**CSN ANNOUNCES 2Q04 CONSOLIDATED RESULTS**

**São Paulo, Brazil, July 29, 2004** Companhia Siderúrgica Nacional (CSN) (BOVESPA: CSNA3) (NYSE: SID) today announced its second quarter results (2Q04), in accordance with accounting principles required by the Brazilian Corporate Law and denominated in Reais. The comments included in this press release, unless otherwise stated, refer to **such consolidated results with comparisons to the second quarter of 2003 (2Q03) and to the first half of 2003 (1H03)**. The US dollar/Real exchange rate on June 30, 2004 was R\$3.1075.

*Message from Benjamin Steinbruch, CEO and Chairman*

As we mentioned over two months ago, the steel industry is still enjoying a positive momentum, with international prices at high levels and increased consumption in key regions, such as Asia and the United States. The domestic market is also showing significant improvement, as the consumption of flat steel grew 4% in the second quarter compared to the same period of the previous year.

CSN has continuously presented improved results, reflecting more favourable market prices and the management focus on the continuous pursuit for competitiveness and productivity. Consolidated EBITDA increased by R\$347 million from the 1Q04 to the 2Q04 and the margins were flat even with the increases in imported raw materials prices, especially coal and coke. We are adapting our working capital needs to an environment that demands higher raw material inventories, and that, given the intensity of exports, has a more significant amount of accounts receivable. All the same, in these first six months alone, we recorded 70% of the net income and EBITDA for the FYE 2003.

Despite of this positive outlook and the overweight recommendations from analysts, the stock market is still extremely cautious when it comes to the Brazilian steel industry. I believe that our results and estimates will give the investors confidence in CSN's capacity to deliver results, and in the promising future of our upcoming investments.

**Consolidated Results**

	2004	2Q 2003	Chg. %	2004	1H 2003	Chg.%
<b>Crude Steel Production</b>	1,368	1,336	2.4	2,723	2,608	4.4
<b>Sales Volume (000 tons)</b>	1,354	1,124	20.5	2,491	2,215	12.5

	Jun/04	Mar/04	Dec/03
<b>Consolidated Net Debt R\$ MM</b>	5,998	4,729	4,908

## Edgar Filing: NATIONAL STEEL CO - Form 6-K

For the periods indicated, US\$2,227 million (79%) of the Consolidated Gross Debt was foreign currency denominated as of June 2004, US\$2,238 million (75%) was foreign currency denominated as of March 2004 and US\$2,177 million (70%) was foreign currency denominated debt as of December 2003.

	2Q			1H	
	2004	2003		2004	2003
EBITDA	1,180	735		2,013	1,522
Depreciation	(223)	(161)		(403)	(295)
Other operating expenses	(18)	(23)		(13)	(5)
Operating income bef Fin.and equity	939	549		1,597	1,222

EBITDA consists of operating income plus depreciation and other operating expenses. EBITDA does not represent net income or cash flows from operations, as these terms are defined by U.S. GAAP. EBITDA, as presented, may not be comparable to other similarly titled measures of other companies. We believe that EBITDA is useful because comparisons based on other measures, such as net income or cash flows from operating activities, include elements that vary from company to company depending on where they are located or on their capital structure. We present in the table above a reconciliation from EBITDA to operating income before financial and equity results.

### *Production and Production Costs*

#### Production

Output volumes in the second quarter of 2004 totaled 1.4 million tons of crude steel and 1.2 million tons of rolled finished products. In the first half of 2004, the production of crude steel reached 2.7 million tons, equivalent to a 4% increase, while rolled finished product also increased by 4%, reaching 2.4 million tons. These increases are the result of continuous efforts to improve productivity.

#### Production Costs (Parent Company)

In 2004, total production costs were higher than in 2003 (38% when comparing quarters and 36% between semesters). This increase is explained mainly by the higher imported raw materials prices as a result of the supply and demand unbalance in the international market, driven by increased internal consumption in China.

In 1H04, coal and coke costs were R\$237 million higher, with the major effect impacting the second quarter. During the quarter, these costs represented 34% of the total - an 11 percentage points (p.p.) increase to 1Q04 and a 10 p.p. difference from 2Q03. Therefore, dollar-denominated or dollar-linked costs represented 47% of the cash costs in 2Q04.

Higher crude steel output in 2004 also contributed to an increase in the consumption of materials in general. However, our costs were also effected by the increase in electrical energy tariffs. The non-cash effect of higher depreciation (resulting from assets revaluation and CSN Paraná start-up) corresponded to an R\$82 million increase.

### *Net Revenues*

Sales volumes of finished products and slabs reached 1.4 million tons in the quarter, up 20% compared to the same period of last year. In the domestic market, sales rose 11%, representing 63% of total Sales in the quarter. In the same comparison, export Sales increased by 40%. In 1H04, we highlight the 12% increase in total volume, and 19% higher export sales.

In 2Q04, consolidated net revenues grew 61% reaching R\$2,562 million, due to a better product mix, with higher participation of coated products, 34% increase in average prices and greater sales volume. Sales in the domestic market accounted for 62% of the net revenues in quarter, while domestic volume represented 63% of the total, this difference is a result of the effect of better international prices on export revenues. In 1H04, this situation is more balanced with both domestic revenues and volume representing 65%.

For the parent company, exports were largely to the United States of America and Europe, which represented 37% and 34% of total volume, respectively. This mainly reflects our operations with CSN LLC and Lusosider. Exports for Asia and Latin America

## Edgar Filing: NATIONAL STEEL CO - Form 6-K

were 15% and 10% of export volumes, respectively. Since CSN LLC and Lusosider sales are made in their respective regions, CSN consolidated sales showed substantially the same distribution worldwide.

### *Gross Profit, Operational Income and EBITDA*

#### Gross Profit

Gross profit for 2Q04 increased by R\$449 million when compared to 2Q03 and by R\$352 million compared to 1Q04. Gross margin was stable at 47%, as higher steel prices offset the increases in raw materials. In relation to the previous quarter, gross margin increased by 1.5 p.p. In 1H04, gross income increased by 30%, but the gross margin was 3.4 p.p. lower, given our new investments abroad, which are reflected in the consolidated figures as of the second half of 2003.

#### Operational Income

In 2Q04, operational income reached R\$939 million, compared to R\$549 million in 2Q03. This R\$390 million increase reflects the higher gross profit, partially offset by greater operational expenses mostly due to higher sales expenses, as a consequence of higher export volumes and freight costs. Operational income in the first half of 2004 grew by 31%.

#### EBITDA

EBITDA reached R\$1,180 million in the second quarter, a 61% increase compared to the R\$735 million registered in the same period of last year. Compared to 2Q03, EBITDA margin was stable at 46%, but it was 1.3 p.p. up first quarter margin. In 1H04, EBITDA was over R\$2 billion, with a 46% margin, representing a 32% increase.

### *Financial Results*

Financial results (which include financial revenues and expenses as well as results from net exchange and monetary variation, but exclude amortization of deferred exchange losses) totaled negative R\$443 million in the quarter, compared to negative R\$265 million in the same period of last year, due to a higher cost of net debt in the period as explained below. For the same reason, the financial result in 1H04 was a negative R\$619 million, compared to a negative R\$315 million for the same period in 2003.

**Deferred Exchange Losses:** Total amortization of deferred exchanges losses due to the real devaluation in 2001 was R\$26 million in 2Q04, compared to R\$34 million in 2Q03. The balance to be amortized in 2004 is R\$50 million.

#### *Net Income*

As a consequence, consolidated net income was R\$424 million in the 2Q04, 264% higher than the net income of R\$116 million registered in the same period of 2003, and 27% higher than 1Q04. In 1H04, net income reached R\$757 million, a R\$244 million increase over 1H03.

#### *Net Debt/EBITDA = 1.5 x*

At June 30, 2004, consolidated net debt totaled R\$5,998 million, R\$1,269 higher than net debt on March 31, 2004. This increase is related to greater working capital (especially given the strategic increase in raw material inventories, in the amount of R\$371 million, and higher accounts receivable in the amount of R\$383 million, especially for exports), the payment of R\$752 million in dividends and interest on equity and to the increase to 100% interest in GalvaSud, an approximate impact of R\$300 million. Current net debt/annualized EBITDA ratio is 1.5x, in line with the expectations announced in the 2003 earnings release.

We seek to hedge our exposure net of financial assets and liabilities, accounts receivable and payable denominated in foreign currency and investments in offshore affiliates (registered in the Equity Results line), as a result of which the amount of the

## Edgar Filing: NATIONAL STEEL CO - Form 6-K

exposure hedged by currency swaps is approximately US\$1 billion. As a result, financial results on a standalone basis are partially exposed to the foreign rate.

For the full year 2004 the net debt cost is expected to remain at 100% of CDI, as previously disclosed.

### Capex

At the first half of 2004, total capital expenditures were R\$521 million. The highlight, once more, was the capex related to CSN Paraná, besides projects related to maintaining the operating and technological excellence of the facilities and the remaining Galvasud's capital acquisition, which corresponded to R\$306 million.

### Recent Events

On July 27, 2004, CSN's Board of Directors approved the following corporate and financial events:

- a new Share Buyback Program, for a 90-day period, as of August 2, of up to 7,200,000 shares, pursuant to the limits and provisions set on CVM Instruction # 10/80.
- approval to issue debentures in the domestic market, in the amount of up to R\$750 million for a 5 year period, at an indicated rate between 103% and 108% of DI rate over extra group.

In June, CSN announced a number of corporate and financial events, as described below:

- Acquisition, through its 100% subsidiary CSN I S.A, of the 49% stake owned by ThyssenKrupp Stahl in GalvaSud S.A. for R\$89 million. In addition, as a part this transaction, debts in the amount of R\$425 million were paid in the same month.
- Approval to pay intermediate dividends of R\$35 million (R\$0.1228 per outstanding share) beginning on June 15.
- Issuance of US\$162 million in export receivables, with an 8-year maturity and interest rate of 7.427% p.a.
- Approval of an investment of approximately US\$43 million to build a plant aiming to processing slag and its by-product (cement), which shall use as principal raw material the slag produced in the Company's blast furnaces. Such investment aims to increase the level of use of its slag production and create better efficiency in the steel process. Such investment is still subject to the approval of an adequate financing structure.

### Outlook

Despite the higher share of the international markets in 2Q04, we reiterate our estimate of a maximum 35% export mix. Our consolidated annual sales volume should be slightly above 2003 volumes, as the decision to outsource hot-rolled coils was revised and the supply of most of CSN LLC's and Lusosider's slabs and hot rolled needs was kept, which did not happen during 2003. We will lose in volume but gain in consolidated margins.

We have not witnessed any fall in international prices and believe that, given the continued high levels of global demand and unfavorable conditions to the expansion of the supply, international prices will remain favourable at least until the end of this year. The current lag between domestic and international prices is around US\$50 for less value-added products like hot and cold-rolled.

In terms of costs for the second half, we maintain the expectations for the previously announced increase in coal costs and, until the end of 3Q04, the high coke prices. Export freight, which had increased over 50% in 2003, has fallen, and returned to early 2003 levels. For the year, we expect to slightly increase our consolidated EBITDA margin compared to the 45.5% margin of the first half.

Regarding cash flow, the increase in strategic inventories of coal and the increased focus in the international market during this last quarter, led to a greater requirement of working capital. We are working for this to return to normal levels during the second half. Another factor that we do not expect again in 2004 is the intermediate distribution of dividends and interest on equity. Therefore, CSN's net debt should return, until the end of the year, to levels closer to a Net Debt/EBITDA ratio of 1x.

*2Q04 Earnings Result Conference Call*

CSN will host conference call to discuss second quarter of 2004 results on July 30, 2004, as follows:

Conference Call in English  
July 30, 2004, 1 pm ET USA / 2 pm Brasilia Time  
International: (1-973) 582-2734  
Conference Call ID: CSN or 5009721

Companhia Siderúrgica Nacional, located in the State of Rio de Janeiro, Brazil, is a steel complex formed by investments in infrastructure and logistics, that combines, in its operation, captive mines, an integrated steel mill, service centers, ports and railways. With a total annual production capacity of 5.8 million tons of crude steel and consolidated gross revenues of R\$ 8.3 billion reported in 2003, CSN is also the only tin-plate producer in Brazil and one of the five largest tin-plate producers worldwide.

*Certain of the statements contained herein are forward-looking statements, which express or imply results, performance or events that are expected in the future. They include future results that may be implied by historical results, the statements under Message from CEO and Outlook, the expected nominal cost of gross debt compared to CDI and the expected ratio at 2004 year-end of net indebtedness to EBITDA. Actual results, performances or events may differ materially from those expressed or implied by the forward-looking statements, as a result of several factors, such as general and economic conditions in Brazil and other countries, interest rate and exchange rate levels, protectionist measures in the US, Brazil and other countries, changes in laws and regulations and general competitive factors (on a global, regional or national basis).*

**FORWARD-LOOKING STATEMENTS**

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
