AMR TRIMS CAPACITY AS SLUGGISH U.S. ECONOMY AND HIGH
FUEL PRICES COMBINE TO PRODUCE SECOND QUARTER LOSS

FORT WORTH, Texas - AMR Corp., the parent company of American Airlines, Inc. and TWA Airlines, LLC, said today that it expects a second quarter loss in excess of \$100 million as it continues to feel the effects of a sluggish U.S. economy and high fuel prices. The company also said if current conditions persist it anticipates a loss for the full year 2001.

Edgar Filing: AMERICAN AIRLINES INC - Form 8-K

"The softening U.S. economy has driven a sharp reduction in demand for business travel," said Tom Horton, AMR's senior vice president and chief financial officer. "At the same time, fuel prices remain persistently high. We don't foresee a near-term recovery in demand so we expect the balance of the year to be very challenging."

In response to industry conditions, AMR will retire 22 aircraft, including TWA LLC's entire fleet of 19 DC-9s. These aircraft, originally scheduled to leave the fleet over the course of the next three years, will now be retired by the first quarter of 2002.

Horton noted this action will begin to affect the second half of 2001 and will decrease full year 2002 capacity by approximately one percent, better matching supply with demand. In addition, by retiring the TWA LLC DC-9 fleet, AMR will avoid the capital costs associated with making the aircraft compatible with the rest of American's fleet and the cost inefficiencies of operating a small fleet.

Although TWA LLC operates the DC-9s on routes to and from its St. Louis hub, the capacity reduction driven by the retirement of these aircraft will be rationalized across AMR's entire network. Total departures at St. Louis will, in fact, grow modestly year-over-year in 2002.

"The St. Louis hub was one of the key assets we acquired from TWA and a strong St. Louis hub continues to be one of the cornerstones of our network strategy," Horton said.

This capacity action is in addition to American's other recent schedule adjustments, which included the announcement of suspension of service in the Los Angeles-Paris and Chicago-Rome markets.

American, which is the world's largest airline and one of the financially strongest, said it expects that these steps will fortify the airline for the future. "In this environment, capacity restraint combined with rigorous cost and capital spending controls are the right steps to take to preserve our financial strength," said Horton.

In a separate development, AMR will take an after-tax charge of approximately \$425 million in the second quarter to write down American's fleet of Fokker 100 aircraft and American Eagle's fleets of ATR-42 and Saab 340B turboprop aircraft, in accordance with SFAS 121, "Accounting for the Impairment of Long-Lived Assets".

American Airlines operates a fleet of 724 aircraft and American Eagle, its regional affiliate, operates 272 turboprop and regional jet aircraft. TWA LLC operates 179 aircraft. The three airlines serve nearly 250 cities.

Statements in this news release contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Act of 1934, as amended, which represent the Company's expectations or beliefs concerning future events. When used in this release, the words "expects," "anticipates," and similar expressions are intended to identify forward-looking statements. All forward-

looking statements in this release are based upon information available to the Company on the date of this release. The Company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Forward-looking statements are subject to a number of factors that could cause actual results to differ materially from our expectations. These factors include: general economic conditions, commodity prices, and the ability to successfully integrate TWA Airlines LLC's operations into American Airlines. Additional information concerning these and other factors is contained in the Company's Securities and Exchange Commission filings, including but not limited to the Form 10-K for the year ended Dec. 31, 2000.
