1****Foreign exchange exposure**

The net foreign exchange exposure of the consolidated balance sheet was US\$2,539 million as of March 31, 2018, as shown in the table below. It should be noted that within the net foreign exchange exposure, a liability of US\$1.0 billion is included in line item “Borrowings and financing” related to the perpetual bond, which, due to its nature, will not require disbursement for settlement of the principal amount in the foreseeable future.

The hedge accounting adopted by CSN correlates the projected export inflow in US dollars with part of the scheduled debt payments in the same currency. As a result, the exchange rate changes in the US dollar-denominated debt is temporarily recorded in equity and subsequently recorded in profit or loss when revenues in US dollars from exports occur.

The Group's main operating activities are divided into five (5) segments as follows:

- **Steel:**

The Company's main industrial facility is the Presidente Vargas steelworks ("UPV"), located in the city of Volta Redonda, State of Rio de Janeiro. This segment consolidates all operations related to the production, distribution and sale of flat steel, long steel, metallic containers and galvanized steel. In addition to the facilities in Brazil, CSN has operations in the United States, Portugal and Germany aimed at gaining markets and providing excellent services to end consumers. Its steel is used in home appliances, civil construction and automobile industries.

- **Mining:**

The production of iron ore is developed in the city of Congonhas, State of Minas Gerais.

Iron ore is sold basically in the international market, especially in Europe and Asia. The prices charged in these markets are historically cyclical and subject to significant fluctuations over short periods of time, driven by several factors related to global demand, strategies adopted by the major steel producers, and the foreign exchange rate. All these factors are beyond the Company's control. The ore transportation is carried out through Terminal de Carvão e Minérios do Porto de Itaguaí – ("TECAR"), a solid bulk terminal, one of the four terminals that comprise the Itaguaí Port, in the state of Rio de Janeiro. Imports of coal and coke are also carried out through this terminal by providing services to CSN's steel segment.

The Company's mining activities also comprise exploitation of tin in the State of Rondônia, to supply the needs of the UPV. The surplus of these raw materials is sold to subsidiaries and third parties.

- **Cement:**

CSN entered the cement market boosted by the synergy between this activity and its existing businesses. Next to the Presidente Vargas Steelworks (UPV) in Volta Redonda (RJ), the Company installed a new business unit that produces CP-III type cement using slag produced by the UPV's blast furnaces. It also exploits limestone and dolomite at the Arcos unit in the State of Minas Gerais, to meet the needs of the UPV and of the cement plant.

In the fourth quarter of 2016, the Company started the operation of its second clinker production line in Arcos/MG. As a result, the Company is self-sufficient in the production of cement, with an installed capacity of 4.7 million tons per year.

- **Logistics**

Railroads:

CSN has interests in three railroad companies: MRS Logística S.A., which manages the Southeast Railway System of the former Rede Ferroviária Federal S.A. ("RFFSA"), Transnordestina Logística S.A. ("TLSA") and FTL - Ferrovia Transnordestina Logística S.A. ("FTL"), which has the concession to operate the former Northeast Railway System of RFFSA, in the States of Maranhão, Piauí, Ceará, Rio Grande do Norte, Paraíba, Pernambuco and Alagoas, with TLSA being responsible for the rail links of Missão Velha-Salgueiro, Salgueiro-Trindade, Trindade-Eliseu Martins, Salgueiro-Porto de Suape and Missão Velha-Porto de Pecém (Railway System II), still under construction and FTL being responsible for the rail links of São Luiz-Mucuripe, Arrojado-Recife, Itabaiana-Cabedelo, Paula Cavalcante-Macau and Propriá-Jorge Lins (Railway System I).

Ports:

The Company operates in the State of Rio de Janeiro, through its subsidiary Sepetiba Tecon S.A., the Container Terminal (“TECON”) and through its subsidiary CSN Mineração S.A.(“CSN Mineração”), TECAR, both at the Itaguaí Port. Located in the Bay of Sepetiba, they have privileged highway, railroad and maritime access.

At TECON, shipment of CSN’s steel products, movement of containers, storage, consolidation and deconsolidation of cargo are carried out and, at TECAR, the shipment of iron ore to overseas market and the unloading of coal and other products, such as petroleum coke, sulfur and zinc concentrate for our own use and for several customers.

- **Energy:**

As energy is fundamental to its production process, the Company has electric energy generation assets to guarantee its self-sufficiency.

3. ADOPTION OF NEW ACCOUNTING PRACTICES

The Company applied as of January 1, 2018, the IFRS 09 Financial Instruments (corresponding to CPC 48) and IFRS 15 Revenues from Contracts with Customers (corresponding to CPC 47), both of which were approved by CVM in November 2016 as well as interpretation IFRIC 22, corresponding to ICPC 21, approved in July 2017. IFRS 09 and 15 replaced IAS 39 Financial Instruments: Recognition and Measurement and IAS 18 Revenue and related interpretations, respectively.

The Company decided to adopt the modified transition model for the implementation of the new standards, where any transitional adjustment is recognized in retained earnings on January 1, 2018, without comparative adjustment

• **IFRS 9 / CPC 48 Financial instruments**

The new pronouncement includes new rules on the classification and measurement of financial assets, as well as impairment and new practices for hedge accounting, which are simplified below:

Classification and measurement - IFRS 9 establishes that financial assets should be classified and measured in one of three categories: amortized cost, fair value through other comprehensive income (VJORA) and fair value through profit or loss (VJR). The categories of held-to-maturity loans and receivables available for sale that were part of the scope of IAS 39 were withdrawn

Impairment - the "incurred losses" model is replaced by an "estimated credit loss" model, where it is no longer necessary for a loss event to occur before recognition of the impairment loss. The model uses a two-pronged approach, in which the provision will be measured for expected credit losses for 12 months or for the entire life of the asset. These changes did not bring impacts to the Company.

Hedge Accounting - a new general hedge accounting model was included, which does not change, but fundamentally the types of hedge relationship or requirements for measurement and recognition of ineffectiveness. These changes did not bring impacts to the Company.

The main effect of the adoption of IFRS 09 is shown in note 13.II, referring to the classification and measurement of the investment in Usinas Siderúrgicas de Minas Gerais SA - Usiminas and Panatlântica SA at fair value through profit or loss (VJR) and obtained a gain of R \$ 1.9 billion (gross) as of March 31, 2018 recorded in other operating income and expenses (Note 23).

• **IFRS 15 / CPC 47 Revenue from contract with customer**

Revenue from contracts with customers - IFRS 15 establishes a new concept for revenue recognition, replacing IAS 18 Revenue, IAS 11 - Construction Contracts and related interpretations. The Company adopted IFRS 15 using the modified retrospective method, which does not require the restatement of comparative information

CONVENIENCE TRANSLATION INTO ENGLISH FROM THE ORIGINAL PREVIOUSLY ISSUED IN PORTUGUESE

Quarterly Financial Information – March 31, 2018 – CIA SIDERURGICA NACIONAL

**Version:

The new pronouncement establishes a five-step model for determining the recognition of revenue from customer contracts, as follows:

- Identification of the contract: identify when there is an agreement and the parties involved.

- Identify the performance obligations: from the defined contract, analyze the contractual promises, in order to identify which promised items can be considered as performance obligations.

- Determine the price of the obligation: The transaction price is the value of the consideration that the entity expects to receive by transferring the control of the promised goods and services, the value of the transaction can include fixed values, variable values or both.

- Transaction Price Allocation: At the time of signing the contract, the transaction price must be allocated to each performance obligation.

- Recognize Revenue: Revenue recognition occurs at the time (or to the extent that) meets a performance obligation by transferring control of a good or service to a customer.

Analyzing the topic "identification of performance obligations", the Company identified in its operations the following performance obligations

- Sale of finished products: the transfer of risks and benefits coincides with the transfer of control of the products, thus, the moment of recognition of revenue from product sales was not impacted by the adoption of this new standard.

- Provision of service: in the main services provided by the company the revenue recognition coincides with the conclusion of the service, therefore without impacts by the adoption of this standard.

- Freight / insurance liability in CFR / CIF incoterms: the freight service in the CFR and CIF modalities will be considered a separate service and therefore a separate performance obligation, with allocation of part of the price of the transaction recognized in profit or loss, according to the effective provision of the service over time.

The effect of the difference in the recognition of the portion of revenue allocated to freight does not significantly affect the Company's income. Therefore, such revenue will not be presented separately in the Company's financial statements.

In the other topics of the new standard, the Company did not identify material measurement impacts in the application of this standard

• IFRIC 22 / ICPC 21 Foreign currency transaction and advance consideration

Required to apply in January 2018, IFRIC 22, which corresponds to ICPC 21, came to regulate the concepts established in CPC 02 - Effects of Changes in Foreign Exchange Rates and Conversion of Financial Statements, on how to determine the transaction date with the purpose of determining the exchange rate to be used in the initial recognition of an asset, expense or revenue (or part thereof) in the derecognition of non-monetary assets or non-monetary liabilities arising from the payment or early receipt in foreign currency.

Generally speaking, the interpretation deals with transactions in foreign currency in which the Company recognizes a non-monetary asset or non-monetary liability resulting from payment or early receipt, before the company recognizes the related asset, expense or revenue.

The consensus of this interpretation clarifies that the transaction date for determining the exchange rate to be used in the case of advances is defined as the date that the entity initially recognizes the non-monetary asset or non-monetary liability arising from the payment or early receipt. In the case of multiple payments or receipts in advance, the company shall determine the transaction date as each payment or anticipated receipt.

CONVENIENCE TRANSLATION INTO ENGLISH FROM THE ORIGINAL PREVIOUSLY ISSUED IN PORTUGUESE

**Version:

As the Company already adopts the practices established by CPC 02, establishing the historical rate at the time of recognition of non-monetary assets and liabilities related to the anticipation, there is no impact resulting from the application of this technical interpretation.

- TRANSNORDESTINA LOGÍSTICA S.A. (“TLSA”)

It is in pre-operational phase and will continue as such until the completion of Railway System II. The approved schedule, which estimated the completion of the work by January 2017, is currently under review and discussion with the responsible agencies; however, Management believes that new deadlines for project completion will not have material adverse effects on the expected return on the investment. After analyzing this matter, Management considered as appropriate the use of the accounting basis of operational continuity (going concern) of the project in the preparation of its financial statements.

The assumptions used to evaluate the impairment test in December 2017 remain valid and there is no trigger to justify records of impairment in the first quarter.

13. FINANCIAL INSTRUMENTS

I - Identification and measurement of financial instruments

The Company enters into transactions involving various financial instruments, mainly cash and cash equivalents, including short-term investments, marketable securities, trade receivables, trade payables, and borrowings and financing. The Company also enters into derivative transactions, especially interest rate and foreign exchange rate swaps.

Considering the nature of the instruments, the fair value is basically determined by the use of quotations in the open capital market of Brazil and the Commodities and Futures Exchange. The amounts recorded in current assets and liabilities have immediate liquidity or maturity, mostly in terms of less than three months. Considering the term and the characteristics of these instruments, the book values approximate the fair values.

II – Investments in securities measured at fair value through profit or loss

During the application of IAS 39/CPC 38 until December 2017, the Company has investments in equity instruments, measured at fair value through other comprehensive income, because the nature of the investment is not included in any other categories of financial instruments (loans and receivables, held-to-maturity investments or financial assets at fair value through profit or loss).

Gains and losses arising from the variation of the share price, were recorded directly in shareholders' equity under the account "Other comprehensive income" and for each significant decrease in market value an impairment loss was recognized in income.

With the implementation of the pronouncements IFRS 9 / CPC 48 as from January 1, 2018, the equity instruments classified as held-to-maturity should be classified as fair value through profit or loss (VJR). In this way, the Company reclassified the investments in common (USIM3) and preferred (USIM5) shares of Usiminas ("Usiminas Shares"), from fair value through other comprehensive income (VJORA) to fair value through profit or loss. In relation to Panatlântica shares (PATI3), currently classified as (VJORA), the Company based on its current business model, whose objective is to maintain this financial asset to obtain contractual cash flows, but adopts the option to reclassify it to VJR, recognizing changes in fair value in profit or loss.

Accordingly, the credit balance accumulated in December 2017 in other comprehensive income of R\$1,559,682 was reclassified to the statement of income from the effective date of the new standard. With the new classification, changes in fair value are recorded in the statement of income, totaling in the first

quarter of 2018 an adjustment gain at fair value of R\$ 376,707 and an adjustment gain at fair value accumulated of R\$ 1,936,389. (See opening below and note 23).

As of March 31, 2018, the Company's interest in USIMINAS comprised 15.19% in common shares and 20.29% in preferred shares. As of December 31, 2017, the Company's interest in USIMINAS comprised 15.19% in common shares and 20.86% in preferred shares.

In February 2018, 3,136,100 preferred shares (USIM5) were sold, totaling R \$ 39,377 through the exclusive fund "VR1 - Multimarket Private Investment Fund".

- Share market price risks

The Company is exposed to the risk of changes in the price of the shares due to the investments, valued at fair value through profit or loss and other comprehensive income that have their prices based on the market price on the stock exchange (B3).

III - Financial risk management:

The Company follows risk management strategies, with guidelines in relation to the risks incurred by the company. The nature and general position of financial risks is regularly monitored and managed to assess the results and the financial impact on cash flow. The credit limits and hedge quality of the counterparties are also periodically reviewed.

Market risks are protected when it is considered necessary to support the corporate strategy or when it is necessary to maintain the level of financial flexibility.

The Company may manage some of the risks through the use of derivative instruments, not associated with any speculative trading or short selling.

13.a) Foreign exchange rate and interest rate risks:

- **Foreign exchange rate risk:**

The exposure arises from the existence of assets and liabilities denominated in Dollar or Euro, since the Company's functional currency is substantially the Real and is denominated natural currency hedge. The net exposure is the result of offsetting the natural currency exposure by hedging instruments adopted by CSN.

The consolidated net exposure as of March 31, 2018 is as follows.

Foreign Exchange Exposure	(Amounts in US\$'000)	03/31/2018 (Amounts in €'000)
Cash and cash equivalents overseas	243,913	2,761

Perpetual bonds	1,000,000	
Net foreign exchange exposure excluding perpetual bonds	(1,539,008)	2,420

CSN is currently in process of redefining its currency hedge strategy. The Company began to focus its hedging strategy to preserve its cash flow capturing the existing natural relationships and the use of derivative instruments to hedge CSN's future cash flows.

- **Interest rate risk:**

The risk arises from short and long term liabilities with fixed or floating interest rates and inflation indices.

In item 13b) we show the derivatives and hedging strategies to hedge foreign exchange and interest rate risks.

- ***Cash flow hedge accounting***

Beginning November 1, 2014, the Company formally designated cash flow hedging relationships to hedge highly probable future cash flows against US dollar fluctuations.

In order to better reflect the accounting impacts of this foreign exchange hedging strategy on the Company's results, CSN designated part of its US dollar-denominated liabilities as a hedging instrument of its future exports. As a result, foreign exchange differences arising from designated liabilities will be temporarily recognized in shareholders' equity and recognized in profit or loss when such exports are carried out, allowing the concurrent recognition of the dollar impact on liabilities and on exports. The adoption of this hedge accounting does not entail entering into any financial instrument. As of March 31, 2018, US\$1.3 billion in exports to be carried out between January 2018 until October 2022 are designated.

In order to support the aforementioned designations, the Company prepared formal documentation indicating how the hedge designation is aligned with CSN's objective and risk management strategy, identifying the hedging instruments used, the hedge object, the nature of the risk to be hedged and demonstrating the expectation of high effectiveness of the designated relations. Debt instruments have been designated in amounts equivalent to the portion of future exports. Therefore, the exchange variation of the instrument and the object are similar. According to the Company's accounting policy, continuous evaluations of prospective and retrospective effectiveness should be carried out, comparing the amounts designated with the amounts expected and approved in the Management's budgets, as well as the amounts actually exported.

Through hedge accounting, the exchange gains and losses on debt instruments will not immediately affect the Company's profit or loss except to the extent that exports are carried out.

The table below shows a summary of the hedging relationships as of March 31, 2018:

As of March 31, 2018, the hedging relationships established by the Company were effective, according to prospective tests conducted. Thus, no reversal for hedge accounting ineffectiveness was recognized.

- ***Hedge of net investment in foreign operation***

CSN has a natural currency exposure in Euros substantially arising from a borrowing taken by a foreign subsidiary with functional currency in Reais, for the acquisition of investments abroad where the functional currency is Euro. Such exposure arises from translating the balance sheets of these subsidiaries for consolidation into CSN, where the exchange difference on the borrowings affected the statement of income, in the financial income (expenses) line item, and the exchange difference on the net assets of the foreign operation directly affected the shareholders equity, in other comprehensive income.

As from September 1, 2015, CSN began to adopt the net investment hedge to eliminate such exposure and cover future fluctuations of the Euro on such borrowings. Non-derivative financial liabilities were designated, represented by borrowing agreements with financial institutions in the amount of € 120 million. The account balances as of March 31, 2018 are as follows:

Designation Date	Hedging Instrument	Hedged item	Type of hedged risk	Exchange rate on designation	Designated amounts (EUR'000)	03/31/2018		Impact on shareholders' equity

Financial assets and liabilities measured at fair value through profit or loss are recorded in current and noncurrent assets and liabilities and gains and losses are recorded as financial income and expenses, respectively.

The amounts are recorded in the financial statements at their carrying amount, which are substantially similar to those that would be obtained if they were traded in the market. The fair values of other long-term assets and liabilities do not differ significantly from their carrying amounts, except for the amounts below.

The estimated fair values for certain consolidated long-term borrowings and financing were calculated at prevailing market rates, taking into consideration the nature, terms and risks similar to those of the recorded contracts, according below:

In its corporate structure, the Company has foreign subsidiaries whose profits are subject to income tax in the countries where they were established at rates lower than those prevailing in Brazil. In the period from 2013 to 2018, these foreign subsidiaries generated profits amounting to R\$ 962,371. If the tax authorities understand that these profits are subject to additional taxation in Brazil in respect of income tax and social contribution, these, if due, would total approximately R\$ 314,793

The Company, based on its legal counsel's opinion, assessed as possible the likelihood of loss in the event of challenge by the tax authorities and, therefore, no provision was recognized in the financial statements.

Even though it is an indicator used in segment measurement, EBITDA is not a measurement recognized by accounting practices adopted in Brazil or IFRS, it does not have a standard definition, and may not be comparable with measurements using similar names provided by other companies.

As required by IFRS 8, the table below shows the reconciliation of the measurement used by the chief operating decision maker with the results determined using the accounting practices:

	03/31/2018	Consolidated 03/31/2017
Profit for the year	1,486,495	117,615

(*) The Company discloses its adjusted EBITDA net of its share of investments and other operating income (expenses) because it understands that these should not be considered in the calculation of recurring operating cash generation.

26. INSURANCE

Aiming to properly mitigate risk and in view of the nature of its operations, the Company and its subsidiaries have taken out several different types of insurance policies. Such policies are contracted in line with the Risk Management policy and are similar to the insurance taken out by other companies operating in the same lines of business as CSN and its subsidiaries. The risks covered under such policies include the following: Domestic Transportation, International Transportation, Life and Casualty, Health, Vehicles Fleet, D&O (Civil Liability Insurance for Directors and Officers), General Civil Liability, Engineering Risks, Named Peril, Export Credit, Surety Bond and Port Operator's Civil Liability.

In 2017, after negotiation with insurers and reinsurers in Brazil and abroad, an insurance policy was issued for the contracting of a policy of Operational Risk of Property Damages and Loss of Profits, with effect from September 30, 2017 to March 31, 2019. Under the insurance policy, the LMI (Maximum Limit of Indemnity) is US\$600 million and deductibles in the amount of R\$385 million for material damages and 45 days for loss of profits and covers the following Company's units and subsidiaries: Presidente Vargas Steelworks, CSN Mineração and Sepetiba Tecon.

In view of their nature, the risk assumptions adopted are not part of the scope of an audit of the financial statements and, accordingly, were not audited by our independent auditors.

29. INDEPENDENT INVESTIGATION – CONSTRUCTION OF THE LONG STEEL PLANT

Considering the information from a Company's officer published in the press in April 2017, based on testimonials made before the Court, the Audit Committee decided to hire a specialized forensic service to conduct an independent external investigation of the contractual relationship related to the construction of

CSN's Long Steel Plant (contract in which there would have been alleged undue payments, as bonus, as a form of reimbursement for payments made to political parties), and to analyze the extent of the business relationships between the contracting parties. The conclusion of the investigation is that nothing from the testimonials referred to above was confirmed, and there are no contingencies deriving from the matters investigated. Consequently, the Company understands that there is no basis to justify the setting up of a provision for losses or the disclosure of a contingency. In October 2017, complying with a determination of the Supreme Federal Court, the Federal Police started an investigation of the facts reported in those testimonials previously mentioned. Subsequently, in February 2018, the Second Panel of the Federal Supreme Court determined that the examination of the facts should occur within the scope of the Electoral Justice rather than the Common Federal Justice. At the moment, compliance with the STF decision is awaited for referral of the case to the Electoral Court.

COMMENTS ON THE PERFORMANCE OF BUSINESS PROJECTIONS

1) Projections

The Company clarifies that the information disclosed in this item represents a mere estimate, hypothetical data and cannot be interpreted as a promise of performance by the Company and/or its Management. The projections listed below include market variables that are not under the Company's control and, therefore, may change.

a) Purpose of Projection

CSN estimates a Net Revenue of R\$22.2 billion for 2018.

CSN estimates an adjusted annualized EBTIDA close to R\$5.6 billion for 2018.

CSN estimates a leverage measured by the ratio of net debt to adjusted EBITDA close to 3.5 times over a 12 to 15 months.

b) Period and validity term of the projection.

For the year 2018, is projected Net Revenue of R\$22.2 billion, an adjusted EBITDA close to R\$5.6 billion. In turn, the validity term of the presented projection ends with the results being disclosed for the fiscal year ended December 31, 2018, that will be available to the market within the period established by the local authority.

From 2018 to 2019, CSN estimates a leverage measured by the ratio of net debt to adjusted EBTIDA close to 3.5 times, that will be available to the market at the end of the first half of 2019.

c) Assumptions of the projection, indicating which can be influenced by the issuer's management and which are beyond its control.

All assumptions mentioned below are subject to the influence of external variables, which are beyond the control of the Company's management. Therefore, in case of relevant changes in these assumptions, the Company may revise its estimates mentioned below, modifying them in comparison with those originally presented.

Net Revenue

The assumptions used to project the estimated Net Revenue for 2018 is 20% above when compared to the previous year.

Adjusted EBITDA

The assumptions used to project the adjusted EBITDA 20% above in 2018, consider the best average prices for flat and long steel in the domestic and foreign markets, as well as the higher sales volume, highlighting the allocation of goods to the domestic market focusing on better operational margins. In relation to the mining, our estimate is that the price levels (Platts) of iron ore will remain the same in 2018 when compared to the previous year.

Leverage 15 months

The assumptions used for the leverage measured by the ratio of net debt to adjusted EBITDA close to 3.5 times over a 12 to 15 months, is based on an increase of the adjusted EBITDA in 2018 and 2019, resulting in a higher generation of free cash flow and lower net debt, leading to a substantial reduction of the indicator.

1.1 If the issuer has disclosed, in the last 3 fiscal years, projections over the progress of its indicators:

a) In the form, inform which were being replaced by new projections and which were being repeated.

New estimates:

CSN estimates a Net Revenue of R\$22.2 billion for 2018.

CSN estimates an adjusted annualized EBTIDA close to R\$5.6 billion for 2018. Estimates maintained:

CSN estimates a leverage measured by the ratio of net debt to adjusted EBITDA close to 3.5 times over a 12 to 15 months.

b) In relation to the projections for periods that have already occurred, compare the projection data with the performance indicators, clearly indicating the reasons that led to deviations in the projections.

In 2017, Net Revenue was 3% higher than the previous estimate, due to the better steel prices.

In 2017, the Adjusted EBITDA was 7% lower than the previous estimate, due to the fact that mining presented an adjusted EBITDA lower than expected in 4Q17.

In 2017, leverage was 13% higher than expected, due to the lower Adjusted EBITDA and exchange-rate appreciation that affected our dollar-debt position, resulting in an above average leverage ratio.

c) In relation to the projections for periods still in progress, inform if the projections remain valid on the date of delivery the form and, when applicable, explain why they were abandoned or replaced.

Estimates in progress:

CSN estimates a leverage measured by the ratio of net debt to adjusted EBITDA close to 3.5 times over a 12 to 15 months.

Independent auditor's report on review of the interim financial information

To the

Shareholders, Directors and Management of

Companhia Siderúrgica Nacional

São Paulo – SP

We have reviewed the accompanying individual and consolidated interim financial information of **Companhia Siderúrgica Nacional (“Company”)**, identified as Parent and Consolidated, respectively, included in the Interim Financial Information Form (ITR) for the quarter ended March 31, 2018, which comprises the balance sheet as at March 31, 2018 and the related income statement, statement of comprehensive income, statement of changes in equity and statement of cash flows for the three-month period then ended, and other explanatory notes.

Management is responsible for the preparation of the individual and consolidated interim financial information in accordance with Technical Pronouncement CPC 21 (R1) - Interim Financial Reporting and IAS 34 - Interim Financial Reporting, issued by the International Accounting Standards Board (IASB), as well as for the presentation of such information in accordance with the standards issued by the Brazilian Securities and Exchange Commission (CVM) applicable to the preparation of Interim Financial Information (ITR). Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of review

We conducted our review in accordance with Brazilian and international standards on review of interim financial information (NBC TR 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity and ISRE 2410 – Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with the standards on auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion on the individual and consolidated interim financial information

c) In relation to the projections for periods still in progress, inform if the projections remain valid on the ~~180~~ of deliv

Based on our review, nothing has come to our attention that causes us to believe that the accompanying individual and consolidated interim financial information included in the Interim Financial Information Form (ITR) referred to above is not prepared, in all material respects, in accordance with CPC 21 (R1) and IAS 34 applicable to the preparation of interim financial information and presented in accordance with the standards issued by the Brazilian Securities and Exchange Commission (CVM).

Emphasis of matter

Ability of the jointly-controlled subsidiary Transnordestina Logística S.A. to continue as a going concern

We draw attention to note 9.c) to the interim financial information, which describes the percentage of completion of the new railway network by the jointly-controlled subsidiary Transnordestina Logística S.A. (TLSA), currently under construction and originally scheduled to be completed by January 2017, is currently being revised and discussed by the relevant regulatory bodies. The completion of the work under the project (and consequent start of operations) is contingent upon receiving ongoing financial contribution from TLSA's shareholders and third parties. These events and conditions, together with other issues described in note 8.c) to the financial statements, indicate the existence of significant uncertainty that may raise significant doubt as to TLSA's ability to continue as a going concern. Our conclusion is not qualified regarding this matter.

Other matters

Interim statements of value added

We have also reviewed the individual and consolidated statements of value added (DVA) for the three-month period ended March 31, 2018, prepared under the responsibility of the Company's management, the presentation of which is required by the standards issued by the Brazilian Securities and Exchange Commission (CVM) applicable to the preparation of interim financial information and considered supplemental information by IFRS, which does not require the presentation of a DVA. This interim financial information was subject to the same review procedures described above and, based on our review, nothing has come to our attention that causes us to believe that it was not fairly presented, in all material respects, in relation to the individual and consolidated interim financial information taken as a whole.
