Table of Contents**NOTE 1: Summary of Significant Accounting Policies**

As permitted by the rules of the Securities and Exchange Commission applicable to Quarterly Reports on Form 10-Q, these notes are condensed and do not contain all disclosures required by generally accepted accounting principles (GAAP). Reference should be made to the consolidated financial statements and related notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2012.

In the opinion of the management of Cognex Corporation (the Company), the accompanying consolidated unaudited financial statements contain all adjustments, consisting of normal, recurring adjustments and financial statement reclassifications, necessary to present fairly the Company's financial position as of March 31, 2013, and the results of its operations for the quarters ended March 31, 2013 and April 1, 2012, and changes in shareholders' equity, comprehensive income, and cash flows for the periods presented.

The results disclosed in the Consolidated Statements of Operations for the quarter ended March 31, 2013 are not necessarily indicative of the results to be expected for the full year.

NOTE 2: New Pronouncements**Accounting Standards Update (ASU) 2013-02, Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income**

The amendments in ASU 2013-02 require companies to present information about amounts reclassified out of accumulated other comprehensive income (OCI) to net income, by component. The effect of significant reclassification adjustments being made out of accumulated OCI on the corresponding line items in net income must be presented when the item is reclassified in its entirety during one reporting period. While the new guidance in ASU 2013-12 changes the presentation of accumulated OCI, there are no changes to the components that are recognized in net income or OCI under current accounting guidance.

Amounts reclassified from accumulated other comprehensive income to investment income on the Consolidated Statements of Operations were \$31,000 and \$94,000 for the first quarters of 2013 and 2012, respectively.

NOTE 3: Fair Value Measurements**Financial Assets and Liabilities that are Measured at Fair Value on a Recurring Basis**

The following table summarizes the financial assets and liabilities required to be measured at fair value on a recurring basis as of March 31, 2013 (in thousands):

	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)
Assets:		
Cash equivalents	\$ 9,398	\$
Money market instruments	1,069	
Corporate stock	1,763	
Corporate bonds		171,405
Asset-backed securities		65,319
Agency bonds		39,278
Treasury bills		33,727
Municipal bonds		29,571
Sovereign bonds		11,823
Covered bonds		11,271

Edgar Filing: COGNEX CORP - Form 10-Q

Commercial paper		2,998
Currency forward contracts	1	
Liabilities:		
Currency forward contracts	83	

Table of Contents

The Company's cash equivalents and money market instruments are reported at fair value based upon the daily market price for identical assets in active markets, and are therefore classified as Level 1 investments. The Company's corporate stock position is reported at fair value based upon quoted market prices on a stock exchange, and is therefore classified as a Level 1 investment. The Company's currency forward contracts are reported at fair value based upon quoted U.S. Dollar foreign currency exchange rates, and are therefore also classified as Level 1 investments.

The Company's debt securities are reported at fair value based upon model-driven valuations in which all significant inputs are observable or can be derived from or corroborated by observable market data for substantially the full term of the asset, and are therefore classified as Level 2 investments. Management is responsible for estimating the fair value of these investments, and in doing so, considers valuations provided by a large, third-party pricing service. This service maintains regular contact with market makers, brokers, dealers, and analysts to gather information on market movement, direction, trends, and other specific data. They use this information to structure yield curves for various types of debt securities and arrive at the daily valuations.

The Company did not record an other-than-temporary impairment of these investments in the quarter ended March 31, 2013.

Financial Assets that are Measured at Fair Value on a Non-recurring Basis

The Company has an interest in a limited partnership, which is accounted for using the cost method and is required to be measured at fair value on a non-recurring basis. Management is responsible for estimating the fair value of this investment, and in doing so, considers valuations of the partnership's investments as determined by the General Partner. Publicly-traded investments in active markets are reported at the market closing price less a discount, as appropriate, to reflect restricted marketability. Fair value for private investments for which observable market prices in active markets do not exist is based upon the best information available including the value of a recent financing, reference to observable valuation measures for comparable companies (such as revenue multiples), public or private transactions (such as the sale of a comparable company), and valuations for publicly-traded comparable companies. The valuations also incorporate the General Partner's own judgment and close familiarity with the business activities of each portfolio company. Significant increases or decreases in any of these inputs in isolation may result in a significantly lower or higher fair value measurement. The portfolio consists of securities of public and private companies, and consequently, inputs used in the fair value calculation are classified as Level 3. The Company did not record an other-than-temporary impairment of this asset in the quarter ended March 31, 2013.

Non-financial Assets that are Measured at Fair Value on a Non-recurring Basis

Non-financial assets such as goodwill, intangible assets, and property, plant, and equipment are required to be measured at fair value only when an impairment loss is recognized. The Company did not record an impairment charge related to these assets in the quarter ended March 31, 2013.

Table of Contents**NOTE 4: Cash, Cash Equivalents, and Investments**

Cash, cash equivalents, and investments consisted of the following (in thousands):

	March 31, 2013	December 31, 2012
Cash	\$ 32,290	\$ 34,986
Cash equivalents	9,398	5,098

Treasury bills	5,604	5,997
Covered bonds	4,660	5,618
Commercial paper	2,998	
Sovereign bonds	1,997	3,986
Corporate stock	1,763	2,131
 Short-term investments	 125,411	 105,105
 Corporate bonds	 110,443	 100,072
Asset-backed securities	42,337	34,710
Treasury bills	28,123	36,276
Agency bonds	27,785	29,441
Municipal bonds	16,619	17,846
Sovereign bonds	9,826	10,606
Covered bonds	6,611	5,564
Limited partnership interest (accounted for using cost method)	3,740	3,740
 Long-term investments	 245,484	 238,255
	 \$ 413,652	 \$ 388,520

The Company's investment portfolio includes corporate bonds, asset-backed securities, municipal bonds, agency bonds, treasury bills, covered bonds, commercial paper, and sovereign bonds. Corporate bonds consist of debt securities issued by both domestic and foreign companies; asset-backed securities consist of debt securities collateralized by pools of receivables or loans with credit enhancement; municipal bonds consist of debt securities issued by state and local government entities; agency bonds consist of domestic or foreign obligations of government agencies and government sponsored enterprises that have government backing; treasury bills consist of debt securities issued by both the U.S. and foreign governments; covered bonds consist of debt securities backed by governments, mortgages, or public sector loans; commercial paper consists of debt instruments issued by corporations or financial institutions with high quality debt ratings; and sovereign bonds consist of direct debt issued by foreign governments.

During the fourth quarter of 2012, the Company purchased equity securities, representing stock in a publicly-traded U.S. company, with an aggregate fair value of \$2,131,000 as of December 31, 2012. As of March 31, 2013, these securities had an aggregate fair value of \$1,763,000, resulting in an unrealized loss of \$368,000.

Table of Contents

The following table summarizes the Company's available-for-sale investments as of March 31, 2013 (in thousands):

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Short-term:				
Corporate bonds	\$ 60,871	\$ 111	\$ (20)	\$ 60,962
Asset-backed securities	22,984	20	(22)	22,982
Municipal bonds	12,917	35		12,952
Agency bonds	11,502		(9)	11,493
Treasury bills	5,602	2		5,604
Covered bonds	4,676	1	(17)	4,660
Commercial paper	2,998			2,998
Sovereign bonds	2,000		(3)	1,997
Long-term:				
Corporate bonds	109,693	796	(46)	110,443
Asset-backed securities	42,581	25	(269)	42,337
Treasury bills	28,117	7	(1)	28,123
Agency bonds	27,720	89	(24)	27,785
Municipal bonds	16,477	142		16,619
Sovereign bonds	9,794	32		9,826
Covered bonds	6,591	20		6,611
	\$ 364,523	\$ 1,280	\$ (411)	\$ 365,392

The following table summarizes the Company's gross unrealized losses and fair values for available-for-sale investments in an unrealized loss position as of March 31, 2013 (in thousands):

	Less than 12 Months	
	Fair Value	Unrealized Losses
Corporate bonds	\$ 45,301	\$ (66)
Asset-backed securities	43,706	(291)
Agency bonds	13,371	(33)
Treasury bills	12,498	(1)
Covered bonds	2,937	(17)
Sovereign bonds	1,997	(3)
	\$ 119,810	\$ (411)

As of March 31, 2013, the Company did not recognize an other-than-temporary impairment of these investments. In its evaluation, management considered the type of security, the credit rating of the security, the length of time the security has been in a loss position, the size of the loss position, our intent and ability to hold the security to expected recovery of value, and other meaningful information. The Company does not intend to sell, and is unlikely to be required to sell, any of these securities before its effective maturity or market price recovery. The Company recorded gross realized gains on the sale of debt securities totaling \$50,000 and \$94,000, respectively, in the first quarters of 2013 and 2012, and gross realized losses on the sale of debt securities totaling \$19,000 in the first quarter of 2013.

Table of Contents

The following table presents the effective maturity dates of the Company's available-for-sale investments as of March 31, 2013 (in thousands):

	<1 Year	1-2 Years	2-3 Years	3-4 Years	4-5 Years	Total
Corporate bonds	\$ 60,962	\$ 36,566	\$ 64,948	\$ 7,381	\$ 1,548	\$ 171,405
Asset-backed securities	22,982	34,387	7,950			65,319
Agency bonds	11,493	20,385	6,477		923	39,278
Treasury bills	5,604	4,503	23,620			33,727
Municipal bonds	12,952	11,181	2,437	1,427	1,574	29,571
Commercial paper	2,998					2,998
Sovereign bonds	1,997	1,522	6,727	1,577		11,823
Covered bonds	4,660	3,766		2,845		11,271
	\$ 123,648	\$ 112,310	\$ 112,159	\$ 13,230	\$ 4,045	\$ 365,392

In June 2000, the Company became a Limited Partner in Venrock Associates III, L.P. (Venrock), a venture capital fund. A Director of the Company was a General Partner of Venrock Associates through December 31, 2009. The Company has committed to a total investment in the limited partnership of up to \$20,500,000, with an expiration date of December 31, 2013. As of March 31, 2013, the Company contributed \$19,886,000 to the partnership. The remaining commitment of \$614,000 can be called by Venrock at any time before December 31, 2013. No contributions were made and no distributions were received in the first quarter of 2013. Distributions are received and contributions are requested at the discretion of Venrock's management.

NOTE 5: Inventories

Inventories consisted of the following (in thousands):

	March 31, 2013	December 31, 2012
Raw materials	\$ 11,949	\$ 12,667
Work-in-process	4,321	4,193
Finished goods	9,787	9,322
	\$ 26,057	\$ 26,182

NOTE 6: Intangible Assets and Goodwill

The Company evaluates the possible impairment of goodwill and other intangible assets whenever events or circumstances indicate that the carrying value of these assets may not be recoverable. No triggering event occurred in the quarter ended March 31, 2013 that would indicate a potential impairment of goodwill or other intangible assets. However, the Company continues to monitor a variety of factors that could result in an impairment of goodwill or other intangible assets in a future period.

Table of Contents**NOTE 7: Warranty Obligations**

The Company records the estimated cost of fulfilling product warranties at the time of sale based upon historical costs to fulfill claims. Obligations may also be recorded subsequent to the time of sale whenever specific events or circumstances impacting product quality become known that would not have been taken into account using historical data. While we engage in extensive product quality programs and processes, including actively monitoring and evaluating the quality of our component suppliers and third-party contract manufacturers, the Company's warranty obligation is affected by product failure rates, material usage, and service delivery costs incurred in correcting a product failure. An adverse change in any of these factors may result in the need for additional warranty provisions. Warranty obligations are included in Accrued expenses on the Consolidated Balance Sheets.

The changes in the warranty obligation were as follows (in thousands):

Balance as of December 31, 2012	\$ 2,256
Provisions for warranties during the period	658
Fulfillment of warranty obligations	(475)
Foreign exchange rate changes	(62)
Balance as of March 31, 2013	\$ 2,377

NOTE 8: Contingencies

In May 2008, the Company filed a complaint against MvTec Software GmbH, MvTec LLC, and Fuji America Corporation in the United States District Court for the District of Massachusetts alleging infringement of certain patents owned by the Company. In April 2009 and again in June 2009, Defendant MvTec Software GmbH filed re-examination requests of the patents-at-issue with the United States Patent and Trademark Office. This matter is ongoing.

In May 2009, the Company pre-filed a complaint with the United States International Trade Commission (ITC) pursuant to Section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. §1337, against MvTec Software GmbH, MvTec LLC, Fuji America, and several other respondents alleging unfair methods of competition and unfair acts in the unlawful importation into the United States, sale for importation, or sale within the United States after importation. By this filing, the Company requested the ITC to investigate the Company's contention that certain machine vision software, machine vision systems, and products containing the same infringe, and respondents directly infringe and/or actively induce and/or contribute to the infringement in the United States, of one or more of the Company's U.S. patents. In July 2009, the ITC issued an order that it would institute an investigation based upon the Company's assertions. In September 2009, the Company reached a settlement with two of the respondents, and in December 2009, the Company reached a settlement with five additional respondents. In March 2010, the Company reached a settlement with respondent Fuji Machine Manufacturing Co., Ltd. and its subsidiary Fuji America Corporation. These settlements did not have a material impact on the Company's financial results. An ITC hearing was held in May 2010. In July 2010, the Administrative Law Judge issued an initial determination finding two of the Company's patents invalid and that respondents did not infringe the patents-at-issue. In September 2010, the ITC issued a notice that it would review the initial determination of the Administrative Law Judge. The ITC issued its Final Determination in November 2010 in which it determined to modify-in-part and affirm-in-part the Administrative Law Judge's determination, and terminate the investigation with a finding of no

Table of Contents

violation of Section 337 of the Tariff Act of 1930 (as amended 19 U.S.C. §1337). The Company has filed an appeal of the decision with the United States Court of Appeals for the Federal Circuit. An oral hearing before the United States Court of Appeals occurred in February 2012. This matter is ongoing.

In March 2013, the Company filed a lawsuit against Microscan Systems, Inc. (Microscan) and Code Corporation in the United States District Court for the Southern District of New York alleging that Microscan s Mobile Hawk handheld imager infringes U.S. Patent 7,874,487 owned by the Company. The lawsuit seeks to prohibit Code Corporation from manufacturing the product, and Microscan from selling and distributing the product. The Company is also seeking monetary damages resulting from the alleged infringement. In April 2013, Microscan filed ex parte re-examination requests of the patent-at-issue with the United States Patent and Trademark Office. These matters are ongoing.

The Company cannot predict the outcome of the above-referenced pending matters and an adverse resolution of these lawsuits could have a material adverse effect on the Company s financial position, liquidity, results of operations, and/or indemnification obligations. In addition, various other claims and legal proceedings generally incidental to the normal course of business are pending or threatened on behalf of or against the Company. While we cannot predict the outcome of these incidental matters, we believe that any liability arising from them will not have a material adverse effect on our financial position, liquidity, or results of operations.

NOTE 9: Indemnification Provisions

Except as limited by Massachusetts law, the by-laws of the Company require it to indemnify certain current or former directors, officers, and employees of the Company against expenses incurred by them in connection with each proceeding in which he or she is involved as a result of serving or having served in certain capacities. Indemnification is not available with respect to a proceeding as to which it has been adjudicated that the person did not act in good faith in the reasonable belief that the action was in the best interests of the Company. The maximum potential amount of future payments the Company could be required to make under these provisions is unlimited. The Company has never incurred significant costs related to these indemnification provisions. As a result, the Company believes the estimated fair value of these provisions is minimal.

In the ordinary course of business, the Company may accept standard limited indemnification provisions in connection with the sale of its products, whereby it indemnifies its customers for certain direct damages incurred in connection with third-party patent or other intellectual property infringement claims with respect to the use of the Company s products. The term of these indemnification provisions generally coincides with the customer s use of the Company s products. The maximum potential amount of future payments the Company could be required to make under these provisions is generally subject to fixed monetary limits. The Company has never incurred significant costs to defend lawsuits or settle claims related to these indemnification provisions. As a result, the Company believes the estimated fair value of these provisions is minimal.

In the ordinary course of business, the Company also accepts limited indemnification provisions from time to time, whereby it indemnifies customers for certain direct damages incurred in connection with bodily injury and property damage arising from the installation of the Company s products. The term of these indemnification provisions generally coincides with the period of installation. The maximum potential amount of future payments the Company could be required to make under these provisions is generally limited and is likely recoverable under the Company s insurance policies. As a result of this coverage, and the fact that the Company has never incurred significant costs to defend lawsuits or settle claims related to these indemnification provisions, the Company believes the estimated fair value of these provisions is minimal.

Table of Contents**NOTE 10: Derivative Instruments**

The Company is exposed to certain risks relating to its ongoing business operations including foreign currency exchange rate risk and interest rate risk. The Company currently mitigates certain foreign currency exchange rate risks with derivative instruments. The Company does not currently manage its interest rate risk with derivative instruments.

The Company faces exposure to foreign currency exchange rate fluctuations, as a significant portion of its revenues, expenses, assets, and liabilities are denominated in currencies other than the functional currencies of the Company's subsidiaries or the reporting currency of the Company, which is the U.S. Dollar. The Company faces two types of foreign currency exchange rate exposures:

transactional currency/functional currency exchange rate exposures from transactions that are denominated in currencies other than the functional currency of the subsidiary (for example, a U.S. Dollar receivable on the Company's Irish subsidiary's books for which the functional currency is the Euro), and

functional currency/reporting currency exchange rate exposures from transactions that are denominated in currencies other than the U.S. Dollar, which is the reporting currency of the Company.

The Company uses derivative instruments to provide an economic hedge against its transactional currency/functional currency exchange rate exposures. Forward contracts on currencies are entered into to manage the transactional currency/functional currency exposure of the Company's Irish subsidiary's accounts receivable denominated in U.S. dollars and intercompany receivables denominated in Japanese Yen. In addition, beginning in the first quarter of 2013, forward contracts on currencies are entered into to manage the transactional currency/functional currency exposure at the Company's Surface Inspection Systems Division (SISD), where accounts receivable may be denominated in Euros and Japanese Yen, but the functional currency is the U.S. Dollar. All of the Company's forward contracts are used to minimize foreign currency gains or losses, as the gains or losses on these contracts are intended to offset the losses or gains on the underlying exposures.

These forward contracts do not qualify for hedge accounting. Both the underlying exposures and the forward contracts are recorded at fair value on the Consolidated Balance Sheets and changes in fair value are reported as Foreign currency gain (loss) on the Consolidated Statements of Operations. The Company recorded a net foreign currency gain of \$63,000 in the quarter ended March 31, 2013, and a loss of \$638,000 in the quarter ended April 1, 2012.

As of March 31, 2013, the Company had the following outstanding forward contracts that were entered into to mitigate foreign currency exchange rate risk:

Currency	Amount
Japanese Yen/Euro	170,000,000 Japanese Yen
Japanese Yen/U.S. Dollar	116,000,000 Japanese Yen
U.S. Dollar/Euro	2,580,000 U.S. Dollars
Euro/U.S. Dollar	775,000 Euros

Information regarding the fair value of the forward contracts outstanding as of March 31, 2013 and December 31, 2012 was as follows (in thousands):

	Asset Derivatives			Liability Derivatives		
	Balance Sheet Location	Fair Value	Fair Value	Balance Sheet Location	Fair Value	Fair Value
		March 31, 2013	December 31, 2012		March 31, 2013	December 31, 2012
Currency forward contracts	Prepaid expenses and other current	\$ 1	\$ 44	Accrued expenses	\$ 83	\$ 14

Table of Contents

Information regarding the effect of the forward contracts, net of the underlying exposure, on the Consolidated Statements of Operations for the quarters ended March 31, 2013 and April 1, 2012 were as follows (in thousands):

	Location of Loss Recognized in Income on Derivatives	Amount of Loss Recognized in Income on Derivatives Quarter ended	
		March 31, 2013	April 1, 2012
Currency forward contracts	Foreign currency loss	\$ 203	\$ 289

NOTE 11: Stock-Based Compensation

The Company's share-based payments that result in compensation expense consist solely of stock option grants. As of March 31, 2013, the Company had 5,620,604 shares available for grant under two stock option plans: the 2001 General Stock Option Plan (4,361,494) and the 2007 Stock Option and Incentive Plan (1,259,110). Each of these plans expires ten years from the date the plan was approved. In December 2011, the 2001 General Stock Option plan received shareholder approval for an amendment and restatement of the plan, extending the plan until September 2021. Generally, stock options are granted with an exercise price equal to the market value of the Company's common stock at the grant date, vest over four years based upon continuous service, and expire ten years from the grant date.

The following table summarizes the Company's stock option activity for the quarter ended March 31, 2013:

	Shares (in thousands)	Weighted- Average Exercise Price	Weighted- Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value (in thousands)
Outstanding as of December 31, 2012	3,559	\$ 25.56		
Granted	783	42.11		
Exercised	(397)	23.10		
Forfeited or expired	(88)	31.79		
Outstanding as of March 31, 2013	3,857	\$ 29.04	7.5	\$ 50,634
Exercisable as of March 31, 2013	1,383	\$ 23.26	5.9	\$ 26,174
Options vested or expected to vest at March 31, 2013 (1)	3,386	\$ 28.22	7.3	\$ 47,243

(1) In addition to the vested options, the Company expects a portion of the unvested options to vest at some point in the future. Options expected to vest are calculated by applying an estimated forfeiture rate to the unvested options.

The fair values of stock options granted in each quarter presented were estimated using the following weighted-average assumptions:

Quarter Ended

Edgar Filing: COGNEX CORP - Form 10-Q

	March 31, 2013	April 1, 2012
Risk-free rate	2.1%	2.0%
Expected dividend yield	0%	1.2%
Expected volatility	42%	44%
Expected term (in years)	5.9	5.7

Table of Contents**Risk-free rate**

The risk-free rate was based upon a treasury instrument whose term was consistent with the contractual term of the option.

Expected dividend yield

Generally, the current dividend yield is calculated by annualizing the cash dividend declared by the Company's Board of Directors and dividing that result by the closing stock price on the grant date. However, in the fourth quarter of 2012, the Company paid the full annual dividends for 2013 and 2014 in advance, and therefore, the dividend yield for those years has been adjusted to zero. At the time of the 2013 valuation, a dividend yield of 1.04% was estimated for future periods from 2015 through the expected life of the option.

Expected volatility

The expected volatility was based upon a combination of historical volatility of the Company's common stock over the contractual term of the option and implied volatility for traded options of the Company's stock.

Expected term

The expected term was derived from the binomial lattice model from the impact of events that trigger exercises over time.

The weighted-average grant-date fair values of stock options granted during the quarter ended March 31, 2013 and April 1, 2012 were \$16.13 and \$12.98, respectively.

The Company stratifies its employee population into two groups: one consisting of senior management and another consisting of all other employees. The Company currently expects that approximately 71% of its stock options granted to senior management and 69% of its options granted to all other employees will actually vest. Therefore, the Company currently applies an estimated forfeiture rate of 12% to all unvested options for senior management and a rate of 13% for all other employees.

The total stock-based compensation expense and the related income tax benefit recognized was \$3,298,000 and \$1,094,000, respectively, for the quarter ended March 31, 2013, and \$3,314,000 and \$1,087,000, respectively, for the quarter ended April 1, 2012. No compensation expense was capitalized as of March 31, 2013 or December 31, 2012.

The following table details the stock-based compensation expense by caption for each quarter presented on the Consolidated Statements of Operations (in thousands):

	Quarter Ended	
	March 31, 2013	April 1, 2012
Product cost of revenue	\$ 227	\$ 240
Service cost of revenue	63	68
Research, development, and engineering	813	867
Selling, general, and administrative	2,195	2,139
	\$ 3,298	\$ 3,314

The total intrinsic values of stock options exercised for the quarters ended March 31, 2013 and April 1, 2012 were \$7,193,000 and \$12,636,000, respectively. The total fair values of stock options vested for the quarters ended March 31, 2013 and April 1, 2012 were \$6,932,000 and \$6,399,000, respectively.

As of March 31, 2013, total unrecognized compensation expense related to non-vested stock options was \$14,025,000, which is expected to be recognized over a weighted-average period of 1.7 years.

NOTE 12: Stock Repurchase Program

In April 2008, the Company's Board of Directors authorized the repurchase of up to \$50,000,000 of the Company's common stock. As of March 31, 2013, the Company had repurchased a total of 1,375,875 shares at a cost of \$30,000,000 under this program. In November 2011, the Company's Board of Directors authorized the repurchase of up to \$80,000,000 of the Company's common stock to help reduce share

Table of Contents

dilution associated with equity incentive plans. This new authorization will commence once the Company completes the \$50,000,000 program noted above. The Company did not purchase any additional shares under these programs during the quarter ended March 31, 2013. The Company may repurchase shares under these programs in future periods depending upon a variety of factors, including, among other things, stock price, share availability, and cash reserve requirements.

NOTE 13: Taxes

A reconciliation of the United States federal statutory corporate tax rate to the Company's effective tax rate was as follows:

	Quarter Ended	
	March 31, 2013	April 1, 2012
Income tax at federal statutory rate	35%	35%
State income taxes, net of federal benefit	2	1
Foreign tax rate differential	(17)	(15)
2013 research and development credit	(1)	
Discrete event- 2012 research and development credit	(3)	
Income tax provision	16%	21%

The effective tax rate for the quarter ended March 31, 2013 includes a discrete event for a retroactive application for a 2012 research and development credit. The American Taxpayer Relief Act of 2012 was passed by Congress and signed into law on January 1, 2013. The provisions under this law are to be applied retroactively to January 1, 2012. As a result of the law being signed on January 1, 2013, the financial impact of the retroactive provision was recorded as a discrete event in the first quarter of 2013. The Company recorded a reduction to tax expense in the first quarter of 2013 by \$555,000, net of related reserves for uncertain tax positions, for the aforementioned research and development tax credit. Excluding this discrete event, the effective tax rate for the quarter ended March 31, 2013 was 19%.

During the quarter ended March 31, 2013, the Company recorded a \$644,000 increase in liabilities, net of deferred tax benefit, for uncertain tax positions that were recorded as income tax expense. Included in the current period's reserve for uncertain tax positions is a discrete event relating to the retroactive application of a 2012 research and development tax credit of \$370,000, as an increase to tax expense. Estimated interest and penalties included in these amounts totaled \$38,000.

The Company's reserve for income taxes, including gross interest and penalties, was \$5,955,000 as of March 31, 2013, all of which was classified as noncurrent. The amount of gross interest and penalties included in these balances was \$1,247,000. If the Company's tax positions were sustained or the statutes of limitations related to certain positions expired, these reserves would be released and income tax expense would be reduced in a future period, less \$405,000 that would be recorded through additional paid in capital. As a result of the expiration of certain statutes of limitation, there is a potential that a portion of these reserves could be released, which would decrease income tax expense by approximately \$1,600,000 to \$1,800,000 over the next twelve months.

The Company has defined its major tax jurisdictions as the United States, Ireland, China, and Japan, and within the United States, Massachusetts and California. Within the United States, the tax years 2006 through 2012 remain open to examination by various taxing authorities due to a 2009 carryback claim, while the tax years 2008 through 2012 remain open to examination by various taxing authorities in other jurisdictions in which the Company operates.

NOTE 14: Weighted-Average Shares

Weighted-average shares were calculated as follows (in thousands):

Edgar Filing: COGNEX CORP - Form 10-Q

	Quarter Ended	
	March 31, 2013	April 1, 2012
Basic weighted-average common shares outstanding	43,261	42,570
Effect of dilutive stock options	869	1,020
Weighted-average common and common-equivalent shares outstanding	44,130	43,590

Table of Contents

Stock options to purchase 482,969 and 802,048 shares of common stock, on a weighted-average basis, were outstanding for the quarters ended March 31, 2013 and April 1, 2012, respectively, but were not included in the calculation of diluted net income per share because they were anti-dilutive.

NOTE 15: Segment Information

The Company has two reportable segments: the Modular Vision Systems Division (MVSD) and the Surface Inspection Systems Division (SISD). MVSD develops, manufactures, and markets modular vision systems and ID products that are used to automate the manufacture and tracking of discrete items by locating, identifying, inspecting, and measuring them during the manufacturing or distribution process. SISD develops, manufactures, and markets surface inspection vision systems that are used to inspect surfaces of materials processed in a continuous fashion, such as metals, papers, nonwoven, plastics, and glass, to ensure there are no flaws or defects on the surfaces. Segments are determined based upon the way that management organizes its business for making operating decisions and assessing performance.

The following table summarizes information about the segments (in thousands):

Quarter Ended				
March 31, 2013	MVSD	SISD	Reconciling Items	Consolidated
Product revenue	\$ 68,319	\$ 6,353	\$	\$ 74,672
Service revenue	2,092	4,128		6,220
Operating income	22,076	1,732	(5,827)	17,981

Quarter Ended

April 1, 2012

Product revenue	\$ 64,221	\$ 7,186	\$	\$ 71,407
Service revenue	1,920	4,382		6,302
Operating income	21,144	2,392	(5,795)	17,741

Reconciling items consist of stock-based compensation expense and unallocated corporate expenses, which primarily include corporate headquarters costs, professional fees, and patent infringement litigation. Additional asset information by segment is not produced internally for use by the chief operating decision maker, and therefore, is not presented. Additional asset information is not provided because cash and investments are commingled and the segments share assets and resources in a number of locations around the world.

Table of Contents

ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-Looking Statements

Certain statements made in this report, as well as oral statements made by the Company from time to time, constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Readers can identify these forward-looking statements by our use of the words expects, anticipates, estimates, believes, projects, intends, plans, will, may, shall, could, should, and similar words and other statements of a similar sense. These statements are based upon current estimates and expectations as to prospective events and circumstances, which may or may not be in our control and as to which there can be no firm assurances given. These forward-looking statements, which include statements regarding business and market trends, future financial performance, customer order rates, expected areas of growth, research and development activities, and strategic plans, involve known and unknown risks and uncertainties that could cause actual results to differ materially from those projected. Such risks and uncertainties include: (1) current and future conditions in the global economy; (2) the cyclical nature of the semiconductor and electronics industries; (3) the reliance on revenue from the automotive industry; (4) the inability to penetrate new markets; (5) the inability to achieve significant international revenue; (6) fluctuations in foreign currency exchange rates; (7) the loss of a large customer; (8) the inability to attract and retain skilled employees; (9) the reliance upon key suppliers to manufacture and deliver critical components for our products; (10) the failure to effectively manage product transitions or accurately forecast customer demand; (11) the inability to design and manufacture high-quality products; (12) the technological obsolescence of current products and the inability to develop new products; (13) the failure to properly manage the distribution of products and services; (14) the inability to protect our proprietary technology and intellectual property; (15) our involvement in time-consuming and costly litigation; (16) the impact of competitive pressures; (17) the challenges in integrating and achieving expected results from acquired businesses; (18) potential impairment charges with respect to our investments or for acquired intangible assets or goodwill; (19) exposure to additional tax liabilities; and (20) information security breaches or business system disruptions. The foregoing list should not be construed as exhaustive and we encourage readers to refer to the detailed discussion of risk factors included in Part I - Item 1A of the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2012. The Company cautions readers not to place undue reliance upon any such forward-looking statements, which speak only as of the date made. The Company disclaims any obligation to subsequently revise forward-looking statements to reflect the occurrence of anticipated or unanticipated events or circumstances after the date such statements are made.

Table of Contents

Executive Overview

Cognex Corporation is a leading worldwide provider of machine vision products that capture and analyze visual information in order to automate tasks, primarily in manufacturing processes, where vision is required. Our Modular Vision Systems Division (MVSD) specializes in machine vision systems and ID products that are used to automate the manufacture and tracking of discrete items, while our Surface Inspection Systems Division (SISD) specializes in machine vision systems that are used to inspect the surfaces of materials processed in a continuous fashion.

In addition to product revenue derived from the sale of machine vision systems, the Company also generates revenue by providing maintenance and support, training, consulting, and installation services to its customers. Our customers can be classified into three primary markets: factory automation, semiconductor and electronics capital equipment, and surface inspection.

Factory automation customers, who are included in the Company's MVSD segment, purchase Cognex vision products and incorporate them into their manufacturing processes. Virtually every manufacturer can achieve better quality and manufacturing efficiency by using machine vision, and therefore, this market includes a broad base of customers across a variety of industries, including automotive, consumer electronics, food and beverage, pharmaceutical, and medical devices. The factory automation market also includes customers who purchase Cognex vision products for use outside of the assembly process, such as using ID products in logistics automation for package sorting and distribution. Sales to factory automation customers represented approximately 78% of total revenue in the first quarter of 2013.

Semiconductor and electronics capital equipment manufacturers, who are included in the Company's MVSD segment, purchase Cognex vision products and integrate them into the automation equipment that they manufacture and then sell to their customers to either make semiconductor chips or assemble printed circuit boards. Demand from these capital equipment manufacturers has historically been highly cyclical, with periods of investment followed by downturn. Sales to semiconductor and electronics capital equipment manufacturers represented approximately 9% of total revenue in the first quarter of 2013.

Surface inspection customers, who comprise the Company's SISD segment, are manufacturers of materials processed in a continuous fashion, such as metals, paper, nonwovens, plastics, and glass. These customers need sophisticated machine vision to detect, classify, and analyze defects on the surfaces of those materials as they are being processed at high speeds. Surface inspection sales represented approximately 13% of total revenue in the first quarter of 2013.

Revenue for the first quarter of 2013 totaled \$80,892,000, representing an increase of \$3,183,000, or 4%, from the same period in the prior year due primarily to higher sales in the factory automation market. Gross margin increased to 76% of revenue in the first quarter of 2013 from 75% of revenue in the first quarter of 2012 due to the shift in revenue mix to relatively higher-margin factory automation sales, as well as improved service margins. Operating expenses increased by \$2,578,000, or 6%, as compared to the first quarter of 2012, due primarily to expenses associated with increased headcount in strategic areas. The Company recorded an operating profit of \$17,981,000, or 22% of revenue, in the first quarter of 2013, compared to an operating profit of \$17,741,000, or 23% of revenue, in the first quarter of 2012. Net income improved to \$15,583,000, or 19% of revenue, in the first quarter of 2013 from \$14,282,000, or 18% of revenue, in the same period in the prior year due primarily to a lower effective tax rate. Net income per diluted share also improved to \$0.35 in the first quarter of 2013 from \$0.33 in the first quarter of 2012.

Results of Operations

As foreign currency exchange rates are a factor in understanding period-to-period comparisons, we believe the presentation of results on a constant-currency basis in addition to reported results helps improve investors' ability to understand our operating results and evaluate our performance in comparison to prior periods. We also use results on a constant-currency basis as one measure to evaluate our performance. Constant-currency information compares results between periods as if exchange rates had remained

Table of Contents

constant period-over-period. We generally refer to such amounts calculated on a constant-currency basis as excluding the impact of foreign currency exchange rate changes. Results on a constant-currency basis are not in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) and should be considered in addition to, and not as a substitute for, results prepared in accordance with U.S. GAAP.

Revenue

Revenue for the first quarter of 2013 increased by \$3,183,000, or 4%, from the first quarter of 2012. This increase was due to a \$3,980,000 increase in sales to factory automation customers and a \$290,000 increase in sales to semiconductor and electronics capital equipment customers, partially offset by a \$1,087,000 decrease in sales to surface inspection customers.

Factory Automation Market

Sales to customers in the factory automation market represented 78% of total revenue in the first quarter of 2013 compared to 76% in the first quarter of 2012. Sales to these customers increased by \$3,980,000, or 7%, from the first quarter of 2012. Changes in foreign currency exchange rates had little impact on total factory automation revenue, as the unfavorable impact on revenue of a weaker Japanese Yen was largely offset by the favorable impact of a stronger Euro in the first quarter of 2013 compared to the same period in the prior year.

Geographically, increases from the prior year were noted across all major regions except for Japan. However, excluding the impact of foreign currency exchange rate changes, the Japanese market was relatively flat compared to the first quarter of 2012. Revenue in Japan had declined in both 2011 and 2012 since the natural disasters that hit this region early in 2011. The largest increase was noted in Asia, where the Company has made significant investments, particularly in China, to expand its sales and support infrastructure in order to access more of the machine vision market in this high-potential growth region. By product line, the largest increase from the prior year came from sales of the Company's ID Products, which are used in manufacturing applications as well as in the logistics industry for package sorting and distribution. The Company expects its Asia region and its ID Products business to continue to be growth opportunities throughout 2013.

Generally, factory automation revenue declines from the fourth quarter to the first quarter, as many customers consume their remaining annual capital budgets during the last quarter of the year. However, in the first quarter of 2013, sales to factory automation customers increased by \$1,150,000, or 2%, from the fourth quarter of 2012. Management expects factory automation revenue to continue to grow in the second quarter of 2013 as compared to the first quarter.

Semiconductor and Electronics Capital Equipment Market

Sales to customers who make automation equipment for the semiconductor and electronics industries represented 9% of total revenue in both the first quarters of 2013 and 2012. Sales to these customers increased by \$290,000, or 4%, from the first quarter of 2012 and increased by \$1,489,000, or 27%, from the fourth quarter of 2012. Excluding the impact of foreign currency exchange rate changes, a majority of which relates to the Japanese Yen, sales to semiconductor and electronics capital equipment customers increased by \$548,000, or 8%, from the first quarter of 2012 and increased \$1,694,000, or 31%, from the fourth quarter of 2012. Despite this positive momentum, the semiconductor and electronics capital equipment market has historically been highly cyclical and management has limited visibility regarding future order levels from these customers.

Surface Inspection Market

Sales to customers in the surface inspection market represented 13% of total revenue in the first quarter of 2013 compared to 15% in the first quarter of 2012. Revenue from these customers decreased by \$1,087,000, or 9%, from the first quarter of 2012 and decreased by \$3,915,000, or 27%, from the fourth quarter of 2012. The impact of foreign currency exchange rate changes on revenue was not significant to the surface inspection market in either period. Surface inspection revenue reported each quarter can vary

Table of Contents

significantly depending upon the timing of customer orders, system deliveries, and installations, as well as the impact of revenue deferrals. Management expects surface inspection revenue to grow in the second quarter of 2013 as compared to the first quarter.

Product Revenue

Product revenue increased by \$3,265,000, or 5%, from the first quarter of 2012. This increase was driven by a higher volume of modular vision systems sold than in the prior year, partially offset by a lower average selling price due to the shift in revenue mix to ID Products, which have relatively lower average selling prices. We expect this trend related to ID products to continue throughout 2013. Higher MVSD product revenue was partially offset by lower SISD product revenue.

Service Revenue

Service revenue, which is derived from the sale of maintenance and support, training, consulting, and installation services, was relatively flat compared to the first quarter of 2012 and represented 8% of total revenue in each period presented.

Gross Margin

Gross margin as a percentage of revenue was 76% for the first quarter of 2013 compared to 75% for the first quarter of 2012 due to the shift in revenue mix from surface inspection sales to relatively higher-margin factory automation sales, as well as improved service margins.

MVSD Margin

MVSD gross margin as a percentage of revenue was 79% for the first quarter of 2013 compared to 80% for the first quarter of 2012. A reduction in product margins due to higher provisions for warranty and for excess and obsolete inventory was partially offset by improvements in consulting service margins.

SISD Margin

SISD gross margin as a percentage of revenue was 54% for the first quarter of 2013 compared to 53% for the first quarter of 2012. The increase in SISD margin was primarily due to improved installation service margins.

Product Margin

Product gross margin as a percentage of revenue was 78% for both the first quarters of 2013 and 2012. A reduction in MVSD product margins due to higher provisions for warranty and for excess and obsolete inventory was offset by a favorable shift in revenue mix to relatively higher-margin MVSD products.

Service Margin

Service gross margin as a percentage of revenue was 52% for the first quarter of 2013 compared to 44% for the first quarter of 2012. The increase in service margin was due to improvements in MVSD consulting service margins, as well as improved installation service margins at SISD.

Operating Expenses

Research, Development, and Engineering Expenses

Research, development, and engineering (RD&E) expenses for the first quarter of 2013 increased by \$960,000, or 9%, from the first quarter of 2012. MVSD RD&E expenses increased by \$917,000, or 10%, and SISD RD&E expenses increased by \$43,000, or 5%.

Table of Contents

The increase in MVSD RD&E expenses was primarily due to headcount additions, resulting in higher personnel-related costs, such as salaries and fringe benefits (\$850,000). The increase in SISD RD&E expenses was primarily due to higher spending on outsourced engineering services (\$35,000).

RD&E expenses as a percentage of revenue were 14% in the first quarter of 2013 and 13% in the first quarter of 2012. We believe that a continued commitment to RD&E activities is essential in order to maintain or achieve product leadership with our existing products and to provide innovative new product offerings. In addition, we consider our ability to accelerate time to market for new products to be critical to our revenue growth. Therefore, we expect to continue to make significant RD&E investments in the future. Although we target our RD&E spending to be between 10% and 15% of revenue, this percentage is impacted by revenue levels.

Selling, General, and Administrative Expenses

Selling, general, and administrative (SG&A) expenses for the first quarter of 2013 increased by \$1,618,000, or 5%, from the first quarter of 2012. MVSD SG&A expenses increased by \$1,342,000, or 6%, while SISD SG&A expenses increased by \$153,000, or 5%. Corporate expenses that are not allocated to either division increased by \$123,000, or 4%.

The table below (in thousands) details the \$1,342,000 net increase in MVSD SG&A in 2013:

MVSD SG&A balance in 2012	\$ 24,148
Personnel-related costs	723
Depreciation expense	264
Sales demonstration equipment	225
Sales commissions	198
Foreign currency exchange rate changes	(298)
Other	230
 MVSD SG&A balance in 2013	 \$ 25,490

Personnel-related costs have increased from the prior year due to additional headcount, and to a lesser extent, higher average costs per employee. Over the past year, the Company has continued to increase headcount in strategic areas, principally Sales, resulting in higher personnel-related costs, such as salaries, fringe benefits, commissions, and travel expenses. Average costs per employee have increased over the prior year due primarily to modest wage increases granted early in 2013 and higher fringe benefits, such as health care costs. The Company also recorded higher depreciation expense related principally to business system upgrades, increased spending on sales demonstration equipment, and higher sales commissions resulting from the higher revenue level. Operating expenses in the first quarter of 2013 compared to the first quarter of 2012 were favorably impacted by a weaker Japanese Yen, partially offset by the unfavorable impact of a stronger Euro.

The increase in SISD SG&A expenses was primarily due to increased salaries and fringe benefits expenses (\$228,000), partially offset by lower company bonus accruals (\$50,000).

The increase in corporate expenses was primarily related to higher company bonus accruals (\$170,000) and increased stock-based compensation expense due to a higher valuation of stock options granted in the first quarter of 2013 (\$75,000). These increases were partially offset by lower professional fees (\$139,000), primarily related to the timing of tax services.

Nonoperating Income (Expense)

The Company recorded a foreign currency gain of \$63,000 in the first quarter of 2013 compared to a loss of \$638,000 in the first quarter of 2012. The foreign currency gains and losses in each period resulted primarily from the revaluation and settlement of accounts receivable and intercompany balances that are reported in one currency and collected in another. Although a portion of the Company's foreign currency exposure of accounts receivable is mitigated through the use of forward contracts, this program depends upon forecasts of sales and collections, and therefore, gains or losses on the underlying receivables may not perfectly offset losses or gains on the contracts.

Table of Contents

Investment income for the first quarter of 2013 decreased \$580,000, or 60%, from the first quarter of 2012, due to declining yields on the Company's portfolio of debt securities, as well as a \$368,000 unrealized loss recorded in current operations on a corporate stock holding designated as a trading security.

The Company recorded other income of \$117,000 in the first quarter of 2013 compared to \$3,000 in the first quarter of 2012. The Company recorded \$354,000 and \$141,000 of other income in the first quarters of 2013 and 2012, respectively, due to the expiration of the statutes of limitations relating to tax holidays, during which time the Company collected value-added taxes from customers that were not required to be remitted to the government authority. Other income (expense) also includes rental income, net of associated expenses, from leasing buildings adjacent to the Company's corporate headquarters.

Income Tax Expense

The Company's effective tax rate was 16% in the first quarter of 2013 compared to 21% in the first quarter of 2012. The effective tax rate for the first quarter of 2013 was impacted by one discrete event related to the retroactive application of the 2012 R&D credit passed by Congress under the American Taxpayer Relief Act of 2012, which reduced tax expense by \$555,000. Although the provisions under this law were made retroactive to January 1, 2012, the law was signed on January 1, 2013, and therefore, the financial impact of any retroactive provision has been recorded as a discrete event in the current quarter. Excluding this discrete event, the effective tax rate for the first quarter of 2013 was 19%. There were no discrete events in the first quarter of 2012. In addition to the discrete event discussed above, the remaining decrease in the effective tax rate was primarily due to a higher proportion of pre-tax income earned in relatively lower tax jurisdictions.

Liquidity and Capital Resources

The Company has historically been able to generate positive cash flow from operations, which has funded its operating activities and other cash requirements and has resulted in an accumulated cash, cash equivalent, and investment balance of \$413,652,000 as of March 31, 2013. The Company has established guidelines relative to credit ratings, diversification, and maturities of its investments that maintain liquidity.

The Company's cash requirements during the first quarter of 2013 were met with its existing cash balances, cash from investment maturities, positive cash flows from operations, and the proceeds from stock option exercises. Cash requirements primarily consisted of operating activities, purchases of investments, and capital expenditures. Capital expenditures for the first quarter of 2013 totaled \$1,908,000 and consisted primarily of expenditures for computer hardware and software, as well as manufacturing test equipment related to new product introductions.

In June 2000, the Company became a Limited Partner in Venrock Associates III, L.P. (Venrock), a venture capital fund. The Company has committed to a total investment in the limited partnership of up to \$20,500,000, with the commitment period expiring on December 31, 2013. The Company does not have the right to withdraw from the partnership prior to December 31, 2013. As of March 31, 2013, the Company had contributed \$19,886,000 to the partnership. No contributions were made and no distributions were received in the first quarter of 2013. The remaining commitment of \$614,000 can be called by Venrock in any period through December 31, 2013.

Beginning in the third quarter of 2003, the Company's Board of Directors had declared and paid a cash dividend in each quarter. In December 2012, the Company declared and paid an \$0.11 dividend that would normally be declared in the first quarter of 2013 in conjunction with the 2012 earnings release. A special dividend of \$1.00 was also declared and paid in the fourth quarter of 2012 to replace expected quarterly dividend declarations for the next eight quarters, beginning in 2013. The additional \$0.11 dividend and the \$1.00 dividend were accelerated due to the anticipated increase in the federal tax on dividends paid after December 31, 2012. Due to these accelerated payments, no dividends were declared or paid in the first quarter of 2013. Future dividends will be declared at the discretion of the Company's Board of Directors and will depend upon such factors as the Board deems relevant including, among other things, the Company's ability to generate positive cash flows from operations.

Table of Contents

In April 2008, the Company's Board of Directors authorized the repurchase of up to \$50,000,000 of the Company's common stock, primarily as a means to reduce the dilutive effect of employee stock options. As of March 31, 2013, the Company had repurchased 1,375,875 shares at a cost of \$30,000,000 under this program. In November 2011, the Company's Board of Directors authorized the repurchase of up to \$80,000,000 of the Company's common stock. This new authorization will commence once the Company completes the \$50,000,000 program noted above. The Company did not purchase any shares under these programs during the first quarter of 2013. The Company may repurchase shares under these programs in future periods depending upon a variety of factors, including, among other things, stock price, share availability, and cash reserve requirements.

The Company believes that its existing cash, cash equivalent, and investment balances, together with cash flow from operations, will be sufficient to meet its operating, investing, and financing activities for the next twelve months. As of March 31, 2013, the Company had approximately \$409,912,000 in cash, cash equivalents, debt securities, or equity securities that could be converted into cash. In addition, Cognex has no debt and does not anticipate needing debt financing in the near future. We believe that our strong cash position has put us in a relatively good position with respect to our longer-term liquidity needs.

ITEM 3: QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There have been no material changes to the Company's exposures to market risk since December 31, 2012.

ITEM 4: CONTROLS AND PROCEDURES

As required by Rules 13a-15 and 15d-15 of the Securities Exchange Act of 1934, the Company has evaluated, with the participation of management, including the Chief Executive Officer and the Chief Financial Officer, the effectiveness of its disclosure controls and procedures (as defined in such rules) as of the end of the period covered by this report. Based on such evaluation, the Chief Executive Officer and Chief Financial Officer concluded that such disclosure controls and procedures were effective as of that date. From time to time, the Company reviews its disclosure controls and procedures, and may from time to time make changes aimed at enhancing their effectiveness and to ensure that the Company's systems evolve with its business. There was no change in the Company's internal control over financial reporting that occurred during the three-month period ended March 31, 2013 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II: OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

In May 2008, the Company filed a complaint against MvTec Software GmbH, MvTec LLC, and Fuji America Corporation in the United States District Court for the District of Massachusetts alleging infringement of certain patents owned by the Company. In April 2009 and again in June 2009, Defendant MvTec Software GmbH filed re-examination requests of the patents-at-issue with the United States Patent and Trademark Office. This matter is ongoing.

In May 2009, the Company pre-filed a complaint with the United States International Trade Commission (ITC) pursuant to Section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. §1337, against MvTec Software GmbH, MvTec LLC, Fuji America, and several other respondents alleging unfair methods of competition and unfair acts in the unlawful importation into the United States, sale for importation, or sale within the United States after

Table of Contents

importation. By this filing, the Company requested the ITC to investigate the Company's contention that certain machine vision software, machine vision systems, and products containing the same infringe, and respondents directly infringe and/or actively induce and/or contribute to the infringement in the United States, of one or more of the Company's U.S. patents. In July 2009, the ITC issued an order that it would institute an investigation based upon the Company's assertions. In September 2009, the Company reached a settlement with two of the respondents, and in December 2009, the Company reached a settlement with five additional respondents. In March 2010, the Company reached a settlement with respondent Fuji Machine Manufacturing Co., Ltd. and its subsidiary Fuji America Corporation. These settlements did not have a material impact on the Company's financial results. An ITC hearing was held in May 2010. In July 2010, the Administrative Law Judge issued an initial determination finding two of the Company's patents invalid and that respondents did not infringe the patents-at-issue. In September 2010, the ITC issued a notice that it would review the initial determination of the Administrative Law Judge. The ITC issued its Final Determination in November 2010 in which it determined to modify-in-part and affirm-in-part the Administrative Law Judge's determination, and terminate the investigation with a finding of no violation of Section 337 of the Tariff Act of 1930 (as amended 19 U.S.C. §1337). The Company has filed an appeal of the decision with the United States Court of Appeals for the Federal Circuit. An oral hearing before the United States Court of Appeals occurred in February 2012. This matter is ongoing.

In March 2013, the Company filed a lawsuit against Microscan Systems, Inc. (Microscan) and Code Corporation in the United States District Court for the Southern District of New York alleging that Microscan's Mobile Hawk handheld imager infringes U.S. Patent 7,874,487 owned by the Company. The lawsuit seeks to prohibit Code Corporation from manufacturing the product, and Microscan from selling and distributing the product. The Company is also seeking monetary damages resulting from the alleged infringement. In April 2013, Microscan filed ex parte re-examination requests of the patent-at-issue with the United States Patent and Trademark Office. These matters are ongoing.

The Company cannot predict the outcome of the above-referenced pending matters and an adverse resolution of these lawsuits could have a material adverse effect on the Company's financial position, liquidity, results of operations, and/or indemnification obligations. In addition, various other claims and legal proceedings generally incidental to the normal course of business are pending or threatened on behalf of or against the Company. While we cannot predict the outcome of these incidental matters, we believe that any liability arising from them will not have a material adverse effect on our financial position, liquidity, or results of operations.

ITEM 1A. RISK FACTORS

For a complete list of factors that could affect the Company's business, results of operations, and financial condition, see the risk factors discussion provided in Part I - Item 1A of the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2012.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table sets forth information with respect to purchases by the Company of shares of its Common Stock during the periods indicated.

	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs
January 1 - January 27, 2013				\$ 100,000,000
January 28 - February 24, 2013				\$ 100,000,000
February 25 - March 31, 2013				\$ 100,000,000
Total				\$ 100,000,000

Table of Contents

- (1) In April 2008, the Company's Board of Directors authorized the repurchase of up to \$50,000,000 of the Company's common stock. In November 2011, the Company's Board of Directors authorized the repurchase of up to an additional \$80,000,000 of the Company's common stock to commence once the Company completes the \$50,000,000 program noted above.
