Consolidated Ratio of Earnings to Fixed Charges

The information contained in the Prospectus under the caption "Consolidated Ratio of Earnings to Fixed Charges" is hereby amended in its entirety, as follows:

Year Ended December 31,

Three  
Months

						<u>Ended</u>
	<u>2004</u>	<u>2005</u>	<u>2006</u>	<u>2007</u>	<u>2008</u>	<u>March 31,</u> <u>2009</u>
	1.82	1.66	1.63	1.56	1.24	0.97

For purposes of computing the consolidated ratio of earnings to fixed charges, earnings consist of net earnings adjusted for the provision for income taxes, noncontrolling interests, discontinued operations and undistributed earnings of equity investees.

Fixed charges consist of interest and discount on all indebtedness and one-third of rentals, which is considered to be representative of the interest factor of such rentals.

As set forth above, GE Capitals ratio of earnings to fixed charges declined to 0.97:1 in the first quarter of 2009 due to lower pre-tax earnings which were primarily driven by higher provisions for losses on financing receivables in connection with the challenging economic environment. As of March 31, 2009, the amount of earnings needed to achieve a one-to-one ratio of earnings to fixed charges was \$154 million. General Electric Company made a \$9.5 billion capital contribution to General Electric Capital Services, Inc. in the first quarter of 2009 (of which \$8.8 billion was further contributed to GE Capital through capital contribution and share issuance) to improve tangible capital and reduce leverage and General Electric Company does not anticipate additional contributions in 2009.
