EXPRESS SCRIPTS HOLDING COMPANY

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

Note 1 Summary of significant accounting policies

On July 20, 2011, Express Scripts, Inc. (ESI) entered into a definitive merger agreement (the Merger Agreement) with Medco Health Solutions, Inc. (Medco), which was amended by Amendment No. 1 thereto on November 7, 2011, providing for the combination of ESI and Medco under a new holding company named Aristotle Holding, Inc. The transactions contemplated by the Merger Agreement (the Merger) were consummated on April 2, 2012. Aristotle Holding, Inc. was renamed Express Scripts Holding Company (the Company or Express Scripts) concurrently with the consummation of the Merger. We, our or us refers to Express Scripts Holding Company and its subsidiaries. For financial reporting and accounting purposes, ESI was the acquirer of Medco. The consolidated financial statements reflect the results of operations and financial position of ESI for 2011 periods and through April 1, 2012. However, references to amounts for periods after the closing of the Merger on April 2, 2012 relate to Express Scripts.

Express Scripts' significant accounting policies, normally included in financial statements prepared in conformity with generally accepted accounting principles, have been omitted from this Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). Express Scripts believes the disclosures contained in this Form 10-Q are adequate to fairly state the information when read in conjunction with the Notes to the Consolidated Financial Statements included in ESI's Annual Report on Form 10-K for the year ended December 31, 2011. Upon consummation of the Merger on April 2, 2012, Medco's significant accounting policies were conformed to ESI's significant accounting policies. However, two Medco historical accounting policies have been adopted related to the Medicare prescription drug program and the Cash balance pension plans.

Medicare Prescription Drug Program. Express Scripts' revenues include premiums associated with our Medicare prescription drug program (PDP) risk-based product offerings. These products involve prescription dispensing for beneficiaries enrolled in the Centers for Medicare & Medicaid Services (CMS)-sponsored Medicare Part D Prescription Drug Program (Medicare Part D) prescription drug benefit. We also offer numerous customized benefit plan designs to employer group retiree plans under the Medicare Part D prescription drug benefit.

The PDP premiums are determined based on our annual bid and related contractual arrangements with CMS. The PDP premiums are primarily comprised of amounts received from CMS as part of a direct subsidy and an additional subsidy from CMS for low-income member premiums, as well as premium payments received from members. These premiums are recognized ratably to revenues over the period in which members are entitled to receive benefits. Premiums received in advance of the applicable benefit period are deferred and recorded in accrued expenses on the consolidated balance sheet. There is a possibility that the annual costs of drugs may be higher or lower than premium revenues. As a result, CMS provides a risk corridor adjustment for the standard drug benefit that compares our actual annual drug costs incurred to the targeted premiums in our CMS-approved bid. Based on specific collars in the risk corridor, we will receive from CMS additional premium amounts or be required to refund to CMS previously received premium amounts. We calculate the risk corridor adjustment on a quarterly basis based on drug cost experience to date and record an adjustment to revenues with a corresponding receivable from or payable to CMS reflected on the consolidated balance sheet.

In addition to PDP premiums, there are certain co-payments and deductibles (the cost share) due from members based on prescription orders by those members, some of which are subsidized by CMS in cases of low-income membership. Beginning in 2011, non-low-income members received a cost share benefit under the coverage gap discount program with brand pharmaceutical manufacturers. For subsidies received in advance, the amount is deferred and recorded in accrued expenses on the consolidated balance sheet. If there is cost share due from members, pharmaceutical manufacturers or CMS, or premiums due from members, the amount is accrued and recorded in receivables, net, on the consolidated balance sheet. After the end of the contract year and based on actual annual drug costs incurred, cost share amounts are reconciled with CMS and the corresponding receivable or payable is settled. The cost share is treated consistently as other co-payments derived from providing Pharmacy Benefit Management (PBM) services, as a component of revenues on the consolidated statement of operations.

Table of Contents

Express Scripts' cost of revenues includes the cost of drugs dispensed by our mail-order pharmacies or retail network for members covered under our Medicare PDP product offerings and is recorded at cost as incurred. We receive a catastrophic reinsurance subsidy from CMS for approximately 80% of costs incurred by individual members in excess of the individual annual out-of-pocket maximum. The subsidy is reflected as an offsetting credit in cost of revenues to the extent that catastrophic costs are incurred. Catastrophic reinsurance subsidy amounts received in advance are deferred and recorded in accrued expenses on the consolidated balance sheet. If there are catastrophic reinsurance subsidies due from CMS, the amount is accrued and recorded in receivables, net, on the consolidated balance sheet. After the end of the contract year and based on actual annual drug costs incurred, catastrophic reinsurance amounts are reconciled with CMS and the corresponding receivable or payable is settled.

Pension Plans. Express Scripts has elected to determine the projected benefit obligation for cash balance pension plans as the value of the benefits to which employees participating in the plans would be entitled if they separated from service immediately. The amount by which the projected benefit obligation exceeds the fair value of the pension plan assets is recorded in other liabilities on the consolidated balance sheet.

The determination of our expense for pension plans is based on management's assumptions, which are developed with the assistance of actuaries. We reassess the plan assumptions on a regular basis. The expected rate of return for the pension plan represents the average rate of return to be earned on the plan assets over the period the benefits included in the benefit obligation are to be paid. The expected return on plan assets is determined by multiplying the expected long-term rate of return by the fair value of the plan assets and contributions, offset by expected return on expected benefit payments. In developing the expected rate of return we consider long-term compounded annualized returns of historical market data, as well as historical actual returns on our plan assets. Using this reference information, we develop forward-looking return expectations for each asset class and a weighted average expected long-term rate of return for a targeted portfolio allocated across these investment categories. As a result of this analysis, for 2012, the expected rate of return assumption is 7.5% for the pension plans.

We believe the accompanying unaudited consolidated financial statements reflect all adjustments (consisting of only normal recurring adjustments) necessary to state fairly the unaudited consolidated balance sheet at June 30, 2012, the unaudited consolidated statement of operations and unaudited consolidated statement of comprehensive income for the three and six months ended June 30, 2012 and 2011, the unaudited consolidated statement of changes in stockholders' equity for the six months ended June 30, 2012, and the unaudited consolidated statement of cash flows for the six months ended June 30, 2012 and 2011. Operating results for the three and six months ended June 30, 2012 include integration related expenses and are not necessarily indicative of the results that may be expected for the year ending December 31, 2012.

Note 2 Fair value measurements

Accounting guidance regarding fair value measurement establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. These tiers include: Level 1, defined as observable inputs such as quoted prices in active markets for identical assets or liabilities; Level 2, defined as inputs other than quoted prices for similar assets and liabilities in active markets that are either directly or indirectly observable; and Level 3, defined as unobservable inputs for which little or no market data exists, therefore requiring an entity to develop its own assumptions.

Financial assets accounted for at fair value on a recurring basis include cash equivalents of \$903.4 million and \$1,817.4 million, restricted cash and investments of \$28.9 million and \$17.8 million, and trading securities (included in other assets) of \$7.8 million and \$14.1 million at June 30, 2012 and December 31, 2011, respectively. These assets are carried at fair value based on quoted prices in active markets for identical securities (Level 1 inputs). Cash equivalents include investments in AAA-rated money market mutual funds with maturities of less than 90 days.

Table of Contents

The carrying value of cash and cash equivalents (Level 1), accounts receivable, claims and rebates payable, and accounts payable approximated fair values due to the short-term maturities of these instruments. The fair value, which approximates the carrying value, of our bank credit facility (Level 2) was estimated using either quoted market prices or the current rates offered to us for debt with similar maturities. The carrying values and the fair values of our senior notes are shown, net of unamortized discount, in the following table:

<i>(in millions)</i>	June 30, 2012		December 31, 2011	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
March 2008 Senior Notes (acquired)				
7.125% senior notes due 2018	\$ 1,436.3	\$ 1,483.2	\$	\$
6.125% senior notes due 2013	310.7	310.8		
	1,747.0	1,794.0		
June 2009 Senior Notes				
6.250% senior notes due 2014	998.2	1,092.0	997.8	1,085.0
7.250% senior notes due 2019	497.4	631.5	497.3	593.1
5.250% senior notes due 2012			999.9	1,017.5
	1,495.6	1,723.5	2,495.0	2,695.6
September 2010 Senior Notes (acquired)				
2.75% senior notes due 2015	512.9	514.5		
4.125% senior notes due 2020	508.0	532.5		
	1,020.9	1,047.0		
May 2011 Senior Notes				
3.125% senior notes due 2016	1,495.2	1,566.0	1,494.6	1,493.7
November 2011 Senior Notes				
3.500% senior notes due 2016	1,249.7	1,323.8	1,249.7	1,265.3
4.750% senior notes due 2021	1,239.8	1,393.8	1,239.4	1,295.8
2.750% senior notes due 2014	899.2	922.5	899.0	907.8
6.125% senior notes due 2041	698.4	863.8	698.4	755.3
	4,087.1	4,503.9	4,086.5	4,224.2
February 2012 Senior Notes				
2.650% senior notes due 2017	1,486.5	1,527.0		
2.100% senior notes due 2015	995.7	1,010.0		
3.900% senior notes due 2022	979.1	1,050.0		
	3,461.3	3,587.0		
Total	\$ 13,307.1	\$ 14,221.4	\$ 8,076.1	\$ 8,413.5

The fair values of our senior notes were estimated based on observable market information (Level 2 inputs). In determining the fair value of liabilities, we took into consideration the risk of nonperformance. Nonperformance risk refers to the risk that the obligation will not be fulfilled and affects the value at which the liability would be transferred to a market participant. This risk did not have a material impact on the fair value of our liabilities.

Note 3 Changes in business

As a result of the Merger on April 2, 2012, Medco and ESI each became 100% owned subsidiaries of Express Scripts and former Medco and ESI stockholders became owners of stock in Express Scripts, which is listed for trading on the NASDAQ stock exchange. Upon closing of the Merger, former ESI stockholders owned approximately 59% of Express Scripts and former Medco stockholders owned approximately 41%. Per the terms of the Merger Agreement, upon consummation of the Merger on April 2, 2012, each share of Medco common stock was converted into

Edgar Filing: Express Scripts Holding Co. - Form 10-Q

(i) the right to receive \$28.80 in cash, without interest and (ii) 0.81 shares of Express Scripts stock. Holders of Medco stock options, restricted stock units, and deferred stock units received replacement awards at an exchange ratio of 1.3474 Express Scripts stock awards for each Medco award owned, which is equal to the sum of (i) 0.81 and (ii) the quotient obtained by dividing (1) \$28.80 (the cash component of the Merger consideration) by (2) an amount equal to the average of the closing prices of ESI common stock on the NASDAQ for each of the 15 consecutive trading days ending with the fourth complete trading day prior to the completion of the Merger.

Table of Contents

Based on the opening price of Express Scripts stock on April 2, 2012, the purchase price was comprised of the following:

<i>(in millions)</i>	
Cash paid to Medco stockholders ⁽¹⁾	\$ 11,309.6
Value of shares of common stock issued to Medco stockholders ⁽²⁾	17,963.8
Value of stock options issued to holders of Medco stock options ^{(3) (4)}	706.1
Value of restricted stock units issued to holders of Medco restricted stock units ⁽³⁾	174.9
Total consideration	\$ 30,154.4

- (1) Equals Medco outstanding shares multiplied by \$28.80 per share.
- (2) Equals Medco outstanding shares immediately prior to the Merger multiplied by the exchange ratio of 0.81, multiplied by the Express Scripts opening share price on April 2, 2012 of \$56.49.
- (3) In accordance with applicable accounting guidance, the fair value of replacement awards attributable to precombination service is recorded as part of the consideration transferred in the Merger, while the fair value of replacement awards attributable to postcombination service is recorded separately from the business combination and recognized as compensation cost in the post-acquisition period over the remaining service period.
- (4) The fair value of the Company's equivalent stock options was estimated using the Black-Scholes valuation model utilizing various assumptions. The expected volatility of the Company's common stock price is a blended rate based on the average historical volatility over the expected term based on daily closing stock prices of ESI and Medco common stock. The expected term of the option is based on Medco historical employee stock option exercise behavior as well as the remaining contractual exercise term.

Express Scripts believes the Merger will combine the expertise of two complementary pharmacy benefit managers to further efforts to lower the cost of prescription drugs and improve the quality of care.

The unaudited consolidated statement of operations for Express Scripts for the three months and six months ended June 30, 2012 includes Medco's total revenues and net loss, which includes integration expense and amortization, following consummation of the Merger on April 2, 2012 of \$15.7 billion and \$(35.3) million, respectively.

The following unaudited pro forma information presents a summary of Express Scripts' combined results of operations for six months ended June 30, 2012 and 2011 as if the Merger and related financing transactions had occurred at January 1, 2011. The following pro forma financial information is not necessarily indicative of the results of operations as they would have been had the transactions been effected on the assumed date, nor is it necessarily an indication of trends in future results for a number of reasons, including, but not limited to, differences between the assumptions used to prepare the pro forma information, basic shares outstanding and dilutive equivalents, cost savings from operating efficiencies, potential synergies, and the impact of incremental costs incurred in integrating the businesses:

<i>(in millions, except per share data)</i>	Three Months Ended		Six Months Ended

Basic earnings per share	\$ 0.37	\$ 0.18	\$ 0.75	\$ 0.22
Diluted earnings per share	\$ 0.36	\$ 0.18	\$ 0.74	\$ 0.22

Pro forma net income for the three and six months ended June 30, 2011 includes total non-recurring amounts of \$355.8 million and \$827.9 million, respectively, related to estimated severance payments, accelerated stock-based compensation, and transaction and integration costs incurred in connection with the Merger. These amounts represent the best available estimates as of the date of issuance. Actual costs recorded in the year ended December 31, 2012 may differ materially from estimates utilized for pro forma purposes.

Table of Contents

The Merger is accounted for under the acquisition method of accounting with ESI treated as the acquirer for accounting purposes. The purchase price has been allocated based on the estimated fair value of net assets acquired and liabilities assumed at the date of the acquisition. Express Scripts retained third-party valuation advisors to conduct analyses of the assets acquired and liabilities assumed in order to assist in the determination of the preliminary purchase price allocation. The preliminary purchase price allocation may be subject to further refinement and may result in significant changes. These changes will primarily relate to the fair value of obligations acquired. Express Scripts expects that if any refinements become necessary, they will be completed by April 2013. There can be no assurance that such finalization will not result in material changes. The following table summarizes Express Scripts' preliminary estimates of the fair values of the assets acquired and liabilities assumed in the Medco acquisition:

<i>(in millions)</i>	Amounts Recognized as of Acquisition Date	
Current assets	\$	6,878.6
Property and equipment		1,397.6
Goodwill		23,878.6
Acquired intangible assets		16,112.7
Other noncurrent assets		48.3
Current liabilities		(8,911.4)
Long-term debt		(3,008.3)
Deferred income taxes		(5,886.7)
Other noncurrent liabilities		(355.0)
Total	\$	30,154.4

A portion of the excess of purchase price over tangible net assets acquired has been allocated to intangible assets consisting of customer contracts in the amount of \$15,751.0 million with an estimated weighted average amortization period of 15.4 years. Additional intangible assets consist of trade names in the amount of \$353.0 million with an estimated weighted average amortization period of 10 years and miscellaneous intangible assets of \$8.7 million with an estimated weighted average amortization period of 5 years. The acquired intangible assets have been preliminarily valued using an income approach and are being amortized on a basis that approximates the pattern of benefit.

The excess of purchase price over tangible net assets and identified intangible assets acquired has been preliminarily allocated to goodwill in the amount of \$23,878.6 million. The majority of the goodwill recognized as part of the Medco acquisition is reported under our PBM segment and reflects our expected synergies from combining operations, such as improved economies of scale and cost savings. None of the goodwill recognized is expected to be deductible for income tax purposes and is not amortized.

As a result of the Merger on April 2, 2012, we acquired the receivables of Medco. The gross contractual amounts receivable and fair value of these receivables as of the acquisition date are shown below. Of the gross amounts due under the contracts as of the date of acquisition, we estimated \$14.5 million related to client accounts receivables to be uncollectible.

<i>(in millions)</i>	Gross Contractual Amounts Receivable		Fair Value
Manufacturer Accounts Receivables	\$	1,895.2	\$ 1,895.2
Client Accounts Receivables		2,432.2	2,408.9
Total	\$	4,327.4	\$ 4,304.1

ESI and Medco each retain a one-sixth ownership in SureScripts. As a result of the Merger, the combined companies in total retain a one-third ownership in SureScripts. Due to the increased ownership percentage, we now account for the investment in SureScripts using the equity method and have recorded an undistributed gain of \$4.3 million for the three months and six months ended June 30, 2012.

Table of Contents

Note 4 Property and equipment

Property and equipment, at cost, consists of the following:

<i>(in millions)</i>	June 30, 2012	December 31, 2011
Land and buildings	\$ 239.7	\$ 11.3
Furniture	101.9	36.7
Equipment	528.9	345.4
Computer software	1,300.8	398.0
Leasehold improvements	188.4	107.7
Total property and equipment	2,359.7	899.1
Less accumulated depreciation	(591.2)	(482.9)
Property and equipment, net	\$ 1,768.5	\$ 416.2

Depreciation expense for the three and six months ended June 30, 2012 was \$84.5 million and \$110.9 million, respectively, and for the three and six months ended June 30, 2011 was \$24.5 million and \$48.8 million, respectively. Internally developed software, net of accumulated depreciation was \$695.8 million and \$72.9 million at June 30, 2012 and December 31, 2011, respectively. We capitalized \$27.7 million and \$30.4 million of internally developed software during the three and six months ended June 30, 2012, respectively.

Note 5 Goodwill and other intangible assets

During the second quarter of 2012, we reorganized our segments to better reflect our structure following the Merger. Our new segment structure is composed of our domestic and Canadian PBM segment and our Other Business Operations segment. See Note 13 Segment information for further description of the services performed by each segment. Historical segment information has been retrospectively adjusted to reflect the effect of these changes. The following is a summary of our goodwill and other intangible assets for our two reportable segments PBM and Other Business Operations:

<i>(in millions)</i>	June 30, 2012			December 31, 2011		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Goodwill						
PBM	\$ 28,015.5	\$ (107.4)	\$ 27,908.1	\$ 5,512.6	\$ (107.4)	\$ 5,405.2
Other Business Operations	1,450.5		1,450.5	80.5		80.5
	\$ 29,466.0	\$ (107.4)	\$ 29,358.6	\$ 5,593.1	\$ (107.4)	\$ 5,485.7
Other intangible assets						
PBM						
Customer contracts	\$ 17,276.4	\$ (1,020.8)	\$ 16,255.6	\$ 2,018.5	\$ (494.7)	\$ 1,523.8
Trade names	225.6	(5.6)	220.0	3.6		3.6
Miscellaneous	121.6	(18.5)	103.1	123.0	(60.1)	62.9
	17,623.6	(1,044.9)	16,578.7	2,145.1	(554.8)	1,590.3
Other Business Operations						
Customer relationships	559.7	(62.5)	497.2	68.4	(38.5)	29.9
Trade names	130.8	(3.3)	127.5	0.7		0.7

Edgar Filing: Express Scripts Holding Co. - Form 10-Q

	690.5	(65.8)	624.7	69.1	(38.5)	30.6
Total other intangible assets	\$ 18,314.1	\$ (1,110.7)	\$ 17,203.4	\$ 2,214.2	\$ (593.3)	\$ 1,620.9

Table of Contents

The aggregate amount of amortization expense of other intangible assets for our operations was \$529.4 million and \$40.1 million for the three months ended June 30, 2012 and 2011, respectively, and \$586.2 million and \$79.8 million for the six months ended June 30, 2012 and 2011, respectively. In accordance with applicable accounting guidance, amortization for customer contracts related to our agreement to provide PBM services to members of the affiliated health plans of WellPoint has been included as an offset to revenues in the amount of \$28.5 million for the three months ended June 30, 2012 and 2011 and \$57.0 million for the six months ended June 30, 2012 and 2011. The aggregate amount of amortization expense of other intangible assets for our operations is expected to be approximately \$1,639.9 million for 2012, \$2,084.3 million for 2013, \$1,808.3 million for 2014, \$1,787.4 million for 2015 and \$1,768.2 million for 2016. These estimates may be revised once preliminary valuation procedures are completed for intangible assets acquired in connection with the Merger discussed in Note 3 Changes in business. The weighted average amortization period of intangible assets subject to amortization is 15 years in total, and by major intangible class is 2 to 20 years for customer-related intangibles, 10 years for trade name intangibles and 3 to 30 years for miscellaneous intangible assets.

A summary of the change in the net carrying value of goodwill by business segment is shown in the following table:

<i>(in millions)</i>	PBM	Other Business Operations	Total
Balance at December 31, 2011	\$ 5,405.2	\$ 80.5	\$ 5,485.7
Acquisitions ⁽¹⁾	22,502.9	1,375.7	23,878.6
Foreign currency translation		(5.7)	(5.7)
Balance at June 30, 2012	\$ 27,908.1	\$ 1,450.5	\$ 29,358.6

(1) Represents the acquisition of Medco in April 2012.

Note 6 Earnings per share

Basic earnings per share (EPS) is computed using the weighted average number of common shares outstanding during the period. Diluted EPS is computed in the same manner as basic earnings per share but adds the number of additional common shares that would have been outstanding for the period if the dilutive potential common shares had been issued. All shares are calculated under the treasury stock method. The following is the reconciliation between the number of weighted average shares used in the basic and diluted EPS calculations for all periods:

<i>(in millions)</i>	Three Months Ended June 30,		Six Months Ended June 30,	
	2012 ⁽¹⁾	2011	2012 ⁽¹⁾	2011
Weighted average number of common shares outstanding during the period				
Basic EPS	807.8	502.6	646.6	515.7
Dilutive common stock equivalents:				
Outstanding stock options, stock-settled stock appreciation rights, restricted stock units, and executive deferred compensation units	16.1	4.4	16.6	4.6
Weighted average number of common shares outstanding during the period				
Diluted EPS ⁽²⁾	823.9	507.0	663.2	520.3

(1) The increase in the weighted average number of common shares outstanding for the three and six months ended June 30, 2012 for Basic and Diluted EPS resulted primarily from the issuance of 318.0 million shares in connection with the Merger.

(2) Excludes awards of 14.2 million and 2.6 million for the three months ended June 30, 2012 and 2011, respectively, and 14.6 million and 2.8 million for the six months ended June 30, 2012 and 2011, respectively. These were excluded because their effect was anti-dilutive.

Table of Contents**Note 7 Financing**

Table of Contents

BANK CREDIT FACILITIES

On August 29, 2011, ESI entered into a credit agreement (the *new credit agreement*) with a commercial bank syndicate providing for a five-year \$4.0 billion term loan facility (the *term facility*) and a \$1.5 billion revolving loan facility (the *new revolving facility*). The term facility was used to pay a portion of the cash consideration paid in connection with the Merger, as discussed in Note 3 *Changes in business*, to repay existing indebtedness, and to pay related fees and expenses. Subsequent to consummation of the Merger on April 2, 2012, the new revolving facility is available for general corporate purposes and replaced our \$750.0 million credit facility upon funding of the term facility on April 2, 2012. The term facility and the new revolving facility both mature on August 29, 2016. As of June 30, 2012, \$400.0 million was outstanding under the new revolving facility. Upon consummation of the Merger, Express Scripts assumed the obligations of ESI and became the borrower under the new credit agreement and new revolving facility.

The new credit agreement requires interest to be paid at the LIBOR or adjusted base rate options, plus a margin. The margin over LIBOR ranges from 1.25% to 1.75% for the term facility and 1.10% to 1.55% for the new revolving facility, and the margin over the base rate options ranges from 0.25% to 0.75% for the term facility and 0.10% to 0.55% for the new revolving facility, depending on our consolidated leverage ratio. Under the new credit agreement, we are required to pay commitment fees on the \$1.5 billion new revolving facility. The commitment fee ranges from 0.15% to 0.20% depending on the Express Scripts consolidated leverage ratio.

On August 13, 2010, ESI entered into a credit agreement with a commercial bank syndicate providing for a three-year revolving credit facility of \$750.0 million (the *2010 credit facility*). The 2010 credit facility was terminated and replaced by the new revolving facility on April 2, 2012, as described above.

BRIDGE FACILITY

On August 5, 2011, ESI entered into a credit agreement with Credit Suisse AG, Cayman Islands Branch, as administrative agent, Citibank, N.A., as syndication agent, and the other lenders and agents named within the agreement. The credit agreement provided for a one-year unsecured \$14.0 billion bridge term loan facility (the *bridge facility*) to be used to pay a portion of the cash consideration in connection with the Merger in the event that more favorable financing arrangements could not be secured. No amounts were withdrawn under the bridge facility, and subsequent to consummation of the Merger on April 2, 2012, ESI terminated the bridge facility.

FIVE-YEAR CREDIT FACILITIES

On April 30, 2007, Medco entered into a senior unsecured credit agreement, which was available for general working capital requirements. The facility consisted of a \$1.0 billion, 5-year senior unsecured term loan and a \$2.0 billion, 5-year senior unsecured revolving credit facility. The facility was due to mature on April 30, 2012. Medco refinanced the \$2.0 billion senior unsecured revolving credit facility on January 23, 2012. Upon completion of the Merger, the \$1.0 billion senior unsecured term loan and all associated interest, and the \$1.0 billion then outstanding under the senior unsecured revolving credit facility, were repaid in full and terminated.

ACCOUNTS RECEIVABLE FINANCING FACILITY

Upon consummation of the Merger, Express Scripts assumed a \$600 million, 364-day renewable accounts receivable financing facility that is collateralized by Medco's pharmaceutical manufacturer rebates accounts receivable. As of June 30, 2012, Express Scripts has drawn down \$600.0 million, none of which was repaid, under the facility. Express Scripts pays interest on amounts borrowed under the agreement based on the funding rates of the bank-related commercial paper programs that provide the financing, plus an applicable margin and liquidity fee determined by Express Scripts' credit rating. This facility is renewable annually as the option of Express Scripts and the banks.

Table of Contents

INTEREST RATE SWAP

Medco entered into five interest rate swap agreements in 2004. These swap agreements, in effect, converted \$200 million of Medco's \$500 million of 7.250% senior notes due 2013 to variable interest rate debt. Under the terms of these swap agreements, Medco received a fixed rate of interest of 7.25% on \$200 million and paid variable interest rates based on the six-month LIBOR plus a weighted average spread of 3.05%. The payment dates under the agreements coincided with the interest payment dates on the hedged debt instruments and the difference between the amounts paid and received is included in interest expense. These swaps were settled on May 7, 2012. Express Scripts received \$10.1 million for settlement of the swaps and the associated accrued interest receivable through May 7, 2012, and recorded a loss of \$1.5 million related to the carrying amount of the swaps and bank fees.

SENIOR NOTES

On February 6, 2012, Express Scripts issued \$3.5 billion of Senior Notes (the February 2012 Senior Notes) in a private placement with registration rights, including:

\$1.0 billion aggregate principal amount of 2.100% Senior Notes due 2015 (February 2015 Senior Notes)

\$1.5 billion aggregate principal amount of 2.650% Senior Notes due 2017 (February 2017 Senior Notes)

\$1.0 billion aggregate principal amount of 3.900% Senior Notes due 2022 (February 2022 Senior Notes)

The net proceeds were used to pay a portion of the cash consideration paid in the Merger and to pay related fees and expenses.

We may redeem some or all of each series of February 2012 Senior Notes prior to maturity at a price equal to the greater of (1) 100% of the aggregate principal amount of any notes being redeemed, plus accrued and unpaid interest; or (2) the sum of the present values of the remaining scheduled payments of principal and interest on the notes being redeemed, not including unpaid interest accrued to the redemption date, discounted to the redemption date on a semiannual basis at the treasury rate plus 30 basis points with respect to any February 2015 Senior Notes being redeemed, 35 basis points with respect to any February 2017 Senior Notes being redeemed, or 40 basis points with respect to any February 2022 Senior Notes being redeemed plus, in each case, unpaid interest on the notes being redeemed, accrued to the redemption date. The February 2012 Senior Notes, issued by Express Scripts, are jointly and severally and fully and unconditionally (subject to certain customary release provisions, including sale, exchange, transfer or liquidation of the guarantor subsidiary) guaranteed on a senior unsecured basis by ESI and most of our current 100% owned domestic subsidiaries, including, following the consummation of the Merger, Medco and certain of Medco's 100% owned domestic subsidiaries.

Following the consummation of the Merger on April 2, 2012, several series of senior notes issued by Medco are reported as debt obligations of Express Scripts on a consolidated basis:

\$500.0 million aggregate principal amount of 7.250% senior notes due 2013

\$300.0 million aggregate principal amount of 6.125% senior notes due 2013

\$500.0 million aggregate principal amount of 2.750% senior notes due 2015

\$1,200.0 million aggregate principal amount of 7.125% senior notes due 2018

Edgar Filing: Express Scripts Holding Co. - Form 10-Q

\$500.0 million aggregate principal amount of 4.125% senior notes due 2020

On May 7, 2012, the Company redeemed Medco's \$500.0 million aggregate principal amount of 7.250% senior notes due 2013. These notes were redeemable at a redemption price equal to the greater of (i) 100% of the principal amount of the notes being redeemed, or (ii) the sum of the present values of 107.25% of the principal amount of these notes being redeemed, plus all scheduled payments of interest on the notes discounted to the redemption date at a semi-annual equivalent yield to a comparable U.S. Treasury security for such redemption date plus 50 basis points. Total cash payments related to these notes were \$549.4 million comprised of principal, redemption costs and interest.

On June 15, 2012, \$1.0 billion aggregate principal amount of 5.250% senior notes due 2012, issued by ESI, matured and were redeemed.

Table of Contents**COVENANTS**

Our bank financing arrangements contain covenants that restrict our ability to incur additional indebtedness, create or permit liens on assets and engage in mergers or consolidations. The covenants also include minimum interest coverage ratios and maximum leverage ratios. The 6.125% senior notes due 2013 and the 7.125% senior notes due 2018 issued by Medco are also subject to an interest rate adjustment in the event of a downgrade in the ratings to below investment grade. At June 30, 2012, we believe we were in compliance in all material respects with all covenants associated with our debt instruments (including credit agreements and terms of our senior notes).

Note 8 Income taxes

As a result of the Merger, we recognized additional income tax contingencies and unfavorable impacts to our effective tax rate. Our effective tax rate increased to 53.0% and 45.0% for the three and six months ended June 30, 2012, respectively, as compared to 37.0% and 36.7% for the same periods in 2011 due to both recurring and nonrecurring events. The state apportionment and income tax filing positions of the combined organization has increased our recurring effective tax rate by approximately 1.9%. Nonrecurring charges, described below, increased our effective tax rate for the three and six months ended June 30, 2012 by 10.9%, and 5.6%, respectively.

Due to the adoption of common income tax return filing methods between ESI and Medco, we recorded a nonrecurring \$23.2 million income tax contingency related to prior year income tax return filings. We also recorded a nonrecurring charge of \$16.4 million resulting from the reversal of the deferred tax asset previously established for transaction-related costs that became nondeductible upon the consummation of the Merger. Lastly, unrelated to the Merger, we recorded a nonrecurring charge of \$5.2 million in the first quarter of 2012 due to changes in our unrecognized tax benefits.

As of June 30, 2012, our gross income tax contingencies increased to \$368.6 million primarily due to the acquisition of Medco. A reconciliation of our beginning and ending amount of unrecognized tax benefits is as follows:

<i>(in millions)</i>	June 30, 2012
Balance at January 1, 2012	\$ 32.3
Additions for tax positions related to prior years ⁽¹⁾	322.2
Reductions for tax positions related to prior years	(0.2)
Additions for tax positions related to the current year	14.8
Reductions as a result of a lapse of the applicable statute of limitations	(0.5)
Ending Balance	\$ 368.6

(1) Includes an aggregate \$291.3 million of Medco income tax contingencies recorded through the Medco opening balance sheet. Included in our unrecognized tax benefits are \$215.3 million of net uncertain tax positions that would impact our effective tax rate if recognized.

For the six months ended June 30, 2012, we recorded \$8.1 million of interest and penalties in our unaudited consolidated statement of operations and \$43.6 million of interest and penalties recorded through the Medco opening balance sheet resulting in a \$55.4 million cumulative balance of accrued interest and penalties in our unaudited consolidated balance sheet. Interest was computed on the difference between the tax position recognized in accordance with accounting guidance and the amount previously taken or expected to be taken in our tax returns.

The Internal Revenue Service (IRS) is examining the consolidated 2008 and 2009 U.S. federal income tax returns for both ESI and Medco. Both of these audits are anticipated to be concluded in 2013. The majority of the income tax contingencies are subject to statutes of limitations that are scheduled to expire by the end of 2016.

Note 9 Common stock

On May 27, 2011, ESI entered into agreements to repurchase shares of its common stock for an aggregate purchase price of \$1,750.0 million under an Accelerated Share Repurchase (ASR) arrangement. During 2011, ESI settled \$1,725.0 million of the ASR agreement and received

Edgar Filing: Express Scripts Holding Co. - Form 10-Q

33.4 million shares. On April 27, 2012, we settled the remaining portion of the ASR agreement and received 0.1 million additional shares, resulting in a total of 33.5 million shares received under the agreement.

Table of Contents

Upon consummation of the Merger on April 2, 2012, all ESI shares held in treasury were no longer outstanding and were cancelled and retired and ceased to exist. Express Scripts eliminated the value of treasury shares, at cost, recorded on the unaudited consolidated balance sheet immediately prior to the Merger as a reduction to retained earnings and paid-in capital.

The Board of Directors of Express Scripts has not yet adopted a stock repurchase program to allow for the repurchase of shares of Express Scripts.

Note 10 Stock-based compensation plans

In March 2011, ESI's Board of Directors adopted the ESI 2011 Long-Term Incentive Plan (the "2011 LTIP"), which provides for the grant of various equity awards with various terms to our officers, directors and key employees selected by the Compensation Committee of the Board of Directors. The 2011 LTIP was approved by ESI's stockholders in May 2011 and became effective June 1, 2011. Upon consummation of the Merger, the Company assumed sponsorship of the 2011 LTIP. Under the 2011 LTIP, we may issue stock options, stock-settled stock appreciation rights ("SSRs"), restricted stock units, restricted stock awards, performance share awards, and other types of awards. The maximum number of shares available for awards under the 2011 LTIP is 30 million. The maximum term of stock options, SSRs, restricted stock and performance shares granted under the 2011 LTIP is 10 years. Subsequent to the effective date of the 2011 LTIP, no additional awards will be granted under the 2000 Long-Term Incentive Plan ("2000 LTIP"), which provided for the grant of various equity awards with various terms to our officers, directors and key employees selected by the Compensation Committee of the Board of Directors.

Effective upon the closing of the Merger, the Company assumed the sponsorship of the Medco Health Solutions, Inc. 2002 Stock Incentive Plan, originally adopted by Medco, allowing Express Scripts to issue awards under this plan. As of June 30, 2012, 14.3 million shares are available under this plan. Under the Medco Health Solutions, Inc. 2002 Stock Incentive Plan, Medco granted, and Express Scripts may grant, stock options, restricted stock units, and other types of awards to employees and directors. Medco's awards granted under the 2002 Stock Incentive Plan are subject to accelerated vesting upon change in control and termination.

As part of the consideration transferred in the Merger, Express Scripts issued 41.5 million replacement stock options to holders of Medco stock options, valued at \$706.1 million, and 7.2 million replacement restricted stock units to holders of Medco restricted stock units, valued at \$174.9 million. See Note 3 "Changes in business, for further discussion of valuation.

STOCK OPTIONS AND SSRs

Express Scripts grants stock options and SSRs to certain officers, directors and employees to purchase shares of Express Scripts Holding Company common stock at the fair market value on the date of grant. ESI's SSRs and stock options granted under both the 2000 LTIP and 2011 LTIP have three-year graded vesting. Medco's options granted under the 2002 Stock Incentive Plan generally vest over three years. Due to the nature of the awards, we use the same valuation methods and accounting treatments for SSRs and stock options.

Table of Contents

A summary of the status of stock options and SSRs as of June 30, 2012, and changes during the six months ended June 30, 2012, is presented below:

<i>(share data in millions)</i>	Shares	Weighted-Average Grant Date Fair Value
ESI outstanding at January 1, 2012	13.7	\$ 34.54
Medco outstanding converted at April 2, 2012	41.5	38.61
Granted	3.6	53.03
Exercised	(5.9)	27.44
Forfeited/Cancelled	(0.5)	46.31
Express Scripts outstanding at June 30, 2012	52.4	\$ 39.72
Express Scripts exercisable at June 30, 2012	34.4	\$ 34.99

The fair value of options and SSRs granted is estimated on the date of grant using a Black-Scholes multiple option-pricing model with the following weighted average assumptions:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2012	2011	2012	2011
Expected life of option	3-5 years	3-5 years	2-5 years	3-5 years
Risk-free interest rate	0.4%-0.8%	0.9%-2.0%	0.3%-0.9%	0.9%-2.2%
Expected volatility of stock	29%-38%	36%-38%	29%-38%	36%-39%
Expected dividend yield	None	None	None	None

The fair value of Medco converted grants was estimated on the date of the Merger using a Black-Scholes multiple option-pricing model with the following weighted average assumptions:

	At April 2, 2012
	Medco
	Converted
	Grants
Expected life of option	2 years
Risk-free interest rate	0.4 %
Expected volatility of stock	32.9%
Expected dividend yield	None

The Black-Scholes model requires subjective assumptions, including future stock price volatility and expected time to exercise, which greatly affect the calculated values. The expected term and forfeiture rate of options granted is derived from historical data on employee exercises and post-vesting employment termination behavior, as well as expected behavior on outstanding options. The risk-free rate is based on the U.S. Treasury rates in effect during the corresponding period of grant. The expected volatility is based on the historical volatility of our stock price. These factors could change in the future, which would affect the stock-based compensation expense in future periods.

At June 30, 2012, the weighted-average remaining contractual lives of stock options and SSRs outstanding and stock options and SSRs exercisable were 6.5 years and 5.8 years, respectively, and the aggregate intrinsic value (the amount by which the market value of the underlying stock exceeds the exercise price of the option) of shares outstanding and shares exercisable was \$846.5 million and \$717.5 million, respectively.

Table of Contents

The total grant date fair value of shares vested in 2012 was \$127.2 million. Express Scripts expects the majority of outstanding non-vested options and SSRs to vest. The activity related to non-vested options is as follows:

<i>(share data in millions)</i>	Shares	Weighted-Average Grant Date Fair Value
ESI non-vested at January 1, 2012	5.8	\$ 13.35
Medco non-vested converted at April 2, 2012	16.9	17.99
Granted	3.6	15.07
Vested	(7.9)	15.97
Forfeited	(0.4)	16.31
 Express Scripts non-vested at June 30, 2012	 18.0	 \$ 16.81

RESTRICTED STOCK UNITS AND PERFORMANCE SHARES

Express Scripts grants restricted stock units to certain officers, directors and employees and performance shares to certain officers and employees. ESI's restricted stock units granted under both the 2000 LTIP and the 2011 LTIP have a three-year graded vesting and the performance shares cliff vest at the end of the three years. The number of performance shares that ultimately vest is dependent upon achieving specific performance targets. Prior to vesting, these shares are subject to forfeiture to us without consideration upon termination of employment under certain circumstances. The original amount of performance share grants is subject to a multiplier of 2.5 based on certain performance metrics. Medco's restricted stock units and performance shares granted under the 2002 Stock Incentive Plan generally vest over three years (director options vest in one year). During the first six months of 2012, approximately 0.2 million additional performance shares were granted to certain officers for exceeding certain performance metrics.

A summary of the status of restricted stock and performance shares as of June 30, 2012, and changes during the six months ended June 30, 2012, is presented below:

<i>(share data in millions)</i>	Shares	Weighted-Average Grant Date Fair Value
ESI outstanding at January 1, 2012	1.3	\$ 41.92
Medco outstanding converted at April 2, 2012	7.2	56.49
Granted	0.3	53.03
Other ⁽¹⁾	0.2	52.04
Released	(2.0)	47.51
Forfeited/Cancelled	(0.1)	53.72
 Express Scripts outstanding at June 30, 2012	 6.9	 \$ 56.08
 Express Scripts vested and deferred at June 30, 2012	 0.8	 \$ 56.49

(1) Represents additional performance shares issued above the original value for exceeding certain performance metrics.

Table of Contents

Summarized information related to non-vested restricted stock units held by Express Scripts employees and directors is as follows:

<i>(share data in millions)</i>	Shares	Weighted-Average Grant Date Fair Value
ESI non-vested at January 1, 2012	1.3	\$ 41.92
Medco non-vested converted at April 2, 2012	6.3	56.49
Granted	0.3	53.03
Other ⁽¹⁾	0.2	52.04
Vested	(1.9)	47.34
Forfeited	(0.1)	53.72
Express Scripts non-vested at June 30, 2012	6.1	\$ 55.00

(1) Represents additional performance shares issued above the original value for exceeding certain performance metrics. We recognized stock-based compensation expense of \$230.0 million and \$13.4 million in the three months ended June 30, 2012 and 2011, respectively, and \$246.2 million and \$25.3 million in the six months ended June 30, 2012 and 2011, respectively. The increases for the three months and six months ended June 30, 2012 include stock-based compensation expense acceleration associated with the termination of certain Medco employees. Unamortized stock-based compensation as of June 30, 2012 was \$159.4 million for stock options and SSRs and \$168.3 million for restricted stock and performance shares.

Note 11 Pension and other post-retirement benefits

In connection with the Merger, Express Scripts acquired Medco's pension and other post-retirement benefit obligations, which were re-measured and recorded at fair value on the acquisition date.

For the pension plans, Express Scripts has elected to determine the projected benefit obligation as the value of the benefits to which employees would be entitled if they separated from service immediately. Under this approach, the liability is equal to the employee's account value as of the measurement date. After re-measurement upon the acquisition, the fair value of the projected benefit obligation was \$291.5 million and the plan assets at fair value totaled \$217.0 million, representing an unfunded status and resulting in a balance sheet liability of \$74.5 million.

In January 2011, Medco amended its pension plans, freezing the benefit for all participants effective in the first quarter of 2011. After the plan freeze, participants did not accrue any benefits under the plans, and the plans have been closed to new entrants since February 28, 2011. For the three months ended June 30, 2012, the net benefit for Express Scripts' pension plans consisted of the following components:

<i>(in millions)</i>	Three Months Ended June 30, 2012
Service cost	2.1
Interest cost	(4.1)
Expected return on plan assets	(2.0)
Net pension benefit	\$ (2.0)

Medco's unfunded postretirement healthcare benefit plan was discontinued for all active non-retirement eligible employees in January 2011. The elimination of the post-retirement healthcare benefit for all active nonretirement-eligible employees was accounted for as a curtailment of the plan. For the three months ended June 30, 2012, the net cost for these post-retirement benefits consisted of interest cost of less than \$0.1 million.

Edgar Filing: Express Scripts Holding Co. - Form 10-Q

The Company paid \$2.3 million in the second quarter of 2012, and expects to contribute an additional \$14.8 million for the remaining minimum pension funding requirement under the Internal Revenue Code during 2012.

Table of Contents**Note 12 Commitments and contingencies**

We have entered into noncancellable agreements to lease certain office and distribution facilities with remaining terms from one to ten years. The majority of our lease agreements include renewal options which would extend the agreements from one to five years. The future minimum lease payments due under noncancellable operating leases are shown below (in millions):

	Minimum Lease Payments	
2012 ⁽¹⁾	\$	49.6
2013		79.8
2014		64.4
2015		43.3
2016		34.0
Thereafter		62.8
	\$	333.9

(1) Represents remaining six months of 2012.

As of June 30, 2012, we have certain required future purchase commitments for prescription products, supplies, services and fixed assets related to the normal course of business. We do not expect potential payments under these provisions to materially affect results of operations or financial condition based upon reasonably likely outcomes derived by reference to historical experience and current business plans. These future purchase commitments (in millions) are summarized below:

	Future Purchase Commitments	
2012 ⁽¹⁾	\$	274.3
2013		329.7
2014		343.0
2015		2.0
2016		1.1
Thereafter		1.1
	\$	951.2

(1) Represents remaining six months of 2012.

In the ordinary course of business there have arisen various legal proceedings, investigations, recoupment demands or claims now pending against us or our subsidiaries. In accordance with applicable accounting guidance, we record accruals for certain of our outstanding legal proceedings, investigations or claims when it is probable that a liability will be incurred and the amount of loss can be reasonably estimated. We evaluate, on a quarterly basis, developments in legal proceedings, investigations or claims that could affect the amount of any accrual, as well as any developments that would make a loss contingency both probable and reasonably estimable. We disclose the amount of the accrual if the financial statements would be otherwise misleading, which was not the case for the six months ending June 30, 2012 or 2011.

We record self-insurance accruals based upon estimates of the aggregate liability of claim costs in excess of our insurance coverage. Accruals are estimated using certain actuarial assumptions followed in the insurance industry and our historical experience. The majority of these claims are legal claims and our liability estimate is primarily related to the cost to defend these claims. We do not accrue for settlements, judgments, monetary fines or penalties until such amounts are probable and estimable. Under authoritative accounting guidance, if the range of probable loss is broad, the liability accrued should be based on the lower end of the range.

Edgar Filing: Express Scripts Holding Co. - Form 10-Q

When a loss contingency is not both probable and estimable, we do not establish an accrued liability. However, if the loss (or an additional loss in excess of the accrual) is at least a reasonable possibility and material, then we disclose an estimate of the possible loss or range of loss, if such estimate can be made, or disclose that an estimate cannot be made.

Table of Contents

The assessments of whether a loss is probable or a reasonable possibility, and whether the loss or a range of loss is estimable, often involve a series of complex judgments about future events. We are often unable to estimate a range of reasonably possible losses, particularly where (i) the damages sought are substantial or indeterminate, (ii) the proceedings are in the early stages, or (iii) the matters involve novel or unsettled legal theories or a large number of parties. In such cases, there is considerable uncertainty regarding the timing or ultimate resolution of such matters, including a possible eventual loss, fine, penalty or business impact, if any. Accordingly, for many proceedings, we are currently unable to estimate the loss or a range of possible loss. For a limited number of proceedings, we may be able to reasonably estimate the possible range of loss in excess of any accruals. However, we believe that such matters, individually and in the aggregate, when finally resolved, are not reasonably likely to have a material adverse effect on our consolidated cash flow or financial condition. We also believe that any amount that could be reasonably estimated in excess of accruals, if any, for such proceedings is not material. However, an adverse resolution of one or more of such matters could have a material adverse effect on our results of operations in a particular quarter or fiscal year.

While we believe our services and business practices are in compliance with applicable laws, rules and regulations in all material respects, we cannot predict the outcome of these claims at this time. An unfavorable outcome in one or more of these matters could result in the imposition of judgments, monetary fines or penalties, or injunctive or administrative remedies. We can give no assurance that such judgments, fines and remedies, and future costs associated with any such matters, would not have a material adverse effect on our financial condition, our consolidated results of operations or our consolidated cash flows.

In December 2011, we received a proposal from a client asserting claims regarding the interpretation of certain contractual terms. We responded with an offer to settle these issues that included a lump sum payment of \$30.0 million. Based on authoritative accounting guidance, as of the year ended December 31, 2011, we determined that these communications indicated that a loss is both probable and estimable and we recorded an accrual of \$30.0 million as an offset to revenues in the consolidated statement of operations for the year ended December 31, 2011. While we continue to work with this client, we have determined it is still necessary to maintain an accrual of \$30.0 million as of June 30, 2012. Accordingly, there has been no impact to the unaudited consolidated statement of operations for the six months ended June 30, 2012. While no final agreement has been reached on the matter, the parties are engaged in active discussions and continue to work to resolve the open issues.

Table of Contents

Note 13 Segment information

During the second quarter of 2012, we reorganized our segments to better reflect our structure following the Merger. Our new segment structure is composed of our domestic and Canadian PBM segment and our Other Business Operations segment.

The PBM segment engages in the following services for which it collects revenues and incurs expenses:

Domestic and Canadian retail network pharmacy management

retail drug card programs

home delivery pharmacy services

benefit design consultation

drug utilization review

drug formulary management programs

compliance and therapy management programs for our clients

a flexible array of Medicare Part D products to support clients' benefits

specialty pharmacy, including the distribution of fertility pharmaceuticals requiring special handling or packaging

guidance and decision support for genomic medicine to patients, providers, payors and employees and comprehensive clinical programs

The Other Business Operations segment engages in the following services for which it collects revenues and incurs expenses:

distribution of pharmaceuticals and medical supplies to providers and clinics

healthcare account administration and implementation of consumer-directed healthcare solutions

other international retail network pharmacy management

Edgar Filing: Express Scripts Holding Co. - Form 10-Q

home delivery pharmacy services in Germany

scientific evidence to guide the safe, effective and affordable use of medicines

diabetes prescriptions and testing supplies

Prior to the second quarter of 2012, our other international retail network pharmacy management business was included in the PBM segment. Additionally, during the third quarter of 2011 we reorganized our FreedomFP line of business from our Other Business Operations segment into our PBM segment. Historical segment information has been retrospectively adjusted to reflect the effect of these changes. Our PBM segment includes ESI's and Medco's integrated PBM operations in the United States and ESI's PBM operations in Canada. Our Other Business Operations segment includes our other international operations, our Specialty Distribution lines of business, and other service operations.

Operating income is the measure used by our chief operating decision maker to assess the performance of each of our operating segments. The following table presents information about our reportable segments for the three and six months ended June 30, 2012 and 2011.

<i>(in millions)</i>	PBM	Other Business Operations	Total
For the three months ended June 30, 2012

Capital expenditures	52.3	1.8	54.1

(1) Includes retail pharmacy co-payments of \$3,519.1 million and \$1,457.1 million for the three months ended June 30, 2012 and 2011, respectively, and \$5,015.7 million and \$2,983.6 million for the six months ended June 30, 2012 and 2011, respectively.

(2) Includes home delivery, specialty and other including: (a) drugs distributed through patient assistance programs and (b) drugs we distribute to other PBMs clients under limited distribution contracts with pharmaceutical manufacturers, and (c) FreedomFP claims.

Table of Contents

The following table presents balance sheet information about our reportable segments:

<i>(in millions)</i>	PBM	Other Business Operations	Total
Total Assets			
As of June 30, 2012	\$ 56,842.5	\$ 1,216.0	\$ 58,058.5
As of December 31, 2011	\$ 15,131.9	\$ 475.1	\$ 15,607.0

PBM product revenues consist of revenues from the sale of prescription drugs by retail pharmacies in our retail pharmacy networks, revenues from the dispensing of prescription drugs from our home delivery pharmacies and distribution of certain fertility and specialty drugs. Other Business Operations product revenues consist of specialty distribution activities, the dispensing of prescription drugs from home delivery in Germany, and diabetes prescriptions and testing supplies. PBM service revenues include administrative fees associated with the administration of retail pharmacy networks contracted by certain clients, informed decision counseling services, and specialty distribution services. Other Business Operations service revenues include revenues from international retail network pharmacy management healthcare card administration.

The top five clients in the aggregate represent 37.4% and 40.6% of our consolidated revenue for the three and six months ended June 30, 2012, respectively. None of these clients on an individual basis exceed 12% of consolidated revenues for the three months ended June 30, 2012 and 17% for the six months ended June 30, 2012.

Revenues earned by our international businesses totaled \$187.2 million and \$15.4 million for the three months ended June 30, 2012 and 2011, respectively, and \$206.5 million and \$30.9 million for the six months ended June 30, 2012 and 2011, respectively. All other revenues were earned in the United States. Long-lived assets of our international businesses (consisting primarily of fixed assets) totaled \$105.5 million and \$26.8 million as of June 30, 2012 and December 31, 2011, respectively. All other long-lived assets are domiciled in the United States.

Within our Other Business Operations segment, we have initiated a strategic plan to sell a line of business. We have determined that results of operations for this line of business for both 2012 and 2011 are immaterial to both consolidated and segment results of operations, and we have therefore not presented these results separately for the current or prior period. Operating income (loss) totaled \$0.2 million and \$(0.2) million for the three months ended June 30, 2012 and 2011, respectively, and \$0.3 million and \$(0.4) million for the six months ended June 30, 2012 and 2011, respectively. Total assets for this line of business were \$34.3 million as of June 30, 2012. The majority of these assets represent goodwill of \$12.0 million, restricted cash of \$13.3 million and cash of \$2.5 million. As these amounts represent less than 0.1% of total consolidated assets, the assets were not classified as held for sale within the consolidated balance sheet. We believe no impairment exists for assets held by this line of business as of June 30, 2012.

Table of Contents

Note 14 Condensed consolidating financial information

The senior notes issued by the Company, ESI and Medco are jointly and severally and fully and unconditionally (subject to certain customary release provisions, including sale, exchange, transfer or liquidation of the guarantor subsidiary) guaranteed by our 100% owned domestic subsidiaries, other than certain regulated subsidiaries, and, with respect to notes issued by ESI and Medco, by us. The following condensed consolidating financial information has been prepared in accordance with the requirements for presentation of such information. The condensed consolidating financial information presented below is not indicative of what the financial position, results of operations, or cash flows would have been had each of the entities operated as an independent company during the period for various reasons, including, but not limited to, intercompany transactions and integration of systems. The condensed consolidating financial information has been retrospectively revised based on the current period structure that exists as of the most recent balance sheet date. The following presents the condensed consolidating financial information separately for:

- (i) Express Scripts (the Parent Company), the issuer of certain guaranteed obligations;
- (ii) ESI, the issuer of additional guaranteed obligations;
- (iii) Medco, the issuer of additional guaranteed obligations;
- (iv) Guarantor subsidiaries, on a combined basis (but excluding ESI and Medco), as specified in the indentures related to Express Scripts , ESI s and Medco s obligations under the notes;
- (v) Non-guarantor subsidiaries, on a combined basis;
- (vi) Consolidating entries and eliminations representing adjustments to (a) eliminate intercompany transactions between or among the Parent Company, the guarantor subsidiaries and the non-guarantor subsidiaries, (b) eliminate the investments in our subsidiaries and (c) record consolidating entries; and
- (vii) Express Scripts and subsidiaries on a consolidated basis.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward Looking Statements and Associated Risks

Information we have included or incorporated by reference in this Quarterly Report on Form 10-Q, and information which may be contained in our other filings with the Securities and Exchange Commission (the SEC) and our press releases or other public statements, contain or may contain forward-looking statements. These forward-looking statements include, among others, statements of our plans, objectives, expectations (financial or otherwise) or intentions.

Our forward-looking statements involve risks and uncertainties. Our actual results may differ significantly from those projected or suggested in any forward-looking statements. We do not undertake any obligation to release publicly any revisions to such forward-looking statements to reflect events or circumstances occurring after the date hereof or to reflect the occurrence of unanticipated events. Any number of factors could cause our actual results to differ materially from those contemplated by any forward-looking statements, including, but not limited to the factors listed below:

STANDARD OPERATING FACTORS

our ability to remain profitable in a very competitive marketplace is dependent upon our ability to attract and retain clients while maintaining our margins, to differentiate our products and services from others in the marketplace, and to develop and cross-sell new products and services to our existing clients

our failure to anticipate and appropriately adapt to changes in the rapidly changing healthcare industry

changes in applicable laws or regulations, or their interpretation or enforcement, or the enactment of new laws or regulations, which apply to our business practices (past, present or future) or require us to spend significant resources in order to comply

changes to the healthcare industry designed to manage healthcare costs or alter healthcare financing practices

the termination, or an unfavorable modification, of our relationship with one or more key pharmacy providers, or significant changes within the pharmacy provider marketplace

our failure to execute on, or other issues arising under, certain key client contracts

changes relating to our participation in Medicare Part D, the loss of Medicare Part D eligible members, or our failure to otherwise execute on our strategies related to Medicare Part D

our failure to effectively execute on strategic transactions, or to integrate or achieve anticipated benefits from any acquired businesses

the impact of our debt service obligations on the availability of funds for other business purposes, and the terms and our required compliance with covenants relating to our indebtedness

Edgar Filing: Express Scripts Holding Co. - Form 10-Q

a failure in the security or stability of our technology infrastructure, or the infrastructure of one or more of our key vendors, or a significant failure or disruption in service within our operations or the operations of such vendors

the termination, or an unfavorable modification, of our relationship with one or more key pharmaceutical manufacturers, or the significant reduction in payments made or discounts provided by pharmaceutical manufacturers

changes in industry pricing benchmarks

results in pending and future litigation or other proceedings which would subject us to significant monetary damages or penalties and/or require us to change our business practices, or the costs incurred in connection with such proceedings

our failure to attract and retain talented employees, or to manage succession and retention for our Chief Executive Officer or other key executives

other risks described from time to time in our filings with the SEC

Table of Contents

FACTORS RELATED TO THE TRANSACTION WITH MEDCO

uncertainty around realization of the anticipated benefits of the transaction, including the expected amount and timing of cost savings and operating synergies and a delay or difficulty in integrating the businesses of Express Scripts, Inc. and Medco or in retaining clients of the respective companies

the impact of transaction and Merger-related costs on our financial results

uncertainty as to the long-term value of our common shares

These and other relevant factors and any other information included or incorporated by reference in this Report, and information which may be contained in our other filings with the SEC, should be carefully considered when reviewing any forward-looking statement. We note these factors for investors as permitted under the Private Securities Litigation Reform Act of 1995. Investors should understand that it is impossible to predict or identify all such factors or risks. As such, you should not consider either foregoing lists, or the risks identified in our SEC filings, to be a complete discussion of all potential risks or uncertainties.

See the more comprehensive description of risk factors in Part II Item 1A Risk Factors of this Quarterly Report on Form 10-Q.

Table of Contents

OVERVIEW

On July 20, 2011, Express Scripts, Inc. (ESI) entered into a definitive merger agreement (the Merger Agreement) with Medco Health Solutions, Inc. (Medco), which was amended by Amendment No. 1 thereto on November 7, 2011, providing for the combination of ESI and Medco under a new holding company named Aristotle Holding, Inc. The transactions contemplated by the Merger Agreement (the Merger) were consummated on April 2, 2012. Aristotle Holding, Inc. was renamed Express Scripts Holding Company (the Company or Express Scripts) substantially concurrently with the consummation of the Merger. We, our or us refers to Express Scripts Holding Company and its subsidiaries. For financial reporting and accounting purposes, ESI was the acquirer of Medco. The consolidated financial statements (and other data, such as claims volume) reflect the results of operations and financial position of ESI for 2011 periods and through April 1, 2012. However, references to amounts for periods after the closing of the Merger on April 2, 2012 relate to Express Scripts.

As the largest full-service pharmacy benefit management (PBM) company in North America, we provide healthcare management and administration services on behalf of our clients, which include health maintenance organizations, health insurers, third-party administrators, employers, union-sponsored benefit plans, workers compensation plans, and government health programs. Our integrated PBM services include network claims processing, home delivery services, patient care and direct specialty and fertility home delivery to patients, benefit plan design consultation, drug utilization review, formulary management, drug data analysis services, distribution of injectable drugs to patients homes and physicians offices, bio-pharma services, and fulfillment of prescriptions to low-income patients through manufacturer-sponsored patient assistance programs.

During the second quarter of 2012, we reorganized our segments to better reflect our structure following the Merger. Our new segment structure is composed of our domestic and Canadian PBM segment and our Other Business Operations segment. Through our Other Business Operations segment, we provide distribution of pharmaceuticals and medical supplies to providers and clinics, healthcare account administration and implementation of consumer-directed healthcare solutions, international retail network pharmacy management, home delivery pharmacy services in Germany, scientific evidence to guide the safe, effective and affordable use of medicines, and diabetes prescriptions and testing supplies. Our PBM segment includes ESI s and Medco s integrated PBM operations in the United States and ESI s PBM operations in Canada. Our Other Business Operations segment includes our other international operations, our Specialty Distribution lines of business, and other service operations. Historical segment information has been retrospectively adjusted to reflect the effect of these changes.

Revenue generated by our segments can be classified as either tangible product revenue or service revenue. We earn tangible product revenue from the sale of prescription drugs by retail pharmacies in our retail pharmacy networks and from dispensing prescription drugs from our home delivery and specialty pharmacies. Service revenue includes administrative fees associated with the administration of retail pharmacy networks contracted by certain clients, medication counseling services and certain specialty distribution services. Tangible product revenue generated by our PBM and Other Business Operations segments represented 98.7% and 99.4% of revenues for the three months ended June 30, 2012 and 2011, respectively, and 98.9% and 99.3% of revenues for the six months ended June 30, 2012 and 2011, respectively.

In addition, as a result of the Merger, we are assessing our strategic options for many of our businesses included in our Other Business Operations segment for ultimate disposition. This assessment includes estimated goodwill of \$500.0 million as of June 30, 2012. The impact from the sale or other disposition of these businesses is not expected to materially impact our ongoing earnings before other income (expense), interest, taxes, depreciation and amortization (EBITDA).

MERGER TRANSACTION

As a result of the Merger on April 2, 2012, Medco and ESI each became wholly owned subsidiaries of Express Scripts and former Medco and ESI stockholders became owners of stock in Express Scripts, which is listed for trading on the NASDAQ stock exchange. Upon closing of the Merger, former ESI stockholders owned approximately 59% of Express Scripts and former Medco stockholders owned approximately 41%.

Table of Contents

EXECUTIVE SUMMARY AND TREND FACTORS AFFECTING THE BUSINESS

Our results in the second quarter of 2012 are driven by the addition of Medco to our book of business on April 2, 2012. The Merger impacted all components of our financial statements, including our revenues, expenses, and profits, the consolidated balance sheet, as well as claims volumes. Our results also reflect the successful execution of our business model, which emphasizes the alignment of our financial interests with those of our clients through greater use of generics and low-cost brands, home delivery and specialty pharmacy. We also benefited from better management of ingredient costs through renegotiation of supplier contracts, increased competition among generic manufacturers, and higher generic fill rate (77.4% compared to 73.9% in the same period of 2011). In addition, we are providing our clients with additional tools designed to generate higher generic fill rates, further increase the use of our home delivery and specialty pharmacy services and drive greater adherence.

The positive trends we saw in recent quarters, including lower drug purchasing costs and increased generic usage, are expected to continue to offset the negative impact of various marketplace forces affecting pricing and plan structure and the current adverse economic environment, among other factors, and thus continue to generate growth and improvements in our results of operations in the future.

As the regulatory environment evolves, we expect to continue to make investments designed to keep us ahead of the competition. These projects include preparation for changes to the Health Insurance Portability and Accountability Act of 1996 (HIPAA), Medicare regulations and the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act of 2010 (Health Reform Laws).

CRITICAL ACCOUNTING POLICIES

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Our estimates and assumptions are based upon a combination of historical information and various other assumptions believed to be reasonable under the particular circumstances. Actual results may differ from our estimates. For a full description of our critical accounting policies, please refer to the Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies included in ESI's Annual Report on Form 10-K for the year ended December 31, 2011, filed with the SEC on February 22, 2012. Upon consummation of the Merger on April 2, 2012, Medco's critical accounting policies were conformed to ESI's critical accounting policies. However, two Medco historical accounting policies have been adopted related to the Medicare prescription drug program and the Cash balance pension plans.

Medicare Prescription Drug Program. Express Scripts' revenues include premiums associated with our Medicare prescription drug program (PDP) risk-based product offerings. These products involve prescription dispensing for beneficiaries enrolled in the Centers for Medicare & Medicaid Services (CMS)-sponsored Medicare Part D Prescription Drug Program (Medicare Part D) prescription drug benefit. We also offer numerous customized benefit plan designs to employer group retiree plans under the Medicare Part D prescription drug benefit.

The PDP premiums are determined based on our annual bid and related contractual arrangements with CMS. The PDP premiums are primarily comprised of amounts received from CMS as part of a direct subsidy and an additional subsidy from CMS for low-income member premiums, as well as premium payments received from members. These premiums are recognized ratably to revenues over the period in which members are entitled to receive benefits. Premiums received in advance of the applicable benefit period are deferred and recorded in accrued expenses on the consolidated balance sheet. There is a possibility that the annual costs of drugs may be higher or lower than premium revenues. As a result, CMS provides a risk corridor adjustment for the standard drug benefit that compares our actual annual drug costs incurred to the targeted premiums in our CMS-approved bid. Based on specific collars in the risk corridor, we will receive from CMS additional premium amounts or be required to refund to CMS previously received premium amounts. We calculate the risk corridor adjustment on a quarterly basis based on drug cost experience to date and record an adjustment to revenues with a corresponding receivable from or payable to CMS reflected on the consolidated balance sheet.

Table of Contents

In addition to PDP premiums, there are certain co-payments and deductibles (the cost share) due from members based on prescription orders by those members, some of which are subsidized by CMS in cases of low-income membership. Beginning in 2011, non-low-income members received a cost share benefit under the coverage gap discount program with brand pharmaceutical manufacturers. For subsidies received in advance, the amount is deferred and recorded in accrued expenses on the consolidated balance sheet. If there is cost share due from members, pharmaceutical manufacturers or CMS, or premiums due from members, the amount is accrued and recorded in receivables, net, on the consolidated balance sheet. After the end of the contract year and based on actual annual drug costs incurred, cost share amounts are reconciled with CMS and the corresponding receivable or payable is settled. The cost share is treated consistently as other co-payments derived from providing PBM services, as a component of revenues on the consolidated statement of operations.

Express Scripts' cost of revenues includes the cost of drugs dispensed by our mail-order pharmacies or retail network for members covered under our Medicare PDP product offerings and is recorded at cost as incurred. We receive a catastrophic reinsurance subsidy from CMS for approximately 80% of costs incurred by individual members in excess of the individual annual out-of-pocket maximum. The subsidy is reflected as an offsetting credit in cost of revenues to the extent that catastrophic costs are incurred. Catastrophic reinsurance subsidy amounts received in advance are deferred and recorded in accrued expenses on the consolidated balance sheet. If there are catastrophic reinsurance subsidies due from CMS, the amount is accrued and recorded in receivables, net, on the consolidated balance sheet. After the end of the contract year and based on actual annual drug costs incurred, catastrophic reinsurance amounts are reconciled with CMS and the corresponding receivable or payable is settled.

Pension Plans. Express Scripts has elected to determine the projected benefit obligation for cash balance pension plans as the value of the benefits to which employees participating in the plans would be entitled if they separated from service immediately. The amount by which the projected benefit obligation exceeds the fair value of the pension plan assets is recorded in other liabilities on the consolidated balance sheet.

The determination of our expense for pension plans is based on management's assumptions, which are developed with the assistance of actuaries. We reassess the plan assumptions on a regular basis. The expected rate of return for the pension plan represents the average rate of return to be earned on the plan assets over the period the benefits included in the benefit obligation are to be paid. The expected return on plan assets is determined by multiplying the expected long-term rate of return by the fair value of the plan assets and contributions, offset by expected return on expected benefit payments. In developing the expected rate of return we consider long-term compounded annualized returns of historical market data, as well as historical actual returns on our plan assets. Using this reference information, we develop forward-looking return expectations for each asset class and a weighted average expected long-term rate of return for a targeted portfolio allocated across these investment categories. As a result of this analysis, for 2012, the expected rate of return assumption is 7.5% for the pension plans.

CLIENTS

We are a provider of PBM services to several market segments. Our clients include HMOs, health insurers, third-party administrators, employers, union-sponsored benefit plans, workers' compensation plans and government health programs. We provide specialty services to customers who also include HMOs, health insurers, third-party administrators, employers, union-sponsored benefit plans, government health programs, office-based oncologists, renal dialysis clinics, ambulatory surgery centers, primary care physicians, retina specialists, and others. Refer to Note 13 Segment information for a discussion of client concentration.

Table of Contents

RESULTS OF OPERATIONS

PBM OPERATING INCOME

During the second quarter of 2012, we reorganized our segments to better reflect our structure following the Merger. Our new segment structure is composed of our domestic and Canadian PBM segment and our Other Business Operations segment.

The PBM segment engages in the following services for which it collects revenues and incurs expenses:

Domestic and Canadian retail network pharmacy management

retail drug card programs

home delivery pharmacy services

benefit design consultation

drug utilization review

drug formulary management programs

compliance and therapy management programs for our clients

a flexible array of Medicare Part D Prescription Drug Program products to support clients' benefits

specialty pharmacy, including the distribution of fertility pharmaceuticals requiring special handling or packaging

guidance and decision support for genomic medicine to patients, providers, payors and employees and comprehensive clinical programs

The Other Business Operations segment engages in the following services for which it collects revenues and incurs expenses:

distribution of pharmaceuticals and medical supplies to providers and clinics

healthcare account administration and implementation of consumer-directed healthcare solutions

other international retail network pharmacy management

home delivery pharmacy services in Germany

scientific evidence to guide the safe, effective and affordable use of medicines

diabetes prescriptions and testing supplies

Prior to the second quarter of 2012, our other international retail network pharmacy management business was included in the PBM segment. Additionally, during the third quarter of 2011 we reorganized our FreedomFP line of business from our Other Business Operations segment into our PBM segment. Historical segment information has been retrospectively adjusted to reflect the effect of these changes. Our PBM segment includes ESI's and Medco's integrated PBM operations in the United States and ESI's PBM operations in Canada. Our Other Business Operations segment includes our other international operations, our Specialty Distribution lines of business, and other service operations.

Prior to the Merger, ESI and Medco had historically used slightly different methodologies to report claims; however, we believe the differences between the claims reported by ESI and Medco would not be material had the same methodology applied. We have since combined these two approaches into one methodology to be used by the Company going forward. This change was made prospectively beginning April 2, 2012. We have not restated the number of claims in prior periods, because the differences are not material.

Table of Contents

<i>(in millions)</i>	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
Product revenues

Total PBM claims	324.0	161.3	491.0	323.2
Total adjusted PBM claims⁽⁴⁾	397.4	185.6	590.2	371.6

- (1) Includes retail pharmacy co-payments of \$3,519.1 million and \$1,457.1 million for the three months ended June 30, 2012 and 2011, respectively, and \$5,015.7 million and \$2,983.6 million for the six months ended June 30, 2012 and 2011, respectively.
- (2) Includes home delivery, specialty and other including: (a) drugs distributed through patient assistance programs, (b) drugs we distribute to other PBMs clients under limited distribution contracts with pharmaceutical manufacturers, and (c) FreedomFP claims.
- (3) Claims are calculated based on an updated methodology started April 2, 2012. The prior periods have not been recalculated using the new methodology because we believe the differences would not be material, as discussed above.
- (4) Total adjusted claims reflect home delivery claims multiplied by 3, as home delivery claims typically cover a time period 3 times longer than retail claims.

Product Revenues for the three months ended June 30, 2012: Network pharmacy revenues increased by \$9,445.8 million, or 127.8%, in the three months ended June 30, 2012 over the same period of 2011. Approximately \$9,188.7 million of this increase relates to the acquisition of Medco and inclusion of its revenues for the three months ended June 30, 2012. The remaining increase relates primarily to inflation on branded drugs offset by an increase in the generic fill rate. Our consolidated network generic fill rate increased to 78.7% of network claims in the three months ended June 30, 2012 as compared to 75.2% in the same period of 2011 for ESI on a stand-alone basis.

Home delivery and specialty revenues increased \$6,216.7 million, or 173.9%, in the three months ended June 30, 2012 from the same period in 2011. Approximately \$5,794.8 million of this increase relates to the acquisition of Medco and inclusion of its revenues for the three months ended June 30, 2012. Of the remaining increase, approximately \$226.4 million is primarily due to higher claims volume attributed to the success of mail conversion programs and approximately \$195.5 million relates to inflation on branded drugs offset by an increase in the generic fill rate. Our consolidated home delivery generic fill rate increased to 70.5% of home delivery claims in the three months ended June 30, 2012 as compared to 62.7% in the same period of 2011 for ESI on a stand-alone basis.

Product Revenues for the six months ended June 30, 2012: Network pharmacy revenues increased by \$9,871.5 million, or 67.4%, in the six months ended June 30, 2012 over the same period of 2011. Approximately \$9,188.7 million of this increase relates to the acquisition of Medco and inclusion of its revenues for the three months ended June 30, 2012. Of the remaining increase, approximately \$533.0 million of this increase relates to inflation on branded drugs offset by an increase in the generic fill rate and approximately \$149.8 million is primarily due to higher claims volume. Our consolidated network generic fill rate increased to 78.4% of network claims in the six months ended June 30, 2012 as compared to 75.1% in the same period of 2011 for ESI on a stand-alone basis.

Table of Contents

Home delivery and specialty revenues increased \$6,735.0 million, or 95.7%, in the six months ended June 30, 2012 from the same period in 2011. Approximately \$5,794.8 million of this increase relates to the acquisition of Medco and inclusion of its revenues for the three months ended June 30, 2012. Of the remaining increase, approximately \$493.0 million relates to inflation on branded drugs offset by an increase in the generic fill rate and approximately \$447.2 million is primarily due to higher claims volume attributed to the success of mail conversion programs. Our consolidated home delivery generic fill rate increased to 69.4% of home delivery claims in the six months ended June 30, 2012 as compared to 62.2% in the same period of 2011 for ESI on a stand-alone basis.

Cost of PBM revenues increased \$14,597.4 million, or 142.3%, and \$15,471.7 million, or 76.1%, in the three and six months ended June 30, 2012, respectively, from the same periods of 2011. Approximately \$14,101.4 million of this increase relates to the acquisition of Medco and inclusion of its costs of revenues for the three months ended June 30, 2012. The remaining increase in the three and six months ended June 30, 2012 is due primarily to \$11.9 million of transaction and integration costs for the three and six months ended June 30, 2012 and increased volume and increased inflation on branded drugs offset by the generic fill rate.

Our PBM gross profit increased \$1,239.0 million, or 160.8%, and \$1,325.3 million, or 88.2%, for the three and six months ended June 30, 2012, respectively, as compared to the same periods of 2011. Gross profit for the three and six months ended June 30, 2012 increased due to the acquisition of Medco, as well as better management of ingredient costs and cost savings from the increase in the aggregate generic fill rate.

Selling, general and administrative expense (SG&A) for our PBM segment for the three months ended June 30, 2012 increased by \$1,275.9 million, or 653.6%, as compared to the same period of 2011. Approximately \$846.3 million of this increase relates to the acquisition of Medco and inclusion of its SG&A for the three months ended June 30, 2012. The remaining increase primarily relates to \$343.9 million of transaction and integration costs, as well as management incentive compensation.

SG&A for our PBM segment for the six months ended June 30, 2012 increased by \$1,350.1 million, or 356.8%, as compared to the same period of 2011. Approximately \$846.3 million of this increase relates to the acquisition of Medco and inclusion of its SG&A for the six months ended June 30, 2012. The remaining increase primarily relates to \$370.6 million of transaction and integration costs, as well as management incentive compensation.

PBM operating income decreased \$36.9 million, or 6.4% and \$24.8 million, or 2.2% for the three and six months ended June 30, 2012 as compared to the same periods of 2011, based on the various factors described above.

Table of Contents*OTHER BUSINESS OPERATIONS OPERATING INCOME*

During the second quarter of 2012, we reorganized our segments to better reflect our structure following the Merger. Our new segment structure is composed of our domestic and Canadian PBM segment and our Other Business Operations (Other Business Ops) segment. For further description of the services performed by each segment, refer to the discussion under the caption PBM Operating Income contained within Results of Operations. Historical segment information has been retrospectively adjusted to reflect the effect of these changes.

<i>(in millions)</i>	Three Months Ended		Six Months Ended	
	June 30, 2012	June 30, 2011	June 30, 2012	June 30, 2011
Product revenues	\$ 707.8	\$ 326.3	\$ 1,079.5	\$ 621.6
Service revenues	118.5	5.3	124.9	10.6
Total Other Business Ops revenues	826.3	331.6	1,204.4	632.2
Cost of Other Business Ops revenues	722.7	317.8	1,087.8	605.6
Other Business Ops gross profit	103.6	13.8	116.6	26.6
Other Business Ops SG&A expenses	109.7	9.6	119.8	19.5
Other Business Ops operating (loss) income	\$ (6.1)	\$ 4.2	\$ (3.2)	\$ 7.1
Claims				
Home delivery and specialty	2.3	0.0	2.3	0.0
Total adjusted Other Business Ops claims ⁽¹⁾	6.9	0.0	6.9	0.0

- (1) Total adjusted claims reflect home delivery claims multiplied by 3, as home delivery claims typically cover a time period 3 times longer than retail claims.

Other Business Ops: Other Business Ops operating (loss) income decreased by \$10.3 million, or 245.2%, and \$10.3 million, or 145.1%, for the three and six months ended June 30, 2012 from the same period of 2011. Approximately \$8.4 million of this decrease relates to the acquisition of Medco and inclusion of its operating loss for the three and six months ended June 30, 2012. The remaining decrease primarily relates to higher costs due to product mix which were partially offset by decreases in volume across all lines of business within the segment.

OTHER (EXPENSE) INCOME

Net interest expense and other increased \$119.8 million and \$210.2 million in the three and six months ended June 30, 2012, respectively, as compared to the same periods of 2011. These increases are primarily due to interest associated with senior notes issued in May 2011 and debt issued in connection with the Merger.

PROVISION FOR INCOME TAXES

Our effective tax rate increased to 53.0% and 45.0% for the three and six months ended June 30, 2012, respectively, as compared to 37.0% and 36.7% for the same periods in 2011 due to both recurring and nonrecurring events. The state apportionment and income tax filing positions of the combined organization has increased our recurring effective tax rate by approximately 1.9%. Nonrecurring charges increased our effective tax rate for the three end six months ended June 30, 2012 by 10.9% and 5.6%, respectively.

Table of Contents

Due to the adoption of common income tax return filing methods between ESI and Medco, we recorded a nonrecurring \$23.2 million income tax contingency related to prior year income tax return filings. We also recorded a nonrecurring charge of \$16.4 million resulting from the reversal of the deferred tax asset previously established for transaction-related costs that became nondeductible upon the consummation of the Merger. Lastly, unrelated to the Merger, we recorded a nonrecurring charge of \$5.2 million in the first quarter of 2012 due to changes in our unrecognized tax benefits.

NET INCOME AND EARNINGS PER SHARE

Net income for the three and six months ended June 30, 2012 decreased \$163.3 million, or 48.9%, and \$222.0 million, or 33.6%, respectively, over the same periods of 2011. Basic and diluted earnings per share both decreased 68.2% for the three months ended June 30, 2012 over the same period of 2011. For the six months ended June 30, 2012, basic and diluted earnings per share decreased 46.9% and 48.0%, respectively, over the same period of 2011. These decreases are primarily due to transaction costs incurred in connection with the Merger, as well as an increase in shares outstanding in connection with the Merger, interest expense, financing fees, and commitment fees, partially offset by increased gross profit and treasury share repurchases during 2011.

EBITDA

We have provided below a reconciliation of EBITDA to net income as we believe it is the most directly comparable measure calculated under accounting principles generally accepted in the United States:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
EBITDA ⁽¹⁾ (in millions, except per claim data)	2012	2011	2012	2011
Net income	\$ 170.9	\$ 334.2	\$ 438.7	\$ 660.7
Income taxes	192.6	196.3	359.6	382.9
Depreciation and amortization	605.2	63.3	670.2	126.2
Interest expense, net	172.9	48.8	302.6	88.1
Undistributed gain from joint venture	(4.3)		(4.3)	
EBITDA	1,137.3	642.6	1,766.8	1,257.9
Adjustments to EBITDA				
Transaction and integration costs	355.8		382.5	
Adjusted EBITDA	1,493.1	642.6	2,149.3	1,257.9
Total adjusted claims	404.3	185.7	597.1	371.8
Adjusted EBITDA per adjusted claim⁽²⁾	\$ 3.69	\$ 3.46	\$ 3.60	\$ 3.38

- (1) EBITDA is earnings before other income (expense), interest, taxes, depreciation and amortization, or alternatively calculated as operating income plus depreciation and amortization. EBITDA is presented because it is a widely accepted indicator of a company's ability to service indebtedness and is frequently used to evaluate a company's performance. EBITDA, however, should not be considered as an alternative to net income, as a measure of operating performance, as an alternative to cash flow, as a measure of liquidity or as a substitute for any other measure computed in accordance with accounting principles generally accepted in the United States. In addition, our definition and calculation of EBITDA may not be comparable to that used by other companies.
- (2) Adjusted EBITDA per adjusted claim is a supplemental measurement used by analysts and investors to help evaluate overall operating performance. We have calculated adjusted EBITDA excluding certain charges recorded each year, as these charges are not considered an indicator of ongoing company performance. Adjusted EBITDA per adjusted claim is calculated by dividing adjusted EBITDA by the adjusted claim volume for the period. This measure is used as an indicator of EBITDA performance on a per-unit basis. Adjusted EBITDA, and as a result, EBITDA per adjusted claim, are affected by the changes in claim volumes between retail and mail-order, the relative representation of brand-name, generic and specialty pharmacy drugs, as well as the level of efficiency in the business.

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES

OPERATING CASH FLOW, CAPITAL EXPENDITURES AND FINANCING

For the six months ended June 30, 2012, net cash provided by operations increased \$553.1 million to \$1,256.2 million compared to the same period of 2011. Changes in working capital resulted in cash inflow of \$24.8 million in the six months ended June 30, 2012 compared to a cash outflow of \$210.6 million over the same period of 2011, resulting in a total change of \$235.4 million. The cash flow increase was primarily due to the Merger as well as the timing and receipt of accounts receivable. This increase was offset by a decrease in net income of \$222.0 million in the six months ended June 30, 2012 compared to the same period of 2011.

Net cash used in investing activities increased \$10,309.7 million for the six months ended June 30, 2012 over the same period of 2011 primarily due to cash outflows in connection with the Merger offset against net cash acquired from Medco as of April 2, 2012. Capital expenditures increased compared to the prior period due primarily to integration-related investments. We intend to continue to invest in infrastructure and technology that we believe will provide efficiencies in operations, facilitate growth and enhance the service we provide to our clients. Anticipated capital expenditures will be funded primarily from operating cash flow or, to the extent necessary, with borrowings under our revolving credit facility, discussed below.

Net cash provided by financing activities increased \$5,789.0 million for the six months ended June 30, 2012 compared to the same period in 2011. This increase is primarily due to proceeds of \$3,458.9 million from the issuance of senior notes during the three months ended March 31, 2012 and proceeds of \$4,000.0 million in connection with the term facility used to fund the Merger. The increase was offset by \$1,500.0 million redemption of senior notes and \$2,000.0 million retirement of Medco's five year credit facilities.

Medco held a \$1,000.0 million senior unsecured revolving credit facility and a \$1,000.0 million senior unsecured term loan at the time of the Merger on April 2, 2012. Immediately upon consummation of the Merger, we repaid the credit facility, term loan and all associated interest.

On May 7, 2012, the Company redeemed Medco's \$500.0 million aggregate principal amount of 7.25% senior notes due 2013. These notes were redeemable at a redemption price equal to the greater of (i) 100% of the principal amount of the notes being redeemed, or (ii) the sum of the present values of 107.25% of the principal amount of these notes being redeemed, plus all scheduled payments of interest on the notes discounted to the redemption date at a semi-annual equivalent yield to a comparable U.S. Treasury security for such redemption date plus 50 basis points. Total cash payments related to these notes were \$549.4 million comprised of principal, redemption costs and interest. In connection with this redemption, on May 7, 2012 Medco settled five interest rate swap agreements entered into in 2004.

On June 15, 2012, \$1.0 billion aggregate principal amount of 5.250% senior notes due 2012, issued by ESI, matured and were redeemed.

We anticipate that our current cash balances, cash flows from operations and our revolving credit facility will be sufficient to meet our cash needs and make scheduled payments for our contractual obligations and current capital commitments. However, if needs arise, we may decide to secure external capital to provide additional liquidity. New sources of liquidity may include additional lines of credit, term loans, or issuance of notes or common stock, all of which are allowable, with certain limitations, under our existing credit agreement and other debt instruments. While our ability to secure debt financing in the short term at rates favorable to us may be moderated due to various factors, including the financing incurred in connection with the Merger, market conditions or other factors, we believe our liquidity options discussed above should be sufficient to meet our anticipated cash flow needs.

Table of Contents

CHANGES IN BUSINESS

As a result of the Merger on April 2, 2012, Medco and ESI each became wholly owned subsidiaries of the Company and former Medco and ESI stockholders became owners of stock in Express Scripts, which is listed for trading on the NASDAQ. Upon closing of the Merger, former ESI stockholders own approximately 59% of Express Scripts and former Medco stockholders own approximately 41%. Per the terms of the Merger Agreement, each share of Medco common stock was converted into (i) the right to receive \$28.80 in cash, without interest and (ii) 0.81 shares of Express Scripts stock. Holders of Medco stock options, restricted stock units, and deferred stock units received a replacement award at an exchange ratio of 1.3474 Express Scripts awards for each Medco award earned, which is equal to the sum of (i) 0.81 and (ii) the quotient obtained by dividing (1) \$28.80 (the cash component of the Merger consideration) by (2) an amount equal to the average of the closing prices of ESI common stock on the NASDAQ for each of the 15 consecutive trading days ending with the fourth complete trading day prior to the completion of the Merger. Based on the opening price of Express Scripts stock on April 2, 2012, total consideration was \$30.2 billion, composed of \$11.3 billion in cash, \$18.0 billion in common stock of the Company, and \$0.9 billion of replacement stock options and restricted stock units. We believe the Merger will combine the expertise of two complementary pharmacy benefit managers to accelerate efforts to lower the cost of prescription drugs and improve the quality of care.

We regularly review potential acquisitions and affiliation opportunities. We believe available cash resources, bank financing or the issuance of additional common stock could be used to finance future acquisitions or affiliations. There can be no assurance we will make new acquisitions or establish new affiliations in 2012 or thereafter, other than the Merger with Medco.

STOCK REPURCHASE PROGRAM

Upon consummation of the Merger on April 2, 2012, all ESI shares held in treasury were no longer outstanding and were cancelled and retired and ceased to exist.

The Board of Directors of Express Scripts has not yet adopted a stock repurchase program to allow for the repurchase of shares of Express Scripts.

ACCELERATED SHARE REPURCHASE

On May 27, 2011, ESI entered into agreements to repurchase shares of its common stock for an aggregate purchase price of \$1,750.0 million under an Accelerated Share Repurchase (ASR) arrangement. During 2011, ESI settled \$1,725.0 million of the ASR agreement and received 33.4 million shares. On April 27, 2012, we settled the remaining portion of the ASR agreement and received 0.1 million additional shares, resulting in a total of 33.5 million shares received under the agreement.

BANK CREDIT FACILITIES

On August 29, 2011, ESI entered into a credit agreement (the new credit agreement) with a commercial bank syndicate providing for a five-year \$4.0 billion term loan facility (the term facility) and a \$1.5 billion revolving loan facility (the new revolving facility). The term facility was used to pay a portion of the cash consideration paid in connection with the Merger, as discussed in Note 3 Changes in business, to repay existing indebtedness, and to pay related fees and expenses. Subsequent to consummation of the Merger on April 2, 2012, the new revolving facility is available for general corporate purposes and replaced our \$750.0 million credit facility upon funding of the term facility on April 2, 2012. The term facility and the new revolving facility both mature on August 29, 2016. As of June 30, 2012, \$400.0 million was outstanding under the new revolving facility. Upon consummation of the Merger, Express Scripts assumed the obligations of ESI and became the borrower under the new credit agreement and new revolving facility.

On August 13, 2010, ESI entered into a credit agreement with a commercial bank syndicate providing for a three-year revolving credit facility of \$750.0 million (the 2010 credit facility). The 2010 credit facility was terminated and replaced by the new revolving facility on April 2, 2012, as described above.

Our credit agreements contain covenants that restrict our ability to incur additional indebtedness, create or permit liens on assets and engage in mergers or consolidations. The covenants under the new credit agreement exempt such agreed upon actions taken in connection with the Merger. The covenants also include minimum interest coverage ratios and maximum leverage ratios. At June 30, 2012, we believe we were in compliance in all material respects with all covenants associated with our credit agreements.

Table of Contents

See Note 7 Financing for more information on our credit facilities.

BRIDGE FACILITY

On August 5, 2011, ESI entered into a credit agreement with Credit Suisse AG, Cayman Islands Branch, as administrative agent, Citibank, N.A., as syndication agent, and the other lenders and agents named within the agreement. The credit agreement provided for a one-year unsecured \$14.0 billion bridge term loan facility (the bridge facility) to be used to pay a portion of the cash consideration in connection with the Merger in the event that more favorable financing arrangements could not be secured. No amounts were withdrawn under the bridge facility, and subsequent to consummation of the Merger on April 2, 2012, ESI terminated the bridge facility.

FIVE-YEAR CREDIT FACILITIES

On April 30, 2007, Medco entered into a senior unsecured credit agreement, which was available for general working capital requirements. The facility consisted of a \$1.0 billion, 5-year senior unsecured term loan and a \$2.0 billion, 5-year senior unsecured revolving credit facility. The facility was due to mature on April 30, 2012. Medco refinanced the \$2.0 billion senior unsecured revolving credit facility on January 23, 2012. Upon completion of the Merger, the \$1.0 billion senior unsecured term loan and all associated interest, and the \$1.0 billion then outstanding under the senior unsecured revolving credit facility, were repaid in full and terminated.

ACCOUNTS RECEIVABLE FINANCING FACILITY

Upon consummation of the Merger, Express Scripts assumed a \$600 million, 364-day renewable accounts receivable financing facility that is collateralized by Medco's pharmaceutical manufacturer rebates accounts receivable. As of June 30, 2012, Express Scripts has drawn down \$600.0 million, none of which was repaid, under the facility. Express Scripts pays interest on amounts borrowed under the agreement based on the funding rates of the bank-related commercial paper programs that provide the financing, plus an applicable margin and liquidity fee determined by Express Scripts' credit rating. This facility is renewable annually as the option of Express Scripts and the banks.

INTEREST RATE SWAP

Medco entered into five interest rate swap agreements in 2004. These swap agreements, in effect, converted \$200 million of Medco's \$500 million of 7.250% senior notes due 2013 to variable interest rate debt. Under the terms of these swap agreements, Medco received a fixed rate of interest of 7.25% on \$200 million and paid variable interest rates based on the six-month LIBOR plus a weighted average spread of 3.05%. The payment dates under the agreements coincided with the interest payment dates on the hedged debt instruments and the difference between the amounts paid and received is included in interest expense. These swaps were settled on May 7, 2012. Express Scripts received \$10.1 million for settlement of the swaps and the associated accrued interest receivable through May 7, 2012, and recorded a loss of \$1.5 million related to the carrying amount of the swaps and bank fees.

SENIOR NOTES

On February 6, 2012, we issued \$3.5 billion of Senior Notes in a private placement with registration rights, including:

\$1.0 billion aggregate principal amount of 2.100% Senior Notes due 2015

\$1.5 billion aggregate principal amount of 2.650% Senior Notes due 2017

\$1.0 billion aggregate principal amount of 3.900% Senior Notes due 2022

Table of Contents

On November 14, 2011, we issued \$4.1 billion of Senior Notes in a private placement with registration rights, including:

\$900 million aggregate principal amount of 2.750% Senior Notes due 2014

\$1.25 billion aggregate principal amount of 3.500% Senior Notes due 2016

\$1.25 billion aggregate principal amount of 4.750% Senior Notes due 2021

\$700 million aggregate principal amount of 6.125% Senior Notes due 2041

The net proceeds were used to pay a portion of the cash consideration paid in the Merger and to pay related fees and expenses (see Note 3 Changes in business).

On May 2, 2011, ESI issued \$1.5 billion aggregate principal amount of 3.125% Senior Notes due 2016. The proceeds were used to repurchase treasury shares.

On September 10, 2010, Medco issued \$1.0 billion of Senior Notes, including:

\$500 million aggregate principal amount of 2.75% Senior Notes due 2015

\$500 million aggregate principal amount of 4.125% Senior notes due 2020

The net proceeds were used for general corporate purposes, which including funding the United BioSource Corporation (UBC) acquisition.

On June 9, 2009, ESI issued \$2.5 billion of Senior Notes, including:

\$1.0 billion aggregate principal amount of 5.250% Senior Notes due 2012

\$1.0 billion aggregate principal amount of 6.250% Senior Notes due 2014

\$500 million aggregate principal amount of 7.250% Senior Notes due 2019

The net proceeds were used for the acquisition of WellPoint's NextRx PBM Business. On June 15, 2012, the Company redeemed ESI's \$1.0 billion aggregate principal amount of 5.250% senior notes due 2012 (see Note 7 Financing for further discussion).

On March 18, 2008, Medco issued \$1.5 billion of Senior Notes, including:

\$300.0 million aggregate principal amount of 6.125% Senior Notes due 2013

\$1.2 billion aggregate principal amount of 7.125% Senior Notes due 2018

Edgar Filing: Express Scripts Holding Co. - Form 10-Q

The net proceeds were used to reduce debts held on Medco's revolving credit facility, which funded the PolyMedica Corporation (Liberty) and CCS Infusion Management, LLC (CCS) acquisitions.

See Note 7 Financing for more information on our Senior Notes borrowings.

Table of Contents**CONTRACTUAL OBLIGATIONS AND COMMERCIAL COMMITMENTS**

The following table sets forth our schedule of current maturities of our long-term debt as of June 30, 2012, future minimum lease payments due under noncancellable operating leases of our continuing operations, and purchase commitments (in millions):

Contractual obligations	Total	Payments due by period as of June 30, 2012			
		2012 ⁽¹⁾	2013-2014	2015-2016	Thereafter
Long-term debt ⁽²⁾	\$ 16,903.5	\$ 490.5	\$ 4,366.3	\$ 6,226.6	\$ 5,820.1
Future minimum lease payments	333.9	49.6	144.2	77.3	62.8
Purchase commitments ⁽³⁾	951.2	274.3	672.7	3.1	1.1
Total contractual cash obligations	\$ 18,188.6	\$ 814.4	\$ 5,183.2	\$ 6,307.0	\$ 5,884.0

- (1) Represents remaining six months of 2012.
- (2) These payments exclude the interest expense on our revolving credit facility, which requires us to pay interest on LIBOR plus a margin. Our interest payments fluctuate with changes in LIBOR and in the margin over LIBOR we are required to pay (see Note 7 Financing Bank Credit Facilities), as well as the balance outstanding on our revolving credit facility. Interest payments on our Senior Notes are fixed, and have been included in these amounts.
- (3) These amounts consist of required future purchase commitments for prescription products, supplies, services and fixed assets in the normal course of business. We do not expect potential payments under these provisions to materially affect results of operations or financial condition. This conclusion is based upon reasonably likely outcomes derived by reference to historical experience and current business plans.

We have a remaining minimum pension funding requirement of \$14.8 million under the Internal Revenue Code during 2012.

OTHER MATTERS

As previously noted in ESI's Annual Report on Form 10-K for the year ended December 31, 2011, the contract with Walgreens Co. (Walgreens) expired on December 31, 2011. Prior to expiration of the contract with Walgreens, we provided a full array of tools and resources to help members efficiently transfer prescriptions to other conveniently located pharmacies. As announced on July 19, 2012, Express Scripts and Walgreens have reached a multi-year pharmacy network agreement with rates and terms under which Walgreens will participate in our broadest Express Scripts retail pharmacy network available to new and existing clients, as of September 15, 2012. Express Scripts will work to provide a smooth transition for those plan sponsors who will include Walgreen's pharmacies in their network.

IMPACT OF INFLATION

Changes in prices charged by manufacturers and wholesalers for pharmaceuticals affect our revenues and cost of revenues. Most of our contracts provide that we bill clients based on a generally recognized price index for pharmaceuticals.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to market risk from changes in interest rates related to debt outstanding under our credit agreement. Our earnings are subject to change as a result of movements in market interest rates. At June 30, 2012, we had \$3,453.7 million of obligations, net of cash, which were subject to variable rates of interest under our credit agreements. A hypothetical increase in interest rates of 1% would result in an increase in annual interest expense of approximately \$34.5 million (pre-tax), presuming that obligations subject to variable interest rates remained constant.

Item 4. Controls and Procedures

We maintain a comprehensive set of disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (Exchange Act)) designed to provide reasonable assurance that information required to be disclosed in our filings under the Exchange Act is recorded, processed, summarized and reported accurately and within the time periods specified in the SEC's rules and forms. Under the supervision and with the participation of our management, including our Chairman, President and Chief Executive Officer and our

Edgar Filing: Express Scripts Holding Co. - Form 10-Q

Executive Vice President and Chief Financial Officer, we have evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this report. Based upon this evaluation, the Chairman, President and Chief Executive Officer and the Executive Vice President and Chief Financial Officer concluded that the design and operation of these disclosure controls and procedures are effective in providing reasonable assurance of the achievement of the objectives described above.

Edgar Filing: Express Scripts Holding Co. - Form 10-Q

On April 2, 2012, the Company acquired Medco Health Solutions, Inc. (Medco). As a result of the Medco acquisition, the Company has incorporated internal controls over significant processes specific to the acquisition that it believes to be appropriate and necessary in consideration of the level of related integration. As the Company further integrates the Medco business, it will continue to review the internal controls and may take further steps to ensure that the internal controls are effective and integrated appropriately.

Except as described in the preceding paragraph, during the quarter ended June 30, 2012, there was no change in our internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

We and/or our subsidiaries are parties to a number of lawsuits, claims, government inquiries, investigations, charges and proceedings in which unspecified damages are sought. We cannot ascertain with any certainty at this time the monetary damages or injunctive relief that any of the opposing parties may seek to recover. We also cannot provide any assurance that the outcome of any of these matters, or some number of them in the aggregate, will not be materially adverse to our financial condition, consolidated results of operations, cash flows or business prospects. In addition, the expenses of defending these cases may have a material adverse effect on our financial results.

In the Quarterly Report on Form 10-Q for the quarter ended March 31, 2012, we described certain proceedings related to Medco which affect us following the closing of the Merger. The following developments have occurred since the filing of our Annual Report on Form 10-K for the year ended December 31, 2011 and the Quarterly Report on Form 10-Q for the quarter ended March 31, 2012, relating to proceedings involving both legacy ESI and Medco:

Jerry Beeman, et al. v. Caremark, et al. (Case No.021327, United States District Court for the Central District of California). On December 12, 2002, a complaint was filed against Express Scripts and NextRX LLC f/k/a Anthem Prescription Management LLC and several other pharmacy benefit management companies. The complaint, filed by several California pharmacies as a putative class action, alleges rights to sue as a private attorney general under California law. The complaint alleges that we, and the other defendants, failed to comply with statutory obligations under California Civil Code Section 2527 to provide our California clients with the results of a bi-annual survey of retail drug prices. On July 12, 2004, the case was dismissed with prejudice on the grounds that the plaintiffs lacked standing to bring the action. On June 2, 2006, the United States Court of Appeals for the Ninth Circuit reversed the district court's opinion on standing and remanded the case to the district court. The district court's denial of defendants' motion to dismiss on California state first amendment constitutionality grounds is currently on appeal to the Ninth Circuit. Plaintiffs have filed a motion for class certification, but that motion has not been briefed pending the outcome of the appeal. On July 19, 2011, the Ninth Circuit affirmed the district court's denial of defendants' motion to dismiss. On August 16, 2011, defendants filed a petition for rehearing en banc for the Ninth Circuit's reconsideration of its ruling on defendants' motion to dismiss, which was granted on October 31, 2011. On June 6, 2012, the Ninth Circuit certified the first amendment issue for the Supreme Court of California's review and requested an authoritative decision on the question of California constitutional law. The Supreme Court of California accepted the Ninth Circuit's request on July 18, 2012, and we await the Court's ruling.

Irwin v. WellPoint Health Networks, et. al. (Judicial Arbitration and Mediation Services). On March 25, 2003, plaintiff filed a complaint in California state court against WellPoint Health Networks and certain related entities, including one of the acquired NextRX subsidiaries (collectively WellPoint), ESI, and other PBMs alleging his right to sue under California's Unfair Competition Law (UCL). ESI was dismissed in 2008, but WellPoint remains a defendant. This case purported to be a class action against the PBM defendants on behalf of self-funded, non-ERISA health plans and individuals with no prescription drug benefits that have purchased drugs at retail rates. On May 6, 2004, WellPoint invoked an arbitration clause and the case against WellPoint was stayed and sent to arbitration. On February 24, 2006, plaintiff served an arbitration demand against WellPoint alleging that numerous WellPoint business practices violated the UCL and making claims on behalf of California residents who paid taxes, California residents who were beneficiaries of non-ERISA health plans, and California residents who obtained prescription benefits from non-ERISA health plans. On October 11, 2006, WellPoint filed its response to the arbitration demand. No further activity occurred until July 16, 2012, when WellPoint filed a motion to dismiss plaintiff's arbitration demand for failure to prosecute the case for over nine years.

Table of Contents

Several lawsuits were filed by stockholders of Medco challenging the Merger following the announcement on July 21, 2011, that ESI and Medco had entered into a definitive merger agreement. The complaints in the actions name as defendants Medco and/or various members of Medco's board of directors as well as ESI and certain of its subsidiaries that are party to the merger agreement. Twenty-two complaints were filed in three different venues: the Court of Chancery of the State of Delaware, in the United States District Court for the District of New Jersey, and in the Superior Court of the State of New Jersey. The plaintiffs in the purported class action complaints generally alleged, among other things, that (i) the members of Medco's board of directors breached their fiduciary duties to Medco and its stockholders by authorizing the proposed merger and (ii) ESI and three of its subsidiaries - Plato Merger Sub, Inc., the Company (then Aristotle Holding, Inc.) and Aristotle Merger Sub, Inc. - aided and abetted the alleged breaches of fiduciary duty by Medco and its directors. The plaintiffs sought, among other things, to enjoin the defendants from consummating the merger transaction on the agreed-upon terms, and unspecified compensatory damages, together with the costs and disbursements of the action. A class was certified in the Court of Chancery of the State of Delaware. The cases filed in the Superior Court of the State of New Jersey were stayed on August 26, 2011. On November 7, 2011, the parties entered into a memorandum of understanding in which they agreed upon the terms of settlement, and plaintiffs agreed to withdraw applications for preliminary injunction of the acquisition and stay all further litigation pending court approval of the settlement. The terms of the settlement are reflected in the Amendment No. 1 to Agreement and Plan of Merger, which was included as Exhibit 2.1 to ESI's Current Report on Form 8-K filed November 8, 2011. On April 18, 2012, the United States District of New Jersey approved the settlement and dismissed the cases before it. On May 30, 2012, the Court of Chancery of the State of Delaware dismissed the cases before it with prejudice. On June 12, 2012, the cases pending before the Superior Court of New Jersey were dismissed by consent of parties.

Additional information regarding such matters is contained in Item 3 - Legal Proceedings in each of Express Scripts' and Medco's Annual Reports on Form 10-K for the year ended December 31, 2011.

In addition, in the ordinary course of our business there have arisen various legal proceedings, investigations or claims now pending against our subsidiaries and us. The effect of these actions on future financial results is not subject to reasonable estimation because considerable uncertainty exists about the outcomes. Where insurance coverage is not available for such claims, or in our judgment, is not cost-effective, we maintain self-insurance reserves to reduce our exposure to future legal costs, settlements and judgments related to uninsured claims. Our self-insured reserves are based upon estimates of the aggregate liability for the costs of uninsured claims incurred and the retained portion of insured claims using certain actuarial assumptions followed in the insurance industry and our historical experience. It is not possible to predict with certainty the outcome of these claims, and we can give no assurance that any losses in excess of our insurance and any self-insurance reserves will not be material.

Table of Contents

Item 1A Risk Factors

Our business is subject to certain risks and uncertainties. In evaluating the business and prospects of Express Scripts Holding Company, you should carefully consider the risk factors presented below, which are restated in their entirety as compared to the risk factors presented in ESI's Form 10-K for the year ended December 31, 2011 prior to the completion of the Merger. You should consider these risk factors together with other matters described in ESI's and Medco's Annual Reports on Form 10-K for the year ended December 31, 2011, in this Quarterly Report on Form 10-Q and in our, ESI's and Medco's other filings with the SEC.

The following general risk factors have been amended from our Quarterly Report on Form 10-Q for the quarter ended March 31, 2012:

We operate in a complex and evolving regulatory environment. Changes in applicable laws or regulations, or their interpretation or enforcement, or the enactment of new laws or regulations, could require us to make changes to how we operate our business or result in the imposition of penalties. Further, we may be required to spend significant resources in order to comply with new or existing laws and regulations.

If we lose our relationship, or our relationship otherwise changes in an unfavorable manner, with one or more key pharmacy providers, or if significant changes occur within the pharmacy provider marketplace, or if other issues arise with respect to our pharmacy networks, our business could be impaired.

A substantial portion of our revenue is concentrated in certain significant client contracts. Our failure to execute on, or other issues arising under, the contracts could adversely affect our financial results. Further, conditions or trends impacting certain of our key clients could result in a negative impact on our financial performance.

See further discussion of these general risk factors below.

General Risk Factors

We operate in a very competitive industry, and competition could compress our margins and impair our ability to attract and retain clients. Our failure to differentiate our products and services in the marketplace could magnify the impact of the competitive environment.

Our ability to remain competitive is dependent upon our ability to attract new clients and retain existing clients, as well as cross-sell additional services to our clients. We operate in a highly competitive environment and in an industry that is subject to significant market pressures brought about by customer demands, legislative and regulatory activity and other market factors. Historically in the PBM industry, competition in the marketplace has also caused many PBMs, including us, to reduce the prices charged to clients for core services and share a larger portion of the formulary fees and related revenues received from pharmaceutical manufacturers with clients. This combination of lower pricing and increased revenue sharing, as well as increased demand for enhanced service offerings and higher service levels, puts pressure on operating margins, which have historically been offset by a variety of positive trends including lower drug purchasing costs, increased generic usage, drug price inflation and increased rebates. Our failure or inability to maintain these positive trends, or identify and implement new ways to mitigate pricing pressures, could impact our ability to attract or retain clients or could negatively impact our margins.

In addition, our clients are well informed and organized and can easily move between us and our competitors. These factors together with the impact of the competitive marketplace or other significant differentiating factors between our offerings and those of our competitors may make it difficult for us to retain existing clients, sell to new clients and cross-sell additional services to clients, which could materially adversely affect our business and financial results.

In a highly competitive marketplace such as the PBM industry, a competitor's business offering and reputation within the industry can have a substantial impact on its ability to attract and retain clients. This requires us to differentiate our business offerings by innovating and delivering products and services that demonstrate value to our clients, particularly in response to market changes from public policy. Further, the reputational impact of a service-related event, or our failure to innovate and deliver products and services that demonstrate value to our clients, may affect our ability to retain or grow profitable clients which could have a material adverse effect on our financial results.

Table of Contents

The managed care industry has undergone substantial consolidation in recent years, and we believe this trend is likely to continue. If one or more of our managed care clients is acquired, and the acquiring entity is not a client, then we may be unable to retain all or a portion of the impacted business. If such acquisitions, individually or in the aggregate, are material, they could have a material adverse effect on our business, the results of our operations and financial position.

The delivery of healthcare-related products and services is an evolving and rapidly changing industry. Our failure to anticipate or appropriately adapt to changes in the industry could have a negative impact on our ability to compete and adversely affect our business operations and financial results.

While we believe we are well positioned in our industry, we have designed our business model to compete within the current industry structure. Any significant shift in the structure of the PBM industry could affect the environment in which we compete. A large intra- or inter-industry merger or a new business model entrant could alter the industry dynamics and adversely affect our business and financial results as our client contracts are generally three years and our pharmaceutical manufacturer and retail contracts are generally non-exclusive and terminable on relatively short notice by either party. Our failure to anticipate or appropriately adapt to changes in the industry could negatively impact our competitive position and adversely affect our business operations and financial results.

We operate in a complex and evolving regulatory environment. Changes in applicable laws or regulations, or their interpretation or enforcement, or the enactment of new laws or regulations, could require us to make changes to how we operate our business or result in the imposition of penalties. Further, we may be required to spend significant resources in order to comply with new or existing laws and regulations.

Numerous state and federal laws and regulations affect our business and operations. The categories include, among others, the following:

healthcare fraud and abuse laws and regulations, which prohibit certain types of payments and referrals as well as false claims made in connection with health benefit programs

ERISA and related regulations, which regulate many aspects of healthcare plan arrangements

state legislation regulating PBMs or imposing fiduciary status on PBMs

consumer protection and unfair trade practice laws and regulations

network pharmacy access laws, including any willing provider and due process legislation, that affect aspects of our pharmacy network contracts

wholesale distributor laws

legislation imposing benefit plan design restrictions, which limit how our clients can design their drug benefit plans

various licensure laws, such as managed care and third party administrator licensure laws

drug pricing legislation, including most favored nation pricing

Edgar Filing: Express Scripts Holding Co. - Form 10-Q

pharmacy laws and regulations

state insurance regulations applicable to our insurance subsidiaries

privacy and security laws and regulations, including those under HIPAA and HITECH

the Medicare prescription drug coverage rules

other Medicare and Medicaid reimbursement regulations, including subrogation

the federal Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act of 2010 (the Health Reform Laws)

federal laws related to our Department of Defense arrangement

federal antitrust laws related to our pharmacy, pharmaceutical manufacturer, and client relationships

international laws

These and other regulatory matters are discussed in more detail in ESI's Annual Report on Form 10-K for the fiscal year ended December 31, 2011 (the ESI Form 10-K) under Part I Item 1 Business Government Regulation and Compliance and in Medco's Annual Report on Form 10-K for the fiscal year ended December 31, 2011 (the Medco 2011 Form 10-K) under Part I Item 1 Business Corporate Compliance and Government Regulation Government Regulation .

Table of Contents

We believe that we are operating our business in substantial compliance with all existing legal requirements material to us. There are, however, significant uncertainties regarding the application of many of these legal requirements to our business, and state and federal law enforcement agencies and regulatory agencies from time to time have initiated investigations or litigation involving certain aspects of our (including Medco's) business or our competitors' businesses. Accordingly, we cannot provide any assurance that one or more of these agencies will not interpret or apply these laws in a manner adverse to our business, or, if there is an enforcement action brought against us, that our interpretation would prevail. In addition, there are numerous proposed healthcare laws and regulations at the federal and state levels, many of which could materially affect our ability to conduct our business or adversely affect our financial results. We are unable to predict whether additional federal or state legislation or regulatory initiatives may be enacted in the future relating to our business or the healthcare industry in general, or what effect any such legislation or regulations might have on us. Due to these uncertainties, we may be required to spend significant resources in connection with such investigations or litigation or to comply with new or existing laws and regulations.

Various governmental agencies have conducted investigations into certain PBM business practices. Many of these investigations have resulted in other PBMs agreeing to civil penalties, including the payment of money and corporate integrity agreements. We cannot predict what effect, if any, the governmental investigations and audits may ultimately have on us or on the PBM industry generally (for additional information regarding investigations, see Part I Item 3 Legal Proceedings in the ESI 2011 Form 10-K and Part II Item 1 Legal Proceedings in the Express Scripts Form 10-Q for the quarter ended March 31, 2012 and herein).

The District of Columbia previously enacted a statute that purports to declare that a PBM is a fiduciary with respect to its clients, although the statute was overturned by federal courts in the District of Columbia (see Part I Item 1 Business Government Regulations and Compliance State Fiduciary Legislation in the ESI 2011 Form 10-K). However, other states are considering but have not yet enacted similar fiduciary statutes, and we cannot predict what effect, if any, these and similar statutes, if enacted, may have on our business and financial results, nor can we predict how courts may view such laws.

Most of our activities involve the receipt or use of protected health information concerning individuals. In addition, we use aggregated and anonymized data for research and analysis and other permitted business purposes and in some cases provide access to data to pharmaceutical manufacturers and third party data aggregators in accordance with applicable law. Various federal and state laws, including HIPAA, regulate and restrict the use, disclosure and security of protected health information and new legislation is proposed from time to time in various states. Also, we have begun to expand into other countries, which have additional or potentially more stringent requirements, such as those applicable to the European Union nations, on the retention, use, transmission or disclosure of personally identifiable information. To date, no such domestic or foreign laws have been adopted that materially impact our ability to provide services, but there can be no assurance that federal or state domestic governments or foreign governments will not enact legislation, impose restrictions or adopt interpretations of existing laws that could have a material adverse effect on our business and financial results.

Policies designed to manage healthcare costs or alter healthcare financing practices may adversely impact our business and our financial results.

Certain proposals are made from time to time in the United States to manage healthcare costs, including prescription drug costs. These have included proposals such as single-payer government funded healthcare, changes in reimbursement rates, restrictions on access or therapeutic substitution, limits on more efficient delivery channels, taxes on goods and services, price controls on prescription drugs, and other significant healthcare reform proposals. We are unable to predict whether any such proposals will be enacted, or the specific terms thereof. Certain of these proposals, however, if enacted, may adversely impact our business and our financial results.

In March 2010, the federal government enacted the Health Reform Laws, which will be gradually phased in through 2020 (see Part I Item 1 Business Government Regulation and Compliance Federal Healthcare Reform in the ESI 2011 Form 10-K and Part I Item 1 Business Corporate Compliance and Government Regulation Government Regulation in the Medco 2011 Form 10-K). The Health Reform Laws contain many provisions that directly or indirectly apply to us, our clients, pharmaceutical manufacturers, healthcare providers and others with whom we do business, including:

Table of Contents

PBM disclosure requirements in the context of Medicare Part D and the anticipated health benefit exchanges

creation of government-regulated health benefits exchanges and new requirements for health plans offered by insurance companies, employers and other plan sponsors

medical loss ratio requirements, which require insurers to spend a specified percentage of premium revenues on incurred claims or healthcare quality improvements, and require some of our clients to report certain types of PBM proprietary information

various health insurance taxes

changes to the calculation of average manufacturer price (AMP) of drugs and an increase in the rebate amounts drug manufacturers must pay to states for drugs reimbursed by state Medicaid programs, including through Medicaid managed care organizations

imposition of new fees on pharmaceutical manufacturers and importers of brand-name prescription drugs

expansion of the 340B drug discount program, which limits the costs of certain outpatient drugs to qualified health centers and hospitals

closing of the so-called donut hole under Medicare Part D by lowering beneficiary coinsurance amounts

elimination of the tax deduction for employers who receive Medicare Part D retiree drug subsidy payments

mandated changes to client plan designs

changes to certain healthcare fraud and abuse laws

impact of the Durable Medical Equipment, Prosthetics and Supplies Competitive Bid Program (the DMEPOS Program), and/or changes to the reimbursement rates, on our business involving certain durable medical equipment items, including diabetes testing supplies

If we lose our relationship, or our relationship otherwise changes in an unfavorable manner, with one or more key pharmacy providers, or if significant changes occur within the pharmacy provider marketplace, or if other issues arise with respect to our pharmacy networks, our business could be impaired.

More than 60,000 retail pharmacies, which represent more than 95% of all United States retail pharmacies, participated in one or more of both ESI s and Medco s networks at June 30, 2012. As announced on July 19, 2012, Express Scripts and Walgreens have reached a multi-year pharmacy network agreement with rates and terms under which Walgreens will participate in the broadest Express Scripts retail pharmacy network available to new and existing clients. Walgreens will be part of the broadest network of pharmacies available to Express Scripts clients, as of September 15, 2012. Medco s network participation with Walgreens remains in place under existing terms.

The ten largest retail pharmacy chains, represented approximately 62% of the total number of stores in ESI s largest network as of June 30, 2012. In certain geographic areas of the United States, our networks may be comprised of higher concentrations of one or more large pharmacy chains. Some contracts with retail pharmacies, which are non-exclusive, are generally terminable on relatively short notice by either party. If one or

Edgar Filing: Express Scripts Holding Co. - Form 10-Q

more of the larger pharmacy chains terminates its relationship with us, or is able to renegotiate terms that are substantially less favorable to us, our members' access to retail pharmacies and/or our business could be materially adversely affected. In addition, the overall composition of our pharmacy networks, or reduced access under our networks, could have a negative impact on our claims volume and/or our competitiveness in the marketplace, cause us to fall short of certain guarantees in our contracts with clients, or otherwise impair our business or financial condition. The likelihood of our relationships with such pharmacy chains being adversely affected may be increased to the extent that large pharmacy chains enter the PBM business.

A substantial portion of our revenue is concentrated in certain significant client contracts. Our failure to execute on, or other issues arising under, the contracts could adversely affect our financial results. Further, conditions or trends impacting certain of our key clients could result in a negative impact on our financial performance.

As described in greater detail in the discussion of our business in Item 1 of the ESI 2011 Form 10-K, ESI has long term contracts with WellPoint, Inc. (WellPoint) and the United States Department of Defense (DoD). ESI's top 5 clients, including WellPoint and DoD, collectively represented 56.7% and 55.2% of its revenue during 2011 and 2010, respectively. Under its current agreement, ESI is providing pharmacy benefit services to WellPoint through December 31, 2019. The agreement with the DoD consists of an initial one-year contract and five one-year renewal options, with the final option expiring on October 31, 2014. Medco's largest client, UnitedHealth Group, represented approximately \$11,700 million, or 17%, of Medco's net revenues during 2011. Although none of

Table of Contents

Medco's other clients individually represented more than 10% of its net revenues in 2011, Medco's top 10 clients as of December 31, 2011, including UnitedHealth Group, represented approximately 46% of its net revenues during 2011. On July 21, 2011, Medco announced that its pharmacy benefit services agreement with UnitedHealth Group would not be renewed, although Medco will continue to provide services under the current agreement and thereafter through a transition agreement. In addition to UnitedHealth Group, other major clients representing approximately 13% of Medco's net revenues for 2011 did not renew their contracts with Medco for 2012 as a result of acquisitions by competitors or transitioning in the normal course of business.

Any further loss of one or more of our (including legacy ESI's or Medco's) large clients terminate or do not renew contracts for any reason, our financial results could be materially adversely affected and we could experience a negative reaction in the investment community resulting in stock price declines or other adverse effects. If we are not able to replace this lost business by generating new sales with comparable operating margins or successfully executing other corporate strategies, our revenues and results of operations could suffer. In addition, if certain of our key clients are negatively impacted by business conditions or other trends, or if such clients otherwise fail to successfully maintain or grow their business, our business and financial results could be adversely impacted.

Regulatory or business changes relating to our participation in Medicare Part D, the loss of Medicare Part D eligible members, or our failure to otherwise execute on our strategies related to Medicare Part D, may adversely impact our business and our financial results.

Certain of our subsidiaries have been approved to function as a Part D prescription drug plan (PDP) sponsor for purposes of making employer/union-only group waiver plans available for eligible clients. Also, Medco's insurance subsidiaries have been approved by CMS to participate in the Medicare Part D program as a national PDP sponsor to provide direct services to Medicare Part D eligible members. We also provide other products and services in support of our clients' Medicare Part D plans or federal Retiree Drug Subsidy and act as a PDP. We have made, and may be required to make further, substantial investments in the personnel and technology necessary to administer our Medicare Part D strategy. There are many uncertainties about the financial and regulatory risks of participating in the Medicare Part D program, and we can give no assurance that these risks will not materially adversely impact our business and our financial results in future periods.

Our subsidiaries are subject to various contractual and regulatory compliance requirements associated with participating in Medicare Part D. As insurers organized and licensed under applicable state laws, these subsidiaries are subject to certain aspects of state laws regulating the business of insurance in all jurisdictions in which they offer PDP services. As PDP sponsors, these subsidiaries are required to comply with certain federal Medicare Part D laws and regulations applicable to PDP sponsors. Additionally, the receipt of federal funds made available through the Part D program by us, our affiliates, or clients is subject to compliance with the Part D regulations and established laws and regulations governing the federal government's payment for healthcare goods and services, including the anti-kickback laws and the federal False Claims Act. Similar to our requirements with other clients, our policies and practices associated with operating our PDP are subject to audit. If material contractual or regulatory non-compliance was to be identified, monetary penalties and/or applicable sanctions, including suspension of enrollment and marketing or debarment from participation in Medicare programs, could be imposed. Further, the adoption or promulgation of new or more complex regulatory requirements associated with Medicare may require us to incur significant compliance-related costs which could adversely impact our business and our financial results.

In addition, due to the availability of Medicare Part D, some of our employer clients may decide to stop providing pharmacy benefit coverage to retirees, instead allowing the retirees to choose their own Part D plans, which could cause a reduction in utilization for our services. Extensive competition among Medicare Part D plans could also result in the loss of Medicare members by our managed care customers, which would also result in a decline in our membership base. Like many aspects of our business, the administration of the Medicare Part D program is complex. Any failure to execute the provisions of the Medicare Part D program may have an adverse effect on our financial position, results of operations or cash flows. As discussed above, in March 2010, comprehensive healthcare reform was enacted into federal law through the passage of the Health Reform Laws. Additionally, as described above, the Health Reform Laws contain various changes to the Part D program and could have a financial impact on our PDP and our clients' demand for our other Part D products and services.

Table of Contents

We have historically engaged in strategic transactions, including the acquisition of other companies or businesses, and will likely engage in similar transactions in the future. Our failure to effectively execute on such transactions or to integrate any acquired businesses could adversely impact our operating results, and any such transactions will likely cause us to incur significant transaction costs and require significant resources and management attention.

We have historically engaged in strategic transactions, including the acquisition of other companies and businesses. These transactions typically involve the integration of core business operations and technology infrastructure platforms that require significant management attention and resources. A failure or delay in the integration process could have a material adverse affect on our financial results. In addition, such transactions may yield higher operating costs, greater customer attrition or more significant business disruption than may have been anticipated. Further, even if we are able to integrate the business operations successfully, there can be no assurance that such transactions will result in the realization of the expected benefits of synergies, cost savings, innovation and operational efficiencies, or that any realized benefits will be achieved within a reasonable period of time.

Strategic transactions, including the pursuit of such transactions, require us to incur significant costs. These costs are typically non-recurring expenses related to the assessment, due diligence, negotiation and execution of the transaction. We may incur additional costs to retain key employees as well as transaction fees and costs related to executing integration plans. Although we would generally expect the realization of efficiencies related to the integration of businesses to offset incremental transaction and acquisition-related costs over time, this net benefit may not be achieved in the near term, or at all.

Certain risks related to the recently completed Medco transaction are described in greater detail below under Transaction-Related Risk Factors.

Our debt service obligations reduce the funds available for other business purposes, and the terms and covenants relating to our indebtedness could adversely impact our financial performance and liquidity.

We currently have debt outstanding (see summary of indebtedness within Note 7 Financing), including indebtedness of ESI and Medco guaranteed by us. Our debt service obligations reduce the funds available for other business purposes. Increases in interest rates on variable rate indebtedness would increase our interest expense and could materially adversely affect our financial results.

We are subject to risks normally associated with debt financing, such as the insufficiency of cash flow to meet required debt service payment obligations and the inability to refinance existing indebtedness. In addition, certain of our debt instruments contain covenants which limit our ability to incur additional indebtedness, create or permit liens on assets, and engage in mergers, consolidations, or disposals. The covenants under our credit agreement also include a minimum interest coverage ratio and a maximum leverage ratio. If we fail to satisfy these covenants, we would be in default under the credit agreement and/or the senior notes indentures, and may be required to repay such debt with capital from other sources or not be able to draw down against our revolving credit facility. Under such circumstances, other sources of capital may not be available to us, or be available only on unattractive terms. See Note 7 Financing to our consolidated financial statements included in this Quarterly Report on Form 10-Q.

Our ability to conduct operations depends on the security and stability of our technology infrastructure as well as the effectiveness of, and our ability to execute, business continuity plans across our operations. A failure in the security of our technology infrastructure or a significant disruption in service within our operations could materially adversely affect our business, the results of our operations and our financial position.

We maintain, and are dependent on, a technology infrastructure platform that is essential for many aspects of our business operations. It is imperative that we securely store and transmit confidential data, including personal health information, while maintaining the integrity of our confidential information. We have designed our technology infrastructure platform to protect against failures in security and service disruption. However, any failure to protect against a security breach or a disruption in service could materially adversely impact our business operations and our financial results. Our technology infrastructure platform requires an ongoing commitment of significant resources to maintain and enhance systems in order to keep pace with continuing changes as well as evolving industry and regulatory standards. In addition, we may from time to time obtain significant portions of our

Table of Contents

systems-related or other services or facilities from independent third parties, which may make our operations vulnerable to such third parties failure to adequately perform. In the event we or our vendors experience malfunctions in business processes, breaches of information systems, failure to maintain effective and up-to-date information systems or unauthorized or non-compliant actions by any individual, this could disrupt our business operations or impact patient safety, result in customer and member disputes, damage our reputation, expose us to risk of loss, litigation or regulatory violations, increase administrative expenses or lead to other adverse consequences.

We operate dispensing pharmacies, call centers, data centers and corporate facilities that depend on the security and stability of technology infrastructure. Any service disruption at any of these facilities due to failure or disruption of technology, malfunction of business process, disaster or catastrophic event could, temporarily or indefinitely, significantly reduce, or partially or totally eliminate our ability to process and dispense prescriptions and provide products and services to our clients and members. Any such service disruption at these facilities or to this infrastructure could have a material adverse effect on our business operations and our financial results.

If we lose relationships with one or more key pharmaceutical manufacturers, or if the payments made or discounts provided by pharmaceutical manufacturers decline, our business and financial results could be adversely affected.

We maintain contractual relationships with numerous pharmaceutical manufacturers that may provide us with, among other things:

discounts for drugs we purchase to be dispensed from our home delivery pharmacies

rebates based upon distributions of drugs from our home delivery pharmacies and through pharmacies in our retail networks

administrative fees for managing rebate programs, including the development and maintenance of formularies which include the particular manufacturer's products

access to limited distribution specialty pharmaceuticals

If several of these contractual relationships are terminated or materially altered by the pharmaceutical manufacturers, our business and financial results could be materially adversely affected. In addition, formulary fee programs have been the subject of debate in federal and state legislatures and various other public and governmental forums. Changes in existing laws or regulations, in interpretations of existing laws or regulations, or the adoption of new laws or regulations relating to any of these programs may materially adversely affect our business.

Changes in industry pricing benchmarks could materially impact our financial performance.

Contracts in the prescription drug industry, including our contracts with retail pharmacy networks and with PBM and specialty pharmacy clients, generally use average wholesale price or AWP, which is published by a third party, as a benchmark to establish pricing for prescription drugs. In 2011, First DataBank, a significant provider of AWP information, discontinued publishing such information. This and other recent events have raised uncertainties as to whether certain third parties will continue to publish AWP, which may result in the inability of payors, pharmacy providers, PBMs and others in the prescription drug industry to continue to utilize AWP as it has previously been calculated. In the event that AWP is no longer published or if we adopt other pricing benchmarks for establishing prices within the industry, we can give no assurance that the short or long-term impact of such changes to industry pricing benchmarks will not have a material adverse effect on our business and financial results in future periods.

Legislation and other regulations affecting drug prices are discussed in more detail in the ESI 2011 Form 10-K under Part I Item 1 Business Government Regulation and Compliance Legislation and Regulation Affecting Drug Prices .

Table of Contents

Pending and future litigation or other proceedings could subject us to significant monetary damages or penalties and/or require us to change our business practices, either of which could have a material adverse effect on our business operations and our financial results or condition.

We are subject to risks relating to litigation, regulatory proceedings, and other similar actions in connection with our business operations, including the dispensing of pharmaceutical products by our home delivery pharmacies, services rendered in connection with our disease management offering, and our pharmaceutical services operations. A list of the significant proceedings pending against us (including both ESI and Medco) is included under Part I Item 3 Legal Proceedings in the ESI 2011 Form 10-K and Part II Item 1 Legal Proceedings in the Express Scripts Form 10-Q for the quarter ended March 31, 2012 and herein, including certain proceedings that purport to be class action lawsuits. These proceedings seek unspecified monetary damages and/or injunctive relief. While we believe these proceedings are without merit and intend to contest them vigorously, we cannot predict with certainty the outcome of any such proceeding. If one or more of these proceedings has an unfavorable outcome, we cannot provide any assurance that it would not have a material adverse effect on our business and financial results, including our ability to attract and retain clients as a result of the negative reputational impact of such an outcome. Further, while certain costs are covered by insurance, we may incur uninsured costs that are material to our financial performance in the defense of such proceedings.

Commercial liability insurance coverage continues to be difficult to obtain for companies in our business sector which can cause unexpected volatility in premiums and/or retention requirements dictated by insurance carriers. We have established certain self-insurance accruals to cover anticipated losses within our retained liability for previously reported claims and the cost to defend these claims. There can be no assurance that general, professional, managed care errors and omissions, and/or other liability insurance coverage will be reasonably available in the future or such insurance coverage, together with our self-insurance accruals, will be adequate to cover future claims. A claim, or claims, in excess of our insurance coverage could have a material adverse effect on our business and financial results.

We face significant competition in attracting and retaining talented employees. Further, managing succession and retention for our Chief Executive Officer and other key executives is critical to our success, and our failure to do so could have an adverse impact on our future performance.

We believe that our ability to retain an experienced workforce and our ability to hire additional qualified employees is essential to meet current and future goals and objectives. There is no guarantee that we will be able to attract and retain such employees or that competition among potential employers will not result in increasing salaries. An inability to retain existing employees or attract additional employees could have a material adverse effect on our business operations and our financial results.

We would be adversely affected if we fail to adequately plan for succession of our Chief Executive Officer, senior management and other key employees. While we have succession plans in place and we have employment arrangements with certain key executives, these do not guarantee that the services of these executives will continue to be available to us.

Following the Merger with Medco, we are subject to new risks applicable to Medco and its subsidiaries in businesses which we did not engage in prior to the Merger or where our involvement was limited.

Medco and its subsidiaries are subject to certain risks that were not applicable to ESI, or where the risks prior to the Merger were minimal, due to Medco's involvement in businesses due to the limited or non-existent involvement of ESI. Such risks could have a material adverse effect on our business, financial condition and results of operations, and include the following:

revenues from the sale of diabetes testing supplies under Medco's Liberty brand depend on the continued availability of reimbursement by government and private insurance plans and a complex and time-consuming billing and collection process, which exposes us to increased billing, cash application and credit risks

the Liberty diabetes testing supply business is subject to the DMEPOS Program, which could result in the reduction in reimbursement rates and could negatively affect our operating results

Table of Contents

Medco's Part D product offerings require premium payment from members for the ongoing benefit, as well as amounts due from CMS, and as a result of the demographics of the calculations, as well as the potential magnitude and timing of settlement for amounts due from CMS, these accounts receivable are subject to billing and realization risk in excess of what is experienced in the core PBM business

Additional government scrutiny and audit activity related to government program business services by Medco, including audits that Accredo Health Group and Liberty face or may face which result in payment or offset of prior reimbursement from the government

the clinical research services business depends on the willingness of companies in the pharmaceutical and biotechnology industries to continue to outsource clinical development and our reputation for independent, high-quality scientific research and evidence development

following the Merger, we have international operations in various countries throughout Europe, North America and Asia, resulting in risks inherent in these operations, including, without limitation, relating to (1) vigorous regulation of the biotechnology and pharmaceutical industries; (2) compliance with a variety of ever-changing foreign laws and regulations; (3) difficulty of enforcing agreements, intellectual property rights and collection of receivables abroad; (4) tax rates, withholding requirements, the imposition of tariffs, exchange controls or other restrictions, including restrictions on repatriation; (5) complexities of managing a multinational organization; (6) general economic and political conditions or terrorist activities in foreign countries; (7) exchange rate fluctuations; and (8) longer payment cycles of foreign customers

Transaction-Related Risk Factors

In addition to the general risk factors above, investors should consider the following risk factors arising from the Merger. The risk factors below should be read in conjunction with the risk factors above and the other information contained in this report as our business, financial condition or results of operations could be adversely affected if any of these risks actually occur.

The anticipated benefits of the Merger with Medco may not be realized fully and may take longer to realize than expected.

The success of the Merger will depend, in part, on our ability to successfully combine the businesses of ESI and Medco and realize the anticipated benefits, including synergies, cost savings, innovation and operational efficiencies, from the combination. If we are unable to achieve these objectives within the anticipated time frame, or at all, the anticipated benefits may not be realized fully or at all, or may take longer to realize than expected and the value of our common stock may be harmed.

The Merger involves the integration of Medco's businesses with ESI's business, which is a complex, costly and time-consuming process. We have not previously completed a transaction comparable in size or scope to the Merger with Medco. The integration of two companies may result in material challenges, including, without limitation:

the diversion of management's attention from ongoing business concerns and performance shortfalls at one or both of the companies as a result of the devotion of management's attention to the integration

managing a larger combined company

maintaining employee morale and retaining key management and other employees

integrating two unique corporate cultures, which may prove to be incompatible

Edgar Filing: Express Scripts Holding Co. - Form 10-Q

the possibility of faulty assumptions underlying expectations regarding the integration process

retaining existing clients and attracting new clients on profitable terms

consolidating corporate and administrative infrastructures and eliminating duplicative operations

coordinating geographically separate organizations

unanticipated issues in integrating information technology, communications and other systems

unanticipated changes in applicable laws and regulations

managing tax costs or inefficiencies associated with integrating the operations of the combined company

unforeseen expenses or delays associated with the Merger

making any necessary modifications to internal financial control standards to comply with the Sarbanes-Oxley Act of 2002 and the rules and regulations promulgated thereunder

Table of Contents

Some of these factors will be outside of our control and any one of them could result in increased costs, decreases in the amount of expected revenues and diversion of management's time and energy, which could materially impact our business, financial condition and results of operations.

The integration may result in additional and unforeseen expenses, and the anticipated benefits of the integration plan may not be realized. Delays or issues encountered in the integration process could have a material adverse effect on the revenues, expenses, operating results and financial condition of the combined company. Although we expect significant benefits, such as synergies, cost savings, innovation and operational efficiencies, to result from the Merger, there can be no assurance that we will actually realize any of these anticipated benefits.

Our financial results will depend on our ability to maintain Express Scripts, Inc.'s and Medco's legacy client relationships.

A substantial portion of our revenues are received under long-term client relationships. Our success in the period following the Merger will depend in part on our ability to maintain these client relationships. Certain of these clients may elect to end or decide not to renew their existing relationships with us. If we are unable to maintain these client relationships, our business, financial results and financial condition could be adversely affected.

We have incurred, and will continue to incur, significant transaction and merger-related costs in connection with the Merger.

We have incurred, and will continue to incur, significant costs in connection with the integration process. The substantial majority of these costs will be non-recurring expenses related to the facilities and systems consolidation costs. We may incur additional costs to maintain employee morale and to retain key employees. We will also incur transaction fees and costs related to formulating and revising integration plans. Additional unanticipated costs may be incurred in the integration of Medco's businesses. Although we expect that the elimination of duplicative costs, as well as the realization of other efficiencies related to the integration of the businesses, should allow us to more than offset incremental transaction and merger-related costs over time, this net benefit may not be achieved in the near term, or at all.

The market price of our common stock may decline as a result of the Merger.

The market price of the common stock of the combined company may decline as a result of the Merger if, among other things, we are unable to achieve the expected growth in earnings, or if our operational cost savings estimates are not realized, or if the transaction costs related to the Merger and integration are greater than expected. The market price also may decline if we do not achieve the perceived benefits of the Merger as rapidly or to the extent anticipated by financial or industry analysts or if the effect of the Merger on our financial results is not consistent with the expectations of financial or industry analysts.

Table of Contents

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Until consummation of the Merger on April 2, 2012, ESI had a stock repurchase program, under which no purchases were made during the quarter. Upon consummation of the Merger on April 2, 2012, all ESI shares held in treasury were cancelled and retired. The Board of Directors of the Company has not yet adopted a stock repurchase program to allow for the repurchase of shares of Express Scripts.

¹ Filed herein.

² The Stock and Interest Purchase Agreement listed in Exhibit 2.1 and the Merger Agreement listed in Exhibit 2.2 (collectively, the Agreements) are not intended to modify or supplement any factual disclosures about the parties thereto, including the Company, and should not be relied upon as disclosure about such parties without consideration of the periodic and current reports and statements that the parties thereto file with the SEC. The terms of the Agreements govern the contractual rights and relationships, and allocate risks, among the parties in relation to the transactions contemplated by the Agreements. In particular, the representations and warranties made by the parties in the Agreements reflect negotiations between, and are solely for the benefit of, the parties thereto and may be limited or modified by a variety of factors, including: subsequent events, information included in public filings, disclosures made during negotiations, correspondence between the parties and disclosure schedules and disclosure letters, as applicable, to the Agreements. Accordingly, the representations and warranties may not describe the actual state of affairs at the date they were made or at any other time and you should not rely on them as statements of fact. In addition, the representations and warranties made by the parties in the Agreements may be subject to standards of materiality applicable to the contracting parties that differ from those applicable to investors. The schedules to the Agreements have been omitted pursuant to Item 601(b)(2) of Regulation S-K and will be furnished supplementally to the SEC upon request.
