MFS® INTERMEDIATE HIGH INCOME FUND

CIH-SEM

MANAGED DISTRIBUTION POLICY DISCLOSURE

The MFS Intermediate High Income Fund s (the fund) Board of Trustees has adopted a managed distribution policy effective May 1, 2015. The fund seeks to pay monthly distributions based on an annual rate of 9.50% of the fund s average monthly net asset value. The fund s total return in relation to changes in net asset value is presented in the Financial Highlights. You should not draw any conclusions about the fund s investment performance from the amount of the current distribution or from the terms of the fund s managed distribution policy. The Board may amend or terminate the managed distribution policy at any time without prior notice to fund shareholders.

With each distribution, the fund will issue a notice to shareholders and an accompanying press release which will provide detailed information regarding the amount and composition of the distribution and other related information. The amounts and sources of distributions reported in the notice to shareholders are only estimates and are not being provided for tax reporting purposes. The actual amounts and sources of the amounts for tax reporting purposes will depend upon the fund s investment experience during the remainder of its fiscal year and may be subject to changes based on tax regulations. The fund will send you a Form 1099-DIV for the calendar year that will tell you how to report these distributions for federal income tax purposes.

Under a managed distribution policy the fund may at times distribute more than its net investment income and net realized capital gains; therefore, a portion of your distribution may result in a return of capital. A return of capital may occur, for example, when some or all of the money that you invested in the fund is paid back to you. A return of capital does not necessarily reflect the fund s investment performance and should not be confused with yield or income. Please refer to Tax Matters and Distributions under Note 2 of the Notes to Financial Statements for information regarding the tax character of the fund s distributions.

LETTER FROM THE CHAIRMAN

Dear Shareholders:

Global economic conditions were sluggish in early 2015. U.S. growth decelerated sharply, and a strong dollar made exports more expensive. Also contributing to

weakness were a slow, tentative eurozone economic recovery, a steady deceleration in China s pace of growth and a struggling Japanese economy.

Other major economies and regions have struggled, leading central banks to step up their efforts to stimulate economic growth. The European Central Bank s quantitative easing program has begun to make an impact. However, risks associated with a potential Greek debt default and potential eurozone exit have weighed on business and investor confidence.

Despite the People s Bank of China s targeted stimulative actions,

China s economic growth rate has continued to decelerate to multi-decade lows, and Chinese equity markets are showing signs of strain.

In Puerto Rico, concerns about the island nation s ability to pay its outstanding debt obligations resurfaced, which weighed on municipal bond markets.

The U.S. Federal Reserve has remained accommodative in the face of global headwinds and low inflation.

The world s financial markets have become increasingly complex in recent years. Now, more than ever, it is important to understand companies on a global basis. At MFS®, we believe our integrated research platform, collaborative culture, active risk management process and long-term focus give us a research advantage.

As investors, we aim to add long-term value. We believe this approach will serve you well as you work with your financial advisor to reach your investment objectives.

Respectfully,

Robert J. Manning

Chairman

MFS Investment Management

PORTFOLIO COMPOSITION

Portfolio structure (i)

Top five industries (i)	
Energy-Independent	9.5%
Midstream	7.6%
Medical & Health Technology & Services	7.4%
Telecommunications-Wireless	6.7%
Cable TV	6.7%
Composition including fixed income credit quality (a)(i)	
BBB	2.6%
BB	51.7%
В	61.2%
CCC	15.1%
D	0.5%
Not Rated	(1.0)%
Non-Fixed Income (o)	0.0%
Cash & Other	(30.1)%
Portfolio facts (i)	
Average Duration (d)	5.8
Average Effective Maturity (m)	6.6 yrs.

- (a) For all securities other than those specifically described below, ratings are assigned to underlying securities utilizing ratings from Moody s, Fitch, and Standard & Poor s rating agencies and applying the following hierarchy: If all three agencies provide a rating, the middle rating (after dropping the highest and lowest ratings) is assigned; if two of the three agencies rate a security, the lower of the two is assigned. Ratings are shown in the S&P and Fitch scale (e.g., AAA). Securities rated BBB or higher are considered investment grade. All ratings are subject to change. Not Rated includes fixed income securities, including fixed income futures contracts, which have not been rated by any rating agency. Non-Fixed Income includes equity securities (including convertible bonds and equity derivatives) and commodities. The fund may not hold all of these instruments. The fund is not rated by these agencies.
- (d) Duration is a measure of how much a bond s price is likely to fluctuate with general changes in interest rates, e.g., if rates rise 1.00%, a bond with a 5-year duration is likely to lose about 5.00% of its value due to the interest rate move.

Portfolio Composition continued

- (i) For purposes of this presentation, the components include the value of securities, and reflect the impact of the equivalent exposure of derivative positions, if any. These amounts may be negative from time to time. Equivalent exposure is a calculated amount that translates the derivative position into a reasonable approximation of the amount of the underlying asset that the portfolio would have to hold at a given point in time to have the same price sensitivity that results from the portfolio s ownership of the derivative contract. When dealing with derivatives, equivalent exposure is a more representative measure of the potential impact of a position on portfolio performance than value. The bond component will include any accrued interest amounts.
- (m) In determining an instrument s effective maturity for purposes of calculating the fund s dollar-weighted average effective maturity, MFS uses the instrument s stated maturity or, if applicable, an earlier date on which MFS believes it is probable that a maturity-shortening device (such as a put, pre-refunding or prepayment) will cause the instrument to be repaid. Such an earlier date can be substantially shorter than the instrument s stated maturity.
 (a) Least then 0.1%
- (o) Less than 0.1%.

From time to time Cash & Other may be negative due to borrowings for leverage transactions, timing of cash receipts, and/or equivalent exposure from any derivative holdings.

Where the fund holds convertible bonds, these are treated as part of the equity portion of the portfolio.

Cash & Other can include cash, other assets less liabilities, offsets to derivative positions, and short-term securities. Please see the Statement of Assets and Liabilities for additional information related to the fund s cash position and the Notes to Financial Statements for additional information related to certain risks associated with assets included in Other.

Percentages are based on net assets as of 5/31/15.

The portfolio is actively managed and current holdings may be different.

PORTFOLIO MANAGERS PROFILES

Portfolio Manager William Adams	Primary Role Portfolio Manager	Since 2011	Title and Five Year History Investment Officer of MFS; employed in the investment management area of MFS since 2009; Credit Analyst at MFS from 1997 to 2005.
David Cole	Portfolio Manager	2007	Investment Officer of MFS; employed in the investment management area of MFS since 2004.

OTHER NOTES

The fund s shares may trade at a discount or premium to net asset value. When fund shares trade at a premium, buyers pay more than the net asset value underlying fund shares, and shares purchased at a premium would receive less than the amount paid for them in the event of the fund s liquidation.

The fund s monthly distributions may include a return of capital to shareholders to the extent that the fund s net investment income and net capital gains are insufficient to meet the fund s target annual distribution rate. Distributions that are treated for federal income tax purposes as a return of capital will reduce each shareholder s basis in his or her shares and, to the extent the return of capital exceeds such basis, will be treated as gain to the shareholder from a sale of shares. It may also result in a recharacterization of what economically represents a return of capital to ordinary income in those situations where a fund has long term capital gains and a capital loss carryforward. Returns of shareholder capital have the effect of reducing the fund s assets and increasing the fund s expense ratio.

The fund s target annual distribution rate is calculated based on an annual rate of 9.50% of the fund s average monthly net asset value, not a fixed share price, and the fund s dividend amount will fluctuate with changes in the fund s average monthly net assets.

In accordance with Section 23(c) of the Investment Company Act of 1940, the fund hereby gives notice that it may from time to time repurchase shares of the fund in the open market at the option of the Board of Trustees and on such terms as the Trustees shall determine.
