NEWS RELEASE

Enbridge announces \$1.2 billion twinning of southern section of Athabasca Pipeline

CALGARY, ALBERTA September 12, 2011 Enbridge Inc. (TSX:ENB) (NYSE:ENB) announced today that it will twin the southern section of its Athabasca Pipeline from Kirby Lake, Alberta to the Hardisty, Alberta crude oil hub at an estimated cost of approximately \$1.2 billion. The twin line will initially add approximately 450,000 barrels per day (bpd) of capacity between these points, with low cost expansion potential to 800,000 bpd. The line is expected to be capable of accepting initial volumes by early 2015, with its full initial capacity available by 2016.

The new line will include approximately 345 kilometers (210 miles) of 36-inch pipeline largely within the existing Athabasca Pipeline right-of-way. The new line is designed to accommodate the need for additional capacity to serve Kirby area oil sands growth, beyond the expansion of the existing 30-inch pipeline to its maximum capacity of 570,000 bpd which was announced in the fall of 2010. Transferring existing Kirby area volumes to the new 36-inch line from the existing 30-inch line will also free up the latter to accommodate additional long-haul volumes originating from the Cheecham or Athabasca terminals further upstream on the Athabasca System.

Twinning our Athabasca system south of Kirby represents a highly efficient solution to the needs we are seeing for additional long-haul and short-haul capacity into Hardisty, leveraging off the advantages of our existing asset base and right-of-way, said Stephen J. Wuori, President, Liquids Pipelines. While anchored by the needs of our current connected projects, it is readily expandable to accommodate new projects which are also expected to require pipeline capacity beginning mid-decade. This project is a significant part of our overall plan to provide capacity for rapidly growing production from the Kirby area as well as from growth projects further north in the Athabasca region.

Mr. Wuori noted that the project is expected to deliver significant local benefits.

Based on our recent construction experience, we expect to create about 545 person years of employment in building the twinning project, said Mr. Wuori. As we move through construction, those crews will be purchasing goods and services, as well as housing and food from local retailers. Once in operation, the pipeline will generate significant tax revenues for communities along the right-of-way.

With the twinning project, Enbridge will have a total of \$3.6 billion of planned expansions of or additions to its Regional Oil Sands System which will go into service between 2011 to 2015, as well as a significant portfolio of additional projects which are under development to meet oil sands growth.

Enbridge's Regional Oil Sands System At-a-Glance:

Enbridge is the leading pipeline operator in the Fort McMurray to Edmonton/Hardisty corridor and well positioned to tie-in new oil sand developments to mainline pipelines and increase capacity for current customers. Enbridge's Regional Oil Sands Infrastructure includes the Athabasca and Waupisoo pipeline systems, connecting six producing oil sands projects. A map is available at www.enbridge.com

Athabasca Pipeline:

540-kilometre (335-mile) pipeline in operation since March 1999

Annual capacity of up to 570,000 barrels per day of crude oil (depending on crude viscosity) from the Athabasca and Cold Lake regions of Alberta, south to Hardisty, Alberta

Waupisoo Pipeline:

380-kilometre (235-mile) pipeline system in operation since June 2008

Annual capacity of up to 600,000 bpd of crude oil (depending on crude viscosity) from Enbridge's Cheecham Terminal to Edmonton Tankage:

Largest operator of contract storage facilities at the Hardisty hub with the 3.1 million barrel Hardisty Caverns storage facility, plus the 7.5 million barrel Hardisty Contract Terminal surface storage facility

More than 4.4 million barrels of operational storage associated with the Waupisoo and Athabasca pipelines and laterals

About Enbridge Inc.

Enbridge Inc., a Canadian company, is a North American leader in delivering energy and one of the Global 100 Most Sustainable Corporations. As a transporter of energy, Enbridge operates, in Canada and the U.S., the world's longest crude oil and liquids transportation system. The Company also has a growing involvement in the natural gas transmission and midstream businesses, and is expanding its interests in renewable and green energy technologies including wind and solar energy, hybrid fuel cells and carbon dioxide sequestration. As a distributor of energy, Enbridge owns and operates Canada's largest natural gas distribution company, and provides distribution services in Ontario, Quebec, New Brunswick and New York State. Enbridge employs approximately 6,400 people, primarily in Canada and the U.S. and is ranked as one of Canada's Greenest Employers, and one of the Top 100 Companies to Work for in Canada. Enbridge's common shares trade on the Toronto and New York stock exchanges under the symbol ENB. For more information, visit enbridge.com

NEWS RELEASE

Enbridge Announces \$300 Million Preferred Share Offering

NOT FOR DISTRIBUTION TO U.S. NEWSWIRE SERVICES OR FOR DISSEMINATION IN THE U.S.

CALGARY, Alberta, September 21, 2011 Enbridge Inc. (TSX:ENB) (NYSE:ENB) today announced that it has entered into an agreement with a group of underwriters to sell 12 million cumulative redeemable preference shares, series b (the Series B Preferred Shares) at a price of \$25.00 per share for distribution to the public. Closing of the offering is expected on or about September 30, 2011.

The holders of Series B Preferred Shares will be entitled to receive fixed cumulative dividends at an annual rate of \$1.00 per share, payable quarterly on the 1st day of March, June, September and December, as and when declared by the board of directors of Enbridge, yielding 4.00 per cent per annum, for the initial fixed rate period ending June 1, 2017. The first quarterly dividend payment date is scheduled for March 1, 2012. The dividend rate will reset on June 1, 2017 and every five years thereafter at a rate equal to the sum of the then five-year Government of Canada bond yield plus 2.40% per cent. The Series B Preferred Shares are redeemable by Enbridge, at its option, on June 1, 2017 and on June 1 of every fifth year thereafter.

The holders of Series B Preferred Shares will have the right to convert their shares into cumulative redeemable preferred shares series C (the Series C Preferred Shares), subject to certain conditions, on June 1, 2017 and on June 1 of every fifth year thereafter. The holders of Series C Preferred Shares will be entitled to receive quarterly floating rate cumulative dividends, as and when declared by the board of directors of Enbridge, at a rate equal to the sum of the then 90-day Government of Canada treasury bill rate plus 2.40% per cent.

Enbridge has granted to the underwriters an option, exercisable at any time up to 48 hours prior to the closing of the offering, to purchase up to an additional two million Series B Preferred Shares at a price of \$25.00 per share.

The offering is being made only in Canada by means of a prospectus. Proceeds will be used to reduce outstanding indebtedness, for capital expenditures and for general corporate purposes.

The syndicate of underwriters is led by Scotia Capital Inc., RBC Capital Markets, and TD Securities Inc.

This news release does not constitute an offer to sell or a solicitation of an offer to buy the preferred shares in any jurisdiction. The preferred shares offered have not been registered under the United States Securities Act of 1933, as amended, and may not be offered or sold within the United States unless registered under the U.S. Securities Act and applicable state securities laws or an exemption from such registration is available.

NEWS RELEASE

Enbridge Increases Size of Preferred Share Offering

NOT FOR DISTRIBUTION TO U.S. NEWSWIRE SERVICES OR FOR DISSEMINATION IN THE U.S.

CALGARY, Alberta, September 21, 2011 Enbridge Inc. (TSX:ENB) (NYSE:ENB) today announced that as a result of strong investor demand for its previously announced offering of cumulative redeemable preference shares, series b (the Series B Preferred Shares), the size of the offering has been increased to 20 million shares. The aggregate gross proceeds will now be \$500 million.

The holders of Series B Preferred Shares will be entitled to receive fixed cumulative dividends at an annual rate of \$1.00 per share, payable quarterly on the 1st day of March, June, September and December, as and when declared by the board of directors of Enbridge, yielding 4.00 per cent per annum, for the initial fixed rate period ending June 1, 2017. The first quarterly dividend payment date is scheduled for March 1, 2012. The dividend rate will reset on June 1, 2017 and every five years thereafter at a rate equal to the sum of the then five-year Government of Canada bond yield plus 2.40%. The Series B Preferred Shares are redeemable by Enbridge, at its option, on June 1, 2017 and on June 1 of every fifth year thereafter.

The holders of Series B Preferred Shares will have the right to convert their shares into cumulative redeemable preferred shares series C (the Series C Preferred Shares), subject to certain conditions, on June 1, 2017 and on June 1 of every fifth year thereafter. The holders of Series C Preferred Shares will be entitled to receive quarterly floating rate cumulative dividends, as and when declared by the board of directors of Enbridge, at a rate equal to the sum of the then 90-day Government of Canada treasury bill rate plus 2.40%.

The offering is being made only in Canada by means of a prospectus. Proceeds will be used to reduce outstanding indebtedness, for capital expenditures and for general corporate purposes.

This news release does not constitute an offer to sell or a solicitation of an offer to buy the preferred shares in any jurisdiction. The preferred shares offered have not been registered under the United States Securities Act of 1933, as amended, and may not be offered or sold within the United States unless registered under the U.S. Securities Act and applicable state securities laws or an exemption from such registration is available.

NEWS RELEASE

Veresen and Enbridge Continue to Grow Bakken Midstream Services

Tioga Lateral Pipeline to connect Bakken natural gas production to Alliance Pipeline and Aux Sable processing facilities

CALGARY, Alberta, September 27, 2011 Veresen Inc. (TSX: VSN) and Enbridge Inc. (TSX, NYSE: ENB), joint owners of Alliance Pipeline, today announced approval by their respective boards of directors which will allow Alliance to proceed with development of a natural gas pipeline lateral and associated facilities to connect production from the Hess Tioga field processing plant in the Bakken region of North Dakota to the Alliance mainline near Sherwood, ND. Alliance has executed a precedent agreement with Hess Corporation as an anchor shipper on the Tioga Lateral pipeline, including matching capacity on the Alliance mainline. Aux Sable (owned by Veresen, Enbridge and Williams Partners, L.P.) and Hess have reached a concurrent agreement for the provision of NGL services. The pipeline is expected to be in service by the third quarter of 2013, subject to regulatory and other required approvals.

The 77-mile (124-kilometer) Tioga Lateral will facilitate movement of the high-energy, liquids-rich natural gas to natural gas liquid (NGL) processing facilities owned by Aux Sable Liquids Products at the terminus of the Alliance mainline system. Through the agreement with Hess, Alliance has secured sufficient commitment to proceed with the Tioga Lateral and will hold an Open Season to solicit additional shipper interest. The pipeline will have an initial design capacity of approximately 120 million cubic feet per day, which can be expanded based on shipper demand.

Stephen White, President and CEO of Veresen commented, "With the rapid increase in crude oil drilling activity in the Bakken, there is a corresponding need for additional capacity to gather and process associated liquids-rich natural gas volumes. This creates tremendous opportunity for Veresen to leverage our core assets to create timely, flexible, market-driven solutions to enable producers to generate value from the NGL stream.

Enbridge continues to focus on the Bakken as a strategic priority," said Al Monaco, President, Gas Pipelines, Green Energy and International, Enbridge Inc. "Our significant investments in crude oil transportation systems in North Dakota and Saskatchewan enable Bakken producers

to access multiple markets. We're now extending those services to natural gas and NGL midstream infrastructure. The Tioga Lateral and the recently acquired Prairie Rose Pipeline and Palermo Condensate Recovery Plant (previously known as the Stanley Gas Plant) allow us to attract additional gas volumes to our Alliance Pipeline and draw additional liquids rich gas to our Aux Sable NGL extraction and fractionation facilities.

The Bakken region of southern Saskatchewan and northern North Dakota is one of the most prolific resource plays in North America. While expansion in the Bakken has been primarily driven by oil shale, there is also significant value in the natural gas and NGL reserves associated with the oil.

Together, Alliance and Aux Sable offer Bakken natural gas producers access to high value downstream gas and Midwest NGL markets. Alliance carries high BTU gas to Aux Sable's processing and NGL extraction plant in Channahon, Illinois. Utilization of these existing midstream assets to serve the Bakken provides producers with readily available solutions to transport gas to market and realize value from the NGLs extracted. Leveraging existing infrastructure minimizes the environmental and stakeholder impact of new construction, allowing for flexible, timely and cost-efficient expansion as Bakken volumes increase.

About Veresen Inc.

Veresen Inc. is a publicly traded dividend paying corporation based in Calgary, Alberta, that owns and operates energy infrastructure assets across North America. Its common shares and 5.75% convertible unsecured subordinated debentures, Series C due July 31, 2017 are listed on the Toronto Stock Exchange under the symbols VSN and VSN.DB.C, respectively. Veresen is engaged in three principal businesses: a pipeline transportation business comprised of interests in two pipeline systems, the Alliance Pipeline and the Alberta Ethane Gathering System; a midstream business which includes ownership interests in a world-class extraction facility near Chicago and other gas processing energy infrastructure; and a power business with renewable and gas-fired facilities and development projects in Canada and the United States, and district energy systems in Ontario and Prince Edward Island. Veresen and each of its pipeline, midstream and power businesses are also actively developing a number of greenfield projects. In the normal course of its business, Veresen and each of its businesses regularly evaluate and pursue acquisition and development opportunities. For more information visit www.vereseninc.com.

**ENTERPRISE AND ENBRIDGE TO DEVELOP CRUDE OIL PIPELINE FROM
CUSHING TO THE GULF COAST**

Open season on proposed pipeline to begin October 3, 2011

HOUSTON, Texas and CALGARY, Alberta (September 29, 2011) Enterprise Products Partners L.P. (NYSE: EPD) (Enterprise) and Enbridge Inc.(NYSE/TSX:ENB) (Enbridge) today announced plans to design, construct and operate a new pipeline to transport crude oil from the oversupplied hub at Cushing, Oklahoma to the Texas Gulf Coast refining complex. Initially, the Wrangler Pipeline will have the capacity to transport up to 800,000 barrels per day (BPD) of crude oil and accommodate the constrained medium-to-light crude oil currently stranded at Cushing and priced at a substantial discount to the oil imports that account for most of the supply being used by Gulf Coast refiners. The pipeline will also have the capability to handle additional supplies of crude oil arriving at Cushing from other North American producers. In anticipation of future increases in crude oil volumes delivered to the Cushing area, the joint venture partners will design the pipeline to be easily expanded.

The proposed 36-inch diameter pipeline will originate at the existing Enbridge Cushing Terminal and extend approximately 500 miles (800 kilometers) southward, closely following existing pipeline corridors, to Enterprise s ECHO crude oil storage terminal in southeast Harris County, Texas, providing access to refineries in Texas City, Pasadena/Deer Park, Baytown and along the Houston Ship Channel. New storage tankage necessary for pipeline operations will be located at the ECHO site and included in the joint venture. The project will also include a new 85-mile (137-km) pipeline to the Beaumont/Port Arthur refining center.

We are extremely pleased to partner with Enbridge on this important project and believe that our complementary skills and shared strategic vision will help ensure success, and offer the most efficient and expedient solution for meeting the industry s need for additional crude oil pipeline infrastructure, said Michael A. Creel, president and chief executive officer of Enterprise s general partner. This pipeline will be able to transport all grades of crude oil in batched configuration to meet the diverse needs of shippers, allowing producers to maximize the value of their crude oil and provide a more reliable source of domestic supply for Gulf Coast refiners.

The Wrangler Pipeline will offer flexible solutions to shippers seeking to move crude oil out of the Cushing hub, solving the current lack of transportation options following recent changes in supply routes in North America, said Patrick D. Daniel, president and chief executive officer, Enbridge Inc. We're pleased that Enterprise shares our vision to design this pipeline to meet the needs over the long-term as the Cushing Hub continues to attract both light and heavy production from North American producers. Combining Enbridge's large storage position at Cushing, with Enterprise's ECHO terminal in Houston will provide tremendous connectivity for the industry.

U.S. Midcontinent crude oil supplies are growing rapidly and that trend is expected to continue as a result of the development of shale plays such as Bone Springs/Avalon, Bakken, Niobrara and Barnett. Additionally, refiners and oil producers are seeking new pipeline routes south of Cushing rather than the historical northerly supply routes out of that crude oil hub. Another important driver of this project is the demand by Gulf Coast refineries for Western Canadian crude oil supplies, which have been growing since Alberta oil first accessed the Cushing Hub over the last decade. The Wrangler Pipeline will be designed to accommodate quality-controlled batches of a variety of grades and sources of crude oil, providing options for economical, efficient and safe transportation of crude oil.

Open season to begin October 3, 2011

Also today, Enterprise and Enbridge announced plans for a **binding open commitment period** for available capacity on the new pipeline, which will begin at 8 a.m. CDT, Monday, October 3, 2011, and continue until 5 p.m. CDT Wednesday, November 2, 2011. Subject to the required regulatory approvals and sufficient long-term commitments from interested shippers, the pipeline is expected to be in service by mid-2013. Construction of the project is expected to be managed by Enbridge with Enterprise serving as operator.

NEWS RELEASE

Enbridge Announces Closing of \$500 Million Preferred Share Offering

NOT FOR DISTRIBUTION TO U.S. NEWSWIRE SERVICES

OR FOR DISSEMINATION IN THE U.S.

CALGARY, Alberta, September 30, 2011 Enbridge Inc. (TSX:ENB) (NYSE:ENB) today announced it has closed its previously announced public offering of cumulative redeemable preferred shares, series b (the Series B Preferred Shares) by a syndicate of underwriters co-led by Scotia Capital Inc., RBC Capital Markets, and TD Securities Inc. Enbridge issued 20 million Series B Preferred Shares for gross proceeds of \$500 million. The Series B Preferred Shares will begin trading on the TSX today under the symbol ENB.PR.B. The proceeds will be used for capital expenditures, to repay indebtedness and for other general corporate purposes.

This news release does not constitute an offer to sell securities, nor is it a solicitation of an offer to buy securities, in any jurisdiction. All sales will be made through registered securities dealers in jurisdictions where the offering has been qualified for distribution.

About Enbridge Inc.

Enbridge Inc., a Canadian company, is a North American leader in delivering energy and one of the Global 100 Most Sustainable Corporations. As a transporter of energy, Enbridge operates, in Canada and the U.S., the world's longest crude oil and liquids transportation system. The Company also has a growing involvement in the natural gas transmission and midstream businesses, and is expanding its interests in renewable and green energy technologies including wind and solar energy, hybrid fuel cells and carbon dioxide sequestration. As a distributor of energy, Enbridge owns and operates Canada's largest natural gas distribution company, and provides distribution services in Ontario, Quebec, New Brunswick and New York State. Enbridge employs approximately 6,400 people, primarily in Canada and the U.S. and is ranked as one of Canada's Greenest Employers, and one of the Top 100 Companies to Work for in Canada. Enbridge's common shares trade on the Toronto and New York stock exchanges under the symbol ENB. For more information, visit enbridge.com
