News release

On July 23, 2001, HEI issued the following news release:

HAWAIIAN ELECTRIC INDUSTRIES, INC. REPORTS FIRST QUARTER 2001 EARNINGS

HONOLULU -- Hawaiian Electric Industries, Inc. (NYSE - HE) today reported net income for the three months ended June 30, 2001 of \$25.6 million, or 76 cents per share, compared with \$19.1 million, or 59 cents per share in the same quarter of 2000. For the six months ended June 30, 2001, net income was \$53.3 million, or \$1.60 per share, compared with \$48.1 million, or \$1.49 per share in the same period last year.

"We had a good second quarter. Earnings were up compared with the same quarter last year due to an 8.6% increase in savings bank net income and contraction of our international operations," said Robert F. Clarke, HEI chairman, president and chief executive officer.

Electric utility net income during the quarter was \$22.7 million versus \$24.0 million in the same quarter last year. Net income for the six months was \$44.1 million versus \$47.7 million in the same period of 2000.

"Warmer weather boosted kilowatthour sales by 1.4% for the quarter despite visitor arrivals in April and May declining slightly from 2000's record highs. However, purchase power expenses were higher for the quarter due to greater availability of purchased power in the supply mix as a result of shorter overhaul schedules and maintenance downtime by independent power producers (IPPs)," said Clarke.

Savings bank net income in the second quarter was \$10.2 million compared to \$9.4 million in the same quarter last year. Net income for the six months was \$22.1 million versus \$20.6 million in the same period of 2000.

"Our savings bank turned in a strong performance this quarter. Although personnel and technology costs were higher compared with the same quarter last year, the bank was able to increase its second quarter earnings by 8.6% due to higher net interest income and fee income," said Clarke.

The increase in the bank's net interest income was due in part to slightly higher average interest earning assets, partially offset by a decline in the bank's interest rate spread - the difference between the yield on earning assets and the cost of funds. Increased mortgage banking activity and credit card interchange fees lifted fee income in the second quarter, as well as fewer losses from investing activities.

The net loss for the international power operations during the quarter was \$0.9 million compared to \$8.9 million in the same quarter last year. The net loss for the six months was \$0.8 million versus \$9.9 million in the same period of 2000.

1

The net loss from international power for the quarter and six months ended June 30, 2000 included \$6.4 million of net losses from its investment in East Asia Power Resources Corporation, which was written off in December 2000.

HEI is a diversified holding company. Its core businesses are electric utilities, a savings bank and an international power subsidiary.

Forward-looking statements

This release may contain "forward-looking statements," that are subject to risks and uncertainties. Forward-looking statements are statements that are predictive in nature, depend upon or refer to future events or conditions, and/or include words such as expects, anticipates, intends, plans, believes, predicts, estimates or similar expressions. Forward-looking statements in this release should be read in conjunction with "Forward-looking statements" set forth on page v of HEI's Form 10-Q for the quarter ended March 31, 2001 (incorporated by reference herein) that discusses important factors that could cause HEI's results to differ materially from those anticipated in such statements. Forward-looking statements speak only as of the date of this release.
