INSPIREMD, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

NOTE 1 - DESCRIPTION OF BUSINESS

a.

General

InspireMD, Inc., a Delaware corporation (the “Company”), together with its subsidiaries, is a medical device company focusing on the development and commercialization of its proprietary MicroNet™ stent platform technology for the treatment of complex coronary and vascular disease. MicroNet, a micron mesh sleeve, is wrapped over a stent to provide embolic protection in stenting procedures. The Company’s coronary products combining MicroNet and a bare-metal stent (MGuard Prime™ EPS) are marketed for use in patients with acute coronary syndromes, notably acute myocardial infarction (heart attack) and saphenous vein graft coronary interventions (bypass surgery). In October 2014, the Company launched a limited market release of its carotid embolic prevention system (CGuard™ EPS), which combines MicroNet and a self-expandable nitinol stent in a single device to treat carotid artery disease, using an over-the-wire delivery system. In January 2015, the Company received CE mark approval for the rapid exchange delivery system and fully launched CGuard in countries in Europe. The Company markets its products through distributors in international markets, mainly in Europe and Latin America.

b.

Liquidity

The Company has an accumulated deficit as of September 30, 2015, as well as net losses and negative operating cash flows in recent years. The Company expects to continue incurring losses and negative cash flows from operations until its products (primarily CGuard™) reach commercial profitability. As a result of these expected losses and negative cash flows from operations, along with the Company’s current cash position, the Company does not have sufficient resources to fund operations beyond the first half of 2016. Therefore, there is substantial doubt about the Company’s ability to continue as a going concern.

Management’s plans include the continued commercialization of their products and raising capital through the sale of additional equity securities, debt or capital inflows from strategic partnerships. There are no assurances however, that the Company will be successful in obtaining the level of financing needed for its operations. If the Company is unsuccessful in commercializing its products and raising capital, it may need to reduce activities, curtail or cease

operations.

These financial statements have been prepared assuming that the Company will continue as a going concern and do not include any adjustments that might result from the outcome of this uncertainty.

During the first quarter of 2015, the board of directors approved to curtail developing and promoting our bare metal stent platform and implementing another cost reduction/focused spending plan. The plan has four components: (i) reducing headcount; (ii) limiting the focus of clinical and development expenses to only carotid and neurovascular products; (iii) limiting sales and marketing expenses primarily to those related to the CGuard EPS stent launch; and (iv) reducing all other expenses (including conferences, travel, promotional expenses, executive cash salaries, director cash fees, rent, etc.).

NOTE 2 - BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements have been prepared on the same basis as the annual consolidated financial statements. In the opinion of management, the financial statements reflect all adjustments, which include only normal recurring adjustments, necessary to state fairly the financial position and results of operations of the Company. These consolidated financial statements and notes thereto are unaudited and should be read in conjunction with the Company's audited financial statements for the year ended December 31, 2014, as found in the Company's Annual Report on Form 10-K, filed with the Securities and Exchange Commission on March 12, 2015. The balance sheet for December 31, 2014 was derived from the Company's audited financial statements for the twelve months ended December 31, 2014. The results of operations for the nine months ended September 30, 2015 are not necessarily indicative of results that could be expected for the entire fiscal year.

INSPIREMD, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

NOTE 3 – RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

In April, 2015, the Financial Accounting Standards Board (“FASB”) issued guidance related to the presentation of Debt Issuance Costs. The new guidance requires debt issuance costs to be presented in the balance sheet as a direct deduction from the carrying value of the associated debt liability, consistent with the presentation of a debt discount. The new guidance does not affect the recognition and measurement of debt issuance costs. The new guidance is effective for financial statements issued for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. Early adoption is permitted for financial statements that have not been previously issued. The new guidance will be applied on a retrospective basis.

On July 9, 2015, the FASB approved a one-year deferral of the effective date of Accounting Standards Update No. 2014-09, Revenue from Contracts with Customers, such that it is effective beginning on or after December 15, 2017 for public entities. Reporting entities may choose to adopt the standard as of the original effective date.

On July 22, 2015, the FASB issued Accounting Standards Update 2015-11, Simplifying the Measurement of Inventory, which requires that inventory within the scope of the guidance be measured at the lower of cost and net realizable value. Inventory measured using last-in, first-out (LIFO) and the retail inventory method (RIM) are not impacted by the new guidance. The new guidance will be effective for public business entities in fiscal years beginning after December 15, 2016, including interim periods within those years. Prospective application is required. Early adoption is permitted as of the beginning of an interim or annual reporting period. The Company is currently evaluating the impact of the standard on its consolidated financial statements.

NOTE 4 - EQUITY:

a. During the nine months ended September 30, 2015, the Company granted stock options to employees and directors to purchase a total of 214,520 shares of the Company’s common stock. The options have exercise prices ranging

Edgar Filing: InspireMD, Inc. - Form 10-Q

from \$1.7 to \$8.3 per share, which were the fair market value of the Company's common stock on the date of each respective grant. Of the 214,520 options described above, 107,744 options are fully vested as of their grant date. The remaining options are subject to a three-year vesting period, with one-third of such awards vesting each year.

In calculating the fair value of the above options the Company used the following assumptions: dividend yield of 0%; expected term of 5-6.5 years; expected volatility of 62.68%-71.12%; and risk-free interest rate of 1.41%-1.71%.

The fair value of the above options, using the Black-Scholes option-pricing model, was approximately \$0.66 million.

During the nine months ended September 30, 2015, the Company granted a total of 132,353 restricted shares of the Company's common stock to employees, of which 43,300 restricted shares are subject to a one-year vesting period, 9,250 restricted shares are fully vested as of their grant date and are subject to a 6 month lock up period, 32,914 restricted shares are subject to a six-month vesting period and 46,889 restricted shares are subject to a three-year vesting period, with one-third of such awards vesting each year.

The fair value of the above restricted shares was approximately \$0.96 million.

INSPIREMD, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

On March 9, 2015, the Company sold 3,436,968 shares of its common stock and warrants to purchase 3,436,968 shares of common stock in a registered direct offering. Each purchaser received a warrant to purchase one share of common stock for each share of common stock that it purchased in the offering. The warrants, which are classified^{c.} as equity, have a term of exercise of 5 years from the date of issuance and an exercise price of \$5.50. This offering resulted in net proceeds to the Company of approximately \$12.4 million after deducting placement agent fees and other offering expenses.

On September 9, 2015, the stockholders approved the amendment of its Long Term Incentive Plan which was^{d.} adopted by our board of directors on July 16, 2015 to increase the total number of shares of common stock issuable under such plan by 470,000 shares.

On September 9, 2015, the stockholders approved the authorization of the board of directors, in its discretion, to amend the Amended and Restated Certificate of Incorporation of the Company to effect a reverse stock split of the^{e.} Company's common stock at a ratio of one-for-ten and to reduce the number of authorized shares of our common stock from 125 million shares to 50 million shares.

On September 30, 2015, the Company filed with the Secretary of State of Delaware a Certificate of Amendment to the Company's Amended and Restated Certificate of Incorporation to effect a one-for-ten reverse stock split of its common stock, par value \$0.0001 per share (the "Reverse Stock Split"), effective as of October 1, 2015, which^{f.} decreased the number of issued and outstanding shares of common stock and restricted shares of common stock from 78 million shares to 7.8 million shares. The Company's authorized common stock was decreased from 125 million shares to 50 million shares. All related share and per share data have been retroactively applied to the financial statements and their related notes for all periods presented.

NOTE 5- NET LOSS PER SHARE:

Basic and diluted net loss per share is computed by dividing the net loss for the period by the weighted average number of shares of common stock outstanding during the period. The calculation of diluted net loss per share excludes potential share issuances of common stock upon the exercise of share options, warrants, and restricted stocks as the effect is anti-dilutive.

The total number of shares of common stock related to outstanding options, warrants and restricted stock excluded from the calculations of diluted loss per share were 5,010,580 and 1,048,402 for the nine and three month periods ended September 30, 2015 and 2014, respectively.

NOTE 6 - FAIR VALUE MEASUREMENT:

The carrying amounts of financial instruments included in working capital approximate their fair value either because these amounts are presented at fair value or due to the relatively short-term maturities of such instruments. If measured at fair value in the financial statements, these financial instruments would be classified as Level 3 in the fair value hierarchy. As of September 30, 2015, the carrying amounts of financial instruments included in working capital approximate their fair value either because these amounts are presented at fair value or due to the relatively short-term maturities of such instruments. The fair value of the loan received on October 23, 2013 (the "Loan") approximated its carrying amount since it bears interest at rates that approximate current market rates.

As of September 30, 2015 and December 31, 2014, allowance for doubtful accounts was \$349,000 and 337,000, respectively.

INSPIREMD, INC.**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

NOTE 7 - INVENTORY:

	September 30, 2015	December 31, 2014
	(\$ in thousands)	
Finished goods	\$275	\$ 1,273
Work in process	529	326
Raw materials and supplies	277	325
	\$1,081	\$ 1,924

NOTE 8- IMPAIRMENT OF ROYALTIES BUYOUT

During the nine month period ended September 30, 2015 the Company recorded expenses related to the impairment of our royalties buyout asset amounting to \$576,000 due to anticipated lower sales of MGuard Prime in the future resulting from industry preferences for drug eluting stents. The expense is recorded under "Restructuring and impairment expenses" in the consolidated statements of operations.

NOTE 9 - ACCOUNTS PAYABLE AND ACCRUALS - OTHER:

	September 30, 2015	December 31, 2014
	(\$ in thousands)

Taxes payable	9	15
	\$2,403	\$ 3,576

NOTE 10 - RELATED PARTIES:

- During the nine month period ended September 30, 2015, the Company's chief executive officer was granted options to purchase 30,777 shares of common stock at an exercise price of \$7.2 per share, as well as 51,759 shares of restricted stock. Of the 51,759 shares of restricted stock, 31,250 were in lieu of salary as part of his amendment for his base salary to be paid 50% in cash payments with the remaining 50% to be paid in an equivalent amount of shares of restricted common stock. See Note 4.
- a.

- During the nine month period ended September 30, 2015, directors of the Company were granted options to purchase an aggregate of 138,542 shares of common stock at exercise prices ranging from \$1.7-\$7.8, of which, 107,744 were in lieu of cash compensation that was owed to them for their services as directors for the third and fourth quarters of 2014 and the first through third quarter of 2015. See Note 4a.
- b.

INSPIREMD, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

On June 29, 2015, the Company amended the employment agreement with the Company's CEO in order to, among other things, (i) modify the term of employment to end on June 30, 2016 unless earlier terminated by either party; and (ii) provide that, until the Company raises an aggregate of \$5 million from investors, the CEO will receive (A) with respect to his employment in 2015, 50% of his base salary in cash payments, with the remaining 50% having been paid to the CEO on January 26, 2015, through the issuance of 31,250 shares of restricted common stock of the Company valued at \$7.20 per share, representing the fair market value of the Company's common stock as of the market close on January 26, 2015, which will be subsequently adjusted based upon the volume-weighted average price of the Company's common stock during the calendar year ended December 31, 2015 (or during the period from January 2, 2015 through his termination date if his employment is terminated upon his death or disability, by the CEO for good reason, or by the Company without cause prior to December 31, 2015) to represent the equivalent of 50% of the CEO's base salary in 2015, and (B) with respect to his employment in 2016, 50% of his base salary from January 1, 2016 through June 30, 2016 to be paid in shares of restricted common stock of the Company valued at the fair market value of the Company's common stock as of the market close on January 2, 2016. The amendment also amends those certain provisions in the Employment Agreement related to payments on termination of employment.

With respect to the adjustment of the 31,250 shares of restricted common stock mentioned above, the Company determined, based on the provisions of ASC 718, that following the employee amendment, the related restricted stock compensation was classified from equity to a liability in the consolidated balance sheets and measured at fair value in the amount of \$83,000 and will subsequently be measured at fair value at each reporting period. As of September 30, 2015, the fair value of the liability is \$87,000.

NOTE 11 - COMMITMENT AND CONTINGENT LIABILITIES:

a.

Litigation

1) In July 2012, a purported assignee of options in InspireMD Ltd. submitted a statement of claim against the Company, InspireMD Ltd., and the Company's former CEO and President for a declaratory and enforcement order that it is entitled to options to purchase 8,364 shares of the Company's common stock at an exercise price of \$7.60 per share. In December 2014 the court accepted a motion to dismiss the former CEO and president from the lawsuit. On May 27, 2015 the Company and the assignee of options accepted a settlement agreement pursuant to which the

claim was removed and the plaintiff waived his entire claim against the Company, in consideration of the Company's consent to allow him to exercise 5,855 options of the Company's shares of common stock.

In December 2012, a former service provider of InspireMD GmbH filed a claim with the Labor Court in Buenos Aires, Argentina in the amount of \$193,378 plus interest (6% in dollars or 18.5% in pesos), social benefits, legal expenses and fees (25% of the award) against InspireMD Ltd. and InspireMD GmbH. The Company's management, after considering the views of its legal counsel as well as other factors, recorded a provision of \$250,000 in the financial statements for the quarter ended December 31, 2012. In March 2015, the interest rate made by the Court of Appeal in Argentina was increased retroactively, which resulted in the provision increasing to \$340,000. The related expense for the increase of \$90,000 was recorded to "General and administrative" within the Consolidated Statements of Operations. As of the date of approval the financial statements, the Company reached a verbal agreement with the plaintiff in the amount of \$80,000 plus \$16,000 for legal fees. The Company's management, after considering the views of its legal counsel, believes that it is highly probable that the district court will accept the settlement as described above, which resulted in the provision decreasing to \$100,000. The related decrease in provision amounting to \$240,000 was recorded to "General and administrative" within the Consolidated Statements of Operations.

INSPIREMD, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

The Company received written communication from a distributor to provide unspecified compensation for pre-paid goods subject to the voluntary field action. After considering the views of its legal counsel as well as other factors, ³⁾ the Company's management believes that a loss from any related future proceedings would range from a minimal amount up to 1,075,000 Euros and is reasonably possible.

b. Liens and pledges

The Company's obligations under the Loan (as defined in Note 6) were secured by Israeli security agreements and deposit account control agreements on all of the assets and properties of the Company and InspireMD Ltd., other than the intellectual property of the Company and InspireMD Ltd.

NOTE 12 - ENTITY WIDE DISCLOSURE:

The Company operates in one operating segment.

Disaggregated financial data is provided below as follows:

INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

September 30, 2015

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with the accompanying condensed consolidated financial statements and related notes included elsewhere in this Quarterly Report on Form 10-Q.

Unless the context requires otherwise, references in this Form 10-Q to the “Company,” “InspireMD,” “we,” “our” and “us” refer to InspireMD, Inc., a Delaware corporation, and its subsidiaries.

Forward-Looking Statements

This Quarterly Report on Form 10-Q contains “forward-looking statements,” which include information relating to future events, future financial performance, strategies, expectations, competitive environment and regulation. Words such as “may,” “should,” “could,” “would,” “predicts,” “potential,” “continue,” “expects,” “anticipates,” “future,” “intends,” “estimates,” and similar expressions, as well as statements in future tense, identify forward-looking statements. Forward-looking statements should not be read as a guarantee of future performance or results and will probably not be accurate indications of when such performance or results will be achieved. Forward-looking statements are based on information we have when those statements are made or our management’s good faith belief as of that time with respect to future events, and are subject to risks and uncertainties that could cause actual performance or results to differ materially from those expressed in or suggested by the forward-looking statements. Important factors that could cause such differences include, but are not limited to:

Edgar Filing: InspireMD, Inc. - Form 10-Q

our history of recurring losses and negative cash flows from operating activities, significant future commitments and the uncertainty regarding the adequacy of our liquidity to pursue our complete business objectives;

- market acceptance of our existing and new products;

- negative clinical trial results or lengthy product delays in key markets;

- an inability to secure and maintain regulatory approvals for the sale of our products;

our dependence on single suppliers for certain product components and our ability to comply with stringent manufacturing quality standards and to increase production as necessary;

intense competition in our industry, with competitors having substantially greater financial, technological, research and development, regulatory and clinical, manufacturing, marketing and sales, distribution and personnel resources than we do;

- entry of new competitors and products and potential technological obsolescence of our products;

- our limited manufacturing capabilities and reliance on subcontractors for assistance;

- loss of a key customer or supplier;

- technical problems with our research and products and potential product liability claims;

- product malfunctions;

adverse economic conditions;

- insufficient or inadequate reimbursement by governmental and other third party payers for our products;

our efforts to successfully obtain and maintain intellectual property protection covering our products, which may not be successful;

- legislative or regulatory reform of the healthcare system in both the U.S. and foreign jurisdictions;

the fact that we will need to raise additional capital to meet our business requirements in the future and that such capital raising may be costly, dilutive or difficult to obtain;

the fact that we conduct business in multiple foreign jurisdictions, exposing us to foreign currency exchange rate fluctuations, logistical and communications challenges, burdens and costs of compliance with foreign laws and political and economic instability in each jurisdiction;

- the escalation of hostilities in Israel, which could impair our ability to manufacture our products; and

- loss or retirement of key executives and research scientists.

For a discussion of these and other risks that relate to our business and investing in our common stock, you should carefully review the risks and uncertainties described under the heading “Part II – Item 1A. Risk Factors” and elsewhere in this Quarterly Report on Form 10-Q and in our Annual Report on Form 10-K for the twelve month period ended December 31, 2014, and those described from time to time in our future reports filed with the Securities and Exchange Commission. The forward-looking statements contained in this Quarterly Report on Form 10-Q are expressly qualified in their entirety by this cautionary statement. We do not undertake any obligation to publicly update any forward-looking statement to reflect events or circumstances after the date on which any such statement is made or to reflect the occurrence of unanticipated events.

Overview

We are a medical device company focusing on the development and commercialization of our proprietary MicroNet™ stent platform technology for the treatment of complex coronary and vascular disease. A stent is an expandable “scaffold-like” device, usually constructed of a metallic material, that is inserted into an artery to expand the inside passage and improve blood flow. Our MicroNet™, a micron mesh sleeve, is wrapped over a stent to provide embolic protection in stenting procedures. Our initial MGuard™ coronary products (MGuard™ and MGuard™ Prime Embolic

Protection Stent (“MGuard™ Prime EPS”)) are marketed for use in patients with acute coronary syndromes, notably acute myocardial infarction (heart attack) and saphenous vein graft coronary interventions (bypass surgery).

In October 2014, we launched a limited market release of our second product, CGuard™ carotid embolic prevention system (“CGuard™ EPS”) in certain European countries. CGuard™ EPS combines MicroNet™ and a self-expandable nitinol stent in a single device to treat carotid artery disease. In January 2015, we received CE mark approval for a rapid exchange delivery version of CGuard™ EPS and fully launched CGuard™ EPS in Europe.

We are also developing a pipeline of other products and additional applications by leveraging our MicroNet™ technology, including evaluating partnership proposals to advance our next generation coronary stent program with an existing drug eluting stent supplier, and new products to improve peripheral and neurovascular procedures.

Presently, none of our products may be sold or marketed in the U.S.

Recent Events

On September 30, 2015, we amended our certificate of incorporation in order to (i) effectuate a one-for-ten reverse stock split of our outstanding shares of common stock and (ii) reduce the number of authorized shares of our common stock from 125,000,000 to 50,000,000. All share and related option and warrant information presented in the following discussion and analysis of our financial condition and results of operations and the accompanying consolidated interim financial statements have been retroactively adjusted to reflect the reduced number of shares outstanding which resulted from this action.

During the first quarter of 2015, we decided to curtail developing and promoting our bare metal stent platform and implemented a cost reduction/focused spending plan. The plan has four components: (i) reducing headcount; (ii) continuing to limit the focus of clinical and development expenses to only carotid and neurovascular products; (iii) limiting sales and marketing expenses to those related to the CGuard™ EPS stent launch; and (iv) reducing all other expenses (including conferences, travel, promotional expenses, executive cash salaries, director cash fees, rent, etc.). In addition, we decided to alter our commercial strategy by using third party distributors to drive future sales, as opposed to direct sales to hospitals and clinics, which was previously our focus.

Critical Accounting Policies

A critical accounting policy is one that is both important to the portrayal of our financial condition and results of operation and requires management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain. Our critical accounting policies are more fully described in both (i) "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" and (ii) Note 2 of the Notes to the Consolidated Financial Statements included in the Annual Report on Form 10-K for the year ended December 31, 2014. There have not been any material changes to such critical accounting policies since December 31, 2014.

The currency of the primary economic environment in which our operations are conducted is the U.S. dollar ("\$" or "dollar"). Accordingly, our reporting currency is the dollar.

Contingencies

Our subsidiaries are involved in legal proceedings that arise from time to time in the ordinary course of business. We record accruals for these types of contingencies to the extent that we conclude the occurrence of such contingencies is probable and that the related liabilities are estimable. When accruing these costs, we recognize an accrual in the amount within a range of loss that is the best estimate within the range. When no amount within the range is a better estimate than any other amount, we accrue for the minimum amount within the range. Legal costs are expensed as incurred.

Results of Operations

Three months ended September 30, 2015 compared to the three months ended September 30, 2014

Revenues. For the three months ended September 30, 2015, revenue increased by \$0.3 million, or 131.1%, to \$0.6 million from \$0.3 million during the same period in 2014. This increase was predominantly driven by \$0.3 million of sales of our new carotid product, CGuard™ EPS, which we launched in October 2014. The sales of CGuard™ EPS during the three months ended September 30, 2015 were predominantly driven by initial sales to our new strategic distribution partner, Penumbra, Inc. Sales of MGuard™ Prime EPS, our coronary product remained relatively flat at \$0.3 million, of which, the sales volume increased by \$78,000, or 28.5% in the three months ended September 30, 2015, as compared to the same period in 2014. This increase in sales volume of MGuard™ Prime EPS was partially offset by a decrease of \$29,000, or 10.8%, of price decreases to distributors as well as the effects of the weakening of the Euro

against the U.S dollar.

With respect to regions, the increase in revenue was primarily attributable to an increase of \$0.4 million in revenue from our distributors in Europe, partially offset by a decrease of \$0.1 million in revenue from our distributors in the rest of the world.

Gross Profit (Loss). For the three months ended September 30, 2015, we had a gross profit (revenue less cost of revenues) of \$0.1 million, as compared to a gross loss of \$0.1 million during the same period in 2014, representing an improvement of 217.1% or \$0.2 million. This improvement in gross profit was attributable to an increase in revenues of \$0.3 million (see above for explanation) and a decrease of write-offs of inventory of MGuard™ Prime EPS of \$0.1 million. These improvements in gross profit, however, were partially offset by an increase in labor and material costs of \$0.3 million attributable to higher revenues. Gross margin (gross profits as a percentage of revenue) increased from (27.8)% in the three months ended September 30, 2014 to 14.1% in the same period in 2015.

Research and Development Expenses. For the three months ended September 30, 2015, research and development expenses decreased by 68.3%, or \$1.7 million, to \$0.8 million from \$2.5 million during the same period in 2014. This decrease in research and development expenses resulted primarily from a decrease of \$0.9 million in clinical trial expenses associated with our MASTER II trial, for which enrollment was suspended in October 2014, a decrease of \$0.3 million in clinical trial and development costs associated with CGuard™ EPS, which were predominantly related to our CARENET trial, for which enrollment was completed in 2014, and a decrease of \$0.3 million in miscellaneous expenses. The decreases in compensation and miscellaneous expenditures primarily resulted from our cost reduction/focused spending plan. Research and development expenses as a percentage of revenue decreased to 123.6% for the three months ended September 30, 2015, from 901.1% in the same period in 2014.

Selling and Marketing Expenses. For the three months ended September 30, 2015, selling and marketing expenses decreased by 67.4%, or \$1.2 million, to \$0.6 million, from \$1.8 million during the same period in 2014. This decrease in selling and marketing expenses resulted primarily from a decrease of \$0.9 million in compensation expenses, as we reduced our sales force in connection with a realignment of our commercial strategy to focus on using third party distributors for our products, a decrease of \$0.1 million in travel expenses associated with the decreased size of our sales force and a decrease of \$0.2 million in expenditures related to our participation in the Transcatheter Cardiovascular Therapeutics (TCT) conference in San Francisco, California, as part of our cost reduction/focused spending plan. Selling and marketing expenses as a percentage of revenue decreased to 93.0% in the three months ended September 30, 2015 from 661.5% in the same period in 2014.

General and Administrative Expenses. For the three months ended September 30, 2015, general and administrative expenses decreased by 19.9%, or \$0.4 million, to \$1.7 million, from \$2.1 million during the same period in 2014. The decrease in general and administrative expenses resulted primarily from a decrease of \$0.6 million in compensation expenses due to lower salaries as part of our cost reduction/focused spending plan and the lower value of ESOP grants made to our management and directors, partially offset by an increase in consulting expenses of \$0.2 million. General and administrative expenses as a percentage of revenue decreased to 271.0% in the three months ended September 30, 2015 from 783.5% in the same period in 2014.

Restructuring and impairment expenses. For the three months ended September 30, 2015, we incurred \$0.4 million of restructuring and impairment expenses, made up of \$260,000 of expenses related to the impairment of an MGuard™ Prime EPS royalty buyout option due to anticipated lower sales in the future due to the shift in industry preferences away from bare metal stents in favor of drug eluting stents, \$0.1 million associated with our early exit from a portion of our lease in our Boston offices and \$57,000 of cash payouts given to terminated employees in connection with our restructuring (as mentioned above). Restructuring and impairment expenses as a percentage of revenue was 66.1% for the three months ended September 30, 2015.

Financial Expenses. For the three months ended September 30, 2015, financial expenses decreased by 27.2% or \$0.1 million, to \$0.2 million, from \$0.3 million during the same period in 2014. The decrease in financial expenses resulted from a decrease of \$0.1 of interest expenses due to the reduction in principal of our outstanding indebtedness. Financial expenses as a percentage of revenue decreased to 36.1% in the three months ended September 30, 2015, from 114.7% in the same period in 2014.

Tax Expenses (Income). For the three months ended September 30, 2015 there was no material change in tax expenses (income) compared to the same period in 2014.

Net Loss. Our net loss decreased by \$3.2 million, or 46.3%, to \$3.6 million for the three months ended September 30, 2015 from \$6.8 million during the same period in 2014. The decrease in net loss resulted primarily from a decrease of \$2.9 million in operating expenses primarily associated with lower research and development and sales and marketing expenses related to our cost reduction/focused spending plan, an increase of \$0.2 million in gross profit (see above for explanation) and a decrease of \$0.1 million in financial expenses (see above for explanation).

Nine months ended September 30, 2015 compared to the nine months ended September 30, 2014

Revenues. For the nine months ended September 30, 2015, revenue decreased by \$0.1 million, or 7.9%, to \$1.8 million from \$1.9 million during the same period in 2014. This decrease was predominantly driven by a decrease in sales of MGuard™ Prime EPS of \$0.7 million, or 35.5% from \$1.9 million in the nine months ended September 30,

2014 to \$1.2 million in the same period in 2015. This decrease in sales of MGuard™ Prime EPS was predominantly driven by a decrease in sales volume of \$0.5 million, or 22.9% due to the trend of doctors increasingly using drug eluting stents rather than bare metal stents in STEMI patients, which impacted current sales. Price decreases to our distributors drove the remaining decrease of \$0.2 million, or 12.6% of MGuard™ Prime EPS, due to lower average sales prices received from distributor sales rather than direct sales to hospitals, as well as the effects of the weakening of the Euro against the U.S dollar. These decreases, however, were partially offset by \$0.5 million of sales of our new product CGuard™ EPS, which was launched in October 2014. The sales of CGuard™ EPS during the nine months ended September 30, 2015 included initial sales to our new strategic distribution partner, Penumbra, Inc. which commenced during the third quarter.

With respect to regions, the decrease in revenue was primarily attributable to a decrease of \$0.6 million in revenue from our distributors in the Middle East, partially offset by an increase of \$0.4 million in revenue from our distributors in Europe and \$0.1 million in revenue from our distributors in Latin America.

Gross Profit (Loss). For the nine months ended September 30, 2015, we had a gross loss (revenue less cost of revenues) of \$0.2 million, as compared to a gross profit of \$0.4 million during the same period in 2014, representing a decrease of 141.0%, or \$0.6 million. This decrease in gross profit was attributable to an increase in labor and material costs of \$0.4 million attributable to higher material and labor costs for CGuard™ EPS, an increase of write-offs of inventory of \$0.3 million, of which, \$0.2 million related to the write-offs of MGuard™ Prime EPS units due to expected lower sales in the future resulting from industry preferences for drug eluting stents (as mentioned above), and our transition to a third party distributor commercial strategy, as well as \$0.1 million in write-offs of CGuard™ EPS resulting from us transitioning to an RX delivery system from an over the wire platform, as well as an increase of \$0.2 million related to underutilization of our manufacturing resources and a decrease in revenues of \$0.1 million (see above for explanation). These increases, however, were partially offset by a decrease of \$0.4 million in costs associated with the VFA (as mentioned above). Gross margin (gross profits as a percentage of revenue) decreased from 20.0% in the nine months ended September 30, 2014 to (8.9)% in the same period in 2015. The decrease in gross margin of 28.9% was driven mainly by write-offs of inventory (see above for explanation), the change in product mix, including CGuard™ EPS, which has higher material and labor costs than MGuard™ Prime EPS, and a lower average sales price of MGuard™ Prime EPS due to the new commercial strategy built on using third party distributors.

Research and Development Expenses. For the nine months ended September 30, 2015, research and development expenses decreased by 61.5%, or \$4.6 million, to \$2.9 million from \$7.5 million during the same period in 2014. This decrease in research and development expenses resulted primarily from a decrease of \$3.0 million in clinical trial expenses associated with our MASTER II trial, a decrease of \$0.7 million in clinical trial and development costs associated with CGuard™ EPS, which were predominantly related to our CARENET trial, a decrease of \$0.5 million in salaries, a decrease of \$0.3 million of expenses related to our stent retention program, which we concluded in 2014 and a decrease of \$0.4 million in miscellaneous expenses. The decreases in salaries and miscellaneous expenditures resulted from our cost reduction/focused spending plan. These decreases were partially offset by an increase of \$0.3 million in share based compensation expenses primarily related to the hiring of our chief operating officer. Research and development expenses as a percentage of revenue decreased to 160.5% for the nine months ended September 30, 2015, from 384.2% in the same period in 2014.

Selling and Marketing Expenses. For the nine months ended September 30, 2015, selling and marketing expenses decreased by 48.3%, or \$2.4 million, to \$2.6 million, from \$5.0 million during the same period in 2014. This decrease in selling and marketing expenses resulted primarily from a decrease of \$1.4 million in salaries and \$0.2 million in share based compensation expenses due to our transition away from direct sales in favor of using third party distributors, a decrease of \$0.3 million in travel expenses associated with the decreased size of our sales force, a decrease of \$0.3 million in expenditures related to the Euro PCR Congress in Paris, France, incurred in the same period in 2014, and a decrease of \$0.2 million in expenditures related to our participation in the Transcatheter Cardiovascular Therapeutics (TCT) conference in San Francisco, California. The decrease in spending at the above-mentioned two conferences was a result of our cost reduction/focused spending plan. Selling and marketing expenses as a percentage of revenue decreased to 144.9% in the nine months ended September 30, 2015 from 258.2% in the same period in 2014.

General and Administrative Expenses. For the nine months ended September 30, 2015, general and administrative expenses decreased by 26.0%, or \$1.8 million, to \$5.3 million, from \$7.1 million during the same period in 2014. The decrease in general and administrative expenses resulted primarily from a decrease of \$1.8 million in compensation due to lower salaries as part of our cost reduction/focused spending plan and the lower value of ESOP grants made to our management and directors and a decrease of \$0.1 million in travel expenditures. These decreases were partially offset by an increase in miscellaneous expenses of \$0.1 million. General and administrative expenses as a percentage of revenue increased to 293.8% in the nine months ended September 30, 2015 from 365.8% in the same period in 2014.

Restructuring and impairment expenses. For the nine months ended September 30, 2015, we incurred \$1.0 million of restructuring and impairment expenses made up of \$0.6 million of expenses related to the impairment of an MGuard™ Prime EPS royalty buyout option due to anticipated lower sales in the future due to the shift in industry preferences away from bare metal stents in favor of drug eluting stents (as discussed above), \$0.2 million of cash payouts and \$0.1 million of restricted shares given to terminated employees in connection with our restructuring (as mentioned above) and \$0.1 million associated with our early exit from a portion of our lease in our Boston offices. Restructuring and impairment expenses as a percentage of revenue was 53.7% for the nine months ended September 30, 2015.

Financial Expenses. For the nine months ended September 30, 2015, financial expenses decreased by 18.6%, or \$0.2 million, to \$0.9 million from \$1.1 million during the same period in 2014. The decrease in financial expenses resulted from a decrease of \$0.2 of interest expenses due to the reduction in principal of our outstanding indebtedness. Financial expenses as a percentage of revenue decreased to 47.7% in the nine months ended September 30, 2015, from 54.0% in the same period in 2014.

Tax Expenses (Income). For the nine months ended September 30, 2015 there was no material change in tax expenses (income) compared to the same period in 2014.

Net Loss. Our net loss decreased by \$7.6 million, or 37.3%, to \$12.7 million for the nine months ended September 30, 2015 from \$20.3 million during the same period in 2014. The decrease in net loss resulted primarily from a decrease of \$7.9 million in operating expenses primarily associated with lower research and development expenses, due to our cost reduction/focused spending plan (see above for explanation), and a decrease of \$0.2 million in financial expenses, partially offset by a decrease of \$0.6 million in gross profit (see above for explanation).

Liquidity and Capital Resources

We had an accumulated deficit as of September 30, 2015, as well as net losses and negative operating cash flows in recent years. We expect to continue incurring losses and negative cash flows from operations until our products (primarily CGuard™) reach commercial profitability. As a result of these expected losses and negative cash flows from operations, along with our current cash position, we do not have sufficient resources to fund operations beyond the first half of 2016. Therefore, there is substantial doubt about our ability to continue as a going concern.

Our plans include the continued commercialization of our products and raising capital through the sale of additional equity securities, debt or capital inflows from strategic partnerships. There are no assurances, however, that we will be successful in obtaining the level of financing needed for our operations. If we are unsuccessful in commercializing our products and raising capital, we may need to reduce activities, curtail or cease operations.

Nine months ended September 30, 2015 compared to the nine months ended September 30, 2014

General. At September 30, 2015, we had cash and cash equivalents of \$6.5 million, as compared to \$6.3 million as of December 31, 2014. We have historically met our cash needs through a combination of issuing new shares, borrowing activities and product sales. Our cash requirements are generally for research and development, marketing and sales activities, finance and administrative cost, capital expenditures and general working capital.

Cash used in our operating activities was \$9.4 million for the nine months ended September 30, 2015 and \$14.3 million for the same period in 2014. The principal reason for the usage of cash in our operating activities for the nine months ended September 30, 2015 was a net loss of \$12.7 million, as well as an increase in working capital of \$0.2 million, offset by \$2.6 million in non-cash share based compensation that was largely paid to our directors and chief executive officer, \$0.6 million of non-cash expenses related to the impairment of our royalty buyout option (discussed above), \$0.2 million of non-cash financial expenses and \$0.2 million of depreciation and amortization expenses. The principal reasons for the usage of cash in our operating activities for the nine months ended September 30, 2014 was a net loss of \$20.3 million, offset by \$3.2 million in non-cash share-based compensation that was largely paid to our directors and chief executive officer, a decrease in working capital of \$2.3 million, \$0.3 million of non-cash financial expense and \$0.2 million of depreciation and amortization expenses.

Cash provided by our investing activities was \$9,000 during the nine months ended September 30, 2015, compared to \$67,000 of cash used by our investing activities during the same period in 2014.

Cash provided by financing activities for the nine months ended September 30, 2015 was \$9.6 million, compared to \$1.8 million during the same period in 2014. The principal source of the cash provided by financing activities during the nine months ended September 30, 2015 was the issuance of shares and warrants for approximately \$12.4 million of proceeds, offset by loan repayments of \$2.7 million and \$0.1 million of payments made by us in satisfaction of tax withholding obligations associated with the vesting of restricted stock held by some of our employees. The principal source of the cash provided by financing activities during the nine months ended September 30, 2014 relates to funds received from the issuance of shares for approximately \$2.2 million of proceeds, offset by loan repayments of \$0.3 million.

As of September 30, 2015, our current assets exceeded our current liabilities by a multiple of 1.1. Current assets decreased by \$0.8 million during the period and current liabilities decreased by \$0.9 million during the period. As a result, our working capital surplus increased by \$0.1 million to \$1.0 million at September 30, 2015.

Off Balance Sheet Arrangements

We have no off-balance sheet transactions, arrangements, obligations (including contingent obligations), or other relationships with unconsolidated entities or other persons that have, or may have, a material effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

Recent Accounting Pronouncements

In April, 2015, the Financial Accounting Standards Board (“FASB”) issued guidance related to the presentation of Debt Issuance Costs. The new guidance requires debt issuance costs to be presented in the balance sheet as a direct deduction from the carrying value of the associated debt liability, consistent with the presentation of a debt discount. The new guidance does not affect the recognition and measurement of debt issuance costs. The new guidance is effective for financial statements issued for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. Early adoption is permitted for financial statements that have not been previously issued. The new guidance will be applied on a retrospective basis.

On July 9, 2015, the FASB approved a one-year deferral of the effective date of Accounting Standards Update No. 2014-09, Revenue from Contracts with Customers, such that it is effective beginning on or after December 15, 2017 for public entities. Reporting entities may choose to adopt the standard as of the original effective date.

On July 22, 2015, the FASB issued Accounting Standards Update 2015-11, Simplifying the Measurement of Inventory, which requires that inventory within the scope of the guidance be measured at the lower of cost and net realizable value. Inventory measured using last-in, first-out (LIFO) and the retail inventory method (RIM) are not impacted by the new guidance. The new guidance will be effective for public business entities in fiscal years beginning after December 15, 2016, including interim periods within those years. Prospective application is required. Early adoption is permitted as of the beginning of an interim or annual reporting period. The Company is currently evaluating the impact of the standard on its consolidated financial statements.

Factors That May Affect Future Operations

We believe that our future operating results will continue to be subject to quarterly variations based upon a wide variety of factors, including the cyclical nature of the ordering patterns of our distributors, timing of regulatory approvals, the implementation of various phases of our clinical trials and manufacturing efficiencies due to the learning curve of utilizing new materials and equipment. Our operating results could also be impacted by a weakening of the Euro and strengthening of the New Israeli Shekel, or NIS, both against the U.S. dollar. Lastly, other economic conditions we cannot foresee may affect customer demand, such as individual country reimbursement policies pertaining to our products. For a discussion of these and other risks that relate to our business, you should carefully review the risks and uncertainties described under the heading “Part II – Item 1A. Risk Factors” and elsewhere in this

Edgar Filing: InspireMD, Inc. - Form 10-Q

Quarterly Report on Form 10-Q and in our Annual Report on Form 10-K for the twelve month period ended December 31, 2014, and those described from time to time in our future reports filed with the Securities and Exchange Commission.

Contractual Obligations and Commitments

During the nine months ended September 30, 2015, there were no material changes to our contractual obligations and commitments.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Our market risk profile as of September 30, 2015 has not significantly changed since December 31, 2014. Our market risk profile as of December 31, 2014 is disclosed in our Annual Report on Form 10-K.

Item 4. Controls and Procedures

Management's Conclusions Regarding Effectiveness of Disclosure Controls and Procedures

As of September 30, 2015, we conducted an evaluation, under the supervision and participation of management including our chief executive officer and chief financial officer, of the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) and Rule 15d-15(e) of the Securities Exchange Act of 1934, as amended). There are inherent limitations to the effectiveness of any system of disclosure controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives.

Based upon this evaluation, our chief executive officer and chief financial officer concluded that our disclosure controls and procedures are effective at the reasonable assurance level as of September 30, 2015.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting during the fiscal quarter ended September 30, 2015 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

From time to time, we may be involved in litigation that arises through the normal course of business. As of the date of this filing, we are not aware of any material legal proceedings to which we or any of our subsidiaries is a party or to which any of our property is subject, nor are we aware of any such threatened or pending litigation or any such proceedings known to be contemplated by governmental authorities.

We are not aware of any material proceedings in which any of our directors, officers or affiliates or any registered or beneficial stockholder of more than 5% of our common stock, or any associate of any of the foregoing, is a party adverse to or has a material interest adverse to, us or any of our subsidiaries.

Item 1A. Risk Factors

During the fiscal quarter ended September 30, 2015, there were no material changes to the risk factors disclosed in our Annual Report on Form 10-K for the year ended December 31, 2014, except for the following:

Risks Related to Our Business

Our financial statements for the nine months ended September 30, 2015 contain an explanatory paragraph in the footnotes that expresses substantial doubt as to our ability to continue as a going concern, which could prevent us from obtaining new financing on reasonable terms or at all.

Because we have had recurring losses and negative cash flows from operating activities and have significant future commitments, substantial doubt exists regarding our ability to continue as a going concern. Such doubts regarding our ability to continue as a going concern may adversely affect our ability to obtain new financing on reasonable terms or at all.

Risks Related to Our Organization and Our Common Stock

Our common stock could be delisted from the NYSE MKT if we fail to regain compliance with the NYSE MKT's continued listing standards on the schedule required by the NYSE MKT.

On January 20, 2015, we received a notice indicating that we do not meet certain of the NYSE MKT's continued listing standards as set forth in Part 10 of the NYSE MKT Company Guide ("Company Guide"). Specifically, we were not in compliance with Section 1003(a)(iii) of the Company Guide because we reported stockholders' equity of less than \$6 million as of September 30, 2014 and had net losses in our five most recent fiscal years. In addition, the NYSE MKT indicated that we were not in compliance with Section 1003(a)(iv) of the Company Guide because we had sustained losses that are substantial in relation to our overall operations or our then-existing financial resources, or our financial condition had become impaired such that it appeared questionable, in the opinion of the NYSE MKT, as to whether we would be able to continue operations and/or meet our obligations as they matured. As a result, we have become subject to the procedures and requirements of Section 1009 of the Company Guide.

In order to maintain our listing on the Exchange, we submitted a plan of compliance to the NYSE MKT on February 19, 2015 addressing how we intend to regain compliance with Section 1003(a)(iii) of the Company Guide by July 20, 2016 and Section 1003(a)(iv) of the Company Guide by June 1, 2015. On March 9, 2015, we closed a public offering of our common stock and warrants that resulted in net proceeds of approximately \$12.4 million after deducting placement agent fees and other estimated offering expenses. In light of this, the NYSE MKT determined that we have resolved the continued listing deficiency with respect to Section 1003(a)(iv) of the Company Guide. In addition, the NYSE MKT has accepted our plan to gain compliance with the Section 1003(a)(iii) of the Company Guide by July 20, 2016.

If we do not regain compliance with Section 1003(a)(iii) of the Company Guide by July 20, 2016, or if we do not maintain our progress consistent with the plan during the applicable plan period, the NYSE MKT will initiate delisting proceedings. The market price and liquidity of our common stock could be adversely affected by the commencement of such proceedings. If those proceedings resulted in delisting of our common stock and resulting cessation of trading of the stock on the NYSE MKT, we believe that the market price and liquidity of our common stock would be adversely affected.

Item 5. Other Information

Not applicable

Item 6. Exhibits
