Commission File Number

KNIGHT CAPITAL GROUP, INC.

(Exact name of registrant as specified in its charter)

DELAWARE

(State or other jurisdiction of incorporation or organization)

22-3689303

(I.R.S. Employer Identification Number)

545 Washington Boulevard, Jersey City, NJ 07310

Edgar Filing: KNIGHT CAPITAL GROUP, INC. - Form 10-Q

(Address of principal executive offices and zip code)

Registrant's telephone number, including area code: (201) 222-9400

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☐ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☒ Accelerated filer ☐

Non-accelerated filer (Do not check if a smaller reporting company) ☐ Smaller reporting company ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act) Yes ☐ No ☒

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date:

As of May 7, 2010 the number of shares outstanding of the Registrant's Class A Common Stock was 94,507,242 and there were no shares outstanding of the Registrant's Class B Common Stock.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. Organization and Description of the Business

Knight Capital Group, Inc. (collectively with its subsidiaries, the Company) has three operating segments, (i) Equities, (ii) Fixed Income, Currencies and Commodities (FICC) and (iii) Corporate. As of March 31, 2010, the Company's operating segments comprised the following:

Equities

Knight Equity Markets, L.P. (KEM) primarily operates as a market maker in over-the-counter (OTC) equity securities, primarily those traded in the Nasdaq Stock Market and on the OTC Bulletin Board. KEM also operates the Company's primary domestic institutional sales business and offers soft dollar and commission recapture services. KEM is a broker-dealer registered with the U.S. Securities and Exchange Commission (SEC) and is a member of the Nasdaq Stock Exchange (Nasdaq), the New York Stock Exchange (NYSE), Financial Industry Regulatory Authority (FINRA), the International Securities Exchange, LLC (ISE), the National Stock Exchange (NSX), the Chicago Board Options Exchange (CBOE), the National Futures Association (NFA), Nasdaq OMX, Nasdaq OMX BX and the Municipal Securities Rulemaking Board (MSRB).

Knight Capital Markets LLC (KCM) primarily operates as a market maker in the over-the-counter market for NYSE, NYSE Amex Equities and NYSE Arca listed securities. KCM is a broker-dealer registered with the SEC and is a member of Nasdaq and FINRA.

Knight Capital Europe Limited (KCEL), is a U.K. registered broker-dealer that provides trade execution services for institutional and broker-dealer clients in U.S., European and Asian equities. KCEL also offers trade execution services for institutional clients in U.S., European and Asian fixed income and foreign exchange products. KCEL is authorized and regulated by the U.K. Financial Services Authority (FSA) and is a member of the London Stock Exchange, Deutsche Börse AG, Euronext N.V. (incorporating Euronext Amsterdam, Euronext Brussels, Euronext Lisbon and Euronext Paris), Borsa Italiana, Nasdaq OMX (incorporating the Copenhagen Stock Exchange, Helsinki Stock Exchange and Stockholm Stock Exchange), Oslo Børs, SIX Swiss Exchange, Wiener Börse, Chi-X Europe Limited, Turquoise, Plus Markets, Equiduct, BATS Europe, Nasdaq OMX Europe, Nyfix Euromillennium, NYSE Arca and NYSE Smartpool.

Knight Capital Asia Limited LLC (KCAL) offers trade execution services in Asian, U.S. and European equities to institutional clients worldwide. KCAL is a broker-dealer registered as an exchange participant with the Hong Kong Stock Exchange and is regulated by the Hong Kong Securities and Futures Commission (SFC).

Knight Direct LLC (Knight Direct) provides institutions with direct market access trading through Knight DirectTM, an advanced electronic platform. Knight Direct offers a suite of algorithms that allow buy- and sell-side clients to more effectively source liquidity and manage the trading process as well as maintain anonymity, reduce market impact and lower transaction costs. Knight Direct is a broker-dealer registered with the SEC and is a member of Nasdaq, FINRA and the NFA. Knight Direct's European business is operated out of KCEL.

Table of Contents

KNIGHT CAPITAL GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued

(Unaudited)

Knight Clearing Services LLC (KCS) is a broker-dealer that has been established to provide settlement and clearance services for the Company's broker-dealer subsidiaries. KCS is registered with the SEC and is a member of FINRA, Depository Trust Company, the National Securities Clearing Corporation and a registered clearing member of NYSE, Nasdaq, ISE, NSX, CBOE Stock Exchange, Nasdaq OMX, Nasdaq OMX BX and BATS.

FICC

Knight Libertas Holdings LLC and its affiliates, (collectively, Knight Fixed Income or KFI) provide trade execution services and investment research across a broad range of fixed income securities, including high-yield and high-grade corporate bonds, distressed debt, asset- and mortgage-backed securities, federal agency securities, convertible bonds, hybrid securities, syndicated bank loans and emerging markets. KFI also offers capital markets services to corporate issuers and private companies. One KFI subsidiary is a broker-dealer registered with the SEC and is a member of FINRA and MSRB. KFI's European business is operated out of KCEL.

Hotspot Holdings FX, Inc. and its subsidiaries (Hotspot) provide institutions and dealers with spot foreign exchange, gold and silver executions through an advanced, fully electronic platform. Hotspot's European business is operated out of KCEL and is regulated by the FSA.

Knight BondPoint, Inc. (Knight BondPoint) provides electronic access and trade execution services for the retail fixed income market. Knight BondPoint is a broker-dealer registered with the SEC and is a member of FINRA and MSRB.

Corporate

The Corporate segment invests in strategic financial services-oriented opportunities, allocates, deploys and monitors all capital, and maintains all corporate overhead expenses and all other expenses that are not attributable to the Equities and FICC segments. Corporate overhead expenses consist of compensation for senior executives and other employees of the corporate holding company, expenses from legal and other professional services relating to corporate matters as well as directors' fees and directors' and officers' insurance.

Discontinued Operations

The Company's former Asset Management segment comprised Deephaven Capital Management LLC and its subsidiaries (collectively, Deephaven), which was formerly the registered investment adviser to, and sponsor of, the Deephaven investment funds (the Deephaven Funds). During the first quarter of 2009, Deephaven completed the sale of substantially all of its assets to Stark & Roth, Inc. (together with its affiliates, Stark) with Stark agreeing to assume certain limited liabilities of Deephaven. As of that date, Deephaven was replaced by Stark as the investment manager, managing member and general partner for the Deephaven Funds and the Company exited the Asset Management business. As a result of this sale, the Company's Asset Management segment was classified as a discontinued operation.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued

(Unaudited)

2. Significant Accounting Policies

Basis of consolidation and form of presentation

The accompanying unaudited Consolidated Financial Statements, prepared in conformity with accounting principles generally accepted in the United States of America (GAAP), should be read in conjunction with the audited Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2009. These unaudited Consolidated Financial Statements reflect all adjustments that are, in the opinion of management, necessary for a fair statement of the results for the interim periods presented. All such adjustments are of a normal recurring nature. Certain footnote disclosures normally included in financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to SEC rules and regulations, although the Company believes that the disclosures herein are adequate to make the information presented not misleading. All significant intercompany transactions and balances have been eliminated. Interim period operating results may not be indicative of the operating results for a full year.

The Company consolidates all of its wholly-owned subsidiaries as well as any investment in which it is considered to be the primary beneficiary of a variable interest entity (VIE). The Company periodically performs a qualitative assessment to determine if a VIE should be consolidated. The primary attributes the Company assesses include the entity's capital structure and voting power. The Company will consolidate a VIE if it has both i) the power to direct the activities of a VIE that most significantly impact the entity's economic performance and ii) the obligation to absorb losses of the entity that could potentially be significant to the VIE or the right to receive benefits from the entity that could potentially be significant to the VIE.

Certain reclassifications have been made to the prior periods' Consolidated Financial Statements in order to conform to the current period presentation. Such reclassifications had no effect on previously reported Net income.

Cash and cash equivalents

Cash and cash equivalents include money market accounts, which are payable on demand, and short-term investments with an original maturity of less than 90 days. The carrying amount of such cash equivalents approximates their fair value due to the short-term nature of these instruments.

Market-making, trading and sales activities

Financial instruments owned and Financial instruments sold, not yet purchased, which primarily consist of listed and OTC equity securities, are carried at fair value and are recorded on a trade date basis. Net trading revenue (trading gains, net of trading losses) and commissions (which includes commission equivalents earned on institutional client orders) and related expenses are also recorded on a trade date basis. The Company's third party clearing agreements call for payment or receipt of interest income, net of transaction-related interest charged by clearing brokers, for facilitating the settlement and financing of securities transactions. Such interest expense, which has been netted against interest income on the Consolidated Statements of Operations, was \$1.8 million and \$1.5 million for the three months ended March 31, 2010 and 2009, respectively.

Table of Contents

KNIGHT CAPITAL GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued

(Unaudited)

Dividend income relating to securities owned and dividend expense relating to securities sold, not yet purchased, derived from the Company's market-making activities are included as a component of Net trading revenue on the Consolidated Statements of Operations. Net trading revenue includes dividend income of \$6.5 million and \$5.4 million for the three months ended March 31, 2010 and 2009, respectively. Net trading revenue also includes dividend expense of \$5.0 million and \$3.8 million for the three months ended March 31, 2010 and 2009, respectively.

Payments for order flow represent payments to broker-dealer clients, in the normal course of business, for directing their order flow in U.S. equities to the Company.

Securities borrowed and securities loaned

Securities borrowed and securities loaned transactions are accounted for as collateralized financing transactions and are recorded at the amount of cash and value of other collateral advanced or received which approximates fair value. Securities borrowed transactions facilitate the settlement process and require the Company to deposit cash or other collateral with the lender. Securities loaned transactions help finance the Company's securities inventory and require the Company to lend stock in exchange for the receipt of cash or other collateral from the borrower. In these transactions, the Company receives or lends cash or other collateral in an amount generally in excess of the market value of the applicable securities borrowed and loaned. The Company monitors the market value of securities borrowed or loaned on a daily basis, with additional collateral obtained or refunded as necessary.

Estimated fair value of financial instruments

The Company values its financial instruments using a hierarchy of fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs when measuring fair value.

The fair value hierarchy can be summarized as follows:

Level 1 Valuations based on quoted prices in active markets for identical assets or liabilities that the Company has the ability to access. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these products does not entail a significant degree of judgment.

Level 2 Valuations based on quoted prices in markets that are not active or for which all significant inputs are observable, either directly or indirectly.

Level 3 Valuations based on inputs that are unobservable and significant to the overall fair value measurement. Changes in fair value are recognized in earnings each period for financial instruments that are carried at fair value.

The Company's securities owned and securities sold, not yet purchased will generally be classified within Level 1 of the fair value hierarchy because they are valued using quoted market prices or broker or dealer quotations with reasonable levels of price transparency.

Table of Contents

KNIGHT CAPITAL GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued

(Unaudited)

The types of instruments that trade in markets that are not considered to be active, but are valued based on quoted market prices, broker or dealer quotations, or alternative pricing sources with reasonable levels of price transparency are generally classified within Level 2 of the fair value hierarchy.

As discussed in Footnote 7 Long-Term Debt, the Company entered into purchased call options and recorded an embedded conversion derivative concurrent with its issuance of long-term debt. The fair value of these options and derivative are determined using an option pricing model based on observable inputs such as implied volatility of the Company's common stock, risk-free interest rate, and other factors and, as such, are classified within Level 2 of the fair value hierarchy.

As of March 31, 2010, the Company's investment in the Deephaven Funds, the purchased call options, the embedded conversion derivative and deferred compensation investments met the definition of Level 2.

Certain instruments are classified within Level 3 of the fair value hierarchy because they trade infrequently and therefore have little or no price transparency. For those instruments that are not traded in active markets or are subject to transfer restrictions, valuations are adjusted to reflect illiquidity and/or non-transferability, and such adjustments are generally based on available market evidence. In the absence of such evidence, management's best estimate is used. As of March 31, 2010 and December 31, 2009, the Company did not hold any financial instruments that met the definition of Level 3.

There were no transfers of assets and liabilities between any levels for all periods presented.

Investments

Investments comprise strategic investments, investment in the Deephaven Funds and deferred compensation investments. Strategic investments include noncontrolling equity ownership interests and debt instruments held by the Company within its non-broker-dealer subsidiaries, primarily in financial services-related businesses. Strategic investments are accounted for under the equity method, at cost or at fair value. The equity method of accounting is used for investments in limited partnerships and limited liability companies that are held by the Company or any of its non-broker-dealer subsidiaries. Strategic investments in corporations by such non-broker-dealers are held at amortized cost. The equity method of accounting is used where the Company is considered to exert significant influence on the investee. Strategic investments are held at cost, less impairment if any, when the Company is not considered to exert significant influence on the investee. Investments in liquid investment funds, including deferred compensation investments in mutual funds, and the investment in the Deephaven Funds are accounted for at fair value.

Strategic investments are reviewed on an ongoing basis to ensure that the carrying values of the investments have not been impaired. If the Company determines that an impairment loss on a strategic investment has occurred due to a decline in fair value or other market conditions, the investment is written down to its estimated net realizable value.

The Company has several deferred compensation plan investments related to certain employees and directors. These plans provide a return to the participants based upon the performance of various

Table of Contents

KNIGHT CAPITAL GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued

(Unaudited)

investments. In order to hedge its liability under these plans, the Company generally acquires the underlying investments and holds such investments until the deferred compensation liabilities are satisfied. Changes in value of such investments are recorded in Investment loss and other, net, with a corresponding charge or credit to Employee compensation and benefits on the Consolidated Statements of Operations.

Goodwill and intangible assets

The Company tests goodwill and intangible assets with an indefinite useful life for impairment annually or when an event occurs or circumstances change that signify the existence of impairment. The Company amortizes other intangible assets on a straight line basis over their useful lives and tests for recoverability whenever events indicate that the carrying amounts may not be recoverable.

Treasury stock

The Company records its purchases of treasury stock at cost as a separate component of stockholders' equity. The Company obtains treasury stock through purchases in the open market or through privately negotiated transactions. The Company may re-issue treasury stock, at average cost, related to the acquisition of new businesses or, in certain instances, as inducement grants to new hires.

Foreign currencies

As a result of changes in the currencies in which the Company's foreign subsidiaries earn the majority of their revenues, effective January 1, 2010, the Company changed the functional currency of KCEL to the Pound Sterling from the U.S. dollar and KCAL to the Hong Kong dollar from the U.S. dollar. These changes were reflected prospectively and resulted in recording a \$2.4 million cumulative translation adjustment gain which is included in Accumulated other comprehensive loss, a \$0.9 million reduction in Fixed assets and leasehold improvements and a \$3.3 million reduction in Retained earnings on the Consolidated Statements of Financial Condition. For all other entities, the Company's functional currency is the U.S. dollar.

Assets and liabilities of foreign subsidiaries having non-U.S. dollar functional currencies are translated at exchange rates at the end of a period. Revenues and expenses are translated at average exchange rates during the period. Gains and losses resulting from translating foreign currency financial statements into U.S. dollars are included in other comprehensive income (loss) (see Footnote 8 - Comprehensive Income). Gains or losses resulting from foreign currency transactions are included in Investment loss and other, net on the Company's Consolidated Statements of Operations. For the three months ended March 31, 2010, a loss of \$436,000 was recorded in Investment loss and other, net on the Consolidated Statements of Operations and a loss of \$4.3 million was recorded as other comprehensive income (loss).

Soft dollar and commission recapture expense

Under a commission management program, the Company allows institutional clients to allocate a portion of their gross commissions to pay for research and other services provided by third parties. As the Company acts as an agent in these transactions, it records such expenses on a net basis within Commissions and fees on the Consolidated Statements of Operations.

Table of Contents

KNIGHT CAPITAL GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued

(Unaudited)

Depreciation, amortization and occupancy

Fixed assets are depreciated on a straight-line basis over their estimated useful lives of three to seven years. Leasehold improvements are being amortized on a straight-line basis over the shorter of the life of the related office lease or the expected useful life of the assets. The Company capitalizes certain costs associated with the acquisition or development of internal-use software and amortizes the cost over the software's estimated useful life of three years, commencing at the time the software is placed in service.

The Company recognizes rent expense under operating leases with fixed rent escalations, lease incentives and free rent periods on a straight-line basis over the lease term beginning on the date the Company takes possession of or controls the use of the space, including during free rent periods.

Lease loss

The Company's policy is to identify excess real estate capacity and where applicable, accrue for related future costs, net of estimated sublease income. In determining the accrual, a nominal cash flow analysis is performed for lease losses initiated prior to December 31, 2002 and costs related to the excess capacity are accrued. For lease losses initiated after December 31, 2002, the Company's policy is to accrue future costs related to excess capacity using a discounted cash flow analysis.

In the event the Company is able to sublease the excess real estate after recording a lease loss, such accrual is adjusted to the extent the actual terms of subleased property differ from the assumptions used in the calculation of the accrual. In the event that the Company concludes that previously determined excess real estate is needed for the Company's use, such lease loss accrual will be adjusted accordingly. Any such adjustments to previous lease loss accruals are recorded in Writedown of assets and lease loss accrual (benefit), net on the Consolidated Statements of Operations.

Income taxes

The Company records deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the financial reporting and tax bases of assets and liabilities and measures them using the enacted tax rates and laws that will be in effect when such differences are expected to reverse. The Company evaluates the recoverability of future tax deductions by assessing the adequacy of future expected taxable income from all sources, including reversal of temporary differences and forecasted operating earnings. Net deferred tax assets and liabilities are included in Other assets and Accrued expenses and other liabilities, respectively, on the Consolidated Statements of Financial Condition.

Discontinued operations

Revenues and expenses associated with a separate segment or reporting unit that has been disposed of through closure or sale are included in Loss from discontinued operations, net of tax on the Consolidated Statements of Operations. Assets and liabilities of discontinued operations are included in Other assets and Accrued expenses and other liabilities, respectively, on the Consolidated Statements of Financial Condition. Cash flows from discontinued operations are presented on the Consolidated Statements of Cash Flows within operating, investing and financing activities, as applicable, for all periods.

KNIGHT CAPITAL GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued

(Unaudited)

Stock-based compensation

Stock-based compensation is measured based on the grant date fair value of the awards. These costs are amortized over the requisite service period, which is typically the vesting period.

Expected forfeitures are considered in determining stock-based employee compensation expense. For all periods presented, the Company recorded a benefit for expected forfeitures on all outstanding stock-based awards. The benefit recorded did not have a material impact on the results of operations in any of the periods presented.

The Company applies a non-substantive vesting period approach for stock-based awards whereby the expense is accelerated for those employees and directors that receive options and restricted stock units (RSUs) and are eligible to retire prior to the options or RSUs vesting.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates.

Subsequent Events

The Company evaluated all activities through the filing date of this Form 10-Q.

Accounting Standards Updates

Effective January 1, 2010, the Company adopted two Accounting Standards Updates (ASU), which were issued by the Financial Accounting Standards Board (FASB). The first ASU requires a reporting entity to disclose separately the amounts of transfers in and out of Level 1 and Level 2 fair value measurements and describe the reasons for the transfers. This ASU also clarifies existing disclosure requirements related to how assets and liabilities should be grouped by class and valuation techniques used for recurring and nonrecurring fair value measurements.

The second ASU relates to the accounting for VIEs. This ASU significantly changed the criteria by which an enterprise determines whether or not it must consolidate a VIE. Under the new guidance, consolidation of a VIE requires both the power to direct the activities that most significantly impact the VIE's economic performance and the obligation to absorb losses of the VIE that could potentially be significant to the VIE or the right to receive benefits of the VIE that could potentially be significant to the VIE.

The adoption of these ASUs had no impact on the Company's Consolidated Financial Statements other than enhanced disclosures where required.

Table of Contents**KNIGHT CAPITAL GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued****(Unaudited)****3. Financial Instruments**

The Company's financial instruments recorded at fair value have been categorized based upon a fair value hierarchy, as described more fully in Footnote 2 Significant Accounting Policies. The following fair value hierarchy table presents information about the Company's financial assets and liabilities measured at fair value on a recurring basis (in millions):

March 31, 2010	Assets and Liabilities Measured at Fair Value on a Recurring Basis			
	Level 1	Level 2	Level 3	Total

Totals may not add due to rounding.

5. Investments

Included in the \$84.9 million of Investments at March 31, 2010 is \$63.6 million of strategic investments, \$6.8 million of investment in the Deephaven Funds and \$14.4 million of deferred compensation investments related to employee and director deferred compensation plans. Strategic investments of \$63.6 million at March 31, 2010 consisted of \$56.1 million in ten limited liability companies, limited partnership investments and a corporation accounted for under the equity method, \$0.3 million of investments in common stock of two private companies

Edgar Filing: KNIGHT CAPITAL GROUP, INC. - Form 10-Q

representing less than 20% equity ownership which are held at adjusted cost, and \$7.3 million in four debt instruments, which are held at adjusted cost. Included in the \$56.1 million investment in limited liability companies at March 31, 2010 is a \$43.1 million equity investment in Direct Edge.

Included in the \$118.6 million of Investments at December 31, 2009 is \$65.2 million of strategic investments, \$8.5 million of investments in Deephaven funds and \$45.0 million of deferred compensation investments related to employee and director deferred compensation plans. Strategic investments of \$65.2 million at December 31, 2009 consisted of \$57.4 million in ten limited liability

companies, limited partnership investments and a corporation accounted for under the equity method, \$0.3 million of investments in common stock of two private companies representing less than 20% equity ownership which are held at adjusted cost, and \$7.5 million in five debt instruments, which are held at adjusted cost. Included in the \$57.4 million investment in limited liability companies at December 31, 2009 is a \$41.3 million equity investment in Direct Edge.

See Footnote 2 Significant Accounting Policies for a discussion of valuation of Investments.

6. Goodwill and Intangible Assets

Goodwill and intangible assets with indefinite useful lives are tested for impairment annually or when an event occurs or circumstances change that signify the existence of impairment. As part of the test for impairment, the Company considers the profitability of the respective segment or reporting unit, an assessment of the fair value of the respective segment or reporting unit as well as the overall market value of the Company compared to its net book value. In June 2009, the Company tested for the impairment of goodwill and intangible assets with indefinite lives.

Amortizable intangibles are tested for recoverability whenever events indicate that the carrying amounts may not be recoverable. During the second quarter of 2009, the Company discontinued the use of the Donaldson trade name and wrote off the remaining book value of \$2.4 million. No other events occurred during the three months ended March 31, 2010 and 2009 that would indicate that the carrying amounts of the Company's goodwill or intangible assets may not be recoverable.

Goodwill of \$114.7 million at both March 31, 2010 and December 31, 2009 relates to the Equities segment. Goodwill of \$150.8 million at both March 31, 2010 and December 31, 2009 relates to the FICC segment. At March 31, 2010 Goodwill included \$1.0 million in the Corporate segment related to the purchase of a noncontrolling interest in one of its majority owned subsidiaries. Goodwill primarily represents the Company's purchases of the businesses now operating as KCM, Knight Direct, Hotspot, Donaldson, Knight BondPoint and KFI.

The Company had intangible assets, net of accumulated amortization, of \$28.4 million and \$28.6 million at March 31, 2010 and December 31, 2009, respectively, related to the Equities segment. The Company had intangible assets, net of accumulated amortization, of \$47.8 million and \$49.3 million at March 31, 2010 and December 31, 2009, respectively, related to the FICC segment. Total Intangible assets decreased by \$1.6 million during the three months ended March 31, 2010 primarily due to amortization expense offset by the purchase of a newly acquired customer list in the Equities segment. Intangible assets primarily represent client relationships and are amortized over their remaining useful lives, the majority of which have been determined to range from 4 to 24 years. The weighted average remaining life of the Company's intangible assets at March 31, 2010 and December 31, 2009 is approximately 11 years.

The Company recorded amortization expense, related to its intangible assets of \$2.6 million and \$2.8 million, for the three months ended March 31, 2010 and 2009, respectively. The estimated amortization expense relating to the intangible assets for each of the next five years approximates \$8.0 million for the remainder of 2010, \$10.5 million in 2011, \$10.2 million in 2012, \$8.7 million in 2013 and \$7.5 million in 2014.

Table of Contents**KNIGHT CAPITAL GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued****(Unaudited)**

The chart below summarizes the Company's Goodwill and Intangible assets, net of accumulated amortization, as of March 31, 2010 and December 31, 2009 (in millions):

- (2) - Trade names relate to the acquisitions of Hotspot, EdgeTrade and Libertas. The weighted average remaining life is approximately 16 years as of March 31, 2010 and December 31, 2009. During 2009, the Donaldson trade name with an unamortized cost of \$2.4 million was written off.
 - (3) - Other includes technology, non-compete agreements and domain name rights acquired by the Company. The weighted average remaining life is approximately five years as of March 31, 2010 and December 31, 2009.
- Totals may not add due to rounding.

7. Long-Term Debt

In March 2010, the Company issued \$375.0 million of Cash Convertible Senior Subordinated Notes (the Notes) due on March 15, 2015 in a private offering exempt from registration under the Securities Act of 1933, as amended. At the same time, the Company entered into hedge transactions effected through the purchase of options and sale of warrants designed to limit shareholder dilution up to a price of \$31.50 per share.

The Notes bear interest at a rate of 3.50% per year, payable semi-annually in arrears, on March 15 and September 15 of each year, commencing on September 15, 2010 and will mature on March 15, 2015, subject to earlier repurchase or conversion. In connection with the issuance of the Notes, the Company recognized an original issue discount of \$73.8 million which will be accreted to interest expense over the term of the Notes, resulting in an effective interest rate of the Notes of approximately 7.9%. The Notes, net of original issue discount are reported as Long-term debt in the Company's Consolidated Statements of Financial Condition. As of March 31, 2010 the net balance was \$301.7 million.

Prior to December 15, 2014, the Notes will be convertible into cash only upon specified events which are based upon the price of the Company's common shares and of the Notes or upon the occurrence of specified corporate events. On or after December 15, 2014, the Notes will be convertible at any time, based on an initial conversion rate of 47.9185 shares of Knight common stock per \$1,000 principal amount of Notes, which is equivalent to an initial conversion price of approximately \$20.87 or a conversion premium of approximately 32.5% over the closing sale price of \$15.75 per share of Knight common stock on the Nasdaq Global Select Market on March 15, 2010. The conversion rate and conversion price will be subject to adjustment in certain events, such as distributions of dividends or stock splits. Upon cash conversion, Knight will deliver an amount of cash calculated over the applicable observation period. Knight will not deliver its common stock (or any other securities) upon conversion under any circumstances. In addition, following certain corporate events that occur prior to the maturity date, the Company will pay a cash make-whole premium by increasing the conversion rate for a holder who elects to convert its Notes in connection with such a corporate event in certain circumstances. Subject to certain exceptions, holders may require the Company to repurchase, for cash, all or part of the Notes upon a fundamental change at a price equal to 100% of the principal amount of the Notes being repurchased plus any accrued and unpaid interest.

Concurrent with the sale of the Notes, the Company paid \$73.7 million to enter into privately negotiated cash convertible note hedge transactions (the purchased call options) with affiliates of the initial purchasers of the Notes and another financial institution (the option counterparties) that are expected generally to reduce Knight's exposure to potential cash payments in excess of the principal amount of the Notes that may be required to be made by Knight upon the cash conversion of the

Table of Contents

KNIGHT CAPITAL GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued

(Unaudited)

Notes. The purchased call options cover, subject to adjustments, approximately 18 million shares of our Class A common stock at a strike price of \$20.87 and are expected to reduce the Company's economic exposure to potential cash payments in the event that the market price per share of our Class A common stock is greater than the conversion price of the Notes. The purchased call options were recorded as an asset within Financial instruments owned, at fair value on the Consolidated Statements of Financial Condition and are accounted for as derivative instruments under GAAP. As of March 31, 2010, the fair value of the purchased call options was \$68.6 million.

In connection with the sale of the Notes, the Company also entered into separate warrant transactions with the option counterparties whereby the Company sold to the option counterparties, for \$15.0 million, warrants (the "warrants") to purchase shares of the Company's Class A common stock, subject to adjustments, at a strike price of \$31.50 per share, which represents a premium of approximately 100% over the closing price of Knight common stock on March 15, 2010. The warrants are net share settled, meaning that the Company will issue a number of shares per warrant having a value equal to the difference between the share price at each warrant expiration date and the strike price; however, at the discretion of the Company, Knight may elect to settle the warrants in cash. If the market price per share of the Company's Class A common stock exceeds the strike price of the warrants over the warrants' exercise period and the Company elects net share settlement, the warrants would have a dilutive effect on the Company's Class A common stock. The warrants may not be exercised prior to the maturity of the Notes. The warrants have been recorded as Additional paid-in capital in the Consolidated Statements of Financial Condition. The warrants also meet the criteria of derivative instruments under GAAP; however, because the warrants are indexed to the Company's Class A common stock and are recorded within Equity in the Consolidated Statements of Financial Condition, the warrants are exempt from the scope and fair value provisions of GAAP related to accounting for derivative instruments.

The requirement that the Company settle conversions of the Notes entirely in cash gives rise to a bifurcatable derivative instrument under GAAP (the "embedded conversion derivative"). The initial valuation of the embedded conversion derivative was \$73.8 million, and was recorded as a liability within Financial instruments sold, not yet purchased, at fair value on the Consolidated Statements of Financial Condition. As of March 31, 2010, the fair value of the embedded conversion derivative was \$68.6 million.

Both the purchased call options and the embedded conversion derivative are derivative instruments and as such are marked to fair value each reporting period with any change recognized on the Consolidated Statements of Operations as Investment loss and other, net. The Company expects the gain or loss associated with changes to the valuation of the purchased call options to substantially offset the gain or loss associated with changes to the valuation of the embedded conversion derivative.

In connection with the issuance of the Notes, the Company incurred issuance costs of \$8.5 million. The issuance costs are recorded within Other assets in the Consolidated Statements of Financial Condition and are amortized over the term of the Notes. For the three months ended March 31, 2010, the Company recognized \$71,000 of amortization of the debt issuance costs and \$1.1 million of interest expense related to the Notes, both of which are included in Interest expense on the Consolidated Statements of Operations.

Table of Contents**KNIGHT CAPITAL GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued****(Unaudited)**

Concurrent with the Notes offering, the Company repaid the amounts outstanding under the \$140.0 million credit agreement originally entered into on October 9, 2007. Approximately \$0.5 million and \$1.0 million of interest expense relating to the credit agreement was recorded for the three months ended March 31, 2010 and 2009, respectively.

8. Comprehensive Income

Comprehensive income includes net income and changes in equity except those resulting from investments by, or distributions to, stockholders. Comprehensive income is as follows (in millions):

	For the three months ended March 31,	
	2010	2009
Net Income	\$ 27.8	\$ 9.4
Other comprehensive income (loss):		
Currency translation adjustment	(4.3)	-
Comprehensive income	\$ 23.5	\$ 9.4

9. Stock-Based Compensation

The Company has established the Knight Capital Group, Inc. 1998 Long Term Incentive Plan, the Knight Capital Group, Inc. 1998 Nonemployee Director Stock Option Plan, the Knight Capital Group, Inc. 2003 Equity Incentive Plan, the Knight Capital Group, Inc. 2006 Equity Incentive Plan (the 2006 Plan) and the Knight Capital Group, Inc. 2009 Inducement Award Plan (the Inducement Plan) (collectively, the Stock Plans). The purpose of the Stock Plans is to provide long-term incentive compensation to employees and directors of the Company. The Stock Plans are administered by the Compensation Committee of the Company's Board of Directors, and allow for the grant of options, stock appreciation rights (2006 Plan and Inducement Plan only), restricted stock and restricted stock units (collectively, the awards), as defined by the Stock Plans. In addition to overall limitations on the aggregate number of awards that may be awarded under the Stock Plans, the Stock Plans (except for the Inducement Plan) limit the number of awards that may be granted to a single individual as well as limit the amount of options, stock appreciation rights (2006 Plan only) or shares of restricted stock or restricted stock units that may be awarded. As of March 31, 2010, the Company has not issued any stock appreciation rights.

Restricted Shares and Restricted Stock Units

Eligible employees and directors may receive restricted shares and/or restricted stock units (collectively restricted awards) as a portion of their total compensation. The substantial majority of restricted awards generally vest ratably over three years. During 2009, the Company established the Inducement Plan with 1.5 million authorized shares and granted 378,000 restricted shares as inducement awards to new employees pursuant to this plan. During the three months ended March 31, 2010, the Company issued 197,000 restricted shares as inducement awards. These shares were issued out of treasury and vest ratably over three years. The fair value of the inducement awards are measured in the same manner as other restricted awards. The Company has also issued restricted awards that vest based upon the market price of Knight's common stock reaching a certain price for a specified period of time (Market Shares). The Company has the right to fully vest employees and

Table of Contents**KNIGHT CAPITAL GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued****(Unaudited)**

directors in their restricted stock units upon retirement and in certain other circumstances. Restricted awards are otherwise canceled if employment is terminated before the end of the relevant vesting period.

The Company measures compensation cost related to restricted awards other than Market Shares based on the fair value of the Company's common stock at the date of grant, which the Stock Plans define as the average of the high and low sales price on the business day prior to the grant date. The Company determines compensation cost for Market Shares based upon the fair value of such awards at date of grant and projected median vesting periods, both of which are based on statistical simulation models. The principal assumptions utilized in valuing Market Shares and determining their median vesting periods include: 1) risk-free interest rate estimate is based on the yield of U.S. zero coupon securities with a maturity equal to the expected life of the award; 2) expected volatility estimate is based on several factors including implied volatility of market-traded options on the Company's common stock on the grant date and the historical volatility of the Company's common stock; and 3) maximum life based upon the maximum contractual life of the award. Based upon the results of this model, the weighted-average fair value and median vesting period of Market Shares granted in the first quarter of 2009 were \$9.65 per share and 1.7 years, respectively. The principal assumptions used in valuing Market Shares issued in the first quarter of 2009 were a risk-free interest rate of 2.6%, expected volatility of 40% and maximum life of four years. There were no Market Shares granted in 2010.

The Company recorded compensation expense from continuing operations of \$11.8 million and \$11.1 million for the three months ended March 31, 2010 and 2009, respectively relating to restricted awards, the majority of which has been included in Employee compensation and benefits on the Consolidated Statements of Operations. The total income tax benefit recognized on the Consolidated Statements of Operations related to restricted awards was \$4.7 million and \$4.4 million for the three months ended March 31, 2010 and 2009, respectively.

The following table summarizes restricted awards activity during the three months ended March 31, 2010 (shares and units in thousands):

	Restricted Shares		Restricted Stock Units	
		Weighted-Average		Weighted-Average
	Number of Shares	Grant date Fair Value	Number of Units	Grant date Fair Value
Outstanding at January 1, 2010	2,186.5	\$ 16.92	3,590.7	\$ 15.60
Granted	381.3	15.75	2,587.8	15.85
Vested	(895.9)	17.24	(677.5)	18.37
Forfeited	(78.3)	15.70	(30.7)	17.18
Outstanding at March 31, 2010	1,593.5	\$ 16.53	5,470.4	\$ 15.37

Totals may not add due to rounding.

There is \$75.6 million of unamortized compensation related to the unvested restricted awards outstanding at March 31, 2010. The cost of these unvested restricted awards is expected to be recognized over a weighted average life of 2.0 years.

Table of Contents**KNIGHT CAPITAL GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued****(Unaudited)***Stock Options*

The Company's policy is to grant options for the purchase of shares of Class A Common Stock at not less than market value, which the Stock Plans define as the average of the high and low sales price on the business day prior to the grant date. Options generally vest ratably over a three or four-year period and expire on the fifth or tenth anniversary of the grant date, pursuant to the terms of the applicable option award agreement. The Company has the right to fully vest employees and directors in their stock options upon retirement and in certain other circumstances. Stock options are otherwise canceled if employment is terminated before the end of the relevant vesting period. The Company's policy is to issue new shares upon share option exercises by its employees and directors.

The fair value of each option granted is estimated as of its respective grant date using the Black-Scholes option-pricing model. Stock options granted have exercise prices equal to the market value of the Company's common stock at the date of grant as defined by the Stock Plans. The principal assumptions utilized in valuing options and the methodology for estimating such model inputs include: 1) risk-free interest rate estimate is based on the yield of U.S. zero coupon securities with a maturity equal to the expected life of the option; 2) expected volatility estimate is based on several factors including implied volatility of market-traded options on the Company's common stock on the grant date and the historical volatility of the Company's common stock; and 3) expected option life estimate is based on internal studies of historical experience and projected exercise behavior based on different employee groups and specific option characteristics, including the effect of employee terminations. During the three months ended March 31, 2010, the Company granted 1.2 million options to employees. Based on the results of the model, the weighted-average fair value of the stock options granted during the three months ended March 31, 2010 and 2009 was \$4.93 and \$5.38 per option, respectively.

The Company recorded compensation expense of \$1.1 million and \$0.9 million, for the three months ended March 31, 2010 and 2009, respectively, relating to stock options, all of which was recorded in Employee compensation and benefits on the Consolidated Statements of Operations. The total income tax benefit recognized on the Consolidated Statements of Operations related to stock options was \$0.5 million and \$0.4 million, for the three months ended March 31, 2010 and 2009, respectively.

The following table summarizes stock option activity during the three months ended March 31, 2010 (stock options in thousands):

	Number of Stock Options	Weighted- Average Exercise Price
Outstanding at January 1, 2010	3,554.0	\$ 13.29
Granted at market value	1,185.1	15.89
Exercised	(42.4)	10.46
Forfeited or expired	(236.0)	16.53
Outstanding at March 31, 2010	4,460.7	\$ 13.84
Vested at March 31, 2010	4,442.9	\$ 13.83
Available for future grants at March 31, 2010*	3,153.6	

Totals may not add due to rounding.

* Represents both options and awards available for grant

Table of Contents**KNIGHT CAPITAL GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued****(Unaudited)**

There is \$5.0 million of unrecognized compensation related to unvested stock options outstanding at March 31, 2010. The cost of these unvested awards is expected to be recognized over a weighted average life of 2.5 years.

10. Income Taxes

The Company and its subsidiaries file a consolidated federal income tax return as well as combined state income tax returns in certain jurisdictions. In other jurisdictions, the Company files separate company income tax returns.

The following table reconciles the U.S. federal statutory income tax rate to the Company's actual income tax rate from continuing operations:

	For the three months ended March 31,	
	2010	2009
U.S. federal statutory income tax rate	35.0%	35.0%
U.S. state and local income taxes, net of U.S. federal income tax effect	4.2%	6.3%
Nondeductible charges and other, net	-0.4%	0.1%
Actual income tax rate	38.8%	41.4%

At March 31, 2010, the Company had \$0.6 million of unrecognized tax benefits, all of which would affect the Company's effective tax rate if recognized.

As of March 31, 2010, the Company is subject to U.S. Federal income tax examinations for the tax years 2006 through 2008, and to non-U.S. income tax examinations for the tax years 2006 through 2008. In addition, the Company is subject to state and local income tax examinations in various jurisdictions for the tax years 2003 through 2008. The final outcome of these examinations is not yet determinable. However, the Company anticipates that adjustments to the unrecognized tax benefits, if any, will not result in a material change to the results of operations or financial condition.

It is the Company's policy to record interest and penalties associated with tax audits as a component of Income from continuing operations before income taxes. Penalties are recorded in Other expenses and interest paid or received is recorded in Interest expense or Interest, net, respectively, on the Consolidated Statements of Operations.

11. Discontinued Operations

In the first quarter of 2009, Deephaven completed the sale of substantially all of its assets to Stark & Roth, Inc. (together with its affiliates,

Stark) with Stark agreeing to assume certain limited liabilities of Deephaven. As of that date, Deephaven was replaced by Stark as the investment manager, managing member and general partner for the Deephaven Funds and the Company exited the Asset Management business. As a result of this sale, the Company's Asset Management segment was classified as a discontinued operation.

Table of Contents**KNIGHT CAPITAL GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued****(Unaudited)**

Revenues related to the discontinued operations for the three months ended March 31, 2010 and 2009 were \$0.1 million and \$3.2 million, respectively. Loss from the discontinued operations, net of tax for the three months ended March 31, 2010 and 2009 were \$0.3 million and \$20.5 million, respectively.

At March 31, 2010 and December 31, 2009, assets related to discontinued operations which are recorded in Other assets on the Consolidated Statements of Financial Condition were \$12.6 million and \$14.0 million, respectively. At March 31, 2010 and December 31, 2009, liabilities related to discontinued operations which are recorded in Accrued expenses and other liabilities on the Consolidated Statements of Financial Condition were \$14.0 million and \$15.3 million, respectively.

12. Earnings Per Share

Basic earnings per common share (EPS) has been calculated by dividing net income by the weighted average shares of Class A Common Stock outstanding during each respective period. Diluted EPS reflects the potential reduction in EPS using the treasury stock method to reflect the impact of common stock equivalents if stock options were exercised and restricted awards were to vest.

The following is a reconciliation of the numerators and denominators of the basic and diluted earnings per share computations for the three months ended March 31, 2010 and 2009 (in millions, except per share data):

	For the three months ended March 31, 2010		For the three months ended March 31, 2009	
	Numerator / net income	Denominator / shares	Numerator / net income	Denominator / shares
Income and shares used in basic calculations	\$ 27.8	89.5	\$ 9.4	86.9
Effect of dilutive stock based awards	-	4.0	-	4.4
Income and shares used in diluted calculations	\$ 27.8	93.5	\$ 9.4	91.3
Basic earnings per share		\$ 0.31		\$ 0.11
Diluted earnings per share		\$ 0.30		\$ 0.10

The above calculations exclude options that could potentially dilute EPS in the future but were antidilutive for the periods presented. The number of such options excluded was approximately 2.0 million and 1.2 million for the three months ended March 31, 2010 and 2009, respectively.

13. Significant Clients

The Company considers significant clients to be those clients who account for 10% or more of the total U.S. equity dollar value traded or fixed income notional value traded by the Company. No clients accounted for more than 10% of the Company's U.S. equity dollar value traded or fixed income notional value traded during the three months ended March 31, 2010 and 2009.

Table of Contents**KNIGHT CAPITAL GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued**

(Unaudited)

14. Commitments and Contingent Liabilities

In the ordinary course of business, the nature of the Company's business subjects it to claims, lawsuits, regulatory examinations and other proceedings. The Company is subject to several of these matters at the present time. The results of these matters cannot be predicted with certainty, and the Company cannot estimate a possible range of loss for these matters at this time. There can be no assurance that these matters will not have a material adverse effect on the Company's results of operations in any future period and a material judgment could have a material adverse impact on the Company's financial condition and results of operations. However, it is the opinion of management, after consultation with legal counsel that, based on information currently available, the ultimate outcome of these matters will not have a material adverse impact on the business, financial condition or operating results of the Company although they might be material to the operating results for any particular period, depending, in part, upon operating results for that period.

The Company leases office space under noncancelable operating leases. Certain office leases contain fixed dollar-based escalation clauses. Rental expense from continuing operations under the office leases was \$4.2 million and \$2.9 million for the three months ended March 31, 2010 and 2009, respectively, and is included in Occupancy and equipment rentals on the Consolidated Statements of Operations.

The Company leases certain computer and other equipment under noncancelable operating leases and has entered into guaranteed employment contracts with certain of its employees. As of March 31, 2010, future minimum rental commitments under all noncancelable office, computer and equipment leases (Gross Lease Obligations), Sublease Income and guaranteed employment contracts longer than one year (Other Obligations) were as follows (in millions):

Lease & Contract Obligations

	Gross Lease Obligations	Sublease Income	Net Lease Obligations	Other Obligations
Nine months ending December 31, 2010	\$ 13.0	\$ 0.9	\$ 12.1	\$ 26.4
Year ending December 31, 2011	22.1	1.2	20.9	26.6
Year ending December 31, 2012	22.7	1.4	21.4	4.8
Year ending December 31, 2013	21.1	1.4	19.7	-
Year ending December 31, 2014	20.3	1.4	18.9	-
Thereafter through August 31, 2023	141.0	4.4	136.6	-
	\$ 240.2	\$ 10.7	\$ 229.6	\$ 57.8

During the normal course of business, the Company collateralizes certain leases or other contractual obligations through letters of credit or segregated funds held in escrow accounts. As of March 31, 2010, the Company has provided a letter of credit for \$3.2 million, collateralized by U.S. Treasury Bills, as a guarantee for one of the Company's lease obligations. Knight Capital Group, Inc. also has provided, and may provide in the future, in the ordinary course of business unsecured guarantees to guarantee the payment obligations of certain of its trading subsidiaries and leases.

Table of Contents

KNIGHT CAPITAL GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued

(Unaudited)

During the normal course of business, the Company may enter into certain futures contracts. These financial instruments are subject to varying degrees of risks whereby the fair value of the securities underlying the financial instruments, may be in excess of, or less than, the contract amount. The Company is obligated to post collateral against certain futures contracts. As of March 31, 2010 and December 31, 2009, the Company was a party to futures contracts having a notional value of \$54.6 million and \$225.5 million, respectively. The fair value of \$771,000 and \$421,000 are recorded in Payable to brokers and dealers on the Consolidated Statements of Financial Condition, net of cash collateral, with realized and unrealized gains and losses recognized in Net trading revenue on the Consolidated Statements of Operations at March 31, 2010 and December 31, 2009, respectively.

The Company receives financial instruments as collateral in connection with securities borrowed. Such financial instruments generally consist of equity and convertible securities but may include obligations of the U.S. government, federal agencies, sovereignties and corporations. In most cases, the Company is permitted to deliver or repledge these financial instruments in connection with securities lending and other secured financings and meeting settlement requirements. As of March 31, 2010, the fair value of financial instruments received as collateral by the Company that it was permitted to deliver or repledge was \$769.3 million, of which \$465.0 million had been delivered or repledged, all of which could be repledged by the receiving counterparty. As of December 31, 2009, the fair value of financial instruments received as collateral by the Company that it was permitted to deliver or repledge was \$349.1 million, of which \$314.7 million had been delivered or repledged, all of which could be repledged by the receiving counterparty. The Company also pledges assets that it owns to counterparties who, in turn, are permitted to deliver or repledge them. Financial instruments pledged to counterparties that have the right to deliver or repledge them were \$189.8 million at March 31, 2010 and are included in Financial instruments owned, at fair value. Financial instruments pledged to counterparties that have the right to deliver or repledge them were \$212.5 million at December 31, 2009 and are included in Financial instruments owned, at fair value.

15. Business Segments

Due to the general growth and evolution of the business, effective the fourth quarter of 2009, the Company separated the former Global Markets segment into two operating segments: i) Equities and ii) FICC. This breakout is consistent with the organizational structure of the business. As a result of this change in segment reporting, the Company now has three operating segments within its continuing operations: Equities, FICC and Corporate. Effective March 31, 2009, the Company's former Asset Management segment was classified as a discontinued operation.

Table of Contents**KNIGHT CAPITAL GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS Continued****(Unaudited)**

The Equities segment includes equities market-making and electronic and voice institutional sales and trading in global equities, futures and options. In the course of market-making and trading, Equities provides capital facilitation as well as a range of complementary services. The Equities segment also offers equity capital markets services. The FICC segment includes global research, voice sales and trading in fixed income as well as electronic trading in fixed income and foreign exchange. Fixed income research generates analytical reports containing recommendations across a wide range of securities and sectors. FICC also offers debt capital markets services. The Corporate segment invests in strategic financial services-oriented opportunities, allocates, deploys and monitors all capital, and maintains all corporate overhead expenses and all other expenses that are not attributable to the Equities and FICC segments. The Company's revenues, income (loss) from continuing operations before income taxes (Pre-tax earnings) and total assets by segment are summarized below (in millions):

	Equities	FICC	Corporate	Consolidated Total
<i>For the three months ended March 31, 2010:</i>				
Revenues ⁽¹⁾	\$ 219.4	\$ 67.8	\$ (2.9)	\$ 284.2
Pre-tax earnings	56.6	8.1	(18.7)	46.0
Total assets ⁽²⁾	3,030.9	310.8	363.9	3,705.6
<i>For the three months ended March 31, 2009:</i>				
Revenues	\$ 198.2	\$ 52.0	\$ (4.9)	\$ 245.4
Pre-tax earnings	59.0	10.2	(18.1)	51.0
Total assets ⁽²⁾	1,979.5	229.7	52.6	2,261.8

Totals may not add due to roundings.

- (1) Included in FICC revenues for the three months ended March 31, 2010 are fees of \$2.9 million resulting from the Company acting as joint lead manager in its Note offering (see Footnote 7 Long-Term Debt). An offsetting elimination is included in Corporate revenues to eliminate this fee for consolidation purposes.
- (2) Total assets do not include Assets within discontinued operations of \$12.6 million and \$58.7 million at March 31, 2010 and 2009, respectively.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion of our results of operations should be read in conjunction with our consolidated financial statements and notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2009 as filed with the U.S. Securities and Exchange Commission (SEC). This discussion contains forward-looking statements that involve risks and uncertainties, including those discussed in our Form 10-K. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of certain factors, including, but not limited to, those set forth elsewhere in this document and in our Form 10-K.

Certain statements contained in this Quarterly Report on Form 10-Q, including, without limitation, those under Management's Discussion and Analysis of Financial Condition and Results of Operations herein (MD&A), Quantitative and Qualitative Disclosures About Market Risk in Part I, Item 3, Legal Proceedings in Part II, Item 1, Risk Factors in Part II, Item 1A and the documents incorporated by reference, may constitute forward-looking statements. These forward-looking statements are not historical facts, and are based on current expectations, estimates and projections about the Company's industry, management's beliefs and certain assumptions made by management, many of which, by their nature, are inherently uncertain and beyond our control. Accordingly, readers are cautioned that any such forward-looking statements are not guarantees of future performance and are subject to certain risks, uncertainties and assumptions that are difficult to predict including, without limitation, risks associated with changes in market structure, legislative or regulatory rule changes, the costs, integration, performance and operation of the businesses recently acquired or developed organically, or that may be acquired in the future, by the Company, and risks related to the costs and expenses associated with the Company's exit from the Asset Management business. Since such statements involve risks and uncertainties, the actual results and performance of the Company may turn out to be materially different from the results expressed or implied by such forward-looking statements. Given these uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements. Unless otherwise required by law, the Company also disclaims any obligation to update its view of any such risks or uncertainties or to announce publicly the result of any revisions to the forward looking statements made in this report. Readers should carefully review the risks and uncertainties disclosed in the Company's reports with the SEC including, without limitation, those detailed under Certain Factors Affecting Results of Operations within MD&A herein and under Risk Factors herein and in the Company's Annual Report on Form 10-K for the year ended December 31, 2009, and in other reports or documents the Company files with, or furnishes to, the SEC from time to time. This discussion should be read in conjunction with the Company's Consolidated Financial Statements and the Notes thereto contained in this Form 10-Q, and in other reports or documents the Company files with, or furnishes to, the SEC from time to time.

Executive Overview

We are a financial services firm that provides market access and trade execution services across multiple asset classes for buy-side and sell-side clients. We seek to continually apply our expertise and innovation to the trade execution process to build lasting client relationships through consistent performance and superior client service. We also offer capital markets services to corporate issuers and private companies. We have three operating segments within our continuing operations, Equities, Fixed Income, Currencies and Commodities (FICC) and Corporate.

Equities Our Equities segment includes equity market-making, and electronic and voice institutional sales and trading in global equities, futures and options. In the course of market-making and trading, we provide capital facilitation and a range of complementary services. Within our Equities segment, we also offer equity capital markets services.

Table of Contents

FICC Our FICC segment includes global research, voice sales and trading in fixed income, as well as electronic trading in fixed income and foreign exchange. Fixed income research generates analytical reports containing recommendations across a wide range of securities and sectors. Within our FICC segment, we also offer debt capital markets services.

Corporate Our Corporate segment invests in strategic financial services-oriented opportunities, allocates, deploys and monitors all capital, and maintains all corporate overhead expenses and all other expenses that are not attributable to the Equities and FICC segments. Corporate overhead expenses consist of compensation for senior executives and other employees of the corporate holding company, expenses from legal and other professional services relating to corporate matters as well as directors' fees and directors' and officers' insurance. Results of our Corporate segment includes income from investments in funds formerly managed by Deephaven Capital Management.

The following table sets forth: (i) Revenues, (ii) Expenses and (iii) Pre-tax earnings from continuing operations of our segments and on a consolidated basis (in millions):

	For the three months ended	
	March 31, 2010	March 31, 2009
Equities		
Revenues	\$ 219.4	\$ 198.2
Expenses	162.8	139.2
Pre-tax earnings	56.6	59.0
FICC		
Revenues	67.8	52.0
Expenses	59.7	41.9
Pre-tax earnings	8.1	10.2
Corporate		
Revenues	(2.9)	(4.9)
Expenses	15.8	13.2
Pre-tax (loss)	(18.7)	(18.1)
Consolidated		
Revenues	284.2	245.4
Expenses	238.3	194.3
Pre-tax earnings	\$ 46.0	\$ 51.0

Totals may not add due to rounding.

Consolidated Revenues for the three months ended March 31, 2010 increased \$38.9 million, or 15.8%, from the same period a year ago, while Consolidated Expenses increased \$44.0 million, or 22.6%. Consolidated Pre-tax earnings from continuing operations for the three months ended March 31, 2010 decreased \$5.1 million, or 9.9%, from the same period a year ago.

The changes in our Pre-tax earnings (loss) from continuing operations by segment from the three months ended March 31, 2009 to the three months ended March 31, 2010 are summarized as follows:

Edgar Filing: KNIGHT CAPITAL GROUP, INC. - Form 10-Q

Equities Our Pre-tax earnings from Equities for the three months ended March 31, 2010 decreased by \$2.4 million, or 4.1%, from the comparable period in 2009. The decrease is primarily due to increased transaction costs principally driven by higher share volume, lower revenue capture, increased regulatory transaction fees and additional costs in 2010

Table of Contents

associated with increased compensation due to additional headcount and our investments in businesses and infrastructure, both domestically and internationally. These factors were partially offset by higher equity volumes.

FICC Our Pre-tax earnings from FICC for the three months ended March 31, 2010 decreased by \$2.1 million, or 20.3%, from the comparable period in 2009. The decrease is primarily due to additional compensation cost and higher headcount from Knight Fixed Income (KFI) offset, in part, by higher volumes and earnings from our Hotspot business.

Corporate Our Pre-tax loss from our Corporate segment for the three months ended March 31, 2010 increased by \$0.6 million from the comparable period in 2009, primarily due to higher interest expense related to our Cash Convertible Senior Subordinated Notes (Notes), the elimination of \$2.9 million of revenue within FICC related to the Notes offering and legal and consulting fees relating to new business initiatives offset, in part, by an increase in the returns from our corporate investment as a limited partner or non-managing member in the Deeplaven Funds.

Certain Factors Affecting Results of Operations

We may experience significant variation in our future results of operations. These fluctuations may result from numerous factors. These factors include, among other things, market conditions and the resulting volatility and credit and counterparty risks that may result; introductions of, or enhancements to, trade execution services by us or our competitors; the value of our securities positions and other financial instruments and our ability to manage the risks attendant thereto; the volume of our trade execution activities; the dollar value of securities and other instruments traded; the composition and profile of our order flow; our market share with institutional and broker-dealer clients; the performance and size of, and volatility in, our quantitative market-making and program trading portfolios; the performance of our high velocity algorithmic principal trading models; the performance of our international operations; costs associated with our international expansion and domestic growth; our ability to manage personnel, compensation, overhead and other expenses, including our occupancy expenses under our office leases and expenses and charges relating to legal and regulatory proceedings; the strength of our client relationships; changes in payments for order flow, changes to execution quality and changes in clearing, execution and regulatory transaction costs; the addition or loss of executive management, sales, electronic and voice trading and technology professionals; legislative, legal and regulatory changes; legal and regulatory matters or proceedings; geopolitical risk; the amount, timing and cost to build out our self-clearing initiative and other capital expenditures, acquisitions and divestitures; the integration, performance and operation of acquired businesses; the incurrence of costs associated with acquisitions and dispositions; investor sentiment; technological changes and events; seasonality; competition; and market and economic conditions.

Such factors may also have an impact on our ability to achieve our strategic objectives, including, without limitation, increases in our market share, growth and profitability in our Equities and FICC segments. If demand for our services declines due to any of the above factors, and we are unable to adjust our cost structure on a timely basis, our operating results could be materially and adversely affected. As a result of the foregoing factors, period-to-period comparisons of our revenues and operating results are not necessarily meaningful and such comparisons cannot be relied upon as indicators of future performance. There also can be no assurance that we will be able to continue the rates of revenue growth that we have experienced in the past or that we will be able to improve our operating results.

Table of Contents

Trends

Global Economic Trends

Our businesses are affected by many factors in the global financial markets and worldwide economic conditions. These factors include the growth level of gross domestic product in the U.S., Europe and Asia, and the existence of transparent, efficient and liquid equity and debt markets and the level of trading volumes.

Global economic conditions generally improved during the quarter ended March 31, 2010. Volatility levels across fixed income and equity markets declined and credit spreads tightened during the quarter. Despite the slight improvements in economic conditions, there are still concerns about the outlook for global growth, inflation and declining asset values.

Trends Affecting Our Company

We believe that our businesses are affected by the aforementioned global economic trends as well as more specific trends. Some of the specific trends that impact our operations, financial condition and results of operations are:

Broker-dealer clients continue to focus on statistics measuring the quality of equity executions (including speed of execution and price improvement). In an effort to improve the quality of their executions as well as increase efficiencies, market makers have increased the level of automation within their operations and the extent of price improvement. The greater focus on execution quality has resulted in greater competition in the marketplace, which, along with market structure changes and market conditions, has negatively impacted the revenue capture metrics of the Company and other market-making firms.

Equity and FICC transaction volumes executed by broker-dealers have fluctuated over the past few years due to retail and institutional investor sentiment, market conditions and a variety of other factors, resulting in a shift of product mix. Equities and FICC transaction volumes may not be sustainable and are not predictable.

Over the past several years several exchanges have entered into joint ventures with broker-dealers to create their own alternative trading systems (ATS) and electronic communication networks (ECN) and compete within the OTC and listed trading venues. In addition, there are many new entrants into the market, including ATS, Multilateral Trading Facilities, dark liquidity pools, high frequency trading firms, and market-making firms competing for retail and institutional order flow. Further, many broker-dealers are offering their own internal crossing networks. These factors continue to create further fragmentation and competition in the marketplace.

Market structure changes, competition and market conditions have triggered an industry shift toward market makers charging explicit commissions or commission equivalents to institutional clients for executions in OTC securities. For the majority of our institutional client orders, we charge explicit fees in the form of commissions or commission equivalents. Institutional commission rates have fallen in the past few years due to competitive forces and increased electronic trading, and may continue to fall in the future.

Market structure changes, competition and technology advancements have also led to a dramatic increase in electronic message traffic. These increases in message traffic place heavy strains on the technology resources, bandwidth and capacities of market participants.

Table of Contents

Due to regulatory scrutiny over the past several years relating to equity sell-side research and the continued focus by investors on execution quality and overall transaction costs, more institutional clients allocate commissions to broker-dealers based on the quality of executions. In the past, a good deal of institutional equity commissions were allocated to broker-dealers in exchange for either research or soft dollar and commission recapture programs.

There has been continued scrutiny of the capital markets industry by the regulatory and legislative authorities, both in the U.S. and abroad. New legislation or new or modified regulations and rules could occur in the future and could materially impact the Company's revenues and profitability. Members of the U.S. Congress have raised various concerns about the regulatory structure of the U.S. capital markets and have asked the SEC to take a close look at the regulatory structure and make the changes necessary to insure the rule framework governing the U.S. capital markets is comprehensive and complete. The SEC has stated that it will carefully review, and propose rules where necessary, regarding a variety of marketplace trading issues including, but not limited to: high frequency trading, indications of interest, various forms of off-exchange trading, dark liquidity pools, internalization, post-trade attribution, co-location, and sponsored access. In addition, the SEC recently filed proposed rules dealing with flash orders, indications of interest, ATS thresholds, and other market-related rules which have not been finalized and are currently subject to public comment as follows:

On January 14, 2010, the SEC published a Concept Release in which it sought public comments on a broad range of equity-related market structure issues. The SEC intends to use the public's comments to help determine whether regulatory initiatives to improve the current equity market structure are needed and, if so, the specific nature of such initiatives.

On February 26, 2010, the SEC issued a final rule amending Regulation SHO. These amendments impose restrictions on, among other things, the prices at which securities may be sold short under certain conditions. As presently constructed, the short sale proposals will make it more difficult for market makers to sell stock short under certain conditions. The effective date for the new amendments is May 10, 2010, and the compliance date is November 10, 2010.

On April 1, 2010, The Committee of European Securities Regulators (CESR) published a call for evidence on micro-structural issues of the European equity markets. This call for evidence is intended to assess the impact of some of the latest developments in European equity markets and may also inform aspects of the current MiFID review. Specifically, CESR seeks information on high frequency trading, sponsored access, co-location services, fee structures, tick size regimes, and indications of interest. Any legislative or regulatory action, including, but not limited to, new laws, rules or regulations in these or other areas could, depending on their form and scope, adversely impact trading volumes and profitability.

There continues to be growth in equity electronic trading, as evidenced by increased volumes in direct market access platforms, algorithmic and program trading, high frequency trading and ECNs and dark liquidity pools. In addition, electronic trading continues to expand to other asset classes, including options, currencies and fixed income. The expansion of electronic trading may result in the growth of innovative electronic products and competition for order flow.

The macro-economic environment and market conditions have had an adverse impact on the profitability of the institutional customer base, resulting in volatile earnings and decreased volumes.

Table of Contents

There have been increased volumes in lower-priced stocks, driven by the decline in overall stock prices. As market volume, in general, is not predictable, an increase in retail volume in stocks with lower share prices may decrease the profit potential of trading these shares, while, at the same time, increase trade- or share-based transaction costs, thus lowering overall profitability.

Income Statement Items

The following section briefly describes the key components of, and drivers to, our significant revenues and expenses.

Revenues

Our revenues consist principally of Commissions and fees and Net trading revenue from our Equities and FICC segments.

Revenues on transactions for which we charge explicit commissions or commission equivalents, which include the majority of our institutional client orders, are included within Commissions and fees. Commissions and fees are primarily affected by changes in our equity, fixed income and foreign exchange transaction volumes with institutional clients, changes in commission rates and the level of our soft dollar and commission recapture activity.

Trading profits and losses on principal transactions are primarily related to our market-making activities and are included within Net trading revenue. These revenues are primarily affected by changes in the amount and mix of U.S. equity trade and share volumes, our revenue capture, dollar value of equities traded, our ability to derive trading gains by taking proprietary positions, changes in our execution standards, development of, and enhancement to, our quantitative market-making models, performance of our high velocity algorithmic principal trading models that interact with street flow, volatility in the marketplace, our mix of sell- and buy-side clients, regulatory changes and evolving industry customs and practices.

Interest income, net is earned from our cash held at banks and cash held in trading accounts at clearing brokers and from collateralized financing arrangements, such as stock borrowing. The Company's third party clearing agreements call for payment or receipt of interest income, net of transaction-related interest charged by clearing brokers for facilitating the settlement and financing of securities transactions. Net interest is primarily affected by interest rates, the level of cash balances held at banks and clearing brokers, our level of securities positions in which we are long compared to our securities positions in which we are short, and the extent of our collateralized financing arrangements.

Investment loss and other, net primarily represents income earned, net of losses, related to our corporate investment as a limited partner or non-managing member in the Deephaven Funds, our strategic investments and returns on deferred compensation investments. Such income or loss is primarily affected by the level of our corporate investment in the Deephaven Funds and corresponding performance by the Deephaven Funds, as well as the performance and activity of our strategic investments and changes in value of certain deferred compensation investments.

Expenses

Employee compensation and benefits expense, our largest expense, primarily consists of salaries and wages paid to all employees and profitability-based compensation, which includes compensation paid to sales personnel, incentive compensation paid to all other employees based on our profitability

Table of Contents

and changes in value of certain deferred compensation investments. Employee compensation and benefits expense fluctuates, for the most part, based on changes in our revenues and business mix, profitability and the number of employees. Compensation for employees engaged in sales activities is determined primarily based on a percentage of their gross revenues net of certain transaction-based expenses.

Execution and clearance fees primarily represent fees paid to third party clearing brokers for clearing equities transactions, transaction fees paid to Nasdaq and other exchanges and regulatory bodies, and execution fees paid to third parties, primarily for executing trades on the New York Stock Exchange (NYSE) and other exchanges, and for executing orders through ECNs. Execution and clearance fees primarily fluctuate based on changes in equity trade and share volume, changes in execution strategies, rate of clearance fees charged by clearing brokers and rate of fees paid to ECNs, exchanges and certain regulatory bodies.

Payments for order flow represent payments to broker-dealer clients, in the normal course of business, for directing to us their order flow in U.S. equities. Payments for order flow fluctuate as we modify our rates and as our percentage of clients whose policy is not to accept payments for order flow varies. Payments for order flow also fluctuate based on U.S. equity share volume, our profitability and the mix of market orders and limit orders.

Communications and data processing expense primarily consists of costs for obtaining market data, telecommunications services and systems maintenance.

Depreciation and amortization expense results from the depreciation of fixed assets, which consist of computer hardware, furniture and fixtures, and the amortization of purchased software, capitalized software development costs, acquired intangible assets and leasehold improvements. We depreciate our fixed assets and amortize our purchased software, capitalized software development costs and acquired intangible assets on a straight-line basis over their expected useful lives. We amortize leasehold improvements on a straight-line basis over the lesser of the life of the improvement or the remaining term of the lease.

Occupancy and equipment rentals consist primarily of rent and utilities related to rented premises and office equipment.

Professional fees consist primarily of legal, accounting and consulting fees.

Business development consists primarily of costs related to marketing, conferences and relationship management.

Interest expense consists primarily of costs associated with our Notes, our former credit facility and for collateralized financing arrangements such as stock lending.

Table of Contents**Three Months Ended March 31, 2010 and 2009****Continuing Operations***Revenues**Equities*

	For the three months ended March 31,			
	2010	2009	Change	% of Change
Commissions and fees (millions)	\$ 94.8	\$ 99.4	\$ (4.7)	-4.7%
Net trading revenue (millions)	124.5	99.5	25.0	25.1%
Interest, net (millions)	0.2	(0.8)	1.0	N/M
Investment (loss) income and other, net (millions)	(0.1)	0.0	(0.1)	N/M
Total Revenues from Equities (millions)	\$ 219.4	\$ 198.2	\$ 21.2	10.7%
Average daily U.S equity dollar value traded (\$ billions)	26.6	19.9	6.7	33.9%
Average daily U.S. equity trades (thousands)	3,696.3	3,842.3	(146.0)	-3.8%
Nasdaq and listed equity shares traded (billions)	71.7	79.3	(7.6)	-9.6%
OTC Bulletin Board and Pink Sheet shares traded (billions)	553.3	259.2	294.1	113.5%
Average revenue capture per U.S. equity dollar value traded (bps)	1.1	1.5	(0.3)	-23.8%
Average daily Knight Direct equity shares (millions)	111.2	52.3	58.9	112.5%

N/M Not meaningful

Total revenues from the Equities segment, which primarily comprises Commissions and fees and Net trading revenue from our domestic businesses, increased 10.7% to \$219.4 million for the three months ended March 31, 2010, from \$198.2 million for the comparable period in 2009. Revenues for the three months ended March 31, 2010, were positively impacted by improved results from additional trading strategies deployed through our quantitative market-making and high velocity algorithmic principal trading and higher volumes in OTC Bulletin Board and Pink Sheet stocks offset, in part, by lower average revenue capture per U.S. equity dollar value traded.

Average revenue capture per U.S. equity dollar value traded was 1.1 basis points (bps) for the first quarter of 2010, down 23.8% from the first quarter of 2009. The primary drivers for the decrease in revenue capture were lower volatility, the profile of our order flow which included a greater percentage of volumes derived from low-priced Nasdaq and listed stocks, heightened competition and ongoing investments in price improvement and execution quality. Average revenue capture per U.S. equity dollar value traded is calculated as the total of net domestic trading revenues plus U.S. institutional commissions and commission equivalents (included in Commissions and fees), less certain transaction-related regulatory fees (included in Execution and clearance fees), (collectively Domestic Equity Trading Revenues) divided by the total dollar value of the related equity transactions. Domestic Equity Trading Revenues were \$179.9 million and \$176.4 million for the three months ended March 31, 2010 and 2009, respectively. Domestic Equity Trading Revenues do not include revenues from our international and direct market access businesses.

	For the three months ended March 31,			
	2010	2009	Change	% of Change
Commissions and fees (millions)	\$ 67.4	\$ 51.1	\$ 16.3	31.8%
Net trading revenue (millions)	0.4	(0.1)	0.5	N/M
Interest, net (millions)	(0.2)	(0.1)	(0.1)	N/M
Investment income and other, net (millions)	0.2	1.1	(0.9)	-86.2%
Total Revenues from FICC (millions)	\$ 67.8	\$ 52.0	\$ 15.7	30.2%
Average daily Hotspot FX notional dollar value traded (\$ billions)	32.6	17.0	15.6	91.8%

N/M Not meaningful

Total revenues from the FICC segment, which primarily comprises Commissions and fees, increased 30.2% to \$67.8 million for the three months ended March 31, 2010, from \$52.0 million for the comparable period in 2009. For the three months ended March 31, 2010, FICC segment revenues included a \$2.9 million intercompany fee relating to the placement of the Notes offering. Excluding the intercompany fee received from our Notes offering, total revenues increased 24.6% to \$64.9 million for the three months ended March 31, 2010, due to expansion within the FICC segment.

Corporate

	For the three months ended March 31,			
	2010	2009	Change	% of Change
Total Revenues from Corporate (millions)	\$ (2.9)	\$ (4.9)	\$ 2.0	N/M

N/M Not meaningful

Total revenues from the Corporate segment, which primarily represents income or loss from our corporate investments as a limited partner or non-managing member in the Deephaven Funds and other investments, increased to a loss of \$2.9 million for the three months ended March 31, 2010, from a loss of \$4.9 million for the comparable period in 2009. For the three months ended March 31, 2010, Corporate recorded a revenue reduction of \$2.9 million relating to the elimination of the intercompany fee paid to our FICC segment with respect to the offering of our Notes for consolidation purposes.

Expenses

Employee compensation and benefits expense increased to \$138.4 million for the three months ended March 31, 2010, from \$109.2 million for the comparable period in 2009. As a percentage of total revenue, Employee compensation and benefits increased to 48.7% for the three months ended March 31, 2010, from 44.5% for the comparable period in 2009. The increase on a dollar basis and as a percentage of total revenues was primarily due to a shift in the mix of our business in the current quarter, with a greater contribution from our voice-related KFI business, and increased headcount due to the growth and investments in both our domestic and international businesses. The number of full time employees from continuing operations increased to 1,150 at March 31, 2010, from 966 at March 31, 2009, primarily due to our move to self clearing, the growth and expansion in our international business and expanded product offerings. Employee compensation and benefits expense fluctuates, for the most part, based on changes in our business mix, revenues, profitability and the number of employees.

Table of Contents

Execution and clearance fees increased 46.0% to \$42.5 million for the three months ended March 31, 2010, from \$29.1 million for the comparable period in 2009, primarily due to greater share volumes along with increased regulatory fees due to higher rates. As a percentage of total revenue, Execution and clearance fees increased to 14.9% for the three months ended March 31, 2010, from 11.9% for the comparable period in 2009. Execution and clearance fees fluctuate based on changes in transaction volumes, regulatory fees and operational efficiencies and scale.

Payments for order flow decreased to \$11.0 million for the three months ended March 31, 2010, from \$17.0 million for the comparable period in 2009. As a percentage of total revenue, Payments for order flow decreased to 3.9% for the three months ended March 31, 2010, from 6.9% for the comparable period in 2009. This expense decreased primarily due to changes in rebate arrangements with clients and an increase in revenues that do not have rebates associated with them.

There was no Writedown of assets for the three months ended March 31, 2010. Writedown of assets was \$699,000 for the three months ended March 31, 2009, which related to the writedown of capitalized software resulting from the sale of Hotspot's retail customer accounts.

All other expenses increased by 21.2%, or \$8.1 million, to \$46.4 million for the three months ended March 31, 2010 from \$38.3 million for the comparable period in 2009. Communications and data processing expense increased primarily due to higher market data and connectivity expenses related to the growth within our Equities and FICC segments. Depreciation and amortization expense increased primarily due to fixed asset purchases and greater capitalized software development costs. Occupancy and equipment rentals expense increased primarily due to the costs associated with new office space leases. Professional fees increased due to higher consulting and legal expenses, which have fluctuated based on activity relating to our new business initiatives. Interest expense increased due to our increased stock lending activity and our Notes offering. Other expenses increased due to higher employment fees and other administrative expenses.

Our effective tax rates from continuing operations of 38.8% and 41.4% for the three months ended March 31, 2010 and 2009, respectively, differed from the federal statutory rate of 35% primarily due to state and local income taxes and non-deductible charges.

Discontinued Operations

The Company's former Asset Management segment comprised Deephaven Capital Management LLC and its subsidiaries (collectively, Deephaven), which was the registered investment adviser to, and sponsor of, the Deephaven investment funds (the Deephaven Funds).

During the first quarter of 2009, Deephaven completed the sale of substantially all of its assets to Stark & Roth, Inc. (together with its affiliates, Stark) with Stark agreeing to assume certain limited liabilities of Deephaven. As of that date, Deephaven was replaced by Stark as the investment manager, managing member and general partner for the Deephaven Funds and we exited the Asset Management business. As a result of this sale, our Asset Management segment was classified as a discontinued operation.

Loss from discontinued operations, net of tax, was \$0.3 million and \$20.5 million for the three months ended March 31, 2010 and 2009, respectively. See Footnote 12 Discontinued Operations, included in Part I, Item 1 Financial Statements of this Form 10-Q for further information.

Table of Contents

Financial Condition, Liquidity and Capital Resources

Financial Condition

We have historically maintained a highly liquid balance sheet, with a substantial portion of our total assets consisting of cash, highly liquid marketable securities and short term receivables. As of March 31, 2010, we had \$3.7 billion in assets, 78.9% of which consisted of cash or assets readily convertible into cash, principally receivables from brokers and dealers, financial instruments owned and securities borrowed. Receivables from brokers and dealers include interest bearing cash balances held with clearing brokers, including, or net of, amounts related to securities transactions that have not yet reached their contracted settlement date, which is generally within three business days of the trade date. Financial instruments owned principally consist of equity securities that trade on the NYSE, NYSE Amex Equities and NYSE Arca markets, Nasdaq and on the OTC Bulletin Board. Securities borrowed represents the value of cash or collateral deposited with stock lenders to facilitate the trade settlement process.

Other assets primarily represent net deferred tax assets, deposits, receivable from discontinued operations and other miscellaneous receivables.

Total assets increased \$704.2 million, or 23.4%, from \$3.0 billion at December 31, 2009 to \$3.7 billion at March 31, 2010. The majority of the increase in assets relates to increases in securities borrowed and financial instruments owned. Securities borrowed increased by \$549.4 million, from \$394.4 million at December 31, 2009 to \$943.8 million at March 31, 2010, due to matched stock borrowed and stock loaned activity by our self-clearing entity. Financial instruments owned increased by \$126.3 million, or 13.6%, from \$926.6 million at December 31, 2009, to \$1,052.9 million at March 31, 2010, due to the purchased call options relating to our Notes offering and an increase in the size of the securities inventory utilized in our market-making, high velocity algorithmic principal trading activities and trade execution services. Our securities inventory fluctuates based on trading volumes, market conditions, trading strategies utilized and our pre-determined risk limits.

Total liabilities increased \$665.1 million, or 36.9%, from \$1.8 billion at December 31, 2009 to \$2.5 billion at March 31, 2010. The majority of the increase in liabilities relates to increases in the Financial instruments sold, not yet purchased, Long-term debt, Securities loaned and Payable to brokers and dealers offset, in part, by a decrease in our credit facility and Accrued compensation expense. Financial instruments sold, not yet purchased increased by \$326.4 million, or 51.1%, from \$639.3 million at December 31, 2009, to \$965.7 million at March 31, 2010, due to an increase in the size of the securities inventory utilized in our market-making, high velocity algorithmic principal trading activities and trade execution services as well as the embedded conversion derivative associated with our Notes offering. Our securities inventory fluctuates based on trading volumes, market conditions, trading strategies utilized and our pre-determined risk limits and is consistent with the increase in our long securities position. Securities loaned increased by \$140.0 million, or 25.4%, from \$550.2 million at December 31, 2009, to \$690.2 million at March 31, 2010 due to matched stock borrowed and stock loaned activity by our self-clearing entity. Long-term debt increased by \$301.7 million at March 31, 2010 due to the offering of our Notes. A portion of the proceeds of the Notes were used to repay our \$140 million credit facility (the Prior Credit Facility) in March 2010.

Stockholders' equity, excluding Noncontrolling interests, increased by \$39.1 million, from \$1,213.5 million at December 31, 2009 to \$1,252.6 million at March 31, 2010. The increase in stockholders' equity from December 31, 2009 was primarily a result of stock-based awards activity and net income earned during the three months ended March 31, 2010.

Table of Contents

Liquidity and Capital Resources

We have financed our business primarily through cash generated by operations, the proceeds from our stock issuances, the proceeds from our borrowing of \$140.0 million under the Prior Credit Facility and our Notes offering of \$375 million. At March 31, 2010, we had net current assets, which consist of net assets readily convertible into cash less current liabilities, of approximately \$838.6 million.

We have previously disclosed our intent to pursue selective acquisitions of (or possible joint ventures with) complementary businesses primarily in the markets in which our Equities and FICC segments operate. We expect to fund the purchase price of any such acquisition with our current cash position or, in some cases, through the issuance of our stock or debt.

We have acquired several businesses over the last few years. In July 2008, we completed the acquisition of KFI's business for \$75.3 million, comprising \$50.3 million in cash and approximately 1.5 million shares of unregistered Knight common stock valued at \$25.0 million. The terms of the transaction include a potential earn-out of up to \$75.0 million of unregistered Knight common stock based on the future performance of KFI during the three-year period following the closing of the transaction. In the third quarter of 2009, KFI achieved its first year performance target which entitled the sellers to receive \$33.3 million of the aforementioned earn-out in the form of 1.6 million shares of unregistered Knight common stock, of which 50% will be issued in July 2010 and the remaining 50% will be issued in July 2011.

Income from continuing operations before income taxes was \$46.0 million and \$51.0 million for the three months ended March 31, 2010 and 2009, respectively. Included in these amounts were certain non-cash expenses such as stock-based compensation, depreciation, amortization and certain non-cash writedowns. Stock-based compensation was \$14.1 million and \$12.1 million for the three months ended March 31, 2010 and 2009, respectively. Depreciation expense was \$2.9 million and \$2.4 million for the three months ended March 31, 2010 and 2009, respectively. Amortization expense, which related to software, software development costs, intangible assets and leasehold improvements, was \$6.3 million and \$5.7 million for the three months ended March 31, 2010 and 2009, respectively. There were no non-cash writedowns for the three months ended March 31, 2010. A non-cash writedown of capitalized software related to the sale of Hotspot's retail client accounts for the three months ended March 31, 2009 was \$699,000.

Capital expenditures related to our continuing operations were \$9.4 million and \$6.3 million during the three months ended March 31, 2010 and 2009, respectively. For the three months ended March 31, 2010, we paid \$2.0 million relating to customer lists and purchase of a noncontrolling interest in one of our majority owned subsidiaries. There were no cash payments relating to acquisitions of businesses for the three months ended March 31, 2009. Distributions from investments were \$33.1 million and \$9.1 million for the three months ended March 31, 2010 and 2009, respectively.

In March 2010, we issued \$375.0 million of Notes in a private offering. Net proceeds from the offering were \$167.5 million, which included \$15.0 million from the sale of warrants, less \$140.5 million for the required repayment of the Prior Credit Facility and accrued interest, \$73.7 million for the purchase of call options and \$8.5 million of offering expenses. The Notes bear interest at a rate of 3.50% per year, payable semi-annually in arrears, on March 15 and September 15 of each year, commencing on September 15, 2010 and will mature on March 15, 2015, subject to earlier repurchase or conversion. For the three months ended March 31, 2010, we recognized interest expense related to the Notes of \$1.1 million. See Footnote 7 Long-Term Debt, included in Part I, Item 1 Financial Statements of this Form 10-Q for further information.

Table of Contents

We have an authorized stock repurchase program of \$1 billion. During the first quarter of 2010, we repurchased 502,000 shares for approximately \$7.7 million under the stock repurchase program. Through March 31, 2010, we repurchased 68.8 million shares for \$778.1 million under this program. We may repurchase shares from time to time in open market transactions, accelerated stock buyback programs, tender offers, privately negotiated transactions or by other means. Repurchases may also be made under Rule 10b5-1 plans. The timing and amount of repurchase transactions will be determined by our management based on its evaluation of current and future financing needs, market conditions, share price, legal requirements and other factors. The program may be suspended, modified or discontinued at any time without prior notice. We caution that there are no assurances that any further repurchases will actually occur. We had approximately 94.5 million shares of Class A Common Stock outstanding as of March 31, 2010.

Our U.S. registered broker-dealers are subject to regulatory requirements intended to ensure the general financial soundness and liquidity of broker-dealers and require the maintenance of minimum levels of net capital, as defined in SEC Rule 15c3-1. These regulations also prohibit a broker-dealer from repaying subordinated borrowings, paying cash dividends, making loans to its parent, affiliates or employees, or otherwise entering into transactions which would result in a reduction of its total net capital to less than 120% of its required minimum capital. Moreover, broker-dealers are required to notify the SEC and FINRA prior to repaying subordinated borrowings, paying dividends and making loans to its parent, affiliates or employees, or otherwise entering into transactions, which, if executed, would result in a reduction of 30% or more of its excess net capital (net capital less minimum requirement). The SEC has the ability to prohibit or restrict such transactions if the result is detrimental to the financial integrity of the broker-dealer. As of March 31, 2010, all of our broker-dealers were in compliance with the applicable regulatory net capital rules.

The following table sets forth the net capital levels and requirements for the following significant regulated broker-dealer subsidiaries at March 31, 2010, as reported in their respective regulatory filings (in millions):

Entity	Net Capital	Net Capital Requirement	Excess Net Capital
KEM	\$ 87.9	\$ 1.0	\$ 86.9
KCM	54.0	1.0	53.0
Knight Fixed Income	42.5	1.9	40.6
KCS	38.9	1.0	37.9
Knight Direct	13.1	0.3	12.8

Our foreign registered broker-dealers are subject to certain financial resource requirements of either the FSA or the SFC. The following table sets forth the financial resource requirement for the following significant foreign regulated broker-dealer at March 31, 2010 (in millions):

Entity	Financial Resources	Resource Requirement	Excess Financial Resources
KCEL	\$ 83.9	\$ 38.2	\$ 45.7

Off-Balance Sheet Arrangements

As of March 31, 2010, we did not have any off-balance sheet arrangements, as defined in Item 303(a)(4)(ii) of SEC Regulation S-K.

Table of Contents

Effects of Inflation

Because the majority of the Company's assets are liquid in nature, they are not significantly affected by inflation. However, the rate of inflation may affect the Company's expenses, such as employee compensation, office leasing costs and communications expenses, which may not be readily recoverable in the prices of the services offered by the Company. To the extent inflation results in rising interest rates and has other adverse effects on the securities markets, it may adversely affect the Company's financial position and results of operations.

Critical Accounting Policies

Our Consolidated Financial Statements are based on the application of GAAP which requires us to make estimates and assumptions about future events that affect the amounts reported in our financial statements and the accompanying notes. Future events and their effects cannot be determined with certainty. Therefore, the determination of estimates requires the exercise of judgment. Actual results could differ from those estimates and any such differences may be material to our Consolidated Financial Statements. We believe that the estimates set forth below may involve a higher degree of judgment and complexity in their application than our other accounting estimates and represent the critical accounting estimates used in the preparation of our consolidated financial statements. We believe our judgments related to these accounting estimates are appropriate. However, if different assumptions or conditions were to prevail, the results could be materially different from the amounts recorded.

Goodwill and Intangible Assets As a result of our acquisitions, principally the businesses operating as Knight Direct, Hotspot, Knight BondPoint and KFI, we have acquired goodwill and identifiable intangible assets. We determine the values and useful lives of intangible assets upon acquisition. Goodwill is the cost of acquired companies in excess of the fair value of net assets, including identifiable intangible assets, at the acquisition date. We test goodwill and the useful lives of intangible assets for impairment at least annually or when an event occurs or circumstances change that signifies the existence of impairment.

Goodwill of \$266.5 million as of March 31, 2010 is primarily related to our Equities and FICC segments. Goodwill primarily represents purchases of the businesses now operating as Knight Direct in our Equities segment and Hotspot, Knight BondPoint and KFI in our FICC segment. We test the goodwill in each of our operating segments for impairment at least annually by comparing the estimated fair value of each segment with its estimated net book value. We derive the fair value of each of our operating segments based on valuation techniques we believe market participants would use for each segment (observable price-to-book multiples and discounted cash flow analyses) and we derive the net book value of our operating segments by estimating the amount of shareholders' equity required to support the activities of each operating segment. As part of our test for impairment, we also consider the profitability of the applicable reporting unit as well as the overall market value of the Company, compared to the Company's book value. We performed our annual test for impairment of goodwill in the second quarter of 2009 and determined that goodwill was not impaired at that time. We believe there was no impairment of our goodwill at March 31, 2010.

Intangible assets, with definite lives are amortized over their respective lives. Intangible assets, less accumulated amortization, of \$76.2 million at March 31, 2010 are all attributable to our Equities and FICC segments. Substantially all intangible assets resulted from the purchases of the businesses now operating as Knight Direct, Hotspot, Knight BondPoint and Knight Fixed Income. We amortize these assets, which primarily consist of customer relationships on a straight-line basis over their useful lives, the majority of which have been determined to range from four to 24 years. We performed our annual test for impairment of intangible assets with definitive lives in the second quarter of 2009. We

Table of Contents

test amortizable intangibles for recoverability whenever events indicate that the carrying amounts may not be recoverable. During the second quarter of 2009, we discontinued the use of the Donaldson trade name. As such, we wrote off \$2.4 million in intangible assets related to the trade name. No other events occurred in 2009 or for the three months ended March 31, 2010 that would indicate that the carrying amounts of our amortizable intangible assets may not be recoverable and we do not believe that our intangible assets were impaired as of March 31, 2010.

Financial Instruments and Fair Value We value our financial instruments using a hierarchy of fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs when measuring fair value.

The fair value hierarchy can be summarized as follows:

Level 1 Valuations based on quoted prices in active markets for identical assets or liabilities that we have the ability to access. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these products does not entail a significant degree of judgment.

Level 2 Valuations based on quoted prices in markets that are not active or for which all significant inputs are observable, either directly or indirectly.

Level 3 Valuations based on inputs that are unobservable and significant to the overall fair value measurement. Changes in fair value are recognized in earnings each period for financial instruments that are carried at fair value.

Our securities owned and securities sold, not yet purchased will generally be classified within Level 1 of the fair value hierarchy because they are valued using quoted market prices or broker or dealer quotations with reasonable levels of price transparency.

The types of instruments that trade in markets that are not considered to be active, but are valued based on quoted market prices, broker or dealer quotations, or alternative pricing sources with reasonable levels of price transparency are generally classified within Level 2 of the fair value hierarchy.

As discussed in Footnote 7 Long-Term Debt, included in Part I, Item 1 Financial Statements of this Form 10-Q, we entered into purchased call options and recorded an embedded conversion derivative concurrent with the issuance of the Notes. The fair value of these derivatives are determined using an option pricing model based on observable inputs, such as, implied volatility of our common stock, risk-free interest rate, and other factors and as such are classified within Level 2 of the fair value hierarchy.

As of March 31, 2010, our investment in the Deeptaven Funds, the purchased call options, the embedded conversion derivative and deferred compensation investments met the definition of Level 2.

Certain instruments are classified within Level 3 of the fair value hierarchy because they trade infrequently and therefore have little or no price transparency. For those instruments that are not traded in active markets or are subject to transfer restrictions, valuations are adjusted to reflect illiquidity and/or non-transferability, and such adjustments are generally based on available market evidence. In the absence of such evidence, management's best estimate is used. As of March 31, 2010 and December 31, 2009, we did not hold any financial instruments that met the definition of Level 3.

Table of Contents

Investments Investments comprise strategic investments, investment in the Deephaven Funds and deferred compensation investments. Strategic investments include noncontrolling equity ownership interests and debt instruments held by us within our non-broker-dealer subsidiaries, primarily in financial services-related businesses. Strategic investments are accounted for under the equity method, at cost or at fair value. The equity method of accounting is used for investments in limited partnerships and limited liability companies that are held by us or any of our non-broker-dealer subsidiaries. Strategic investments in corporations by such non-broker-dealers are held at amortized cost. The equity method of accounting is used where we are considered to exert significant influence on the investee. Strategic investments are held at cost, less impairment if any, when we are not considered to exert significant influence on the investee. Investments in liquid investment funds, including deferred compensation investments in mutual funds, and the investment in the Deephaven Funds are accounted for at fair value.

Strategic investments are reviewed on an ongoing basis to ensure that the carrying values of the investments have not been impaired. If we determine that an impairment loss on a strategic investment has occurred due to a decline in fair value or other market conditions, the investment is written down to its estimated impaired value.

We have several deferred compensation plan investments related to certain employees and directors. These plans provide a return to the participants based upon the performance of various investments. In order to hedge our liability under these plans, we generally acquire the underlying investments and hold such investments until the deferred compensation liabilities are satisfied. Changes in value of such investments are recorded in Investment loss and other, net, with a corresponding charge or credit to Employee compensation and benefits on the Consolidated Statements of Operations.

Lease Loss Accrual It is our policy to identify excess real estate capacity and where applicable, accrue for related future costs, net of estimated sublease income. In determining the accrual, we perform a nominal cash flow analysis for lease losses initiated prior to December 31, 2002 and we accrue costs related to the excess capacity. For lease losses initiated after December 31, 2002, our policy is to accrue future costs related to excess capacity using a discounted cash flow analysis.

Market-Making, Trading and Sales Activities Financial instruments owned and Financial instruments sold, not yet purchased, which primarily consist of listed and OTC equities, are carried at fair value and are recorded on a trade date basis. Net trading revenue (trading gains, net of trading losses) and commissions (which includes commission equivalents earned on institutional client orders) and related expenses are also recorded on a trade date basis. Our third party clearing agreements call for payment or receipt of interest income, net of transaction-related interest charged by clearing brokers for facilitating the settlement and financing of securities transactions.

Dividend income relating to securities owned and dividend expense relating to securities sold, not yet purchased, derived from our market-making activities are included as a component of Net trading revenue on our Consolidated Statements of Operations.

Other Estimates The preparation of financial statements in conformity with GAAP requires management to make certain estimates and assumptions. In addition to the estimates that we make in connection with accounting for the items noted above, the use of estimates is also important in determining provisions for potential losses that may arise from litigation, regulatory proceedings and tax audits.

When determining stock-based employee compensation expense, we make certain estimates and assumptions relating to volatility and forfeiture rates. We estimate volatility based on several factors

Table of Contents

including implied volatility of market-traded options on our common stock on the grant date and the historical volatility of our common stock. We estimate forfeiture rates based on historical rates of forfeiture of employee stock awards.

A portion of our Employee compensation and benefits expense on the Consolidated Statements of Operations represents discretionary bonuses, which are accrued for throughout the year and paid after the end of the year. Among many factors, discretionary bonus accruals are generally influenced by our overall performance and competitive industry compensation levels.

We estimate and accrue for potential losses that may arise out of litigation and regulatory proceedings to the extent that such losses are probable and can be estimated. Significant judgment is required in making these estimates and our final liabilities may ultimately be materially different. Our total liability accrued with respect to litigation and regulatory proceedings is determined on a case-by-case basis and represents an estimate of probable losses based on, among other factors, the progress of each case, our experience and industry experience with similar cases and the opinions and views of internal and external legal counsel. Given the inherent difficulty of predicting the outcome of our litigation and regulatory matters, particularly in cases or proceedings in which substantial or indeterminate damages or fines are sought, or where cases or proceedings are in the early stages, we cannot estimate losses or ranges of losses for cases or proceedings where there is only a reasonable possibility that a loss may be incurred. For more information on our legal and regulatory matters, see "Legal Proceedings" in Part I, Item 3 of the Company's Annual Report on Form 10-K for the year ended December 31, 2009, Part II, Item 1 included in this Form 10-Q, and other reports or documents the Company files with, or furnishes, to the SEC from time to time.

Accounting Standards Updates

Effective January 1, 2010, we adopted two Accounting Standards Updates (ASU), which were issued by the Financial Accounting Standards Board (FASB). The first ASU requires a reporting entity to disclose separately the amounts of transfers in and out of Level 1 and Level 2 fair value measurements and describe the reasons for the transfers. This ASU also clarifies existing disclosure requirements related to how assets and liabilities should be grouped by class and valuation techniques used for recurring and nonrecurring fair value measurements.

The second ASU relates to the accounting for variable interest entities (VIE). This ASU significantly changed the criteria by which an enterprise determines whether or not it must consolidate a VIE. Under the new guidance, consolidation of a VIE requires both the power to direct the activities that most significantly impact the VIE's economic performance and the obligation to absorb losses of the VIE that could potentially be significant to the VIE or the right to receive benefits of the VIE that could potentially be significant to the VIE.

The adoption of these ASUs had no impact on our Consolidated Financial Statements other than enhanced disclosures when required.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market Risk

Our market-making and trading activities expose our capital to significant risks. These risks include, but are not limited to, absolute and relative price movements, price volatility and changes in liquidity, over which we have virtually no control.

For working capital purposes, we invest in money market funds and government securities or maintain interest-bearing balances at banks and in our trading accounts with clearing brokers, which

Table of Contents

are classified as Cash and cash equivalents and Receivable from brokers and dealers, respectively, on the Consolidated Statements of Financial Condition. These financial instruments do not have maturity dates or present a material market risk, as the balances are short-term in nature and subject to daily repricing. Our cash and cash equivalents held in foreign currencies are subject to the exposure of foreign currency fluctuations. These balances are monitored daily and are not material to our overall cash position.

In our Equities segment where we maintain securities positions, we employ proprietary position management and trading systems that provide real-time, on-line position management and inventory control. We monitor our risks by reviewing trading positions and their appropriate risk measures. We have established a system whereby transactions are monitored by senior management and an independent risk control function on a real-time basis as are individual and aggregate dollar and inventory position totals, capital allocations, and real-time profits and losses. Our management of trading positions is enhanced by our review of mark-to-market valuations and position summaries on a daily basis.

In the normal course of business, we maintain inventories of exchange-listed and OTC equity securities, listed equity options and fixed income products. The fair value of these securities at March 31, 2010 and 2009 was \$980.8 million and \$812.4 million, respectively, in long positions and \$897.1 million and \$598.5 million, respectively, in short positions. The potential change in fair value, using a hypothetical 10% decline in prices, is estimated to be a loss of \$8.4 million and \$21.4 million as of March 31, 2010 and 2009, respectively, due to the offset of gains in short positions against losses in long positions.

Operational Risk

Operational risk can arise from many factors ranging from routine processing errors to potentially costly incidents arising, for example, from major systems failures. We incur operational risk across all of our business activities, including revenue generating activities as well as support functions. Legal and compliance risk is included in the scope of operational risk and is discussed below under Legal Risk.

Primary responsibility for the management of operational risk lies with our operating segments and supporting functions. Our operating segments maintain controls designed to manage and mitigate operational risk for existing activities. As new products and business activities are developed, we identify operational risks and design controls to mitigate the identified risks.

Disaster recovery plans are in place for critical facilities related to our primary operations and resources and redundancies are built into the systems as deemed appropriate. We have also established policies, procedures and technologies to protect our systems and other assets from unauthorized access.

Legal Risk

Legal risk includes the risk of non-compliance with applicable legal and regulatory requirements and standards. Legal risk also includes contractual and commercial risk such as the risk that counterparty's performance obligations will be unenforceable. We are generally subject to extensive regulation in the different jurisdictions in which we conduct our business (see Government Regulation and Market Structure in Part I, Item 1 of our Annual Report on Form 10-K for the year ended December 31, 2009). We have established procedures based on legal and regulatory requirements that are designed to foster compliance with applicable statutory and regulatory requirements. We have also established procedures that are designed to require that our policies relating to conduct, ethics and business practices are followed.

Table of Contents

Item 4. Controls and Procedures

As of the end of the period covered by this report, an evaluation was carried out under the supervision and with the participation of the Company's management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the design and operation of these disclosure controls and procedures were effective. There have not been any changes in the Company's internal control over financial reporting (as such term is defined in Rule 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934) during the fiscal quarter covered by this report that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents

PART II OTHER INFORMATION

Item 1. Legal Proceedings

From time to time, we and certain of our past and present officers, directors and employees have been named as parties to legal actions, arbitrations, administrative claims and regulatory reviews and investigations arising in connection with the conduct of our businesses. We are subject to such matters at the present time. Although there can be no assurances, at this time the Company believes, based on information currently available, that the outcome of each of the matters will not have a material adverse effect on the consolidated financial condition of the Company, although they might be material to operating results for any particular period, depending, in part, upon operating results for that period.

In the first quarter of 2010, the following development occurred in the *Last Atlantis Capital LLC et al. v. Chicago Board Options Exchange, Inc. et al.* action described in the Company's Form 10-K for the year ended December 31, 2009:

On March 26, 2010, the United States District Court for the Northern District of Illinois granted Knight's summary judgment motion as to the federal securities law claim, declined to exercise jurisdiction over the state law claims and accordingly dismissed the complaint against Knight as to all plaintiffs. Because the case is continuing against other defendants and thus has not been fully resolved, the order dismissing the complaint against Knight has not yet become final and appealable.

Regulatory

We own subsidiaries including regulated entities that are subject to extensive oversight under federal, state and applicable international laws as well as SRO rules. Changes in market structure and the need to remain competitive require constant changes to our systems and order handling procedures. We make these changes while continuously endeavoring to comply with many complex laws and rules. Compliance, surveillance and trading issues common in the securities industry are monitored by, reported to, and/or reviewed in the ordinary course of business by our primary regulators, the SEC, CFTC, FSA, SFC, FINRA, NYSE, MSRB, and NFA. As a major order flow execution destination, we are named from time to time in, or are asked to respond to a number of regulatory matters brought by U.S. regulators, foreign regulators and SROs that arise from our trading activity. The Company is currently the subject of various regulatory reviews and investigations. In some instances, these matters may rise to a SEC, CFTC, FSA, SFC, FINRA, NYSE, MSRB, NFA, other SRO disciplinary action and/or civil or administrative action.

In March 2005, NASD (now known as FINRA) announced that it had charged Kenneth Pasternak, former CEO of Knight Securities, L.P. (KSLP) (now known as KEM), and John Leighton, former head of KSLP's institutional sales desk, in an administrative complaint alleging supervisory violations in connection with fraudulent sales to institutional customers in 1999 and 2000. Pursuant to a decision dated April 11, 2007, the majority of a NASD Hearing Panel found that Pasternak and Leighton failed to supervise KSLP's Institutional Sales Department reasonably during the period of January 1999 to September 2000 in violation of NASD rules. Pasternak and Leighton were each fined \$100,000. Pasternak was suspended from acting in all supervisory capacities for two years and Leighton was barred from acting in all supervisory capacities. In May 2007, Pasternak and Leighton each filed a Notice of Appeal from the NASD Hearing Panel's decision and the NASD filed a Notice of Cross-Appeal from the NASD Hearing Panel's decision. This matter was heard on July 28, 2008 by a sub-committee of FINRA's National Adjudicatory Council (the NAC). In a decision dated March 3, 2010, the NAC reversed the NASD Hearing Panel's decision, dismissed the allegations in the complaint and vacated the sanctions imposed against Pasternak and Leighton. The decision is now final.

Table of Contents

For further information on Legal Proceedings, see the section entitled "Legal Proceedings", in Part I, Item 3 of our Annual Report on Form 10-K for the year ended December 31, 2009, and other reports or documents the Company files with, or furnishes, to the SEC from time to time.

Item 1A. Risk Factors

In addition to the other information set forth below, you should carefully consider the factors discussed in Part I, Item 1A. "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2009, which could materially affect our business, financial condition or future results. The risks described in our Annual Report on Form 10-K are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.

Risks related to our Businesses

Fluctuations in currency exchange rates could adversely affect our earnings

A significant portion of our international business is conducted in currencies other than the U.S. dollar, and changes in foreign exchange rates relative to the U.S. dollar can therefore affect the value of non-U.S. dollar net assets, revenues and expenses. Potential exposures as a result of these fluctuations in currencies are closely monitored, and, where cost-justified, strategies are adopted that are designed to reduce the impact of these fluctuations on the Company's financial performance. These strategies may include the financing of non-U.S. dollar assets with borrowings in the same currency and the use of various hedging transactions related to net assets, revenues, expenses or cash flows. Any material fluctuations in currencies could have a material effect on our operating results.

Servicing our debt requires a significant amount of cash, and we may not have sufficient cash flow from our business to pay our substantial debt

Our ability to make scheduled payments of the principal of, to pay interest on or to refinance our indebtedness, including the Notes, depends on our future performance, which is subject to economic, financial, competitive and other factors beyond our control. Our business may not continue to generate cash flow from operations in the future sufficient to service our debt and make necessary capital expenditures. If we are unable to generate such cash flow, we may be required to adopt one or more alternatives, such as selling assets, restructuring debt, undertaking additional borrowings or issuing additional debt or obtaining additional equity capital on terms that may be onerous or highly dilutive. Our ability to refinance all or a portion of our indebtedness will depend on the capital markets and our financial condition at such time. We may not be able to engage in any of these activities or engage in these activities on desirable terms, which could result in a default on our debt obligations.

Despite our current debt levels, we may still incur substantially more debt or take other actions that could increase our aggregate borrowings and adversely impact our ability to service our debt obligations and/or operate or grow our businesses

We and our subsidiaries are not restricted under the terms of the indenture governing the Notes (filed as Exhibit No. 4.1 to the Company's Form 8-K filed with the SEC on March 19, 2010) (the "Indenture") or otherwise currently restricted from incurring additional debt, securing existing or future debt, recapitalizing our debt or taking any number of other actions that could increase our aggregate borrowings and adversely impact our ability to service our debt obligations and/or operate or grow our businesses. In particular, although we repaid all amounts outstanding under and terminated the Prior Credit Facility in connection with the issuance of the Notes, we anticipate (though we can give no

Table of Contents

assurances) that we will enter into a new senior secured term loan and/or revolving credit facility to meet working capital needs. Any new credit facility or other future borrowings may (1) contain covenants that limit the discretion of our management with respect to certain business matters, (2) require us to meet certain financial ratios and financial conditions tests, and (3) be secured by certain of our assets. Such new credit facility or borrowings could:

make it difficult for us to satisfy our obligations with respect to the Notes or other then-outstanding debt obligations;

increase our vulnerability to general adverse economic and industry conditions;

require us to dedicate a portion of our cash flow from operations to payments on our indebtedness, thereby reducing the availability of cash flow to fund working capital, capital expenditures, acquisitions and investments and other general corporate purposes;

make it difficult for us to optimally capitalize and manage the cash flow for our businesses;

limit our flexibility in planning for, or reacting to, changes in our businesses and the markets in which we operate;

place us at a competitive disadvantage compared to our competitors that have less debt; and

limit our ability to borrow additional funds.

In addition, it is possible that we may need to incur additional indebtedness in the future in the ordinary course of business or otherwise. Furthermore, if future debt financing is not available to us when required or is not available on acceptable terms, we may be unable to grow our business, take advantage of business opportunities, respond to competitive pressures or refinance maturing debt, any of which could have a material and adverse effect on our operating results and financial condition.

We may not have the ability to raise the funds necessary to pay the cash due upon conversions of the Notes or to repurchase the Notes upon a fundamental change, and our future debt may contain limitations on our ability to pay cash upon conversion or repurchase of the Notes

Holders of the Notes have the right to require us to repurchase the Notes upon the occurrence of a fundamental change at 100% of their principal amount, plus accrued and unpaid interest, if any, and upon conversion of any Notes, we will be required to pay to the holder of a Note a cash payment based on the applicable conversion rate as described in the Indenture. However, we may not have enough available cash or be able to obtain financing at the time we are required to repurchase Notes surrendered therefore or settle conversions of the Notes. In addition, our ability to repurchase the Notes or to pay cash upon conversions of the Notes may be limited by law or by agreements governing our future indebtedness. Our failure to repurchase Notes at a time when the repurchase is required by the Indenture or to pay cash upon future conversions of the Notes as required by the Indenture would constitute a default under the Indenture. A default under the Indenture or the fundamental change itself could also lead to a default under agreements governing our future indebtedness. If the repayment of the related indebtedness were to be accelerated after any applicable notice or grace periods, we may not have sufficient funds to repay the indebtedness and repurchase the Notes or make cash payments upon conversions thereof.

Table of Contents

The conditional conversion features of the Notes, if triggered, may adversely affect our financial condition and operating results

In the event the conditional conversion features of the Notes are triggered, holders of Notes will be entitled to convert the Notes at any time during specified periods at their option as described in the Indenture. If one or more holders elect to convert their Notes, we would be required to pay cash to such holder to settle any such conversion, which could adversely affect our liquidity. In addition, even if holders do not elect to convert their Notes, we could be required under applicable accounting rules to recharacterize all or a portion of the outstanding principal of the Notes as a short-term rather than long-term liability, which would result in a material reduction of our net working capital.

The accounting for the Notes will result in our having to recognize interest expense significantly greater than the stated interest rate of the Notes and may result in volatility to our Consolidated Statements of Operations

As described in the Indenture, we will settle conversions of the Notes entirely in cash. Accordingly, the conversion option that is part of the Notes is accounted for as a derivative pursuant to accounting standards relating to derivative instruments and hedging activities. In general, this resulted in an initial valuation of the conversion option, which was bifurcated from the debt component of the Notes, resulting in an original issue discount. The original issue discount will be accreted to interest expense over the term of the Notes, which will result in an effective interest rate reported in our Consolidated Statements of Operations significantly in excess of the stated coupon rate of the Notes. This will reduce our earnings and could adversely affect the price at which our Class A common stock trades, but will have no effect on the amount of cash interest paid to holders or on our cash flows.

For each financial statement period after issuance of the Notes, a gain (or loss) will be reported in our Consolidated Statements of Operations to the extent the valuation of the conversion option changes from the previous period. The cash convertible note hedge transaction is described in Exhibits No. 10.1(a) and 10.1(b) of Form 8-K, filed on March 19, 2010, will also be accounted for as a derivative, offsetting the gain (or loss) associated with changes to the valuation of the conversion option. Although we do not expect there to be any net impact to our Consolidated Statements of Operations as a result of our issuing the Notes and entering into the cash convertible note hedge transaction, we cannot assure that these transactions will be completely offset, which may result in volatility on our Consolidated Statements of Operations.

Table of Contents**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**

The following table contains information about our purchases of our Class A Common Stock during the first quarter of 2010 (in thousands, except per share amounts):

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ⁽¹⁾	Approximate Dollar Value of Shares That May Yet Be Purchased Under the Plans or Programs
January 1, 2010 – January 31, 2010				
Common stock repurchases	55		55	\$ 228,747
Employee transactions ⁽²⁾	649		-	
Total	704	\$ 15.81	55	
February 1, 2010 – February 28, 2010				
Common stock repurchases	447		447	\$ 221,881
Employee transactions ⁽²⁾	7		-	
Total	455	\$ 15.36	447	
March 1, 2010 – March 31, 2010				
Common stock repurchases	-		-	\$ 221,881
Employee transactions ⁽²⁾	3		-	
Total	3	\$ 15.93	-	
Total				
Common stock repurchases	502		502	
Employee transactions ⁽²⁾	659		-	
Total	1,161	\$ 15.63	502	

Totals may not add due to rounding.

- (1) On April 4, 2002, the Company's Board of Directors announced the authorization of a stock repurchase program, which allowed for the purchase of Class A Common Stock up to a total amount of \$35 million. This repurchase program was increased by an aggregate of \$965 million to a total of \$1 billion by resolutions of the Company's Board of Directors adopted on July 16, 2002, May 12, 2003, April 20, 2004, August 8, 2004, April 19, 2005, October 18, 2005, April 18, 2006 and July 17, 2007. The Company may repurchase shares from time to time in the open market, accelerated stock buyback programs, tender offers, privately negotiated transactions or by other means. Repurchases may also be made under a Rule 10b5-1 plan. The timing and amount of repurchase transactions will be determined by the Company's management based on its evaluation of current and future financing needs, market conditions, share price, legal requirements and other factors. The program may be suspended, modified or discontinued at any time without prior notice. The Company cautions that there are no assurances that any further repurchases will actually occur. The repurchase program has no set expiration or termination date.
- (2) Represents shares of common stock withheld in satisfaction of tax withholding obligations upon vesting of restricted stock.
