The information in this prospectus is not complete and may be changed. We may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and it is not soliciting an offer to buy these securities in any state where the offer or sale is not permitted.

Subject to completion, dated _____, 2015

Prospectus

shares

Class A common stock

This is an initial public offering of shares of Class A common stock of TerraForm Global, Inc. All of the shares of Class A common stock are being sold by us.

Prior to this offering, there has been no public market for our Class A common stock. It is currently estimated that the initial public offering price per share will be between \$ _____ and \$ _____. We intend to list our Class A common stock on the _____ under the symbol _____.

We will have two classes of common stock outstanding after this offering: Class A common stock and Class B common stock. Each share of Class A common stock entitles its holder to one vote on all matters presented to our stockholders generally. All of our Class B common stock will be held by SunEdison, Inc., or our Sponsor, or its controlled affiliates. Each share of Class B common stock entitles our Sponsor to _____ votes on all matters presented to our stockholders generally. Immediately following this offering, the holders of our Class A common stock will collectively hold 100% of the economic interests in us and _____ % of the voting power in us, and our Sponsor will hold the remaining _____ % of the voting power in us. As a result, we will be a _____ controlled company within the meaning of the corporate governance standards of the _____. See _____ Management Controlled company.

We are an _____ emerging growth company as the term is used in the Jumpstart Our Business Startups Act of 2012 and, as such, have elected to comply with certain reduced public company reporting requirements.

	Per share	Total
Initial public offering price	\$ _____	\$ _____
Underwriting discounts and commissions(1)	\$ _____	\$ _____
Proceeds, before expenses, to us	\$ _____	\$ _____

(1) Excludes a structuring fee payable to J.P. Morgan Securities LLC and Barclays Capital Inc. equal to _____ % of the gross offering proceeds. See _____ Underwriting (conflicts of interest).

The underwriters have the option to purchase up to an additional _____ shares from us at the initial public offering price less the underwriting discounts and commissions for a period of 30 days after the date of this prospectus.

See **Risk factors** beginning on page 43 to read about factors you should consider before buying shares of our Class A common stock.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or passed upon the accuracy or adequacy of this prospectus. Any representation to the contrary is a criminal offense.

We expect that the shares will be delivered against payment in New York, New York on _____, 2015.

J.P. Morgan
, 2015.

We have not and the underwriters have not authorized anyone to provide you with any information other than that contained in this prospectus or in any free writing prospectus prepared by or on behalf of us or to which we have referred you. We are offering to sell, and seeking offers to buy, shares of our Class A common stock only in jurisdictions where such offers and sales are permitted. The information in this prospectus or any free writing prospectus is accurate only as of its date, regardless of its time of delivery or the time of any sale of shares of our Class A common stock. Our business, financial condition, results of operations and prospects may have changed since that date.

Until _____, 2015 (25 days after the date of this prospectus), all dealers that buy, sell or trade our Class A common stock, whether or not participating in this offering, may be required to deliver a prospectus. This is in addition to the dealers' obligation to deliver a prospectus when acting as underwriters and with respect to their unsold allotments or subscriptions.

Table of Contents

Trademarks and trade names

We own or have rights to various trademarks, service marks and trade names that we use in connection with the operation of our business. This prospectus may also contain trademarks, service marks and trade names of SunEdison, Inc. and third parties, which are the property of their respective owners. Our use or display of third parties' trademarks, service marks, trade names or products in this prospectus is not intended to, and should not be read to, imply a relationship with or endorsement or sponsorship of us. Solely for convenience, the trademarks, service marks and trade names referred to in this prospectus may appear without the ®, ™ or ™ symbols, but such references are not intended to indicate, in any way, that we will not assert, to the fullest extent under applicable law, our rights or the right of the applicable licensor to these trademarks, service marks and trade names.

Industry and market data

This prospectus includes industry data and forecasts that we obtained from industry publications and surveys, public filings and internal company sources. In particular, unless otherwise specified, we have relied upon the data collected and published by Bloomberg New Energy Finance (as accessed on April 30, 2015) with respect to all of the data included in this prospectus relating to the size of the various clean energy markets, including the expected growth of our initial target markets over the periods specified herein. Bloomberg New Energy Finance is a market research firm focused on the energy sector. Industry publications and surveys and forecasts generally state that the information contained therein has been obtained from sources believed to be reliable, but there can be no assurance as to the accuracy or completeness of the included information. Statements as to our market position and market estimates are based on independent industry publications, government publications, third-party forecasts, management's estimates and assumptions about our markets and our internal research. While we are not aware of any misstatements regarding the market, industry or similar data presented herein, such data involve risks and uncertainties and are subject to change based on various factors, including those discussed under the headings "Risk factors" and "Cautionary statement concerning forward-looking statements" in this prospectus.

As used in this prospectus, all references to watts (e.g., megawatts, gigawatts, MW, GW, etc.) refer to measurements of direct current, or DC, with respect to solar generation assets, and measurements of alternating current, or AC, with respect to wind and hydro-electric generation assets.

Except as otherwise noted, all currency conversions referred to in this prospectus are calculated as of or for the year ended December 31, 2014.

Certain defined terms

Unless the context provides otherwise, references herein to:

we, our, us, our company and Global refer to TerraForm Global, Inc., together with, where applicable, its consolidated subsidiaries after giving effect to the Organizational Transactions (as defined herein), which corporation is the issuer of the Class A common stock offered hereby;

First Wind refers to First Wind Holdings, LLC, together with, where applicable, its consolidated subsidiaries, which our Sponsor and TerraForm Power, as appropriate, acquired on January 29, 2015;

Global LLC refers to TerraForm Global, LLC, which will be controlled by Global as its sole managing member upon the completion of the Organizational Transactions;

Global Operating LLC refers to TerraForm Global Operating, LLC, a wholly owned subsidiary of Global LLC, which will, through its direct and indirect subsidiaries, conduct our business and operations;

Table of Contents

SunEdison and Sponsor refer to SunEdison, Inc., together with, where applicable, its consolidated subsidiaries;

TerraForm Power refers to TerraForm Power, Inc., together with, where applicable, its consolidated subsidiaries, which is a publicly traded subsidiary of our Sponsor that also owns and operates clean power assets; and

\$ refers to U.S. dollars, CNY refers to Chinese Yuan Renminbi, BRL refers to Brazilian Real, INR refers to Indian Rupee, ZAR refers to South African Rand, PEN refers to Peruvian Nuevo Sol, MYR refers to Malaysian Ringgit and THB refers to Thai Baht.
See Summary Organizational Transactions for more information regarding our ownership structure.

Summary

The following summary highlights information contained elsewhere in this prospectus. It does not contain all the information you need to consider in making your investment decision. Before making an investment decision, you should read this entire prospectus carefully and should consider, among other things, the matters set forth under Risk factors, Selected historical combined financial data, Management's discussion and analysis of financial condition and results of operations and our predecessor's financial statements and related notes thereto appearing elsewhere in this prospectus. Unless otherwise specifically noted, (i) all operating and similar data for our business or our Sponsor's business included in this prospectus is as of or for the year ended December 31, 2014 and (ii) all references to MW or GW in relation to our initial portfolio (or our portfolio of call right projects) represent the rated generation capacity at standard test conditions of a project multiplied by our percentage of economic ownership (or the ownership we may acquire pursuant to such rights) of such project, or net capacity, as of the date of this prospectus.

About TerraForm Global, Inc.

Overview

We are a globally diversified, dividend growth-oriented company formed to own and operate contracted clean power generation assets in attractive, high-growth emerging markets. Our business objective is to acquire, from SunEdison and unaffiliated third parties, clean energy generation assets that produce high-quality, long-term contracted cash flows, primarily by serving utility and commercial customers with strong credit profiles. Our initial target markets will be China, Brazil, India, South Africa, Peru, Uruguay, Malaysia and Thailand. Of these markets, China, Brazil, India, South Africa, Uruguay and Thailand are expected to be among the fastest growing solar and wind energy markets worldwide from 2015 to 2020 in terms of annual installations and capital investment in renewable energy projects.

Our initial portfolio consists of solar projects located in China, India, South Africa, Uruguay, Malaysia and Thailand, wind projects located in China, Brazil, India and South Africa, and hydro-electric projects located in Brazil and Peru. These projects have a total combined capacity of 987.8 MW, and we forecast that they will generate an aggregate of \$164.8 million of cash available for distribution for the year ending December 31, 2016. All of these projects are supported by power purchase agreements, or PPAs, with creditworthy counterparties. The PPAs for projects included in our initial portfolio have a weighted average remaining life of 19 years as of December 31, 2014.

We have a well diversified project portfolio, across both geographies and renewable energy technologies, which we believe enables us to generate consistent quarterly cash flows. For example, projects located in any single country are not expected to represent a majority of our projected cash available for distribution for the year ending December 31, 2015. We intend to rapidly expand and diversify our initial project portfolio by acquiring utility-scale solar and commercial and industrial distributed solar, wind and hydro-electric power generation assets located in our initial target markets, which we expect will also have long-term PPAs with creditworthy counterparties. We expect to pursue opportunities in other high-growth emerging markets that have characteristics similar to those of our initial target markets, with a focus on markets located in Asia (except Japan), Africa, Latin America and the Middle East. Over time, we may selectively acquire other clean power generation assets, including natural gas, biomass and hybrid energy and storage solutions, as well as transmission lines, that enable us to provide power on a 24/7 basis, as well as to add solar generation assets serving residential and commercial building customers.

Table of Contents

Portfolio growth

Call rights

We believe we will be able to rapidly expand our initial project portfolio as a result of the significant project acquisition call rights that we have with our Sponsor and expect to have with third-party developers of clean power generation assets. These call rights relate to currently identified projects with an aggregate capacity of _____ MW. We will enter into a support agreement with our Sponsor immediately prior to the completion of this offering, pursuant to which our Sponsor will agree to offer us additional qualifying projects by the end of 2017 that are projected to generate an aggregate of at least \$ _____ million of cash available for distribution during their first twelve months of commercial operations. We expect that our Sponsor will continue to provide us with the opportunity to acquire additional qualifying projects after it has satisfied its minimum commitment under the support agreement in order to maximize the value of its equity ownership and incentive distribution rights. In addition, we have an agreement with Renova Energia S.A., the largest renewable energy company in Brazil, or Renova, pursuant to which we have a right of first offer with respect to its operating, contracted and development pipeline, or the Renova ROFO Projects.

Third-party acquisitions

We also intend to rapidly expand our project portfolio by acquiring renewable energy projects from third parties. As discussed below, our Sponsor and its operating subsidiary, TerraForm Power have a strong record of third-party project and corporate acquisitions. Our initial portfolio includes 758 MW acquired from third parties in seven acquisitions. We expect to continue to have significant opportunities to acquire projects from our Sponsor and from third-party developers, enabling us to expand our project portfolio through acquisitions for the foreseeable future.

Our Sponsor

Our U.S.-based Sponsor is the largest globally diversified wind and solar energy development company and has been one of the top three developers and installers of solar energy facilities in the world in each of the past two years based on megawatts installed. As of December 31, 2014, our Sponsor had a 5.1 GW pipeline of development-stage solar projects, including 1.3 GW in our initial and future target markets, and approximately 3.7 GW of self-developed and third-party developed solar power generation assets under management. Our Sponsor has developed over 1,300 solar projects in 20 countries and has completed all of the projects on which it has commenced construction, including over 100 projects in our initial target markets. Our Sponsor has over 1,900 development and operations employees, over 700 of which service our initial and future target markets. We believe we are well positioned to capitalize on favorable market trends in the renewable power generation segment due to our relationship with our Sponsor, which has an established presence in each of our initial target markets, a strong asset development pipeline and acquisition track record, significant project financing experience and asset management and operational expertise.

Table of Contents

Yieldco experience

Our Sponsor has significant experience in acquiring, financing and operating clean power generation assets through a publicly listed dividend-oriented company. We will be the second yieldco vehicle to launch with our Sponsor's support. Our Sponsor's subsidiary, TerraForm Power, which owns and operates clean power assets located in the U.S. and other select jurisdictions, completed its initial public offering in July 2014. With our Sponsor's support, TerraForm Power has raised approximately \$3.9 billion in acquisition and permanent financing to pursue acquisitions of renewable energy projects totaling 1,703 MW as of May 1, 2015. We intend to capitalize on our Sponsor's experience in successfully launching and supporting TerraForm Power.

M&A expertise

During the year ended December 31, 2014, our Sponsor completed 32 corporate and project acquisitions worldwide, which included operating projects with an aggregate capacity of 1.5 GW. On January 29, 2015, our Sponsor completed the purchase of First Wind's development platform, pipeline and projects in development, including over 1.6 GW of wind and solar generation assets under development, and increased its assets under management by 1.5 GW. Our Sponsor has completed, or will complete concurrently with the completion of this offering, seven separate acquisitions for our initial portfolio of projects located across multiple geographies that utilize a variety of renewable energy technologies. Our Sponsor has also agreed to acquire concurrently with the completion of this offering Latin American Power Holding, B.V., or LAP, a development and asset management company headquartered in Santiago, Chile. LAP has experience developing and operating hydro-electric and wind projects and will provide us with operating and call right hydro-electric projects in Peru and provide our Sponsor with hydro-electric development, operations and maintenance personnel and expertise. Our Sponsor has also recently agreed to acquire concurrently with the completion of this offering two wholly owned subsidiaries of Honiton Energy Caymans, Ltd., or Honiton, which own and operate wind projects in China. The Honiton acquisition will provide us with operating wind projects in China and our Sponsor with operations and maintenance personnel and expertise in China. We will continue to leverage our Sponsor's significant development expertise, project pipeline and third-party acquisition track record.

Market opportunity

The global renewable power generation segment is large and growing rapidly due to significant increases in energy demand, decreasing cost of renewable energy, the emergence in various energy markets of grid parity, which is the point at which renewable energy sources can generate electricity at a cost equal to or lower than prevailing retail electricity prices, and strong social and political support for renewable energy, among other factors. We expect the cost to produce energy from conventional sources will continue to rise, owing to the required investments in transmission and distribution infrastructure and increasing regulatory costs relating to conventional energy sources. We believe accelerating industrialization, an expanding middle class and the need to develop energy grid infrastructure will continue to drive demand in our initial target markets for the foreseeable future. We believe that solar and wind energy systems are particularly attractive in addressing the undersupply of electrical generation capacity in emerging markets due to their relative ease and speed of installation, scalability and, with respect to solar energy systems, their ability to be located near the customer, thereby reducing the customer's transmission and distribution costs. We believe that hydro-electric energy represents a significant acquisition opportunity for us because it is a proven renewable technology with significant installed capacity of more than 400 GW in our initial target markets.

The global renewables market is projected to require more than \$2.0 trillion of investment in capacity expansions over the period from 2015 through 2020, of which approximately 35% of such capacity expansion is

Table of Contents

expected to occur in our initial target markets. Of this total expected investment, more than \$723 billion and \$664 billion is expected to be in global solar and wind generation capacity expansions, respectively. Our initial target markets are expected to account for 48% and 41% of global wind and solar capacity expansions, respectively. In addition, more than \$253 billion is expected to be invested globally in hydro-electric generation assets through 2016, of which our initial target markets are expected to account for 27% of such capacity expansion.

The installed base of renewable energy generation capacity in our initial target markets is greater than 619 GW, including more than 38 GW of solar capacity, 137 GW of wind capacity and 409 GW of hydro-electric capacity. Driven by the increasing cost competitiveness of wind and solar energy, accelerating industrialization, an expanding middle class and attractive regulatory policies that incentivize renewable energy investments, we expect substantial growth in installed renewable energy capacity over the next several years. Solar energy capacity additions are expected to total over 179 GW between 2014 and 2020 in our initial target markets and are expected to grow at a compound annual growth rate, or CAGR, of 31% between 2014 and 2020, in our initial target markets. Over the same period, wind energy capacity additions are expected to total over 187 GW in our initial target markets and are expected to grow at a CAGR of 13% between 2014 and 2020, in our initial target markets.

Sponsor Support Agreement

Immediately prior to the completion of this offering, we will enter into a project support agreement, or the Support Agreement, with our Sponsor, which will require our Sponsor to offer us additional qualifying projects from its development pipeline by the end of 2017 that are projected to generate an aggregate of at least \$ million of cash available for distribution during the first twelve months following the qualifying projects respective commercial operation dates, or Projected FTM CAFD. We refer to these projects as the Call Right Projects. Specifically, the Support Agreement requires our Sponsor to offer us:

from the completion of this offering through the end of 2016, clean energy projects that are projected to generate an aggregate of at least \$ million of Projected FTM CAFD; and

during calendar year 2017, clean energy projects that are projected to generate an aggregate of at least \$ million of Projected FTM CAFD.

If the amount of Projected FTM CAFD of the projects we acquire under the Support Agreement from the completion of this offering through the end of 2016 is less than \$ million, or the amount of Projected FTM CAFD of the projects we acquire under the Support Agreement during 2017 is less than \$ million, our Sponsor has agreed that it will continue to offer us sufficient, qualifying Call Right Projects from its pipeline until the total aggregate Projected FTM CAFD commitment for each of the periods covered by the Support Agreement has been satisfied. The Call Right Projects that are specifically identified in the Support Agreement currently have a total capacity of GW. We believe the currently identified Call Right Projects will be sufficient to satisfy % of the Projected FTM CAFD commitment for 2016 and between % and % of the Projected FTM CAFD commitment for 2017 (depending on the amount of project-level financing we use for such projects).

In addition, the Support Agreement grants us a right of first offer with respect to any clean energy projects (other than Call Right Projects) that our Sponsor elects to sell or otherwise transfer during the six-year period following the completion of this offering and that are located in our initial target markets and other emerging markets that it determines have characteristics similar to our initial target markets. We refer to these projects as the SunEdison ROFO Projects. The Support Agreement does not identify the SunEdison ROFO Projects since our

Table of Contents

Sponsor will not be obligated to sell any project that would constitute a SunEdison ROFO Project. In the event that our Sponsor elects to sell such assets, it will not be required to accept any offer we make to acquire any SunEdison ROFO Project and, following the completion of good faith negotiations with us, our Sponsor may choose to sell such assets to a third party or not to sell the assets at all.

Cash dividend policy

We intend to use a portion of the cash available for distribution, or CAFD, generated by our project portfolio to pay regular quarterly cash dividends to holders of our Class A common stock. After determining an appropriate reserve for our working capital needs and the prudent conduct of our business, our objective is to pay our Class A common stockholders a consistent and growing cash dividend that is sustainable on a long-term basis. Based on our forecast and the related assumptions and our intention to acquire assets with characteristics similar to those in our initial portfolio, we expect to grow our CAFD and increase our quarterly cash dividends over time. Our initial quarterly dividend will be set at \$ per share of Class A common stock, or \$ per share on an annualized basis. We established our initial quarterly dividend level based upon a targeted payout ratio by Global LLC of approximately % of projected annual CAFD. This dividend payout ratio is not prescribed by our governing documents and is subject to change based on the discretion of our board of directors. We expect our dividend payout ratio to vary as we intend to maintain or increase our dividend despite variations in our CAFD from period to period. In addition, we may adjust our dividend payout ratio from time to time based on changes in our portfolio in terms of size and scope, working capital and capital expenditure requirements, operating expenses and market conditions, including acquisition opportunities and our ability to borrow funds and access capital markets.

We intend to target a % CAGR in dividends per share over the three-year period following the completion of this offering. This target is based on, and supported by, our Sponsor's \$ million aggregate Projected FTM CAFD commitment to us under the Support Agreement and our and our Sponsor's track record of successful project acquisitions from unaffiliated third parties, which will provide us the opportunity to grow our CAFD following this offering. While we believe our targeted growth rate is reasonable for the emerging markets on which we focus, it is based on estimates and assumptions regarding a number of factors, many of which are beyond our control, including the market value of projects we acquire from third parties, the purchase price we pay for acquired projects, our cost of capital, the ratio of debt to equity with respect to the financing of acquisitions, whether we have the financial resources to acquire the Call Right Projects and the timing of such acquisitions. Prospective investors should read Cash dividend policy, including our financial forecast and related assumptions, and Risk factors, including the risks and uncertainties related to our forecasted results, completion of construction of projects and acquisition opportunities, in their entirety.

We intend to cause Global LLC to distribute a portion of its CAFD to the holders of its units (including us as the sole holder of the Class A units and our Sponsor as the sole holder of the Class B units) pro rata, based on the number of units held, subject to the incentive distribution rights, or IDRs, held by our Sponsor that are described below. However, the Class B units held by our Sponsor are deemed subordinated because for a period of time, referred to as the Subordination Period, the Class B units will not be entitled to receive any distributions from Global LLC until the Class A units and Class B1 units (which may be issued upon reset of IDR target distribution levels or in connection with acquisitions from our Sponsor or third parties) have received quarterly distributions in an amount equal to \$ per unit, or the Minimum Quarterly Distribution, plus any arrearages in the payment of the Minimum Quarterly Distribution from prior quarters. The practical effect of the subordination of the Class B units is to increase the likelihood that during the Subordination Period there will be sufficient CAFD to pay the Minimum Quarterly Distribution on the Class A units and Class B1 units (if

Table of Contents

any). For a description of the IDRs and the Subordination Period, see Certain relationships and related party transactions Amended and Restated Operating Agreement of Global LLC Distributions.

Our initial portfolio includes projects representing 112.5 MW that have not reached their commercial operation dates (but are expected to achieve COD during 2015), or the Contributed Construction Projects, and projects representing 570.5 MW that we expect to acquire in the Pending Acquisitions concurrently with the completion of this offering. The closing of this offering is not conditioned on the consummation of the Pending Acquisitions. To reduce the effect on the Class A units of delays (if any) in completion of the Contributed Construction Projects or the acquisition of the Pending Acquisitions, our Sponsor has agreed to forego distributions under certain circumstances. In particular, our Sponsor has agreed to forego any distributions on its Class B units with respect to the third and fourth quarters of 2015 (i.e., distributions declared on or prior to March 31, 2016), and thereafter to a reduction of distributions on its Class B units to the extent the holders of the Class A units and Class B1 units have not received distributions in an amount equal to the Minimum Quarterly Distribution plus any arrearages in the payment of Minimum Quarterly Distributions from prior quarters.

For a description of the IDRs, the Subordination Period and the Distribution Forbearance Period, including the definitions of Subordination Period, As Delivered CAFD, Closed Acquisition CAFD, CAFD Forbearance Threshold and Distribution Forbearance Period, see Certain relationships and related party transactions Amended and Restated Operating Agreement of Global LLC Distributions.

Purpose of TerraForm Global, Inc.

We intend to create value for the holders of our Class A common stock by achieving the following objectives:

owning and operating a diverse platform of renewable energy projects, including solar, wind, hydro-electric and other clean power generation technologies, that provide long-term contracted cash flows from creditworthy counterparties;

creating a geographically diverse platform of renewable energy generation assets;

growing our project portfolio through the exercise of our call rights and the completion of third-party acquisitions;

capitalizing on the expected high growth in the worldwide clean power generation market;

creating an attractive investment opportunity for dividend growth-oriented investors; and

gaining access to a broad investor base with a more competitive source of equity capital that accelerates our long-term growth and acquisition strategy.

Table of Contents**Our initial portfolio and the Call Right Projects**

The following table provides an overview of the projects that we expect will comprise our initial portfolio. For more information about the projects included in our initial portfolio, see [Business](#) Our portfolio Our initial portfolio and the Call Right Projects.

Country	Net Capacity (MW) ⁽¹⁾	% of Total MW	# of Sites	Remaining Duration of PPA (Years) ⁽²⁾

(1) Net capacity represents the maximum, or rated, generating capacity at standard test conditions of a facility multiplied by our percentage of economic ownership of that facility as of the date of this prospectus. Generating capacity may vary based on a variety of factors discussed elsewhere in this prospectus. For projects referenced herein that have not yet achieved their COD, the figures reflect expected final capacity.

(2) Calculated as of December 31, 2014.

(3) Amounts may not sum due to rounding.

Table of Contents

The following charts provide an overview of our initial project portfolio by geography and technology:

The projects in our initial portfolio, as well as the Call Right Projects discussed below, were selected because they are located in our initial target markets and have or will have PPAs or other offtake arrangements with creditworthy counterparties that we believe will provide sustainable and predictable cash flows to fund the regular quarterly cash dividends that we intend to pay to holders of our Class A common stock. All the projects in our initial portfolio have already reached their COD, with the exception of Alto Cielo, El Naranjal, Del Litoral and Focal, each of which is expected to reach COD by the end of 2015. Our initial portfolio includes projects we expect to acquire in the Pending Acquisitions representing 570.5 MW that we expect to acquire concurrently with the completion of this offering. The closing of this offering is not conditioned on the consummation of the Pending Party Acquisitions. See [Risk Factors](#) [Risks related to our business](#) There can be no assurance that the Pending Acquisitions will be consummated on the terms or the timetable currently anticipated or at all, and the closing of this offering is not conditioned on the consummation of these acquisitions.

We will have the right to acquire the Call Right Projects set forth in the table below at prices to be determined by good faith negotiations between us and our Sponsor. The price for each of these Call Right Projects will be the fair market value of such project. The Support Agreement provides that we will work with our Sponsor to mutually agree on the fair market value, but if we are unable to, we and our Sponsor will engage a third-party advisor to determine the fair market value, after which we have the right (but not the obligation) to acquire such Call Right Project. Until the price for such Call Right Project is mutually agreed to by us and our Sponsor, should our Sponsor receive a bona fide offer for a Call Right Project from a third party, we will have the right to match any price offered by such third party and acquire such Call Right Project on the terms our Sponsor could obtain from the third party. After the price for a Call Right Project has been agreed upon and until the total aggregate Projected FTM CAFD commitment has been satisfied, our Sponsor may not market, offer or sell that Call Right Project to any third party without our consent. The Support Agreement will further provide that our Sponsor is required to offer us additional qualifying Call Right Projects from its pipeline on a quarterly basis until we have acquired projects under the Support Agreement that have the specified minimum amount of Projected FTM CAFD for each of the periods covered by the Support Agreement. We cannot assure you that we will be offered these Call Right Projects on terms that are favorable to us. See [Certain relationships and related party transactions](#) [Project Support Agreement](#) for additional information.

In addition, we have an agreement with Renova pursuant to which we have a right of first offer with respect to the Renova ROFO Projects.

Table of Contents

The following table provides an overview of our currently identified Call Right Projects and Renova ROFO Projects:

Country	Technology	Net Capacity (MW)(1)	% of Total MW	COD	# of Projects
<i>Operating</i>					
Brazil ⁽²⁾	Wind	386.0	13.8%	Q4 2014 - Q2 2015	2
	Hydro	148.0	5.3%	Q2 2008	1
Subtotal		534.0	19.1%		3
<i>Development</i>					
Brazil ⁽²⁾	Wind	1,336.0	47.9%	Q2 2015 - Q1 2019	11
	Solar	101.0	3.6%	Q2 2017	1
China	Solar	100.0	3.6%	Q3 2015 - Q4 2017	3
India	Solar	548.3	19.6%	Q3 2015 - Q2 2017	28
South Africa	Solar	172.5	6.2%	Q2 2016 - Q1 2017	6
Subtotal		2,257.8	80.9%		
Total		2,791.8	100.0%		49

(1) Net capacity represents the maximum, or rated, generating capacity at standard test conditions of a facility multiplied by our expected percentage of economic ownership of such facility as of the date of this prospectus. Generating capacity may vary based on a variety of factors discussed elsewhere in this prospectus.

(2) Represent the Renova ROFO Projects.

The following charts provide an overview of our currently identified Call Right Projects and Renova ROFO Projects by geography and technology:

Industry overview

We expect to benefit from continued high growth in clean energy demand across the utility, commercial and residential customer segments. We believe the solar and wind segments of the clean power generation industry are particularly attractive, as declining solar and wind electricity costs and increasing grid electricity prices are trending towards grid parity in emerging markets. We also believe the hydro-electric segment of the clean power generation industry represents an attractive market given its long-term contracts with creditworthy counterparties, significant installed base and prospective acquisition opportunities.

Solar energy benefits from highly predictable energy generation, the absence of fuel costs and proven technology. In addition, solar generating assets have the potential to be located at a customer's site, which

Table of Contents

reduces the customer's transmission and distribution costs. Finally, solar energy generation benefits from governmental, public and private support for the development of solar energy projects due to the environmentally friendly attributes of solar energy.

The increasing adoption of wind energy across the globe relative to other power generation technologies is expected to be driven by its increasing cost competitiveness, broad resource availability, well established technology, non-reliance on water and ancillary societal benefits, such as job creation and energy security.

Hydro-electric power generation is a well established clean energy technology. Its multiple methods of generation, such as conventional dam, pumped storage and run-of-river, have led to its diverse use in renewable power generation from large-scale (greater than or equal to 50 MW rated capacity) to small-scale (less than 50 MW rated capacity) facilities.

The following charts summarize anticipated growth in our initial target markets:

(rated capacity in megawatts)	2014 Actual	2017 Expected	Total solar energy generation capacity 2020 Expected	CAGR ⁽¹⁾
China	32,925	85,420	161,881	30%

(1) Represents compound annual growth rate from 2014 to 2020. Where 2020 data is unavailable, represents compound annual growth rate from 2014 to 2017.

Table of Contents**Cash available for distribution**

The table below summarizes our estimated cash available for distribution per share of Class A common stock for the twelve months ending June 30, 2016 and December 31, 2016 based on our forecasts included elsewhere in this prospectus:

(in thousands, except share, per share and project data)	Forecast for the twelve months ending	
	June 30, 2016	December 31, 2016 (unaudited)
Assumed operating MW at the beginning of the period	888.1	987.8
Cash available for distribution by Global LLC ⁽¹⁾	\$ 156,915	\$ 164,759
Cash available for distribution to holders of Class A shares ⁽¹⁾⁽²⁾	\$	\$
Class A shares at period end		
Cash available for distribution per Class A share ⁽¹⁾	\$	\$

(1) Cash available for distribution is not a measure of performance under U.S. generally accepted accounting principles, or GAAP. For a reconciliation of these forecasted metrics to their closest GAAP measure, see Cash dividend policy Estimate of future cash available for distribution elsewhere in this prospectus.

(2) Does not give effect to any reductions of distributions on the Class B units during the Distribution Forbearance Period.

We define cash available for distribution, or CAFD, as net cash provided by the operating activities of Global LLC as adjusted for certain other cash flow items that we associate with our operations. It is a non-GAAP measure of our ability to generate cash to service our dividends. As calculated in this prospectus, cash available for distribution represents net cash provided by (used in) operating activities of Global LLC: (i) plus or minus changes in assets and liabilities as reflected on our statements of cash flows, (ii) minus deposits into (or plus withdrawals from) restricted cash accounts required by project financing arrangements to the extent they decrease (or increase) cash provided by operating activities, (iii) minus cash distributions paid to non-controlling interests in our projects, if any, (iv) minus scheduled project-level and other debt service payments and repayments in accordance with the related borrowing arrangements, to the extent they are paid from operating cash flows during a period, (v) minus non-expansionary capital expenditures, if any, to the extent they are paid from operating cash flows during a period, (vi) plus cash contributions from our Sponsor pursuant to the Interest Payment Agreement (vii) plus operating costs and expenses paid by our Sponsor pursuant to the Management Services Agreement to the extent such costs or expenses exceed the fee payable by us pursuant to such agreement but otherwise reduce our net cash provided by operating activities and (viii) plus or minus operating items as necessary to present the cash flows we deem representative of our core business operations, with the approval of the audit committee. Our intention is to cause Global LLC to distribute a portion of the cash available for distribution generated by our project portfolio to its members each quarter, after appropriate reserves for our working capital needs and the prudent conduct of our business. For further discussion of cash available for distribution, including a reconciliation of net cash provided by (used in) operating activities to cash available for distribution and a discussion of its limitations, see footnote (2) under the heading Summary historical and pro forma financial data elsewhere in this prospectus.

Our business strategy

Our primary business strategy is to increase the cash dividends we pay to the holders of our Class A common stock over time. Our plan for executing this strategy includes the following:

Focus on long-term contracted clean power generation assets. All projects included in our initial portfolio, together with any Call Right Project that we acquire, will have a PPA with a creditworthy counterparty or be subject to a similar offtake arrangement such as a feed-in tariff program. We intend to focus on owning and operating long-term contracted clean power generation assets with proven technologies, low operating risks

Table of Contents

and stable cash flows consistent with our initial portfolio. We believe industry trends will support significant growth opportunities for long-term contracted power in the clean power generation segment as various emerging markets continue to rapidly grow their electricity usage and approach grid parity.

Grow our business through acquisitions of long-term contracted operating assets. We intend to acquire additional long-term contracted clean power generation assets from our Sponsor and unaffiliated third parties to increase our CAFD. The Support Agreement establishes: (i) a minimum commitment from our Sponsor to provide us with \$ million of CAFD by the end of 2017, which will be satisfied either through (x) the option to acquire the identified Call Right Projects, which currently represent an aggregate capacity of approximately MW, or (y) the option to acquire additional projects from our Sponsor's development pipeline that will in the future be designated as Call Right Projects; and (ii) a right of first offer on the SunEdison ROFO Projects. We also have a right of first offer with respect to the Renova ROFO Projects. In addition, given the strong growth trends in our initial target markets, we expect to have significant opportunities to acquire other clean power generation assets from third-party developers, independent power producers and financial investors. We believe our acquisition strategies, based on an extensive knowledge of the market, third-party relationships, operating expertise and access to capital, will enhance our ability to grow and generate CAFD and provide us with a competitive advantage in acquiring new assets.

Attractive, high-growth asset class. We intend to initially focus on the solar and wind energy segments, because we believe they are currently the fastest growing segments of the clean power generation industry globally and offer attractive opportunities to own assets and deploy long-term capital due to the predictability of their cash flows, and the hydro-electric energy segment because we believe its significant market size presents numerous investment opportunities. Also, we believe the solar, wind and hydro-electric energy segments are attractive because there is no associated fuel cost risk, their associated technologies have become highly reliable and, based on the experience of our Sponsor, require low operational and maintenance expenditures and a low level of interaction from managers as compared to conventional energy assets. Solar, wind and hydro-electric projects also have an expected life which can exceed 30 years. In addition, the projects in our initial portfolio generally operate under long-term PPAs with terms of up to 30 years.

Focus on emerging markets with favorable investment attributes. While our current focus is on solar, wind and hydro-electric energy generation assets in our initial target markets, we will selectively consider acquisitions of clean power generation assets in other geographies. We expect to pursue opportunities in other high-growth emerging markets that have characteristics similar to those of our initial target markets, with a focus on other markets located in Asia (except Japan), Africa, Latin America and Middle East. We believe there will be ample opportunities to acquire high-quality contracted clean power generation assets in high-growth emerging markets with these attributes.

Technology-neutral clean power platform. We intend to expand upon our Sponsor's technology-neutral platform. Our Sponsor's platform enables the development, acquisition, maintenance and operation of renewable energy generation assets across various renewable energy technologies, including solar, wind and hydro-electric. This technology-neutral platform enables our open architecture approach, which provides us with the ability to evaluate a broad range of development partnerships and acquisition opportunities and support the rapid growth of our portfolio.

Maintain sound financial practices. We intend to maintain our commitment to disciplined financial analysis and a balanced capital structure. Our financial practices will include: (i) a risk and credit policy focused on transacting with creditworthy counterparties, (ii) a financing policy focused on achieving an optimal capital structure through various capital formation alternatives to minimize interest rates, refinancing risks and tax withholdings, (iii) utilizing derivative financial instruments to minimize our net exposure to currency

Table of Contents

fluctuations and (iv) a dividend policy that is based on distributing the CAFD generated by our project portfolio (after deducting appropriate reserves for our working capital needs and the prudent conduct of our business). Our initial dividend was established based on our targeted payout ratio of approximately % of projected CAFD. See Cash dividend policy.

Our competitive strengths

We believe our key competitive strengths include:

Diversity. Our initial project portfolio is well diversified in terms of geography, market segment, counterparty, and types of renewable energy technology. We serve utility, commercial, industrial and governmental customers and may serve residential business lines in the future. We have projects located across eight countries and three continents. Projects located in any single country are not expected to represent a majority of our projected CAFD for the year ending December 31, 2015, thereby reducing our operating risk profile and reliance on any single market or segment. We utilize several renewable energy technologies, the production profiles of which complement one another, which we believe enables us to generate consistent cash flow. We believe our diverse customer base, geographic presence and technology improves our business development opportunities by enhancing our industry relationships, reputation and understanding of regional power market dynamics.

Portfolio growth opportunities. We believe we will be able to rapidly expand our initial project portfolio as a result of the significant project acquisition call rights that we have with our Sponsor and expect to have with third-party developers of clean power generation assets and our right of first offer with respect to the Renova ROFO Projects. We expect to have significant opportunities to expand our project portfolio through additional third-party acquisitions for the foreseeable future.

Stable, high-quality cash flows. Our initial portfolio of projects, together with the Call Right Projects that we acquire, will provide us with a stable, predictable cash flow profile. We sell the electricity generated by our projects under PPAs or similar offtake arrangements, such as feed-in tariff programs, with creditworthy counterparties. As of December 31, 2014, the weighted average (based on megawatts) remaining life of our PPAs was 19 years. All of our projects have highly predictable operating costs, in large part due to solar, wind and hydro-electric facilities having no fuel cost and utilizing reliable technology. We intend to utilize foreign exchange and foreign tax strategies in an effort to mitigate the impact of cross-border costs. Finally, based on our initial portfolio of projects, we do not expect to pay significant U.S. federal income taxes in the near term.

Relationship with SunEdison. We believe our relationship with our Sponsor provides us with significant benefits, including the following:

Strong asset development track record. Over the last three calendar years, our Sponsor has constructed solar power generation assets with an aggregate capacity of 2.0 GW and, as of December 31, 2014, was constructing additional solar power generation assets expected to have an aggregate capacity of approximately 467 MW. Our Sponsor has been one of the top three developers and installers of solar energy facilities in the world in each of the past two years based on megawatts installed. Our Sponsor has developed over 1,300 solar projects and has completed all of the projects on which it has commenced construction, including over 100 projects in our initial target markets. In addition, our Sponsor had a 5.1 GW pipeline of development stage solar projects as of December 31, 2014, including 1.3 GW in our initial and future target markets. As of the same date, our Sponsor employed 2,700 people globally, of which over 1,900 were serving as developers and operators of renewable energy projects. Our Sponsor's operating history demonstrates its

Table of Contents

organic project development capabilities in our initial target markets. We believe our Sponsor's relationships, knowledge and employees will facilitate our ability to rapidly acquire operating projects from our Sponsor in our initial target markets.

Yieldco experience. Our Sponsor's subsidiary, TerraForm Power, which owns and operates clean power assets located in the U.S. and other select jurisdictions, completed its initial public offering in July 2014. With our Sponsor's support, TerraForm Power has raised approximately \$3.9 billion in acquisition and permanent financing to pursue acquisitions of renewable energy projects totaling 1,703 MW as of May 1, 2015.

Proven acquisition expertise. In 2014, our Sponsor completed 32 corporate and project acquisitions worldwide, which included operating projects with an aggregate nameplate capacity of 1.5 GW. In addition, our Sponsor, through TerraForm Power, completed the acquisition on January 29, 2015 of First Wind's 500 MW of operating wind generation assets and 21 MW of operating solar generation assets and 1.66 GW of wind and solar generation assets under development. Our Sponsor has entered into seven separate acquisitions to acquire projects for our initial portfolio, expanding our geographic footprint and diversifying our renewable energy technologies. These acquisitions include LAP, which will provide our Sponsor with a hydro-electric development and operations and maintenance platform in Latin America, and Honiton, which will provide it with an operating and maintenance platform in China. We believe our Sponsor's significant acquisition experience and expertise will enable us to expand our portfolio through additional acquisitions of operating projects from unaffiliated third parties in our initial target markets.

Project financing experience. We believe our Sponsor has demonstrated a successful track record of sourcing long-term capital to fund project acquisitions and the development and construction of projects located in our initial target markets. Over the twelve months ended January 31, 2015, our Sponsor has raised over \$2.4 billion, including \$2.1 billion to finance acquisitions. We expect that we will realize significant benefits from our Sponsor's financing and structuring expertise as well as its relationships with financial institutions and other providers of capital.

Asset management expertise. We will have access to the significant resources of our Sponsor to support the high-growth strategy of our business. As of December 31, 2014, our Sponsor had over 3.7 GW of projects under management across 20 countries. Approximately 19.0% of these projects are third-party power generation facilities, demonstrating our Sponsor's collaboration with multiple solar developers and owners. These projects utilize 29 different module types, and inverters from 16 different manufacturers. As of December 31, 2014, our Sponsor had approximately 700 employees servicing operations and management in our initial target markets. In addition, our Sponsor maintains three renewable energy operation centers to service assets under management. Our Sponsor's asset management experience helps ensure that our facilities will be monitored and maintained to maximize cash generation. We also benefit from First Wind's asset management expertise as the First Wind team has been integrated with our Sponsor. To date, First Wind has constructed or acquired wind power generation assets with an aggregate nameplate capacity of approximately 1.0 GW and, as of December 31, 2014, was constructing additional wind power generation assets expected to have an aggregate nameplate capacity of approximately 500 MW.

Access to and experience in mature capital markets. As a publicly listed company in the United States, we will have access to a broad investor base with a competitive source of capital. We believe access to this market will accelerate our long-term growth and acquisition strategy and provide us with a competitive advantage over regional renewable energy developers in our target markets where we may be competing to acquire assets or development rights. We believe that both our Sponsor and TerraForm Power have benefited from their status as publicly listed companies in the United States. Our Sponsor and TerraForm Power have raised an aggregate of \$6.0 billion since January 1, 2014, providing them with the capital necessary to acquire projects and

Table of Contents

development platforms to grow TerraForm Power's portfolio of operational renewable energy projects in mature markets. In addition, we believe that a public listing in the United States will provide transparency to investors regarding our operations that will help us attract and retain capital.

Long-term contracted portfolio. We benefit from a portfolio of relatively newly constructed assets, with most of the projects in our initial portfolio having achieved COD within the past five years or expected to reach COD by the end of 2015. The PPAs for projects included in our initial portfolio have a weighted average remaining life of 19 years as of December 31, 2014. The projects in our initial portfolio and the Call Right Projects utilize proven and reliable technologies provided by leading equipment manufacturers and, as a result, we expect to achieve high project availability and predictable maintenance capital expenditures.

Experienced management team. Under the Management Services Agreement, our Sponsor has committed to provide us with a team of experienced professionals to serve as our executive officers and other key officers. We expect that certain of these professionals will provide such services to us on a dedicated basis. Our officers have considerable experience in developing, acquiring and operating clean power generation assets, with an average of over five years of experience in the sector. Mr. Domenech, our Chief Executive Officer, and his team have been successful in expanding TerraForm Power's project portfolio from 808 MW as of its initial public offering in July 2014 to 1,703 MW as of May 1, 2015, an increase of 111%. Our management team will also have access to the other significant management resources of our Sponsor to support the operational, financial, legal and regulatory aspects of our business.

Agreements with our Sponsor

We will enter into the agreements described below with our Sponsor immediately prior to the completion of this offering. For a more comprehensive discussion of these agreements, see [Certain relationships and related party transactions](#). For a discussion of the risks related to our relationship with our Sponsor, see [Risk factors](#) [Risks related to our relationship with our Sponsor](#). In addition, we will amend Global LLC's operating agreement to provide for Class A units, Class B units and Class B1 units and to convert our Sponsor's interest in Global's common equity into Global LLC Class B units and issue the IDRs to our Sponsor. As a result of holding Class B units and IDRs, subject to certain limitations during the Subordination Period and the Distribution Forbearance Period, our Sponsor will be entitled to share in distributions from Global LLC to its unit holders. See [Certain relationships and related party transactions](#) [Amended and Restated Operating Agreement of Global LLC](#).

Project Support Agreement. Pursuant to the Support Agreement, our Sponsor will provide us with the right, but not the obligation, to purchase for cash certain clean energy projects from its project pipeline with aggregate Projected FTM CAFD of at least \$ _____ million by the end of 2017. Specifically, the Support Agreement requires our Sponsor to offer us:

from the completion of this offering through the end of 2016, clean energy projects that have Projected FTM CAFD of at least \$ _____ million;
and

during calendar year 2017, clean energy projects that have Projected FTM CAFD of at least \$ _____ million.
If the amount of Projected FTM CAFD of the projects we acquire under the Support Agreement from the completion of this offering through the end of 2016 is less than \$ _____ million, or the amount of Projected FTM CAFD of the projects we acquire under the Support Agreement during 2017 is less than \$ _____ million, our Sponsor has agreed that it will continue to offer us sufficient Call Right Projects until the total aggregate Projected FTM CAFD commitment for such period has been satisfied. We have agreed to pay cash for each Call Right Project that we acquire, unless we and our Sponsor otherwise mutually agree. The Support Agreement provides that we will

Table of Contents

work with our Sponsor to mutually agree on the fair market value of each Call Right Project within a reasonable time after it is added to the list of identified Call Right Projects. If we are unable to agree on the fair market value, we and our Sponsor will engage a third-party advisor to determine the fair market value, after which we will have the right (but not the obligation) to acquire such Call Right Project. Until we provide our Sponsor with written notice of exercise of our right to purchase a Call Right Project, should our Sponsor receive a bona fide offer for a Call Right Project from a third party, our Sponsor must give us notice of such offer in reasonable detail and we will have the right to acquire such project on terms substantially similar to those our Sponsor could have obtained from such third party, but at a price no less than the price specified in the third-party offer. After the price for a Call Right Project has been agreed upon and until the total aggregate Projected FTM CAFD commitment has been satisfied, our Sponsor may not market, offer or sell that Call Right Project to any third party without our consent.

Call Right Projects are to be offered to us on a quarterly basis until we have acquired projects under the Support Agreement that have the specified minimum amount of Projected FTM CAFD for each of the periods covered by the Support Agreement. These Call Right Projects must satisfy certain criteria. In addition, our Sponsor may remove a project then under construction from the Call Right Project list if, in its reasonable discretion, the project is unlikely to be successfully completed. In that case, the Sponsor will be required to replace such project with one or more additional reasonably equivalent projects that have a similar economic profile. Generally, we may exercise our call right with respect to any pre-COD Call Right Project identified in the Support Agreement at any time until 30 days prior to COD for such project. With respect to Call Right Projects that have achieved COD, our call right may be exercised pursuant to _____ in accordance with the terms of the Support Agreement. If we exercise our option to purchase a project under the Support Agreement and reach a mutually agreed upon price, our Sponsor is required to sell us that project on such date as we may agree or, in the case of a project under construction, on or about the date of its COD.

In addition, our Sponsor has agreed to grant us a right of first offer on any of the SunEdison ROFO Projects that it determines to sell or otherwise transfer during the six-year period following the completion of this offering. Under the terms of the Support Agreement, our Sponsor will agree to negotiate with us in good faith, for a period of 20 days, to reach an agreement with respect to any proposed sale of a SunEdison ROFO Project for which we have exercised our right of first offer before it may sell or otherwise transfer such SunEdison ROFO Project to a third party. However, our Sponsor will not be obligated to sell any of the SunEdison ROFO Projects and, as a result, we do not know when, if ever, any SunEdison ROFO Projects will be offered to us. In addition, in the event that our Sponsor elects to sell SunEdison ROFO Projects, it will not be required to accept any offer we make and may choose to sell the assets to a third party or not sell the assets at all.

Under our related party transaction policy, the prior approval of our Corporate Governance and Conflicts Committee will be required for each material transaction with our Sponsor under the Support Agreement. See Conflicts of interest below.

Management Services Agreement. Pursuant to the Management Services Agreement, our Sponsor will provide, or arrange for the provision of, operational, management and administrative services to us and our subsidiaries, and we will pay our Sponsor a base management fee as follows: (i) % of Global LLC's CAFD in each of 2016, 2017 and 2018 (not to exceed \$ million in 2016, \$ million in 2017 or \$ million in 2018); and (ii) an amount equal to our Sponsor's actual cost for providing services pursuant to the terms of the Management Services Agreement in 2019 and thereafter. We and our Sponsor may agree to adjust the management fee as a result of a change in the scope of services provided under the Management Services Agreement, but no adjustment will be required solely as a result of our acquisition of Call Right Projects or other assets. The prior approval of our Corporate Governance and Conflicts Committee will be required for each material transaction with our Sponsor under the Management Services Agreement unless such transaction is expressly contemplated by the agreement.

Table of Contents

Repowering Services ROFR Agreement. Immediately prior to the completion of this offering, Global, Global LLC and Global Operating LLC, collectively, the Service Recipients, will enter into a Repowering Services ROFR Agreement with our Sponsor, pursuant to which our Sponsor will be granted a right of first refusal to provide certain services, including (i) repowering power generation projects and providing related services to analyze, design and replace or improve any of the power generation projects through the modification of the relevant energy system or the installation of new components, but excluding any maintenance, and (ii) such other services as may from time to time be reasonably requested by the Service Recipients related to any such repowerings, collectively, the Repowering Services.

Interest Payment Agreement. Immediately prior to the completion of this offering, Global LLC and Global Operating LLC will enter into an agreement with our Sponsor and SunEdison Holdings Corporation, pursuant to which our Sponsor will agree to pay all of the scheduled interest on our senior indebtedness until in an amount not to exceed \$ million, plus any interest due on any payment not remitted when due, or the Interest Payment Agreement. Our Sponsor will not be obligated to pay any amounts due under our senior indebtedness in connection with an acceleration of the payment of the principal amount of such indebtedness. Global LLC will be entitled to set off any amounts owing by SunEdison pursuant to the Interest Payment Agreement against any and all sums owed by Global LLC to SunEdison under the distribution provisions of the amended and restated operating agreement of Global LLC, and Global LLC may pay such amounts to Global Operating LLC.

Project contracts. Our contributed projects were or are being built pursuant to engineering, procurement and construction, or EPC, contracts, and we anticipate will be operated and maintained pursuant to operations and maintenance, or O&M, contracts with affiliates of our Sponsor. Under the EPC contracts, the relevant Sponsor affiliates provide liquidated damages to cover delays in project completion, as well as market standard warranties, including performance ratio guarantees, designed to ensure the expected level of electricity generation is achieved, for periods that range between two and five years after project completion depending on the relevant market. The O&M contracts with affiliates of our Sponsor provide for the performance of preventive and corrective maintenance services for fees as defined in such agreements. The applicable Sponsor affiliates also provide project availability guarantees of 98% including as to a majority of the solar projects that we own (on a megawatt basis), designed to ensure the expected level of power plant operation is achieved, and certain related liquidated damage obligations. See Management's discussion and analysis of financial condition and results of operations Key metrics Operating metrics Project availability for a description of project availability.

Conflicts of interest. While our relationship with our Sponsor and its subsidiaries is a significant strength, it is also a source of potential conflicts. As discussed above, our Sponsor and its affiliates will provide important services to us, including assisting with our day-to-day management and providing individuals who will serve as our executive officers and other key officers. Our management team, including our officers, will remain employed by and, in certain cases, will continue to serve as executive officers or other senior officers of SunEdison or its affiliates. For example, our Chief Executive Officer also serves as the Chief Executive Officer and Director of TerraForm Power. Following this offering, our officers will also generally continue to have economic interests in our Sponsor and, with respect to our Chief Executive Officer, in TerraForm Power. These same officers may help our board of directors and, in particular, our Corporate Governance and Conflicts Committee evaluate potential acquisition opportunities presented by our Sponsor under the Support Agreement. As a result of their employment by, and economic interest in, our Sponsor, our officers may be conflicted when advising our board of directors or Corporate Governance and Conflicts Committee or otherwise participating in the negotiation or approval of such transactions.

Table of Contents

Notwithstanding the significance of the services to be rendered by our Sponsor or its designated affiliates on our behalf in accordance with the terms of the Management Services Agreement or of the assets which we may elect to acquire from our Sponsor in accordance with the terms of the Support Agreement or otherwise, our Sponsor will not owe fiduciary duties to us or our stockholders and will have significant discretion in allocating acquisition opportunities (except with respect to the Call Right Projects and SunEdison ROFO Projects) to us or to itself or third parties. Under the Management Services Agreement, our Sponsor will not be prohibited from acquiring operating assets of the kind that we seek to acquire. See Risk factors Risks related to our relationship with our Sponsor.

Any material transaction between us and our Sponsor (including the proposed acquisition of any material Call Right Project or any material SunEdison ROFO Project pursuant to the Support Agreement) will be subject to our related party transaction policy, which will require prior approval of such transaction by our Corporate Governance and Conflicts Committee. That committee will be comprised of at least three directors, each of whom will satisfy the requirements for independence under applicable laws and regulations of the Securities and Exchange Commission, or the SEC, and the rules of the . See Risk factors Risks related to our relationship with our Sponsor, Certain relationships and related party transactions Procedures for review, approval and ratification of related-person transactions; conflicts of interest and Management Committees of the board of directors Corporate Governance and Conflicts Committee for a discussion of the risks associated with our organizational and ownership structure and corporate strategy for mitigating such risks.

Organizational Transactions

Formation Transactions

Equity Grants. TerraForm Global, Inc. is a Delaware corporation formed on September 12, 2014 by SunEdison to serve as the issuer of the Class A common stock offered hereby. Shortly thereafter, we granted certain employees of SunEdison who will perform services for us equity incentive awards under the TerraForm Global, Inc. 2014 Long-Term Incentive Plan, or the 2014 Incentive Plan, in the form of restricted shares of Global. See Executive officer compensation Equity incentive awards.

Contributed and Acquired Projects. Global LLC was formed by SunEdison in connection with this offering as a Delaware limited liability company that owns and operates through its subsidiaries a portfolio of contracted clean power generation assets acquired and to be acquired from SunEdison and unaffiliated third parties. Prior to the completion of this offering: (i) SunEdison and its subsidiaries will have contributed to subsidiaries of Global LLC the clean technology energy projects developed or acquired by SunEdison that are included in our initial portfolio, which we refer to as the Contributed Projects and (ii) subsidiaries of Global LLC will complete the following acquisitions:

Chint Transaction - the acquisition from an affiliate of Chint Solar (Zhejiang) Co., Ltd., of (i) the remaining 51% interest in the 23.1 MW solar project NSM 24 located in India and (ii) an additional 41.3% interest in the 16.8 MW solar project Witkop and 15.8 MW solar project Soutpan located in South Africa; and

Hercules Transaction - the acquisition of Honiton, which includes the 148.5 MW wind project located in China. We collectively refer to these acquisitions as the Acquired Projects. We will pay an aggregate of \$ million in cash for the Acquired Projects.

Table of Contents

Bridge Financing. On December 22, 2014, Global LLC entered into a new \$150.0 million term loan bridge facility, or the Bridge Facility, to provide funding for any acquisitions of clean technology energy projects developed by third parties that may be completed by Global LLC or its subsidiaries prior to the completion of this offering or to repay certain of the project-level indebtedness incurred by projects included in our initial portfolio. On May 6, 2015, the Bridge Facility was amended to increase the aggregate commitment to \$450.0 million, of which \$87.5 million was subsequently prepaid with a portion of the net proceeds from the Private Placements.

Private Placements. On May 6, 2015, we raised \$175.0 million from the sale to investment vehicles affiliated with the Blackstone Group, Everstream Opportunities Fund and Altai Capital Master Fund of 50,000, 100,000 and 25,000 of Class D units of Global LLC for a cash purchase price of \$50.0 million, \$100.0 million and \$25.0 million, respectively. We collectively refer to these purchases as the Private Placements. Concurrently with the closing of this offering, these purchasers will receive on account of such Class D units a number of shares of our Class A common stock equal to the quotient of (x) the original price of such Class D units and (y) 90% of the initial public offering price of Class A common stock. Based on an assumed initial public offering price of \$ per share, which is the midpoint of the range listed on the cover of this prospectus, these purchasers will receive an aggregate of shares of our Class A common stock on account of their Class D units purchased in the Private Placements. Global will receive the same number of newly issued Class A units of Global LLC in connection with the issuance of its Class A common stock on account of the Class D units. Global LLC used the net proceeds from the sale of the Class D units to reduce its borrowings under the Bridge Facility, to complete the acquisitions of projects from third parties and to reduce certain project-level indebtedness. For a further discussion of the Private Placements, see Certain Relationships and Related Party Transactions Private Placements.

We collectively refer to all of the foregoing transactions as the Formation Transactions.

Pending Acquisitions

Concurrently with the completion of this offering, we intend to complete the following acquisitions from third parties:

Solarpack Transaction - the acquisition from Solarpack Corporación Tecnológica, S.L., a Spanish solar developer, or Solarpack, of the 26.4 MW solar project Alto Cielo located in Uruguay;

BioTherm Transaction - the acquisition from BTSA Netherlands Cooperatie U.A., a South African renewable energy project developer, or BioTherm, of the solar projects Aries and Koonkoonies and the wind project Klipheuwel located in South Africa, representing 34.0 MW in the aggregate;

FERSA Transaction - the acquisition from Fersa Energías Renovables, a Spanish wind energy developer, of the wind projects Bhakrani, Gadag and Hanumanhatti located in India, representing 101.6 MW in the aggregate;

Renova Transaction - the acquisition from Renova of three wind and hydro-electric projects located in Brazil, representing 336.0 MW in the aggregate and a right of first offer with respect to the Renova ROFO Projects; and

LAP Transaction - the acquisition of Latin America Power, which includes six hydro-electric projects located in Peru, representing 72.5 MW in the aggregate.

We collectively refer to these acquisitions as the Pending Acquisitions and, together with the Acquired Projects, the Acquisitions. We expect to pay aggregate consideration of \$ million in cash and, additionally with respect to the Renova Transaction and the BioTherm Transaction, shares with a value

Table of Contents

of \$320.0 million and _____ shares with a value of \$7.7 million of Class A common stock, in each case assuming an initial public offering price of \$ _____ per share, which is the midpoint of the price range listed on the cover of this prospectus.

We anticipate that all of the Pending Acquisitions will be completed concurrently with the completion of this offering. This offering, however, is not conditioned on the concurrent closing of all of the Pending Acquisitions. As of the date of this prospectus, we have not yet received all of the governmental, regulatory or third-party approvals or consents required to complete the _____, and the timing for those approvals are outside of our control. As a result, we cannot assure you that all of the Pending Acquisitions will be consummated on the terms or timetable currently contemplated or at all. Our Sponsor has agreed to forego distributions under certain circumstances to, among other things, reduce the effect on the Class A units of delays (if any) in completion of the Pending Acquisitions. See _____ The offering Distribution Forbearance Provisions and _____ Risk factors Risks related to our business There can be no assurance that the Pending Acquisitions will be consummated on the terms or timetable currently anticipated or at all, and the closing of this offering is not expressly conditioned on the consummation of the these acquisitions.

Offering Transactions

Concurrently with the completion of this offering, based on an assumed initial public offering price of \$ _____ per share, which is the midpoint of the range listed on the cover page of this prospectus:

we will amend and restate Global's certificate of incorporation to provide for Class A common stock, Class B common stock and Class B1 common stock (which Class B1 common stock may be issued in the future upon a reset of IDR target distribution levels or in connection with acquisitions from our Sponsor or third parties), at which time SunEdison's interest in Global's common equity will solely be shares of Class B common stock and interests in Global LLC (as described below) and the restricted shares issued under the 2014 Incentive Plan will automatically convert into a number of shares of Class A common stock that represent an aggregate _____% economic interest in Global LLC, subject to certain adjustments to prevent dilution;

we will amend Global LLC's operating agreement to provide for Class A units, Class B units and Class B1 units (which Class B1 units may be issued in the future upon a reset of IDR target distribution levels or in connection with acquisitions from our Sponsor or third parties) and to convert our Sponsor's interest in Global's common equity into Class B units, issue to Global a number of Class A units equal to the number of shares of Class A common stock (including any restricted shares) outstanding immediately after Global amends and restates its certificate of incorporation as described above, issue the IDRs to our Sponsor and appoint Global as the sole managing member of Global LLC;

Global will issue _____ shares of its Class A common stock on account of the Class D units of Global LLC issued to the purchasers in the Private Placements and will receive the same number of newly issued Class A units in Global LLC;

Global will issue _____ shares of its Class A common stock to the purchasers in this offering (or _____ shares if the underwriters exercise in full their option to purchase additional shares of Class A common stock) in exchange for net proceeds of approximately \$ _____ million (or approximately \$ _____ million if the underwriters exercise in full their option to purchase additional shares of Class A common stock), after deducting underwriting discounts and commissions, the structuring fee and offering expenses payable by us;

Global will use all of the net proceeds from this offering to purchase newly issued Class A units of Global LLC, representing _____% of Global LLC's outstanding membership units (or _____% if the underwriters exercise in full their option to purchase additional shares of Class A common stock);

Table of Contents

Global LLC will use such proceeds to repay the outstanding principal amount of the Bridge Facility (including accrued interest), to pay fees and expenses associated with the Revolver (as defined below), to complete the Pending Acquisitions and for general corporate purpose, which may include future acquisitions of clean energy assets from our Sponsor pursuant to the Support Agreement or from third parties;

Global will issue _____ shares and _____ shares of Class A common stock to Renova Energia S.A. and BioTherm's affiliate, which is a leading global energy investment fund, the selling parties in the Renova Transaction and BioTherm Transaction, respectively, based on an initial public offering price of \$ _____ per share, which is the midpoint of the price range listed on the cover of this prospectus;

Global Operating LLC will enter into a new \$ _____ million revolving credit facility, or the Revolver, which will remain undrawn at the completion of this offering; and

Global will enter into various agreements with our Sponsor, including the Support Agreement, the Management Services Agreement, the Repowering Services ROFR Agreement and the Interest Payment Agreement. We collectively refer to the foregoing transactions as the Offering Transactions and, together with the Formation Transactions and the Pending Acquisitions, as the Organizational Transactions.

We intend to use any net proceeds we receive as a result of the underwriters' option to purchase additional shares of Class A common stock, which we estimate will be approximately \$ _____ million after deducting underwriting discounts and commissions, a pro rata portion of the structuring fee and offering expenses payable by us, to purchase Class B units (and shares of Class B common stock) held by our Sponsor at a price equal to the initial public offering price in this offering less the underwriting discounts and commissions and structuring fee, and immediately cancel such Class B units (and shares of Class B common stock) contemporaneously with Global LLC issuing Class A units to us. Accordingly, we will not retain any such proceeds used by us to acquire Class B units (and shares of Class B common stock) from our Sponsor.

Our Sponsor will not receive any of the net proceeds or other consideration in connection with this offering, other than (i) the net proceeds used by us to purchase Class B units of Global LLC (and the related shares of Class B common stock) in the event the underwriters exercise their option to purchase additional shares and (ii) the Class B common stock, Class B units of Global LLC and the IDRs issued to it in the Offering Transactions on account of its existing ownership interest. Following completion of this offering, we may elect to use a portion of the net proceeds to fund acquisitions from our Sponsor, including pursuant to the Support Agreement.

Immediately following the completion of this offering:

Global will be a holding company and the sole material asset of Global will be the Class A units of Global LLC;

Global will be the sole managing member of Global LLC and will control the business and affairs of Global LLC and its subsidiaries;

Global will hold _____ Class A units of Global LLC representing approximately _____ % of Global LLC's total outstanding membership units (or _____ %, if the underwriters exercise in full their option to purchase additional shares of Class A common stock);

SunEdison, through a wholly owned subsidiary, will own Class B units of Global LLC, representing approximately _____ % of Global LLC's total outstanding membership units (or _____ %, if the underwriters exercise in full their option to purchase additional shares of Class A common stock);

Table of Contents

SunEdison or one of its wholly owned subsidiaries will be the holder of the IDRs;

SunEdison, through the ownership by a wholly owned subsidiary of our Class B common stock, will have % of the combined voting power of all of our common stock and, through such subsidiary's ownership of Class B units of Global LLC, will hold, subject to the right of holders of IDRs to receive a portion of distributions after certain thresholds are met and certain limitations during the Subordination Period and the Distribution Forbearance Period, approximately % of the economic interest in our business (or % of the combined voting power of our common stock and a % economic interest in our business if the underwriters exercise in full their option to purchase additional shares of Class A common stock);

the purchasers in this offering will own shares of our Class A common stock, representing % of the combined voting power of all of our common stock and, through our ownership of Class A units of Global LLC, subject to the right of holders of IDRs to receive a portion of distributions after certain thresholds are met, approximately % of the economic interest in our business (or % of the combined voting power of our common stock and a % economic interest if the underwriters exercise in full their option to purchase additional shares of Class A common stock).

SunEdison (or any other permitted holder) may exchange its Class B units or Class B1 units in Global LLC, together with a corresponding number of shares of Class B common stock or shares of Class B1 common stock, as applicable, for shares of our Class A common stock on a one-for-one basis, subject to equitable adjustments for stock splits, stock dividends and reclassifications in accordance with the terms of the exchange agreement we will enter into with SunEdison concurrently with the completion of this offering. When a holder exchanges a Class B unit or Class B1 unit of Global LLC for a share of our Class A common stock, (i) Global LLC will cancel the Class B units or Class B1 units, as applicable, (ii) Global LLC will issue additional Class A units to us, (iii) we will cancel a corresponding number of shares of our Class B common stock or Class B1 common stock, as applicable, and (iv) we will issue a corresponding number of shares of Class A common stock to such holder. See Certain relationships and related party transactions Amended and Restated Operating Agreement of Global LLC Exchange Agreement.

We have established the Class B1 common stock and Class B1 units primarily to be issued in connection with resetting the IDR target distribution levels. We may issue such shares and units in the future in connection with acquisitions from our Sponsor or third parties.

Table of Contents

The following chart summarizes certain relevant aspects of our ownership structure and principal indebtedness as of December 31, 2014, after giving effect to the Organizational Transactions and this offering, based on the assumptions set forth in The offering Certain assumptions :

(Notes continued on following page)

Table of Contents

- (1) Our Sponsor’s economic interest is subject to certain limitations on distributions to holders of Class B units during the Subordination Period and the Distribution Forbearance Period. See Certain relationships and related party transactions Amended and Restated Operating Agreement of Global LLC Distributions. In the future, our Sponsor may receive Class B1 units and Class B1 common stock in connection with a reset of the IDR target distribution levels or sales of projects to Global LLC.
- (2) The economic interest of holders of Class A units, Class B units and Class B1 units, and, in turn, holders of shares of Class A common stock, is subject to the right of holders of the IDRs to receive a portion of distributions after certain distribution thresholds are met. See The offering IDRs and Certain relationships and related party transactions Amended and Restated Operating Agreement of Global LLC Distributions.
- (3) Incentive distribution rights, or IDRs, represent a variable interest in distributions by Global LLC and therefore cannot be expressed as a fixed percentage interest. All of our IDRs will be issued to SunEdison Holdings Corporation, which is a wholly owned subsidiary of our Sponsor. In connection with a reset of the target distribution levels, holders of IDRs will be entitled to receive newly issued Class B1 units of Global LLC and shares of our Class B1 common stock. See Certain relationships and related party transactions Amended and Restated Operating Agreement of Global LLC Distributions for further description of the IDRs and Description of capital stock Class B1 common stock for further description of the Class B1 common stock.
- (4) Based on an assumed initial public offering price of \$ per share, which is the midpoint of the range listed on the cover of this prospectus, Global will issue shares and shares of its Class A common stock to Renova and BioTherm, respectively, representing in the aggregate % of the issued and outstanding shares of its common stock in connection with the Renova Transaction and BioTherm Transaction.
- (5) Concurrently with the completion of this offering, Global Operating LLC plans to enter into the Revolver, which will provide for a revolving line of credit of \$ million. The closing of the Revolver will be conditioned upon completion of this offering, the implementation of our Organizational Transactions and other customary closing conditions.
- (6) All of our project-level indebtedness is denominated in either U.S. Dollars, Indian Rupee, Malaysian Ringgit, South African Rand, Thai Baht, Brazilian Real or Chinese Yuan Renminbi. We converted such indebtedness into U.S. dollars using the applicable conversion rate as of December 31, 2014. For additional information regarding our project-level indebtedness, see Description of certain indebtedness Project-level financing arrangements.

Material United States tax consequences

If we make a distribution from current or accumulated earnings and profits, as computed for United States federal income tax purposes, such distribution will generally be taxable to holders of our Class A common stock in the current period as ordinary income for United States federal income tax purposes, eligible under current law for the lower tax rates applicable to qualified dividend income of non-corporate taxpayers. If a distribution exceeds our current and accumulated earnings and profits as computed for United States federal income tax purposes, such excess distribution will constitute a non-taxable return of capital to the extent of a holder’s United States federal income tax basis in our Class A common stock and will result in a reduction of such basis. The portion of any such excess distribution that exceeds a holder’s basis in our Class A common stock will be taxed as capital gain. While we expect that a portion of our distributions to holders of our Class A common stock may exceed our current and accumulated earnings and profits as computed for United States federal income tax purposes and therefore constitute a non-taxable return of capital to the extent of a holder’s basis in our Class A common stock, no assurance can be given that this will occur. See Risk factors Risks related to taxation Distributions to holders of our Class A common stock may be taxable as dividends. Upon the sale of our Class A common stock, the holder generally will recognize capital gain or loss measured by the difference between the sale proceeds received by the holder and the holder’s basis in the Class A common stock sold, adjusted to reflect prior distributions that were treated as return of capital. Based on our current portfolio of assets and their depreciation schedule, we expect to generate net operating losses, or NOLs, and NOL carryforwards that we can utilize to offset all but an insignificant portion of our future taxable income. See Risk factors Risks related to taxation Our ability to use NOLs to offset future income may be limited. As such, we do not anticipate paying significant United States federal income taxes for at least the next several years. However, the availability of the NOLs and NOL carryforwards could be reduced or limited either by the United States Internal Revenue Service, or IRS, (pursuant to a successful challenge in a tax audit or otherwise) or as a result of an ownership change or a change in law. Any such reduction or limitation may result in a material increase in our estimated future tax liability and may negatively impact our business, financial condition and operating results. See Risk Factors Risks related to taxation Our future tax liability may be greater than expected if we do not generate NOLs sufficient to offset taxable income. If you are a non-U.S. investor, please read Material United States federal

Table of Contents

income tax consequences to non-U.S. holders for a more complete discussion of the expected material United States federal income tax consequences of owning and disposing of shares of our Class A common stock.

Certain risk factors

We are subject to a number of risks, including risks that may prevent us from achieving our business objectives or may materially and adversely affect our business, financial condition, results of operations, cash flows and prospects. You should carefully consider these risks, including the risks discussed in the section entitled Risk factors, before investing in our Class A common stock.

Risks related to our business include, among others:

counterparties to our PPAs may not fulfill their obligations, which could result in a material adverse impact on our business, financial condition, results of operations and cash flows;

we may enter into PPAs for certain projects that will be subject to periodic price adjustments or require renegotiation of price terms over time, and if the price terms under these PPAs fall below the initial price terms, our business, financial condition, results of operations and cash flows may be materially and adversely affected;

there can be no assurance that the Pending Acquisitions will be consummated on the terms or timetable currently anticipated or at all, and the closing of this offering is not conditioned on the consummation of these acquisitions;

certain of the PPAs for the projects in our initial portfolio and those for projects that we may acquire in the future contain, or will contain, provisions that allow the offtake purchaser to terminate or buy out the project or require us to pay liquidated damages upon the occurrence of certain events, and if these provisions are exercised our cash available for distribution could materially decline; and

the growth of our business depends on locating and acquiring interests in additional, attractive clean energy projects in emerging markets from our Sponsor and unaffiliated third parties at favorable prices.

Risks related to our international operations include, among others:

we operate in emerging markets and may expand our operations into countries where we currently have no presence, which subjects us to economic, social and political risks and uncertainties;

changes in foreign withholding taxes could adversely affect our results of operations; and

we are exposed to foreign currency exchange risks because all of our projects are located in foreign countries.

Risks related to our relationship with our Sponsor include, among others:

our Sponsor will be our controlling stockholder and will exercise substantial influence over Global, and we are highly dependent on our Sponsor;

we may not be able to consummate future acquisitions from our Sponsor; and

Table of Contents

our organizational and ownership structure may create significant conflicts of interest that may be resolved in a manner that is not in our best interests or the best interests of holders of our Class A common stock and that may have a material adverse effect on our business, financial condition, results of operations and cash flows.

Risks related to an investment in the Class A common stock offered in this offering include, among others:

we may not be able to continue paying comparable or growing cash dividends to holders of our Class A common stock in the future;

the assumptions underlying the forecasts presented elsewhere in this prospectus are inherently uncertain and subject to significant business, economic, financial, regulatory and competitive risks that could cause our actual cash available for distribution to differ materially from our forecasts;

we are a holding company and our only material asset after completion of this offering will be our interest in Global LLC, and we are accordingly dependent upon distributions from Global LLC and its subsidiaries to pay dividends and taxes and other expenses;

we are a controlled company, controlled by our Sponsor, whose interest in our business may be different from ours or yours;

the holder or holders of our IDRs may elect to cause Global LLC to issue Class B1 units in connection with a resetting of target distribution levels, which could result in lower distributions to holders of our Class A common stock; and

we are an emerging growth company and have elected in this prospectus, and may elect in future SEC filings, to comply with reduced public company reporting requirements, which could make our Class A common stock less attractive to investors.

Corporate information

Our principal executive offices are located at 7550 Wisconsin Avenue, 9th Floor, Bethesda, Maryland 20814. Our telephone number is (240) 762-7700. Our website is www.terraformglobal.com. Information contained on our website is not incorporated by reference into the prospectus and does not constitute part of this prospectus.

JOBS Act

As a company with less than \$1.0 billion in revenue during our last fiscal year, we qualify as an emerging growth company, as defined in the Jumpstart Our Business Startups Act of 2012, or the JOBS Act. Section 107 of the JOBS Act provides that an emerging growth company can take advantage of the extended transition period provided in Section 7(a)(2)(B) of the Securities Act of 1933, as amended, or the Securities Act, for complying with new or revised accounting standards. Thus, an emerging growth company can delay the adoption of certain accounting standards until those standards would otherwise apply to private companies.

An emerging growth company may also take advantage of reduced reporting requirements that are otherwise applicable to public companies. These provisions include, but are not limited to:

being permitted to present only two years of audited financial statements and only two years of related Management's discussion and analysis of financial condition and results of operations in this prospectus;

Table of Contents

not being required to comply with the auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act of 2002, as amended, or the Sarbanes-Oxley Act ;

reduced disclosure obligations regarding executive compensation in our periodic reports, proxy statements and registration statements; and

exemptions from the requirements of holding a nonbinding advisory vote on executive compensation and stockholder approval of any golden parachute payments not previously approved.

We may take advantage of these provisions until the last day of our fiscal year following the fifth anniversary of the date of the first sale of our common equity securities pursuant to an effective registration statement under the Securities Act, which such fifth anniversary will occur in 2020. However, if certain events occur prior to the end of such five-year period, including if we become a large accelerated filer, our annual gross revenues exceed \$1.0 billion or we issue more than \$1.0 billion of non-convertible debt in any three-year period, we will cease to be an emerging growth company prior to the end of such five-year period.

We have elected to take advantage of certain of the reduced disclosure obligations regarding financial statements and executive compensation in this prospectus and may elect to take advantage of other reduced burdens in future filings. As a result, the information that we provide to our stockholders may be different than you might receive from other public reporting companies in which you hold equity interests.

In addition, Section 107(b) of the JOBS Act also provides that an emerging growth company can take advantage of the extended transition period provided in Section 7(a)(2)(B) of the Securities Act for complying with new or revised accounting standards. In other words, an emerging growth company can delay the adoption of certain accounting standards until those standards would otherwise apply to private companies. We are choosing to opt in to such extended transition period election under Section 107(b). Therefore, we are electing to delay adoption of new or revised accounting standards and, as a result, we may choose not to comply with new or revised accounting standards on the relevant dates on which adoption of such standards is required for non-emerging growth companies. As a result of such election, our financial statements may not be comparable to the financial statements of other public companies.

Table of Contents

The offering

Shares of Class A common stock offered by us shares of our Class A common stock.

Option to purchase additional shares of our Class A common stock We have granted the underwriters an option to purchase up to additional shares of our Class A common stock, at the initial public offering price, less the underwriting discounts and commissions and structuring fee, within 30 days of the date of this prospectus. We intend to use the net proceeds from the exercise of such option, if any, to purchase Class B units (and shares of Class B common stock) from our Sponsor, which would be immediately cancelled in connection with our receiving a corresponding number of Class A units from Global LLC.

Shares of Class A common stock outstanding after this offering shares of our Class A common stock (or shares, if the underwriters exercise in full their option to purchase additional shares of Class A common stock).

Shares of Class B common stock outstanding after this offering shares of our Class B common stock (or shares, if the underwriters exercise in full their option to purchase additional shares of Class A common stock), all of which will be beneficially owned by our Sponsor.

Class A units and Class B units of Global LLC outstanding after this offering Class A units and Class B units of Global LLC (or Class A units and Class B units of Global LLC if the underwriters exercise in full their option to purchase additional shares of Class A common stock).

Shares of Class B1 common stock and Class B1 units outstanding after this offering None.

We have established the Class B1 common stock and Class B1 units primarily to be issued in connection with resetting the IDR target distribution levels. We may issue such shares and units in the future in connection with acquisitions from our Sponsor or third parties.

Use of proceeds Assuming no exercise of the underwriters' option to purchase additional shares of Class A common stock, we estimate that the net proceeds to us from this offering will be approximately \$ million after deducting underwriting discounts and commissions, the structuring fee and offering expenses payable by us.

Table of Contents

We intend to use the net proceeds from this offering to acquire newly issued Class A units of Global LLC directly from Global LLC, representing % of Global LLC's outstanding membership units after this offering (calculated without regard to the IDRs) assuming the underwriters do not exercise their option to purchase additional shares, or % if the underwriters exercise that option to purchase additional shares. Global will not retain any net proceeds from this offering.

In connection with this offering, Global LLC will use \$ million to repay all outstanding indebtedness (including accrued interest) under the Bridge Facility and pay fees and expenses related to the Revolver and \$ million to fund the Pending Acquisitions included in our initial portfolio. Any proceeds remaining after the foregoing will be used for general corporate purposes, which may include future acquisitions of clean energy assets from SunEdison pursuant to the Support Agreement or from unaffiliated third parties. As of the date of this prospectus, we have not identified any other specific potential future acquisitions other than projects under the Support Agreement or as discussed elsewhere in this prospectus.

If the underwriters exercise in full their option to purchase additional shares of Class A common stock, we estimate that the additional net proceeds will be approximately \$ million after deducting underwriting discounts and commissions, a pro rata portion of the structuring fee and offering expenses payable by us. We will use any such additional net proceeds to purchase Class B units of Global LLC (and shares of our Class B common stock) from our Sponsor at a price equal to the initial public offering price in this offering less the underwriting discounts and commissions and structuring fee, following which those Class B units (and the related shares of Class B common stock) would be immediately cancelled in connection with our receiving a corresponding number of Class A units from Global LLC.

Our Sponsor will not receive any of the net proceeds or other consideration in connection with this offering, other than: (i) the net proceeds used by us to purchase Class B units of Global LLC (and the related shares of Class B common stock) in the event the underwriters exercise their option to purchase additional shares of Class A common stock and (ii) the Class B common stock, Class B units of Global LLC and the IDRs issued to it in the Offering Transactions on account of its existing ownership interest. Following completion of this offering, we may elect to use a portion of the net proceeds to fund acquisitions from our Sponsor, including pursuant to the Support Agreement.

Voting rights

Each share of our Class A common stock and Class B1 common stock will entitle its holder to one vote on all matters to be voted on by stockholders generally.

All of our Class B common stock will be held by our Sponsor or its controlled affiliates. Each share of our Class B common stock will entitle our Sponsor to votes on matters presented to our stockholders generally. Our Sponsor, as the holder of our Class B common stock, will control a majority of

Table of Contents

the vote on all matters submitted to a vote of stockholders for the foreseeable future following the completion of this offering. Any Class B units of Global LLC transferred by our Sponsor (other than to its controlled affiliates) will be automatically exchanged (along with a corresponding number of shares of Class B common stock) into shares of our Class A common stock in connection with such transfer. See

Certain relationships and related party transactions Amended and Restated Operating Agreement of Global LLC Issuances and transfer of units and Certain relationships and related party transactions Amended and Restated Operating Agreement of Global LLC Exchange Agreement.

Holders of our Class A common stock, Class B common stock and Class B1 common stock will vote together as a single class on all matters presented to stockholders for their vote or approval, except as otherwise required by law. See Description of capital stock.

Economic interest

Immediately following this offering, subject to the right of holders of IDRs to receive a portion of distributions after certain thresholds are met, the purchasers in this offering will own in the aggregate a % economic interest in our business through our ownership of Class A units of Global LLC, our Sponsor will own a % economic interest in our business through its ownership of Class B units of Global LLC (or a % economic interest and a % economic interest, respectively, if the underwriters exercise in full their option to purchase additional shares of our Class A common stock). See IDRs and Certain relationships and related party transactions Amended and Restated Operating Agreement of Global LLC Distributions.

Our Sponsor's economic interest in our business, through its ownership of Class B units of Global LLC, is subject to the limitations on distributions to holders of Class B units of Global LLC during the Subordination Period and the Distribution Forbearance Period.

Exchange and registration rights

Each Class B unit and each Class B1 unit of Global LLC, together with a corresponding number of shares of Class B common stock or Class B1 common stock, as applicable, will be exchangeable for a share of our Class A common stock at any time, subject to equitable adjustments for stock splits, stock dividends and reclassifications, in accordance with the terms of the exchange agreement we will enter into with our Sponsor concurrently with the completion of this offering. Our Sponsor (or any other permitted holder) may exchange its Class B units or Class B1 units in Global LLC, together with a corresponding number of shares of Class B common stock or shares of Class B1 common stock, as applicable, for shares of our Class A common stock on a one-for-one basis, subject to equitable adjustments for stock splits, stock dividends and reclassifications, in accordance with the terms of the exchange agreement we will enter into with our Sponsor concurrently with the completion of this offering. When a holder exchanges a Class B unit or Class B1 unit of Global LLC

Table of Contents

for a share of our Class A common stock, (i) such holder will surrender such Class B unit or Class B1 unit, as applicable, and a corresponding share of our Class B common stock or Class B1 common stock, as applicable, to Global LLC, (ii) we will issue and contribute a share of Class A common stock to Global LLC for delivery of such share by Global LLC to the exchanging holder, (iii) Global LLC will issue a Class A unit to us, (iv) Global LLC will cancel the Class B unit or Class B1 unit, as applicable, and we will cancel the corresponding share of our Class B common stock or Class B1 common stock, as applicable, and (v) Global LLC will deliver the share of Class A common stock it receives to the exchanging holder. See Certain relationships and related party transactions Amended and Restated Operating Agreement of Global LLC Exchange Agreement.

Pursuant to the registration rights agreement that we will enter into with our Sponsor concurrently with the completion of this offering, we will agree to file a registration statement for the sale of the shares of our Class A common stock that are issuable upon exchange of Class B units or Class B1 units of Global LLC upon request and cause that registration statement to be declared effective by the SEC as soon as practicable thereafter. See Certain relationships and related party transactions Registration Rights Agreement for a description of the timing and manner limitations on resales of these shares of our Class A common stock.

Cash dividends:

Class A common stock

Upon completion of this offering, we intend to pay a regular quarterly dividend to holders of our Class A common stock. Our initial quarterly dividend will be set at \$ per share of Class A common stock (\$ per share on an annualized basis), which amount may be changed in the future without advance notice. Our ability to pay the regular quarterly dividend is subject to various restrictions and other factors described in more detail under the caption Cash Dividend Policy.

We expect to pay a quarterly dividend on or about the 75th day following the expiration of each fiscal quarter to holders of our Class A common stock of record on or about the 60th day following the last day of such fiscal quarter. With respect to our first dividend payable on , 2015, we intend to pay a pro-rated dividend (calculated from the completion date of this offering through and including , 2015) of \$ per share of Class A common stock.

We believe, based on our financial forecast and related assumptions included in Cash dividend policy Estimated cash available for distribution for the twelve months ending June 30, 2016 and December 31, 2016 and our acquisition strategy, that we will generate sufficient cash available for distribution to support our Minimum Quarterly Distribution of \$ per share of Class A common stock (\$ per share on an annualized basis). However, we do not have a legal obligation to declare or pay dividends at such initial quarterly dividend level or at all. See Cash dividend policy.

Table of Contents

Class B common stock Holders of our Class B common stock will not have any right to receive cash dividends. See Description of capital stock Class B common stock Dividend and liquidation rights. However, holders of our Class B common stock will also hold Class B units issued by Global LLC. As a result of holding the Class B units, subject to certain limitations during the Subordination Period and the Distribution Forbearance Period, our Sponsor will be entitled to share in distributions from Global LLC to its unit holders (including distributions to us as the holder of the Class A units of Global LLC). See Certain relationships and related party transactions Amended and Restated Operating Agreement of Global LLC Distributions.

Class B1 common stock Holders of our Class B1 common stock will not have any right to receive cash dividends. See Description of capital stock Class B1 common stock Dividend and liquidation rights. However, holders of our Class B1 common stock will also hold Class B1 units issued by Global LLC. As a result of holding Class B1 units, such holders will be entitled to share in distributions from Global LLC to its unit holders (including distributions to us as the holder of the Class A units of Global LLC) pro rata based on the number of units held. See Certain relationships and related party transactions Amended and Restated Operating Agreement of Global LLC Distributions.

IDRs The IDRs represent the right to receive increasing percentages (% , % and %) of Global LLC s quarterly distributions after the Class A units, Class B units and Class B1 units of Global LLC have received quarterly distributions in an amount equal to \$ per unit, or the Minimum Quarterly Distribution, and the target distribution levels have been achieved. Our Sponsor may not sell, transfer, exchange, pledge (other than as collateral under its credit facilities) or otherwise dispose of the IDRs to any third party (other than its controlled affiliates) until after it has satisfied its \$ million aggregate Projected FTM CAFD commitment to us in accordance with the Support Agreement (after which the IDRs will be transferable without restriction). Our Sponsor will pledge the IDRs as collateral under its existing credit agreement, but the IDRs may not be transferred upon foreclosure until after our Sponsor has satisfied its Projected FTM CAFD commitment to us. Our Sponsor has granted us a right of first refusal with respect to any proposed sale of IDRs to a third party (other than its controlled affiliates), which we may exercise to purchase the IDRs proposed to be sold on the same terms offered to such third party at any time within 30 days after we receive written notice of the proposed sale and its terms.

If for any quarter:

Global LLC has made cash distributions to the holders of its Class A units, Class B1 units and, subject to the Subordination Period and the Distribution Forbearance Provisions, Class B units in an amount equal to the Minimum Quarterly Distribution; and

Global LLC has distributed cash to the holders of its Class A units and Class B1 units in an amount necessary to eliminate any arrearages in payment of the Minimum Quarterly Distribution;

Table of Contents

then, subject to the Distribution Forbearance Provisions, Global LLC will make additional cash distributions for that quarter to holders of its Class A units, Class B units, Class B1 units and the IDRs in the following manner:

first, to all holders of Class A units, Class B1 units and Class B units, pro rata, until each holder receives a total of \$ _____ per unit for that quarter, or the First Target Distribution (_____ % of the Minimum Quarterly Distribution);

second, _____ % to all holders of Class A units, Class B1 units and Class B units, pro rata, and _____ % to the holders of the IDRs, until each holder of Class A units, Class B1 units and Class B units receives a total of \$ _____ per unit for that quarter, or the Second Target Distribution (_____ % of the Minimum Quarterly Distribution);

third, _____ % to all holders of Class A units, Class B1 units and Class B units, pro rata, and _____ % to the holders of the IDRs, until each holder of Class A units, Class B1 units and Class B units receives a total of \$ _____ per unit for that quarter, or the Third Target Distribution (_____ % of the Minimum Quarterly Distribution); and

thereafter, _____ % to all holders of Class A units, Class B1 units and Class B units, pro rata, and _____ % to the holders of the IDRs.

The following table illustrates the percentage allocations of distributions between the holders of Class A units, Class B units and Class B1 units of Global LLC and the IDRs based on the specified target distribution levels. The amounts set forth under the column heading "Marginal percentage interest in distributions to IDRs" are the percentage interests of the holders of Class A units, Class B units and Class B1 units of Global LLC and the IDRs in any distributions Global LLC makes up to and including the corresponding amount under the column heading "Total quarterly distribution per unit." The percentage interests set forth below assume there are no arrearages on Class A units or Class B1 units of Global LLC and the Distribution Forbearance Provisions have terminated or otherwise do not apply.

		Total quarterly distribution per unit	Unitholders	Marginal percentage interest in distributions to IDR holders
Minimum Quarterly Distribution		up to \$	(1)	%
First Target Distribution	above \$	up to \$	(2)	%
Second Target Distribution	above \$	up to \$	(3)	%
Third Target Distribution	above \$	up to \$	(4)	%
Thereafter	above \$			%

(1) This amount is equal to the Minimum Quarterly Distribution.

(2) This amount is equal to _____ % of the Minimum Quarterly Distribution.

Edgar Filing: TERRAFORM GLOBAL, INC. - Form S-1

- (3) This amount is equal to % of the Minimum Quarterly Distribution.

- (4) This amount is equal to % of the Minimum Quarterly Distribution.

Table of Contents

Right to reset incentive distribution levels Our Sponsor, as the holder of the IDRs, has the right, after Global LLC has made cash distributions in excess of the Third Target Distribution (e.g., % to holders of units and % to the holder of the IDRs) for four consecutive quarters, to elect to relinquish the right to receive incentive distribution payments based on the initial target distribution levels and to reset, at higher levels, the target distribution levels upon which the incentive distribution payments would be set.

In connection with the resetting of the target distribution levels and the corresponding relinquishment by our Sponsor of incentive distribution payments based on the target distribution levels prior to the reset, our Sponsor will be entitled to receive a number of newly issued Class B1 units of Global LLC and shares of our Class B1 common stock based on the formula described below that takes into account the cash parity value of the cash distributions related to the IDRs for the two consecutive quarters immediately prior to the reset event as compared to the cash distribution per unit in such quarters.

The number of Class B1 units of Global LLC and shares of Class B1 common stock to be issued in connection with a resetting of the Minimum Quarterly Distribution amount and the target distribution levels then in effect would equal the quotient determined by dividing (i) the average aggregate amount of cash distributions received in respect of the IDRs during the two consecutive fiscal quarters ended immediately prior to the date of such reset election by (ii) the average of the aggregate amount of cash distributed per Class A unit, Class B1 unit and Class B unit of Global LLC during each of those two quarters.

Post-Reset IDRs

Following a reset election, a baseline Minimum Quarterly Distribution amount will be calculated as an amount equal to the average cash distribution amount per Class A unit, Class B1 unit and Class B unit of Global LLC for the two consecutive fiscal quarters immediately preceding the reset election, which amount we refer to as the Reset Minimum Quarterly Distribution, and the target distribution levels will be reset to be correspondingly higher than the Reset Minimum Quarterly Distribution. Following a resetting of the Minimum Quarterly Distribution amount, Global LLC would, subject to the Distribution Forbearance Provisions, make distributions for each quarter ending after the reset date as follows:

first, to all holders of Class A units, Class B1 units and Class B units, pro rata, until each holder receives an amount per unit for that quarter equal to % of the Reset Minimum Quarterly Distribution;

second, % to all holders of Class A units, Class B1 units and Class B units, pro rata, and % to the holders of the IDRs, until each holder of Class A units, Class B1 units and Class B units receives an amount per unit for that quarter equal to % of the Reset Minimum Quarterly Distribution;

third, % to all holders of Class A units, Class B1 units and Class B units, pro rata, and % to the holders of the IDRs, until each holder of Class A units,

Table of Contents

Class B1 units and Class B units receives an amount per unit for that quarter equal to % of the Reset Minimum Quarterly Distribution; and

thereafter, % to all holders of Class A units, Class B1 units and Class B units, pro rata, and % to the holders of the IDRs.

Subordination of Class B units

During the Subordination Period, holders of the Class B units of Global LLC will not be entitled to receive any distributions until the Class A units and Class B1 units of Global LLC (if any) have received the Minimum Quarterly Distribution for such quarter plus any arrearages in the payment of the Minimum Quarterly Distribution from prior quarters. Class B units of Global LLC will not accrue arrearages.

Subordination Period

The Subordination Period means the period beginning on the closing date of this offering and extending until each of the following tests has been met, which will be a minimum three-year period ending no earlier than the beginning of the period for which a distribution is paid for the first quarter of 2018:

distributions of CAFD on each of the outstanding Class A units, Class B units and Class B1 units of Global LLC equaled or exceeded \$ per unit (the annualized Minimum Quarterly Distribution) for each of the three consecutive, non-overlapping, four-quarter periods immediately preceding that date;

the CAFD generated during each of the three consecutive, non-overlapping, four-quarter periods immediately preceding that date equaled or exceeded the sum of \$ per unit (the annualized Minimum Quarterly Distribution) on all of the outstanding Class A units, Class B units and Class B1 units of Global LLC during those periods on a fully diluted basis; and

there are no arrearages in payment of the Minimum Quarterly Distribution on the Class A units or Class B1 units of Global LLC.

Notwithstanding the foregoing, the Subordination Period will automatically terminate when each of the following tests are met:

distributions of CAFD on each of the outstanding Class A units, Class B units and Class B1 units of Global LLC equaled or exceeded \$ per unit (% of the annualized Minimum Quarterly Distribution) for the four-quarter period immediately preceding that date;

the CAFD generated during the four-quarter period immediately preceding that date equaled or exceeded the sum of (i) \$ per unit (% of the annualized Minimum Quarterly Distribution) on all of the outstanding Class A units, Class B units and Class B1 units of Global LLC during such four quarters on a fully diluted basis, and (ii) the corresponding distributions on the IDRs during such four quarters; and

there are no arrearages in payment of the Minimum Quarterly Distributions on the Class A units or Class B1 units of Global LLC.

Table of Contents

Distribution Forbearance Provisions Our Sponsor has agreed to forego any distributions on its Class B units with respect to the third and fourth quarters of 2015 (i.e., distributions declared on or prior to March 31, 2016), and thereafter, under certain circumstances, to a reduction of distributions on its Class B units until the expiration of the Distribution Forbearance Period. Between March 31, 2016 and the end of the Distribution Forbearance Period our Sponsor has agreed to forego distributions to the extent the holders of Class A units have not received distributions in an amount equal to the Minimum Quarterly Distribution plus any arrearages in the payment of Minimum Quarterly Distributions from prior quarters. See [Certain relationships and related party transactions](#) Amended and Restated Operating Agreement of Global LLC [Distributions](#).

Material federal income tax consequences to non-U.S. holders For a discussion of the material United States federal income tax consequences that may be relevant to prospective investors who are non-U.S. holders, please read [Material United States federal income tax consequences to non-U.S. holders](#).

Reserved share program At our request, the underwriters have reserved up to 5% of the shares for sale at the initial public offering price to persons who are directors, officers or employees, or who are otherwise associated with us through a directed share program. The number of shares available for sale to the general public will be reduced by the number of directed shares purchased by participants in the program. Except for certain of our officers, directors and employees who have entered into lock-up agreements, each person buying shares through the directed share program has agreed that, for a period of 180 days from the date of this prospectus, he or she will not, without the prior written consent of J.P. Morgan Securities LLC, Barclays Capital Inc., Citigroup Global Markets Inc. and Morgan Stanley & Co. LLC dispose of or hedge any shares or any securities convertible into or exchangeable for our common stock with respect to shares purchased in the program.

Any directed shares not purchased will be offered by the underwriters to the general public on the same basis as all other shares offered. We have agreed to indemnify the underwriters against certain liabilities and expenses, including liabilities under the Securities Act, in connection with the sales of the directed shares. See [Underwriting \(conflicts of interest\)](#).

Conflicts of interest Affiliates of J.P. Morgan Securities LLC, Barclays Capital Inc., Citigroup Global Markets Inc. and Morgan Stanley & Co. LLC are lenders under our Bridge Facility. As described in [Use of proceeds](#), a portion of the net proceeds of this offering will be used to repay amounts then outstanding under our Bridge Facility. Because affiliates of J.P. Morgan Securities LLC, Barclays Capital Inc., Citigroup Global Markets Inc. and Morgan Stanley & Co. LLC will receive more than 5% of the net proceeds of this offering due to the repayment of amounts outstanding under our Bridge Facility, each of J.P. Morgan Securities LLC, Barclays Capital

Table of Contents

Inc., Citigroup Global Markets Inc. and Morgan Stanley & Co. LLC is deemed to have a conflict of interest under Rule 5121 of the Financial Industry Regulatory Authority, Inc., or FINRA. Accordingly, this offering will be conducted in compliance with FINRA Rule 5121, which requires, among other things, that a qualified independent underwriter participate in the preparation of, and exercise the usual standards of due diligence with respect to, the registration statement and this prospectus. has agreed to act as the qualified independent underwriter for this offering and to undertake the legal responsibilities and liabilities of an underwriter under the Securities Act, specifically including those inherent in Section 11 of the Securities Act.

Stock exchange listing

We intend to list our Class A common stock on the under the symbol .

Controlled company exemption

After completion of this offering, we will be considered a controlled company for the purposes of the listing requirements. As a controlled company, we are not required to establish a compensation or nominating committee under the listing rules of the and we do not intend to establish such committees in connection with the completion of this offering.

Certain assumptions

The number of shares of our common stock and the number of units of Global LLC to be outstanding after this offering, the combined voting power that identified stockholders will hold after this offering and the economic interest in our business that identified stockholders will hold after this offering are based on shares of our Class A common stock, shares of our Class B common stock, Class A units of Global LLC and Class B units of Global LLC outstanding immediately after this offering, based on an assumed initial public offering price of \$ per share, which is the midpoint of the range set forth on the cover page of this prospectus, and excludes:

shares of our Class A common stock which may be issued upon the exercise of the underwriters option to purchase additional shares of our Class A common stock and the corresponding number of Class A units of Global LLC that we would purchase from Global LLC with the net proceeds therefrom;

shares of our Class A common stock reserved for issuance upon the subsequent exchange of Class B units of Global LLC that will be outstanding immediately after this offering; and

shares of our Class A common stock reserved for future issuance under our 2014 Incentive Plan, including an aggregate of approximately shares underlying restricted stock units that are expected to be granted to several persons who have provided or are expected to provide services to us in connection with the completion of this offering as discussed in Executive officer compensation Equity incentive awards IPO Grants.

Table of Contents

Except as otherwise indicated, all information in this prospectus also assumes:

we will file our amended and restated certificate of incorporation and adopt our amended and restated bylaws immediately prior to the completion of this offering;

we will cause Global LLC to amend and restate its operating agreement immediately prior to the completion of this offering; and

an initial public offering price of \$ per share of Class A common stock, which is the midpoint of the range set forth on the cover page of this prospectus.

Table of Contents

Summary historical and pro forma financial data

The following table shows summary historical and pro forma financial data at the dates and for the periods indicated. The summary historical financial data as of and for the years ended December 31, 2013 and 2014 have been derived from the audited combined financial statements of our accounting predecessor included elsewhere in this prospectus. The historical combined financial statements of our accounting predecessor as of and for the years ended December 31, 2013 and 2014 are intended to represent the financial results of SunEdison's contracted renewable energy assets that have been or will be contributed to Global LLC as part of the Contributed Projects.

The summary unaudited pro forma financial data have been derived by the application of pro forma adjustments to the historical combined financial statements of our accounting predecessor included elsewhere in this prospectus. The summary unaudited pro forma statements of operations data for the year ended December 31, 2014 give effect to the Organizational Transactions (as described under Organizational Transactions), including the completion of the Contributed Projects and the Acquisitions and the use of the estimated net proceeds from this offering, as if they had occurred on January 1, 2014. The summary unaudited pro forma balance sheet data as of December 31, 2014 gives effect to the Organizational Transactions, including the completion of the Contributed Projects and the Acquisitions, this offering and the use of the estimated net proceeds therefrom, as if each had occurred on December 31, 2014. See Unaudited pro forma condensed financial statements for additional information. As described in Organizational Transactions, Global will own approximately % of Global LLC's outstanding membership interests after completion of the Organizational Transactions based on the assumptions set forth in The offering Certain assumptions, including no exercise by the underwriters of their option to purchase additional shares.

The following table should be read together with, and is qualified in its entirety by reference to, the historical combined financial statements and the accompanying notes appearing elsewhere in this prospectus. Among other things, the historical combined financial statements include more detailed information regarding the basis of presentation for the information in the following table. The table should also be read together with Management's discussion and analysis of financial condition and results of operations and Certain relationships and related party transactions Management Services Agreement.

Our summary unaudited pro forma financial data are presented for informational purposes only. The pro forma adjustments are based upon available information and certain assumptions that we believe are reasonable. Our summary unaudited pro forma financial information does not purport to represent what our results of operations or financial position would have been if we operated as a public company during the periods presented and may not be indicative of our future performance.

Table of Contents

Financial data of TerraForm Global, Inc. has not been presented in this prospectus as it is a newly incorporated entity, had no business transactions or activities and had no assets or liabilities during the periods presented in this prospectus.

Edgar Filing: TERRAFORM GLOBAL, INC. - Form S-1

- (1) Adjusted EBITDA is a non-GAAP financial measure. This measurement is not recognized in accordance with GAAP and should not be viewed as an alternative to GAAP measures of performance. The presentation of Adjusted EBITDA should not be construed as an inference that our future results will be unaffected by unusual or non-recurring items.

Table of Contents

We define Adjusted EBITDA as net income plus interest expense, unrealized (gains) losses on interest rate swaps, income taxes, depreciation and accretion and stock compensation expense after eliminating the impact of non-recurring items and other factors that we do not consider indicative of future operating performance. We believe Adjusted EBITDA is useful to investors in evaluating our operating performance because:

securities analysts and other interested parties use such calculations as a measure of financial performance and debt service capabilities; and

it is used by our management for internal planning purposes, including aspects of our consolidated operating budget and capital expenditures. Adjusted EBITDA has limitations as an analytical tool, and should not be considered in isolation or as a substitute for an analysis of our results as reported under GAAP. Some of these limitations include:

it does not reflect our cash expenditures or future requirements for capital expenditures or contractual commitments;

it does not reflect changes in, or cash requirements for, working capital;

it does not reflect significant interest expense or the cash requirements necessary to service interest or principal payments on our outstanding debt;

it does not reflect payments made or future requirements for income taxes;

it adjusts for contract amortization, mark-to-market gains or losses, asset write-offs, impairments and factors that we do not consider indicative of future performance;

it reflects adjustments for factors that we do not consider indicative of future performance, even though we may, in the future, incur expenses similar to the adjustments reflected in our calculation of Adjusted EBITDA in this prospectus; and

although depreciation and accretion are non-cash charges, the assets being depreciated and the liabilities being accreted will often have to be replaced or paid in the future and Adjusted EBITDA does not reflect cash requirements for such replacements or payments.

Investors are encouraged to evaluate each adjustment and the reasons we consider it appropriate for supplemental analysis.

The following table presents a reconciliation of net (loss) income to Adjusted EBITDA:

	For the year ended December 31,		
			Pro forma
(in thousands) (unaudited)	2013	2014	2014
Net loss	\$ (3,720)	\$ (7,120)	\$
Add:			
Depreciation and accretion	1,595	4,032	
Interest expense	3,931	16,005	
Unrealized (gains) losses on interest rate swaps	(158)	705	
Income tax (benefit) expense	(2,007)	986	

Adjusted EBITDA	\$ (359)	\$ 14,608	\$
-----------------	----------	-----------	----

- (2) Cash available for distribution represents net cash provided by (used in) operating activities of Global LLC (i) plus or minus changes in assets and liabilities as reflected on our statements of cash flows, (ii) minus deposits into (or plus withdrawals from) restricted cash accounts required by project financing arrangements to the extent they decrease (or increase) cash provided by operating activities, (iii) minus cash distributions paid to non-controlling interests in our projects, if any, (iv) minus scheduled project-level and other debt service payments in accordance with the related borrowing arrangements, to the extent they are paid from operating cash flows during a period, (v) minus non-expansionary capital expenditures, if any, to the extent they are paid from operating cash flows during a period, (vi) plus cash contributions from our Sponsor pursuant to the Interest Support Agreement, (vii) plus operating costs and expenses paid by our Sponsor pursuant to the Management Services Agreement to the extent such costs or expenses exceed the fee payable by us pursuant to such agreement but otherwise reduce our net cash provided by operating activities and (viii) plus or minus operating items as necessary to present the cash flows we deem representative of our core business operations, with the approval of our audit committee. Our intention is to cause Global LLC to distribute a portion of the cash available for distribution generated by our project portfolio as distributions each quarter, after appropriate reserves for our working capital needs and the prudent conduct of our business.

We disclose cash available for distribution because management recognizes that it will be used as a supplemental measure by investors and analysts to evaluate our liquidity. However, cash available for distribution is a non-GAAP measure and should not be considered an alternative to net (loss) income, net cash provided by (used in) operating activities or any other liquidity measure determined in accordance with GAAP, nor is it indicative of funds available to fund our cash needs. In addition, our calculation of cash available for distribution is not necessarily comparable to cash available for distribution as calculated by other companies. Investors should not rely on these measures as a substitute for any GAAP measure, including net income (loss) and net cash provided by (used in) operating activities. For a discussion of the risks and uncertainties with respect to our forecasted cash available for distribution see Risk factors Risks inherent in an investment in us We may not be able to continue paying comparable or growing cash dividends to holders of our Class A common stock in the future, The assumptions underlying the forecast and targeted growth rate presented elsewhere in this prospectus are inherently uncertain and subject to significant business, economic, financial, regulatory and competitive risks that could cause our actual cash available for distribution in the aggregate and/or on a per-share basis, to differ materially from our forecasts and We are a holding company and our only material asset after completion of this offering will be our interest in Global LLC, as we are accordingly dependent upon distributions from Global LLC and its subsidiaries to pay dividends and taxes and other expenses.

Table of Contents

The most directly comparable GAAP measure to cash available for distribution is net cash provided by (used in) operating activities. The following table is a reconciliation of our net cash provided by (used in) operating activities to cash available for distribution for the periods presented:

(in thousands) (unaudited)	For the year ended December 31,		
	2013	2014	Pro forma 2014
Adjustments to reconcile net cash provided by operating activities to cash available for distributions:			
Net cash provided by operating activities	\$ 16,843	\$ 20,947	\$
Changes in operating assets and liabilities	(21,115)	(21,689)	
Deposits into/withdrawals from restricted cash accounts paid from operating cash flows	(35,887)	(561)	
Cash distributions to non-controlling interests			
Scheduled project-level and other debt service repayments	2,956	(2,716)	
Non-expansionary capital expenditures		(34)	
Other items (a)			
Estimated cash available for distribution by Global LLC	\$	\$	\$

(a) Represents cash distributions to our Sponsor.

(3) Restricted cash includes current restricted cash, non-current restricted cash and cash committed for construction.

(4) For any period presented, GWh sold represents the amount of electricity measured in GWh that our projects generated and sold.

Table of Contents**Risk factors**

This offering and an investment in our Class A common stock involve a high degree of risk. You should carefully consider the risks described below, together with the financial and other information contained in this prospectus, before you decide to purchase shares of our Class A common stock. If any of the following risks actually occurs, our business, financial condition, results of operations, cash flows and prospects could be materially and adversely affected. As a result, the trading price of our Class A common stock could decline and you could lose all or part of your investment in our Class A common stock.

Risks related to our business

Counterparties to our PPAs may not fulfill their obligations, which could result in a material adverse impact on our business, financial condition, results of operations and cash flows.

Substantially all of the electric power generated by our initial portfolio of projects will be sold under long-term PPAs with public utilities or commercial, industrial or government end users. We expect the Call Right Projects will also have long-term PPAs or similar offtake arrangements such as feed-in tariff programs. With respect to China, see The operating results of any energy projects that we acquire in China may be adversely affected by changes in governmental policies that currently subsidize renewable energy. If, for any reason, any of the purchasers of power under these contracts are unable or unwilling to fulfill their related contractual obligations or if they refuse to accept delivery of power delivered thereunder or if they otherwise terminate such agreements prior to the expiration thereof, our assets, liabilities, business, financial condition, results of operations and cash flows could be materially and adversely affected. To the extent any of our power purchasers are, or are controlled by, governmental entities, our facilities may be subject to legislative or other political action that may impair their contractual performance or contain contractual remedies that do not provide adequate compensation in the event a counterparty defaults. For example, the counterparty to the PPA for two of our Indian projects included in our initial portfolio is a governmental trading corporation and external events, such as severe economic downturn or poor financial health, could adversely affect its ability to pay for the electricity received. We are required to contract with a single state-owned offtaker in South Africa, which concentrates our credit risk in that country. See Under renewable energy programs, in certain of the countries in which we operate, renewable energy producers are required to contract with a single offtake purchaser resulting in concentrated counterparty risk. While we are entitled to charge penalty interest for any delay in payments under such PPA, the delay in recovering the amounts due could nonetheless have a material adverse effect on the cash flows from, and CAFD generated by, such projects.

We may enter into PPAs for certain projects that will be subject to periodic price adjustments or require renegotiation of price terms over time. If the price terms under these PPAs fall below the initial price terms, our business, financial condition, results of operations and cash flows may be materially and adversely affected.

Certain of our PPAs or other long-term arrangements with our customers are subject to price adjustments over time. For example, the PPAs for the Malaysian projects included in our initial portfolio provide for adjustments to the feed-in tariffs on the total solar energy generated in a year if the Sustainable Energy Development Authority of Malaysia, or SEDA, determines that the project has achieved cost parity (which occurs once displaced costs have increased to be equal to or greater than the feed-in tariff rate). In addition, if the total solar energy generated in a year exceeds the planned amount for that year, the rate paid for the excess energy may be a price lower than the initial feed-in tariff rate. As a result, we are unable to ascertain the rate that may occur. If the price under any of our PPAs is reduced below the initial feed-in tariff rate, our business, financial condition, results of operations and cash flows may be materially and adversely affected.

Table of Contents

There can be no assurance that the Pending Acquisitions will be consummated on the terms or timetable currently anticipated or at all, and the closing of this offering is not conditioned on the consummation of these acquisitions.

This offering is not conditioned on the closing of the Pending Acquisitions currently identified in this prospectus, and we cannot assure you that all of the Pending Acquisitions will be consummated on the terms or timetable currently contemplated or at all. Each of the purchase agreements related to these project acquisitions contains customary and other closing conditions. In order to consummate these acquisitions, in certain instances, we must obtain regulatory and other approvals and consents in a timely manner. If, for any particular project acquisition, these approvals or consents are not received, or they are not received on terms that satisfy the conditions set forth in the relevant purchase agreement, then we and/or the applicable seller may not be obligated to complete such transaction. Also, we may not receive these approvals or consents in respect of these acquisitions before the currently anticipated timing for closing such acquisitions. For example, our Renova Transaction requires among other third-party consents, an approval by the National Electric Energy Agency, or ANEEL and Eletrobras. In addition, under circumstances specified in these purchase agreements, we or the seller may terminate these agreements.

Therefore, upon the closing of this offering, you will become a holder of our Class A common stock irrespective of whether these acquisitions are consummated or delayed. If these acquisitions are not completed, our Class A common stock that you have purchased in this offering will not reflect any interest in the Pending Acquisitions, and if an acquisition is delayed, this interest will not be reflected during the period of delay. Also, the price of our Class A common stock may decline to the extent that the market price of our Class A common stock at any time reflects a market assumption that the Pending Acquisitions will be consummated and that we will realize certain anticipated benefits from the acquisitions. The occurrence of any of these events individually or in combination could have a material adverse effect on our business, financial condition and results of operations.

Our pro forma financial information included elsewhere in this prospectus assumes the completion of the Pending Acquisitions.

Preparing the pro forma financial information contained in this prospectus involved making several assumptions, including that we would complete all of the Pending Acquisitions. These assumptions may prove inaccurate, as there can be no assurance that the Pending Acquisitions will be consummated on the terms or timetable currently anticipated or at all. Therefore, the pro forma financial statements included elsewhere in this prospectus are not indicative of what our results of operations, financial position and cash flows will be in the future. As a result, the pro forma financial information included elsewhere in this prospectus could be of limited utility in evaluating our business to the extent the Pending Acquisitions are not completed. See Unaudited pro forma condensed consolidated financial statements.

Certain of the PPAs for the projects in our initial portfolio and those for projects that we may acquire in the future contain or will contain provisions that allow the offtake purchaser to terminate or buy out the project or require us to pay liquidated damages upon the occurrence of certain events. In addition, certain of our project financing arrangements provide for acceleration upon the occurrence of such events. If these provisions are exercised, our cash available for distribution could materially decline.

Certain of the PPAs for the projects that we may acquire in the future allow the offtake purchaser to purchase the applicable project from us. Additionally, certain of the PPAs associated with projects in our initial portfolio allow the offtake purchaser to terminate the PPA or receive liquidated damages in the event certain operating thresholds, performance measures or any other material terms of the PPA are breached or are not achieved

Table of Contents

within specified time periods. We are therefore subject to the risk of counterparty termination or payment of damages based on such criteria for such projects. We cannot provide any assurance that PPAs containing such provisions will not be terminated or that we will not be required to pay liquidated damages with respect to projects governed by PPAs containing such provisions. If any such PPA is terminated or project bought out, we may not be able to enter into a replacement PPA or timely invest in a suitable replacement project. Any replacement PPA may be on terms less favorable to us than those that were terminated and any replacement project may possess economic characteristics less favorable to us than those of the project that was bought out. In the event a PPA is terminated, a project is bought out or we are required to pay liquidated damages under such provisions, it could materially and adversely affect our business, financial condition, results of operations and cash flows until we are able to obtain a replacement PPA on similar terms, reinvest in a suitable replacement project or the payment of such liquidated damages ceases.

Additionally, certain of the project-level financing arrangements for projects in our initial portfolio allow the lenders or investors to accelerate the repayment of the financing arrangement in the event that a PPA is terminated or if certain operating thresholds or performance measures are not achieved within specified time periods. We are therefore subject to the risk of lender or investor termination based on such criteria. In the event a project-level financing arrangement for one or more of our projects is accelerated under such provisions, it could materially and adversely affect our business, financial condition, results of operations and cash flows until we are able to obtain replacement financing on similar terms. We cannot provide any assurance that financing arrangements containing such provisions will not be terminated and repayments accelerated, or in the event of such termination or acceleration, that we will be able to enter into replacement financing arrangements on commercially reasonable terms or at all.

Certain of our PPAs and project-level financing arrangements include, and PPAs and project-level financing arrangements with respect to our future projects may include, provisions that would permit the counterparty to terminate the contract or accelerate maturity in the event our Sponsor ceases to control or own, directly or indirectly, a majority of our company.

Certain of our PPAs and project-level financing arrangements contain, and future PPAs and project-level financing arrangements may contain, change-of-control provisions that provide the counterparty with a termination right or the ability to accelerate maturity if a change-of-control consent is not received. Generally, these provisions are, or will be, triggered in the event our Sponsor owns, directly or indirectly, less than 50% of the combined voting power (which is equal to approximately 9%) of our outstanding capital stock, or, in some cases if our Sponsor ceases to be the majority owner, directly or indirectly, of the applicable project subsidiary. As a result, if our Sponsor ceases to control, or in some cases own a majority of, Global, the counterparties could terminate such contracts or accelerate the maturity of such financing arrangements. The termination of any of our PPAs or the acceleration of the maturity of any of our project-level financing as a result of a change in control of Global could have a material adverse effect on our business, financial condition, results of operations and cash flows.

We may face delays in entering into PPAs for some of our projects or may not be able to replace expiring PPAs with contracts on similar terms. If we are unable to replace an expired distributed generation PPA with an acceptable new contract, we may be required to remove the energy assets from the site or, alternatively, we may sell the assets to the site host.

We may experience delays in entering into PPAs for some of our projects or may not be able to replace an expiring PPA with a contract on equivalent terms and conditions, including at prices that permit operation of the related facility on a profitable basis. In India, as opposed to the mechanism for the sale of energy from solar power projects, there is no designated central agency for the purchase of wind power. Consequently, if we acquire Indian wind power projects in the future, we will be required to enter into offtake arrangements with

Table of Contents

commercial and industrial offtakers, wholesalers or distribution utilities, which in most of the states can be done only after a project reaches COD. Similarly, in South Africa, delays related to the implementation of the Renewable Energy Independent Power Producer Procurement program on the part of the South African government may cause delays in finalizing PPAs with Eskom Holdings Limited, or Eskom. In Brazil, we may be forced to buy electricity at spot market prices to resell to government counterparties under the applicable PPA if we fail to begin generation of electricity or do not generate sufficient electricity to satisfy the terms of the PPA for any projects we may enter into before such projects become operational. Any delay in entering into PPAs may adversely affect our cash flows from and CAFD generated by such projects.

If we are unable to replace an expiring PPA with an acceptable new PPA, the affected site may temporarily or permanently cease operations. In the case of a distributed generation project that ceases operations, the PPA terms generally require that we remove the assets, including fixing or reimbursing the site owner for any damages caused by the assets or the removal of such assets. The cost of removing a significant number of distributed generation projects could be material. Alternatively, we may agree to sell the assets to the site owner, but we can offer no assurances as to the terms and conditions, including price, that we would receive in any sale, and the sale price may not be sufficient to replace the revenue previously generated by the project.

Certain of our PPAs do not include inflation-based price increases.

Certain of the PPAs that have been entered into for the projects in our initial portfolio and the Call Right Projects do not contain inflation-based price increase provisions. Certain of the countries in which we have operations, or that we may expand into in the future, have in the past experienced high inflation. To the extent that the countries in which we conduct our business experience high rates of inflation, thereby increasing our operating costs in those countries, we may not be able to generate sufficient revenues to offset the effects of inflation, which could materially and adversely affect our business, financial condition, results of operations and cash flows.

Certain of our PPAs contain joint and several liability between holding companies and operational companies.

In Brazil, certain of our PPAs in the government regulated market have counterparties that are special purpose entities under the control of the legal entities that participate in the government auctions. If a special purpose entity fails to deliver the commitments under the government auction rules, the controlling entity that participated in the auction is jointly and severally liable for all obligations and liabilities arising from the government auction and the applicable PPA. Therefore, liability is not isolated to a specific project simply by operating the project under a separate legal entity. Significant potential liabilities could arise from: (i) the delay in any of the milestones for the implementation of the projects; (ii) subject to certain related obligations, the delay in recovering the value or delivery of the performance bond; and (iii) the failure to satisfy all the qualification requirements under the applicable government auction rules and the applicable PPA. The failure to comply with government auction milestones may also trigger enforcement of bonds (participation and performance), payment of fines and suspension from participating in any public auction for up to two years. There is no limit on the amount and kind of losses and damages covered under the government auction rules and the applicable PPA. Therefore, damages could potentially include the loss of profits and consequential damages.

A material increase in the availability of utility-generated electricity or electricity from other sources could increase competition for new PPAs.

Generally, to the extent offtakers are not required to acquire the output from our projects under feed-in tariff regulations or renewable portfolio standards, the decision by an end user to buy energy from projects in our initial portfolio is primarily driven by a deficit of available energy in such markets and the availability of

Table of Contents

domestic resources to meet those needs in a timely fashion. The end user's decision may also be affected by the cost of other conventional and clean energy sources. Decreases in the retail prices of electricity supplied by utilities or other clean energy sources could harm our ability to offer competitive pricing and to sign new customers. The availability of electricity could increase and the price of electricity could decrease in our target markets for a number of reasons, including:

the construction of a significant number of new power generation plants, including nuclear, coal, natural gas or renewable energy facilities;

the construction of additional electric transmission and distribution lines;

a reduction in the price of natural gas, including as a result of new drilling techniques or a relaxation of associated regulatory standards; and

the development of new clean energy technologies.

An increase in the availability of electricity or reduction in retail electricity prices in our target markets would make the purchase of solar or wind energy, as the case may be, less economically attractive. In addition, a shift in the timing of peak rates for utility-supplied electricity to a time of day when solar and wind energy generation is less efficient or not available could make solar or wind energy less competitive and reduce demand. If the availability of energy were to increase or the price of electricity were to decrease in the markets in which we operate, we would be at a competitive disadvantage, we may be unable to attract new customers and our growth may be limited.

Certain of our generation assets operate, partially, without long-term power sale agreements.

Approximately 1% of the total expected CAFD of our initial portfolio is not subject to offtake arrangements. We sell the energy produced with respect to this capacity in the merchant power market at the then current market price determined by auction or other variable price determination mechanisms. The price at which we sell energy in these markets varies, sometimes significantly, based on supply and demand. If we are unable to sell energy produced with respect to this capacity on favorable terms, if at all, there may be a material adverse effect on our business, financial condition, results of operations and cash flows.

We are exposed to risks associated with the projects in our initial portfolio that are newly constructed and the Call Right Projects that are newly constructed or are under construction.

Our expectations for the operating performance of newly constructed projects and projects under construction are based on assumptions and estimates made without the benefit of operating history. Projections contained in this prospectus regarding our ability to pay dividends to holders of our Class A common stock assume such projects perform to our expectations. However, the ability of these projects to meet our performance expectations is subject to the risks inherent in newly constructed power generation facilities and the construction of such facilities, including, but not limited to, degradation of equipment in excess of our expectations, system failures and outages. The failure of these facilities to perform as we expect could have a material adverse effect on our business, financial condition, results of operations and cash flows and our ability to pay dividends to holders of our Class A common stock.

In addition, certain of the Call Right Projects are in development or under construction and may not be completed on schedule or at all, in which case any such project would not be available for acquisition by us during the time frame we currently expect or at all. Since our primary growth strategy is the acquisition of new clean energy projects, including under the Support Agreement, a delay in our ability to acquire a Call Right Project could materially and adversely affect our expected growth.

Table of Contents

Certain of our projects depend on third-party service providers for construction, operation and maintenance services, and we may not be able to control their work as effectively as if we or our Sponsor performed these functions. Certain of the projects we expect to acquire in the Acquisitions may encounter transition and integration difficulties in transferring these services to us or our Sponsor.

Our Sponsor contracts with third-party service providers for certain functions related to the construction and operation of certain of our projects. Outsourcing these functions involves the risk that third parties may not perform to our standards, may not produce results in a timely manner or may fail to perform at all. Although we have not experienced any significant difficulties with our third-party service providers, it is possible that we could experience difficulties in the future. Certain of our projects located in Brazil, Peru, Uruguay, India, South Africa and China utilize third-party service providers for construction, operation and maintenance. If these third-party service providers default on their contractual obligations to us it may: (i) cause us to default in our regulatory obligations; (ii) adversely impact the ongoing operation of our plants; or (iii) temporarily reduce our capacity to generate power. Certain of our acquired projects may encounter difficulties in transitioning operation and maintenance services from the existing service provider to us and our Sponsor, which may have a material adverse effect on the business results of our operations and performance.

We have a limited operating history and as a result there is no assurance we can operate on a profitable basis.

We have a relatively new portfolio of assets, including several projects that have only recently commenced operations, and a limited operating history on which to base an evaluation of our business and prospects. Our prospects must be considered in light of the risks, expenses and difficulties frequently encountered by companies in their early stages of operation, particularly in a rapidly evolving industry such as ours. We cannot assure you that we will be successful in addressing the risks we may encounter, and our failure to do so could have a material adverse effect on our business, financial condition, results of operations and cash flows.

We may incur unexpected expenses if the suppliers of components in our clean energy projects default in their warranty obligations or our operators default on their operation and maintenance obligations.

The solar panels, inverters, and other system components utilized in our solar energy projects and, in more limited circumstances, wind turbines utilized in our wind energy and hydro-electric projects are generally covered by manufacturers' warranties, which typically range from five to 20 years. In the event any such components fail to operate as required, we may be able to make a claim against the applicable warranty to cover all or a portion of the expense associated with the faulty component. However, these suppliers could cease operations and no longer honor the warranties, which would leave us to cover the expense associated with the faulty component. Our operators may default or underperform in performing operation and maintenance services which may result in unexpected capital expenditures, major repairs and project underperformance. Our business, financial condition, results of operations and cash flows could be materially adversely affected if we cannot make claims under warranties covering our projects.

The growth of our business depends on locating and acquiring interests in attractive clean energy projects in emerging markets from our Sponsor and unaffiliated third parties at favorable prices. Additionally, even if we consummate such acquisitions on terms that we believe are favorable, such acquisitions may in fact result in a decrease in cash available for distribution per Class A common share.

Our primary business strategy is to acquire clean energy projects that are operational at the time of acquisition. We may also, in limited circumstances, acquire clean energy projects that are pre-operational. We intend to pursue opportunities to acquire projects from both our Sponsor and third parties. The following factors, among others, could affect the availability of attractive projects to grow our business:

competing bids for a project, including from companies that may have substantially greater capital and other resources than we do;

Table of Contents

fewer third-party acquisition opportunities than we expect, which could result from, among other things, available projects having less desirable economic returns or higher risk profiles than we believe suitable for our business plan and investment strategy;

our Sponsor's failure to complete the development of (i) the Call Right Projects, which could result from, among other things, challenges in obtaining necessary permits, failure to procure the requisite financing, equipment or interconnection, or an inability to satisfy the conditions to effectiveness of project agreements such as PPAs, and (ii) any of the other projects in its development pipeline in a timely manner, or at all, in either case, which could limit our acquisition opportunities under the Support Agreement;

our failure to reach an agreement with our Sponsor and third parties regarding pricing of the applicable Call Right Projects; and

our failure to exercise our rights under the Support Agreement or third party call rights agreements, if any, to acquire assets from our Sponsor or such third parties.

We will not be able to achieve our target dividend per share annual growth rate unless we are able to acquire additional clean energy projects in emerging markets at favorable prices. Even if we consummate acquisitions that we believe will be accretive to our dividends per share, those acquisitions may in fact result in a decrease in dividends per share as a result of incorrect assumptions in our evaluation of such acquisitions, unforeseen consequences or other external events beyond our control.

Our acquisition strategy exposes us to substantial risks.

The acquisition of power generation assets is subject to substantial risks, including the failure to identify material problems during due diligence (for which we may not be indemnified post-closing), the risk of over-paying for assets or not making acquisitions on an accretive basis, the ability to obtain or retain customers and, if the projects are in new markets, the risk of entering markets and technologies where we have limited or no experience. While we will perform our due diligence on prospective acquisitions, we may not be able to discover all potential operational deficiencies in such projects. The integration and consolidation of acquisitions requires substantial human, financial and other resources and may divert management's attention from our existing business concerns, disrupt our ongoing business or otherwise fail to be successfully integrated. There can be no assurance that any future acquisitions will perform as expected or that the returns from such acquisitions will support the financing utilized to acquire them or maintain them. As a result, the consummation of acquisitions may have a material adverse effect on our ability to execute our growth strategy, business, financial condition, results of operations and cash flows and ability to pay dividends to holders of our Class A common stock.

In addition, the development of clean energy projects is a capital intensive, high-risk business that relies heavily on the availability of debt and equity financing sources to fund projected construction and other projected capital expenditures. As a result, in order to successfully develop a clean energy project, development companies, including our Sponsor, from which we may seek to acquire projects, must obtain at-risk funds sufficient to complete the development phase of their projects. We, on the other hand, must anticipate obtaining funds from equity or debt financing sources, including under our Revolver, or from government grants in order to successfully fund and complete acquisitions of projects. Any significant disruption in the credit or capital markets, or a significant increase in interest rates, could make it difficult for our Sponsor or other development companies to successfully develop attractive projects as well as limit their ability to obtain project-level financing to complete the construction of a project we may seek to acquire. It could also adversely affect our ability to fund acquisitions and/or operating costs. If our Sponsor or other development companies from which we seek to acquire projects are unable to raise funds when needed or if we or they are unable to secure adequate financing, the ability to grow our project portfolio may be limited, which could have a material adverse effect on our ability to implement our growth strategy and, ultimately, our business, financial condition, results of operations and cash flows.

Table of Contents

Projects in our initial portfolio, and that we may acquire, will need governmental approvals and permits, including environmental approvals and permits, for construction and operation. Any failure to obtain and maintain necessary permits could adversely affect our ability to operate and grow.

The operation of solar, wind and hydro-electric energy projects is highly regulated, requires various governmental approvals and permits, including environmental approvals and permits, and may be subject to the imposition of related conditions that vary by jurisdiction. We cannot predict whether all permits required for a given project will be granted or whether the conditions associated with the permits will be achievable. The denial or loss of a permit essential to a project or the imposition of impractical conditions upon renewal could impair our ability to operate a project. In addition, we cannot predict whether the permits will attract significant opposition or whether the permitting process will be lengthened due to complexities, legal claims or appeals. Delays in the review and permitting process for a project can impair or delay our ability to acquire a project or increase the cost such that the project is no longer attractive to us. If we fail to satisfy the conditions or comply with the restrictions imposed by governmental approvals and permits, or the restrictions imposed by any other statutory or regulatory requirements, we may be subject to regulatory enforcement action, fines, penalties or additional costs or revocation of such approvals or permits and the operation of the applicable projects could be adversely affected. Any failure to procure, renew or maintain necessary authorizations and permits could materially adversely affect the continuing operation of our projects or our ability to acquire additional projects.

Laws, governmental regulations and policies supporting renewable energy, and specifically solar, wind and hydro-electric energy (including tax incentives and feed-in tariffs), could change at any time, including as a result of new political leadership, and such changes may materially adversely affect our business and our growth strategy.

Renewable generation assets currently benefit from various national, provincial, state and local governmental incentives. Certain of the projects in our initial portfolio and certain Call Right Projects rely on capital subsidies from government authorities in jurisdictions where such projects are located. Governmental regulations and policies could be changed to provide for new rate programs that undermine the economic returns for both new and existing projects by charging additional, non-negotiable fixed or demand charges or other fees or reductions in the number of projects allowed under net metering policies. In addition, unanticipated events beyond our control, such as a change in law may require us to make improvements or other modifications to one or more of our projects, which could have an adverse effect on our operating results. Our business could also be subject to new and burdensome interconnection processes, delays and upgrade costs or local permit and site restrictions.

In addition, we face risks related to potential changes in tax laws that may limit the benefits of solar, wind and hydro-electric energy investment. For example, our solar projects in Thailand currently benefit from a tax holiday granted by Thailand's Board of Investment. This incentive includes an eight-year tax holiday, customs duty exemptions and a number of other non-tax incentives. There is a risk that the tax holiday may be revoked and that the rate of income tax may be increased from the current rate of 20%. In Brazil, certain tax benefits associated with inputs and equipment are necessary to construct renewable energy power plants. Most of these tax benefits have expiration dates that may or may not be extended. Without these tax benefits the cost of constructing renewable energy projects would significantly increase. Government incentives provide significant support for renewable energy sources, such as solar and wind energy, and a decrease in these tax benefits could increase the costs of investment in solar, wind and hydro-electric energy.

If any of the laws or governmental regulations or policies that support renewable energy, including solar, wind and hydro-electric energy, change or are terminated, or if we are subject to new and burdensome laws or regulations, such changes may have a material adverse effect on our business, financial condition, results of

Table of Contents

operations and cash flows. In addition, any changes to or termination of the regulations and governmental incentives discussed in detail under Business Government incentives in this prospectus may also significantly affect our business.

Our ability to grow and make acquisitions with cash on hand may be limited by our cash dividend policy.

As discussed in Cash dividend policy, our dividend policy is to cause Global LLC to distribute the CAFD generated by our project portfolio (after deducting appropriate reserves for our working capital needs and the prudent conduct of our business) and to rely primarily upon external financing sources, including the issuance of debt and equity securities and, if applicable, borrowings under our Revolver, to fund our acquisitions and growth capital expenditures, which we define as costs and expenses associated with the acquisition of project assets from our Sponsor and third parties and capitalized expenditures on existing projects to expand capacity. Certain of our project-level subsidiaries pay cash distributions to us in the form of dividends or other cash distributions such as shareholder loan repayments or capital reductions and, as a result, our ability to pay or grow our dividends is dependent upon the performance of our subsidiaries and their ability to distribute cash to us. The ability of our project-level subsidiaries to make cash distributions to us may be restricted by, among other things, the provisions of existing and future indebtedness, applicable corporation laws and other laws and regulations. We may be precluded from pursuing otherwise attractive acquisitions if the projected short-term cash flows from the acquisition or investment are insufficient to service any associated debt or adequately compensate the invested capital, after giving effect to our available cash reserves. See Cash dividend policy Our ability to grow our business and dividend.

We intend to use a portion of the CAFD generated by our project portfolio to pay regular quarterly cash dividends to holders of our Class A common stock. We may make distributions to our shareholders by way of capital reduction in lieu of dividends in some years. Our initial quarterly dividend will be set at \$ per share of Class A common stock, or \$ per share on an annualized basis. We established our initial quarterly dividend based upon a targeted payout ratio by Global LLC of approximately % of projected annual CAFD. As such, our growth may not be as fast as that of businesses that reinvest their available cash to expand ongoing operations. To the extent we issue additional equity securities in connection with any acquisitions or growth capital expenditures, the payment of dividends on these additional equity securities may increase the risk that we will be unable to maintain or increase our dividend per share. There will be no limitations in our amended and restated certificate of incorporation (other than a specified number of authorized shares) on our ability to issue equity securities, including securities ranking senior to our common stock. The incurrence of bank borrowings or other debt by Global Operating LLC or by our project-level subsidiaries to finance our growth strategy will result in increased interest expense and the imposition of additional or more restrictive covenants which, in turn, may impact the cash distributions we make to holders of our Class A common stock.

Our indebtedness could adversely affect our financial condition and ability to operate our business, including restricting our ability to pay cash dividends or react to changes in the economy or our industry.

As of December 31, 2014, after giving pro forma effect to the Organizational Transactions, we would have had approximately \$ million of indebtedness and an additional \$ million available for future borrowings under our Revolver. Our substantial debt following the completion of this offering could have important negative consequences on our financial condition, including:

- increasing our vulnerability to general economic and industry conditions;

- requiring a substantial portion of our cash flows from operations to be dedicated to the payment of principal and interest on our indebtedness, thereby reducing our ability to pay dividends to holders of our Class A common stock or to use our cash flows to fund our operations, capital expenditures and future business opportunities;

Table of Contents

limiting our ability to enter into or receive payments under long-term power or fuel purchase contracts that require credit support;

limiting our ability to fund operations or future acquisitions;

restricting our ability to make certain distributions with respect to our capital stock and the ability of our subsidiaries to make certain distributions to us, in light of restricted payment and other financial covenants in our credit facilities and other financing agreements;

exposing us to the risk of increased interest rates because certain of our borrowings, which may include borrowings under our Revolver, are at variable rates of interest;

limiting our ability to obtain additional financing for working capital, including collateral postings, capital expenditures, debt service requirements, acquisitions and general corporate or other purposes; and

limiting our ability to adjust to changing market conditions and placing us at a competitive disadvantage compared to our competitors who have less debt.

Our Revolver will contain financial and other restrictive covenants that limit our ability to return capital to stockholders or otherwise engage in activities that may be in our long-term best interests. Our inability to satisfy certain financial covenants could prevent us from paying cash dividends, and our failure to comply with those and other covenants could result in an event of default which, if not cured or waived, may entitle the related lenders to demand repayment or enforce their security interests. The occurrence of an event of default under our Revolver could have a material adverse effect on our business, financial condition, results of operations and cash flows. In addition, failure to comply with such covenants may entitle the related lenders to demand repayment and accelerate all such indebtedness.

The agreements governing our project-level financing contain financial and other restrictive covenants that limit our project subsidiaries' ability to make distributions to us or otherwise engage in activities that may be in our long-term best interests. The project-level financing agreements generally prohibit distributions or dividends from the project entities to us unless certain specific conditions are met, including the satisfaction of certain financial ratios, such as debt service, leverage and loan life ratios, payment of operating and maintenance expenses, capital expenditures and finance charges and the satisfaction of scheduled payments under such financing agreements. Our inability to satisfy certain financial covenants may prevent cash distributions by the particular project(s) to us and our failure to comply with those or other covenants could result in an event of default which, if not cured or waived, may entitle the related lenders to demand repayment and accelerate all such indebtedness or enforce their security interests, which could have a material adverse effect on our business, results of operations and financial condition. If we are unable to make distributions from our project-level subsidiaries, it would likely have a material adverse effect on our ability to pay dividends to holders of our Class A common stock. Certain financing agreements contain restricted cash provisions which require the deposit of cash into debt service or lockbox accounts, and require the maintenance of such accounts until certain conditions are satisfied or for the duration of the financing. As a result, funds subject to such restricted cash provisions will not be available for distribution by project entities, and any increase in restricted cash levels will decrease the amount of cash available to such project entity to make distributions or pay dividends to us. Additionally, the project financing arrangements for most of our Indian projects require that we obtain lender consent prior to making any distributions or paying any dividends from the project entity to us regardless of whether the other conditions of the financing arrangement have been satisfied. The project financing arrangements for some of our Indian projects do not permit them to make any dividend payments until the expiry of a certain number of years from COD, or until full repayment of the facility.

Table of Contents

For example, we were not in compliance with a financial maintenance covenant of the term loan for the Silverstar Pavilion project at the end of the second quarter of 2014. This non compliance constituted an event of default under the project's loan agreement, and resulted in us being unable to distribute any cash generated by the Silverstar Pavilion project. The lenders would have been able to accelerate repayment of the loan at any time until such default was cured or waived. Subsequent to such default, we obtained a waiver of the default from the lenders, and as of the end of the third quarter of 2014, we were in compliance with the financial maintenance covenant. Although we have obtained a waiver of the default from the lenders, we can provide no assurance that, if such loan had been accelerated, we would have been able to replace the term loan on commercially reasonable terms or at all.

If our subsidiaries default on their obligations under their project-level indebtedness, this may constitute an event of default under our Revolver, and we may be required to make payments to lenders to avoid such default or to prevent foreclosure on the collateral securing the project-level debt. If we are unable to or decide not to make such payments, we would lose certain of our projects upon foreclosure.

Our subsidiaries incur, and we expect will in the future incur, various types of project-level indebtedness. Non-recourse debt is repayable solely from the applicable project's revenues and is secured by the project's physical assets, major contracts, cash accounts and, in many cases, our ownership interest in the project subsidiary. Limited recourse debt is debt where we have provided a limited guarantee, and recourse debt is debt where we have provided a full guarantee. If our subsidiaries default on projects subject to our full guarantee, we will be liable directly to those lenders; however, in the case of limited recourse debt, we are liable only to the extent of the collateral securing the debt. To satisfy recourse debt obligations, we may be required to use amounts distributed by our other subsidiaries as well as other sources of available cash, reducing our cash available to execute our business plan and pay dividends to holders of our Class A common stock. In addition, if our subsidiaries default on their obligations under non-recourse financing agreements this may, under certain circumstances, result in an event of default under our Revolver, allowing our lenders to foreclose on their security interests, including the pledge of any equity interests. Even if that is not the case, we may decide to make payments to prevent the lenders of these subsidiaries from foreclosing on the relevant collateral. Such a foreclosure could result in our losing our ownership interest in the subsidiary or in some or all of its assets. The loss of our ownership interest in one or more of our subsidiaries or some or all of their assets could have a material adverse effect on our business, financial condition, results of operations and cash flows.

If we are unable to renew letter of credit facilities, our business, financial condition, results of operations and cash flows may be materially adversely affected.

We expect our Revolver to include a letter of credit facility to support project-level contractual obligations. This letter of credit facility will need to be renewed after three years, at which time we will need to satisfy applicable financial ratios and covenants. If we are unable to renew our letters of credit as expected or if we are only able to replace them with letters of credit under different facilities on less favorable terms, we may experience a material adverse effect on our business, financial condition, results of operations and cash flows. Furthermore, the inability to provide letters of credit may constitute a default under certain project-level financing arrangements, restrict the ability of the project-level subsidiary to make distributions to us and/or reduce the amount of cash available at such subsidiary to make distributions to us.

Our ability to raise additional capital to fund our operations may be limited.

Our ability to arrange additional financing, either at the corporate level or at a non-recourse project-level subsidiary, may be limited. Additional financing, including the costs of such financing, will be dependent on numerous factors, including:

general economic and capital market conditions;

Table of Contents

credit availability from banks and other financial institutions;

investor confidence in us, our partners, our Sponsor, as our principal stockholder (on a combined voting basis) and manager under the Management Services Agreement, and the regional wholesale power markets;

our financial performance and the financial performance of our subsidiaries;

our level of indebtedness and compliance with covenants in debt agreements;

maintenance of acceptable project credit ratings or credit quality, including maintenance of the legal and tax structure of the project-level subsidiary upon which the credit ratings may depend;

our cash flows; and

provisions of tax and securities laws that may impact raising capital.

We may not be successful in obtaining additional financing for these or other reasons. Furthermore, we may be unable to refinance or replace project-level financing arrangements or other credit facilities on favorable terms or at all upon the expiration or termination thereof. Our failure, or the failure of any of our projects, to obtain additional capital or enter into new or replacement financing arrangements when due may constitute a default under such existing indebtedness and may have a material adverse effect on our business, financial condition, results of operations and cash flows.

Our ability to generate revenue from certain utility energy projects depends on having interconnection arrangements and services.

Our future success will depend, in part, on our ability to maintain satisfactory interconnection agreements. If the interconnection or transmission agreement of an energy project is terminated for any reason or is not renewed, we may not be able to replace it with an interconnection and transmission arrangement on terms as favorable as the existing arrangement, or at all, or we may experience significant delays or costs related to securing a replacement. If a network to which one or more of the energy projects is connected experiences down time, which may be due to matters not within our control, such as substation or transmission network upgrades, the affected project may lose revenue and be exposed to non-performance penalties and claims from its customers. These may include claims for damages incurred by customers, such as the additional cost of acquiring alternative electricity supply at then-current spot market rates. The owners of the network will not usually compensate electricity generators for lost income due to down time. These factors could materially affect our ability to forecast operations and negatively affect our business, results of operations, financial condition and cash flows.

For most of our projects, we rely on electric interconnection and transmission facilities that we do not own or control and that are subject to transmission constraints. If these facilities fail to provide us with adequate transmission capacity, we may be restricted in our ability to deliver electric power to our customers and we may incur additional costs or forego revenues.

For our utility-scale projects, we depend on electric transmission facilities owned and operated by others to deliver the power we generate and sell at wholesale to our utility customers. A failure or delay in the operation or development of these transmission facilities could result in our losing revenues. Such failures or delays could limit the amount of power our operating facilities deliver or delay the completion of our Call Right Projects. Additionally, such failures, delays or increased costs could have a material adverse effect on our business, financial condition and results of operations. If a region's power transmission infrastructure is inadequate, our recovery of wholesale costs and profits may be limited. If restrictive transmission price regulation is imposed, the transmission companies may not have a sufficient incentive to invest in expansion of transmission

Table of Contents

infrastructure. We also cannot predict whether transmission facilities will be expanded in specific markets to accommodate competitive access to those markets. In addition, certain of our operating facilities' generation of electricity may be physically or economically curtailed without compensation due to transmission limitations or limitations on the transmission grid's ability to accommodate all of the generating resources seeking to move power over or sell power through the grid, reducing our revenues and impairing our ability to capitalize fully on a particular facility's generating potential. In certain markets in which we expect to acquire projects, the electric transmission and distribution infrastructure generally needs significant improvement, which may also cause grid connections for some of our projects to be delayed. Such curtailments could have a material adverse effect on our business, financial condition, results of operations and cash flows. Furthermore, economic congestion on the transmission grid (for instance, a positive price difference between the location where power is put on the grid by a project and the location where power is taken off the grid by the project's customer) in certain of the bulk power markets in which we operate may occur and we may be deemed responsible for those congestion costs. If we were liable for such congestion costs, our financial results could be adversely affected.

We face competition from conventional and other renewable energy companies.

The solar and wind industries are highly competitive and continually evolving as market participants strive to distinguish themselves within their markets and compete with large incumbent utilities and new market entrants. We believe that our primary competitors in these industries are the incumbent utilities that supply energy to our potential customers under highly regulated rate and tariff structures. We compete with these conventional utilities primarily based on price, predictability of price and the ease with which customers can switch to electricity generated by our solar and wind energy systems. If we cannot offer compelling value to our customers based on these factors, then our solar and wind energy-based business will not grow. Traditional utilities generally have substantially greater financial, technical, operational and other resources than we do. As a result of their greater size, these competitors may be able to devote more resources to the research, development, promotion and sale of their products or respond more quickly to evolving industry standards and changes in market conditions than we can. Conventional utilities could also offer other value-added products or services that could help them to compete with us even if the cost of electricity they offer is higher than ours. In addition, a majority of conventional utilities' sources of electricity is non-renewable, which may allow them to sell electricity more cheaply than electricity generated by our solar and wind energy systems.

We also face competition in the energy efficiency evaluation and upgrades market and we expect to face competition as we introduce new energy-related products and services. As the solar and wind industries grow and evolve, we will also face new competitors who are not currently in the market. Our failure to adapt to changing market conditions and to compete successfully with existing or new competitors will limit our growth and will have a material adverse effect on our business and prospects.

There are a limited number of purchasers of utility-scale quantities of electricity, which exposes us and our utility-scale projects to additional risk.

Since the transmission and distribution of electricity is either monopolized or highly concentrated in most jurisdictions, there are a limited number of possible purchasers for utility-scale quantities of electricity in a given geographic location, including transmission grid operators, state and investor-owned power companies, public utility districts and cooperatives. As a result, there is a concentrated pool of potential buyers for electricity generated by our plants and projects, which may restrict our ability to negotiate favorable terms under new PPAs and could impact our ability to find new customers for the electricity generated by our generation facilities should this become necessary. Additionally, the PPAs in India, Thailand and China are in the standard form prescribed by the utilities and accordingly, we have limited or no ability to negotiate the terms of such PPAs. Furthermore, if the financial condition of these utilities and/or power purchasers deteriorated or government policies or regulations to which they are currently subject that compel them to

Table of Contents

source renewable energy supplies change, demand for electricity produced by our plants could be negatively impacted. In addition, provisions in our power sale arrangements or applicable laws may provide for the curtailment of delivery of electricity for various reasons, including to prevent damage to transmission systems, for system emergencies, force majeure or for economic reasons. Such curtailment would reduce revenues to us from power sale arrangements. If we cannot enter into power sale arrangements on terms favorable to us, or at all, or if the purchaser under our power sale arrangements were to exercise its curtailment or other rights to reduce purchases or payments under such arrangements, our revenues and our decisions regarding development of additional projects may be adversely affected.

A significant deterioration in the financial performance of our commercial, industrial or government customers could materially adversely affect our distributed generation business.

The financial performance of our distributed generation business depends in part upon the continued viability and financial stability of our customers in the commercial, industrial and governmental sectors. If our commercial, industrial or governmental customers are materially and adversely affected by an economic downturn, increase in inflation or other factors, one or more of our largest customers could encounter financial difficulty and possibly bankruptcy. If one or more of our largest customers were to encounter financial difficulty or declare bankruptcy, they may reduce their payments under the PPA to us or stop them altogether. Any interruption or termination in payments by our customers would result in less cash being paid to the special purpose legal entities we establish to own and finance our projects, which could adversely affect the entities' ability to pay our lenders. In such a case, the amount of distributable cash held by the entities would decrease, adversely affecting the cash flows we receive from such entities. In addition, our ability to finance additional new projects with PPAs from such customers would be adversely affected, undermining our ability to grow our business. Any reduction or termination of payments by one or more of our principal distributed generation customers could have a material adverse effect on our business, financial condition and results of operations.

The generation of electric energy from solar, wind and hydro-electric energy sources depends heavily on suitable meteorological conditions. If weather conditions are unfavorable, our electricity generation, and therefore revenue from our renewable generation facilities using our systems, may be substantially below our expectations.

The electricity produced and revenues generated by a solar electric generation facility are inherently dependent on suitable solar conditions and associated weather conditions. The operating performance of wind farms depends on wind speeds and other meteorological and physical conditions at the relevant site. The operating performance of a hydro-electric generation facility depends on favorable hydrological conditions. Objects such as buildings, trees or other wind turbines near our wind farms may reduce wind resources due to the disruption of wind flows. Furthermore, components of our system, such as solar panels and inverters or wind turbines, could be damaged by severe weather, such as hailstorms, typhoons or tornadoes. We generally will be obligated to bear the expense of repairing damage to our energy systems caused by severe weather, and replacement and spare parts for key components may be difficult or costly to acquire or may be unavailable. Unfavorable weather and atmospheric conditions could impair the effectiveness of our assets or reduce their output beneath their rated capacity or require shutdown of key equipment, impeding operation of our assets and our ability to achieve forecasted revenues and cash flows. Sustained unfavorable weather could also unexpectedly delay the installation of energy systems, which could result in a delay in us acquiring new projects or increase the cost of such projects.

Specifically, hydro-electric power generation facilities require continuous water flow for their operation. Shifts in weather or climate patterns, seasonal precipitation, the timing and rate of melting, run off and other factors beyond our control may reduce the water flow to our hydro-electric facilities. In addition, water rights are also generally owned or controlled by government entities that reserve the right to control water levels or may

Table of Contents

impose water-use requirements as a condition of license renewal. Any material reduction in the water flow to our hydro-electric facilities would limit our ability to produce and market electricity from these facilities and could have a material adverse effect on the results of our operations. For example, Brazil is currently experiencing a historic drought that has led to expansive blackouts due to the country's reliance on hydro-electric power. The drought has affected the electricity production at certain of our hydro-electric facilities. If the drought continues in these areas it could materially reduce electricity production at certain of our hydro-electric facilities and any additional hydro-electric facilities we may acquire in the future.

We base our investment decisions with respect to each energy facility on the findings of related studies conducted on-site prior to construction or based on historical conditions at existing facilities. In addition, we rely on hydrological studies and data to confirm there is sufficient water flow available to generate enough electricity for our hydro-electric projects to be economically viable and such studies may prove unreliable. However, actual climatic conditions at a facility site may not conform to the findings of these studies and, therefore, our energy facilities may not meet anticipated production levels or the rated capacity of our generation assets, which could adversely affect our business, financial condition and results of operations and cash flows. For example, in selecting sites in India, we depend on meteorological and topographical data compiled by a third-party expert as there are no feasibility or site selection studies carried out by governmental entities. There can be no assurance that the actual weather conditions will conform to the historical measured data or that the assumptions made during the assessment of the relevant site for the power project are correct.

While we currently own only solar, wind and hydro-electric energy projects, in the future we expect to expand our acquisition strategy to include other types of energy or transmission projects. To the extent that we expand our operations to include new business segments, our business operations may suffer from a lack of experience, which may materially and adversely affect our business, financial condition, results of operations and cash flows.

We have limited experience in energy generation operations other than those involving the generation of solar, wind or hydro-electric power. As a result of this lack of experience, we may be prone to errors if we expand our projects to include technologies beyond solar, wind and hydro-electric energy. We lack the technical training and experience with developing, starting or operating such other generation facilities. With no direct training or experience in these areas, our management may not be fully aware of the many specific requirements related to working in industries beyond solar, wind and hydro-electric energy generation. Additionally, we may be exposed to increased operating costs, unforeseen liabilities or risks, and regulatory and environmental concerns associated with entering new sectors of the power generation industry, which could have an adverse impact on our business as well as place us at a competitive disadvantage relative to more established non-solar, non-wind or non-hydro-electric energy market participants. In addition, such ventures could require a disproportionate amount of our management's attention and resources. Our operations, earnings and ultimate financial success could suffer irreparable harm due to our management's lack of experience in these industries. We may rely, to a certain extent, on the expertise and experience of industry consultants, and we may have to hire additional experienced personnel to assist us with our operations. We can offer no assurance that if we expand our business beyond solar, wind and hydro-electric energy generation, we will be able to effectively acquire and operate projects in such new areas and achieve our targeted financial goals.

Operation of power generation facilities involves significant risks and hazards that could have a material adverse effect on our business, financial condition, results of operations and cash flows. We may not have adequate insurance to cover these risks and hazards.

The ongoing operation of our facilities involves risks that include the breakdown or failure of equipment or processes or performance below expected levels of output or efficiency due to wear and tear, latent defect, design error or operator error or force majeure events, among other things. Operation of our facilities also

Table of Contents

involves risks that we will be unable to transport our product to our customers in an efficient manner due to a lack of transmission capacity. Unplanned outages of generating units, including extensions of scheduled outages, occur from time to time and are an inherent risk of our business. Unplanned outages typically increase our operation and maintenance expenses and may reduce our revenues as a result of generating and selling less power or require us to incur significant costs in connection with obtaining replacement power from third parties in the open market to satisfy our forward power sales obligations.

Our inability to operate our energy assets efficiently, manage capital expenditures and costs and generate earnings and cash flows from our asset-based businesses could have a material adverse effect on our business, financial condition, results of operations and cash flows. While we maintain insurance, obtain warranties from vendors and obligate contractors to meet certain performance levels, the proceeds of such insurance, warranties or performance guarantees may not cover our lost revenues, increased expenses or liquidated damages payments should we experience equipment breakdown or non-performance by contractors or vendors.

Power generation involves hazardous activities, including delivering electricity to transmission and distribution systems. In addition to natural risks such as earthquake, drought, flood, lightning, hurricane, typhoon, maelstrom and windstorm, other hazards, such as fire, structural collapse and machinery failure, are inherent risks in our operations. These and other hazards can cause significant personal injury or loss of life, severe damage to and destruction of property, plant and equipment and contamination of, or damage to, the environment and suspension of operations. The occurrence of any one of these events may result in our being named as a defendant in lawsuits asserting claims for substantial damages, including for environmental cleanup costs, personal injury and property damage and fines and/or penalties. Brazil, for example, has established strict liability for environmental and other damages related to the operation of electric power plants. Any damages related to these occurrences could negatively impact our reputation. We maintain an amount of insurance protection that we consider adequate but we cannot provide any assurance that our insurance will be sufficient or effective under all circumstances and against all hazards or liabilities to which we may be subject. Furthermore, our insurance coverage is subject to deductibles, caps, exclusions and other limitations. A loss for which we are not fully insured could have a material adverse effect on our business, financial condition, results of operations or cash flows. Further, due to rising insurance costs and changes in the insurance markets, we cannot provide any assurance that our insurance coverage will continue to be available at all or at rates or on terms similar to those presently available. Any losses not covered by insurance could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Our business is subject to substantial governmental regulation and may be adversely affected by changes in laws or regulations, as well as liability under, or any future inability to comply with, existing or future regulations or other legal requirements.

Our business is subject to extensive national, provincial, state and local laws and regulations in the countries in which we operate. Compliance with the requirements under these various regulatory regimes may cause us to incur significant costs, and failure to comply with such requirements could result in the shutdown of the non-complying facility or, the imposition of liens, fines and/or civil or criminal liability. In addition, new regulatory guidelines for renewable projects that impose stability, dependability or other requirements may lead to additional costs for our business and may reduce electricity generation during the time in which we bring the affected projects into compliance, which could have a material adverse effect on our business, financial condition, results of operations, cash flows and CAFD.

Substantially all of our assets are also subject to the rules and regulations applicable to power generators generally. If we fail to comply with these mandatory reliability standards, we could be subject to sanctions, including substantial monetary penalties, increased compliance obligations and disconnection from the grid.

Table of Contents

Our Sponsor, and third parties with whom we expect to enter into call rights agreement, may incur additional costs or delays in completing the construction of certain power generation facilities, which could materially adversely affect our growth strategy.

Our growth strategy is dependent to a significant degree on acquiring new clean energy projects from our Sponsor and third parties. Our Sponsor s or such third parties failure to complete such projects in a timely manner, or at all, could have a material adverse effect on our growth strategy. The construction of clean energy facilities involves many risks including:

delays in obtaining, or the inability to obtain, necessary permits and licenses;

delays and increased costs related to the interconnection of new power generation facilities to the transmission system;

the inability to acquire or maintain land use and access rights;

the failure to receive contracted third-party services;

interruptions to dispatch at our facilities;

supply interruptions;

work stoppages;

labor disputes;

weather interferences;

unforeseen engineering, environmental, geological and hydrological problems;

unanticipated cost overruns in excess of budgeted contingencies;

failure of contracting parties to perform under contracts, including engineering, procurement and construction contractors; and

operations and maintenance costs not covered by warranties or that occur following expiration of warranties.

Any of these risks could cause a delay in the completion of projects under development, which could have a material adverse effect on our growth strategy.

Maintenance, expansion and refurbishment of power generation facilities involve significant risks that could result in unplanned power outages or reduced output.

Our facilities may require periodic upgrading and improvement. Any unexpected operational or mechanical failure, including failure associated with breakdowns and forced outages, and any decreased operational or management performance, could reduce our facilities' generating capacity below expected levels, thereby reducing our revenues and jeopardizing our ability to pay dividends to holders of our Class A common stock at forecasted levels or at all. Degradation of the performance of our solar facilities above levels provided for in the related PPAs may also reduce our revenues. Unanticipated capital expenditures associated with maintaining, upgrading or repairing our facilities may also reduce profitability.

We may also choose to refurbish or upgrade our facilities based on our assessment that such activity will provide adequate financial returns. Such activities require time for capital expenditures before repowering, and key assumptions underpinning a decision to make such an investment may prove incorrect, including assumptions regarding costs, timing, available financing and future power prices. This could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Table of Contents

Moreover, spare parts for wind and hydro-electric turbines and solar facilities and key pieces of equipment may be difficult to acquire or be unavailable to us. Sources of some significant spare parts and other equipment are located outside the jurisdictions in which we operate. In addition, with respect to wind and hydro-electric projects, from time to time we may use less well known turbine suppliers, or may purchase wind and hydro-electric turbines and spare parts with less established track records. If we were to experience a shortage of or inability to acquire critical spare parts we could incur significant delays in returning facilities to full operation, which could negatively impact our business financial condition, results of operations and cash flows.

Our Sponsor and other developers of energy projects depend on a limited number of suppliers of solar panels, inverters, wind turbines, water turbines and other system components. Any shortage, delay or component price change from these suppliers could result in construction or installation delays, which could affect the number of projects we are able to acquire in the future.

Our solar projects are constructed with solar panels, inverters and other system components from a limited number of suppliers. Similarly, there are a limited number of suppliers of wind and water turbines and other related system components. This makes us susceptible to quality issues, shortages and price changes. If our Sponsor or third parties from whom we may acquire energy projects in the future fail to develop, maintain and expand relationships with these or other suppliers, or if they fail to identify suitable alternative suppliers in the event of a disruption with existing suppliers, the construction or installation of new solar, wind, hydro-electric or other clean power generation projects may be delayed or abandoned, which would reduce the number of available projects that we may have the opportunity to acquire in the future.

There have also been periods of industry-wide shortage of key components, including solar panels, in times of rapid industry growth. The manufacturing infrastructure for some of these components has a long lead time, requires significant capital investment and relies on the continued availability of key commodity materials, potentially resulting in an inability to meet demand for these components.

India recently considered an anti-dumping duty on solar cells and panels imported from China, Taiwan, Malaysia and the United States. However, there are currently no anti-dumping duties levied on such imported solar cells and panels. Moreover, we are not aware of any additional threatened tariffs and/or duties by governments on solar cells or other components and materials used in the development of solar generation facilities in the countries in which we operate or may operate in the future. However, such tariffs or duties could be imposed in the relevant jurisdictions in the future. The imposition of such tariffs or duties could hinder or reduce future development of solar generation facilities in the affected market and limit the number of solar projects we are able to acquire in such markets.

A shortage of key commodity materials could also lead to a reduction in the number of projects that we may have the opportunity to acquire in the future, or delay or increase the costs of acquisitions.

Negative public or community response to the development of power projects in general, or to the Call Right Projects specifically, could adversely affect our ability to acquire additional projects and thereby limit our ability to grow our CAFD.

Negative public or community response to power projects in general or the Call Right Projects specifically could adversely affect our ability to operate our power generation projects. This type of negative response can lead to legal, public relations and other challenges that impede our Sponsor s and third-party developers ability to meet development and construction targets and achieve commercial operations for projects on schedule. This could lead to an adverse effect on our ability to acquire additional projects and grow our CAFD. For example, some projects in India are and have been the subject of administrative and legal challenges from groups opposed to power projects in general or concerned with potential environmental, noise, health or aesthetic impacts, impacts on property values or the rewards of property ownership, or impacts on the natural beauty of

Table of Contents

public lands and rivers. An increase in opposition to requests for permits or successful challenges or appeals to permits issued to developers of power generation projects could have a material adverse effect on our acquisition plans.

In addition, negative public opinion of energy projects in particular could adversely affect our ability to operate our projects. Among concerns often cited by local community and other interest groups are objections to the aesthetic effect or noise disruption of plants and wind farms on rural sites near residential areas, reduction of farmland and the possible displacement or disruption of wildlife. We expect this type of opposition to continue as our Sponsor and other developers complete projects and construct future projects. It is possible that we may also face resistance from aboriginal communities in connection with any proposed expansion onto sites that may be subject to land claims. Opposition to our requests for permits or successful challenges or appeals to permits issued to us could lead to legal, public relations and other drawbacks and costs that impede our ability to meet our growth targets, continue operations for a project on schedule and generate revenues.

We are subject to environmental, health and safety laws and regulations and related compliance expenditures and liabilities.

Our assets are subject to numerous and significant national, provincial, state and local laws, including statutes, regulations, guidelines, policies, directives and other requirements governing or relating to, among other things: protection of wildlife, including threatened and endangered species and their habitat; air emissions; discharges into water; water use; the storage, handling, use, transportation and distribution of dangerous goods and hazardous, residual and other regulated materials, such as chemicals; the prevention of releases of hazardous materials into the environment; the prevention, investigation, monitoring and remediation of hazardous materials in soil and groundwater, both on- and off-site; land use and zoning matters; and workers health and safety matters. Our facilities could experience incidents, malfunctions and other unplanned events, such as spills of hazardous materials that may result in personal injury, penalties and property damage. In addition, certain environmental laws may result in liability, regardless of fault, concerning contamination at a range of properties, including properties currently or formerly owned, leased or operated by us and properties where we disposed of, or arranged for disposal of, waste. As such, the operation of our facilities carries an inherent risk of environmental, health and safety liabilities (including potential civil actions, compliance or remediation orders, fines and other penalties), and may result in our involvement from time to time in administrative and judicial proceedings relating to such matters. While we have implemented environmental, health and safety management programs designed to continually improve environmental, health and safety performance, we cannot assure you that such liabilities, as well as the costs for complying with environmental laws and regulations, will not have a material adverse effect on our business, financial condition, results of operations and cash flows.

Risks that are beyond our control, including but not limited to acts of terrorism or related acts of war, natural disasters, hostile cyber intrusions, outbreak of infectious diseases, theft or other catastrophic events, could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Energy generation facilities that we acquired from our Sponsor as Contributed Projects or those that we otherwise acquire in the future, including the Call Right Projects and any SunEdison ROFO Projects, and the properties of unaffiliated third parties on which they may be located, may be targets of terrorist activities, as well as events occurring in response to or in connection with them, that could cause environmental repercussions and/or result in full or partial disruption of the facilities ability to generate, transmit, transport or distribute electricity. Strategic targets, such as energy-related facilities, may be at greater risk of future terrorist activities than other domestic targets. Hostile cyber intrusions, including those targeting information systems as well as electronic control systems used at the generating plants and for the related distribution systems, could severely disrupt business operations and result in loss of service to customers, as well as create

Table of Contents

significant expense to repair security breaches or system damage. Additionally, jurisdictions in which we operate have experienced political instability. For example, Thailand experienced a coup d'état in May 2014. Events such as these may negatively impact favorable regulatory frameworks and governmental incentives that currently support our projects. If additional events such as these occur in the future, our results of operations may be negatively impacted.

Furthermore, in the future we may acquire projects and may conduct operations located in regions that are susceptible to natural disasters. The occurrence of a natural disaster, such as an earthquake, drought, flood, or typhoon, or localized extended outages of critical utilities or transportation systems, or any critical resource shortages, affecting us, SunEdison or third parties from whom we may seek to acquire projects in the future, could cause a significant interruption in our business, damage or destroy our facilities or those of our suppliers or the manufacturing equipment or inventory of our suppliers.

Additionally, certain of our power generation assets and equipment are at risk for theft and damage. Although theft of equipment is rare, its occurrence can be significantly disruptive to our operations. For example, because we utilize copper wire as an essential component in our electricity generation and transportation infrastructure, we are at risk for copper wire theft due to an increased demand for copper. Theft of copper wire or solar panels can cause significant disruption to our operations for a period of months and can lead to operating losses at those locations.

Any such terrorist acts, environmental repercussions or disruptions, outbreak of infectious diseases resulting in quarantine or travel restrictions, natural disasters, or theft incidents could result in a significant decrease in revenues or significant reconstruction, remediation or replacement costs, beyond what could be recovered through insurance policies, which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

The accounting treatment for many aspects of our energy business is complex and any changes to the accounting interpretations or accounting rules governing our energy business could have a material adverse effect on our GAAP-reported results of operations and financial results.

The accounting treatment for many aspects of our energy business is complex, and our future results could be adversely affected by changes in the accounting treatment applicable to our energy business. In particular, any changes to the accounting rules regarding the following matters may require us to change the manner in which we operate and finance our energy business:

revenue recognition and related timing;

related-party contracts;

operation and maintenance contracts;

joint venture accounting, including the consolidation of joint venture entities and the inclusion or exclusion of their assets and liabilities on our balance sheet;

long-term vendor agreements; and

foreign holding company tax treatment.

The seasonality of our operations may affect our liquidity.

We will need to maintain sufficient financial liquidity to absorb the impact of seasonal variations in energy production or other significant events. Following the completion of this offering, we expect that our principal source of liquidity will be cash generated from our operating activities, the cash retained by us for working

Table of Contents

capital purposes out of the gross proceeds of this offering and borrowing capacity under our Revolver. Our quarterly results of operations may fluctuate significantly for various reasons, mostly related to economic incentives and weather patterns.

The amount of electricity our solar power generation assets produce is dependent in part on the amount of sunlight, or irradiation, where the assets are located. Because shorter daylight hours in winter months results in less irradiation, the generation of particular assets will vary depending on the season. Additionally, to the extent more of our solar power generation assets are located in the northern or southern hemisphere, overall generation of our entire asset portfolio could be impacted by seasonality. Further, time-of-day pricing factors vary seasonally which contributes to variability of revenues.

The plant load factor of wind and hydro-electric energy generators and the amount of electricity generated by, and the profitability of, our wind and hydro-electric projects depend on meteorological conditions, particularly wind and water conditions, which can vary across seasons, from year-to-year and between locations and the altitude of our wind farms. Such wind conditions are also subject to general climatic changes and changing weather patterns which are variable and difficult to predict. The wind energy generators work only when wind speeds exceed certain thresholds and if wind speeds are insufficient, the electricity output from these wind farms will decrease or cease. Extreme wind or weather conditions may also affect the productivity of the wind power projects. The hydro-electric generators are dependent on water flows in order to generate electricity. These flows may vary from season-to-season and over multi-year cycles. These flows may be affected by factors such as rainfall, snowfall and snow melt.

In addition, in India, Thailand and Malaysia, the construction of energy systems may be impacted by the monsoon season, which generally lasts from May through September. As a result, we expect our initial portfolio of power generation assets to generate the lowest amount of electricity during the third quarter of each year. We therefore expect our revenue and cash available for distribution to be lower during the third quarter.

If we fail to adequately manage the fluctuations in the timing of our projects, our business, financial condition or results of operations could be materially affected. The seasonality of our energy production may create increased demands on our working capital reserves and borrowing capacity under our Revolver during periods where cash generated from operating activities is lower. In the event that our working capital reserves and borrowing capacity under our Revolver are insufficient to meet our financial requirements, or in the event that the restrictive covenants in our Revolver restrict our access to such facilities, we may require additional equity or debt financing to maintain our solvency. There can be no assurance that additional equity or debt financing will be available when required or available on commercially favorable terms or on terms that are otherwise satisfactory to us, in which event our financial condition may be materially adversely affected.

We may be required to take action or restrict operations to mitigate hazards to air navigation and interference with other air space users.

Wind energy towers and turbines can interfere with air navigation, and solar facilities can generate glare that may have a distracting effect on pilots. There is some chance that the facilities we expect to acquire could result in adverse effects on air safety, or that we could be ordered to mark our facilities or modify operations to avoid such effects. In addition, we could incur fines or penalties in connection with the failure to properly notify the proper regulatory authorities or otherwise fail to comply with regulations relating to hazardous to air navigation. In addition, wind energy facilities can interfere with military radar operations or telecommunications. If such interference occurs, we may be required to modify our operations to avoid such interference. Any of these events could have a material adverse effect on our business, financial condition and results of operations.

Table of Contents

Harming of protected species can result in curtailment of wind project operations.

The construction and operation of energy projects can adversely affect endangered, threatened or otherwise protected animal species. Wind projects, in particular, involve a risk that protected species will be harmed, as

63.1

Table of Contents

the turbine blades travel at a high rate of speed and may strike flying animals (birds or bats) that happen to travel into the path of rotating blades. While pre-construction studies are conducted to avoid siting wind projects in areas where protected species are highly concentrated, there is often a level of unavoidable risk that flying species will be harmed by project operation.

Wind energy projects like the ones we intend to acquire are likely to strike and kill bats and birds, and occasionally strike and kill endangered or protected species. As a result, we will implement applicable industry guidelines and governmentally-recommended best practices to avoid harm to protected species, such as avoiding structures with perches, avoiding guy wires that may kill birds or bats in flight, or avoiding lighting that may attract protected species at night. In addition, we will attempt to reduce the attractiveness of a site to predatory birds by site maintenance (e.g., by mowing or removal of animal and bird carcasses).

Where possible, we will obtain permits for incidental take of protected species. Taking of protected species, even if unanticipated or if the species was not known to be present in the area prior to development of the project, can result in enforcement actions and requirements to implement mitigation strategies, which may include habitat preservation efforts or curtailment of operations.

Risks related to our international operations

We operate in emerging markets and may expand our operations into countries where we currently have no presence, which subjects us to economic, social and political risks and uncertainties.

Our initial portfolio consists of projects located in China, Brazil, India, South Africa, Peru, Uruguay, Malaysia and Thailand. We intend to rapidly expand and diversify our initial project portfolio by acquiring additional utility-scale and distributed clean generation assets located in other emerging markets in Asia (except Japan), Africa and Latin America, and in similar geographies in the Middle East. Our operations in emerging markets involve a number of risks that are more prevalent than in developed markets. As a result, we are subject to a number of risks and uncertainties associated with operating and expanding internationally and in emerging markets. These include, but are not limited to:

political, social and economic instability, including wars, acts of terrorism, political unrest, boycotts, sanctions and other business restrictions;

the macroeconomic climate, including high rates of inflation, and levels of energy consumption in the countries where we have operations;

foreign exchange rate fluctuations, the imposition of currency controls and restrictions on repatriation of earnings and cash;

nationalization or other expropriation of private enterprises and land;

protectionist and other adverse public policies, including local content requirements, import/export tariffs, increased regulations or capital investment requirements;

changes in laws, including land use regulations and permitting requirements, taxation policies and/or the regulatory or legislative environment in the countries in which we operate, including reductions to renewable power incentive programs or changes in renewable power pricing policies, possibly with retroactive effect;

measures restricting the ability of our facilities to access the grid to deliver electricity at certain times or at all;

the comparative cost of other sources of energy;

longer sales and payment cycles and greater difficulty collecting accounts receivable;

Table of Contents

inability to obtain adequate financing on attractive terms and conditions;

difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms and/or timely identifying, attracting and retaining qualified technical and other personnel;

difficulty competing against competitors who may have greater financial resources and/or a more effective or established localized business presence;

international business practices that may conflict with other customs or legal requirements to which we are subject, including anti-bribery and anti-corruption laws;

any downgrading of the sovereign debt ratings of the countries in which we operate by an international rating agency;

inability to obtain, maintain or enforce intellectual property rights; and

being subject to the jurisdiction of courts other than those of the United States, including uncertainty of judicial processes and difficulty enforcing contractual agreements or judgments in foreign legal systems or incurring additional costs to do so.

For example, Thailand was assessed as a high political risk by AON Political Risk, a risk management, insurance and consulting firm. In May 2014, Thailand experienced a coup d'état, following which martial law has been enforced for nearly a year. A succession crisis could cause increased instability and unrest, and the government could repeal certain incentives each project receives under Board of Investment promotion. Moreover, the Brazilian government has exercised and continues to exercise substantial influence over many aspects of the Brazilian economy. The Brazilian government's actions to control inflation and other policies and regulations have often involved, among other measures, high interest rates, wage and price controls, currency devaluations, capital controls and limits on imports. These types of risks and uncertainties, many of which are beyond our control, could have a material adverse effect on our business, financial condition, results of operations and cash flows. Additionally, doing business in new international markets will require us to be able to respond to rapid changes in the particular market, legal, social and political conditions in these countries. We may not be able to timely develop and implement policies and strategies that will be effective in each international jurisdiction where we may decide to conduct business, which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

We are exposed to foreign currency exchange risks because all of our projects are located in foreign countries.

We generate substantially all of our revenues and incur a portion of our expenses in currencies other than U.S. dollars. Changes in economic or political conditions in any of the countries in which we operate could result in exchange rate movement, new currency or exchange controls or other currency restrictions being imposed. Because our financial results are reported in U.S. dollars, if we generate revenue or earnings in other currencies, the translation of those results into U.S. dollars can result in a significant increase or decrease in the amount of those revenues or earnings. To the extent that we are unable to match revenues received in foreign currencies with costs paid in the same currency, exchange rate fluctuations in any such currency could have an adverse effect on our profitability. Substantially all of our cash flows are generated in foreign currencies and, therefore, significant changes in the value of such foreign currencies relative to the U.S. dollar could have a material adverse effect on our financial condition and our ability to meet interest and principal payments on debts denominated in U.S. dollars. In addition to currency translation risks, we incur currency transaction risks whenever we or one of our projects enter into a purchase or sales transaction using a currency other than the local currency of the transacting entity.

Table of Contents

Given the volatility of exchange rates, we cannot assure you that we will be able to effectively manage our currency transaction and/or translation risks. It is possible that volatility in currency exchange rates will have a material adverse effect on our financial condition or results of operations. We expect to experience economic losses and gains and negative and positive impacts on earnings as a result of foreign currency exchange rate fluctuations, particularly as a result of changes in the value of the Indian Rupee and Malaysian Ringgit and other currencies.

Additionally, although a portion of our revenues and expenses are denominated in foreign currencies, we will pay dividends to holders of our Class A common stock in U.S. dollars. The amount of U.S. dollar denominated dividends paid to our holders of our Class A common stock will therefore be exposed to currency exchange rate risk. Although we intend to enter into hedging arrangements to help mitigate some of this exchange rate risk, there can be no assurance that these arrangements will be sufficient. Changes in the foreign exchange rates could have a material adverse effect on our results of operations and may adversely affect the amount of cash dividends paid by us to holders of our Class A common stock.

Land title in India can be uncertain and there is no assurance of clean title.

There is no central title registry for real property in India. Property records in India are generally maintained at the state and district level and are updated manually through physical records of all land-related documents and may not be available online for inspection or updated in a timely manner. This could result in property records investigations taking a significant amount of time or being inaccurate in certain respects, which may impact the ability to rely on them. Land records are often handwritten, in local languages and not legible, which makes it difficult to determine the content. In addition, land records are often in poor condition and are at times untraceable, which materially impedes the title investigation process. Further, improperly executed, unregistered or insufficiently stamped conveyance instruments in a property's chain of title, unregistered encumbrances in favor of third parties, rights of adverse possessors, ownership claims of family members of prior owners or third parties, or other defects that a purchaser may not be aware of, can affect the title to a property. As a result, potential disputes or claims regarding title to the land on which projects are developed or used for operations, or will be constructed in the future, may arise.

The Brazilian hydro-electric projects included in our initial product portfolio may fail to be eligible to participate in Brazil's energy reallocation mechanism in the event they do not satisfy certain minimum operating performance requirements, which could have a material adverse effect on such projects' operating results.

Brazil has adopted an energy reallocation mechanism (MRE) in an effort to mitigate the risks faced by hydro-electric generators due to variations in river flows, the centralized management of generation and of generation of use of water reservoirs by the National Grid Operator. Under Brazilian law, each hydro-electric project that is eligible and has elected to participate in the MRE is assigned a determined amount of assured energy, according to an energy supply risk criteria defined by Brazil's Ministry of Mines and Energy based on the historical river flow records. Pursuant to the MRE, all participating projects are entitled to their assured energy, irrespective of the volume of electricity generated by them as a result of the transfer of the surplus energy from those who have produced in excess of their assured energy to those that have produced less than their assured energy. Also, we cannot be assured that our projects participating in the MRE will in the future receive their full revenue payment allocation. Participating projects are subject to decreases in their energy entitlement in the event the pool of participating projects fail to meet the aggregate specified assured energy production across the entire pool. In addition, in order to continue to remain in the pool of projects participating in the MRE, hydro-electric projects are required to satisfy certain minimum operating performance requirements in terms of generated energy. In the event that any such project fails to meet such requirements, it is no longer eligible to participate in the MRE and would generally only be able to receive revenue for energy that it actually produced under its PPA. The 16 MW project known as ESPRA that is

Table of Contents

included in our initial product portfolio has been unable to meet its minimum operating requirements due to the ongoing drought in Brazil and is no longer eligible to participate in the MRE. As a result, we cannot provide any assurance that all of our Brazilian hydro-electric projects will continue to receive revenue based on their assured energy rating or otherwise be eligible to participate in the MRE or that the failure to continue to be eligible to participate in the MRE will not materially and adversely affect our business, financial condition, results of operations and cash flows.

Changing laws, rules and regulations and legal uncertainties in India may adversely affect our business and operations.

The business and operations of our projects located in India are governed by various laws and regulations, such as the Electricity Act, 2003, National Electricity Policy, 2005 and National Tariff Policy, 2006, corporate, environmental and labor laws and other legislation enacted by the Indian government and the relevant state governments in India. The business and financial performance of our Indian operations could be adversely affected by any change in laws or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to our Indian operations. For example, the Indian government recently adopted a new company law framework, which, among other things, imposed significant and new corporate governance requirements, accounting policies and audit matters and certain spending requirements for corporate social responsibility activities in the event a company's net worth or turnover meets the prescribed thresholds. The Indian government also recently adopted new legislation to facilitate the acquisition of land in India, which may affect our Indian subsidiaries, including provisions stipulating restrictions on acquisition of certain types of agricultural land and compensation, rehabilitation and resettlement of affected people residing on such acquired land. There can be no assurance that the Indian government or any state government in India will not implement new regulations and policies which will require our Indian subsidiaries to obtain additional approvals and licenses or impose onerous requirements and conditions on their operations. Any such changes and the related uncertainties with respect to the implementation of regulations may have a material adverse effect on our Indian projects and our business, financial condition and results of operations.

We do not own a controlling equity interest in any of our projects located in Malaysia and may not own a controlling equity interest in any projects in Malaysia or certain solar projects in Thailand that we may acquire in the future due to the local law ownership requirements. As a result, our ability to control management decisions and other significant matters at these projects may be limited and our interests in such projects may be subject to transfer or other related restrictions.

We do not own a controlling equity interest in any of our projects located in Malaysia and may not own a controlling equity interest in any projects in Malaysia or certain solar projects in Thailand acquired in the future due to the local law ownership requirements. In the future, we are likely to acquire additional projects in which we own less than a majority of the related equity interests in such projects. With respect to our Malaysian projects, provisions of the charter documents provide us with the right to appoint all or a majority of the board of directors, as the case may be, which in turn directs management in the operation of the relevant project companies. In future investments where we do not own a controlling interest, we will seek to exert a degree of influence with respect to the management and operation of assets in which we own less than a majority of the interests by negotiating to obtain positions on management committees or to receive certain limited governance rights. However, we may not always succeed in such negotiations, and we may be dependent on our co-venturers to operate such assets. Our co-venturers may not have the level of experience, technical expertise, human resources management and other attributes necessary to operate these assets optimally. In addition, conflicts of interest may arise in the future between us and our stockholders, on the one hand, and our co-venturers, on the other hand. Further, disagreements or disputes between us and our co-venturers could result

Table of Contents

in litigation, which could increase our expenses and potentially limit the time and effort our officers and directors are able to devote to our business.

The approval of co-venturers also may be required for us to receive distributions of funds from assets or to sell, pledge, transfer, assign or otherwise convey our interest in such assets, or for us to acquire our Sponsor's interests in such co-ventures as an initial matter. Alternatively, our co-venturers may have rights of first refusal or rights of first offer in the event of a proposed sale or transfer of our interests in such assets. These restrictions may limit the price or interest level for our interests in such assets, in the event we want to sell such interests.

Our failure to comply with South Africa's renewable energy program could have a material adverse effect on South African energy projects.

South Africa's renewable energy program requires all renewable energy generation projects to satisfy a number of social and economic development requirements that are complex and expensive to implement. Any failure to comply with these social and economic development requirements can result in reduced tariff payments under the applicable PPA or the ultimate termination of the PPA. In general, these requirements relate to the attainment of black economic empowerment, economic development and socio-economic development objectives. In addition, South Africa's renewable energy program's economic development requirements fit within the broader framework of the South African government's empowerment program currently being implemented through the Broad-Based Black Economic Empowerment Act, or BEE. This law recognizes two distinct mechanisms for the achievement of BEE objectives-compliance with codes of good practice, which have already been issued, and compliance with industry-specific transformation charters. One component of BEE is achieving a certain percentage of shareholdings by black South Africans in South African businesses over a period of years. Other components include procuring goods and services from black-owned businesses or from businesses that have earned good BEE scores and achieving certain levels of black South African employment. Compliance with the codes and applicable charters are not enforced through civil or criminal sanction, but compliance will have an effect on our ability to secure contracts in the public and private sectors. If we acquire additional energy projects located in South Africa, but are unable to comply with the requirements of the renewable energy program or achieve applicable BEE objectives, it could have a material adverse effect on our business, financial condition, results of operations, cash flows and CAFD.

We face a similar risk for certain of our projects located in Uruguay. See [Business-Government Incentives-Uruguay](#) .

Labor disputes and the labor laws could have a material adverse effect on the operation and financial performance of South African projects.

Although there is a history of positive and constructive engagement with labor unions in South Africa in recent years, there have been periods during which the various stakeholders are unable to agree on dispute resolution processes resulting in significant labor disputes and disruptive labor activities. Although we expect to contract with third-parties for the operation and maintenance of our South African projects and not hire local employees for such projects, any such project will nonetheless be at risk of its operations being disrupted for indefinite periods due to labor strikes and other labor disputes related to the parties from whom we contract operating and maintenance services. Significant labor disruptions may have a material adverse effect on the operations and financial results and condition of our South African projects.

The operating results of our energy projects in China may be adversely affected by changes in governmental policies that currently subsidize renewable energy.

The Chinese government has enacted a series of financial incentives designed to promote the development of solar and wind projects. Most importantly, the feed-in tariff program currently provides that solar projects are

Table of Contents

eligible to receive increased tariffs in an amount in excess of the benchmark tariff received by local desulphurized coal-fired generating units. The amount of the tariff to be paid to the project is established by the government based on a number of factors that are designed to make the project economically viable. The operating results of a project would be adversely affected in the event the government reduced the tariff payable to one or more of our projects. There can be no assurance that the Chinese government will not elect to reduce or eliminate the ongoing tariff payments to our renewable energy projects in China.

Pursuant to the Chinese government's Renewable Energy Law, all electrical power generated from clean and renewable energy sources is required to be purchased by the grid company provided that on-grid technical standards have been complied with and required approvals have been obtained. Nevertheless, solar and wind projects have periodically experienced periods of curtailment by the grid company due to a lack of infrastructure and transmission capacity. Curtailment results in reduced tariff payments to the project as the project is only entitled to receive payment for energy delivered to the grid companies. Our projects in China may experience periodic reductions in revenue due to curtailments attributable to limitations on the electricity grids served by these projects.

Chinese solar and wind projects typically enter into a framework PPA with a power grid company with an initial term typically ranging from three to five years. These framework PPAs do not necessarily specify any volume or price obligations on the part of the offtake purchaser. The solar and wind project and the power grid company will further enter into short-term agreements under the framework PPA, which are subject to annual renewals at the election of the grid company. The terms of these annual supplemental agreements are subject to change to the extent the government changes its tariff rate. As a result, our projects in China will likely not have any long-term contractual protection on the price at which they may sell the power they generate. Although China has indicated an intention to keep the subsidized tariff rates in effect for the foreseeable future, it is under no obligation to do so and therefore the profitability of solar and wind projects in China is subject to change with little or no advance notice.

Changes in foreign withholding taxes could adversely affect our results of operations.

We currently conduct our operations in China, Brazil, India, Peru, Uruguay, Malaysia, Thailand and South Africa and expect in the future to expand our business into other foreign countries. Currently, distributions of earnings and other payments, including interest, to us from our projects may be subject to withholding taxes imposed by the jurisdiction in which the project entities are formed or operating. Any such withholding taxes will reduce the amount of after-tax cash we can receive. In addition, we are subject to risks that foreign countries may restrict distributions from the project entities or impose additional withholding taxes or otherwise tax our foreign income. If distributions are restricted, those withholding taxes are increased or additional foreign taxes are imposed, the amount of after-tax cash we receive will be further reduced. For additional discussion of risks related to taxation, see **Risks related to taxation**. United States and foreign tax provisions and policies could change at any time, and such changes may result in a material increase in our estimated future income tax liability.

Under renewable energy programs in certain of the countries in which we operate, renewable energy producers are required to contract with a single offtake purchaser resulting in concentrated counterparty risk.

Under South Africa's renewable energy program, the only offtake purchaser of electricity produced by renewable energy producers is Eskom, which is the country's largest state-owned power utility that currently generates approximately 95% of South Africa's electricity. As a result, material counterparty credit risk resides in a single public utility and not multiple local utilities. Eskom's credit ratings have declined in recent years, and we can provide no assurances that its credit profile will not continue to deteriorate. Under its renewable energy program, the South African government guarantees the payment of Eskom's obligations under its PPAs with

Table of Contents

renewable energy producers in defined circumstances, and in 2014 the National Treasury of South Africa announced a support package for Eskom approved by the Cabinet of South Africa. We can provide no assurance that the South African government will be able to honor its guarantee of Eskom's obligations or that the support package approved by the National Treasury of South Africa will be sufficient in assisting Eskom in fulfilling its obligation under our PPAs. For more information, see [Business Government incentives South Africa](#). If Eskom were to default on its performance of obligations under the applicable PPA for our South African projects, and the South African government did not fulfill its guarantee, it may have a material adverse effect on the operations, financial results and condition of our South African projects.

Our international operations require us to comply with anti-corruption laws and regulations of the United States government and various non-U.S. jurisdictions.

Doing business in multiple countries requires us and our subsidiaries to comply with the laws and regulations of the United States government and various non-U.S. jurisdictions. Our failure to comply with these rules and regulations may expose us to liabilities. These laws and regulations may apply to us, our subsidiaries, joint ventures in which we may be invested, individual directors, officers, employees and agents, and those of our Sponsor, and may restrict our operations, trade practices, investment decisions and partnering activities. In particular, our operations are subject to United States and foreign anti-corruption laws and regulations, such as the Foreign Corrupt Practices Act of 1977, or the FCPA. The FCPA prohibits United States companies and their officers, directors, employees and agents acting on their behalf from corruptly offering, promising, authorizing or providing anything of value to foreign officials for the purposes of influencing official decisions or obtaining or retaining business or otherwise obtaining favorable treatment. The FCPA also requires companies to make and keep books, records and accounts that accurately and fairly reflect transactions and dispositions of assets and to maintain a system of adequate internal accounting controls. As part of our business, we deal with state-owned business enterprises, the employees and representatives of which may be considered foreign officials for purposes of the FCPA. As a result, business dealings between us and our Sponsor and any such foreign official could expose our company to the risk of violating anti-corruption laws even if such business practices may be customary or are not otherwise prohibited between our company and a private third party. Violations of these legal requirements are punishable by criminal fines and imprisonment, civil penalties, disgorgement of profits, injunctions, debarment from government contracts, as well as other remedial measures. Additionally, under certain of our PPAs such violations entitle counterparties to terminate the agreement. We have established policies and procedures designed to assist us and our personnel in complying with applicable United States and non-U.S. laws and regulations; however, we cannot assure you that these policies and procedures will completely eliminate the risk of a violation of these legal requirements, and any such violation (inadvertent or otherwise) could have a material adverse effect on our business, financial condition and results of operations.

Changes in foreign policy regarding high interest rates may affect the results of our operations.

Our projects are located in countries, such as Brazil, that have traditionally adopted a monetary policy that maintains high interest rates in order to offset inflation. These monetary policies can inhibit economic growth and reduce industrial power consumption. As a result, future investments in power generation may be limited due to lower market prices for electricity than currently expected.

Under Brazilian law, we are strictly liable for any damages resulting from inadequate supply of electricity to distribution companies, and our contracted insurance policies may not fully cover such damages.

Under Brazilian law, we are strictly liable for direct and indirect damages resulting from the inadequate supply of electricity to distribution companies, such as abrupt interruptions or disturbances arising from the generation, distribution or transmission systems. Accordingly, we may be held liable for such damages even if we were not at fault. As a result of the inherent uncertainty involved in these matters, we do not maintain any provisions in relation to potential damage, and these interruptions or disturbances may not be covered by our

Table of Contents

insurance policies or may exceed the coverage limits of such policies. Accordingly, if we are found liable of damages in a material amount, our financial condition and results of operations would be materially adversely affected to a greater degree than those claims where we have recorded reserve provisions.

Risks related to our relationship with our Sponsor

Our Sponsor will be our controlling stockholder and will exercise substantial influence over us, and we are highly dependent on our Sponsor.

Our Sponsor will beneficially own all of our outstanding Class B common stock upon completion of this offering. Each share of our outstanding Class B common stock will entitle our Sponsor to _____ votes on all matters presented to our stockholders generally. As a result of its ownership of our Class B common stock, our Sponsor will possess approximately _____% (or approximately _____% if the underwriters exercise in full their option to purchase additional shares of Class A common stock) of the combined voting power of our Class A common stock and Class B common stock even though our Sponsor will own only _____% of our Class A common stock, Class B common stock and Class B1 common stock on a combined basis (or approximately _____% if the underwriters exercise in full their option to purchase additional shares of Class A common stock). We intend to use any net proceeds we receive as a result of the exercise of the underwriters' option to purchase additional shares of Class A common stock to purchase Class B Units (and shares of Class B common stock) held by our Sponsor. However, our Sponsor will continue to have a controlling interest in our voting stock and has expressed its intention to maintain a controlling interest in us going forward. As a result of this ownership, our Sponsor will continue to have a substantial influence on our affairs and its voting power will constitute a large percentage of any quorum of our stockholders voting on any matter requiring the approval of our stockholders. Such matters include the election of directors, the adoption of amendments to our amended and restated certificate of incorporation and bylaws and approval of mergers or sale of all or substantially all of our assets. This concentration of ownership may also have the effect of delaying or preventing a change in control of our company or discouraging others from making tender offers for our shares, which could prevent stockholders from receiving a premium for their shares. In addition, our Sponsor, for so long as it and its controlled affiliates possess a majority of the combined voting power, will have the power to appoint all of our directors. Our Sponsor will also have a right to specifically designate up to two additional directors to our board of directors until such time as our Sponsor and its controlled affiliates cease to own shares representing a majority voting power in us. Our Sponsor may cause corporate actions to be taken even if its interests conflict with the interests of our other stockholders (including holders of our Class A common stock). See Certain relationships and related party transactions Procedures for review, approval and ratification of related-person transactions; conflicts of interest.

Furthermore, we will depend on the management and administration services provided by or under the direction of our Sponsor under the Management Services Agreement. Other than personnel designated as dedicated to us, SunEdison personnel and support staff that provide services to us under the Management Services Agreement will not be required to, and we do not expect that they will, have as their primary responsibility the management and administration of our business or act exclusively for us. Under the Management Services Agreement, our Sponsor will have the discretion to determine which of its employees will perform assignments required to be provided to us under the Management Services Agreement. Certain personnel, including our Chief Executive Officer, may be designated to perform services for us and for TerraForm Power at the same time. Any failure to effectively manage our operations or to implement our strategy could have a material adverse effect on our business, financial condition, results of operations and cash flows. The Management Services Agreement will continue in perpetuity, until terminated in accordance with its terms. The non-compete provisions of the Management Services Agreement will survive termination indefinitely.

Table of Contents

The Support Agreement provides us the option to purchase additional projects that have Projected FTM CAFD of at least \$ million from the completion of this offering through the end of 2016 and \$ million during 2017, representing aggregate Projected FTM CAFD of \$ million. The Support Agreement also provides us a right of first offer with respect to the SunEdison ROFO Projects. Any failure by our Sponsor to perform its requirements under these arrangements or the failure by us to identify and contract with replacement service providers, if required, could adversely affect the operation of our facilities and have a material adverse effect on our business, financial condition, results of operations and cash flows.

We may not be able to consummate future acquisitions from our Sponsor.

Our ability to grow through acquisitions depends, in part, on our Sponsor's ability to identify and present us with acquisition opportunities. While SunEdison established our company to hold and acquire a diversified suite of power-generating assets, there are a number of factors which could materially and adversely impact the extent to which suitable acquisition opportunities are made available from our Sponsor.

In particular, the question of whether a particular asset is suitable is highly subjective and is dependent on a number of factors, including an assessment by our Sponsor relating to our liquidity position at the time, the risk profile of the opportunity and its fit with the balance of our portfolio. If our Sponsor determines that an opportunity is not suitable for us, it may still pursue such opportunity on its own behalf.

In making these determinations, our Sponsor may be influenced by factors that result in a misalignment or conflict of interest. See *Risks related to our business*. We may not be able to effectively identify or consummate any future acquisitions on favorable terms, or at all. Additionally, even if we consummate acquisitions on terms that we believe are favorable, such acquisitions may in fact result in a decrease in cash available for distribution per Class A common share.

The departure of some or all of our Sponsor's employees, particularly executive officers or key employees, could prevent us from achieving our objectives.

Our growth strategy relies on our and our Sponsor's executive officers and key employees for their strategic guidance and expertise in the selection of projects that we may acquire in the future. Because the solar power industry is relatively new, there is a scarcity of experienced executives and employees in the solar power industry. The same is true of the wind power industry. Our future success will depend on the continued service of these individuals. Our Sponsor has experienced departures of key professionals and personnel in the past and may do so in the future, and we cannot predict the impact that any such departures will have on our ability to achieve our objectives. The departure of a significant number of our Sponsor's professionals or a material portion of its employees who perform services for us or on our behalf, or the failure to appoint qualified or effective successors in the event of such departures, could have a material adverse effect on our ability to achieve our objectives. The Management Services Agreement will not require our Sponsor to maintain the employment of any of its professionals that are providing services to us or, to cause any particular professional to provide services to us or on our behalf and our Sponsor may terminate the employment of any professional. Additionally, our Chief Executive Officer also serves as the chief executive officer of TerraForm Power and is not contractually or otherwise required to allocate any specific amount of time to matters pertaining to our business.

Our organizational and ownership structure may create significant conflicts of interest that may be resolved in a manner that is not in our best interests or the best interests of holders of our Class A common stock and that may have a material adverse effect on our business, financial condition, results of operations and cash flows.

Our organizational and ownership structure involves a number of relationships that may give rise to certain conflicts of interest between us and holders of our Class A common stock, on the one hand, and our Sponsor, on

Table of Contents

the other hand. Immediately prior to the completion of this offering, we will enter into the Management Services Agreement with our Sponsor. Our executive officers will be employees of our Sponsor and certain of them will continue to have equity interests in our Sponsor and TerraForm Power and, accordingly, the benefit to our Sponsor from a transaction between us and our Sponsor will proportionately inure to their benefit as holders of equity interests in our Sponsor. Following the completion of this offering, our Sponsor will be a related party under the applicable securities laws governing related party transactions and may have interests which differ from our interests or those of holders of our Class A common stock, including with respect to the types of acquisitions made, the timing and amount of dividends by Global, the reinvestment of returns generated by our operations, the use of leverage when making acquisitions and the appointment of outside advisors and service providers.

Any material transaction between us and our Sponsor (including the acquisition of Call Right Projects and SunEdison ROFO Projects) will be subject to our related party transaction policy, which will require prior approval of such transaction by our Corporate Governance and Conflicts Committee, as discussed in Management Committees of the board of directors Corporate Governance and Conflicts Committee. Those of our executive officers who will continue to have economic interests in our Sponsor following the completion of this offering may be conflicted when advising our Corporate Governance and Conflicts Committee or otherwise participating in the negotiation or approval of such transactions. These executive officers have significant project- and industry-specific expertise that could prove beneficial to our Corporate Governance and Conflicts Committee's decision-making process and the absence of such strategic guidance could have a material adverse effect on the Corporate Governance and Conflicts Committee's ability to evaluate any such transaction. Furthermore, the creation of our Corporate Governance and Conflicts Committee and our related party transaction approval policy may not insulate us from derivative claims pertaining to related party transactions and the conflicts of interest described in this risk factor. Regardless of the merits of such claims, we may be required to expend significant management time and financial resources in the defense thereof.

Additionally, to the extent we fail to appropriately deal with any such claims, it could negatively impact our reputation and ability to raise additional funds and the willingness of counterparties to do business with us, all of which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

The holder or holders of our IDRs may elect to cause Global LLC to issue Class B1 units to it or them in connection with a resetting of target distribution levels related to the IDRs, without the approval of our Corporate Governance and Conflicts Committee or the holders of Global LLC's units, us as manager of Global LLC, or our board of directors (or any committee thereof). This could result in lower distributions to holders of our Class A common stock.

The holder or holders of a majority of the IDRs (initially our Sponsor through a wholly owned subsidiary) have the right, if the Subordination Period has expired and if we have made cash distributions in excess of the then-applicable Third Target Distribution for each of the prior four consecutive fiscal quarters, to reset the initial target distribution levels at higher levels based on Global LLC's cash distribution levels at the time of the exercise of the reset election. The right to reset the target distribution levels may be exercised without the approval of the holders of Global LLC's units, us, as manager of Global LLC, or our board of directors (or any committee thereof). Following a reset election, a baseline distribution amount will be calculated as an amount equal to the average cash distribution per Class A unit, Class B1 unit and Class B unit for the two consecutive fiscal quarters immediately preceding the reset election, such amount is referred to as the Reset Minimum Quarterly Distribution, and the target distribution levels will be reset to correspondingly higher levels based on percentage increases above the Reset Minimum Quarterly Distribution.

Table of Contents

In connection with the reset election, the holders of the IDRs will receive Global LLC's Class B1 units and shares of our Class B1 common stock. Therefore, the reset of the IDRs will dilute existing stockholders' ownership. This dilution of ownership may cause dilution of future distributions per share as a higher percentage of distributions per share would go to our Sponsor or a future owner of the IDRs if the IDRs are sold.

We anticipate that our Sponsor would exercise this reset right in order to facilitate acquisitions or internal growth projects that would not be sufficiently accretive to cash distributions without such conversion. However, it is possible that our Sponsor (or another holder) could exercise this reset election at a time when Global LLC is experiencing declines in aggregate cash distributions or is expected to experience declines in its aggregate cash distributions. In such situations, the holder of the IDRs may desire to be issued Class B1 units rather than retain the right to receive incentive distributions based on the initial target distribution levels. As a result, a reset election may cause Global (which will hold all of Global LLC's Class A units), and, in turn, holders of our Class A common stock, to experience a reduction in the amount of cash distributions that they would have otherwise received had Global LLC not issued new Class B1 units to the holders of the IDRs in connection with resetting the target distribution levels. See "Certain relationships and related party transactions" Amended and Restated Operating Agreement of Global LLC Distributions.

The IDRs may be transferred to a third party without the consent of holders of Global LLC's units, us, as manager of Global LLC, or our board of directors (or any committee thereof).

Our Sponsor may not sell, transfer, exchange, pledge (other than as collateral under its credit facilities) or otherwise dispose of the IDRs to any third party (other than its controlled affiliates) until after it has satisfied its \$ million aggregate Projected FTM CAFD commitment to us in accordance with the Support Agreement. Our Sponsor will pledge the IDRs as collateral under its existing credit agreement concurrently with the consummation of this offering, but the IDRs may not be transferred upon foreclosure until after our Sponsor has satisfied its Projected FTM CAFD commitment to us. After that period, our Sponsor may transfer the IDRs to a third party at any time without the consent of the holders of Global LLC's units, us, as manager of Global LLC, or our board of directors (or any committee thereof). However, our Sponsor has granted us a right of first refusal with respect to any proposed sale of IDRs to a third party (other than its controlled affiliates), which we may exercise to purchase the IDRs proposed to be sold on the same terms offered to such third party at any time within 30 days after we receive written notice of the proposed sale and its terms. If our Sponsor transfers the IDRs to a third party, our Sponsor would not have the same incentive to grow our business and increase quarterly distributions to holders of Class A common stock over time. For example, a transfer of IDRs by our Sponsor could reduce the likelihood of our Sponsor accepting offers made by us relating to assets owned by our Sponsor, as it would have less of an economic incentive to grow our business, which in turn would impact our ability to grow our portfolio.

If we incur material tax liabilities, distributions to holders of our Class A common stock may be reduced, without any corresponding reduction in the amount of distributions paid to our Sponsor or other holders of the IDRs, Class B units and Class B1 units.

We are entirely dependent upon distributions we receive from Global LLC in respect of the Class A units held by us for payment of our expenses and other liabilities. We must make provisions for the payment of our income tax liabilities, if any, before we can use the cash distributions we receive from Global LLC to make distributions to our Class A common stockholders. If we incur material tax liabilities, our distributions to holders of our Class A common stock may be reduced. However, the cash available to make distributions to the holders of the Class B units and IDRs issued by Global LLC (all of which will initially be held by our Sponsor), or to the holders of any Class B1 units that may be issued by Global LLC in connection with an IDR reset or otherwise, will not be reduced by the amount of our tax liabilities. As a result, if we incur material tax liabilities, distributions to

Table of Contents

holders of our Class A common stock may be reduced, without any corresponding reduction in the amount of distributions paid to our Sponsor or other holders of the IDRs, Class B units and Class B1 units of Global LLC.

Our ability to terminate the Management Services Agreement early will be limited.

The Management Services Agreement will provide that we may terminate the agreement upon 90 days prior written notice to our Sponsor upon the occurrence of any of the following: (i) our Sponsor defaults in the performance or observance of any material term, condition or covenant contained therein in a manner that results in material harm to us and the default continues unremedied for a period of 30 days after written notice thereof is given to our Sponsor; (ii) our Sponsor engages in any act of fraud, misappropriation of funds or embezzlement that results in material harm to us; (iii) our Sponsor is grossly negligent in the performance of its duties under the agreement and such negligence results in material harm to us; (iv) upon the happening of certain events relating to the bankruptcy or insolvency of our Sponsor; (v) upon the earlier to occur of the five-year anniversary of the date of the agreement and the end of any twelve-month period ending on the last day of a calendar quarter during which we generated cash available for distribution in excess of \$ million; or (vi) on such date as our Sponsor and its affiliates no longer beneficially hold more than 50% of the voting power of our capital stock. Furthermore, if we request an amendment to the scope of services provided by our Sponsor under the Management Services Agreement and we are not able to agree with our Sponsor as to a change to the service fee resulting from a change in the scope of services within 180 days of the request, we will be able to terminate the agreement upon 30 days prior notice to our Sponsor.

We will not be able to terminate the agreement for any other reason, and the agreement continues in perpetuity until terminated in accordance with its terms. The Management Services Agreement includes non-compete provisions that will prohibit us from engaging in certain activities competitive with our Sponsor's power project development and construction business. These non-compete provisions will survive termination indefinitely. If our Sponsor's performance does not meet the expectations of investors, and we are unable to terminate the Management Services Agreement, the market price of our Class A common stock could suffer.

If our Sponsor terminates the Management Services Agreement or defaults in the performance of its obligations under the agreement, we may be unable to contract with a substitute service provider on similar terms, or at all.

We will rely on our Sponsor to provide us with management services under the Management Services Agreement and will not have independent executive, senior management or other personnel. The Management Services Agreement will provide that our Sponsor may terminate the agreement upon 90 days prior written notice of termination to us upon the occurrence of any of the following: (i) we default in the performance or observance of any material term, condition or covenant contained in the agreement in a manner that results in material harm to our Sponsor and the default continues unremedied for a period of 30 days after written notice of the breach is given to us; (ii) upon the happening of certain events relating to our bankruptcy or insolvency; (iii) upon the earlier to occur of the five-year anniversary of the date of the agreement and the end of any twelve-month period ending on the last day of a calendar quarter during which we generated cash available for distribution in excess of \$ million; or (iv) on such date as our Sponsor and its affiliates no longer beneficially hold more than 50% of the voting power of our capital stock. If our Sponsor terminates the Management Services Agreement or defaults in the performance of its obligations under the agreement, we may be unable to contract with a substitute service provider on similar terms or at all, and the costs of substituting service providers may be substantial. In addition, in light of our Sponsor's familiarity with our assets, a substitute service provider may not be able to provide the same level of service due to lack of pre-existing synergies. If we cannot locate a service provider that is able to provide us with substantially similar services as our Sponsor does under the Management Services Agreement on similar terms, it would likely have a material adverse effect on our business, financial condition, results of operation and cash flows.

Table of Contents

We must still agree on a number of additional matters covered by the Support Agreement, including the timeline for the Call Rights Projects.

Pursuant to the Support Agreement, our Sponsor will provide us with the right, but not the obligation, to purchase for cash certain clean energy projects from its project pipeline with aggregate Projected FTM CAFD of at least \$ million by the end of 2017. The Support Agreement identifies certain of the Call Right Projects, which we believe will collectively satisfy a majority of the total Projected FTM CAFD commitment. Our Sponsor may, however, remove a project under construction from the Call Right Project list effective upon notice to us, if, in its reasonable discretion, a project is unlikely to be successfully completed. In that case, the Sponsor will be required to replace such project with one or more additional reasonably equivalent projects that have a similar economic profile.

The Support Agreement also provides that our Sponsor is required to offer us additional qualifying Call Right Projects from its pipeline on a quarterly basis until we have acquired Call Right Projects that are projected to generate the specified minimum amount of Projected FTM CAFD for each of the periods covered by the Support Agreement. These additional Call Right Projects must satisfy certain criteria, including being subject to a fully executed PPA with a creditworthy counterparty. The price for each Call Right Project will be the fair market value. The Support Agreement provides that we will work with our Sponsor to mutually agree on the fair market value and Projected FTM CAFD of each Call Right Project within a reasonable time after it is added to the list of identified Call Right Projects. If we are unable to agree on the fair market value or Projected FTM CAFD for a project within 90 calendar days after it is added to the list (or such shorter period as will still allow us to complete the call right exercise process), we or our Sponsor, upon written notice from either party, will engage a third-party advisor to determine the disputed item so that such material economic terms reflect common practice in the relevant market. The other economic terms with respect to our purchase of a Call Right Project will also be determined by mutual agreement or, if we are unable to reach agreement, by a third-party advisor. We may not achieve all of the expected benefits from the Support Agreement if we are unable to mutually agree with our Sponsor with respect to these matters. Until the price for a Call Right Project is agreed or determined, in the event our Sponsor receives a bona fide offer for a Call Right Project from a third party, we have the right to match the price offered by such third party and acquire such Call Right Project on the terms our Sponsor could obtain from the third party. In addition, our effective remedies under the Support Agreement may also be limited in the event that a material dispute with our Sponsor arises under the terms of the Support Agreement.

In addition, our Sponsor has agreed to grant us a right of first offer on any of the SunEdison ROFO Projects that it determines to sell or otherwise transfer during the six-year period following the completion of this offering. Under the terms of the Support Agreement, our Sponsor will agree to negotiate with us in good faith, for a period of 20 days, to reach an agreement with respect to any proposed sale of a SunEdison ROFO Project for which we have exercised our right of first offer before it may sell or otherwise transfer such SunEdison ROFO Project to a third party. However, our Sponsor will not be obligated to sell any of the SunEdison ROFO Projects and, as a result, we do not know when, if ever, any SunEdison ROFO Projects will be offered to us. Furthermore, in the event that our Sponsor elects to sell SunEdison ROFO Projects, our Sponsor will not be required to accept any offer we make and may choose to sell the assets to a third party or not sell the assets at all.

The liability of our Sponsor is limited under our arrangements with it and we have agreed to indemnify our Sponsor against claims that it may face in connection with such arrangements, which may lead it to assume greater risks when making decisions relating to us than it otherwise would if acting solely for its own account.

Under the Management Services Agreement, our Sponsor will not assume any responsibility other than to provide or arrange for the provision of the services described in the Management Services Agreement in good

Table of Contents

faith. In addition, under the Management Services Agreement, the liability of our Sponsor and its affiliates will be limited to the fullest extent permitted by law to conduct involving bad faith, fraud, willful misconduct or gross negligence or, in the case of a criminal matter, action that was known to have been unlawful. In addition, we will agree to indemnify our Sponsor to the fullest extent permitted by law from and against any claims, liabilities, losses, damages, costs or expenses incurred by an indemnified person or threatened in connection with our operations, investments and activities or in respect of or arising from the Management Services Agreement or the services provided by our Sponsor, except to the extent that the claims, liabilities, losses, damages, costs or expenses are determined to have resulted from the conduct in respect of which such persons have liability as described above. These protections may result in our Sponsor tolerating greater risks when making decisions than otherwise would be the case, including when determining whether to use leverage in connection with acquisitions. The indemnification arrangements to which our Sponsor is a party may also give rise to legal claims for indemnification that are adverse to us or holders of our Class A common stock.

Risks inherent in an investment in us

We may not be able to continue paying comparable or growing cash dividends to holders of our Class A common stock in the future.

The amount of our cash available for distribution principally depends upon the amount of cash we generate from our operations, which will fluctuate from quarter to quarter based on, among other things:

the level and timing of capital expenditures we make;

the completion of ongoing construction activities on time and on budget;

the level of our operating and general and administrative expenses, including reimbursements to our Sponsor for services provided to us in accordance with the Management Services Agreement;

seasonal variations in revenues generated by the business;

our debt service requirements and other liabilities;

fluctuations in our working capital needs;

our ability to borrow funds and access capital markets;

fluctuations in foreign exchange rates;

restrictions contained in our debt agreements (including our project-level financing and, if applicable, our Revolver); and

other business risks affecting our cash levels.

As a result of all these factors, we cannot guarantee that we will have sufficient cash generated from operations to pay a specific level of cash dividends to holders of our Class A common stock. Furthermore, holders of our Class A common stock should be aware that the amount of cash available for distribution depends primarily on our cash flow, and is not solely a function of profitability, which is affected by non-cash items. We may incur other expenses or liabilities during a period that could significantly reduce or eliminate our cash available for distribution and, in

turn, impair our ability to pay dividends to holders of our Class A common stock during the period. Because we are a holding company, our ability to pay dividends on our Class A common stock is limited by restrictions on the ability of our subsidiaries to pay dividends or make other distributions to us, including restrictions under the terms of the agreements governing project-level financing. Our project-level financing agreements generally prohibit distributions from the project entities prior to COD and, in certain cases, for a

Table of Contents

period after COD, and thereafter prohibit distributions to us unless certain specific conditions are met, including the satisfaction of financial ratios, and, in the case of our Indian projects, the consent of the lender is obtained. Our Revolver will also restrict our ability to declare and pay dividends if an event of default has occurred and is continuing or if the payment of the dividend would result in an event of default.

Global LLC's CAFD will likely fluctuate from quarter to quarter, in some cases significantly, due to seasonality. See Management's discussion and analysis of financial condition and results of operations Factors that significantly affect our results of operations and business Seasonality. As a result, we may cause Global LLC to reduce the amount of cash it distributes to its members in a particular quarter to establish reserves to fund distributions to its members in future periods for which the cash distributions we would otherwise receive from Global LLC would otherwise be insufficient to fund our quarterly dividend. If we fail to cause Global LLC to establish sufficient reserves, we may not be able to maintain our quarterly dividend with respect to a quarter adversely affected by seasonality.

Finally, dividends to holders of our Class A common stock will be paid at the discretion of our board of directors. Our board of directors may decrease the level of or entirely discontinue payment of dividends. For a description of additional restrictions and factors that may affect our ability to pay cash dividends, please read Cash Dividend Policy.

Capital controls could limit our ability to finance the acquisition of renewable energy projects and our ability to repatriate cash.

Certain jurisdictions in which projects in our initial portfolio are located or in which we expect to acquire projects in the future impose capital controls that either restrict investment by foreign sources, restrict the transfer of capital to foreign recipients or both. For example, South Africa currently has an exchange control regime which includes restrictions on exporting capital from South Africa and which may accordingly place constraints on cash flows from the South African projects. While exchange controls have been relaxed in recent years, South African companies remain subject to restrictions on their ability to raise and deploy capital outside of the Southern African Common Monetary Area. Similarly, companies incorporated in India are subject to regulatory restrictions on borrowing in foreign currencies and the granting of security interests in collateral. Such restrictions could limit our ability to raise financings on competitive terms and refinance existing indebtedness. Additionally, our ability to borrow money against the collateral located in India is subject to exchange control regulations in India and may require the prior approval of the Indian regulatory authorities.

The assumptions underlying the forecasts and targeted growth rate presented elsewhere in this prospectus are inherently uncertain and subject to significant business, economic, financial, regulatory and competitive risks that could cause our actual cash available for distribution, in the aggregate and/or on a per-share basis, to differ materially from our forecasts.

The forecasts presented elsewhere in this prospectus only include projects that are in our initial portfolio and were prepared using assumptions that our management believes are reasonable. See Cash dividend policy Assumptions and considerations. These include assumptions regarding the future operating costs of our facilities, the dates that projects in our initial portfolio will reach COD, our facilities' future level of power generation, interest rates, administrative expenses, tax treatment of income, future capital expenditure requirements, budget and the absence of material adverse changes in economic conditions or government regulations. They also include assumptions based on solar and wind resource studies and hydrological evaluations that take into account meteorological conditions and on the availability of our facilities. The forecasts assume that no unexpected risks materialize during the forecast periods. Any one or more than one of these assumptions may prove to be incorrect, in which case our actual results of operations will be different from, and possibly materially worse than, those contemplated by the forecasts. There can be no assurance that the assumptions underlying the forecasts presented elsewhere in this prospectus will prove to be accurate.

Table of Contents

Actual results for the forecast periods will likely vary from the forecast results and those variations may be material. We make no representation that actual results achieved in the forecast periods will be the same, in whole or in part, as those forecasted herein.

The factors described above may also impact our ability to achieve our target dividend per share annual growth rate over the three-year period following the completion of this offering. This target assumes that no unexpected risks materialize over the next three years and is based on additional assumptions, including the market value of projects we acquire from third parties, our cost of capital, the ratio of debt to equity with respect to the financing of acquisitions and whether we have the financial resources to acquire Call Right Projects and the timing of such acquisitions. Even if the Projected FTM CAFD commitment is satisfied we may not achieve the targeted growth rate. The price for certain of the Call Right Projects will be determined in the future, and our Sponsor is not obligated to offer us any of the Call Right Projects on terms that will allow us to achieve our targeted growth rate. Accordingly, we may not be able to consummate acquisitions with our Sponsor or unaffiliated third parties that enable us to achieve our targeted growth rate.

On a pro forma basis, we would not have had sufficient CAFD to pay the full initial quarterly distribution on all of our common units for the year ended December 31, 2014.

Global LLC must generate approximately \$ million of CAFD for us to pay the aggregate initial quarterly distributions on all of our common stock that will be outstanding immediately following this offering for the immediately following four quarters, assuming no reserves are established. The amount of pro forma CAFD was \$ million for the year ended December 31, 2014, which would have allowed us to pay % of the aggregate initial quarterly distribution on all of our common stock during this period. For a calculation of our ability to make cash distributions to our stockholders based on our historical as adjusted results, see Cash distribution policy. If Global LLC is not able to generate additional cash for distribution to us in future periods, we may not be able to pay the full initial quarterly distribution or any amount on our common stock, in which event the market price of our Class A common stock may decline materially.

We are a holding company and our only material asset after completion of this offering will be our interest in Global LLC, and we are accordingly dependent upon distributions from Global LLC and its subsidiaries to pay dividends and taxes and other expenses.

Global is a holding company and has no material assets other than its ownership of membership interests in Global LLC, a holding company that will have no material assets other than its interest in Global Operating LLC, whose sole material assets are the projects that have been or will be contributed to it by SunEdison in the Contributed Projects and the projects that have been or will be acquired through any acquisitions. None of Global, Global LLC or Global Operating LLC have any independent means of generating revenue. We intend to cause Global Operating LLC's subsidiaries to make distributions to Global Operating LLC and, in turn, make distributions to Global LLC, and, Global LLC, in turn, to make distributions to Global in an amount sufficient to cover all applicable taxes payable and dividends, if any, declared by us. To the extent that we need funds to pay a quarterly cash dividend to holders of our Class A common stock or otherwise, and Global Operating LLC or Global LLC is restricted from making such distributions under applicable law or regulation or is otherwise unable to provide such funds (including as a result of Global Operating LLC's operating subsidiaries being unable to make distributions), it could materially adversely affect our liquidity and financial condition and limit our ability to pay dividends to holders of our Class A common stock.

Market interest rates may have an effect on the value of our Class A common stock.

One of the factors that will influence the price of shares of our Class A common stock will be the effective dividend yield of such shares (i.e., the yield as a percentage of the then current market price of our shares)

Table of Contents

relative to market interest rates. An increase in market interest rates, which are currently at low levels relative to historical rates, may lead prospective purchasers of shares of our Class A common stock to expect a higher dividend yield. If market interest rates increase and we are unable to increase our dividend in response, including due to an increase in borrowing costs, insufficient cash available for distribution or otherwise, investors may seek alternative investments with higher yield, which would result in selling pressure on, and a decrease in the market price of, our Class A common stock. As a result, the price of our Class A common stock may decrease as market interest rates increase.

If you purchase shares of Class A common stock sold in this offering, you will incur immediate and substantial dilution.

If you purchase shares of Class A common stock in this offering, you will incur immediate and substantial dilution in the amount of \$ per share, because the assumed initial public offering price of \$ per share (which is the midpoint of the price range set forth on the cover page of this prospectus) is substantially higher than the as adjusted net tangible book value per share of our outstanding Class A common stock on an as adjusted basis giving effect to the Organizational Transactions. The as adjusted net tangible book value of our Class A common stock is \$ per share. For additional information, see Dilution.

If we are deemed to be an investment company, we may be required to institute burdensome compliance requirements and our activities may be restricted, which may make it difficult for us to complete strategic acquisitions or effect combinations.

If we are deemed to be an investment company under the Investment Company Act of 1940, or the Investment Company Act, our business would be subject to applicable restrictions under the Investment Company Act, which could make it impractical for us to continue our business as contemplated.

We believe our company is not an investment company under Section 3(b)(1) of the Investment Company Act because we are primarily engaged in a non-investment company business, and we intend to conduct our operations so that we will not be deemed an investment company. However, if we were to be deemed an investment company, restrictions imposed by the Investment Company Act, including limitations on our capital structure and our ability to transact with affiliates, could make it impractical for us to continue our business as contemplated.

Market volatility may affect the price of our Class A common stock and the value of your investment.

Following the completion of this offering, the market price for our Class A common stock is likely to be volatile, in part because our shares have not been previously traded publicly. We cannot predict the extent to which a trading market will develop or how liquid that market may become. If you purchase shares of our Class A common stock in this offering, you will pay a price that was not established in the public trading markets. The initial public offering price will be determined by negotiations between the underwriters and us. You may not be able to resell your shares above the initial public offering price and may suffer a loss on your investment. In addition, the market price of our Class A common stock may fluctuate significantly in response to a number of factors, most of which we cannot predict or control, including general market and economic conditions, disruptions, downgrades, credit events and perceived problems in the credit markets; actual or anticipated variations in our quarterly operating results or dividends; changes in our investments or asset composition; write-downs or perceived credit or liquidity issues affecting our assets; market perception of our Sponsor, our business and our assets; our level of indebtedness and/or adverse market reaction to any indebtedness we incur in the future; our ability to raise capital on favorable terms or at all; loss of any major funding source; the termination of the Management Services Agreement or additions or departures of our Sponsor's key personnel; changes in market valuations of similar power generation companies; and speculation in the press or investment community regarding us or our Sponsor.

Table of Contents

In addition, securities markets in general have experienced extreme volatility that has often been unrelated to the operating performance of particular companies. Any broad market fluctuations may adversely affect the trading price of our Class A common stock.

We are a controlled company, controlled by our Sponsor, whose interest in our business may be different from ours or yours.

Each share of our Class B common stock will entitle our Sponsor or its controlled affiliates to _____ votes on matters presented to our stockholders generally. Following the completion of this offering, our Sponsor will own all of our Class B common stock, representing _____ % of our Class A common stock, Class B common stock and Class B1 common stock on a combined basis and representing approximately _____ % of our combined voting power, based on the assumptions set forth in Summary The offering Certain assumptions, including no exercise by the underwriters of their option to purchase additional shares. Therefore, our Sponsor will control a majority of the vote on all matters submitted to a vote of the stockholders including the election of our directors, for the foreseeable future following this offering even if its ownership of our Class B common stock represents less than 50% of the outstanding Class A common stock, Class B common stock and Class B1 common stock on a combined basis. As a result, we will be considered a controlled company for the purposes of the _____ listing requirements. As a controlled company, we will be permitted to opt out of the _____ listing requirements that would require (i) a majority of the members of our board of directors to be independent, (ii) that we establish a compensation committee and a nominating and governance committee, each comprised entirely of independent directors, or (iii) an annual performance evaluation of the nominating and governance and compensation committees. We intend to rely on exceptions with respect to having a majority of independent directors, establishing a compensation committee or nominating committee and annual performance evaluations of such committees.

The _____ listing requirements are intended to ensure that directors who meet the independence standard are free of any conflicting interest that could influence their actions as directors. As further described above in Risks related to our relationship with our Sponsor, it is possible that the interests of our Sponsor may in some circumstances conflict with our interests and the interests of holders of our Class A common stock. Should our Sponsor's interests differ from those of other stockholders, the other stockholders may not have the same protections afforded to stockholders of companies that are subject to all of the corporate governance rules for listed companies. Our status as a controlled company could make our Class A common stock less attractive to some investors or otherwise harm our stock price.

Provisions of our charter documents or Delaware law could delay or prevent an acquisition of us, even if the acquisition would be beneficial to holders of our Class A common stock, and could make it more difficult for you to change management.

Provisions of our amended and restated certificate of incorporation and bylaws may discourage, delay or prevent a merger, acquisition or other change in control that holders of our Class A common stock may consider favorable, including transactions in which such stockholders might otherwise receive a premium for their shares. This is because these provisions may prevent or frustrate attempts by stockholders to replace or remove members of our management. These provisions include:

a prohibition on stockholder action through written consent once our Sponsor ceases to hold a majority of the combined voting power of our common stock;

a requirement that special meetings of stockholders be called upon a resolution approved by a majority of our directors then in office;

the right of our Sponsor as the holder of our Class B common stock, to appoint up to two additional directors to our board of directors;

Table of Contents

advance notice requirements for stockholder proposals and nominations; and

the authority of the board of directors to issue preferred stock with such terms as the board of directors may determine. Section 203 of the Delaware General Corporation Law, or the DGCL, prohibits a publicly held Delaware corporation from engaging in a business combination with an interested stockholder, generally a person that together with its affiliates owns or within the last three years has owned 15% of voting stock, for a period of three years after the date of the transaction in which the person became an interested stockholder, unless the business combination is approved in a prescribed manner. As a result of these provisions in our charter documents following the completion of the Organizational Transactions and Delaware law, the price investors may be willing to pay in the future for shares of our Class A common stock may be limited. See Description of capital stock Antitakeover effects of Delaware law and our certificate of incorporation and bylaws.

You may experience dilution of your ownership interest due to the future issuance of additional shares of our Class A common stock.

We are in a capital intensive business, and may not have sufficient funds to finance the growth of our business, future acquisitions or to support our projected capital expenditures. As a result, we may require additional funds from further equity or debt financings, including tax equity financing transactions or sales of preferred shares or convertible debt to complete future acquisitions, expansions and capital expenditures and pay the general and administrative costs of our business. In the future, we may issue our previously authorized and unissued securities, resulting in the dilution of the ownership interests of purchasers of our Class A common stock offered hereby. Under our amended and restated certificate of incorporation, we will be authorized to issue _____ shares of Class A common stock, _____ shares of Class B common stock, _____ shares of Class B1 common stock and _____ shares of preferred stock with preferences and rights as determined by our board of directors. The potential issuance of additional shares of common stock or preferred stock or convertible debt may create downward pressure on the trading price of our Class A common stock. We may also issue additional shares of our Class A common stock or other securities that are convertible into or exercisable for our Class A common stock in future public offerings or private placements for capital raising purposes or for other business purposes, potentially at an offering price, conversion price or exercise price that is below the offering price for our Class A common stock in this offering.

If securities or industry analysts do not publish or cease publishing research or reports about us, our business or our market, or if they change their recommendations regarding our Class A common stock adversely, the stock price and trading volume of our Class A common stock could decline.

The trading market for our Class A common stock will be influenced by the research and reports that industry or securities analysts may publish about us, our business, our market or our competitors. If any of the analysts who may cover us change their recommendation regarding our Class A common stock adversely, or provide more favorable relative recommendations about our competitors, the price of our Class A common stock would likely decline. If any analyst who may cover us were to cease coverage of our company or fail to regularly publish reports on us, we could lose visibility in the financial markets, which in turn could cause the stock price or trading volume of our Class A common stock to decline.

There is no existing market for our Class A common stock, and we do not know if one will develop with adequate liquidity to sell our Class A common stock at prices equal to or greater than the offering price.

Prior to this offering, there has not been a public market for our Class A common stock. We cannot predict the extent to which investor interest in our company will lead to the development of an active trading market on the _____ or otherwise or how liquid that market might become. If an active trading market

Table of Contents

does not develop, you may have difficulty selling our Class A common stock that you purchase in this offering. The initial public offering price for our Class A common stock was determined by negotiations between us, SunEdison and the underwriters and may not be indicative of prices that will prevail in the open market following this offering. Consequently, you may not be able to sell our Class A common stock at prices equal to or greater than the price you paid in this offering or at all.

Future sales of our common stock by our Sponsor or the Private Placement investors may cause the price of our Class A common stock to fall.

The market price of our Class A common stock could decline as a result of sales of such shares (issuable to our Sponsor upon the exchange of some or all of its Class B units or Class B1 units of Global LLC) by our Sponsor into the market, by the Private Placements or the perception that these sales could occur. After the completion of this offering, we will have _____ shares of Class A common stock authorized and _____ shares of Class A common stock outstanding. The number of outstanding shares includes _____ shares of Class A common stock that we are selling in this offering, which may be resold immediately in the public market. All of the remaining shares of Class A common stock, or approximately _____ shares, or _____ % of our total outstanding shares of Class A common stock, and all of the outstanding shares of our Class B common stock, are restricted from immediate resale under the lock-up agreements entered into between the holders thereof, including our Sponsor, executive officers and directors, the Private Placement investors and the underwriters as described in _____ Underwriting (conflicts of interest). These shares (including shares of Class A common stock issuable to our Sponsor upon the exchange of some or all of its Global LLC Class B units or Class B1 units) will become available for sale following the expiration of the lock-up agreements, which, without the prior consent of J.P. Morgan Securities LLC, Barclays Capital Inc. and Citigroup Global Markets Inc., is 180 days after the date of the closing of this offering, subject to compliance with the applicable requirements of Rule 144 promulgated under the Securities Act.

The market price of our Class A common stock may also decline as a result of our Sponsor disposing or transferring some or all of our outstanding Class B common stock, which disposals or transfers would reduce our Sponsor's ownership interest in, and voting control over, us. These sales might also make it more difficult for us to sell equity securities at a time and price that we deem appropriate.

Our Sponsor and certain of its affiliates and the Private Placement investors have certain demand and piggyback registration rights with respect to shares of our Class A common stock issuable upon the exchange of Class B units or Class B1 units of Global LLC. The presence of additional shares of our Class A common stock trading in the public market, as a result of the exercise of such registration rights may have a material adverse effect on the market price of our securities. See _____ Certain relationships and related party transactions Registration Rights Agreement.

Our Sponsor has pledged the shares of Class B common stock that it owns to its lenders under its credit facility. If the lenders foreclose on these shares, the market price of our shares of Class A common stock could be materially adversely affected.

Our Sponsor has pledged all of the shares of Class B common stock that it owns to its lenders as security under its credit facility with Wells Fargo Bank, National Association, as administrative agent, Goldman Sachs Bank USA and Deutsche Bank Securities Inc., as joint lead arrangers and joint syndication agents, Goldman Sachs Bank USA, Deutsche Bank Securities Inc., Wells Fargo Securities, LLC and Macquarie Capital (USA) Inc., as joint bookrunners, and the lenders identified in the credit agreement. If SunEdison breaches certain covenants and obligations in its credit facility, an event of default could result and the lenders could exercise their right to accelerate all the debt under the credit facility and foreclose on the pledged shares (and a corresponding number of Class B units). While the pledged shares are subject to the 180-day lock-up restrictions described in _____ Shares eligible for future sale Lock-up agreements and the restrictions on transfer described in _____ Certain

Table of Contents

relationships and related party transactions Amended and Restated Operating Agreement of Global LLC Stock lock-up, any future sale of the shares of Class A common stock received upon foreclosure of the pledged securities after the expiration of the lock-up periods could cause the market price of our Class A common stock to decline. In addition, because SunEdison owns a majority of the combined voting power of our common stock, the occurrence of an event of default, foreclosure, and a subsequent sale of all, or substantially all, of the shares of Class A common stock received upon foreclosure of the pledged securities could result in a change of control, even when such change may not be in the best interest of our stockholders.

We will incur increased costs as a result of being a publicly traded company.

As a public company we will incur additional legal, accounting and other expenses that have not been reflected in our predecessor's historical financial statements or our pro forma financial statements. In addition, rules implemented by the SEC and the have imposed various requirements on public companies, including establishment and maintenance of effective disclosure and financial controls and changes in corporate governance practices. Our management and other personnel will need to devote a substantial amount of time to these compliance initiatives. These rules and regulations will result in our incurring of legal and financial compliance costs and will make some activities more time-consuming and costly. For example, we expect these rules and regulations to make it more difficult and more expensive for us to obtain director and officer liability insurance, and we may be required to accept reduced policy limits and coverage or incur substantially higher costs to obtain the same or similar coverage. As a result, it may be more difficult for us to attract and retain qualified people to serve on our board of directors, our board committees or as executive officers.

Initially, our legal, accounting and other expenses relating to being a publicly traded company will be paid for by our Sponsor under the Management Services Agreement with the relevant service fees for 2016, 2017 and 2018 capped at \$ million, \$ million and \$ million, respectively. The Management Services Agreement does not have a fixed term, but may be terminated by us or our Sponsor in certain circumstances, including upon the earlier to occur of (i) the five-year anniversary of the date of the agreement and (ii) the end of any twelve-month period ending on the last day of a calendar quarter during which we generated cash available for distribution in excess of \$ million. Following the termination of the Management Services Agreement we will be required to pay for these expenses directly.

Our failure to achieve and maintain effective internal control over financial reporting in accordance with Section 404 of the Sarbanes-Oxley Act as a public company could have a material adverse effect on our business and share price.

Prior to completion of this offering, we have not operated as a public company and have not had to independently comply with Section 404(a) of the Sarbanes-Oxley Act. We anticipate being required to meet these standards in the course of preparing our financial statements as of and for the year ended December 31, 2016, and our management will be required to report on the effectiveness of our internal control over financial reporting for such year. Additionally, once we are no longer an emerging growth company, as defined by the JOBS Act, our independent registered public accounting firm will be required pursuant to Section 404(b) of the Sarbanes-Oxley Act to attest to the effectiveness of our internal control over financial reporting on an annual basis. The rules governing the standards that must be met for our management to assess our internal control over financial reporting are complex and require significant documentation, testing and possible remediation.

Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with generally accepted accounting principles. We are currently in the process of reviewing, documenting and testing our internal control over financial reporting, but we are not currently in compliance with, and we cannot be certain when we will be able to implement the requirements of Section 404(a). We may encounter problems or delays

Table of Contents

in implementing any changes necessary to make a favorable assessment of our internal control over financial reporting. In addition, we may encounter problems or delays in completing the implementation of any requested improvements and receiving a favorable assessment in connection with the attestation to be provided by our independent registered public accounting firm after we cease to be an emerging growth company. If we cannot favorably assess the effectiveness of our internal control over financial reporting, or if our independent registered public accounting firm is unable to provide an unqualified attestation report on our internal controls after we cease to be an emerging growth company, investors could lose confidence in our financial information and the price of our Class A common stock could decline.

Additionally, the existence of any material weakness or significant deficiency would require management to devote significant time and incur significant expense to remediate any such material weaknesses or significant deficiencies and management may not be able to remediate any such material weaknesses or significant deficiencies in a timely manner. The existence of any material weakness in our internal control over financial reporting could also result in errors in our financial statements that could require us to restate our financial statements, cause us to fail to meet our reporting obligations and cause shareholders to lose confidence in our reported financial information, all of which could materially and adversely affect our business and share price.

We are an emerging growth company and have elected in this prospectus, and may elect in future SEC filings, to comply with reduced public company reporting requirements, which could make our Class A common stock less attractive to investors.

We are an emerging growth company, as defined by the JOBS Act. For as long as we continue to be an emerging growth company, we may choose to take advantage of exemptions from various public company reporting requirements. These exemptions include, but are not limited to, (i) being permitted to provide only two years of audited financial statements, in addition to any required unaudited interim financial statements, with correspondingly reduced Management's discussion and analysis of financial condition and results of operations disclosure; (ii) not being required to comply with the auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act, (iii) reduced disclosure obligations regarding executive compensation in our periodic reports, proxy statements and registration statements, and (iv) exemptions from the requirements of holding a nonbinding advisory vote on executive compensation and stockholder approval of any golden parachute payments not previously approved. In this prospectus, we have elected to take advantage of certain of the reduced disclosure obligations regarding financial statements and executive compensation. In addition, Section 107(b) of the JOBS Act also provides that an emerging growth company can take advantage of the extended transition period provided in Section 7(a)(2)(B) of the Securities Act for complying with new or revised accounting standards. In other words, an emerging growth company can delay the adoption of certain accounting standards until those standards would otherwise apply to private companies. We are choosing to opt in to such extended transition period election under Section 107(b). Therefore, we are electing to delay adoption of new or revised accounting standards and, as a result, we may choose not to comply with new or revised accounting standards on the relevant dates on which adoption of such standards is required for non-emerging growth companies. As a result of such election, our financial statements may not be comparable to the financial statements of other public companies.

We could be an emerging growth company for up to five years after the first sale of our common equity securities pursuant to an effective registration statement under the Securities Act, which such fifth anniversary will occur in 2020. However, if certain events occur prior to the end of such five-year period, including if we become a large accelerated filer, our annual gross revenues exceed \$1.0 billion or we issue more than \$1.0 billion of non-convertible debt in any three-year period, we would cease to be an emerging growth company prior to the end of such five-year period. We have taken advantage of certain of the reduced disclosure obligations regarding executive compensation in this prospectus and may elect to take advantage of other reduced burdens in future filings. As a result, the information that we provide to holders of our Class A

Table of Contents

common stock may be different than you might receive from other public reporting companies in which you hold equity interests. We cannot predict if investors will find our Class A common stock less attractive as a result of our reliance on these exemptions. If some investors find our Class A common stock less attractive as a result of any choice we make to reduce disclosure, there may be a less active trading market for our Class A common stock and the price for our Class A common stock may be more volatile.

Under the JOBS Act, emerging growth companies can delay adopting new or revised accounting standards until such time as those standards apply to private companies. We have elected to avail ourselves of this extended transition period for complying with new or revised accounting standards and, therefore, we will not be subject to the same new or revised accounting standards as other public companies that are not emerging growth companies.

Risks related to taxation

*In addition to reading the following risk factors, if you are a non-U.S. investor, please read **Material United States federal income tax consequences to non-U.S. holders** for a more complete discussion of the expected material United States federal income tax consequences of owning and disposing of shares of our Class A common stock.*

Our future tax liability may be greater than expected if we do not generate NOLs sufficient to offset taxable income.

We expect to generate NOLs and NOL carryforwards that we can utilize to offset all but an insignificant portion of our future taxable income. Based on our current portfolio of assets and their depreciation schedule, and subject to tax obligations resulting from potential tax audits, we do not expect to pay significant United States federal income tax in the near term. However, in the event these losses are not generated as expected, are successfully challenged by the IRS (in a tax audit or otherwise), or are subject to future limitations as a result of an ownership change as discussed below, our ability to realize these future tax benefits may be limited. Any such reduction, limitation, or challenge may result in a material increase in our estimated future income tax liability and may negatively impact our business, financial condition and operating results.

Our ability to use NOLs to offset future income may be limited.

Our ability to use NOLs generated in the future could be substantially limited if we were to experience an ownership change as defined under Section 382 of the United States Internal Revenue Code of 1986, as amended, or the Code. In general, an ownership change occurs if the aggregate stock ownership of certain holders (generally 5% holders, applying certain look-through and aggregation rules) increases by more than 50% over such holders' lowest percentage ownership over a rolling three-year period. If a corporation undergoes an ownership change, its ability to use its pre-change NOL carryforwards and other pre-change deferred tax attributes to offset its post-change income and taxes may be limited. Future sales of our Class A common stock by SunEdison, as well as future issuances by us, could contribute to a potential ownership change.

A valuation allowance may be required for our deferred tax assets.

Our expected NOLs will be reflected as a deferred tax asset as they are generated until utilized to offset income. Valuation allowances may need to be maintained for deferred tax assets that we estimate are more likely than not to be unrealizable, based on available evidence at the time the estimate is made. Valuation allowances related to deferred tax assets can be affected by changes to tax laws, statutory tax rates and future taxable income levels and based on input from our auditors, tax advisors or regulatory authorities. In the event that we were to determine that we would not be able to realize all or a portion of our net deferred tax assets in the

Table of Contents

future, we would reduce such amounts through a charge to income tax expense in the period in which that determination was made, which could have a material adverse impact on our financial condition and results of operations and our ability to maintain profitability.

Distributions to holders of our Class A common stock may be taxable as dividends.

If we make distributions from current or accumulated earnings and profits as computed for United States federal income tax purposes, such distributions will generally be taxable to holders of our Class A common stock in the current period as ordinary dividend income for United States federal income tax purposes, eligible under current law for the lower tax rates applicable to qualified dividend income of non-corporate taxpayers. While we expect that a portion of our distributions to holders of our Class A common stock may exceed our current and accumulated earnings and profits as computed for United States federal income tax purposes and therefore constitute a non-taxable return of capital to the extent of a holder's basis in our Class A common stock, no assurance can be given that this will occur.

You may be subject to Indian taxes on income arising through the sale of our equity shares.

Several of our projects are located in India. Pursuant to the Indian Income Tax Act, 1961, as amended, or Indian Income Tax Act, income arising directly or indirectly through the sale of a capital asset, including any share or interest in a company or entity registered or incorporated outside of India, will be taxable in India if such share or interest derives its value, directly or indirectly, substantially from assets located in India. This tax is applicable whether or not the seller of such share or interest has a residence, place of business, business connection or any other presence in India. The Indian Income Tax Act does not currently define the term substantially. If it is determined that these Indian Income Tax Act provisions apply to shares of our Class A common stock, any transfer of such shares may be taxable in India, subject to the protections, if any, available under a double taxation agreement entered into by the Government of India with the country of which the transferor is a resident. Budget proposals currently pending in India would define substantially to require the fair market value of Indian assets to represent at least 50% of the value of all assets owned by the entity. Moreover, such budget proposals would exempt from such tax persons who have not owned over 5% of the stock of the entity in question. There can be no assurance that these budget proposals will be ultimately enacted into law, or that they will be interpreted in a manner consistent with the above description.

United States and foreign tax provisions and policies could change at any time, and such changes may result in a material increase in our estimated future income tax liability.

While we are a U.S. taxpayer, substantially all of our assets are located in foreign tax jurisdictions and are subject to reduced tax rates or are free of tax under various tax holidays that expire in whole or in part from time to time. Many of these holidays may be extended when certain conditions are met, or terminated if certain conditions are not met. If the tax holidays are not extended, or if we fail to satisfy the conditions of the reduced tax rate, or if a change in law revokes a tax holiday, then our effective tax rate could increase in the future.

We are planning to elect to treat our foreign subsidiaries as flow-through or pass-through entities for United States federal income tax purposes (any such elections being solely for United States federal income tax purposes and not applying for purposes of foreign tax law), and therefore the United States generally will tax us on the earnings of those subsidiaries on a current basis, even if no income is distributed to us. We are subject to risks that foreign countries may restrict distributions from our foreign subsidiaries, in which case we would be subject to United States federal income tax on any such foreign subsidiary's current earnings, but be unable to receive a distribution to cover the cash tax liability. With respect to any of our foreign subsidiaries that are treated as corporations for United States federal income tax purposes, their earnings generally will not be subject to United States federal income tax until those earnings are distributed to us as a dividend. At the time of the repatriation of earnings from any corporate foreign subsidiaries, the United States generally will tax the

Table of Contents

foreign earnings as a dividend, allowing a foreign tax credit for any foreign income and certain other creditable foreign taxes previously paid on the earnings.

Changes in tax rates, the expiration or revocation of tax holidays, and changes to the application of foreign tax withholding requirements in foreign jurisdictions where we own power generation assets, as well as any changes in the United States tax law, including changes in United States tax rates, treatment of income from foreign sources (including the availability of foreign tax credits), and changes to United States tax depreciation rules could result in a material increase in our estimated future income tax liability and may negatively impact our business, financial condition and results of operations.

Cautionary statement concerning forward-looking statements

This prospectus contains forward-looking statements within the meaning of the federal securities laws. All statements other than statements of historical fact included in this prospectus are forward-looking statements. These statements relate to analyses and other information, which are based on forecasts of future results and estimates of amounts not yet determinable. These statements also relate to our future prospects, developments and business strategies. These forward-looking statements are identified by the use of terms and phrases such as “anticipate,” “believe,” “could,” “estimate,” “expect,” “intend,” “may,” “plan,” “predict,” “project,” “target,” “will” and similar terms and phrases, including “rely on” and “based on” assumptions. However, these words are not the exclusive means of identifying such statements. These statements are contained in many sections of this prospectus, including those entitled “Summary,” “Cash dividend policy,” “Management’s discussion and analysis of financial condition and results of operations” and “Business.” Although we believe that our plans, intentions and expectations reflected in or suggested by such forward-looking statements are reasonable, we cannot assure you that we will achieve those plans, intentions or expectations. All forward-looking statements are subject to risks and uncertainties that may cause actual results to differ materially from those that we expected.

The following factors, among others, could cause our actual results, performance or achievements to differ from those set forth in the forward-looking statements:

the willingness of counterparties to our offtake agreements and ability to fulfill their obligations under such agreements;

price fluctuations, termination provisions and buyout provisions related to our offtake agreements;

our ability to enter into contracts to sell power on acceptable terms as our offtake agreements expire;

our ability to successfully identify, evaluate and consummate acquisitions;

government regulation, including compliance with regulatory and permit requirements and changes in market rules, rates, tariffs and environmental laws;

operating and financial restrictions placed on us and our subsidiaries related to agreements governing our indebtedness and other agreements of certain of our subsidiaries and project-level subsidiaries generally and in the agreement governing our Revolver;

our ability to borrow additional funds and access capital markets, as well as our substantial indebtedness and the possibility that we may incur additional indebtedness going forward;

changes in foreign withholding taxes and foreign currency conversion rates;

our ability to compete against conventional and other renewable energy companies;

hazards customary to the power production industry and power generation operations, such as unusual weather conditions, catastrophic weather-related or other damage to facilities, unscheduled generation outages, maintenance or repairs, interconnection problems or other developments, environmental incidents, or electric transmission constraints and the possibility that we may not have adequate insurance to cover losses as a result of such hazards;

delays or unexpected costs during the completion of construction of our projects;

our ability to expand into new business segments or new geographies;

economic, social and political risks and uncertainties inherent in our international operations, including that we operate in emerging markets and may expand our operations into countries where we currently have no presence; and

Table of Contents

our ability to operate our businesses efficiently, manage capital expenditures and costs tightly, manage risks related to international operations and generate earnings and cash flows from our asset-based businesses in relation to our debt and other obligations. Additional factors that could cause actual results to differ materially from our expectations, or cautionary statements, are disclosed under the sections entitled *Risk factors* and *Management's discussion and analysis of financial condition and results of operations* in this prospectus. All written and oral forward-looking statements attributable to us, or persons acting on our behalf, are expressly qualified in their entirety by the cautionary statements contained in this prospectus under the heading *Risk factors* as well as other cautionary statements that are made from time to time in our other SEC filings and public communications. You should evaluate all forward-looking statements made in this prospectus in the context of these risks and uncertainties.

We caution you that the important factors referenced above may not contain all of the factors that are important to you. In addition, we cannot assure you that we will realize the results or developments we expect or anticipate or, even if substantially realized, that they will result in the consequences or affect us or our operations in the way we expect. The forward-looking statements included in this prospectus are made only as of the date hereof. We undertake no obligation to publicly update or revise any forward-looking statement as a result of new information, future events or otherwise, except as otherwise required by law.

Table of Contents**Use of proceeds**

Assuming no exercise of the underwriters' option to purchase additional shares of Class A common stock, we expect to receive approximately \$ million of net proceeds from the sale of the Class A common stock offered hereby based upon the assumed initial public offering price of \$ per share, the midpoint of the range set forth on the cover page of this prospectus, after deducting underwriting discounts and commissions, the structuring fee and offering expenses payable by us. If the underwriters exercise in full their option to purchase additional shares of Class A common stock, we estimate that additional net proceeds will be approximately \$ million, after deducting underwriting discounts and commissions, a pro rata portion of the structuring fee and offering expenses payable by us.

We intend to use the net proceeds from this offering to acquire newly issued Class A units of Global LLC, representing % of Global LLC's outstanding membership units after this offering (calculated without regard to the IDRs). Global will not retain any net proceeds from this offering.

The following table illustrates the estimated sources and uses of the funds to be used to complete the Organizational Transactions, assuming they were completed as of December 31, 2014. Actual amounts may vary from estimated amounts.

Sources of funds	Uses of funds (in millions)		
Class A common stock offered hereby ⁽¹⁾	\$	Repayment of Bridge Facility	\$
Revolver ⁽²⁾		Acquisition consideration ⁽³⁾	
		General corporate purposes ⁽⁴⁾	
		Estimated fees and expenses ⁽⁵⁾	
Total sources	\$	Total uses	\$

(1) We expect to receive approximately \$ million of net proceeds from the sale of the Class A common stock offered hereby based upon the assumed initial public offering price of \$ per share, the midpoint of the range set forth on the cover page of this prospectus, after deducting underwriting discounts and commissions, the structuring fee and offering expenses payable by us.

(2) Concurrently with the completion of this offering, Global Operating LLC plans to enter into the Revolver, which will provide for a revolving line of credit of \$ million. The closing of the Revolver will be conditioned upon completion of this offering, the implementation of our Organizational Transactions and other customary closing conditions. We do not expect to have any outstanding borrowings under the Revolver upon completion of this offering. See Description of certain indebtedness - Revolving credit facility.

(3) Global LLC expects to use approximately \$ million of net proceeds from this offering to fund the Pending Acquisitions.

(4) May include future acquisitions of clean energy assets from SunEdison pursuant to the Support Agreement or from unaffiliated third parties. As of the date of this prospectus, we have not identified any specific potential future acquisitions other than under the Support Agreement as discussed elsewhere in this prospectus.

(5) Includes fees and expenses related to entering into the Revolver as well as other expenses related to the Organizational Transactions not deducted from the proceeds of this offering when computing net proceeds.

We intend to use any net proceeds we receive as a result of the exercise of the underwriters' option to purchase additional shares to purchase Class B units and shares of Class B common stock held by our Sponsor at a price equal to the initial public offering price less the underwriting discounts and commissions, a pro rata portion of the structuring fee and offering expenses payable by us. Accordingly, we will not retain any such excess proceeds. Any such Class B units and Class B common stock purchased from our Sponsor would be immediately cancelled in connection with our receipt of a corresponding number of Class A units.

Edgar Filing: TERRAFORM GLOBAL, INC. - Form S-1

The Bridge Facility will have outstanding indebtedness of approximately \$ million as of the completion of this offering but prior to its repayment. The effective interest rate on borrowings under the Bridge Facility was 8.5% as of December 31, 2014 and increases by 0.50% on May 22, 2015 and by 0.25% each 90 days thereafter until the maturity or the repayment of all outstanding indebtedness under the Bridge Facility. The Bridge Facility consists of a term loan maturing in December 2016.

Table of Contents

J.P. Morgan Securities LLC and/or its affiliates acted as arranger of, and is the administrative agent under, our Bridge Facility. Affiliates of each of J.P. Morgan Securities LLC, Barclays Capital Inc., Citigroup Global Markets Inc. and Morgan Stanley & Co. LLC are lenders under the Bridge Facility. Because affiliates of J.P. Morgan Securities LLC, Barclays Capital Inc., Citigroup Global Markets Inc. and Morgan Stanley & Co. LLC will each receive more than 5% of the net proceeds of this offering due to the repayment of amounts outstanding under our Bridge Facility, each of J.P. Morgan Securities LLC, Barclays Capital Inc., Citigroup Global Markets Inc. and Morgan Stanley & Co. LLC is deemed to have a conflict of interest under FINRA Rule 5121. Accordingly, this offering is being made in compliance with the requirements of FINRA Rule 5121. See Underwriting (conflicts of interest).

Our Sponsor will not receive any of the net proceeds or other consideration in connection with this offering, other than (i) the net proceeds used by us to purchase Class B units (and the related shares of Class B common stock) in the event the underwriters exercise their option to purchase additional shares of Class A common stock and (ii) the Class B common stock, Class B units of Global LLC and the IDRs issued to it in the Offering Transactions on account of its existing ownership interest. Following completion of this offering, we may elect to use a portion of the net proceeds to fund acquisitions from our Sponsor, including pursuant to the Support Agreement. The Class B common stock will not entitle our Sponsor to any economic interest in Global and the Class B units will entitle our Sponsor, subject to certain limitations on distributions to holders of Class B units during the Subordination Period and the Distribution Forbearance Provisions, to a % economic interest in Global LLC.

Table of Contents**Capitalization**

The following table sets forth our predecessor's cash and cash equivalents, restricted cash and consolidated capitalization as of December 31, 2014 on: (i) a historical basis; (ii) an as adjusted basis to give effect to the Acquisitions; (iii) an as adjusted basis to give effect to the Formation Transactions; and (iv) an as further adjusted basis to give effect to the Offering Transactions, including this offering and the application of the net proceeds of this offering in the manner set forth under the heading "Use of proceeds."

You should read the following table in conjunction with the sections entitled "Use of proceeds," "Selected historical combined financial data," "Management's discussion and analysis of financial condition and results of operations," "Description of certain indebtedness" and our combined financial statements and related notes thereto included elsewhere in this prospectus.

(in thousands, except share data)	December 31, 2014			
	Actual	As adjusted for Acquisitions (unaudited)	As further adjusted for Formation Transactions (unaudited)	As further adjusted for Offering Transactions (unaudited)
Cash and cash equivalents including cash committed for construction projects and restricted cash⁽¹⁾	\$ 224,171	\$ 369,478	\$ 386,408	\$
Long-term debt (including current portion):

Total capitalization	\$ 486,185	\$ 2,341,309	\$ 2,363,879	\$

(1) Amount includes restricted cash of \$31.7 million (actual) and \$91.6 million (as adjusted for Acquisitions).

Table of Contents

- (2) Concurrently with the completion of this offering, Global Operating LLC plans to enter into the Revolver, which will provide for a revolving line of credit of \$ million. The closing of the Revolver will be conditioned upon completion of this offering, the implementation of our Organizational Transactions and other customary closing conditions.
- (3) We entered into the Bridge Facility on December 22, 2014, which provided for borrowings of \$150.0 million. On May 6, 2015, the Bridge Facility was amended to increase the aggregate principal amount to \$450 million of which \$87.5 million was subsequently prepaid with a portion of the net proceeds from the Private Placements. Borrowings under the Bridge Facility were used to finance acquisitions prior to the completion of this offering or to repay certain of the project-level indebtedness incurred by projects included in our initial portfolio.
- (4) All of our project-level indebtedness is denominated in either U.S. Dollars, Chinese Yuan, Indian Rupee, Malaysian Ringgit, South African Rands or Thai Baht. We converted such indebtedness into U.S. dollars using the applicable conversion rate as of December 31, 2014. See Management's discussion and analysis of financial condition and results of operations Liquidity and capital resources Sources of liquidity Project-level financing arrangements and Description of indebtedness Project-level financing arrangements.
- (5) The increase in net parent investment reflects our Sponsor's interest in the predecessor. This interest will be reclassified to non-controlling interest at the closing of this offering and the other Organizational Transactions.
- (6) These share numbers do not give effect to the exercise of the underwriters' option to purchase additional shares of our Class A common stock. We intend to use any net proceeds we receive as a result of any such exercise to purchase Class B units (and shares of Class B common stock) held by our Sponsor at a price equal to the initial public offering price less the underwriting discounts and commissions, a pro rata portion of the structuring fee and offering expenses payable by us. In that event, the number of shares of Class B common stock will be reduced and the number of shares of Class A common stock will be increased by a corresponding amount.

Table of Contents**Dilution**

Dilution is the amount by which the offering price paid by the purchasers of our Class A common stock sold in this offering will exceed the as adjusted net tangible book value per share of our Class A common stock after the offering. Net tangible book value per share of our Class A common stock as of a particular date represents the amount of our total tangible assets less our total liabilities divided by the number of shares of Class A common stock outstanding as of such date. As of December 31, 2014, after giving effect to the Formation Transactions, our net tangible book value would have been approximately \$ million, or \$ per share of Class A common stock, assuming that our Sponsor exchanged all of its Global LLC Class B units for newly issued shares of our Class A common stock on a one-for-one basis. Purchasers of our Class A common stock in this offering will experience substantial and immediate dilution in net tangible book value per share of our Class A common stock for financial accounting purposes, as illustrated in the following table.

Assumed initial public offering price per share	\$
Net tangible book value per share as of December 31, 2014 after giving effect to the Formation Transactions	\$
Increase in as adjusted net tangible book value per share attributable to purchasers in this offering	
Net tangible book value per share after giving effect to the Organizational Transactions, including this offering and the use of proceeds therefrom	
Immediate dilution in net tangible book value per share to purchasers in this offering	\$

Because our Sponsor does not currently own any Class A common stock, we have presented dilution in net tangible book value per share of Class A common stock to investors in this offering assuming that our Sponsor exchanged its Global LLC Class B units for newly issued shares of our Class A common stock on a one-for-one basis in order to more meaningfully present the dilutive impact on the purchasers in this offering.

If the underwriters exercise their option to purchase additional shares of our Class A common stock in full, the net tangible book value per share after giving effect to this offering would be \$ per share due to the decrease in Class B common stock owned by our Sponsor and the equivalent increase in Class A common stock purchased by the underwriters. This represents an increase in net tangible book value of \$ per share to our existing stockholder and dilution in net tangible book value of \$ per share to purchasers in this offering.

The following table sets forth, as of December 31, 2014, the differences among the number of shares of Class A common stock purchased, the total consideration paid or exchanged and the average price per share paid by (i) our Sponsor and the management stockholders, (ii) the purchasers in the Private Placements and

(iii) purchasers of our Class A common stock in this offering, based on our assumed initial public offering price of \$ per share, the midpoint of the range set forth on the cover page of this prospectus, and assuming that our Sponsor exchanged all of its Global LLC Class B units for shares of our Class A common stock on a one-for-one basis and no exercise of the underwriters' option to purchase additional shares of Class A common stock.

	Shares of Class A common stock		Total consideration		Average price
	Number	Percent	Amount	Percent	per share
Our Sponsor and management stockholders ⁽¹⁾		%	\$	%	\$
Private Placement purchasers and affiliates					
Purchasers in the offering		%	\$	%	\$

Edgar Filing: TERRAFORM GLOBAL, INC. - Form S-1

- (1) The assets contributed by our Sponsor in the Contributed Projects will be recorded at historical cost. The book value of the consideration to be provided by our Sponsor in the Contributed Projects as of December 31, 2014 was approximately \$ million.

Table of Contents**Cash dividend policy**

You should read the following discussion of our cash dividend policy in conjunction with Assumptions and considerations below, which includes the factors and assumptions upon which we base our cash dividend policy. In addition, you should read Cautionary statement concerning forward-looking statements and Risk factors for information regarding statements that do not relate strictly to historical or current facts and certain risks inherent in our business.

This forecast of future operating results and cash available for distribution in future periods is based on the assumptions described below and other assumptions believed by us to be reasonable as of the date of this prospectus. However, we cannot assure you that any or all of these assumptions will be realized. These forward-looking statements are based upon estimates and assumptions about circumstances and events that have not yet occurred and are subject to all of the uncertainties inherent in making projections. This forecast should not be relied upon as fact or as an accurate representation of future results. Future results will be different from this forecast and the differences may be materially less favorable.

For additional information regarding our historical combined results of operations, you should refer to our audited historical combined financial statements as of and for the years ended December 31, 2013 and 2014 included elsewhere in this prospectus.

General

We intend to pay regular quarterly cash dividends to holders of our Class A common stock. After determining an appropriate reserve for our working capital needs and the prudent conduct of our business, our objective is to pay our Class A common stockholders a consistent and growing cash dividend that is sustainable on a long-term basis. Based on our forecast and the related assumptions and our intentions to acquire assets with characteristics similar to those in our initial portfolio, we expect to grow our CAFD and increase our quarterly cash dividends over time. Our quarterly dividend will initially be set at \$ per share of our Class A common stock, or \$ per share on an annualized basis, and the amount may be changed in the future without advance notice. We established our initial quarterly dividend level based upon a targeted payout ratio by Global LLC of approximately % of projected annual cash available for distribution. This dividend payout ratio is not prescribed by our governing documents and is subject to change based on the discretion of our board of directors. We expect our dividend payout ratio to vary as we intend to increase our dividend despite variations in our cash available for distribution from period to period. In addition, we may adjust our dividend payout ratio from time to time based on changes in our portfolio in terms of size and scope, working capital and capital expenditure requirements, operating expenses and market conditions, including acquisition opportunities and our ability to borrow funds and access capital markets.

We expect to pay a quarterly dividend on or about the 75th day following the expiration of each fiscal quarter to holders of our Class A common stock of record on or about the 60th day following the last day of such fiscal quarter. With respect to our first dividend payable on , 2015 to holders of record on , 2015, assuming a completion date of , 2015, we intend to pay a pro-rated initial dividend of \$ per share.

We intend to cause Global LLC to distribute a portion of its CAFD to holders of its units, including to us as the sole holder of the Class A units, to our Sponsor as the sole holder of the Class B units, pro rata based on the number of units held, and, if applicable, to the holders of the IDRs (all of which will initially be held by our Sponsor). In addition, during the Subordination Period described below, the Class B units held by our Sponsor are deemed subordinated because for a three-year period, the Class B units will not be entitled to receive any

Table of Contents

distributions from Global LLC until the Class A units and Class B1 units have received quarterly distributions in an amount equal to \$ per unit, or the Minimum Quarterly Distribution, plus any arrearages in the payment of the Minimum Quarterly Distribution from prior quarters. The practical effect of the subordination of the Class B units is to increase the likelihood that during the Subordination Period there will be sufficient CAFD to pay the Minimum Quarterly Distribution on the Class A units (and Class B1 units, if any).

To reduce the effect on the Class A units of delays (if any) in completion of the Contributed Construction Projects or the acquisition of the Pending Third-Party Acquisition Projects, our Sponsor has agreed to forego distributions under certain circumstances. In particular, our Sponsor has agreed to forego any distributions on its Class B units with respect to the third and fourth quarters of 2015 (i.e., distributions declared on or prior to March 31, 2016), and thereafter, under certain circumstances, to a reduction of distributions on its Class B units until the expiration of the Distribution Forbearance Period. Between March 31, 2016 and the end of the Distribution Forbearance Period our Sponsor has agreed to forego distributions to the extent the holders of Class A units have not received distributions in an amount equal to the Minimum Quarterly Distribution plus any arrearages in the payment of Minimum Quarterly Distributions from prior quarters. For a description of the IDRs, the Subordination Period and the Distribution Forbearance Period, including the definitions of Subordination Period, As Delivered CAFD, Closed Acquisition CAFD, CAFD Forbearance Threshold and Distribution Forbearance Period see Certain relationships and related party transactions Amended and Restated Operating Agreement of Global LLC Distributions.

Rationale for our dividend

We have established our initial quarterly dividend level after considering the amount of cash we expect to receive from Global LLC as a result of our membership interest in Global LLC after this offering. In accordance with its operating agreement and our capacity as the sole managing member, we intend to cause Global LLC to make regular quarterly cash distributions to its members in an amount equal to cash available for distribution generated during a particular quarter, less reserves for working capital needs and the prudent conduct of our business, and to use the amount distributed to us to pay regular quarterly dividends to holders of our Class A common stock.

Our cash available for distribution is likely to fluctuate from quarter to quarter, in some cases significantly, as a result of the seasonality of our assets and maintenance and outage schedules, among other factors. Accordingly, during quarters in which Global LLC generates cash available for distribution in excess of the amount necessary to distribute to us to pay our stated quarterly dividend, we may cause it to reserve a portion of the excess to fund its cash distribution in future quarters. In quarters in which we do not generate sufficient cash available for distribution to fund our stated quarterly cash dividend, if our board of directors so determines, we may use sources of cash not included in our calculation of cash available for distribution, such as net cash provided by financing activities, receipts from network upgrade reimbursements, all or any portion of the cash on hand or, if applicable, borrowings under our Revolver, to pay dividends to holders of our Class A common stock. Although these other sources of cash may be substantial and available to fund a dividend payment in a particular period, we exclude these items from our calculation of cash available for distribution because we consider them non-recurring or otherwise not representative of the operating cash flows we typically expect to generate.

Estimate of future cash available for distribution

We primarily considered forecasted cash available for distribution in assessing the amount of cash that we expect our assets will be able to generate for the purposes of our initial dividend. Accordingly, we believe that an understanding of cash available for distribution is useful to investors in evaluating our ability to pay

Table of Contents

dividends pursuant to our stated cash dividend policy. In general, we expect that cash available for distribution each quarter will equal net cash provided by (used in) the operating activities of Global LLC, calculated pursuant to GAAP:

plus or minus changes in assets and liabilities as reflected on our statements of cash flows;

minus deposits into (or plus withdrawals from) restricted cash accounts required by project financing arrangements to the extent they decrease (or increase) cash provided by operating activities;

minus cash distributions paid to non-controlling interests in our projects, if any;

minus scheduled project-level and other debt service payments and repayments in accordance with the related borrowing arrangements, to the extent they are paid from operating cash flows during a period;

minus non-expansionary capital expenditures, if any, to the extent they are paid from operating cash flows during a period;

plus cash contributions from our Sponsor pursuant to the Interest Payment Agreement;

plus operating costs and expenses paid by our Sponsor pursuant to the Management Services Agreement to the extent such costs or expenses exceed the fee payable by us pursuant to such agreement but otherwise reduce our net cash provided by operating activities; and

plus or minus operating items as necessary to present the cash flows we deem representative of our core business operations, with the approval of our audit committee.

Limitations on cash dividends and our ability to change our cash dividend policy

There is no guarantee that we will pay quarterly cash dividends to holders of our Class A common stock. We do not have a legal obligation to pay our initial quarterly dividend or any other dividend. Our cash dividend policy may be changed at any time and is subject to certain restrictions and uncertainties, including the following:

As the sole managing member of Global LLC, we and, accordingly, our board of directors will have the authority to establish, or cause Global LLC to establish, cash reserves for working capital needs and the prudent conduct of our business, and the establishment of or increase in those reserves could result in a reduction in cash dividends from levels we currently anticipate pursuant to our stated cash dividend policy. These reserves may account for the fact that our project-level cash flows may vary from year to year based on, among other things, changes in prices under offtake agreements for energy and other environmental attributes, other project contracts, changes in regulated transmission rates, compliance with the terms of non-recourse project-level financing, including debt repayment schedules, the transition to market or recontracted pricing following the expiration of offtake agreements, domestic and international tax laws and tax rates, foreign exchange fluctuations, working capital requirements and the operating performance of the assets. Furthermore, our board of directors may increase, or cause Global LLC to increase reserves to account for the seasonality that has historically existed in our assets' cash flows and the variances in the pattern and frequency of distributions to us from our assets during the year.

Prior to Global LLC making any cash distributions to its members, Global LLC will reimburse our Sponsor and its affiliates for certain governmental charges they incur on our behalf pursuant to the Management Services Agreement. Global LLC's amended and restated

operating agreement will not limit the amount of governmental charges for which our Sponsor and its affiliates may be reimbursed. The Management Services Agreement will provide that our Sponsor will determine in good faith the governmental charges that are allocable to us. Accordingly, the reimbursement of governmental charges and payment of fees, if any, to our Sponsor and its affiliates will reduce the amount of our cash available for distribution.

Table of Contents

Section 170 of the DGCL allows our board of directors to declare and pay dividends on the shares of our Class A common stock either:

out of its surplus, as defined in and computed in accordance with the DGCL; or

in case there shall be no such surplus, out of its net profits for the fiscal year in which the dividend is declared and/or the preceding fiscal year.

We may lack sufficient cash to pay dividends to holders of our Class A common stock due to cash flows shortfalls attributable to a number of operational, commercial or other factors, including low availability, as well as increases in our operating and/or general and administrative expenses, principal and interest payments on our outstanding debt, income tax expenses, working capital requirements or anticipated cash needs at our project-level subsidiaries.

Global LLC's cash distributions to us and, as a result, our ability to pay or grow our dividends is dependent upon the performance of our subsidiaries and their ability to distribute cash to us. The ability of our project-level subsidiaries to make cash distributions to Global LLC may be restricted by, among other things, the provisions of existing and future indebtedness, applicable national, provincial, state and local corporation laws and other laws and regulations.

Our ability to grow our business and dividend

We intend to grow our business primarily through the acquisition of contracted clean power generation assets, which, we believe, will facilitate the growth of our cash available for distribution and enable us to increase our dividend per share over time. However, the determination of the amount of cash dividends to be paid to holders of our Class A common stock will be made by our board of directors and will depend upon our financial condition, results of operations, cash flows, long-term prospects and any other matters that our board of directors deems relevant.

We expect that we will rely primarily upon external financing sources, including commercial bank borrowings and issuances of debt and equity securities, to fund any future growth capital expenditures. To the extent we are unable to finance growth externally, our cash dividend policy could significantly impair our ability to grow because we do not currently intend to reserve a substantial amount of cash generated from operations to fund growth opportunities. If external financing is not available to us on acceptable terms, our board of directors may decide to finance acquisitions with cash from operations, which would reduce or even eliminate our cash available for distribution and, in turn, impair our ability to pay dividends to holders of our Class A common stock. To the extent we issue additional shares of capital stock to fund growth capital expenditures, the payment of dividends on those additional shares may increase the risk that we will be unable to maintain or increase our per share dividend level. There are no limitations in our bylaws or certificate of incorporation (other than a specified number of authorized shares), and there will not be any limitations under our Revolver, on our ability to issue additional shares of capital stock, including preferred stock that would have priority over our Class A common stock with respect to the payment of dividends. Additionally, the incurrence of additional commercial bank borrowings or other debt to finance our growth would result in increased interest expense, which may impact our cash available for distribution and, in turn, our ability to pay dividends to holders of our Class A common stock.

Minimum quarterly distribution

Upon completion of this offering, the amended and restated operating agreement of Global LLC will provide that, during the Subordination Period, the holders of Class A units (and Class B1 units, if any), will have the right to receive the Minimum Quarterly Distribution of \$ _____ per unit for each whole quarter, or \$ _____ per unit on

Table of Contents

an annualized basis, before any distributions are made to the holders of Class B units. The payment of the full Minimum Quarterly Distribution on all of the Class A units, Class B1 units and Class B units to be outstanding after completion of this offering would require Global LLC to have CAFD of approximately \$ million per quarter, or \$ million per year (assuming an payout ratio). Global LLC's ability to make cash distributions at the Minimum Quarterly Distribution rate will be subject to the factors described above under Limitations on cash dividends. The table below sets forth the amount of Class A units, Class B1 units and Class B units that will be outstanding immediately after this offering and the CAFD needed to pay the aggregate Minimum Quarterly Distribution on all of such units for a single fiscal quarter and a four-quarter period (assuming no exercise and full exercise of the underwriters' option to purchase additional shares of Class A common stock):

	Number of units	No exercise of option to purchase additional Class A common stock		Full exercise of option to purchase additional Class A common stock	
		Aggregate minimum quarterly distribution		Aggregate minimum quarterly distributions	
		One quarter	Number of quarters	One quarter	Four quarters
Class A units		\$	\$	\$	\$
Class B1 units					
Class B units					
Total		\$	\$	\$	\$

We intend to use any net proceeds we receive as a result of the exercise of the underwriters' option to purchase additional shares of Class A common stock to purchase Class B units (and Class B common stock) held by our Sponsor at a price equal to the initial public offering price less the underwriting discounts and commissions and a pro rata portion of the structuring fee, and immediately cancel such Class B units (and shares of Class B common stock) contemporaneously with Global LLC issuing Class A units to us. When we purchase a Class B unit (and share of Class B stock) from our Sponsor and contemporaneously receive a Class A unit, the aggregate minimum quarterly distribution with respect to the Class A units and Class B units will increase or decrease, respectively, by \$ per quarter and by \$ per four quarters.

Subordination of Class B units

During the Subordination Period, holders of the Class B units are not entitled to receive any distribution until the Class A units and Class B1 units (if any) have received the Minimum Quarterly Distribution for the current quarter plus any arrearages in the payment of the Minimum Quarterly Distribution from prior quarters. The Class B units will not accrue arrearages.

To the extent Global LLC does not pay the Minimum Quarterly Distribution on the Class A units and Class B1 units, holders of such units will not be entitled to receive such payments in the future except during the Subordination Period. To the extent Global LLC has CAFD in any future quarter during the Subordination Period in excess of the amount necessary to pay the Minimum Quarterly Distribution to holders of its Class A units and Class B1 units, Global LLC will use this excess cash to pay any distribution arrearages on Class A units and Class B1 units related to prior quarters ending during the Subordination Period before any cash distribution is made to holders of Class B units. After the Subordination Period ends, Class A units and Class B1 units will not accrue arrearages. Please read Certain relationships and related party transactions Amended and Restated Operating Agreement of Global LLC Distributions Subordination period.

Table of Contents

Distribution Forbearance Period

To reduce the effect on the Class A units of delays (if any) in completion of the Contributed Construction Projects or the acquisition of the Pending Third-Party Acquisition Projects, our Sponsor has agreed to forego distributions under certain circumstances. In particular, our Sponsor has agreed to forego any distributions on its Class B units with respect to the third and fourth quarters of 2015 (i.e., distributions declared on or prior to March 31, 2016), and thereafter, under certain circumstances, to a reduction of distributions on its Class B units until the expiration of the Distribution Forbearance Period. Between March 31, 2016 and the end of the Distribution Forbearance Period our Sponsor has agreed to forego distributions to the extent is the holder of Class A units have not received distributions in an amount equal to the Minimum Quarterly Distribution plus any arrearages in the payment of Minimum Quarterly Distributions from prior quarters. See *Certain relationships and related party transactions* Amended and Restated Operating Agreement of Global LLC *Distributions*.

Unaudited pro forma cash available for distribution for the year ended December 31, 2014

If we had completed the Organizational Transactions on January 1, 2014, our unaudited cash available for distribution for the year ended December 31, 2014 would have been approximately \$ million, of which \$ million would have been distributed by Global LLC to Global as the holder of Class A units of Global LLC. These amounts would have been insufficient to pay the full quarterly cash dividend on all of our Class A common stock to be outstanding immediately after completion of this offering based on our initial quarterly dividend of \$ per share of our Class A common stock (or \$ per share on an annualized basis).

Our calculation of unaudited pro forma cash available for distribution includes the management fee payable to our Sponsor under the Management Services Agreement. The calculation also reflects all costs of doing business, including all expenses paid by our Sponsor in excess of the payments required under the Management Services Agreement. These costs include incremental general and administrative expenses as a result of being a publicly traded company, including costs associated with SEC reporting requirements, independent auditor fees, investor relations activities, stock exchange listing, registrar and transfer agent fees, incremental director and officer liability insurance and director compensation, because those expenses will be paid by our Sponsor under the Management Services Agreement.

Our unaudited pro forma combined financial statements, from which our unaudited cash available for distribution was derived, do not purport to present our results of operations had the transactions contemplated in this prospectus actually been completed as of the dates indicated. Furthermore, cash available for distribution is a cash method concept, while our predecessor's historical financial statements were prepared on an accrual basis. We derived the amounts of unaudited cash available for distribution stated above in the manner shown in the table below. As a result, the amount of unaudited pro forma cash available should only be viewed as a general indicator of the amount of cash available for distribution that we might have generated had we been formed and completed the transactions contemplated in this prospectus in earlier periods.

- (2) Adjusted EBITDA, and cash available for distribution are non-GAAP measures. You should not consider these measures as alternatives to net income (loss), determined in accordance with GAAP, or net cash provided by (used in) operating activities, determined in accordance with GAAP. For definitions of Adjusted EBITDA and cash available for distribution and a complete discussion of their limitations, see footnotes (1) and (2), respectively, under the heading Summary Summary historical and pro forma financial data elsewhere in this prospectus.
- (3) Represents capital expenditures for maintenance and up-keep associated with our project portfolio.
- (4) Does not give effect to any reductions of distributions on the Class B units during the Distribution Forbearance Period.

Estimated cash available for distribution for the twelve months ending June 30, 2016 and December 31, 2016

We forecast that our cash available for distribution during the twelve months ending June 30, 2016 and December 31, 2016 will be approximately \$156.9 million and \$164.8 million, respectively, of which we forecast \$ million will be distributed by Global LLC to Global as the holder of Class A units of Global LLC for the twelve months ending June 30, 2016 and \$ million for the twelve months ending December 31, 2016. This amount (together with our other sources of liquidity) would be sufficient to pay our initial quarterly dividend of \$ per share on all outstanding shares of our Class A common stock immediately after completion of this offering for each quarter in the twelve months ending June 30, 2016 and December 31, 2016. Based on the assumptions described below, we forecast total available liquidity of \$ million (including \$ million of availability under the Revolver) as of June 30, 2016, assuming that we do not acquire any additional projects prior to that date.

We are providing this forecast to supplement our predecessor's historical combined financial statements and to support our belief that we will have sufficient cash available for distribution to allow Global LLC to make distributions to Global as the holder of Class A units of Global LLC in amounts sufficient to allow Global to pay a regular quarterly dividend on all of our outstanding Class A common stock immediately after completion of this offering for each quarter in fiscal year 2015, at our initial quarterly dividend of \$ per share (or \$ per share on an annualized basis). Please read Assumptions and considerations for further information as to the assumptions we have made for the forecast.

Our forecast is a forward-looking statement and reflects our best estimate and judgment as of the date of this prospectus of the conditions we expect to exist and the course of action we expect to take with respect to our initial portfolio of projects during each of the twelve-month periods ending June 30, 2016 and December 31, 2016. Although acquisitions are an important part of our growth strategy, the forecast does not include the effects of, and we have not included any adjustments with respect to, any acquisitions we may complete during the periods covered by our forecast. It should be read together with the historical combined financial statements and the accompanying notes thereto included elsewhere in this prospectus and Management's discussion and analysis of financial condition and results of operations. We believe that we have a reasonable basis for these assumptions and that our actual results of operations will approximate those reflected in our forecast, but we can give no assurance that our forecasted results will be achieved. The assumptions and estimates underlying the forecast, as described below under

Assumptions and considerations, are inherently uncertain and, although we consider them reasonable as of the date of this prospectus, they are subject to a wide variety of significant business, economic and competitive risks and uncertainties that could cause actual results to differ materially from forecasted results, including, among others, the risks and uncertainties described in Risk factors. For purposes of our forecast, we have assumed that no unexpected risks will materialize during the forecast periods. Any of the risks discussed in this prospectus, to the extent they occur, could cause actual results of operations to vary significantly from those that would enable us to generate sufficient cash available for distribution to allow Global LLC to make distributions in amounts sufficient to allow us to pay the aggregate annualized regular quarterly dividend on all outstanding shares of our Class A common stock for the twelve-month periods ending June 30, 2016 and December 31, 2016, calculated at the initial quarterly dividend rate of \$ per share (or \$ per share on an annualized basis).

Table of Contents

Accordingly, there can be no assurance that the forecast will be indicative of our future performance or that actual results will not differ materially from those presented in the forecast. If our forecasted results are not achieved, we may not be able to pay a regular quarterly dividend to holders of our Class A common stock at our initial quarterly dividend level or at all. Inclusion of the forecast in this prospectus should neither be regarded as a fact nor a representation by us, the underwriters or any other person that the results contained in the forecast will be achieved.

The accompanying forecast was not prepared with a view toward complying with the guidelines established by the American Institute of Certified Public Accountants, or the AICPA, with respect to prospective financial information. Neither our independent auditors, nor any other independent accountants, have compiled, examined or performed any procedures with respect to our forecast, nor have they expressed any opinion or any other form of assurance on our forecast or its achievability, and neither our independent auditors nor any other independent accountants assume responsibility for, and claim any association with, our forecast.

We do not undertake any obligation to release publicly any revisions or updates that we may make to the forecast or the assumptions used to prepare the forecast to reflect events or circumstances after the date of this prospectus. In light of this, the statement that we believe that we will have sufficient cash available for distribution (together with our other sources of liquidity) to allow Global LLC to make distributions to Global as the holder of Class A units of Global LLC in amounts sufficient to allow Global to pay the full regular quarterly dividend on all of our Class A common stock outstanding immediately after the completion of this offering for each quarter in the twelve-month periods ending June 30, 2016 and December 31, 2016, based on our initial quarterly dividend rate of \$ per share (or \$ per share on an annualized basis), should not be regarded as a representation by us, the underwriters or any other person that we will pay such dividends. Therefore, you are cautioned not to place undue reliance on this information.

Estimated cash available for distribution by Global LLC	\$ 156,915	\$ 164,759
Estimated cash available for distribution to holders of Class A common stock ⁽⁴⁾	\$	\$
Estimated aggregate annual dividend	\$	\$
Shares of Class A common stock		
Estimated dividend per share of Class A common stock	\$	\$

(1) Reflects all costs of doing business, including all expenses paid by our Sponsor in excess of the payments required under the Management Services Agreement.

Table of Contents

(2) Adjusted EBITDA and cash available for distribution are non-GAAP measures. You should not consider these measures as alternatives to net income (loss), determined in accordance with GAAP, or net cash provided by (used in) operating activities, determined in accordance with GAAP. For definitions of Adjusted EBITDA and cash available for distribution and a complete discussion of their limitations, see footnotes (1) and (2), respectively, under the heading Summary Summary historical and pro forma financial data elsewhere in this prospectus.

(3) Represents capital expenditures for maintenance and up-keep associated with our project portfolio.

Assumptions and considerations

Set forth below are the material assumptions that we have made to demonstrate our ability to generate our estimated Adjusted EBITDA and estimated cash available for distribution for each of the twelve months ending June 30, 2016 and December 31, 2016. The forecast has been prepared by and is the responsibility of our management. Our forecast reflects our judgment of the conditions we expect to exist and the course of action we expect to take during the forecast period. While the assumptions disclosed in this prospectus are not all inclusive, such assumptions are those that we believe are material to our forecasted results of operations. We believe we have a reasonable basis for these assumptions. We believe that our historical results of operations will approximate those reflected in our forecast. However, we can give no assurance that our forecasted results will be achieved. We have assumed that no unexpected risks will materialize during the forecast periods. There will likely be differences between our forecasted and our historical results, and those differences may be material. If our forecast is not achieved, we may not be able to pay cash dividends on our Class A common stock at the initial quarterly dividend level or at all.

General considerations

The forecast assumes that in 2015, we will raise net proceeds of \$ million in this offering (after deducting underwriting discounts and commissions, the structuring fee and offering expenses payable by us) through the issuance of of our shares of Class A common stock at a price of \$ per share. We have also assumed that immediately following the completion of this offering, Global LLC will have Class A units and Class B units outstanding and that all of such Class A units will be held by Global. The forecast also assumes that the proceeds of this offering will be used as described in Use of proceeds elsewhere in this prospectus and that in connection with the completion of this offering, the other transactions contemplated upon under the heading Summary Organizational Transactions will have been completed on or prior to the closing of this offering (other than the exercise by the underwriters of their option to purchase additional shares of our Class A common stock).

The historical period for the year ended December 31, 2014 includes the results for our initial portfolio, which have a total nameplate capacity of 53.4 MW, which does not include any projects for which we hold a minority interest. Projects with a total nameplate capacity of 112.5 MW are expected to reach COD in 2015.

The forecast periods include the results of the projects that will be included in our initial portfolio.

The forecast periods include the results of operations for the projects in our initial portfolio, all of which reached COD prior to the beginning of such periods.

Revenues reflect the terms specified in the PPAs or similar offtake arrangements for 100% of energy production. The electricity pricing used in the forecast is based on our expected annual electricity generation and contracted sales under PPAs or similar offtake arrangements.

Cost of operations and expenses are forecast based on historical experience, contracted service arrangements and other management estimates. We believe the forecast cost structure is reasonable based on leveraging our existing infrastructure, our experience in operating the projects and expected economies of scale from the additional contributed and acquired projects.

Table of Contents

The forecast assumes our projects will operate within budgeted operating costs, including with respect to operations and maintenance activities pursuant to our O&M agreements and that there will be no unusual, non-recurring or unexpected operating, repair or maintenance charges.

The historical period and the forecast periods only include projects that are in our initial portfolio and do not include any of the Call Right Projects.

Revenue

We estimate that we will generate revenue of \$281.8 million for the twelve months ending June 30, 2016 and \$300.6 million for the twelve months ending December 31, 2016, compared to \$18.8 million for the year ended December 31, 2014. The increase in our forecasted periods compared to the historical period is attributed to higher generation as a result of the additional contributed and acquired projects referenced in the general considerations. We estimate megawatts in operation will be 987.8 MW for the twelve months ending June 30, 2016 and 987.8 MW for the period ending December 31, 2016, compared to 53.4 MW for the year ended December 31, 2014. Our revenues are primarily a result of the energy produced at our projects and the rates for incentives and rates for sale of generation established under PPAs for each project. We estimate 3,043.7 GWh of production for the twelve months ending June 30, 2016, and 3,126.9 GWh for the twelve months ending December 31, 2016, compared to 83.0 GWh for the year ended December 31, 2014. We estimate that 3.0% and 4.5% of revenue will come from incentives in the twelve-month periods ending June 30, 2016 and December 31, 2016, respectively, compared to 0% for the year ended December 31, 2014.

Cost of operations

We estimate that we will incur a cost for operations expense of \$54.5 million for the twelve months ending June 30, 2016 and \$54.8 million for the twelve months ending December 31, 2016, compared to \$1.4 million for the year ended December 31, 2014. This increase in our forecasted periods from the historical period is primarily attributed to the additional contributed and acquired projects referenced in the general considerations.

Depreciation and accretion

We estimate that we will incur depreciation and accretion expense of \$53.6 million for the twelve months ending June 30, 2016 and \$56.2 million for the twelve months ending December 31, 2016 compared to \$4.0 million for the year ended December 31, 2014. This increase in our forecasted periods from the historical period is primarily attributed to the additional contributed and acquired projects referenced in the general considerations. Forecasted depreciation and accretion expense reflects management's estimates, which are based on consistent average depreciable asset lives and depreciation methodologies under GAAP. We have assumed that the average depreciable asset lives are 30 years for our solar energy systems.

General and administrative

We estimate that we will incur general and administrative expenses of \$2.2 million for the twelve months ending June 30, 2016 and \$4.5 million for the twelve months ended December 31, 2016, compared to \$0.7 million for the year ended December 31, 2014. These expenses include stock compensation expense of \$ million and \$ million during the twelve months ending June 30, 2016 and December 31, 2016, respectively, and all costs of doing business, including all expenses paid by our Sponsor in excess of the payments required under the Management Services Agreement.

Table of Contents

Capital expenditures

We define growth capital expenditures as costs incurred by our Sponsor for contributed projects and payments to third parties for acquired projects. We estimate these costs to be \$ million for the twelve months ending June 30, 2016 and \$ million for the twelve months ending December 31, 2016, compared to \$201.8 million for the year ended December 31, 2014.

Financing and other

We estimate that interest expense will be \$50.8 million for the twelve months ending June 30, 2016 and \$47.1 million for the twelve months ending December 31, 2016, compared to \$12.3 million for the year ended December 31, 2014. Forecasted interest expense is based on the following assumptions:

we estimate that our debt level will be approximately \$390.1 million as of June 30, 2016 and \$385.6 million as of December 31, 2016; and

we estimate that our borrowing costs will average 13.0% and 12.2% for the twelve-month periods ending June 30, 2016 and December 31, 2016, respectively.

We estimate that principal amortization of indebtedness will be \$4.6 million for the twelve months ending June 30, 2016 and \$5.7 million for the twelve months ending December 31, 2016, compared to \$0.7 million for the year ended December 31, 2014. The increase is primarily attributed to additional amortization following COD for projects in our initial portfolio and acquisitions.

Our projects

The forecast above assumes that our portfolio of projects will consist of our initial portfolio during the relevant periods. See [Summary](#) Our initial portfolio and the Call Right Projects. We have assumed that we will not make any additional acquisitions during the forecast periods, other than those included in our initial portfolio.

Megawatt-hours sold

Our ability to generate sufficient cash available for distribution to pay dividends to holders of our Class A common stock is primarily a function of the volume of electricity generated and sold by our solar energy projects as well as, to a lesser extent, where applicable, other environmental attributes related to energy generation. The volume of electricity generated and sold by our projects during a particular period is also impacted by the number of projects that have commenced commercial operations, as well as both scheduled and unexpected repair and maintenance required to keep our projects operational. The volume of electricity generated and sold by our projects will be negatively impacted if any projects experience higher than normal downtime as a result of equipment failures, electrical grid disruption or curtailment, weather disruptions or other events beyond our control. We have assumed that unscheduled outages during the forecast periods will be consistent with our historical experience.

As of December 31, 2014, the weighted average (based on megawatts) remaining life of our PPAs was 19 years. Pricing under the PPAs is contracted for the duration of the contract for all projects. Certain of our PPAs will have price escalators based on an index (such as the consumer price index) or other rates specified in the applicable PPA.

Table of Contents

Regulatory, industry and economic factors

Our estimated results of operations for the forecasted period are based on the following assumptions related to regulatory, industry and economic factors:

no material nonperformance or credit-related defaults by customers, suppliers, our Sponsor or any of our customers;

no new or material amendments to national, provincial, state and local laws or regulations (including tax laws, tariffs and regulations), or interpretation or application of existing laws or regulations, relating to renewable energy generally, or solar energy specifically, that in either case will be materially adverse to our business or our suppliers, our Sponsor or any of our customers' businesses or operations;

no material adverse effects to our business, industry or our suppliers, our Sponsor or any of our customers' businesses or operations on account of natural disasters;

no material adverse change resulting from supply disruptions, reduced demand for electricity or electrical grid or interconnection disruption or curtailment;

no material adverse changes in market, regulatory and overall economic conditions; and

no material adverse changes in the existing regulatory framework, such as regulations relating to net metering or third-party ownership of electrical generation.

Table of Contents

Unaudited pro forma condensed consolidated financial statements

The unaudited pro forma condensed consolidated financial statements as of and for the year ended December 31, 2014 have been derived from the predecessor audited combined financial statements appearing elsewhere in this prospectus and give pro forma effect to the Organizational Transactions, including the use of the estimated net proceeds from this offering, and the completion of the Contributed Projects and the Acquisitions. The unaudited pro forma condensed consolidated statement of operations is as if the Organizational Transactions and the Acquisitions occurred as of January 1, 2014. The unaudited pro forma condensed consolidated balance sheet reflects such transactions as if they had occurred on December 31, 2014. We derived the following unaudited pro forma condensed consolidated financial statements or the pro forma financial statements by applying pro forma adjustments to the predecessor audited combined financial statements and the financial statements of the businesses that have been or will be acquired in the Acquisitions included elsewhere in this prospectus. The predecessor audited combined financial statements as of and for the year ended December 31, 2014 appearing elsewhere in this prospectus are intended to represent the financial results of our Sponsor's solar assets that will be contributed to Global LLC as part of the Contributed Projects for that period.

The Formation Transactions for which we have made pro forma adjustments are as follows:

the contribution of Contributed Projects and the acquisition of the Acquired Projects;

Global LLC's entry into the \$150.0 million Bridge Facility on December 22, 2014, which was amended on May 6, 2015 to increase the aggregate principal amount outstanding to \$450 million of which \$87.5 million was subsequently prepaid with a portion of the net proceeds from the Private Placements;

Global LLC's use of the Bridge Facility to fund a portion of the Acquisitions' purchase price and the reduction of certain project-level indebtedness;

the sale of Class D units of Global LLC in the Private Placements for an aggregate of \$175.0 million in cash; and

Global LLC's use of the net proceeds from the Private Placements to fund a reduction in borrowings under the Bridge Facility, a portion of the Acquisitions' purchase price and the reduction of certain project-level indebtedness.

The Offering Transactions for which we will make pro forma adjustments are as follows:

the amendment and restatement of Global's certificate of incorporation to provide for Class A common stock, Class B common stock and Class B1 common stock, and the concurrent conversion of (i) SunEdison's interest in Global's common equity into shares of Class B common stock and (ii) certain equity interests held by certain of our executives and other employees of SunEdison into shares of Class A common stock;

the issuance of restricted stock units to be granted to several persons who have provided or are expected to provide services to us in connection with the completion of this offering, or the IPO Grants;

the amendment of Global LLC's operating agreement to provide for Class A units, Class B units and Class B1 units and to convert SunEdison's units into Class B units, issue the IDRs to our Sponsor and appoint Global as the sole managing member of Global LLC;

Edgar Filing: TERRAFORM GLOBAL, INC. - Form S-1

the sale of _____ shares of our Class A common stock to the purchasers in this offering in exchange for net proceeds of approximately \$ _____ million, assuming no exercise of the underwriters' option to purchase additional shares of Class A common stock, after deducting underwriting discounts and commissions, the structuring fee and offering expenses payable by us;

Table of Contents

our use of all of the net proceeds from this offering to purchase newly issued Class A units of Global LLC, representing % of Global LLC's outstanding membership units, assuming no exercise of the underwriters' option to purchase additional shares of Class A common stock;

Global LLC's use of a portion of such proceeds to repay the outstanding principal amount of the Bridge Facility (including accrued interest) and to pay fees and expenses associated with the Revolver, to fund a portion of the Acquisitions' purchase price, and for general corporate purposes which may include future acquisitions of clean energy assets from our Sponsor pursuant to the Support Agreement or from third parties;

the issuance of shares and shares of Class A common stock to BioTherm's affiliate, which is a leading global investment fund, and Renova Energia S.A., the selling parties in the BioTherm Transaction and Renova Transaction, respectively;

the completion of the Pending Acquisitions;

the issuance of shares of Class A common stock in exchange for Class D units previously issued by Global LLC as part of the Private Placements;

Global Operating LLC's execution of a new \$ million Revolver, which will remain undrawn at the completion of this offering; and

our entering into the Support Agreement, the Management Services Agreement, the Repowering Service ROFR Agreement and the Interest Payment Agreement with our Sponsor.

The pro forma adjustments we have made with respect to the Acquisitions are as follows:

adjustments to record acquired assets and assumed liabilities at their fair value;

adjustments to reflect depreciation and amortization of fair value adjustments for acquired property, plant and equipment, and intangible assets, and debt assumed; and

adjustments to reflect operating activity of the projects acquired.

The pro forma financial statements combine the predecessor audited combined financial statements and the historical financial statements of the project-level entities acquired in the Acquisitions to illustrate the effect of the Acquisitions. The pro forma financial statements were based on, and should be read in conjunction with:

the accompanying notes to the pro forma financial statements;

the predecessor audited combined financial statements as of and for the year ended December 31, 2014 and the notes relating thereto included elsewhere in this prospectus; and

the financial statements of the project-level entities acquired in the Acquisitions as of and for the year ended December 31, 2014 and the notes relating thereto included elsewhere in this prospectus.

Edgar Filing: TERRAFORM GLOBAL, INC. - Form S-1

The predecessor audited combined financial statements have been adjusted in the pro forma condensed consolidated financial statements to give pro forma effect to events that are (1) directly attributable to the Acquisitions, (2) factually supportable and (3) with respect to the pro forma condensed consolidated statement of operations, expected to have a continuing impact on the combined results.

As described in the accompanying notes, the unaudited pro forma condensed consolidated financial statements have been prepared using the acquisition method of accounting under existing GAAP. The predecessor has been treated as the acquirer in the Acquisitions for accounting purposes. The purchase price will be allocated to the assets and liabilities of the businesses that have been or will be acquired in the Acquisitions based upon their

Table of Contents

estimated fair values as of the date of completion of the applicable Acquisition. The allocation is dependent on certain valuations and other studies that have not progressed to a stage where there is sufficient information to make a final definitive allocation. A final determination of the fair value of the assets and liabilities of the businesses that have been or will be acquired in the Acquisitions, which cannot be made prior to the completion of the relevant transaction, will be based on the actual net tangible and intangible assets of the businesses that have been or will be acquired in the Acquisitions that existed as of the date of completion of the applicable Acquisition. Accordingly, the pro forma purchase price adjustments are preliminary, subject to future adjustments, and have been made solely for the purpose of providing the unaudited pro forma condensed consolidated financial information presented below. Adjustments to these preliminary estimates are expected to occur and these adjustments could have a material impact on the accompanying unaudited pro forma condensed consolidated financial statements, although we do not expect the adjustments to have a material effect on the combined company's future results of operations and financial position.

The unaudited pro forma condensed consolidated financial statements are presented for informational purposes only. The pro forma adjustments are based upon available information and certain assumptions that we believe are reasonable. The unaudited pro forma condensed consolidated financial statements do not purport to represent what our results of operations or financial condition would have been had the transactions to which the pro forma adjustments relate actually occurred on the dates indicated, and they do not purport to project our results of operations or financial condition for any future period or as of any future date. This offering is not conditioned on the prior closing of the Pending Acquisitions, and we cannot assure you that all of the Pending Acquisitions will be consummated on the terms or timetable currently contemplated or at all.

The unaudited pro forma condensed consolidated balance sheet and statement of operations should be read in conjunction with the sections entitled Summary Organizational Transactions, Use of proceeds, Capitalization, Selected historical combined financial data, Management's discussion and analysis of financial condition and results of operations, Certain relationships and related party transactions Management Services Agreement and the historical financial statements and related notes thereto included elsewhere in this prospectus. See Risk factors Risks related to our business Our pro forma financial information included elsewhere in this prospectus assumes the completion of the Pending Acquisitions.

- (c) The statement of operations for the year ended December 31, 2014 has been translated from South African Rand (ZAR) to U.S. Dollars (USD) at the average fiscal 2014 rate of 0.0921 ZAR/USD.
- (d) The statement of operations for the year ended December 31, 2014 has been translated from Peruvian Nuevo Sol (PEN) to U.S. Dollars (USD) at the average fiscal 2014 year rate of 0.3453 PEN/USD.
- (e) The statement of operations for the year ended December 31, 2014 has been translated from Brazilian Real (BRL) to U.S. Dollars (USD) at the average fiscal 2014 rate of 0.4259 BRL/USD.
- (f) The unaudited historical statement of operations for LAP transaction is presented in accordance with U.S. GAAP and has been derived from the audited historical statement of comprehensive income of Empresa de Generación Eléctrica de Junín S.A.C. and Hidroeléctrica Santa Cruz S.A.C. (collectively LAP) for the year ended December 31, 2014, prepared in accordance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). The historical IFRS statements of comprehensive income of LAP have been adjusted by reclassifying certain line items in order to conform to the Predecessor's statement of operations presentation which is under U.S. GAAP. No other adjustments were necessary to conform LAP's historical IFRS accounting policies to that of the US GAAP policies of the Predecessor.
- (g) The unaudited historical statement of operations for Renova is presented in accordance with U.S. GAAP and has been derived from the audited historical combined income statement of Renova Energy Projects I for the year ended December 31, 2014, prepared in accordance with IFRS (as issued by IASB). The historical IFRS income statement information of Renova has been adjusted by reclassifying certain line items in order to conform to the Predecessor's statement of operations presentation which is under U.S. GAAP. No other adjustments were necessary to conform Renova's historical IFRS accounting policies to that of the US GAAP policies of the Predecessor.
- (2) *Cost of operations affiliate* Represents a recharacterization of expense from related party to non-related party. The expense was related to an affiliate of BioTherm, which is an unrelated third party to us. Also includes a recharacterization of expense to related party for NSM 24 for costs incurred related to our Sponsor.
- (3) *General and administrative affiliate* Represents a recharacterization of expense from related party to non-related party. The expense was related to an affiliate of BioTherm, which is an unrelated third party to us.

- (4) *Depreciation, amortization and accretion* Represents the impact of the following acquisition adjustments:

Amortization due to fair value adjustment to intangible assets	\$ 19,228
Depreciation due to fair value adjustment to property and equipment	12,038
Total	\$ 31,266

Amortization of the fair value adjustments to intangibles totals \$19,228 due to acquired PPA intangible assets recognized over the terms of such agreements over periods ranging from 13 to 24 years. The fair value adjustments for the intangible assets of the businesses that have been or will be acquired in the Acquisitions were valued primarily using a variation of the income approach. The estimate of the amortization of the PPA intangible assets are preliminary, subject to change and could vary materially from the actual adjustment at the time the acquisition is completed.

Depreciation of the fair value adjustment to property and equipment totals \$12,038 million due to the net depreciation of the fair value adjustments for the property and equipment of the businesses that have been or will be acquired in the Acquisitions. The fair value of property and equipment acquired was valued primarily using a cost approach and limited to what is economically supportable as indicated by an income approach. Under this approach, the fair value approximates the current cost of replacing an asset with another of equivalent economic utility adjusted for functional obsolescence and physical depreciation. The estimate is preliminary, subject to change and could vary materially from the actual adjustment at the time the applicable acquisition is completed. The estimated useful lives of the property and equipment acquired ranges from 19 to 40 years. Approximately \$12 million of the fair value adjustments to property and equipment would be recognized annually.

Table of Contents

- (5) *Other (income) expense, net* As a result of our Sponsor's contributions of its equity interests in NSM 24 to us and our probable acquisition of the remaining NSM 24 equity interests at the anticipated purchase price in the Chint Transaction as reflected herein, we anticipate recording \$1.4 million for NSM 24 gain on remeasurement to fair value of the Sponsor's contributed interest. These gains are not reflected in the unaudited pro forma condensed consolidated statement of operations because of its non-recurring nature.
- (6) *Income tax expense* Represents the adjustment to record the tax effect of pro forma adjustments to expense attributable to the Acquisitions, calculated at the statutory rates in effect in each jurisdiction. This adjustment also gives pro forma effect to the Formation Transactions, calculated using the predecessor's estimated combined statutory federal, foreign, and state tax rate.
- (7) *Net income attributable to non-controlling interest* Represents the adjustment to reflect the 32.4% non-controlling interest in the BioTherm pro forma results of operations and the 49% non-controlling interest in the Soutpan and Witkop pro forma results of operation.
- (8) *Interest expense* Represents: (i) a reduction of \$19.3 million in interest expense as a result of the repayment of certain project-level indebtedness in the amount of \$194.6 million using funds received from the Bridge Facility; and (ii) an increase of \$33.9 in interest expense, net of capitalized interest, on net borrowings under the Bridge Facility of \$362.5 million (after giving effect to the reduction of \$87.5 million principal using a portion of the proceeds from the Private Placements), as if both occurred as of January 1, 2014. We are assuming all of the outstanding indebtedness of the businesses that have been or will be acquired in the Acquisitions. The fair value of debt assumed was based on market rates for similar project-level debt. Total interest for the Bridge Facility is estimated based on the effective interest rate on borrowings under the Bridge Facility of 8.5% at December 31, 2014 and increases by 0.50% five months after the borrowing date and by 0.25% each 90 days thereafter until the maturity in December 2016, or repayment of all outstanding indebtedness under the Bridge Facility. The pro forma adjustment for the Bridge Facility interest expense of \$34 million is net of estimated capitalized interest, plus an estimate of amortization of the Bridge Facility debt issuance costs and discounts. The actual interest rates may vary from that estimate and a 1/8% variance in the estimated interest rate would result in a \$0.4 million change in pro forma interest expense for the year ended December 31, 2014. See Description of certain indebtedness Bridge Facility.
- (9) *General and administrative* Represents stock compensation expense of approximately \$ million related to the grants of restricted stock to certain employees in connection with the formation of Global and \$ million of stock compensation expense related to the IPO Grants, which will be recognized over the applicable service period.
- (10) Represents the decrease in interest expense resulting from the repayment of the Bridge Facility using a portion of the net proceeds from this offering.
- (11) *Income tax expense* Represents the tax effect of pro forma adjustments to expense, and to give pro forma effect to the Offering Transactions, calculated using the predecessor's estimated combined statutory federal, foreign, and state tax rate.
- (12) *Net loss attributable to non-controlling interest* Global will become the sole managing member of Global LLC immediately prior to the consummation of this offering. After consummation of the Organizational Transactions, Global will own less than 100% of the economic interests in Global LLC but will have 100% of the voting power and control the management of Global LLC. In addition Global LLC will own less than 100% of the consolidated project entities. Giving pro forma effect to the Organizational Transactions, including the use of proceeds from this offering as if each had occurred on January 1, 2014, the non-controlling interest would have been % of the net loss of Global LLC, which received less than 100% of the income from the underlying consolidated project entities.

Table of Contents

(13) *Pro forma basic and diluted loss per share* Pro forma basic and diluted loss per share is calculated as follows:

(in thousands, except share and per share data)	Basic	Diluted
EPS Numerator:		
Net loss attributable to Class A common stock	\$	\$
EPS Denominator:		
Class A shares offered hereby		
Private Placement of Class A shares, as converted		
Restricted Class A shares		
Total Class A shares		
Loss per share	\$	\$
