Basis of presentation

References in this annual report on Form 20-F to pages and sections of the 2017 Registration Document are references only to those pages and sections of TOTAL's Registration Document for the year ended December 31, 2017 attached in Exhibit 15.1 to this Form 20-F. Other than as expressly provided herein, the 2017 Registration Document is not incorporated herein by reference.

TOTAL's Consolidated Financial Statements, which start on page 233 of the 2017 Registration Document and are incorporated herein by reference, are prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and IFRS as adopted by the European Union (EU) as of December 31, 2017.

In addition, this annual report on Form 20-F and the 2017 Registration Document contain certain measures that are not defined by generally accepted accounting principles (GAAP) such as IFRS. Our management uses these financial measures, along with the most directly comparable GAAP financial measures, in evaluating our operating performance. We believe that presentation of this information, along with comparable GAAP measures, is useful to investors because it allows investors to understand the primary method used by management to evaluate performance on a meaningful basis. Non-GAAP financial measures should not be considered in isolation from, or as a substitute for, financial information presented in compliance with GAAP. Non-GAAP financial measures as reported by us may not be comparable with similarly titled amounts reported by other companies.

Statements regarding competitive position

Unless otherwise indicated, statements made in "Item 4. Information on the company" referring to TOTAL's competitive position are based on the Company's estimates, and in some cases rely on a range of sources, including investment analysts' reports, independent market studies and TOTAL's internal assessments of market share based on publicly available information about the financial results and performance of market participants.

Additional information

This annual report on Form 20-F reports information primarily regarding TOTAL's business, operations and financial information relating to the fiscal year ended December 31, 2017. For more recent updates regarding TOTAL, you may inspect any reports, statements or other information TOTAL files with the United States Securities and Exchange Commission ("SEC"). All of TOTAL's SEC filings made after December 31, 2001, are available to the public at the SEC website at <http://www.sec.gov> and from certain commercial document retrieval services. See also "Item 10. – 10.8 Documents on display".

No material on the TOTAL website forms any part of this annual report on Form 20-F. References in this document to documents on the TOTAL website are included as an aid to their location and are not incorporated by reference into this document.

Certain terms, abbreviations and conversion table

For the meanings of certain terms used in this document, as well as certain abbreviations and a conversion table, refer to the "Glossary" starting on page 405 of the 2017 Registration Document, which is incorporated herein by reference.

Cautionary statement concerning forward-looking statements

TOTAL has made certain forward-looking statements in this document and in the documents referred to in, or incorporated by reference into, this annual report. Such statements are subject to risks and uncertainties. These statements are based on the beliefs and assumptions of the management of TOTAL and on the information currently available to such management. Forward-looking statements include information concerning forecasts, projections, anticipated synergies, and other information concerning possible or assumed future results of TOTAL, and may be preceded by, followed by, or otherwise include the words “believes”, “expects”, “anticipates”, “intends”, “plans”, “targets”, “estimates” or similar expressions.

Forward-looking statements are not assurances of results or values. They involve risks, uncertainties and assumptions. TOTAL’s future results and share value may differ materially from those expressed in these forward-looking statements. Many of the factors that will determine these results and values are beyond TOTAL’s ability to control or predict. Except for its ongoing obligations to disclose material information as required by applicable securities laws, TOTAL does not have any intention or obligation to update forward-looking statements after the distribution of this document, even if new information, future events or other circumstances have made them incorrect or misleading.

Various factors, certain of which are discussed elsewhere in this document and in the documents referred to in, or incorporated by reference into, this document, could affect the future results of TOTAL and could cause actual results to differ materially from those expressed in such forward-looking statements, including:

- ▬ material adverse changes in general economic conditions or in the markets served by TOTAL, including changes in the prices of oil, natural gas, refined products, petrochemical products and other chemicals;
- ▬ changes in currency exchange rates and currency devaluations;
- ▬ the success and the economic efficiency of oil and natural gas exploration, development and production programs, including, without limitation, those that are not controlled and/or operated by TOTAL;
- ▬ uncertainties about estimates of changes in proven and potential reserves and the capabilities of production facilities;
- ▬ uncertainties about the ability to control unit costs in exploration, production, refining and marketing (including refining margins) and chemicals;
- ▬ changes in the current capital expenditure plans of TOTAL;
- ▬ the ability of TOTAL to realize anticipated cost savings, synergies and operating efficiencies;
- ▬ the financial resources of competitors;
- ▬ changes in laws and regulations, including tax and environmental laws and industrial safety regulations;

[Back to Contents](#)

- ↯
the quality of future opportunities that may be presented to or pursued by TOTAL;
- ↯
the ability to generate cash flow or obtain financing to fund growth and the cost of such financing and liquidity conditions in the capital markets generally;
- ↯
the ability to obtain governmental or regulatory approvals;
- ↯
the ability to respond to challenges in international markets, including political or economic conditions (including national and international armed conflict) and trade and regulatory matters (including actual or proposed sanctions on companies that conduct business in certain countries);
- ↯
the ability to complete and integrate appropriate acquisitions, strategic alliances and joint ventures;
- ↯
changes in the political environment that adversely affect exploration, production licenses and contractual rights or impose minimum drilling obligations, price controls, nationalization or expropriation, and regulation of refining and marketing, chemicals and power generating activities;
- ↯
the possibility that other unpredictable events such as labor disputes or industrial accidents will adversely affect the business of TOTAL; and
- ↯
the risk that TOTAL will inadequately hedge the price of crude oil or finished products.

ITEM 2. OFFER STATISTICS AND EXPECTED TIMETABLE

Not applicable.

ITEM 3. KEY INFORMATION

3.1

Selected financial data

The following table presents selected consolidated financial data for TOTAL on the basis of IFRS as issued by the IASB and IFRS as adopted by the EU for the years ended December 31, 2017, 2016, 2015, 2014 and 2013. Effective January 1, 2014, TOTAL changed the presentation currency of the Group's Consolidated Financial Statements from the Euro to the US Dollar. Comparative 2013 information in the table below has been restated. Following the retrospective application of the accounting interpretation IFRIC 21 effective January 1, 2014, the information for 2013 has been restated; however, the impact on such restated results is not significant. ERNST & YOUNG Audit and KPMG Audit, a division of KPMG S.A., independent registered public accounting firms and the Company's auditors, audited the historical Consolidated Financial Statements of TOTAL for these periods from which the financial data presented below for such periods are derived. All such data should be read in conjunction with the Consolidated Financial Statements and the Notes thereto starting on [page 233](#) of the 2017 Registration Document, which are incorporated herein by reference.

Risk factors

The Group and its businesses are subject to various risks relating to changing competitive, economic, political, legal, social, industry, business and financial conditions, including changes in such conditions. Point 3.1 (“Risk factors”) of chapter 3 of the 2017 Registration Document (starting on [page 74](#)) is incorporated herein by reference.

For additional information on these conditions, along with TOTAL’s approaches to managing certain of these risks, please refer to [“Item 5. Operating and financial review and prospects”](#) and [“Item 11. Quantitative and qualitative disclosures about market risk”](#), as well as points 3.3 (“Internal control and risk management procedures”) and 3.5 (“Vigilance Plan”) of chapter 3 (starting on [pages 88 and 96](#), respectively) of the 2017 Registration Document, which are incorporated herein by reference.

ITEM 4. INFORMATION ON THE COMPANY

History and development

Business overview

Other matters

The following information providing an integrated overview of the Group from the 2017 Registration Document is incorporated herein by reference:

- presentation of the Group and its governance (point 1.1 of chapter 1, starting on [page 4](#));
- the Group’s collective ambition and strategy (point 1.2 of chapter 1, on [page 9](#));
- history, employees, integrated business model and geographic presence (point 1.3 of chapter 1, starting on [page 10](#));
- an overview of the Group’s R&D, investment policy and sustainable development initiatives (point 1.5 of chapter 1, on [page 23](#)); and
- organizational structure (point 1.6 of chapter 1, starting on [page 26](#)).

The following information providing an overview of the Group’s businesses and activities from the 2017 Registration Document is incorporated herein by reference:

- business overview for fiscal year 2017 (points 2.1 to 2.4 of chapter 2, starting on [page 30](#));
- information concerning the Group’s principal capital expenditures and divestitures (point 2.5 of chapter 2, starting on [page 68](#)). See also [“Item 5. Operating and financial review and prospects”](#); and

↯
geographical breakdown of the Group's sales, property, plants and equipment, intangible assets and capital expenditures over the past three years (Note 4 to the Consolidated Financial Statements, on [page 259](#)).

The following other information from the 2017 Registration Document is incorporated herein by reference:

↯
insurance policy (point 3.4 of chapter 3, starting on [page 95](#));

↯
social, environmental and societal information (introduction and points 5.1.3 to 5.4 of chapter 5, starting on [page 170](#));
and

↯
investor relations (point 6.6 of chapter 6, starting on [page 223](#)).

ITEM 4A. UNRESOLVED STAFF COMMENTS

None.

ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS

This section is the Company's analysis of its financial performance and of significant trends that may affect its future performance. It should be read in conjunction with the Consolidated Financial Statements and the Notes thereto in the 2017 Registration Document (starting on [page 233](#)), which are incorporated herein by reference. The Consolidated Financial Statements and the Notes thereto are prepared in accordance with IFRS as issued by the IASB and IFRS as adopted by the EU.

This section contains forward-looking statements that are subject to risks and uncertainties. For a list of important factors that could cause actual results to differ materially from those expressed in the forward-looking statements, see "Cautionary Statement Concerning Forward-Looking Statements" starting on [page i](#).

For an overview of TOTAL's critical accounting policies, including policies involving management's judgment and estimates, refer to the Introduction to the Notes to the Consolidated Financial Statements in the 2017 Registration Document (starting on [page 244](#)), which is incorporated herein by reference.

5.1

Overview

TOTAL's results are affected by a variety of factors, including changes in crude oil and natural gas prices as well as refining and marketing margins, which are all generally expressed in dollars, and changes in exchange rates, particularly the value of the euro compared to the dollar. Higher crude oil and natural gas prices generally have a positive effect on the income of TOTAL, since the Exploration & Production segment's oil and gas business and Gas, Renewables & Power segment's downstream gas business are positively impacted by the resulting increase in revenues. Lower crude oil and natural gas prices generally have a corresponding negative effect. The effect of changes in crude oil prices on the activities of TOTAL's Refining & Chemicals and Marketing & Services segments depends upon the speed at which the prices of refined petroleum products adjust to reflect such changes. TOTAL's results are also significantly affected by the costs of its activities, in particular those related to exploration and production, and by the outcome of its strategic decisions with respect to cost reduction efforts. In addition, TOTAL's

[Back to Contents](#)

results are affected by general economic and political conditions and changes in governmental laws and regulations, as well as by the impact of decisions by OPEC on production levels. For more information, refer to [“Item 3. – 3.2 Risk factors”](#).

The Brent price rose to \$54/b on average in 2017 from \$44/b in 2016 while remaining volatile. The Group demonstrated its ability to capture the benefit of higher prices and reported a return on equity above 10%, the highest among the majors. The Exploration & Production segment, in particular, increased its adjusted net operating income by approximately 86% and its operating cash flow before working capital changes at replacement cost⁽¹⁾ by 38% whereas oil prices only increased by 24%.

TOTAL’s net income (Group share) in 2017 increased by 39% to \$8,631 million from \$6,196 million in 2016, mainly due to higher hydrocarbon prices and growth of the Group’s production. Adjustments to net income (Group share), which include special items and the after-tax inventory valuation effect, had a negative impact of \$1,947 million in 2017. Excluding these items, adjusted net income increased by 28% (compared to a 24% increase in Brent) to \$10,578 million in 2017 compared to \$8,287 million in 2016, due to a much higher contribution from Exploration & Production and the continued decrease in the Group’s breakeven. For additional information, refer to [“– 5.2 Group results 2015-2017”](#) and [“– 5.3 Business segment reporting”](#) Operating cash flow excluding the change in working, below.

Financial discipline was successfully maintained. Organic investments were \$14.4 billion (excluding acquisitions), in line with the Group’s target of \$13-15 billion, and cost savings reached \$3.7 billion in 2017, more than the target of \$3.5 billion. Production costs⁽²⁾ fell to \$5.4/boe in 2017 from \$9.9/boe in 2014.

These strong results were driven by production growth (5% in 2017), notably the start-up of the Moho-Nord in the Republic of the Congo, the ramp-up of Kashagan in Kazakhstan and the entry into Al Shaheen in Qatar. The Downstream⁽³⁾ confirmed again this year its ability to generate about \$7 billion of operating cash flow before working capital changes at replacement cost and reported a return on capital employed of more than 30%.

In 2017, the Group took advantage of the cyclical low to launch five Upstream projects, including the first phase of the Libra development in Brazil, as well as launching petrochemical projects in the United States and South Korea. In the Exploration & Production segment, the Group is preparing for future growth with the acquisition of Mærsk Oil, strengthening its position in the North Sea, and finalized its entry into the Lapa and lara fields in Brazil in early 2018. In the U.S. Gulf of Mexico, the Group participated in a major discovery at the Ballymore prospect. In the framework of reinforcing its integrated gas strategy, it announced the acquisition of the LNG business of Engie to take full advantage of the fast-growing LNG market. Marketing & Services continues to grow, notably by expanding its retail network into Mexico.

The strategy implemented since 2015 has enabled the Group to reduce its pre-dividend organic breakeven⁽⁴⁾ to \$27/b in 2017 and generate \$22 billion of debt-adjusted cash flow (“DACF⁽⁵⁾”). The Group also continued to strengthen its balance sheet, ending the year with a 13.8% gearing⁽⁶⁾, a significant decrease compared to 2016.

Outlook

Since the end of 2017, Brent has been trading between \$60/b and \$70/b, supported by strong demand (+1.6 Mb/d in 2017), extended production cuts by OPEC and Russia and a decrease in crude oil inventories, which nevertheless remain higher than the past five-year average, which could contribute to continuing price volatility. The Group maintains its strategy to cut costs with the objective of achieving over \$4 billion of cost savings in 2018 and production costs of \$5.5/boe. Organic investments are targeted at around \$14 billion in 2018.

The Exploration & Production segment's production is expected to increase by 6% in 2018, confirming the objective to grow by 5% per year on average between 2016 and 2022. As a result of this expected growth and the portfolio mix, the Group's cash flow sensitivity to a \$10/b change in the price of Brent increases to \$2.8 billion in 2018 from \$2.5 billion in 2017. The Group intends to take advantage of the favorable cost environment by continuing to launch projects in 2018. The growing demand for LNG supports the Group's strategy to develop along the integrated gas value chain, as illustrated by the announced acquisition of Engie's LNG portfolio.

In the context of sharply higher oil prices, rising refined product inventories, due to high global refining utilization rates, and seasonally weak winter demand, refining margins have decreased since December 2017. Despite the current weakness in refining margins, the Downstream is expected to generate \$7 billion of operating cash flow before working capital changes at replacement cost once again in 2018. Refining & Chemicals continues to expand its high-return integrated platforms notably in the United States and in Asia-Middle East. Marketing & Services continues to pursue its growth strategy in high-potential markets.

The Group's pre-dividend organic breakeven is continuing to fall, with an objective of \$25/b in 2018.

(1)

Operating cash flow excluding the change in working capital at replacement cost provides information on underlying cash flow without the short-term impacts of changes in inventory and other working capital elements at replacement cost. For information on the replacement cost method, refer to "— 5.3 Business segment reporting" and Note 3 to the Consolidated Financial Statements in the 2017 Registration Document (starting on page 247), which is incorporated herein by reference.

(2)

"Production costs" = costs related to the production of hydrocarbons in accordance with FASB ASC 932-360-25-15.

(3)

Refining & Chemicals and Marketing & Services segments.

(4)

Barrel price permitting the generation of cash flow that is equal to organic investments.

(5)

DACF = operating cash flow excluding both the change in working capital at replacement cost and financial charges. It provides a measure of cash flow generated by the Group's activities regardless of its financial structure.

(6)

"Gearing" refers to the net-debt-to-equity ratio. "Net-debt-to-equity ratio" = (net debt)/(adjusted shareholders' equity). For additional information, refer to Note 15.1(E) to the Consolidated Financial Statements in the 2017 Registration Document (on page 307), which is incorporated herein by reference.

[Back to Contents](#)

After a period of heavy investment, the Group's cash flow generation is growing strongly, driven by an increase in production that is at the best level among the majors. The Group has taken advantage of the low part of the oil price cycle to acquire high-quality resources at attractive prices and emerge stronger with better visibility on its cash flow generation and a net-debt-to-equity ratio below 20%⁽¹⁾. In this context, the Board of Directors is proposing a shareholder return policy for the coming three years comprised of dividend increases and share buybacks (for additional information concerning the Group's dividends and dividend policy, refer to point 6.2 of chapter 6 (starting on [page 213](#)) of the 2017 Registration Document, which is incorporated herein by reference).

5.2

Group results 2015-2017

As of and for the year ended December 31,

	2017	2016	2015
<i>(M\$, except per share data)</i>			
Non-Group sales	171,493	149,743	165,357

Cash flow from operating activities	22,319	16,521	19,946
–			
Includes (increase)/decrease in working capital ^(g)	827	(1,119)	1,683

(a)

Adjusted results are defined as income using replacement cost, adjusted for special items, excluding the impact of changes for fair value. See “– [5.3 Business segment reporting](#)” below for further details.

(b)

Following the Group's reorganization fully effective as of January 1, 2017, the new Gas, Renewables & Power segment reflects the Group's ambition in low-carbon energies. It encompasses downstream Gas activities previously integrated in the Upstream (now Exploration & Production) segment, New Energies activities (excluding biotechnologies) previously integrated in the Marketing & Services segment and a new Innovation & Energy Efficiency division. In this Item 5, certain financial information for the Exploration & Production, Refining & Chemicals (which includes a new Biofuels division) and Marketing & Services segments have been restated accordingly.

(c)

“Gross investments” include acquisitions and increases in non-current loans. For additional information on investments, refer to point 2.5 of chapter 2 of the 2017 Registration Document (starting on [page 68](#)), which is incorporated herein by reference.

(d)

“Net investments” = gross investments – divestments – repayment of non-current loans – other operations with non-controlling interests. For additional information on investments, refer to point 2.5 of chapter 2 of the 2017 Registration Document (starting on [page 68](#)), which is incorporated herein by reference.

(e)

“Organic investments” = net investments excluding acquisitions, asset sales and other operations with non-controlling interests. For additional information on investments, refer to point 2.5 of chapter 2 of the 2017 Registration Document (starting on [page 68](#)), which is incorporated herein by reference.

(f)

“Resource acquisitions” = acquisition of a participating interest in an oil and gas mining property by way of an assignment of rights and obligations in the corresponding permit or license and related contracts, with a view to producing the recoverable oil and gas.

(g)

The change in working capital as determined using the replacement cost method was \$1,184 million in 2017, \$(467) million in 2016 and \$570 million in 2015. For information on the replacement cost method, refer to Note 3 to the Consolidated Financial Statements in the 2017 Registration Document (starting on [page 247](#)), which is incorporated herein by reference.

2017 vs. 2016

The Brent price rose to \$54/b on average in 2017 from \$44/b in 2016 while remaining volatile. In 2017, TOTAL’s average liquids price realization⁽²⁾ increased by 25% to \$50.2/b from \$40.3/b in 2016. TOTAL’s average natural gas price realization for the Group’s consolidated subsidiaries increased by 15% to \$4.08/Mbtu in 2017 from \$3.56/Mbtu in 2016. The Group’s European Refining Margin Indicator (“ERMI⁽³⁾”) increased to \$40.9/t on average in 2017 compared to \$34.1/t in 2016, an increase of 20% due to elevated petroleum product demand. In the fourth quarter of 2017, the ERMI was \$35.5/t. Petrochemicals continued to benefit from a favorable environment albeit down compared to a year ago.

The euro-dollar exchange rate averaged \$1.13/€ in 2017 compared to \$1.11/€ in 2016.

In this overall more favorable environment, non-Group sales in 2017 were \$171,493 million compared to \$149,743 million in 2016, an increase of 15% reflecting the increased hydrocarbon prices and Group production. Non-Group sales increased 11% for the Exploration & Production segment, 27% for the Gas, Renewables & Power segment, 15% for the Refining & Chemicals segment and 12% for the Marketing & Services segment.

(1)

Excluding the impact of IFRS 16, which is the subject of an ongoing evaluation by a working group formed for that purpose. For information on the transition to IFRS 16, refer to Note 1.2 to the Consolidated Financial Statements in the 2017 Registration Document (on [page 246](#)), which is incorporated herein by reference.

(2)

Consolidated subsidiaries, excluding fixed margins.

(3)

The ERMI is a Group indicator intended to represent the margin after variable costs for a hypothetical complex refinery located around Rotterdam in Northern Europe that processes a mix of crude oil and other inputs commonly supplied to this region to produce and market the main refined products at prevailing prices in this region. The indicator margin may not be representative of the actual margins achieved by the Group in any period because of the Group's particular refinery configurations, product mix effects or other company-specific operating conditions.

Total - Form 20-F 2017 - 4

[Back to Contents](#)

Net income (Group share) in 2017 increased by 39% to \$8,631 million from \$6,196 million in 2016, mainly due to higher hydrocarbon prices and growth of the Group's production. In 2017, adjustments to net income (Group share), which included special items of \$(2,213) million and after-tax inventory valuation effect of \$282 million, had a negative impact on net income (Group share) of \$1,947 million. Special items included mainly an impairment of Fort Hills in Canada (following the operator announcement of the increase of the project's costs), Gladstone LNG in Australia and assets in Congo, partially offset by a gain on the sale of Atotech. For a detailed overview of adjustment items for 2017, refer to Note 3 to the Consolidated Financial Statements in the 2017 Registration Document (starting on [page 247](#)), which is incorporated herein by reference. In 2016, adjustments to net income (Group share), which included special items of \$(2,567) million and after-tax inventory valuation effect of \$479 million, had a negative impact on net income (Group share) of \$2,091 million. Special items in 2016 included impairments on Gladstone LNG in Australia, Angola LNG, and Laggan-Tormore in the United Kingdom, reflecting the decrease in gas price assumptions for the coming years. Excluding these items, adjusted net income in 2017 increased by 28% to \$10,578 million compared to \$8,287 million in 2016. The increase was the result of a much higher contribution from Exploration & Production and the continued decrease in the Group's breakeven.

Income taxes in 2017 amounted to \$3,029 million, 3.1 times higher than \$970 million in 2016, due to the relative weight and higher tax rates in the Exploration & Production segment in a higher hydrocarbon price environment.

In 2017, the Company did not buy back any of its shares. In 2016, the Company bought back 100,331,268 TOTAL treasury shares owned by Group affiliates under the authorization granted by the shareholders at the meeting of May 24, 2016, which were subsequently canceled by the Company's Board of Directors.

Fully-diluted earnings per share was \$3.34 in 2017 compared to \$2.51 in 2016, an increase of 33%.

Asset sales completed in 2017 were \$4,239 million, essentially comprised of the sale of Atotech, mature assets in Gabon, Gina Krog in Norway, part of the interest in the Fort Hills project in Canada, the SPMR pipeline in France and LPG activities in Germany. Asset sales completed in 2016 were \$1,864 million.

Acquisitions completed in 2017 were \$1,476 million, including \$714 million of resource acquisitions, mainly comprised of the bonus related to the license for Elk-Antelope in Papua New Guinea, a marketing and logistics network in East Africa and a 23% equity share in Tellurian, Inc. Acquisitions completed in 2016 were \$2,033 million, including \$780 million of resource acquisitions.

In addition, in early 2018, the Group finalized the acquisition of assets in Brazil from Petrobras for \$1.95 billion as well as the sale of TotalErg in Italy for \$415 million (including the B2B and the LPG businesses). Finally, in March 2018, TOTAL S.A. finalized the acquisition of Mærsk Oil in a share and debt transaction.

The Group's cash flow from operating activities for the full-year 2017 was \$22,319 million, an increase of 35% compared to \$16,521 million in 2016. The change in working capital at replacement cost for the full-year 2017, which is the (increase)/decrease in working capital of \$827 million as determined in accordance with IFRS adjusted for the pre-tax inventory valuation effect of \$357 million, was \$1,184 million compared to \$(467) million in 2016. Operating cash flow excluding the change in working capital at replacement cost for the full-year 2017 was \$21,135 million, an increase of 24% compared to \$16,988 million in 2016. Operating cash flow for the full-year 2017 excluding the change in working capital at replacement cost and without financial charges (DACF) was \$22,183 million, an increase of 26% compared to \$17,581 million in 2016. The Group's net cash flow⁽¹⁾ was \$9,499 million for the full-year 2017 compared to \$(769) million in 2016, mainly due to the nearly \$4 billion increase in operating cash flow before working capital changes, the decrease in net investments related to the \$3 billion decrease in organic investments and the sale of Atotech.

See also “– 5.4 Liquidity and Capital Resources”, below.

2016 vs. 2015

After falling from \$100/b in 2014 to \$52/b on average in 2015, Brent prices were highly volatile in 2016, fluctuating between \$27/b and \$58/b, with an average of \$44/b for the year. In 2016, TOTAL’s average liquids price realization decreased by 15% to \$40.3/b from \$47.4/b in 2015. TOTAL’s average natural gas price realization for the Group’s consolidated subsidiaries decreased in 2016 by 25% to \$3.56/Mbtu from \$4.75/Mbtu in 2015. The ERMI was \$34/t in 2016, a 30% decrease compared to the high levels in 2015 (\$48.5/t), in the context of high petroleum stocks. The environment for petrochemicals remained favorable.

The Euro remained stable in 2016 compared to the US Dollar, with the euro-dollar exchange rate averaging \$1.11/€ in 2016 and 2015.

In this overall less favorable environment, non-Group sales in 2016 were \$149,743 million, a decrease of 9% compared to \$165,357 million for 2015. The decrease in hydrocarbon prices and refining margins were partially offset by production growth and strong results for petrochemicals.

Net income (Group share) in 2016 increased by 22% to \$6,196 million from \$5,087 million in 2015, mainly due to a less negative impact on net income (Group share) in 2016 of special items (as further discussed below), with the Group demonstrating its resilience despite the 19% drop in hydrocarbon prices due to the strength of its integrated model and commitment of its teams to reducing the breakeven. In 2016, adjustments to net income (Group share), which included special items of \$(2,567) million and after-tax inventory valuation effect of \$479 million, had a negative impact on net income (Group share) of \$2,091 million in 2016. Special items included impairments on Gladstone LNG in Australia, Angola LNG, and Laggan-Tormore in the United Kingdom, reflecting the decrease in gas price assumptions for the coming years. In 2015, adjustment items, which included special items of \$(4,675) million and after-tax inventory valuation effect of \$(747) million, had a negative impact on net income (Group share) of \$5,431 million. Special items included impairments on Fort Hills in Canada and Gladstone LNG in Australia as well as in Libya, an adjustment to depreciation on Usan in Nigeria following the cancellation of the sale process and the impairment of exploration projects that will not be developed. Excluding these items, adjusted net income declined by 21% to \$8,287 million in 2016 compared to \$10,518 million in 2015, primarily due to the impact of lower Brent prices, partially offset by the contribution from downstream activities.

Income taxes in 2016 amounted to \$970 million, a decrease of 41% compared to \$1,653 million in 2015, due to the relative weight and lower tax rates in Exploration & Production in a lower hydrocarbon price environment.

In 2016, the Company bought back 100,331,268 TOTAL treasury shares owned by Group affiliates under the authorization granted by the shareholders at the meeting of May 24, 2016, which were subsequently canceled by the Company’s Board of Directors. TOTAL bought back approximately 4.7 million of its own shares in 2015 (*i.e.*, approximately 0.19% of the share capital as of December 31, 2015) under the

(1)

“Net cash flow” = operating cash flow before working capital changes at replacement cost – net investments (including other transactions with non-controlling interests).

[Back to Contents](#)

authorization granted by the shareholders at the meeting of May 29, 2015. The number of fully-diluted shares at December 31, 2016, was 2,436 million compared to 2,336 million at December 31, 2015.

Fully-diluted earnings per share was \$2.51 in 2016 compared to \$2.16 in 2015, an increase of 16%.

Asset sales completed in 2016 were \$1,864 million, mainly comprised of the sale of a 15% interest in the Gina Krog field in Norway, the FUKA gas pipeline network in the North Sea and the retail network in Turkey. Asset sales completed in 2015 \$5,968 million.

Acquisitions completed in 2016 were \$2,033 million, including \$780 million of resource acquisitions, mainly comprised of the additional 75% interest in the Barnett shale gas field in the United States, and the acquisitions of Saft, Lampiris and a retail network in the Dominican Republic. Acquisitions completed in 2015 were \$3,441 million, including \$2,808 million of resource acquisitions.

The Group's cash flow from operating activities for the full-year 2016 was \$16,521 million, a decrease of 17% compared to \$19,946 million in 2015. The change in working capital at replacement cost for the full-year 2016, which is the (increase)/decrease in working capital of \$(1,119) million as determined in accordance with IFRS adjusted for the pre-tax inventory valuation effect of \$652 million, was \$(467) million compared to \$570 million in 2015. Operating cash flow excluding the change in working capital at replacement cost for the full-year 2016 was \$16,988 million, a decrease of 12% compared to \$19,376 million in 2015. Operating cash flow for the full-year 2016 excluding the change in working capital at replacement cost and without financial charges (DACF) was \$17,581 million, a decrease of 11% compared to \$19,839 million in 2015. The Group's net cash flow was \$(769) million for the full-year 2016 compared to \$(984) million in 2015, an improvement despite a nearly \$10/b decrease in the Brent price in 2016 compared to 2015. The decrease in investments was able to offset the decrease in operating cash flow before working capital changes mainly caused by the decrease in hydrocarbon prices and European refining margins.

See also "[5.4 Liquidity and Capital Resources](#)", below.

5.3

Business segment reporting

The financial information for each business segment is reported on the same basis as that used internally by the chief operating decision-maker in assessing segment performance and the allocation of segment resources. Due to their particular nature or significance, certain transactions qualifying as "special items" are excluded from the business segment figures. In general, special items relate to transactions that are significant, infrequent or unusual. In certain instances, certain transactions such as restructuring costs or asset disposals, which are not considered to be representative of the normal course of business, may qualify as special items although they may have occurred in prior years or are likely to recur in following years.

In accordance with IAS 2, the Group values inventories of petroleum products in its financial statements according to the First-In, First-Out (FIFO) method and other inventories using the weighted-average cost method. Under the FIFO method, the cost of inventory is based on the historic cost of acquisition or manufacture rather than the current replacement cost. In volatile energy markets, this can have a significant distorting effect on the reported income. Accordingly, the adjusted results of the Refining & Chemicals and Marketing & Services segments are presented according to the replacement cost method in order to facilitate the comparability of the Group's results with those of its competitors and to help illustrate the operating performance of these segments excluding the impact of oil price changes on the replacement of inventories. In the replacement cost method, which approximates the Last-In, First-Out (LIFO) method, the variation of inventory values in the statement of income is, depending on the nature of the

inventory, determined using either the month-end price differential between one period and another or the average prices of the period. The inventory valuation effect is the difference between the results under the FIFO and replacement cost methods.

The effect of changes in fair value presented as an adjustment item reflects, for trading inventories and storage contracts, differences between internal measures of performance used by TOTAL's management and the accounting for these transactions under IFRS, which requires that trading inventories be recorded at their fair value using period-end spot prices. In order to best reflect the management of economic exposure through derivative transactions, internal indicators used to measure performance include valuations of trading inventories recorded at their fair value based on forward prices. Furthermore, TOTAL, in its trading activities, enters into storage contracts, the future effects of which are recorded at fair value in the Group's internal economic performance. IFRS, by requiring accounting for storage contracts on an accrual basis, precludes recognition of this fair value effect.

The adjusted business segment results (adjusted operating income and adjusted net operating income) are defined as replacement cost results, adjusted for special items, excluding the effect of changes in fair value. For further information on the adjustments affecting operating income on a segment-by-segment basis, and for a reconciliation of segment figures to figures reported in the Company's audited Consolidated Financial Statements, see Note 3 to the Consolidated Financial Statements in the 2017 Registration Document (starting on [page 247](#)), which is incorporated herein by reference.

The Group measures performance at the segment level on the basis of adjusted net operating income. Net operating income comprises operating income of the relevant segment after deducting the amortization and the depreciation of intangible assets other than leasehold rights, translation adjustments and gains or losses on the sale of assets, as well as all other income and expenses related to capital employed (dividends from non-consolidated companies, income from equity affiliates and capitalized interest expenses) and after income taxes applicable to the above. The income and expenses not included in net operating income that are included in net income are interest expenses related to long-term liabilities net of interest earned on cash and cash equivalents, after applicable income taxes (net cost of net debt and non-controlling interests). Adjusted net operating income excludes the effect of the adjustments (special items and the inventory valuation effect) described above. For further discussion of the calculation of net operating income and the calculation of return on average capital employed (ROACE⁽¹⁾), see Note 3 to the Consolidated Financial Statements in the 2017 Registration Document (starting on [page 247](#)), which is incorporated herein by reference.

(1)
"ROACE" = ratio of adjusted net operating income to average capital employed at replacement cost between the beginning and the end of the period.

(a)

For the definitions of “operating income” and “net operating income”, refer to Note 3 to the Consolidated Financial Statements in the 2017 Registration Document (starting on [page 247](#)), which is incorporated herein by reference.

(b)

“Effective tax rate” = tax on adjusted net operating income / (adjusted net operating income – income from equity affiliates – dividends received from investments – impairment of goodwill + tax on adjusted net operating income).

(c)

Adjusted for special items. See Note 3 to the Consolidated Financial Statements in the 2017 Registration Document (starting on [page 247](#)), which is incorporated herein by reference.

2017 vs. 2016

In 2017, market conditions were more favorable than in 2016. The average realized price of liquids increased by 25% and the average realized gas price by 15%.

Edgar Filing: TOTAL S.A. - Form 20-F

For the full-year 2017, hydrocarbon production was 2,566 thousand barrels of oil equivalent per day (kboe/d), an increase of 5% compared to 2,452 kboe/d in 2016, due to the following:

- ▮ +5% due to new start-ups and ramp-ups, notably Moho Nord, Kashagan, Edradour and Glenlivet, and Angola LNG;
- ▮ +2% portfolio effect, mainly due to taking over the giant Al Shaheen oil field concession in Qatar and acquiring an additional 75% interest in the Barnett shale in the United States, partially offset by the exit from the southern sector in the Republic of the Congo and asset sales in Norway;
- ▮ +1% related to improved security conditions in Libya and Nigeria; and
- ▮ -3% due to natural field decline, the PSC price effect⁽¹⁾ and OPEC quotas.

For a discussion of the Group's proved reserves, refer to point 2.1.3 ("Reserves") of chapter 2 of the 2017 Registration Document (starting on [page 32](#)), which is incorporated herein by reference. See also point 9.1 ("Oil and gas information pursuant to FASB Accounting Standards Codification 932") of chapter 9 of the 2017 Registration Document (starting on [page 344](#)), which is incorporated herein by reference, for additional information on proved reserves, including tables showing changes in proved reserves by region.

Non-Group sales for the Exploration & Production segment in 2017 were \$8,477 million compared to \$7,629 million in 2016, an increase of 11%.

The segment's adjusted net operating income was \$5,985 million in 2017, an increase of 86% compared to \$3,217 million in 2016, notably due to production growth, cost reductions and an increase in oil and gas prices.

The effective tax rate increased from 27.7% in 2016 to 41.2% in 2017, in line with the rise in hydrocarbon prices.

(1)

The "PSC price effect" refers to the impact of changing hydrocarbon prices on entitlement volumes from production sharing and buyback contracts. For example, as the price of oil or gas increases above certain pre-determined levels, TOTAL's share of production generally decreases.

Total - Form 20-F 2017 - 7

[Back to Contents](#)

Adjusted net operating income for the Exploration & Production segment excludes special items. The exclusion of special items had a positive impact on the segment's adjusted net operating income in 2017 of \$3,880 million. Special items mainly included impairments of Fort Hills in Canada (following the operator announcement of the increase of the project's costs), Gladstone LNG in Australia, assets in the Republic of the Congo and gas assets in the United Kingdom, as well as assets in the United States and Norway (for additional information, refer to Note 3 to the Consolidated Financial Statements in the 2017 Registration Document (starting on page 247), which is incorporated herein by reference). In 2016, the exclusion of special items had a positive impact on the segment's adjusted net operating income of \$1,872 million. Special items mainly included impairments on Gladstone LNG in Australia, Angola LNG and Laggan-Tormore in the United Kingdom, reflecting the decrease in gas price assumptions for the coming years.

Technical costs⁽¹⁾ for consolidated affiliates, calculated in accordance with ASC 932⁽²⁾, continue to fall, to \$19.5/boe in 2017 compared to \$20.4/boe in 2016. This decrease was mainly due to the reduction in production costs from \$5.9/boe in 2016 to \$5.4/boe in 2017.

The segment's cash flow from operating activities for the full-year 2017 was \$11,459 million, an increase of 27% compared to \$9,010 million in 2016. Operating cash flow for the full-year 2017 excluding the change in working capital at replacement cost of \$(1,932) million (\$(726) million in 2016) was \$13,391 million compared to \$9,736 million in 2016, an increase of 38% whereas oil prices only increased by 24%, notably due to production ramp-ups on major projects started up since 2016, including Kashagan and Moho Nord, the increase in hydrocarbon prices and operating cost reductions. Operating cash flow for the full-year 2017 excluding the change in working capital at replacement cost and without financial charges was \$14,753 million compared to \$10,592 million in 2016, an increase of 39%.

For information on the segment's capital expenditures, refer to points 2.1.2 ("Exploration and development") (on page 32) and 2.5 ("Investments") (starting on page 68) of chapter 2 of the 2017 Registration Document, which are incorporated herein by reference. See also "5.4 Liquidity and Capital Resources", below.

In this context, the segment's ROACE for the full-year 2017 was 6% compared to 3% for the full-year 2016.

2016 vs. 2015

Market conditions were less favorable in 2016 compared to 2015. The average realized price of liquids decreased by 15% and the average realized gas prices by 25%.

For the full-year 2016, hydrocarbon production was 2,452 kboe/d, an increase of 4.5% compared to 2,347 kboe/d in 2015, due to the following:

- ▭ +6% due to new start ups and ramp ups, notably Laggan-Tormore, Surmont Phase 2, Termokarstovoye, Gladstone LNG, Moho Phase 1b, and Vega Pleyade, and Incahuasi; and
- ▭ -1.5% due to the security situation in Nigeria and Yemen, and wild fires in Canada.
- ▭ Natural field decline was offset by a positive PSC price effect and portfolio effects.

Non-Group sales for the segment in 2016 were \$7,629 million compared to \$10,297 million in 2015, a decrease of 26%.

The segment's adjusted net operating income was \$3,217 million in 2016, a decrease of 26% compared to \$4,330 million in 2015. The increase in production combined with the decrease in operating costs as well as the lower effective tax rate partially offset the impact of lower hydrocarbon prices.

Adjusted net operating income for the Exploration & Production segment excludes special items. The exclusion of special items had a positive impact on the segment's adjusted net operating income in 2016 of \$1,872 million. Special items mainly included impairments on Gladstone LNG in Australia, Angola LNG, and Laggan-Tormore in the United Kingdom, reflecting the decrease in gas price assumptions for the coming years. In 2015, the exclusion of special items had a positive impact on the segment's adjusted net operating income of \$5,416 million. Special items mainly included impairments on Fort Hills in Canada and Gladstone LNG in Australia as well as in Libya, an adjustment to depreciation on Usan in Nigeria following the cancellation of the sale process and the impairment of exploration projects that will not be developed.

Technical costs for consolidated subsidiaries, calculated in accordance with ASC 932, were reduced to \$20.4/boe in 2016 compared to \$23.0/boe in 2015. This decrease was essentially due to the reduction in production costs from \$7.4/boe in 2015 to \$5.9/boe in 2016.

The segment's cash flow from operating activities for the full-year 2016 was \$9,010 million, a decrease of 22% compared to \$11,567 million in 2015. Operating cash flow for the full-year 2016 excluding the change in working capital at replacement cost of \$(726) million (\$245 million in 2015) was \$9,736 million compared to \$11,322 million in 2015, essentially due to the decrease in hydrocarbon prices, partially offset by the increase in production and decrease in operating costs. Operating cash flow for the full-year 2016 excluding the change in working capital at replacement cost and without financial charges was \$10,592 million compared to \$11,920 million in 2015, a decrease of 11%.

In this context, the segment's ROACE for the full-year 2016 was 3% compared to 4% for the full-year 2015.

(1)

"Technical costs" = (production costs + exploration expenses + depreciation, depletion and amortization and valuation allowances)/production of the year.

(2)

Financial Accounting Standards Board (FASB) Accounting Standards Codification Topic 932, Extractive industries – Oil and Gas.

(a)

For the definitions of “operating income” and “net operating income”, refer to Note 3 to the Consolidated Financial Statements in the 2017 Registration Document (starting on [page 247](#)), which is incorporated herein by reference.

(b)

Adjusted for special items. See Note 3 to the Consolidated Financial Statements in the 2017 Registration Document (starting on [page 247](#)), which is incorporated herein by reference.

2017 vs. 2016

Non-Group sales for the Gas, Renewables & Power segment in 2017 were \$12,854 million compared to \$10,124 million in 2016, an increase of 27%.

The segment’s adjusted net operating income was \$485 million in 2017, an increase of 10% compared to \$439 million in 2016.

Adjusted net operating income for the Gas, Renewables & Power segment excludes special items. The exclusion of special items had a positive impact on the segment’s adjusted net operating income in 2017 of \$870 million. Special items included an impairment concerning SunPower⁽¹⁾ in the United States given the depressed economic environment of the solar activity (for additional information, refer to Note 3 to the Consolidated Financial Statements in the 2017 Registration Document (starting on [page 247](#)), which is incorporated herein by reference). In 2016, the exclusion of special items had a positive impact on the segment’s adjusted net operating income of \$533 million.

The segment’s cash flow from operating activities for the full-year 2017 was \$993 million, an increase of 85% compared to \$538 million in 2016. Operating cash flow for the full-year 2017 excluding the change in working capital at replacement cost of \$761 million (\$413 million in 2016) was \$232 million, an increase of 86% compared to \$125 million in 2016. Operating cash flow for the full-year 2017 excluding the change in working capital at replacement cost and without financial charges was \$294 million compared to \$176 million in 2016, an increase of 67%.

For information on the segment's investments, refer to point 2.5 of chapter 2 of the 2017 Registration Document (starting on [page 68](#)), which is incorporated herein by reference. See also "[5.4 Liquidity and Capital Resources](#)", below.

In this context, the segment's ROACE for the full-year 2017 was 10% compared to 9% for the full year 2016.

2016 vs. 2015

Non-Group sales for the segment in 2016 were \$10,124 million compared to \$9,149 million in 2015, an increase of 11%.

The segment's adjusted net operating income was \$439 million in 2016, a decrease of 23% compared to \$567 million 2015.

Adjusted net operating income for the Gas, Renewables & Power segment excludes special items. The exclusion of special items had a positive impact on the segment's adjusted net operating income in 2016 of \$533 million compared to a positive impact of \$800 million in 2015.

The segment's cash flow from operating activities for the full-year 2016 was \$538 million compared to \$(384) million in 2015. Operating cash flow for the full-year 2016 excluding the change in working capital at replacement cost of \$413 million (\$(365) million in 2015) was \$125 million, compared to \$(19) million in 2015. Operating cash flow for the full-year 2016 excluding the change in working capital at replacement cost and without financial charges was \$176 million compared to \$5 million in 2015.

In this context, the segment's ROACE for the full-year 2016 was 9% compared to 13% for the full year 2015.

(1)

As of December 31, 2017, TOTAL held an interest of 56.26% in SunPower, an American company listed on Nasdaq and based in California.

2017 vs. 2016

Refinery throughput decreased by 7% for the full-year 2017 compared to 2016 as a result of the definitive ending of distillation capacity at La Mède (France) and Lindsey (UK) and the temporary shutdown due to Hurricane Harvey in the United States. The ERMI increased to \$40.9/t on average in 2017 compared to \$34.1/t in 2016, an increase of 20% due to elevated petroleum product demand. In the fourth quarter of 2017, the ERMI was \$35.5/t. Petrochemicals continued to benefit from a favorable environment albeit down compared to a year ago.

Non-Group sales for the Refining & Chemicals segment in 2017 were \$75,505 million compared to \$65,632 million in 2016, an increase of 15%.

The segment's adjusted net operating income was \$3,790 million for the full-year 2017, a decrease of 10% compared to \$4,195 million in 2016, notably due to the impact of Hurricane Harvey, the impact of modernization work on the Antwerp platform and the sale of Atotech in early 2017 as well as lower trading results due to the evolution of the market into backwardation⁽¹⁾.

Adjusted net operating income for the Refining & Chemicals segment excludes any after-tax inventory valuation effect and special items. The exclusion of the inventory valuation effect had a negative impact on the segment's adjusted net operating income in 2017 of \$298 million compared to a negative impact of \$500 million in 2016. The exclusion of special items had a negative impact on the segment's adjusted net operating income in 2017 of \$2,117 million, consisting essentially of a gain on the sale of Atotech, compared to a positive impact of \$169 million in 2016.

The segment's cash flow from operating activities for the full-year 2017 was \$7,440 million, an increase of 62% compared to \$4,585 million in 2016. Operating cash flow for the full-year 2017 excluding the change in working capital at replacement cost of \$2,683 million (\$289 million in 2016) was \$4,757 million, a decrease of 2% compared to \$4,874 million in 2016. Operating cash flow for the full-year 2017 excluding the change in working capital at replacement cost and without financial charges was \$4,728 million compared to \$4,873 million in 2016, a decrease of 3%.

For information on the segment's investments, refer to point 2.5 of chapter 2 of the 2017 Registration Document (starting on page 68), which is incorporated herein by reference. See also "- 5.4 Liquidity and Capital Resources", below.

In this context, the segment's ROACE for the full-year 2017 was 33% compared to 38% for the full year 2016.

2016 vs. 2015

The ERMI averaged \$34/t in 2016, a decrease of 30% compared to the high level of 2015, in the context of high petroleum product stocks. Refinery throughput for the full-year 2016 decreased by 3% compared to 2015, notably due to shutdowns in Europe and the United States in the second quarter and the sale of the Schwedt refinery in Germany.

Non-Group sales for the segment in 2016 were \$65,632 million compared to \$70,623 million in 2015, a decrease of 7%.

(1)
"Backwardation" is the price structure where the prompt price of an index is higher than the future price.

[Back to Contents](#)

The segment's adjusted net operating income in 2016 was \$4,195 million compared to \$4,839 million in 2015, a decrease of 13% essentially due to the decrease in refining margins. Petrochemicals continued to generate good results, notably due to the strong contribution from the Group's major integrated platforms in Asia and the Middle East.

Adjusted net operating income for the Refining & Chemicals segment excludes any after-tax inventory valuation effect and special items. The exclusion of the inventory valuation effect had a negative impact on the segment's adjusted net operating income in 2016 of \$500 million compared to a positive impact of \$590 million in 2015. The exclusion of special items had a positive impact on the segment's adjusted net operating income in 2016 of \$169 million compared to a negative impact in 2015 of \$913 million, consisting essentially of gains on asset sales.

The segment's cash flow from operating activities for the full-year 2016 was \$4,585 million, a decrease of 29% compared to \$6,435 million in 2015. Operating cash flow for the full-year 2016 excluding the change in working capital at replacement cost of \$(289) million (\$647 million in 2015) was \$4,874 million, a decrease of 16% compared to \$5,788 million in 2015. Operating cash flow for the full-year 2016 excluding the change in working capital at replacement cost and without financial charges was \$4,873 million compared to \$5,788 million in 2015, a decrease of 16%.

In this context, the segment's ROACE for the full-year 2016 was 38% compared to 40% for the full year 2015.

2017 vs. 2016

In 2017, petroleum product sales were generally stable compared to the previous year, with a move toward Africa and Asia where the Group has strong growth. European sales were affected by the divestment of mature LPG distribution activities in Belgium and Germany.

Non-Group sales for the Marketing & Services segment in 2017 were \$74,634 million compared to \$66,351 million in 2016, an increase of 12%.

The Marketing & Services segment’s results continue to grow in a context of strong retail margins, notably in Africa. The segment’s adjusted net operating income in 2017 was \$1,676 million, an increase of 8% compared to \$1,559 million in 2016.

Adjusted net operating income for the Marketing & Services segment excludes any after-tax inventory valuation effect and special items. The exclusion of the inventory valuation effect had a positive impact on the segment’s adjusted net operating income in 2017 of \$3 million compared to a positive impact of \$13 million in 2016. The exclusion of special items had a negative impact on the segment’s adjusted net operating income in 2017 of \$82 million compared to a positive impact of \$128 million in 2016.

The segment’s cash flow from operating activities for the full-year 2017 was \$2,130 million, an increase of 21% compared to \$1,754 million in 2016. Operating cash flow for the full-year 2017 excluding the change in working capital at replacement cost of \$(21) million (\$(133) million in 2016) was \$2,151 million, an increase of 14% compared to \$1,887 million in 2016. Operating cash flow for the full-year 2017 excluding the change in working capital at replacement cost and without financial charges was \$2,242 million compared to \$1,966 million in 2016, an increase of 14%.

For information on the Marketing & Services segment’s investments, refer to point 2.5 of chapter 2 of the 2017 Registration Document (starting on [page 68](#)), which is incorporated herein by reference. See also “[– 5.4 Liquidity and Capital Resources](#)”, below.

In this context, the segment’s ROACE for the full-year 2017 was 26% compared to 27% for the full year 2016.

Total - Form 20-F 2017 - 11

[Back to Contents](#)

2016 vs. 2015

In 2016, refined product sales decreased slightly compared to 2015, essentially due to the sale of the retail network in Turkey.

Non-Group sales for the segment in 2016 were \$66,351 million compared to \$75,282 million in 2015, a decrease of 12%.

The segment's adjusted net operating income in 2016 was \$1,559 million, a decrease of 2% compared to \$1,591 million in 2015.

Adjusted net operating income for the Marketing & Services segment excludes any after-tax inventory valuation effect and special items. The exclusion of the inventory valuation effect had a positive impact on the segment's adjusted net operating income in 2016 of \$13 million compared to a positive impact of \$169 million in 2015. The exclusion of special items had a positive impact on the segment's adjusted net operating income in 2016 of \$128 million compared to a negative impact of \$173 million in 2015.

The segment's cash flow from operating activities for the full-year 2016 was \$1,754 million, a decrease of 24% compared to \$2,323 million in 2015. Operating cash flow for the full-year 2016 excluding the change in working capital at replacement cost of \$(133) million (\$382 million in 2015) was \$1,887 million, a decrease of 3% compared to \$1,941 million in 2015. Operating cash flow for the full-year 2016 excluding the change in working capital at replacement cost and without financial charges was \$1,966 million compared to \$2,058 million in 2015, a decrease of 4%.

In this context, the segment's ROACE for the full-year 2016 was 27% compared to 25% for the full year 2015.

Cash and cash equivalents at the end of the period	33,185	24,597	23,269

TOTAL's cash requirements for working capital, capital expenditures, acquisitions and dividend payments over the past three years were financed primarily by a combination of funds generated from operations, borrowings and divestments of non-core assets. In the current environment, TOTAL expects its external debt to be principally financed from the international debt capital markets. The Group continually monitors the balance between cash flow from operating activities and net expenditures. In the Company's opinion, its working capital is sufficient for its present requirements.

5.4.1 Capital expenditures

The largest part of TOTAL's capital expenditures in 2017 of \$16,896 million was made up of additions to intangible assets and property, plant and equipment (approximately 84%), with the remainder attributable to equity-method affiliates and to acquisitions of subsidiaries. In the Exploration & Production segment, as described in more detail under point 9.1.6 ("Cost incurred") of chapter 9 of the 2017 Registration Document (on page 356), which is incorporated herein by reference, capital expenditures in 2017 were principally development costs (approximately 87%, mainly for construction of new production facilities), exploration expenditures (successful or unsuccessful, approximately 5%) and acquisitions of proved and unproved properties (approximately 6%). In the Gas, Renewables & Power segment, approximately 52% of capital expenditures in 2017 were acquisitions, with the balance being related mainly to facilities investments. In the Refining & Chemicals segment, approximately 92% of capital expenditures in 2017 were related to refining and petrochemical activities (essentially 55% for existing units including maintenance and major turnarounds and 45% for new construction), the balance being related mainly to Hutchinson. In the Marketing & Services segment, approximately 24% of capital expenditures in 2017 were acquisitions, with the balance being related to expenditures mainly in Europe and Africa.

For additional information on capital expenditures, refer to the discussion above in "5.1 Overview", "5.2 Group results 2015-2017" and "5.3 Business segment reporting", above, as well as points 1.5.2 ("A targeted investment policy") of chapter 1 (on page 23) and 2.5 ("Investments") of chapter 2 (starting on page 68) of the 2017 Registration Document, which are incorporated herein by reference.

5.4.2 Cash flow

Cash flow from operating activities in 2017 was \$22,319 million compared to \$16,521 million in 2016 and \$19,946 million in 2015. The increase of \$5,798 million from 2016 to 2017 was mainly due to an increase of the net result and a decrease in working capital requirements in 2017 of \$827 million compared to an increase in 2016 of \$1,119 million. The Group's working capital requirement was affected by the effect of changes in oil and oil product prices. As IFRS rules require TOTAL to account for inventories of petroleum products according to the FIFO method, an increase in oil and oil product prices at the end of the relevant period compared to the beginning of the same period generates, all other factors remaining equal, an increase in inventories and accounts receivable net of an increase in accounts payable, resulting in an increase in working capital requirements. However, despite the increase in oil and oil product prices in 2017, the Group's working capital requirement decreased by \$827 million, due to increases in accounts payable and decreases in other current assets, partially offset by increases in accounts receivable.

Total - Form 20-F 2017 - 12

[Back to Contents](#)

The Group's working capital requirement increased by \$1,119 million in 2016 mainly due to increases in inventories and receivables partially offset by an increase in payables, and decreased by \$1,683 million in 2015 mainly due to reductions in inventory and receivables.

Cash flow used in investing activities in 2017 was \$11,632 million compared to \$17,653 million in 2016 and \$20,449 million in 2015. The decrease of \$6,021 million from 2016 to 2017 was mainly due to lower expenditures on the portfolio of Exploration & Production projects and higher divestments mainly in the Refining & Chemicals segment (principally Atotech). The decrease from 2015 to 2016 was mainly due to lower expenditures on the Group's portfolio of Upstream projects and lower divestments mainly in the Refining & Chemicals segment, which had a higher level of divestments in 2015 due to the sale of Bostik. Total expenditures in 2017 were \$16,896 million compared to \$20,530 million in 2016 and \$28,033 million in 2015. During 2017, 76% of the expenditures were made by the Exploration & Production segment (as compared to 78% in 2016 and 86% in 2015), 5% by the Gas, Power & Renewables segment (as compared to 6% in 2016 and 2% in 2015), 10% by the Refining & Chemicals segment (compared to 9% in 2016 and 7% in 2015) and 9% by the Marketing & Services segment (compared to 6% in 2016 and 5% in 2015). The main source of funding for these expenditures was cash from operating activities and issuances of non-current debt. For additional information on expenditures, please refer to the discussions in "[5.1 Overview](#)", "[5.2 Group results 2015-2017](#)" and "[5.3 Business segment reporting](#)", above, and point 2.5 ("Investments") of chapter 2 of the 2017 Registration Document (starting on [page 68](#)), which is incorporated herein by reference.

Divestments, based on selling price and net of cash sold, in 2017 were \$5,264 million compared to \$2,877 million in 2016 and \$7,584 million in 2015. In 2017, the Group's principal divestments were assets sales of \$4,239 million, consisting mainly of sales of Atotech, interests in the Gina Krog field in Norway and in various mature assets in Gabon. In 2016, the Group's principal divestments were asset sales of \$1,864 million, consisting mainly of interests in the FUKA and SIRGE gas pipelines, and the St. Fergus gas terminal in the United Kingdom. In 2015, the Group's principal divestments were asset sales of \$5,968 million, consisting mainly of sales of Bostik, interests in onshore blocks in Nigeria, Totalgaz, the Schwedt refinery, the Géosel oil storage facility, coal mining assets in South Africa, and partial interests in Laggan-Tormore and Fort Hills.

Cash flow used in financing activities in 2017 was \$(5,540) million compared to \$3,532 million in 2016 and \$1,060 million in 2015. The decrease in cash flow from financing activities in 2017 compared to 2016 was primarily due to the non-issuance of perpetual subordinated notes in 2017 compared to \$4,711 million having been issued in 2016, the increase in variation of current borrowings \$(7,175) million in 2017 compared to \$(3,260) million in 2016 and the decrease in net issuance of non-current borrowings (\$2,277 million in 2017 compared to \$3,576 million in 2016).

5.4.3

Indebtedness

The Company's non-current financial debt at year-end 2017 was \$41,340 million¹⁾ compared to \$43,067 million at year-end 2016 and \$44,464 million at year-end 2015. For further information on the Company's level of borrowing and the type of financial instruments, including maturity profile of debt and currency and interest rate structure, see Note 15 to the Consolidated Financial Statements in the 2017 Registration Document (starting on [page 303](#)), which is incorporated herein by reference. For further information on the Company's treasury policies, including the use of instruments for hedging purposes and the currencies in which cash and cash equivalents are held, see "[Item 11. Quantitative and Qualitative Disclosures About Market Risk](#)".

Cash and cash equivalents at year-end 2017 were \$33,185 million compared to \$24,597 million at year-end 2016 and \$23,269 million at year-end 2015.

On November 27, 2017, Standard & Poor's upgraded TOTAL's outlook to stable, with a long term credit rating remaining at A+.

5.4.4 Shareholders' equity

Shareholders' equity at year-end 2017 was \$114,037 million compared to \$101,574 million at year-end 2016 and \$95,409 million at year-end 2015. Changes in shareholders' equity in 2017 were primarily due to the impacts of comprehensive income, dividend payments and the issuance of common shares. Changes in shareholders' equity in 2016 were primarily due to the impacts of comprehensive income, dividend payments, the issuance of perpetual subordinated notes and the issuance of common shares. Changes in shareholders' equity in 2015 were primarily due to the impacts of dividend payments, the issuance of perpetual subordinated notes and the issuance of common shares.

In 2017, the Company did not buy back any shares. At its meeting held on December 15, 2016, and pursuant to the authorization of the Extraordinary Shareholders' Meeting of May 11, 2012, the Company's Board of Directors decided to cancel 100,331,268 treasury shares (*i.e.*, 4.13% of the share capital as of December 31, 2016) that the Company had bought back off-market in December 2016 from four of its 100% indirectly controlled subsidiaries. Following this transaction, Group affiliates no longer hold any treasury shares. This buyback of shares had no impact on the Company's Consolidated Financial Statements. In 2015, the Company bought back nearly 4.7 million of its own shares (*i.e.*, 0.19% of the share capital as of December 31, 2015) under the previous authorization granted by the shareholders at the meeting of May 29, 2015.

5.4.5 Net-debt-to-equity

As of December 31, 2017, TOTAL's net-debt-to-equity ratio⁽²⁾ was 13.8% compared to 27.1% and 28.3% at year-ends 2016 and 2015, respectively. The decrease from 2016 to 2017 was mostly due to the decrease of the net debt driven by the increase in cash and cash equivalents and also by the increase of equity explained above.

As of December 31, 2017, the Company had \$11,478 million of long-term confirmed lines of credit, of which \$11,478 million were unused.

(1)
Excludes net current and non-current financial debt of \$(140) million as of December 31, 2016 and \$141 million as of December 31, 2015, related to assets classified in accordance with IFRS 5 "non-current assets held for sale and discontinued operations". None as of December 31, 2017.

(2)
For additional information, refer to Note 15.1(E) to the Consolidated Financial Statements in the 2017 Registration Document (on [page 307](#)), which is incorporated herein by reference.

[Back to Contents](#)

5.5

Guarantees and other off-balance sheet arrangements

As of December 31, 2017, the guarantees provided by the Company in connection with the financing of the Ichthys LNG project amounted to \$8,500 million. As of December 31, 2016, the guarantees amounted to \$7,800 million.

Guarantees given against borrowings also include the guarantee given by the Company in connection with the financing of the Yamal LNG project, which amounted to \$4,038 million as of December 31, 2017, compared to \$3,147 million as of December 31, 2016.

The Company has confirmed and extended guarantees for Total Refining Saudi Arabia S.A.S. shareholders' advances that amounted to \$1,462 million as of December 31, 2017, compared to \$1,230 million as of December 31, 2016.

The guarantee given in 2008 by the Company in connection with the financing of the Yemen LNG project amounted to \$551 million as of December 31, 2017, same as in 2016.

These guarantees and other information on the Company's commitments and contingencies are presented in Note 13 to the Consolidated Financial Statements in the 2017 Registration Document (starting on [page 296](#)), which is incorporated herein by reference.

The Group does not currently consider that these guarantees, or any other off-balance sheet arrangements of the Company or any other members of the Group, have or are reasonably likely to have, currently or in the future, a material effect on the Group's financial condition, changes in financial condition, revenues or expenses, results of operation, liquidity, capital expenditures or capital resources.

5.6

Contractual obligations

Payment due by period	Less than	1-3 years	3-5 years	More than	Total
(M\$)	1 year			5 years	
Non-current debt obligations ^(a)	-	10,914	8,626	20,004	39,544
Current portion of non-current debt obligations ^(b)	4,646	-	-	-	4,646
Finance lease obligations ^(c)	39	133	128	856	1,156
Asset retirement obligations ^(d)	485	1,093	1,072	9,590	12,240
Operating lease obligations ^(c)	1,401	1,801	1,085	2,154	6,441
Purchase obligations ^(e)	8,605	12,686	11,231	53,844	86,366
TOTAL	15,176	26,627	22,142	86,448	150,393

(a)

Non-current debt obligations are included in the items "Non-current financial debt" and "Hedging instruments of non-current financial debt" of the Consolidated Balance Sheet (refer to point 8.4 of chapter 8 of the 2017 Registration Document (on [page 240](#)), which is incorporated herein by reference). The figures in this table are net of the non-current portion of issue swaps and swaps hedging bonds, and exclude non-current finance lease obligations of \$1,117 million.

(b)

The current portion of non-current debt is included in the items "Current borrowings", "Current financial assets" and "Other current financial liabilities" of the Consolidated Balance Sheet. The figures in this table are net of the current portion of

issue swaps and swaps hedging bonds and exclude the current portion of finance lease obligations of \$39 million.

(c)

Finance lease obligations and operating lease obligations: the Group leases real estate, retail stations, ships and other equipment through non-cancelable capital and operating leases. These amounts represent the future minimum lease payments on non-cancelable leases to which the Group is committed as of December 31, 2017, less the financial expense due on finance lease obligations for \$48 million.

(d)

The discounted present value of Exploration & Production asset retirement obligations, primarily asset removal costs at the completion date.

(e)

Purchase obligations are obligations under contractual agreements to purchase goods or services, including capital projects. These obligations are enforceable and legally binding on TOTAL and specify all significant terms, including the amount and the timing of the payments. These obligations mainly include: hydrocarbon unconditional purchase contracts (except where an active, highly liquid market exists and when the hydrocarbons are expected to be re-sold shortly after purchase); reservation of transport capacities in pipelines; unconditional exploration works and development works in the Exploration & Production segment; and contracts for capital investment projects in the Refining & Chemicals segment. This disclosure does not include contractual exploration obligations with host states where a monetary value is not attributed and purchases of booking capacities in pipelines where the Group has a participation superior to the capacity used.

For additional information on the Group's contractual obligations, refer to Note 13 to the Consolidated Financial Statements in the 2017 Registration Document (starting on [page 296](#)), which is incorporated herein by reference. The Group has other obligations in connection with pension plans that are described in Note 10 to the Consolidated Financial Statements in the 2017 Registration Document (starting on [page 287](#)), which is incorporated herein by reference. As these obligations are not contractually fixed as to timing and amount, they have not been included in this disclosure. Other non-current liabilities, detailed in Note 12 to the Consolidated Financial Statements in the 2017 Registration Document (starting on [page 293](#)), which is incorporated herein by reference, are liabilities related to risks that are probable and amounts that can be reasonably estimated. However, no contractual agreements exist related to the settlement of such liabilities, and the timing of the settlement is not known.

5.7

Research and development

For a discussion of the Group's R&D policies and activities, refer to points 1.5.1 of chapter 1 (on [page 23](#)) and 2.6 of chapter 2 (starting on [page 70](#)) of the 2017 Registration Document, which are incorporated herein by reference.

ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES

Directors and senior management

Compensation

Corporate governance

Employees and share ownership

The following information concerning directors and senior management from the 2017 Registration Document is incorporated herein by reference:

↵
composition of the Board of Directors (introduction and point 4.1.1 of chapter 4, starting on page 104); and

↵
information concerning the General Management (point 4.1.5 of chapter 4, starting on page 134).

The following information concerning compensation from the 2017 Registration Document is incorporated herein by reference:

↵
approach to overall compensation (point 5.1.1.3 of chapter 5, starting on page 172); and

Total - Form 20-F 2017 - 14

[Back to Contents](#)

↵
compensation for the administration and management bodies (point 4.3 of chapter 4, starting on [page 137](#)).

The following information concerning Board practices and corporate governance from the 2017 Registration Document is incorporated herein by reference:

↵
practices of the Board of Directors (point 4.1.2 of chapter 4, starting on [page 119](#));

↵
report of the Lead Independent Director on her mandate (point 4.1.3 of chapter 4, starting on [page 132](#));

↵
evaluation of the functioning of the Board of Directors (point 4.1.4 of chapter 4, on [page 133](#)); and

↵
statement regarding corporate governance (point 4.2 of chapter 4, on [page 137](#)).

The following information concerning employees and share ownership from the 2017 Registration Document is incorporated herein by reference:

↵
number and categories of employees (points 5.1.1.1 and 5.1.1.2 of chapter 5, starting on [page 171](#));

↵
shares held by the administration and management bodies (point 4.1.6 of chapter 4, starting on [page 135](#)); and

↵
employee shareholding (point 6.4.2 of chapter 6, on [page 221](#)).

ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS

The following information concerning shareholders from the 2017 Registration Document is incorporated herein by reference:

↵
major shareholders (point 6.4.1 of chapter 6, starting on [page 219](#)); and

↵
shareholding structure (point 6.4.3 of chapter 6, on [page 221](#)).

The Group's main transactions with related parties (principally all the investments carried under the equity method) and the balances receivable from and payable to them are shown in Note 8 to the Consolidated Financial Statements in the 2017 Registration Document (starting on [page 271](#)), which is incorporated herein by reference). In the ordinary course of its business, TOTAL enters into transactions with various organizations with which certain of its directors or executive officers may be associated, but no such transactions of a material or unusual nature have been entered into during the period commencing on January 1, 2015, and ending on the date of this document.

ITEM 8. FINANCIAL INFORMATION

The following information from the 2017 Registration Document is incorporated herein by reference:

- Consolidated Financial Statements and Notes thereto (chapter 8, starting on [page 233](#));
- supplemental oil and gas information (points 9.1 and 9.2 of chapter 9, starting on [page 344](#));
- report on payments made to governments (point 9.3 of chapter 9, starting on [page 363](#));
- legal and arbitration proceedings (point 3.2 of chapter 3, starting on [page 86](#)); and
- dividend policy and other related information (point 6.2 of chapter 6, starting on [page 213](#)).

Except for certain events mentioned in “[Item 5. Operating and financial review and prospects](#)” and point 3.2 (“Legal and arbitration proceedings”) of chapter 3 (starting on [page 86](#)) and Note 17 (“Post closing events”) to the Consolidated Financial Statements (on [page 323](#)) of the 2017 Registration Document, which are incorporated herein by reference, no significant changes to the Group’s financial or commercial situation have occurred since the date of the Company’s Consolidated Financial Statements.

Refer to “[Item 18. Financial statements](#)” for the reports of the statutory auditors.

ITEM 9. THE OFFER AND LISTING

9.1 Markets

The principal trading markets for the Company’s shares are the Euronext Paris exchange in France and the New York Stock Exchange (“NYSE”) in the United States. The shares are also listed on Euronext Brussels and the London Stock Exchange.

9.2 Offer and listing details

Provided below is certain information on trading on Euronext Paris and the New York Stock Exchange. For additional information on listing details and share performance, refer to point 6.1 (“Listing details”) of chapter 6 of the 2017 Registration Document (starting on [page 210](#)), which is incorporated herein by reference.

9.2.1 Trading on Euronext Paris

Official trading of listed securities on Euronext Paris, including the shares, is transacted through French investment service providers that are members of Euronext Paris and takes place continuously on each business day in Paris from 9:00 a.m. to 5:30 p.m. (Paris time), with a fixing of the closing price at 5:35 p.m. Euronext Paris may suspend or resume trading in a security listed on Euronext Paris if the quoted price of the security exceeds certain price limits defined by the regulations of Euronext Paris.

[Back to Contents](#)

The markets of Euronext Paris settle and transfer ownership two trading days after a transaction (T+2). Highly liquid shares, including those of the Company, are eligible for deferred settlement (*Service de Règlement Différé – SRD*). Payment and delivery for shares under the SRD occurs on the last trading day of each month. Use of the SRD service requires payment of a commission.

In France, the shares are included in the principal index published by Euronext Paris (the “CAC 40 Index”). The CAC 40 Index is derived daily by comparing the total market capitalization of forty stocks traded on Euronext Paris to the total market capitalization of the stocks that made up the CAC 40 Index on December 31, 1987. Adjustments are made to allow for expansion of the sample due to new issues. The CAC 40 index indicates trends in the French stock market as a whole and is one of the most widely followed stock price indices in France. In the UK, the shares are listed in both the FTSE Eurotop 100 and FTSEurofirst 100 index. As a result of the creation of Euronext, the shares are included in Euronext 100, the index representing Euronext’s blue chip companies based on market capitalization. The shares are also included in the Stoxx Europe 50 and Euro Stoxx 50, blue chip indices comprised of the fifty most highly capitalized and most actively traded equities throughout Europe and within the European Monetary Union, respectively. Since June 2000, the shares have been included in the Dow Jones Global Titans 50 Index which consists of fifty global companies selected based on market capitalization, book value, assets, revenue and earnings.

The table below sets forth, for the periods indicated, the reported high and low quoted prices in euros for the currently outstanding shares on Euronext Paris.

ITEM 10. ADDITIONAL INFORMATION

10.1

Share capital

The following information from the 2017 Registration Document is incorporated herein by reference:

–

information concerning the share capital (point 7.1 of chapter 7, starting on [page 226](#));

–

the use of delegations of authority and power granted to the Board of Directors with respect to share capital increases (point 4.4.2 of chapter 4, starting on [page 162](#));

–

information on share buybacks (point 6.3 of chapter 6, starting on [page 216](#)); and

↵
factors likely to have an impact in the event of a public offering (point 4.4.4 of chapter 4, on page 163).

10.2 Memorandum and articles of association

The following information from the 2017 Registration Document is incorporated herein by reference:

↵
information concerning the articles of incorporation and bylaws, and other information (point 7.2 of chapter 7, starting on page 228); and

↵
participation of shareholders at shareholders' meetings (point 4.4.3 of chapter 4, on page 163).

10.3 Material contracts

There have been no material contracts (not entered into in the ordinary course of business) entered into by members of the Group since March 16, 2016.

10.4 Exchange controls

Under current French exchange control regulations, no limits exist on the amount of payments that TOTAL may remit to residents of the United States. Laws and regulations concerning foreign exchange controls do require, however, that an accredited intermediary must handle all payments or transfer of funds made by a French resident to a non-resident.

[Back to Contents](#)

10.5

Taxation

10.5.1

General

This section generally summarizes the material U.S. federal income tax and French tax consequences of owning and disposing of shares or ADSs of TOTAL to U.S. Holders that hold their shares or ADSs as capital assets for tax purposes. A U.S. Holder is a beneficial owner of shares or ADSs that is (i) a citizen or resident of the United States for U.S. federal income tax purposes, (ii) a domestic corporation or other domestic entity treated as a corporation for U.S. federal income tax purposes, (iii) an estate whose income is subject to U.S. federal income tax regardless of its source, or (iv) a trust if a U.S. court can exercise primary supervision over the trust's administration and one or more U.S. persons are authorized to control all substantial decisions of the trust.

This section does not address the Medicare tax on net investment income and does not apply to members of special classes of holders subject to special rules, including:

- ┐
dealers in securities;
- ┐
traders in securities that elect to use a mark-to-market method of accounting for their securities holdings;
- ┐
tax-exempt organizations;
- ┐
life insurance companies;
- ┐
U.S. pension funds;
- ┐
U.S. Regulated Investment Companies (RICs), Real Estate Investment Trusts (REITs), and Real Estate Mortgage Investment Conduits (REMICs);
- ┐
persons who are liable for the alternative minimum tax;
- ┐
persons that actually or constructively own 10% or more of the share capital or voting rights in TOTAL;
- ┐
persons that purchase or sell shares or ADSs as part of a wash sale for U.S. federal income tax purposes;
- ┐
persons that hold the shares or ADSs as part of a straddle or a hedging or conversion transaction; or
- ┐

persons whose functional currency is not the U.S. dollar.

If a partnership or other entity treated as a partnership for U.S. federal income tax purposes holds shares or ADSs, the tax treatment of a partner will generally depend upon the status of the partner and upon the activities of the partnership. Partners of a partnership holding these shares or ADSs should consult their tax advisors as to the tax consequences of owning or disposing of shares or ADSs, as applicable.

Under French law, specific rules apply to trusts, in particular specific tax and filing requirements as well as modifications to wealth, estate and gift taxes as they apply to trusts. Given the complex nature of these rules and the fact that their application varies depending on the status of the trust, the grantor, the beneficiary and the assets held in the trust, the following summary does not address the tax treatment of ADSs or shares held in a trust. If ADSs or shares are held in trust, the grantor, trustee and beneficiary are urged to consult their own tax advisor regarding the specific tax consequences of acquiring, owning and disposing of ADSs or shares.

In addition, the discussion below is limited to U.S. Holders that (i) are residents of the United States for purposes of the Treaty (as defined below), (ii) do not maintain a permanent establishment or fixed base in France to which the shares or ADSs are attributable and through which the respective U.S. Holders carry on, or have carried on, a business (or, if the holder is an individual, performs or has performed independent personal services), and (iii) are otherwise eligible for the benefits of the Treaty in respect of income and gain from the shares or ADSs (in particular, under the “Limitation on Benefits” provision of the Treaty). In addition, this section is based in part upon the representations of the Depositary and the assumption that each obligation in the Deposit Agreement and any related agreement will be performed in accordance with its terms.

This section is based on the Internal Revenue Code of 1986, as amended (“IRC”), its legislative history, existing and proposed regulations, published rulings and court decisions, and with respect to the description of the material French tax consequences, the laws of the Republic of France and French tax regulations, all as currently in effect, as well as on the Convention Between the United States and the Republic of France for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with respect to Taxes on Income and Capital dated August 31, 1994, as amended (the “Treaty”). These laws, regulations and the Treaty are subject to change, possibly on a retroactive basis.

In general, and taking into account the earlier assumptions, for U.S. federal income tax purposes, a U.S. Holder of ADRs evidencing ADSs will be treated as the owner of the shares represented by those ADRs. Exchanges of shares for ADRs, and ADRs for shares, generally will not be subject to U.S. federal income tax.

This discussion is intended only as a descriptive summary and does not purport to be a complete analysis or listing of all potential tax effects of the ownership or disposition of the shares and ADSs and is not intended to substitute competent professional advice. Individual situations of holders of shares and ADSs may vary from the description made below. The following summary does not address the French tax treatment applicable to dividends paid in so-called “Non Cooperative Countries and Territories” (“NCCT”) within the meaning of section 238-0 A of the French Tax Code (*Code général des impôts*). It does not apply to dividends paid to persons established or domiciled in such a NCCT, or paid to a bank account opened in a financial institution located in such a NCCT.

Holders are urged to consult their own tax advisors regarding the U.S. federal, state and local, and French and other tax consequences of owning and disposing shares or ADSs of TOTAL in their respective circumstances. In particular, a holder is encouraged to confirm with its advisor whether the holder is a U.S. Holder eligible for the benefits of the Treaty.

[Back to Contents](#)

10.5.2

Taxation of dividends

French taxation

The term “dividends” used in the following discussion means dividends within the meaning of the Treaty.

Until December 31, 2017, dividends paid to non-residents of France were in principle subject to a French withholding tax at a rate of 30%, regardless of whether they were paid in cash, in shares or a mix of both. Note that as of January 1, 2018, the French withholding tax is levied at a rate of 12.8% for dividends paid to U.S. Holders who are individuals, provided that applicable formalities are complied with in accordance with the administrative guidelines to be published by the French tax authorities, and at a rate of 30% for dividends paid to U.S. Holders that are legal entities (the “Legal Entities U.S. Holders”).

However, under the Treaty, a U.S. Holder is generally entitled to a reduced rate of French withholding tax of 15% with respect to dividends, provided that certain requirements are satisfied. As of January 1, 2018, this reduced rate would in practice only be of interest to Legal Entities U.S. Holders subject to the withholding tax at a rate of 30%.

Administrative guidelines (*Bulletin Officiel des Finances Publiques*, BOI-INT-DG-20-20-20-20-20120912) (the “Administrative Guidelines”) set forth the conditions under which the reduced French withholding tax at the rate of 15% may be available. The immediate application of the reduced 15% rate is available to those U.S. Holders that may benefit from the so-called “simplified procedure” (within the meaning of the Administrative Guidelines).

Under the “simplified procedure”, U.S. Holders may claim the immediate application of withholding tax at the rate of 15% on the dividends to be received by them, provided that:

(i)
they furnish to the U.S. financial institution managing their securities account a certificate of residence conforming with form No. 5000-FR. The immediate application of the 15% withholding tax will be available only if the certificate of residence is sent to the U.S. financial institution managing their securities account no later than the dividend payment date. Furthermore, each financial institution managing the U.S. Holders’ securities account must also send to the French paying agent the figure of the total amount of dividends to be received which are eligible to the reduced withholding tax rate before the dividend payment date; and

(ii)
the U.S. financial institution managing the U.S. Holder’s securities account provides to the French paying agent a list of the eligible U.S. Holders and other pieces of information set forth in the Administrative Guidelines. Furthermore, the financial institution managing the U.S. Holders’ securities account should certify that the U.S. Holder is, to the best of its knowledge, a United States resident within the meaning of the Treaty. These documents must be sent to the French paying agent within a time frame that will allow the French paying agent to file them no later than the end of the third month computed as from the end of the month of the dividend payment date.

Where the U.S. Holder’s identity and tax residence are known by the French paying agent, the latter may release such U.S. Holder from furnishing to (i) the financial institution managing its securities account, or (ii) as the case may be, the U.S. Internal Revenue Service (“IRS”), the abovementioned certificate of residence, and apply the 15% withholding tax rate to dividends it pays to such U.S. Holder.

For a U.S. Holder that is not entitled to the “simplified procedure” and whose identity and tax residence are not known by the paying agent at the time of the payment, the 30% French withholding tax will be levied at the time the

dividends are paid. Such U.S. Holder, however, may be entitled to a refund of the withholding tax in excess of the 15% rate under the “standard procedure”, as opposed to the “simplified procedure”, provided that the U.S. Holder furnishes to the French paying agent an application for refund on forms No. 5000-FR and 5001-FR (or any other relevant form to be issued by the French tax authorities) certified by the U.S. financial institution managing the U.S. Holder’s securities account (or, if not, by the competent U.S. tax authorities) before December 31 of the second year following the date of payment of the withholding tax at the 30% rate to the French tax authorities, according to the requirements provided by the Administrative Guidelines.

Copies of forms No. 5000-FR and 5001-FR (or any other relevant form to be issued by the French tax authorities) as well as the form of the certificate of residence and the U.S. financial institution certification, together with instructions, are available from the IRS and the French tax authorities.

These forms, together with instructions, are to be provided by the Depository to all U.S. Holders of ADRs registered with the Depository. The Depository is to use reasonable efforts to follow the procedures established by the French tax authorities for U.S. Holders to benefit from the immediate application of the 15% French withholding tax rate or, as the case may be, to recover the excess 15% French withholding tax initially withheld and deducted in respect of dividends distributed to them by TOTAL. To effect such benefit or recovery, the Depository shall advise such U.S. Holder to return the relevant forms to it, properly completed and executed. Upon receipt of the relevant forms properly completed and executed by such U.S. Holder, the Depository shall cause them to be filed with the appropriate French tax authorities, and upon receipt of any resulting remittance, the Depository shall distribute to the U.S. Holder entitled thereto, as soon as practicable, the proceeds thereof in U.S. dollars.

The identity and address of the French paying agent are available from TOTAL.

In addition, subject to certain specific filing obligations, there is no withholding tax on dividend payments made by French companies to:

(i) non-French collective investment funds formed under foreign law and established in a Member State of the European Union or in another State or territory, such as the United States, that has entered with France into an administrative assistance agreement for the purpose of combating fraud and tax evasion, and which fulfill the two following conditions: (a) the fund raises capital among a number of investors for the purpose of investing in accordance with a defined investment policy, in the interest of its investors, and (b) the fund has characteristics similar to those of collective investment funds organized under French law (*i.e.*, among others, open-end mutual fund (OPCVM), open-end real estate fund (OPCI) and closed-end investment companies (SICAF)); and

(ii) companies whose effective place of management is, or which have a permanent establishment receiving the dividends, in a Member State of the European Union or in another State or territory that has entered with France into an administrative assistance agreement for the purpose of combating fraud and tax evasion, such as the United States, that are in a loss-making position and subject, at the time of the distribution, to insolvency proceedings similar to the one set out in Article L. 640-1 of the French Commercial Code and that meet the other conditions set out in Article 119 *quinquies* of the French Tax Code as specified by the administrative guidelines n° BOI-RPPM-RCM-30-30-20-80-20160406.

[Back to Contents](#)

Collective investment funds and companies mentioned in (ii) above are urged to consult their own tax advisors to confirm whether they are eligible to such provisions and under which conditions.

U.S. taxation

For U.S. federal income tax purposes and subject to the passive foreign investment company rules discussed below, the gross amount of any dividend that a U.S. Holder must include in gross income equals the amount paid by TOTAL (*i.e.*, the net distribution received plus any tax withheld therefrom) to the extent of the current and accumulated earnings and profits of TOTAL (as determined for U.S. federal income tax purposes). Dividends paid to a non-corporate U.S. Holder that constitute qualified dividend income will be taxable to the holder at the preferential rates applicable to long-term capital gains provided that the shares or ADSs are held for more than sixty days during the 121-day period beginning sixty days before the ex-dividend date and the holder meets other holding period requirements. TOTAL believes that dividends paid by TOTAL with respect to its shares or ADSs will be qualified dividend income. The dividend will not be eligible for the dividends-received deduction allowed to a U.S. corporation under IRC section 243. The dividend is taxable to the U.S. Holder when the holder, in the case of shares, or the Depository, in the case of ADSs, receives the dividend, actually or constructively. Because TOTAL does not currently maintain calculations of earnings and profits for U.S. federal income tax purposes, a U.S. Holder of shares or ADSs of TOTAL should expect to treat distributions with respect to the shares or ADSs as dividends.

The amount of any dividend distribution includible in the income of a U.S. Holder equals the U.S. dollar value of the euro payment made, determined at the spot euro/dollar exchange rate on the date the dividend distribution is includible in the U.S. Holder's income, regardless of whether the payment is in fact converted into U.S. dollars. Any gain or loss resulting from currency exchange fluctuations during the period from the date the dividend payment is includible in the U.S. Holder's income to the date the payment is converted into U.S. dollars will generally be treated as ordinary income or loss and, for foreign tax credit limitation purposes, from sources within the United States and will not be eligible for the special tax rate applicable to qualified dividend income. **The U.S. federal income tax rules governing the availability and computation of foreign tax credits are complex. U.S. Holders should consult their own tax advisors concerning the implications of these rules in light of their particular circumstances.**

Subject to certain conditions and limitations, French taxes withheld in accordance with the Treaty and paid over to the French tax authorities will generally be eligible for credit against the U.S. Holder's U.S. federal income tax liability. The limitation on foreign taxes eligible for credit is calculated separately with respect to specific classes of income. In addition, special rules apply in determining the foreign tax credit limitation with respect to dividends that are subject to the preferential tax rates. To the extent a refund of the tax withheld is available to a U.S. Holder under French law or under the Treaty, the amount of tax withheld that is refundable will not be eligible for credit against such holder's U.S. federal income tax liability.

For this purpose, dividends distributed by TOTAL will generally constitute "passive income" for purposes of computing the foreign tax credit allowable to the U.S. Holder. Alternatively, a U.S. Holder may claim all foreign taxes paid as an itemized deduction in lieu of claiming a foreign tax credit.

If a U.S. Holder has the option to receive a distribution in shares (or ADSs) instead of cash, the distribution of shares (or ADSs) will be taxable as if the holder had received an amount equal to the fair market value of the distributed shares (or ADSs), and such holder's tax basis in the distributed shares (or ADSs) will be equal to such amount.

10.5.3

Taxation of disposition of shares

In general, a U.S. Holder will not be subject to French tax on any capital gain from the sale or exchange of the shares or ADSs or redemption of the underlying shares that the ADSs represent unless those shares or ADSs form part of a business property of a permanent establishment or fixed base that the U.S. Holder has in France. Special rules may apply to individuals who are residents of more than one country.

A financial transaction tax applies, under certain conditions, to the acquisition of shares of publicly traded companies registered in France having a market capitalization over €1 billion on December 1 of the year preceding the acquisition. A list of the companies within the scope of the financial transaction tax for 2018 is published in the French Guidelines *Bulletin Officiel des Finances Publiques*, BOI-ANNX-000467-20171221. TOTAL is included in this list. The tax also applies to the acquisition of ADRs evidencing ADSs. The financial transaction tax is due at a rate of 0.3% on the price paid to acquire the shares. The person or entity liable for the tax is generally the provider of investment services defined in Article L. 321-1 of the French Monetary and Financial Code (*prestataire de services d'investissement*). Investment service providers providing equivalent services outside France are subject to the tax under the same terms and conditions. Taxable transactions are broadly construed but several exceptions may apply. In general, non-income taxes, such as this financial transaction tax, paid by a U.S. Holder are not eligible for a foreign tax credit for U.S. federal income tax purposes. U.S. Holders should consult their own tax advisors as to the tax consequences and creditability of such financial transaction tax.

For U.S. federal income tax purposes and subject to the passive foreign investment company rules discussed below, a U.S. Holder generally will recognize capital gain or loss upon the sale or other disposition of shares or ADSs equal to the difference between the U.S. dollar value of the amount realized on the sale or disposition and the holder's tax basis, determined in U.S. dollars, in the shares or ADSs. The gain or loss generally will be U.S. source gain or loss and will be long-term capital gain or loss if the U.S. Holder's holding period of the shares or ADSs is more than one year at the time of the disposition. Long-term capital gain of a non-corporate U.S. Holder is generally taxed at preferential rates if specified minimum holding periods are met. The deductibility of capital losses is subject to limitation.

10.5.4

Passive foreign investment status

TOTAL believes that the shares or ADSs are not treated as stock of a passive foreign investment company ("PFIC") for U.S. federal income tax purposes, and TOTAL does not expect that it will be treated as a PFIC in the current or future taxable years. This conclusion is a factual determination that is made annually and thus is subject to change. If TOTAL is treated as a PFIC, gain realized on the sale or other disposition of the shares or ADSs would in general not be treated as capital gain. Instead, unless a U.S. Holder elects to be taxed annually on a mark-to-market basis with respect to the shares or ADSs, a U.S. Holder would be treated as if he or she had realized such gain and certain "excess distributions" ratably over the holding period for the shares or ADSs and would be taxed at the highest tax rate in effect for each such year to which the gain was allocated, in addition to an interest charge in respect of the tax attributable to each such year. With certain exceptions, a U.S. Holder's shares or ADSs will be treated as stock in a PFIC if TOTAL were a PFIC at any time during such holder's holding

[Back to Contents](#)

period in the shares or ADSs. Dividends paid will not be eligible for the preferential tax rates applicable to qualified dividend income if TOTAL is treated as a PFIC with respect to a U.S. Holder either in the taxable year of the distribution or the preceding taxable year, but instead will be taxable at rates applicable to ordinary income.

10.5.5

French estate and gift taxes

In general, a transfer of shares or ADSs by gift or by reason of the death of a U.S. Holder that would otherwise be subject to French gift or inheritance tax, respectively, will not be subject to such French tax by reason of the Convention between the United States of America and the French Republic for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with Respect to Taxes on Estates, Inheritances and Gifts, dated November 24, 1978, as amended, unless the donor or the transferor is domiciled in France at the time of making the gift, or at the time of his death, or if the shares or ADSs were used in, or held for use in, the conduct of a business through a permanent establishment or a fixed base in France.

10.5.6

French wealth tax

As of January 1, 2018, the French wealth tax was abolished. Until 2017, the French wealth tax did not apply to a U.S. Holder (i) that was not an individual, or (ii) in the case of individuals who were eligible for the benefits of the Treaty and who owned, alone or with related persons, directly or indirectly, TOTAL shares which gave right to less than 25% of TOTAL's earnings.

10.5.7

U.S. state and local taxes

In addition to U.S. federal income tax, U.S. Holders of shares or ADSs may be subject to U.S. state and local taxes with respect to their shares or ADSs. U.S. Holders should consult their own tax advisors.

10.6

Dividends and paying agents

The information set forth in point 6.2.2 ("Dividend payment") of chapter 6 of the 2017 Registration Document (on [page 215](#)) is incorporated herein by reference.

10.7

Statements by experts

The independent third-party report of DeGolyer and MacNaughton, a petroleum engineering consulting firm with address at 5001 Spring Valley Road, Suite 800 East, Dallas, Texas 75244, is attached as Exhibit 15.3 to this Form 20-F. This report provided TOTAL estimates of proved crude oil, condensate and natural gas reserves, as of December 31, 2017, of certain properties owned by PAO NOVATEK. As evidenced by Exhibit 15.4 to this Form 20-F, DeGolyer and MacNaughton has consented to the inclusion of their report in this Form 20-F.

10.8

Documents on display

TOTAL files annual, periodic, and other reports and information with the Securities and Exchange Commission. You may inspect any reports, statements or other information TOTAL files with the SEC at the SEC's public reference

rooms by calling the SEC for more information at 1-800-SEC-0330. All of TOTAL's SEC filings made after December 31, 2001, are available to the public at the SEC website at www.sec.gov and from certain commercial document retrieval services. You may also inspect any document the Company files with the SEC at the offices of The New York Stock Exchange, 20 Broad Street, New York, New York 10005.

ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Please refer to Notes 15.3 (starting on [page 312](#)) and 16.2 (on [page 322](#)) to the Consolidated Financial Statements in the 2017 Registration Document, which are incorporated herein by reference, for a qualitative and quantitative discussion of the Group's exposure to market risks. Please also refer to Notes 15.2 (starting on [page 308](#)) and 16 (starting on [page 319](#)) to the Consolidated Financial Statements in the 2017 Registration Document, which are incorporated herein by reference, for details of the different derivatives owned by the Group in these markets.

As part of its financing and cash management activities, the Group uses derivative instruments to manage its exposure to changes in interest rates and foreign exchange rates. These instruments are mainly interest rate and currency swaps. The Group may also occasionally use futures contracts and options. These operations and their accounting treatment are detailed in Notes 15.2 (starting on [page 308](#)) and 16 (starting on [page 319](#)) to the Consolidated Financial Statements in the 2017 Registration Document, which are incorporated herein by reference.

The financial performance of TOTAL is sensitive to a number of factors; the most significant being oil and gas prices, generally expressed in dollars, and exchange rates, in particular that of the dollar versus the euro. Generally, a rise in the price of crude oil has a positive effect on earnings as a result of an increase in revenues from oil and gas production. Conversely, a decline in crude oil prices reduces revenues. The impact of changes in crude oil prices on the activities of the Refining & Chemicals and Marketing & Services segments depends upon the speed at which the prices of finished products adjust to reflect these changes. All of the Group's activities are, to various degrees, sensitive to fluctuations in the dollar/euro exchange rate.

ITEM 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES

12.1

American depositary receipts fees and charges

JPMORGAN CHASE BANK, N.A., as depositary for the TOTAL S.A. ADR program, collects its fees for delivery and surrender of ADRs directly from investors depositing shares or surrendering ADRs for the purpose of withdrawal or from intermediaries acting for them. The depositary collects fees for making distributions to investors by deducting those fees from the amounts distributed or by selling a portion of distributable property to pay the fees. The depositary may generally refuse to provide fee-attracting services until its fees for those services are paid. A copy of the depositary agreement is attached as Exhibit (a) to the registration statement on Form F-6 (Reg. No. 333-199737) filed by the Company with the SEC on October 31, 2014.

Investors must pay:	For:
	–
	Issuance of ADRs, including issuances resulting from a distribution of shares or rights or other property, stocks splits or mergers
\$5.00 (or less) per 100 ADSs (or portion of 100 ADSs)	–
	Cancellation of ADRs for the purpose of withdrawal, including if the deposit agreement terminates
	–
A fee equivalent to the fee that would be payable if securities distributed to the investor had been shares and the shares had been deposited for issuance of ADSs	Distribution of securities distributed to holders of deposited securities that are distributed by the depositary to ADS registered holders
	–
Registration or transfer fees	Transfer and registration of shares on the Company’s share register to or from the name of the depositary or its agent when the investor deposits or withdraws shares
	–
	Cable, telex and facsimile transmissions (when expressly provided in the deposit agreement)
Expenses of the depositary	–
	Converting foreign currency to U.S. dollars
Taxes and other governmental charges the depositary or the custodian have to pay on any ADS or share underlying an ADS, for example, stock transfer taxes, stamp duty or withholding taxes	– As necessary
Any charges incurred by the depositary or its agents for servicing the deposited securities	– As necessary

The depositary has agreed to provide the Company with payments concerning, among other things, expenses incurred by the Company for the establishment and maintenance of the ADR program that include, but are not limited to, exchange listing fees, annual meeting expenses, standard out-of-pocket maintenance costs for the ADRs (*e.g.*, the expenses of postage and envelopes for mailing annual and interim financial reports, printing and distributing dividend checks, electronic filing of U.S. Federal tax information, mailing required tax forms, stationery, postage, facsimile, and telephone calls), shareholder identification, investor relations activities or programs in North America, accounting fees (such as external audit fees incurred in connection with the Sarbanes-Oxley Act, the preparation of the Company’s

Edgar Filing: TOTAL S.A. - Form 20-F

Form 20-F and paid to the FASB and the PCAOB), legal fees and other expenses incurred in connection with the preparation of regulatory filings and other documentation related to ongoing SEC, NYSE and U.S. securities law compliance. In certain instances, the depositary has agreed to make additional payments to the Company based on certain applicable performance indicators related to the ADR facility.

During fiscal year 2017, the Company received net payments of approximately \$6.6 million from the depositary.

Total - Form 20-F 2017 - 22

ITEM 13. DEFAULTS, DIVIDEND ARREARAGES AND DELINQUENCIES

None.

ITEM 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS

None.

ITEM 15. CONTROLS AND PROCEDURES

15.1

Disclosure controls and procedures

An evaluation was carried out under the supervision and with the participation of the Group's management, including the Chief Executive Officer and the Chief Financial Officer, of the effectiveness, as of the end of the period covered by this report, of the design and operation of the Group's disclosure controls and procedures, which are defined as those controls and procedures designed to ensure that information required to be disclosed in reports filed under the Securities Exchange Act of 1934, as amended, is recorded, summarized and reported within specified time periods. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can provide only reasonable assurance of achieving their control objectives. Based on this evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that the design and operation of these disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed in the reports that the Company files under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the applicable rules and forms, and that it is accumulated and communicated to management, including themselves, as appropriate to allow timely decisions regarding required disclosure.

15.2

Management's annual report on internal control over financial reporting

The Group's management is responsible for establishing and maintaining adequate internal control over financial reporting. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements and even when determined to be effective, can only provide reasonable assurance with respect to financial statement preparation and presentation. Also, the effectiveness of an internal control system may change over time.

The Group's management, including the Chief Executive Officer and the Chief Financial Officer, conducted an evaluation of the effectiveness of internal control over financial reporting using the criteria set forth in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). Based on the results of this evaluation, the Group's management concluded that its internal control over financial reporting was effective as of December 31, 2017.

The effectiveness of internal control over financial reporting as of December 31, 2017, was audited by ERNST & YOUNG Audit and KPMG Audit, a division of KPMG S.A., independent registered public accounting firms, as stated in their report included in Item 18 of this annual report.

15.3

Changes in internal control over financial reporting

There were no changes in the Group's internal control over financial reporting that occurred during the period covered by this report that have materially affected, or that were reasonably likely to materially affect, the Group's internal control over financial reporting.

15.4

Internal control and risk management procedures

For additional information, refer to points 3.3 and 3.5 of chapter 3 of the 2017 Registration Document (starting on pages 88 and 96, respectively), which are incorporated herein by reference.

ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT

Ms. Marie-Christine Coisne-Roquette is the Audit Committee financial expert. She is an independent member of the Board of Directors in accordance with the NYSE listing standards applicable to TOTAL.

ITEM 16B. CODE OF ETHICS

At its meeting on October 27, 2016, the Board of Directors adopted a revised code of ethics that applies to its Chief Executive Officer, Chief Financial Officer, Chief Accounting Officer and the financial and accounting officers for its principal activities. A copy of this code of ethics is included as an exhibit to this annual report.

Total - Form 20-F 2017 - 23

ITEM 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES

16C.1

Fees for accountants' services

The information set forth in point 4.4.5.2 of chapter 4 of the 2017 Registration Document (on [page 165](#)) is incorporated herein by reference.

16C.2

Audit Committee pre-approval policy

The Audit Committee has adopted an Audit and Non-Audit Services Pre-Approval Policy that sets forth the procedures and the conditions pursuant to which services proposed to be performed by the statutory auditors may be pre-approved and that are not prohibited by regulatory or other professional requirements. This policy provides for both pre-approval of certain types of services through the use of an annual budget approved by the Audit Committee for these types of services and special pre-approval of services by the Audit Committee on a case-by-case basis. The Audit Committee reviews on an annual basis the services provided by the statutory auditors. During 2017, no audit-related fees, tax fees or other non-audit fees were approved by the Audit Committee pursuant to the *de minimis* exception to the pre-approval requirement provided by paragraph (c)(7)(i)(C) of Rule 2-01 of Regulation S-X.

16C.3

Auditor's term of office

French law provides that the statutory and alternate auditors are appointed for renewable 6 fiscal-year terms. The terms of office of the current statutory auditors and the alternate auditors will expire at the end of the Annual Shareholders' Meeting called in 2022 to approve the financial statements for fiscal year 2021.

ITEM 16D. EXEMPTIONS FROM THE LISTING STANDARDS FOR AUDIT COMMITTEES

None.

(a)

The Annual Shareholders' Meeting of May 26, 2017, canceled and replaced the previous resolution from the Annual Shareholders' Meeting of May 24, 2016, authorizing the Board of Directors to trade in the Company's own shares on the market for a period of 18 months within the framework of the stock purchase program. The maximum number of shares that may be purchased by virtue of this authorization or under the previous authorization may not exceed 10% of the total number of shares constituting the share capital, this amount being periodically adjusted to take into account operations modifying the share capital after each shareholders' meeting. Under no circumstances may the total number of shares the Company holds, either directly or indirectly through its subsidiaries, exceed 10% of the share capital. This authorization will be renewed subject to the approval of the Annual Shareholders' Meeting of June 1, 2018 through the 5th resolution.

(b)

Based on 10% of the Company's share capital, and after deducting the shares held by the Company for cancellation and the shares held by the Company to cover the share purchase option plans for Company employees and restricted share grants for Company employees, as well as after deducting the shares held by the subsidiaries.

ITEM 16F. CHANGE IN REGISTRANT'S CERTIFYING ACCOUNTANT

Not applicable.

ITEM 16G. CORPORATE GOVERNANCE

This section presents a summary of significant differences between French corporate governance practices and the NYSE's corporate governance standards, as required by section 303A.11 of the NYSE Listed Company Manual.

16G.1

Overview

The following paragraphs provide a brief, general summary of significant ways in which our corporate governance practices differ from those required by the listing standards of the New York Stock Exchange ("NYSE") for U.S. companies that have common stock listed on the NYSE. While our management believes that our corporate governance practices are similar in many respects to those of U.S. domestic NYSE listed companies and provide investors with protections that are comparable in many respects to those established by the NYSE Listed Company Manual, certain significant differences are described below.

The principal sources of corporate governance standards in France are the French Commercial Code (*Code de commerce*), the French Financial and Monetary Code (*Code monétaire et financier*) and the regulations and recommendations provided by the French Financial Markets Authority (*Autorité des marchés financiers*, AMF), as well as a number of general recommendations and guidelines on corporate governance, most notably the Corporate Governance Code of Listed Corporations (the "AFEP-MEDEF Code") published by the two main French business confederations, the *Association Française des Entreprises Privées* (AFEP) and the *Mouvement des Entreprises de France* (MEDEF), the latest version of which was published in November 2016.

The AFEP-MEDEF Code includes, among other things, recommendations relating to the role and operation of the board of directors (creation, composition and evaluation of the board of directors and the audit, compensation and nominations committees) and the independence criteria for board members. Articles L. 820-1 *et seq.* of the French Commercial Code prohibits statutory auditors from providing certain non-audit services and defines certain criteria for the independence of statutory auditors. In France, the independence of statutory auditors is also monitored by an independent body, the High Council for statutory auditors (*Haut Conseil du Commissariat aux Comptes*).

For an overview of certain of our corporate governance policies, refer to points 4.1 and 4.2 of chapter 4 of the 2017 Registration Document (starting on [page 104](#)), which are incorporated herein by reference.

16G.2

Composition of Board of Directors; Independence

The NYSE listing standards provide that the board of directors of a U.S.-listed company must include a majority of independent directors and that the audit committee, the nominating/corporate governance committee and the compensation committee must be composed entirely of independent directors. A director qualifies as independent only if the board affirmatively determines that the director has no material relationship with the company, either directly or as a partner, shareholder or officer of an organization that has a relationship with the company. Furthermore, as discussed below, the listing standards require additional procedures in regards to the independence of directors who sit on the compensation committee. In addition, the listing standards enumerate a number of relationships that preclude independence.

French law does not contain any independence requirement for the members of the board of directors of a French company, except for the audit committee, as described below. The AFEP-MEDEF Code recommends, however, that (i) the independent directors should account for half of the members of the board of directors of widely-held corporations without controlling shareholders, and (ii) independent directors should account for at least one-third of board members in controlled companies. Members of the board representing employees and employee shareholders are not taken into account in calculating these percentages. The AFEP-MEDEF Code states that a director is independent when “he or she has no relationship of any kind whatsoever with the corporation, its group or the management that may interfere with his or her freedom of judgment. Accordingly, an independent director is understood to be any non-executive director of the corporation or the group who has no particular bonds of interest (significant shareholder, employee, other) with them.” The AFEP-MEDEF Code also enumerates specific criteria for determining independence, which are on the whole consistent with the goals of the NYSE listing standards, as recently amended, although the specific tests under the two standards may vary on some points.

As noted in the AFEP-MEDEF Code, “qualification as an independent director should be discussed by the appointments committee [...] and decided on by the board on the occasion of the appointment of a director, and annually for all directors.”

For an overview of the Company’s Board of Directors’ assessment of the independence of the Company’s Directors, including a description of the Board’s independence criteria, refer to point 4.1.1.4 of chapter 4 of the 2017 Registration Document (starting on [page 116](#)), which is incorporated herein by reference.

16G.3

Representation of women on corporate boards

The French Commercial Code provides for legally binding quotas to balance gender representation on boards of directors of French listed companies, requiring that each gender represent at least 40%. Directors representing the employees are not taken into account in calculating this percentage. When the board of directors consists of a maximum of eight members, the difference between the number of directors of each gender should not be higher than two. Any appointment of a director made in violation of these rules will be declared null and void and payment of the directors’ compensation will be suspended until the board composition is compliant with the required quota (the suspension of the directors’ compensation will also be disclosed in the management report). However, if a director whose appointment is null and void takes part in decisions of the board of directors, such decisions are not declared automatically null and void by virtue thereof. As of March 14, 2018, the Company’s Board of Directors had six male and six female members. Therefore, excluding the director representing employees in accordance with French law, the proportion of women on the Board was 45.5%.

[Back to Contents](#)

16G.4

Board committees

16G.4.1

Overview

The NYSE listing standards require that a U.S.-listed company have an audit committee, a nominating/corporate governance committee and a compensation committee. Each of these committees must consist solely of independent directors and must have a written charter that addresses certain matters specified in the listing standards. Furthermore, the listing standards require that, in addition to the independence criteria referenced above under “Composition of Board of Directors; Independence”, certain enumerated factors be taken into consideration when making a determination on the independence of directors on the compensation committee or when engaging advisors to the compensation committee.

With the exception of an audit committee, as described below, French law currently requires neither the establishment of board committees nor the adoption of written charters.

The AFEP-MEDEF Code recommends, however, that the board of directors sets up, in addition to the audit committee required by French law, a nominations committee and a compensation committee. The AFEP-MEDEF Code also recommends that at least two-thirds of the audit committee members and a majority of the members of each of the compensation committee and the nominations committee be independent directors. It is recommended that the chairman of the compensation committee be independent and that one of its members be an employee director. None of those three committees should include any Executive Officer⁽¹⁾.

TOTAL has established an Audit Committee, a Governance and Ethics Committee, a Compensation Committee and a Strategy & CSR Committee. As of March 14, 2018, the composition of these Committees was as follows:

- ↪ the Audit Committee had four members, 100% of whom have been deemed independent by the Board of Directors;
- ↪ the Governance and Ethics Committee had three members, 100% of whom have been deemed independent by the Board of Directors;
- ↪ the Compensation Committee had four members, 100% of whom have been deemed independent by the Board of Directors (according to point 8.3 of the AFEP-MEDEF Code, directors representing the employee shareholders and directors representing employees are not taken into account when determining this percentage); and
- ↪ the Strategy & CSR Committee had five members. With the exception of Mr. Pouyanné, who chairs the committee, all members of this Committee have been deemed independent by the Board of Directors.

For a description of the scope of each Committee’s activity and the independence assessment of each member, see point 4.1.2.3 of chapter 4 of the 2017 Registration Document (starting on [page 127](#)), which is incorporated herein by reference.

The NYSE listing standards also require that the audit, nominating/corporate governance and compensation committees of a U.S.-listed company be vested with decision-making powers on certain matters. Under French law,

however, those committees are advisory in nature and have no decision-making authority. Board committees are responsible for examining matters within the scope of their charter and making recommendations thereon to the board of directors. Under French law, the board of directors has the final decision-making authority.

16G.4.2

Audit Committee

The NYSE listing standards contain detailed requirements for the audit committees of U.S.-listed companies. Some, but not all, of these requirements also apply to non-U.S.-listed companies, such as TOTAL. French law and the AFEP-MEDEF Code share the NYSE listing standards' goal of establishing a system for overseeing the company's accounting process that is independent from management and that ensures auditor independence. As a result, they address similar topics, with some overlap.

Article L. 823-19 of the French Commercial Code requires the board of directors of companies listed in France to establish an audit committee, at least one member of which must be an independent director and must be competent in finance, accounting or statutory audit procedures. The AFEP-MEDEF Code provides that at least two-thirds of the directors on the audit committee be independent and that the audit committee should not include any Executive Officer. Under NYSE rules, in the absence of an applicable exemption, audit committees are required to satisfy the independence requirements under Rule 10A-3 of the Exchange Act. TOTAL's Audit Committee consists of three directors, all of whom meet the independence requirements under Rule 10A-3.

The duties of the Company's Audit Committee, in line with French law and the AFEP-MEDEF Code, are described in point 4.1.2.3 of chapter 4 of the 2017 Registration Document (starting on [page 127](#)), which is incorporated herein by reference. The Audit Committee regularly reports to the Board of Directors on the fulfillment of its tasks, the results of the financial statements certification process and the contribution of such process to guaranteeing the financial information's integrity.

One structural difference between the legal status of the audit committee of a U.S.-listed company and that of a French-listed company concerns the degree of the committee's involvement in managing the relationship between the company and the auditors. French law requires French companies that publish consolidated financial statements, such as TOTAL S.A., to have two co-statutory auditors. While the NYSE listing standards require that the audit committee of a U.S.-listed company have direct responsibility for the appointment, compensation, retention and oversight of the work of the auditor, French law provides that the election of the co-statutory auditors is the sole responsibility of the shareholders duly convened at a shareholders' meeting. In making their decision, the shareholders may rely on proposals submitted to them by the board of directors based on recommendations from the audit committee. The shareholders elect the statutory auditors for an audit period of six financial years. The statutory auditors may only be revoked by a court order and only on grounds of professional negligence or incapacity to perform their mission.

(1)

As defined by the AFEP-MEDEF Code, Executive Officers "include the Chairman and Chief Executive Officer, the Deputy chief executive officer(s) of public limited companies with a Board of Directors, the Chairman and members of the Management Board in public limited companies having a Management Board and Supervisory Board and the statutory managers of partnerships limited by shares".

[Back to Contents](#)

16G.5

Meetings of non-management directors

The NYSE listing standards require that the non-management directors of a U.S.-listed company meet at regularly scheduled executive sessions without management. French law does not contain such a requirement. The AFEP-MEDEF Code recommends, however, that a meeting not attended by the Executive Officers be organized each year.

Since December 16, 2015, the rules of procedure of the board of directors provide that, with the agreement of the Governance and Ethics Committee, the Lead Independent Director may hold meetings of the directors who do not hold executive or salaried positions on the Board of Directors. He or she reports to the Board of Directors on the conclusions of such meetings.

In December 2017, the Lead Independent Director held a meeting of the independent directors. She subsequently presented a summary of this meeting to the Board of Directors.

Thus, the Board of Directors' practice is in line with the recommendation made in the AFEP-MEDEF Code.

16G.6

Shareholder approval of compensation

Pursuant to the provisions of the French Commercial Code, as amended, the compensation of the chairman of the board of directors, the chief executive officer and, as the case may be, the deputy chief executive officer(s) in French listed companies shall each year be submitted to the approval of their shareholders. Articles L. 225-37-2 and L. 225-100 of the French Commercial Code provide respectively for an *ex ante* vote and an *ex post* vote:

–

ex ante vote: the shareholders shall each year approve the principles and criteria for determining, allocating and granting the fixed, variable and exceptional components making up the total compensation and the benefits of any kind, attributable to each of the abovementioned officers for the current fiscal year. In the event a resolution is rejected by the shareholders, the preceding already approved compensation policy for the concerned officer will be applicable; and

In the event a resolution is rejected by the shareholders, the variable and exceptional components of the compensation will not be paid to the relevant officer.

16G.7

Disclosure

The NYSE listing standards require U.S.-listed companies to adopt, and post on their websites, a set of corporate governance guidelines. The guidelines must address, among other things: director qualification standards, director responsibilities, director access to management and independent advisers, director compensation, director orientation and continuing education, management succession and an annual performance evaluation of the board. In addition, the chief executive officer of a U.S.-listed company must certify to the NYSE annually that he or she is not aware of any violations by the company of the NYSE's corporate governance listing standards.

French law requires neither the adoption of such guidelines nor the provision of such certification. The AFEP-MEDEF Code recommends, however, that the board of directors of a French-listed company review its operation annually and perform a formal evaluation at least once every three years, under the leadership of the appointments or nominations committee or an independent director, assisted by an external consultant. TOTAL's Board of Directors' most recent formal evaluation took place in early 2016. The AFEP-MEDEF Code also recommends that shareholders be informed of these evaluations each year in the annual report. In addition, Article L. 225-37 of the French Commercial Code requires the board of directors to present to the shareholders a corporate governance report appended to the management report, notably describing the composition of the board and the balanced representation of men and women on the board, the preparation and organization of the Board's work, as well as the offices and positions of each TOTAL Executive Officer and the compensation received by each such officer. The AFEP-MEDEF Code also includes ethical rules concerning which directors are expected to comply.

16G.8

Code of business conduct and ethics

The NYSE listing standards require each U.S.-listed company to adopt, and post on its website, a code of business conduct and ethics for its directors, officers and employees. There were no similar requirements applicable under French law in 2016. Article 17 of Law n° 2016/1691 of December 9, 2016, requires the top management (such as the chairman of the board or chief executive officer) of large French companies to adopt by June 1, 2017, a code of conduct proscribing the different types of behavior being likely to characterize acts of corruption, bribery or influence peddling, which code shall be included in the rules of procedure of the company and be submitted to employee representatives. Under the SEC's rules and regulations, all companies required to submit periodic reports to the SEC, including TOTAL, must disclose in their annual reports whether they have adopted a code of ethics for their principal executive officers and senior financial officers. In addition, they must file a copy of the code with the SEC, post the text of the code on their website or undertake to provide a copy upon request to any person without charge. There is significant, though not complete, overlap between the code of ethics required by the NYSE listing standards and the code of ethics for senior financial officers required by the SEC's rules. For a description of the code of ethics adopted by TOTAL, refer to point 3.3.2 of chapter 3 of the 2017 Registration Document (starting on [page 88](#)), which is incorporated herein by reference, and "[Item 16B. Code of ethics](#)".

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRMS ON THE CONSOLIDATED
FINANCIAL STATEMENTS

To the Shareholders and Board of Directors:

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of TOTAL S.A. and subsidiaries (“the Company”) as of December 31, 2017, 2016 and 2015, the related consolidated statements of income, comprehensive income, changes in shareholders’ equity, and cash flows for each of the years in the three year period ended December 31, 2017, and the related notes (collectively, “the consolidated financial statements”). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2017, 2016 and 2015, and the results of its operations and its cash flows for each of the years in the three year period ended December 31, 2017, in conformity with International Financial Reporting Standards as adopted by the European Union and in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company’s internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission”, and our report dated March 14, 2018 expressed an unqualified opinion on the effectiveness of the Company’s internal control over financial reporting.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are public accounting firms registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRMS ON THE INTERNAL CONTROL
OVER FINANCIAL REPORTING

Year ended December 31, 2017

To the Shareholders and Board of Directors,

Opinion on Internal Control Over Financial Reporting

We have audited TOTAL S.A. and subsidiaries' ("the Company") internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of December 31, 2017, 2016 and 2015, the related consolidated statements of income, comprehensive income, changes in shareholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2017 and the related notes (collectively, "the consolidated financial statements"), and our report dated March 14, 2018 expressed an unqualified opinion on those consolidated financial statements.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are public accounting firms registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.
