Our Offer For CF Industries

Fundamentals of Growth

17

Our Offer for CF

We are determined to acquire CF, creating significant value for both CF and Agrium stockholders

Our \$40 in cash plus one share (\$89.22) offer for CF is a 50% premium to their unaffected stock price, adjusting for net cash, well above precedent transactions since credit crisis

Cash or stock election provides opportunity to receive 24% ownership in Agrium's broader, more balanced portfolio of products and reinvest significant cash portion

Our bid provides far superior value for CF stockholders compared with any alternative articulated by CF, including remaining independent or paying a premium for Terra

Fundamentals of Growth

18

Significant Turnover in CF's Stockholder
Base by Long-Term Investors

Long-term CF stockholders are sending a clear message to CF about their perspectives on fundamental value

During Q1 2009, 14 of CF's top 15 stockholders (excluding Agrium) as at December 31, 2008 reduced their positions significantly

Excluding index funds and hedge funds, CF's long term stockholders sold 81% of their holdings in CF

Similar trend apparent for top 25 and top 50 stockholders

Estimated CF Unaffected Stock Price of
Approximately \$65.00

(1)

Based on peer group of Mosaic, Potash Corp, Intrepid Potash, Israel Chemicals, K+S, and Yara as
at May 29.

(2)

CF net cash on Balance Sheet as of Dec 31 was \$12.38 per fully diluted share. CF's net cash on
Balance Sheet as of Mar 31 was \$16.64 per fully diluted share.

CF had \$12.38 per share in net cash on
hand at December 31, and a further \$4.79
invested in working capital versus average
levels

For simplicity our illustrative analysis
assumes the market gave credit for most
of the working capital and could therefore
predict
the
\$16.64
of
net
cash
(2)

This cash is worth no more today
than it was in January

The peer group price increase of 59%
since January 15th is representative of an
increase in the market's perception of the
value of fertilizer operating assets

Gives full credit to peer group
increase, which is partially
attributable to speculation over
sector consolidation

Growing CF's operating asset value per
share by 59% and adding back net cash
per share results in an implied unaffected

Conclusion

We are determined to acquire CF

We have raised our offer twice, to a current cash-adjusted premium of 50%

Our bid provides far superior value for CF stockholders compared with any alternative articulated by CF

Current offer is best and final price absent engagement by CF and demonstration of additional value

CF stockholders must send an unambiguous message to
CF Board by tendering their shares into our offer

CF 'Owned' EBITDA

(5)

CF's reliance on short-lived peak 2008 nitrogen and phosphate prices for current and future valuations is unrealistic and irrelevant

Current nitrogen and phosphate prices are NOT at the bottom of the cycle

Industry forecasts show nutrient pricing flat-to-down over next couple years

A return to cyclical commodity lows as seen pre-2004 would yield substantially lower EBITDA for CF
