Fund objectives

The Fund's primary investment objective is to provide current income. As a secondary investment objective, the Fund will seek capital appreciation.

The Fund seeks to achieve its investment objectives by investing, under normal market conditions, at least 80% of its assets in global fixed income securities.

Letter from the chairman

Dear Shareholder,

We are pleased to provide the annual report of

BrandywineGLOBAL Global Income Opportunities Fund Inc. for the twelve-month reporting period ended October 31, 2018. Please read on for a detailed look at prevailing economic and market conditions during the Fund's reporting period and to learn how those conditions have affected Fund performance.

As always, we remain committed to providing you with excellent service and a full spectrum of investment choices. We also remain committed to supplementing the support you receive from your financial advisor. One way we accomplish this is through our website, www.lmcef.com. Here you can gain immediate access to market and investment information, including:

Fund prices and performance,

Market insights and commentaries from our portfolio managers, and

A host of educational resources.

Edgar Filing: BrandywineGLOBAL-Global Income Opportunities Fund Inc - Form N-CSR

We look forward to helping you meet your financial goals.

Sincerely,

Jane Trust, CFA

Chairman, President and Chief Executive Officer

Investment commentary

Economic review

Economic activity in the U.S. was mixed during the twelve months ended October 31, 2018 (the reporting period). Looking back, the U.S. Department of Commerce reported that fourth quarter 2017 and first quarter 2018 U.S. gross domestic product (GDP) growth was 2.3% and 2.2%, respectively. GDP growth then accelerated to 4.2% during the second quarter of 2018—the strongest reading since the third quarter of 2014. Finally, the U.S. Department of Commerce's second reading for third quarter 2018 GDP growth—released after the reporting period ended—was 3.5%. The deceleration in GDP growth in the third quarter of 2018 reflected a downturn in exports and decelerations in nonresidential fixed investment and personal consumption expenditures. Imports increased in the third quarter after decreasing in the second. These movements were partly offset by an upturn in private inventory investment.

Job growth in the U.S. was solid overall and supported the economy during the reporting period. As reported by the U.S. Department of Labor, when the reporting period ended on October 31, 2018, the unemployment rate was 3.7%, versus 4.1% when the period began. October 2018's reading equaled the lowest unemployment rate since 1969. The percentage of longer-term unemployed also declined during the reporting period. In October 2018, 22.5% of Americans looking for a job had been out of work for more than six months, versus 23.8% when the period began.

Turning to the global economy, in its October 2018 *World Economic Outlook*, the International Monetary Fund (IMF) said, "Global growth for 2018-19 is projected to remain steady at its 2017 level, but its pace is less vigorous than projected in April [2018] and it has become less balanced. Downside risks to global growth have risen in the past six months and the potential for upside surprises has receded. From a regional perspective, the IMF projects 2018 growth in the Eurozone will be 2.0%, versus 2.4% in 2017. Japan's economy is expected to expand 1.1% in 2018, compared to 1.7% in 2017. Elsewhere, the IMF projects that overall growth in emerging market countries will be 4.7% in 2018, the same as in 2017."

Looking back, at its meeting that concluded on September 20, 2017, the Federal Reserve Board (the Fed) kept the federal funds rate^{iv} on hold, but reiterated its intention to begin reducing its balance sheet, saying, "In October, the Committee will initiate the balance sheet normalization program." At its meeting that ended on December 13, 2017, the Fed raised rates to a range between 1.25% and 1.50%. As expected, the Fed kept rates on hold at its meeting that concluded on January 31, 2018. However, at its meeting that ended on March 21, 2018, the Fed again raised the federal funds rate, moving it to a range between 1.50% and 1.75%. At its meeting that concluded on June 13, 2018, the Fed raised the federal funds rate to a range between 1.75% and 2.00%. Finally, at its meeting that ended on September 26, 2018, the Fed raised the federal funds rate to a range between 2.00% and 2.25%.

Central banks outside the U.S. took different approaches to monetary policy during the reporting period. Looking back, in December 2016, the European Central Bank (ECB) extended its bond buying program until December 2017. From April 2017 through December 2017, the ECB purchased 60 billion-per-month of bonds. In October

Investment commentary (continued)

2017, the ECB announced that it would continue to buy bonds through September 2018, but after December 2017 it would pare its purchases to 30 billion-per-month. In June 2018, the ECB announced it would end its bond buying program by the end of the year, but it did not anticipate raising interest rates at least through the summer of 2019. In other developed countries, on November 2, 2017, the Bank of England raised rates from 0.25% to 0.50% the first increase since July 2007. It then raised rates to 0.75% at its meeting on August 2, 2018. After holding rates steady at 0.10% for more than five years, in January 2016, the Bank of Japan^{vii} announced that it cut the rate on current accounts that commercial banks hold with it to -0.10% and kept rates on hold during the reporting period. Elsewhere, the People's Bank of Chinaⁱⁱⁱ kept rates steady at 4.35% during the reporting period.

As always, thank you for your confidence in our stewardship of your assets.

Sincerely,

Jane Trust, CFA

Chairman, President and Chief Executive Officer

November 30, 2018

All investments are subject to risk including the possible loss of principal. Past performance is no guarantee of future results. Forecasts and predictions are inherently limited and should not be relied upon as an indication of actual or future performance.

ⁱ Gross domestic product (GDP) is the market value of all final goods and services produced within a country in a given period of time.

ⁱⁱ The International Monetary Fund (IMF) is an organization of 189 countries, working to foster global monetary cooperation, secure financial stability, facilitate international trade, promote high employment and sustainable economic growth, and reduce poverty around the world.

ⁱⁱⁱ The Federal Reserve Board (the Fed) is responsible for the formulation of U.S. policies designed to promote economic growth, full employment, stable prices, and a sustainable pattern of international trade and payments.

^{iv} The federal funds rate is the rate charged by one depository institution on an overnight sale of immediately available funds (balances at the Federal Reserve) to another depository institution; the rate may vary from depository institution to depository institution and from day to day.

^v The European Central Bank (ECB) is responsible for the monetary system of the European Union and the euro currency.

^{vi} The Bank of England (BoE), formally the Governor and Company of the BoE, is the central bank of the United Kingdom. The BoE's purpose is to maintain monetary and financial stability.

^{vii}

Edgar Filing: BrandywineGLOBAL-Global Income Opportunities Fund Inc - Form N-CSR

The Bank of Japan is the central bank of Japan. The bank is responsible for issuing and handling currency and treasury securities, implementing monetary policy, maintaining the stability of the Japanese financial system and the yen currency.

^{viii} The People's Bank of China is the central bank of the People's Republic of China with the power to carry out monetary policy and regulate financial institutions in mainland China.

IV BrandywineGLOBAL Global Income Opportunities Fund Inc.

Fund overview

Q. What is the Fund's investment strategy?

A. The Fund seeks to provide current income as a primary objective. Capital appreciation is a secondary objective. The Fund seeks to achieve its investment objectives by investing, under normal market conditions, at least 80% of its assets in global fixed-income securities. These may include, but are not limited to, sovereign debt of developed and emerging market countries, U.S. and non-U.S. corporate debt, mortgage-backed securities (MBS) and currency exposure. The Fund may manage its currency exposure through the use of futures, forwards and other derivative instruments, for hedging and investment purposes. The Fund's specific investments will shift as the Fund rotates among countries, credits and currencies to find the most attractive values over time. Under normal market conditions, no more than 55% of the Fund's managed assets may be rated below investment grade (commonly known as high yield or junk bonds) by a nationally recognized statistical rating organization or, if unrated, that we determined to be of comparable quality; provided however, that the quality of a security will be based on the highest rating it receives. In addition, under normal market conditions, at least 40% of the Fund's managed assets will be invested in non-U.S. countries or currencies. The Fund may use leverage to enhance current income.

In making investment decisions on behalf of the Fund, we apply a top-down, macro driven investment process and invest where we believe opportunities exist with respect to interest rate levels and currency valuations. We consider secular trends, political and monetary conditions and business cycle risks when making investment decisions. We also take into account the relative risk and return characteristics of prospective investments when determining how to achieve desired exposures.

Brandywine Global Investment Management, LLC (Brandywine Global), the Fund's subadviser, is responsible for the day-to-day portfolio management of the Fund. Brandywine Global uses an active, team-based approach to manage its fixed income portfolios. The investment professionals at Brandywine Global who are primarily responsible for development of investment strategy, day-to-day portfolio management and oversight and coordination of the Fund are David F. Hoffman, CFA, Stephen S. Smith, Jack P. McIntyre, CFA, Anujeet Sareen, CFA, Gerhardt (Gary) P. Herbert, CFA, Brian L. Kloss, JD, CFA and Tracy Chen, CFA, CAIA.

Q. What were the overall market conditions during the Fund's reporting period?

A. The global fixed income market experienced periods of volatility and generated weak results during the twelve-month reporting period ended October 31, 2018. Global yields generally moved higher over the reporting period, which was a headwind for fixed income assets.

To a great extent, monetary policy continued to diverge during the Fund's fiscal year. The Federal Reserve Board (the Fed) raised the federal funds ratesⁱⁱ four times during the reporting period, with the latest increase bringing the federal funds rate to a target range between 2.00% and 2.25%. The Fed also anticipates one additional rate hike in 2018, and expects to continue paring of its balance sheet. Other developed country central banks, including the European Central Bank (ECBⁱⁱ) and the Bank of Japan

Fund overview (cont'd)

(BoJ^v), maintained their accommodative policies. While the ECB announced that it would end its bond buying program by the end of 2018, it does not expect to raise interest rates at least through the summer of 2019. The BoJ and the People's Bank of China^u kept rates on hold during the reporting period. Elsewhere, the Bank of England (BoEⁱ) raised rates twice during the reporting period, with its last increase pushing rates to 0.75%.

All told, the Bloomberg Barclays Global Aggregate Index^{vii} returned -2.04% during the twelve months ended October 31, 2018. Investors who took on additional risk also experienced weak results over the reporting period. Global high-yield corporate bonds, as measured by the Bloomberg Barclays Global High Yield Index (USD hedged)^{viii} returned -0.95%. Meanwhile, the JPMorgan Emerging Markets Bond Index Global (EMBI Global^h) returned -5.27%. Within the currency markets, the U.S. dollar appreciated against most other currencies. The U.S. dollar was supported by several interest rate hikes by the Fed and indications that it would continue to tighten monetary policy in 2019.

Q. How did we respond to these changing market conditions?

A. Given uncertain global macro conditions, we made several adjustments to the Fund's portfolio during the reporting period. We reduced the Fund's emerging markets exposures. From a foreign exchange (FX) perspective, we pared our allocations to currencies such as the Brazilian real, Indian rupee and Peruvian sol. In terms of emerging markets bonds, we reduced the Fund's exposures in Mexico, Peru and Turkey, to name a few. Elsewhere, we increased the Fund's U.S. dollar exposure given moderating growth abroad. Meanwhile, while the Fund maintained a meaningful exposure to U.S. Treasuries, we pared this allocation during the reporting period.

The Fund used U.S. Treasury futures to manage its bond exposure. The use of these instruments detracted from performance. Currency forwards, which were used to manage the Fund's currency exposures, slightly contributed to results. The Fund tactically used credit default swaps and CDX to manage its high-yield credit exposure. Both detracted from performance over the reporting period.

Performance review

For the twelve months ended October 31, 2018, BrandywineGLOBAL Global Income Opportunities Fund Inc. returned -11.30% based on its net asset value (NAV) and -14.46% based on its New York Stock Exchange (NYSE) market price per share. The Fund's unmanaged benchmark, the Bloomberg Barclays Global Aggregate Index^{xi}, returned -2.04% for the same period. The Lipper Global Income Closed-End Funds Category Average^{xii} returned -1.60% over the same time frame. Please note that Lipper performance returns are based on each fund's NAV.

During the twelve-month period, the Fund made distributions to shareholders totaling \$0.93 per share, of which \$0.60 will be treated as a return of capital for tax purposes*. The performance table shows the Fund's twelve-month total return based

*For the tax character of distributions paid during the fiscal year ended October 31, 2018, please refer to page 40 of this report.

on its NAV and market price as of October 31, 2018. **Past performance is no guarantee of future results.**

Performance Snapshot as of October 31, 2018

Price Per Share	12-month Total Return**
\$12.34 (NAV)	-11.30%
\$10.29 (Market Price)	-14.46%

All figures represent past performance and are not a guarantee of future results.

**** Total returns are based on changes in NAV or market price, respectively. Returns reflect the deduction of all Fund expenses, including management fees, operating expenses, and other Fund expenses. Returns do not reflect the deduction of brokerage commissions or taxes that investors may pay on distributions or the sale of shares.**

Total return assumes the reinvestment of all distributions, including returns of capital at NAV.

Total return assumes the reinvestment of all distributions, including returns of capital in additional shares in accordance with the Fund's Dividend Reinvestment Plan.

Q. What were the leading contributors to performance?

A. The largest contributor to the Fund's relative performance during the reporting period was its exposure to the European housing market. This was accomplished through our allocation to residential mortgage-backed securities (RMBS). European RMBS were supported by solid fundamentals, credit rating upgrades and a lack of new supply.

The Fund's exposure to the U.S. housing market, also through investments in RMBS, was also beneficial. Investor sentiment for U.S. RMBS was buoyed by the strengthening economy, a robust labor market and deleveraging in legacy securities. In particular, we favored floating rate RMBS as a hedge against rising interest rates.

Our tactical exposure to the Japanese yen also contributed to returns. The yen is often viewed as a safe haven currency as it tends to do well during periods of market volatility and risk-off environments. The currency performed well in early 2018 given the uncertain global macro environment and signs of strength in Japan's economy.

Q. What were the leading detractors from performance?

A. The largest detractors from the Fund's relative performance over the reporting period were its exposures to longer durationⁱⁱⁱ bonds and currencies in Indonesia, Mexico and Turkey. In all three cases, these bonds and currencies were negatively impacted by macro issues, Fed rate hikes and a slowdown in Chinese growth. Indonesia was also hurt by the country's high external debt burden, as well as several rate hikes by the Bank of Indonesia. Mexico has been experiencing lackluster growth and relatively high inflation. In addition, there were concerns over President-elect Andres Manuel Lopez Obrador's political agenda in the wake of him canceling the development of a new airport in Mexico City. In terms of Turkey, political concerns, including the President's appointees to his administration and his attempts to influence the country's central bank negatively impacted investor sentiment. In addition, Turkey has a high external debt burden.

November 20, 2018

***RISKS:** The Fund is a non-diversified, closed-end management investment company designed primarily as a long-term investment and not as a trading vehicle. The Fund is not intended to be a complete investment program and, due to the uncertainty inherent in all investments, there can be no assurance that the Fund will achieve its investment objective. The Fund's common stock is traded on the New York Stock Exchange. Similar to stocks, the Fund's share price will fluctuate with market conditions and, at the time of sale, may be worth more or less than the original investment. Shares of closed-end funds often trade at a discount to their net asset value. Because the Fund is non-diversified, it may be more susceptible to economic, political or regulatory events than a diversified fund.*

The Fund's investments are subject to various risks, including but not limited to, credit, inflation, income, prepayment and interest rate risks. As interest rates increase, the value of fixed income securities decrease. Fixed income securities rated below investment grade are commonly referred to as high yield securities or junk bonds and are subject to greater liquidity and credit risks (risk of default) than higher-rated securities. Fixed income securities rated C or lower by Moody's Investor Service, Inc., CCC or lower by Standard & Poor's Corporation Ratings Group or CC or lower by Fitch Ratings, Inc. or comparably rated by another NRSRO or, if unrated, determined by Brandywine Global to be of comparable quality are considered to have extremely poor prospects of ever attaining any real investment standing, to have a current identifiable vulnerability to default, to be unlikely to have the capacity to pay interest and repay principal when due in the event of adverse business, financial or economic conditions and/or to be in default or not current in the payment of interest or principal. Ratings may not accurately reflect the actual credit risk associated with a corporate security. International investments involve certain risks not associated with domestic investing, such as currency fluctuations, and changes in political, social and economic conditions which

could increase volatility. These risks are magnified in emerging or developing markets. Mortgage-backed securities are subject to additional risks, including prepayment risk, which can limit the potential gains in a declining interest rate environment. The Fund may invest in foreign currencies or currency derivatives which may increase the risk and volatility of the Fund.

The Fund may invest in illiquid securities and securities/investments that have a leveraging effect on the portfolio which will increase the risks of the Fund. The Fund's use of leverage may result in greater volatility of NAV and the market price of common shares and increases a shareholder's risk of loss. The Fund may make significant investments in derivative instruments. Derivative instruments can be illiquid, may disproportionately increase losses and have a potentially large impact on Fund performance. The use by the Fund of derivatives such as options, forwards or futures contracts for investment and/or risk management purposes may subject the Fund to risks associated with short economic exposure through such derivatives. Taking a short economic position through derivatives exposes the Fund to the risk that it will be obligated to make payments to its counterparty if the underlying asset appreciates in value, thus resulting in a loss to the Fund. The Fund's loss on a short position, whether caused by the use of derivatives or otherwise, theoretically could be unlimited.

The Fund may invest in contingent convertible securities (CoCos). CoCos are a form of hybrid debt security that are intended to either convert into equity or have their principal written down upon the occurrence of certain triggers. The triggers are generally linked to regulatory capital thresholds or regulatory actions calling into question the issuing banking institution's continued viability as a going-concern. CoCos are subject to risks, such as Loss absorption risk (the risk that CoCos' fully discretionary coupons can potentially be cancelled at the banking institution's discretion or at the request of the relevant regulatory authority in order to help the bank absorb losses) and subordination risk (the risk that (i) in the event of liquidation, dissolution or winding-up of an issuer prior to a conversion having occurred, the rights and claims of the holders of the CoCos will generally rank junior to the claims of all holders of unsubordinated obligations of the issuer; and (ii) if the CoCos are converted into the issuer's underlying equity securities following a conversion event (i.e., a trigger), each holder will be subordinated due to their conversion from being the holder of a debt instrument to being the holder of an equity instrument).

Portfolio holdings and breakdowns are as of October 31, 2018 and are subject to change and may not be representative of the portfolio managers current or future investments. Please refer to pages 8 through 18 for a list and percentage breakdown of the Fund's holdings.

The mention of sector breakdowns is for informational purposes only and should not be construed as a recommendation to purchase or sell any securities. The information provided regarding such sectors is not a sufficient basis upon which to make an investment decision. Investors seeking financial advice regarding the appropriateness of investing in any securities or investment strategies discussed should consult their financial professional. The Fund's top five sector holdings (as a percentage of net assets) as of October 31, 2018 were: Sovereign Bonds (51.1%), Collateralized Mortgage Obligations (25.0%), Financials (17.0%), U.S. Government Agency & Obligations (12.9%) and Communication Services (7.1%). The Fund's portfolio composition is subject to change at any time.

All investments are subject to risk including the possible loss of principal. Past performance is no guarantee of future results. All index performance reflects no deduction for fees,

Fund overview (cont d)

expenses or taxes. Please note that an investor cannot invest directly in an index.

The information provided is not intended to be a forecast of future events, a guarantee of future results or investment advice. Views expressed may differ from those of the firm as a whole.

- i The Federal Reserve Board (the Fed) is responsible for the formulation of U.S. policies designed to promote economic growth, full employment, stable prices and a sustainable pattern of international trade and payments.
- ii The federal funds rate is the rate charged by one depository institution on an overnight sale of immediately available funds (balances at the Federal Reserve) to another depository institution; the rate may vary from depository institution to depository institution and from day to day.
