A projection of net income including realized investment gains and losses is not accessible on a forward-looking basis because it is not possible to provide a reliable forecast of realized investment gains and losses, which can vary substantially from one period to another and may have a significant impact on net income.

Liquidity and Financial Resources

Off-Balance Sheet Arrangements

At March 31, 2009 and 2008, the Company did not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or for other contractually narrow or limited purposes. As such, the Company is not exposed to any financing, liquidity, market or credit risk that could arise if the Company had engaged in such relationships.

Investments

Information regarding the Company's investment portfolio, which is comprised primarily of investment grade, fixed income securities, is located in "Results of Operations - Net Realized Investment Gains and Losses" and in the "Notes to Consolidated Financial Statements - Note 2 - Investments".

Cash Flow

The short-term liquidity requirements of the Company, within a 12-month operating cycle, are for the timely payment of claims and benefits to policyholders, operating expenses, interest payments and federal income taxes. Cash flow generated from operations has been, and is expected to be, adequate to meet the Company's operating cash needs in the next 12 months. Cash flow in excess of operational needs has been used to fund business growth, retire short-term debt, pay dividends to shareholders and repurchase shares of the Company's common stock. Long-term liquidity requirements, beyond one year, are principally for the payment of future insurance policy claims and benefits and retirement of long-term debt.

Table of Contents

Operating Activities

As a holding company, HMEC conducts its principal operations in the personal lines segment of the property and casualty and life insurance industries through its subsidiaries. HMEC's insurance subsidiaries generate cash flow from premium and investment income, generally well in excess of their immediate needs for policy obligations, operating expenses and other cash requirements. Cash provided by operating activities primarily reflects net cash generated by the insurance subsidiaries. For the first three months of 2009, net cash provided by operating activities was comparable to the same period in 2008.

Payment of principal and interest on debt, dividends to shareholders and parent company operating expenses are dependent upon the ability of the insurance subsidiaries to pay cash dividends or make other cash payments to HMEC, including tax payments pursuant to tax sharing agreements. Payments for share repurchase programs also have this dependency. The insurance subsidiaries are subject to various regulatory restrictions which limit the amount of annual dividends or other distributions, including loans or cash advances, available to HMEC without prior approval of the insurance regulatory authorities. Dividends which may be paid by the insurance subsidiaries to HMEC during 2009 without prior approval are approximately \$55 million, of which \$6.0 million was paid during the three months ended March 31, 2009. Although regulatory restrictions exist, dividend availability from subsidiaries has been, and is expected to be, adequate for HMEC's capital needs.

Investing Activities

HMEC's insurance subsidiaries maintain significant investments in fixed maturity securities to meet future contractual obligations to policyholders. In conjunction with its management of liquidity and other asset/liability management objectives, the Company, from time to time, will sell fixed maturity securities prior to maturity and reinvest the proceeds in other investments with different interest rates, maturities or credit characteristics. Accordingly, the Company has classified the entire fixed maturity securities and equity securities portfolios as available for sale .

Financing Activities

Financing activities include primarily payment of dividends, the receipt and withdrawal of funds by annuity contractholders, repurchases of the Company's common stock, fluctuations in bank overdraft balances, and borrowings, repayments and repurchases related to its debt facilities.

The Company's annuity business produced net positive cash flows in the first three months of 2009. For the three months ended March 31, 2009, receipts from annuity contracts decreased \$5.2 million, or 7.0%, compared to the same period in the prior year. Annuity contract benefits and withdrawals decreased \$1.9 million, or 4.1%, compared to the prior year. Cash value retentions for variable and fixed annuity options were 93.1% and 93.9%, respectively, for the 12 month period ended March 31, 2009. Net transfers to variable annuity accumulated cash values decreased \$13.5 million, or 65.9%, compared to the prior year.

Table of Contents

Capital Resources

The Company has determined the amount of capital which is needed to adequately fund and support business growth, primarily based on risk-based capital formulas including those developed by the National Association of Insurance Commissioners (NAIC). Historically, the Company's insurance subsidiaries have generated capital in excess of such needed capital. These excess amounts have been paid to HMEC through dividends. HMEC has then utilized these dividends and its access to the capital markets to service and retire long-term debt, pay dividends to its shareholders, fund growth initiatives, repurchase shares of its common stock and for other corporate purposes. Management anticipates that the Company's sources of capital will continue to generate sufficient capital to meet the needs for business growth, debt interest payments and shareholder dividends.

The total capital of the Company was \$682.3 million at March 31, 2009, including \$199.6 million of long-term debt and \$38.0 million of short-term debt outstanding. Total debt represented 27.0% of total capital excluding unrealized investment gains and losses (34.8% including unrealized investment gains and losses) at March 31, 2009, which was modestly above the Company's long-term target of 25% and within a range consistent with the Company's debt ratings assigned as of March 31, 2009.

Shareholders' equity was \$444.7 million at March 31, 2009, including a net unrealized loss in the Company's investment portfolio of \$199.0 million after taxes and the related impact on deferred policy acquisition costs associated with annuity and interest-sensitive life policies. The market value of the Company's common stock and the market value per share were \$327.8 million and \$8.37, respectively, at March 31, 2009. Book value per share was \$11.35 at March 31, 2009 (\$16.43 excluding investment fair value adjustments).

Additional information regarding the net unrealized loss in the Company's investment portfolio at March 31, 2009 is included in Results of Operations Net Realized Investment Gains and Losses .

As of March 31, 2009, the Company had outstanding \$75.0 million aggregate principal amount of 6.05% Senior Notes (Senior Notes due 2015), which will mature on June 15, 2015, issued at a discount resulting in an effective yield of 6.1%. Interest on the Senior Notes due 2015 is payable semi-annually at a rate of 6.05%. Detailed information regarding the redemption terms of the Senior Notes due 2015 is contained in the Notes to Consolidated Financial Statements Note 5 Debt of the Company's Annual Report on Form 10-K for the year ended December 31, 2008.

The Senior Notes due 2015 have an investment grade rating from S&P (BBB), Moody's (Baa3), and A.M. Best Company, Inc. (A.M. Best) (bbb-). See also Financial Ratings . The Senior Notes due 2015 are traded in the open market (HMN 6.05).

As of March 31, 2009, the Company had outstanding \$125.0 million aggregate principal amount of 6.85% Senior Notes (Senior Notes due 2016), which will mature on April 15, 2016, issued at a discount resulting in an effective yield of 6.893%. Interest on the Senior Notes due 2016 is payable semi-annually at a rate of 6.85%. Detailed information regarding the redemption terms of the Senior Notes due 2016 is contained in the Notes to Consolidated Financial Statements Note 5 Debt of the Company's Annual Report on Form 10-K for the year ended December 31, 2008.

Table of Contents

The Senior Notes due 2016 have an investment grade rating from S&P (BBB), Moody's (Baa3), and A.M. Best (bbb-). See also Financial Ratings. The Senior Notes due 2016 are traded in the open market (HMN 6.85).

As of March 31, 2009, the Company had \$38.0 million outstanding under its Bank Credit Facility. The Bank Credit Facility provides for unsecured borrowings of up to \$125.0 million and expires on December 19, 2011. Interest accrues at varying spreads relative to corporate or Eurodollar base rates and is payable monthly or quarterly depending on the applicable base rate (London Interbank Offered Rate (LIBOR) plus 0.6%, or 1.12%, at March 31, 2009). The unused portion of the Bank Credit Facility is subject to a variable commitment fee, which was 0.125% on an annual basis at March 31, 2009.

To provide additional capital management flexibility, the Company filed a universal shelf registration on Form S-3 with the SEC in November 2008. The registration statement, which registers the offer and sale by the Company from time to time of up to \$300 million of various securities, which may include debt securities, common stock, preferred stock, depositary shares, warrants and/or delayed delivery contracts, was declared effective on January 7, 2009. Unless fully utilized or withdrawn by the Company earlier, this registration statement will remain effective through January 7, 2012. No securities associated with the registration statement have been issued as of the date of this Quarterly Report on Form 10-Q.

Total shareholder dividends were \$2.1 million for the three months ended March 31, 2009. In March 2009, the Board of Directors announced regular quarterly dividends of \$0.0525 per share.

Information regarding the reinsurance program for the Company's property and casualty segment is located in Business Property and Casualty Segment Property and Casualty Reinsurance of the Company's Annual Report on Form 10-K for the year ended December 31, 2008. All components of the Company's property and casualty reinsurance program remain consistent with the Form 10-K disclosure, with the exception of the Florida Hurricane and Catastrophe Fund (FHCF) coverage. As previously disclosed, the Company's predominant insurance subsidiary for property and casualty business written in Florida reinsured 90% of hurricane losses in that state above an estimated retention of \$13.8 million up to \$77.8 million with the FHCF, based on the FHCF's financial resources. The FHCF contract is a one-year contract, effective June 1, 2008. Information received from the FHCF subsequent to the March 2, 2009 SEC filing of the Company's recent Form 10-K indicates that the retention and maximum for the 2008-2009 contract period has been revised to \$13.6 million and \$81.2 million, respectively.

Information regarding the reinsurance program for the Company's life segment is located in Business Life Segment of the Company's Annual Report on Form 10-K for the year ended December 31, 2008.

Table of Contents**Financial Ratings**

The Company's principal insurance subsidiaries are rated by S&P, Moody's and A.M. Best. These rating agencies have also assigned ratings to the Company's long-term debt securities.

Assigned ratings as of April 30, 2009 were unchanged from the disclosure in the Company's Annual Report on Form 10-K for the year ended December 31, 2008 and were as follows (the insurance financial strength ratings for the Company's property and casualty insurance subsidiaries and the Company's principal life insurance subsidiary are the same):

	Insurance Financial Strength Ratings (Outlook)	Debt Ratings (Outlook)
<u>As of April 30, 2009</u>		
S&P (1)	A (negative)	BBB (negative)
Moody's (1)	A3 (stable)	Baa3 (stable)
A.M. Best	A- (stable)	bbb- (stable)

(1) This agency has not yet rated Horace Mann Lloyds.

Market Value Risk

Market value risk, the Company's primary market risk exposure, is the risk that the Company's invested assets will decrease in value. This decrease in value may be due to (1) a change in the yields realized on the Company's assets and prevailing market yields for similar assets, (2) an unfavorable change in the liquidity of the investment, (3) an unfavorable change in the financial prospects of the issuer of the investment, or (4) a downgrade in the credit rating of the issuer of the investment. See also "Results of Operations - Net Realized Investment Gains and Losses".

Significant changes in interest rates expose the Company to the risk of experiencing losses or earning a reduced level of income based on the difference between the interest rates earned on the Company's investments and the credited interest rates on the Company's insurance liabilities. See also "Results of Operations - Interest Credited to Policyholders".

The Company seeks to manage its market value risk by coordinating the projected cash inflows of assets with the projected cash outflows of liabilities. For all its assets and liabilities, the Company seeks to maintain reasonable durations, consistent with the maximization of income without sacrificing investment quality, while providing for liquidity and diversification. The investment risk associated with variable annuity deposits and the underlying mutual funds is assumed by those contractholders, and not by the Company. Certain fees that the Company earns from variable annuity deposits are based on the market value of the funds deposited.

More detailed descriptions of the Company's exposure to market value risks and the management of those risks is presented in "Management's Discussion and Analysis of Financial Condition and Results of Operations - Market Value Risk" of the Company's Annual Report on Form 10-K for the year ended December 31, 2008.

Table of Contents**Recent Accounting Changes***FSP FAS 157-4*

In April 2009, the Financial Accounting Standards Board (FASB) issued FASB Staff Position (FSP) No. Statement of Financial Accounting Standards (SFAS or FAS) 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly . This FSP provides additional guidance for estimating fair value in accordance with FASB SFAS No. 157, Fair Value Measurements , when the volume and level of activity for the asset or liability have significantly decreased and also includes guidance on identifying circumstances that indicate a transaction is not orderly. Under FSP FAS No. 157-4, if there has been a significant decrease in the volume and level of activity for the asset or the liability in relation to the normal market activity for the asset or liability (or similar assets or liabilities), then transactions or quoted prices may not accurately reflect fair value. In addition, if there is evidence that the transaction for the asset or liability is not orderly, little weight, if any, should be placed on that transaction price as an indicator of fair value. FSP FAS No. 157-4 is effective for periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. Management elected not to adopt this FSP early and is currently assessing its potential effect on the results of operations and financial position of the Company.

FSP FAS 115-2 and FAS 124-2

In April 2009, the FASB issued FSP No. FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairments . This FSP amends the other-than-temporary impairment guidance for debt securities to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities. The FSP separates an other-than-temporary impairment of a debt security into two components when there are credit related losses associated with the impaired debt security for which management asserts that it does not have the intent to sell the security, and it is more likely than not that it will not be required to sell the security before recovery of its cost basis. The amount of the total other-than-temporary impairment related to other factors is recognized in other comprehensive income, net of applicable taxes. FSP FAS No. 115-2 and FAS 124-2 is effective for periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. Management elected not to adopt this FSP early and is currently assessing its potential effect on the results of operations and financial position of the Company.

FSP FAS 107-1 and APB 28-1

In April 2009, the FASB issued FSP No. FAS 107-1 and Accounting Principle Board (APB) 28-1, Interim Disclosures about Fair Value of Financial Instruments . This FSP requires disclosures about the fair value of its financial instruments whenever it issues summarized financial information for interim reporting periods. FSP FAS No. 107-1 and APB 28-1 are effective for periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. Because the requirements of this FSP relate only to financial statement disclosures, its adoption will not have an effect on the results of operations or financial position of the Company.

Table of Contents

FSP FAS 132(R)-1

In December 2008, the FASB amended Statement of Financial Accounting Standards (SFAS or FAS) No. 132 (revised 2003), Employers Disclosures about Pensions and Other Postretirement Benefits , through issuance of FASB Staff Position (FSP) FAS 132(R)-1, Employers Disclosures about Postretirement Benefit Plan Assets . For fiscal years ending after December 15, 2009, the FSP requires employers to disclose additional information about investment allocation decisions, major categories of plan assets and fair value techniques and inputs used to measure plan assets. Because the requirements of this FSP relate only to financial statement disclosures, its adoption will not have an effect on the results of operations or financial position of the Company.

SFAS No. 162

In May 2008, the FASB issued SFAS No. 162, The Hierarchy of Generally Accepted Accounting Principles . SFAS No. 162 will be effective 60 days following the Securities and Exchange Commission s approval of the Public Company Accounting Oversight Board s related amendments to remove the generally accepted accounting principles in the United States (GAAP) hierarchy from auditing standards. SFAS No. 162 identifies the sources of accounting principles and the framework for selecting the principals used in the preparation of financial statements of nongovernmental entities that are presented in conformity with GAAP. Management believes the adoption of this pronouncement will not have a material effect on the results of operations or financial position of the Company.

Other Matters

Ariel Capital Management, LLC, HMEC's largest shareholder with 12.0% of the common shares outstanding per their SEC filing on Schedule 13G as of December 31, 2008, is the investment adviser for two of the mutual funds under the Company's variable annuity contracts.

Item 3: Quantitative and Qualitative Disclosures About Market Risk

The information required by Item 305 of Regulation S-K is contained in Management's Discussion and Analysis of Financial Condition and Results of Operations Market Value Risk contained in this Quarterly Report on Form 10-Q.

Table of Contents

Item 4: Controls and Procedures

Management's Conclusion Regarding the Effectiveness of Disclosure Controls and Procedures

Under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, the Company conducted an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures, as such term is defined in Rule 13a-15(e) of the Securities Exchange Act of 1934 as amended (the Exchange Act), as of March 31, 2009 pursuant to Rule 13a-15(b) of the Exchange Act. Based on this evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective in timely alerting them to material information relating to the Company (including its consolidated subsidiaries) that is required to be included in the Company's periodic Securities and Exchange Commission filings. No significant deficiencies or material weaknesses in the Company's disclosure controls and procedures were identified in the evaluation and therefore, no corrective actions were taken. There were no significant changes in the Company's internal controls or in other factors that could significantly affect these controls subsequent to the date of their evaluation.

Changes in Internal Control Over Financial Reporting

There were no changes in the Company's internal control over financial reporting that occurred during the Company's last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II: OTHER INFORMATION

Item 1A: Risk Factors

At the time of this Quarterly Report on Form 10-Q, management believes there are no material changes from the risk factors as previously disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2008.

Item 4: Submission of Matters to a Vote of Security Holders

None.

Item 5: Other Information

The Company is not aware of any information required to be disclosed in a report on Form 8-K during the three months ended March 31, 2009 which has not been filed with the SEC.

Table of Contents**Item 6: Exhibits**

The following items are filed as Exhibits. Management contracts and compensatory plans are indicated by an asterisk (*).
