**Item 8.01 Other Events.**

On July 14, 2015 Cytokinetics, Inc. announced the start of VITALITY-ALS (Ventilatory Investigation of Tirasemtiv and Assessment of Longitudinal Indices after Treatment for a Year in ALS), a Phase 3 clinical trial designed to assess the effects of tirasemtiv versus placebo on slow vital capacity (SVC) and other measures of respiratory function in patients with ALS.

In addition, Cytokinetics, Inc. and The ALS Association today announced that The Association has awarded Cytokinetics a \$1.5 million grant to support the collection of clinical data and plasma samples to advance the discovery of biomarkers in ALS (amyotrophic lateral sclerosis) in VITALITY-ALS. For the first time, this unique collaboration between Cytokinetics, The ALS Association, and the Barrow Neurological Institute will enable plasma samples collected from patients enrolled in a Phase 3 clinical trial to be added to The Northeastern ALS Consortium (NEALS) Repository, a resource for the academic research community to identify biomarkers that may help to assess disease progression and underlying disease mechanisms in ALS. The Association will provide the grant funding to Cytokinetics, Inc. over the term of the clinical trial which is estimated to be approximately two years.

A copy of the press releases are filed as Exhibit 99.1 and 99.2 to this Current Report on Form 8-K, and is incorporated herein by reference.

**Item 9.01 Financial Statements and Exhibits.**
