**WELLS FARGO ADVANTAGE GLOBAL DIVIDEND OPPORTUNITY FUND**

NOTES TO PORTFOLIO OF INVESTMENTS JANUARY 31, 2012 (UNAUDITED)

The following notes are to be read in conjunction with the Portfolio of Investments for Wells Fargo Advantage Global Dividend Opportunity Fund (the Fund).

**Securities valuation**

Investments in equity securities are valued each business day as of the close of regular trading on the New York Stock Exchange, which is usually 4:00 p.m. (Eastern Time). Securities which are traded on a national or foreign securities exchange are valued at the last reported sales price, except that securities listed on The Nasdaq Stock Market, Inc. ( Nasdaq ) are valued at the Nasdaq Official Closing Price ( NOCP ), and if no NOCP is available, then at the last reported sales price. If no sales price is shown on the Nasdaq, the bid price will be used. In the absence of any sale of securities listed on the Nasdaq, and in the case of other securities (including U.S. Government obligations, but excluding debt securities maturing in 60 days or less), the price will be deemed stale and the valuations will be determined in accordance with the Fund's Fair Value Procedures.

Securities denominated in foreign currencies are translated into U.S. dollars using the closing rates of exchange in effect on the day of valuation.

Many securities markets and exchanges outside the U.S. close prior to the close of the New York Stock Exchange and therefore may not fully reflect trading or events that occur after the close of the principal exchange in which the foreign investments are traded but before the close of the New York Stock Exchange. If such trading or events are expected to materially affect the value of the investments, then those investments are fair valued following procedures approved by the Board of Trustees. These procedures take into account multiple factors including movements in U.S. securities markets after foreign exchanges close. Depending on market activity, such fair valuations may be frequent. Such fair value pricing may result in NAVs that are higher or lower than NAVs based on the closing price or latest quoted bid price.

Investments in open-end mutual funds and non-registered investment companies are generally valued at net asset value.

Investments which are not valued using any of the methods discussed above, are valued at their fair value, as determined by procedures established in good faith and approved by the Board of Trustees.

**Foreign currency translation**

The accounting records of the Fund are maintained in U.S. dollars. Assets, including investment securities, and liabilities denominated in foreign currency are translated into U.S. dollars at the prevailing rates of exchange at the date of valuation. Purchases and sales of securities, and income and expenses are translated at the prevailing rate of exchange on the respective dates of such transactions. Reported net realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded and the U.S. dollar equivalent of the amounts actually paid or received. Net unrealized foreign exchange gains and losses arise from changes in the fair value of assets and liabilities other than investments in securities resulting in changes in exchange rates.

The changes in net assets arising from changes in exchange rates and the changes in net assets resulting from changes in market prices of securities are not separately presented. Such changes are recorded with net realized and unrealized gains or losses from investments. Gains and losses from certain foreign currency transactions are treated as ordinary income for U.S. federal income tax purposes.

**Options**

The Fund may be subject to equity price risk in the normal course of pursuing its investment objectives. The Fund may write covered call options or secured put options. When the Fund writes an option, an amount equal to the premium received is recorded as a liability and is subsequently adjusted to the current market value of the written option. Premiums received from written options, which expire unexercised, are recognized as realized gains from investments on the expiration date. The difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is treated as a realized gain or loss. If a call option is exercised, the premium is added to the proceeds from the sale of the underlying security in calculating the realized gain or loss on the sale. If a put option is exercised, the premium reduces the cost of the security purchased. The Fund, as a writer of an option, bears the market risk of an unfavorable change in the price of the security underlying the written option.

The Fund may also purchase call or put options. The premium is included in the Statement of Assets and Liabilities as an investment which is subsequently adjusted to the current market value of the option. Premiums paid for purchased options which expire are recognized as realized losses from investments on the expiration date. Premiums paid for purchased options which are exercised or closed are added to the amount paid or offset against the proceeds on the underlying security to determine the realized gain or loss. The risk of loss associated with purchased options is limited to the premium paid.

Options traded on an exchange are regulated and terms of the options are standardized. Options traded over the counter expose the Fund to counterparty risk in the event the counterparty does not perform. This risk is mitigated by having a master netting arrangement between the Fund and the counterparty and by having the counterparty post collateral to cover the Fund's exposure to the counterparty.

**Fair valuation measurements**

Fair value measurements of investments are determined within a framework that has established a fair value hierarchy based upon the various data inputs utilized in determining the value of the Fund's investments. The three-level hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to significant unobservable inputs (Level 3). The Fund's investments are classified within the fair value hierarchy based on the lowest level of input that is significant to the fair value measurement. The inputs are summarized into three broad levels as follows:

Level 1 quoted prices in active markets for identical securities

Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

As of January 31, 2012, the inputs used in valuing the Fund's assets, which are carried at fair value, were as follows:

	Quoted Prices (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
<b>Investments in Securities</b>				
<b>Equity securities</b>				
<i>Common stocks</i>	\$ 312,730,856*	\$ 633,944*	\$ 0	\$ 313,364,800
<i>Investment companies</i>	2,645,000	0	0	2,645,000
<i>Preferred stocks</i>	75,095,157	13,951,494	0	89,046,651
<b>Short-term investments</b>				
<i>Investment companies</i>	12,318,072	0	0	12,318,072
	\$ 402,789,085	\$ 14,585,438	\$ 0	\$ 417,374,523

\* Transfers in and transfers out are recognized at the end of the reporting period. At the end of the period, foreign securities valued in the amount of \$137,986,427 in common stocks were transferred out of Level 2 and into Level 1 since adjustments to prices of foreign securities were not necessary at January 31, 2012 due to movements against a specified benchmark.

As of January 31, 2012, the inputs used in valuing the Fund's other financial instruments, which are carried at fair value, were as follows:

Other financial instruments	Quoted Prices (Level 1)	Significant Other Observable Inputs	Significant Unobservable Inputs	Total
-----------------------------	----------------------------	--	---------------------------------------	-------

		(Level 2)	(Level 3)	
<b>Written options</b>	\$ 0	\$ (381,411)	\$ 0	\$ (381,411)

**Derivative transactions**

During the three months ended January 31, 2012, the Fund entered into written options for economic hedging purposes.

During the three months ended January 31, 2012 the Fund had written option activities as follows:

	Number of Contracts	Premiums Received
Options outstanding at March 31, 2011	8,718	\$ 1,219,500
Options written	28,138	3,431,399
Options expired	(20,248)	(3,414,579)
Options terminated in closing purchase transactions	(6,428)	(734,646)
Options exercised	0	0
Options outstanding at September 30, 2011	10,180	\$ 501,674

Open call options written at January 31, 2012, were as follow for the Fund:

Expiration Date	Issuer Name	Number of Contracts	Strike Price	Value
February 2012	AEX Index	461	342 EUR	\$ (7,405)
February 2012	CAC Index	443	3,544 EUR	(13,345)
February 2012	DAX Index	460	6,841 EUR	(34,519)
February 2012	EEM Equity Index	4,626	44 USD	(79,650)
February 2012	FTSE MIB Index	377	16,511EUR	(140,406)
February 2012	IBEX Index	1,717	9,060 EUR	(50,295)
February 2012	OMX Index	1,246	1,105 SEK	(11,851)
February 2012	RTY Index	244	839 USD	(23,427)
February 2012	SX5E Index	606	2,590 EUR	(20,513)

As of January 31, 2012, the Fund had outstanding written options with total premiums received that averaged \$1,288,194 during the three months ended January 31, 2012. As of January 31, 2012, the Fund had segregated \$508,636 as cash collateral for written options.
