NEWS RELEASE

INDEPENDENCE HOLDING COMPANY ANNOUNCES 2005

FOURTH QUARTER AND ANNUAL RESULTS

Stamford, Connecticut, March 16, 2006. Independence Holding Company (NYSE: IHC) today reported 2005 fourth quarter and annual results.

Financial Results

Revenues increased 48% to \$83,327,000 for the three months ended December 31, 2005 compared to revenues of \$56,451,000 for the three months ended December 31, 2004 primarily as a result of an increase in net premiums arising from the Company's new Fully Insured Health (formerly Strategic Health) segment and an increase in net retained premiums in the Medical Stop-Loss segment. Net income amounted to \$895,000, or \$.06 per share, diluted, for the three months ended December 31, 2005 compared to \$6,343,000, or \$.44 per share, diluted, for the three months ended December 31, 2004, a decrease of 86% per share, principally related to higher losses on the Medical Stop-Loss segment.

Revenues increased 31% to \$296,417,000 for the year ended December 31, 2005 compared to revenues of \$225,669,000 for the year ended December 31, 2004. Net income decreased 25% to \$17,301,000, or \$1.21 per share, diluted, for the year ended December 31, 2005 from \$22,939,000, or \$1.60 per share, diluted, for the year ended

December 31, 2004.

Chief Executive Officer's Comments

Roy T.K. Thung, Chief Executive Officer, commented, "Our 2005 fourth quarter and, as a result, our full year did not meet our expectations. We are confident, however, that results will significantly improve for the 2006 year as compared to the 2005 year. Our investment yield for 2005 was 5.1% as compared to 6.2% for 2004, a reduction of 1.1% on average investable assets of approximately \$800 million. In addition, the Company strengthened reserves by over \$6 million in the 2005 fourth quarter, relating primarily to Medical Stop-Loss business incepting in 2004 and to a much lesser extent business incepting in 2005. Even with the additional reserves, the Company recorded a net loss ratio (i.e. insurance benefits, claims and reserves divided by (premiums earned less underwriting expenses)) on the Medical Stop-Loss business of 93.2% for the twelve month period ended December 31, 2005; the net loss ratio for the year ended December 31, 2004 was 86.6%. Based on currently available information, business incepting in 2005, of which a material portion will be earned and recorded in 2006, is projected to achieve a net loss ratio that is lower than the previous year. The higher net loss ratio for business incepting in 2004 was principally a result of: (i) the soft Medical Stop-Loss market continuing longer than anticipated; (ii) deviations from underwriting guidelines and disclosure protocols as a result of the soft market, which were identified and rectified by the Company in underwriting audits; and (iii) an unanticipated continuation of historically high inpatient hospital cost trends. The Company has taken corrective action with respect to the deviations and increased pricing in response to these higher cost trends. In late 2005, IHC appointed three new MGUs that are expected to add substantial premium in 2006.

Mr. Thung added, "Beginning in late 2004, we dedicated ourselves to diversifying IHC by creating a new line of business to complement our core Medical Stop-Loss line. We sought to enter a line

of business with great potential for growth, one in which we had expertise, and one that would be less volatile and less cyclical than excess insurance. We chose Fully-Insured Health insurance. Not only did it fit well with our core competencies, but it is a \$500 billion market, and tends to have profit margins within a narrower band than medical stop-loss insurance. Since January 2005, IHC has acquired (i) HPA, a specialist in short-term medical products; (ii) GroupLink, an experienced dental marketer and administrator; (iii) IAC, a leading administrator, manager and distributor of Consumer Driven Health Plans (CDHPs) with approximately \$220 million of individual and group health and life premiums and premium-equivalents and \$26 million of reported revenues in 2005; (iv) a \$50 million block of group major medical (including CDHPs) and has entered into a definitive agreement, subject to certain closing conditions, to acquire another \$50 million block of similar business; and (v) 100% of a health insurance marketing organization. We have also entered into agency relationships with a marketing organization which currently has a block of \$45 million of limited medical and, through American Independence Corp. (NASDAQ: AMIC), another marketing organization with a block of \$35 million of group major medical and medical stop-loss business. Through these acquisitions, IHC actively distributes its products through over 50,000 general agents, agents and brokers in the majority of states. We believe that this will be one of the largest networks of independent general agents, agents and brokers in the country selling a full range of health products (including CDHPs, short-term medical, limited medical, dental and vision).

In summary, Mr. Thung stated, We believe our 2006 year will be significantly improved over 2005, primarily as a result of: (i) gains in our Medical Stop-Loss line due to lower net loss ratios and increased block size; (ii) expansion of our Fully-Insured Health segment with continuing profitability; and (iii) continuing contributions from our block acquisition group, including a full year's benefit from the acquisitions done in mid-to-late 2005.

IHC increased its ownership of the common stock of AMIC by 8% to 48% during the year ended December 31, 2005. IHC's ownership of AMIC is accounted for on the equity method and had a carrying value, including goodwill, of \$43,637,000 (4.1 million shares) at December 31, 2005. AMIC's results for the 2005 fourth quarter and year were positively impacted by a further reduction of the valuation allowance primarily related to its federal net operating loss carryforward (NOL) deferred tax asset. This reduction increased AMIC's net income and income from continuing operations by \$2.1 million, but did not affect IHC's net income or net income from operations. Rather, in accordance with GAAP, IHC accounted for its share of the deferred tax benefit, amounting to \$1.0 million, as a reduction of its goodwill. After such reduction, the goodwill relating to AMIC amounts to \$4.5 million. IHC's interest in AMIC's earnings is burdened twice: (i) by a non-cash provision for taxes recorded by AMIC and (ii) by a deferred tax charge at the IHC level. This burden amounted to \$1,294,000 and \$2,124,000 for the year ended December 31 2005 and 2004, respectively.

About Independence Holding Company

IHC is a holding company principally engaged in the life and health insurance business and the acquisition of blocks of policies through its insurance company subsidiaries (Standard Security Life Insurance Company of New York and Madison National Life Insurance Company, Inc.), its affiliate (AMIC), and its managing general underwriters, third party administrators, and marketing affiliates. Standard Security Life markets medical stop-loss, long-term and short-term disability, employer-sponsored group major medical, short-term medical, group life, dental, vision and managed health care products. Madison Life sells group life and disability, employer medical stop-loss, employer-sponsored group major medical, short-term medical, dental, vision, credit life and disability and individual

life insurance. AMIC is a holding company principally engaged in the insurance and reinsurance business through Independence American Insurance Company and its managing general underwriter division.

Some of the statements included herein may be considered to be forward looking statements which are subject to certain risks and uncertainties. Factors which could cause the actual results to differ materially from those suggested by such statements are described from time to time in IHC's filings with the Securities and Exchange Commission.
