- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

ITEM 8.01 - OTHER EVENTS

## Edgar Filing: SONEX RESEARCH INC - Form 8-K

On September 27, 2006, the Registrant posted the following announcement on its website ([www.sonexresearch.com](http://www.sonexresearch.com)):

### SONEX FILES MOTION TO DISMISS AMENDED INVESTOR LAWSUIT

ANNAPOLIS, MARYLAND, September 27, 2006 - SONEX RESEARCH, INC. (OTC SONX) announced that it is seeking dismissal of an amended federal lawsuit filed in August 2006 by a group of Pennsylvania investors. Their original lawsuit was dismissed in July 2006 by the U.S. District Court for the Eastern District of Pennsylvania for failure to meet the legal standard for bringing a valid complaint under applicable federal and state securities laws. Last week Sonex filed a Motion to Dismiss the refiled lawsuit for failure again to state claims for relief as a matter of law.

The original Complaint was filed in February 2005 by Bruce W. Majer of Plymouth Meeting, PA, Allen W. Fortna of Whitehall, PA, and the Hermitage Partnership of Philadelphia, PA (together, referred to as the "Investors"). The Complaint was an action for federal and state securities fraud, common law fraud, and related claims by the Investors who believe they were induced to purchase securities based on a series of alleged misstatements, misrepresentations and omissions, and was filed against Sonex, its former President, CEO and director Roger D. Posey, former director Jim Z.I. Williams, current CFO, Secretary and director George E. Ponticas, and Dr. Andrew A. Pouring, current Sonex Chairman of the Board, CEO and President. The Investors sought the return of \$175,000 in equity investments made in Sonex during 2004. Sonex notes that Mr. Majer is a former colleague of Mr. Posey.

In March 2005 Sonex filed its Motion to Dismiss the Complaint for failure to state a cognizable claim as a matter of law, which motion was granted by the Court on July 19, 2006. The Plaintiffs had 30 days to file an Amended Complaint.

The Amended Complaint restates the claims of the original lawsuit, cites additional examples of alleged misrepresentations, and makes several allegations concerning the involvement of former Sonex consultant James A. Rose, II, of Arnold, Maryland, president of Global Equity Consultants, Inc. ("GECI"), contending that Mr. Rose had authority to act on behalf of Sonex and his alleged misrepresentations, in part, induced the Plaintiffs to invest. Despite such allegations, the Amended Complaint does not name Mr. Rose or GECI as defendants. Mr. Rose introduced Mr. Posey to Sonex and was then engaged by the Company in February 2004 to provide financial advisory and other consulting services. As described in previous news releases, the Company is currently engaged in litigation with Mr. Rose.

It is the opinion of management that the Plaintiffs have attempted to orchestrate a securities fraud claim to escape what they had come to perceive as a downside investment. Like the original Complaint, Plaintiffs' Amended Complaint collapses under the weight of the total mix of information and cautionary statements available at the time of their investment. Moreover, while the Amended Complaint contains admittedly more detail than the original Complaint, the additional facts alleged still do not adequately plead intent to deceive or loss causation for purposes of the applicable federal and state securities laws.

Management believes that the Company will prevail again as it did when the original lawsuit was dismissed. It is anticipated that the Court will decide this motion prior to issuing any order concerning discovery on the merits of the allegations of the Complaint.

### About Sonex

Sonex Research, Inc., a leader in the field of combustion technology, is developing its patented Sonex Combustion System (SCS) piston-based technology for in-cylinder control of ignition and combustion, designed to increase fuel mileage and reduce emissions of internal combustion engines. Sonex plans to complete development, commercialize and market its Sonex Controlled Auto Ignition (SCAI) combustion process to the automotive industry to improve fuel efficiency of gasoline powered vehicles. Additionally, independent third-party testing has confirmed the potential of the SCS application for direct-injected diesel engines to significantly reduce harmful soot in-cylinder without increasing fuel consumption. Other SCS designs are being used to convert gasoline engines of various sizes to operate on safer, diesel-type "heavy fuels" for use in military and commercial applications requiring light weight and safe handling and storage of fuel, such as in UAVs (unmanned aerial vehicles).

### CAUTION REGARDING FORWARD-LOOKING STATEMENTS

"Forward-looking" statements contained in this report, as well as all publicly disseminated material about the Company, are made pursuant to the "safe harbor" provisions of the Private Securities Litigation Act. Such statements are based on current expectations, estimates, projections and assumptions by management with respect to matters such as commercial acceptance of the SCS technology, the impact of competition, and the Company's financial condition or results of operations. Readers are cautioned that such statements are not guarantees of future performance and involve risks and uncertainties that could cause actual results to differ materially from those expressed in any such forward-looking statements.

### RISK FACTORS

Additional information regarding the risks faced by Sonex is provided in the Company's periodic filings with the Securities and Exchange Commission (SEC) under the heading "Risk Factors". Such filings are available upon request from the Company or online in the SEC's EDGAR database at [www.sec.gov](http://www.sec.gov). The Company, however, is delinquent in its filings with the SEC. It has not filed Annual Reports on Form 10-KSB for the years ended December 31, 2004 and 2005 primarily because it lacks the financial resources to engage an independent registered public accounting firm to conduct an audit of the related financial statements and because it lacks the staffing to prepare the Forms 10-KSB due in large part to the amount of time management has devoted and the amount of funds the Company has spent in responding to litigation. For the same reasons, the Company has been unable to file its Quarterly Reports on Form 10-QSB for 2005 and 2006. The Company is unable to predict when it will be able to make these filings and there can be no assurance that the filings will be made at all. In addition, there can be no assurance that a public market for the Company's Common Stock will continue to exist.
