FORM 10-Q
SECURITIES AND EXCHANGE COMMISSION

Washington D.C. 20549

**/x/ QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934**

For the Quarterly Period Ended September 30, 2001

or

**// TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934**

For the transition period from _____ to _____

Commission file number 03502

First National of Nebraska, Inc.

(Exact name of registrant as specified in its charter)

Nebraska

(State or other jurisdiction of incorporation or
organization)

47-0523079

(IRS Employer Identification No.)

1620 Dodge Street Omaha, NE

(Address of principal executive offices)

68197

(Zip Code)

(402) 341-0500

Registrant's telephone number, including area code

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes /x/ No //

As of November 7, 2001, the number of outstanding shares of the registrant's common stock (\$5.00 par value) was 334,500.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
September 30, 2001

Note A: Basis of Presentation

The accompanying unaudited consolidated financial statements of First National of Nebraska, Inc. and subsidiaries (the Company) have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete consolidated financial statements. For purposes of comparability, certain prior period amounts have been reclassified.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation of the financial statements have been included. Operating results for the nine months ended September 30, 2001 are not necessarily indicative of the results that may be expected for the year ending December 31, 2001. The notes to the consolidated financial statements contained in the Annual Report on Form 10-K for the year ended December 31, 2000 should be read in conjunction with these consolidated financial statements.

Note B: Earnings per Common Share

The following table provides the calculation of basic and diluted earnings per share:

	Quarter Ended September 30,		Nine Months Ended September 30,	
	2001	2000	2001	2000
(in thousands except share data)				
Net Income	\$ 13,479	\$ 20,057	\$ 53,691	\$ 62,917
Average common shares outstanding	334,500	334,500	334,500	334,500
Less: Average shares held for executive deferred compensation plan	1,979		1,960	
Average shares held in employee stock trust	1,913		1,756	
Average common shares outstanding used in basic earnings per share	330,608	334,500	330,784	334,500
Add: Contingently issuable shares considered outstanding for diluted earnings per share	3,892		3,716	
Average common shares outstanding used in diluted earnings per share	334,500	334,500	334,500	334,500

Note C: Comprehensive Income

Edgar Filing: FIRST NATIONAL OF NEBRASKA INC - Form 10-Q

Comprehensive income is defined as the period's change in the equity of a business enterprise from transactions and other events or circumstances from nonowner sources. Comprehensive income consists of net income and the change in unrealized appreciation or depreciation of available-for-sale securities. The following

5

table reflects consolidated statements of comprehensive income for the quarters ended and nine months ended September 30, 2001 and 2000.

	Quarter Ended September 30,		Nine Months Ended September 30,	
	2001	2000	2001	2000
(in thousands)				
Net Income	\$ 13,479	\$ 20,057	\$ 53,691	\$ 62,917
Other comprehensive income, before tax				
Net unrealized holding gains on available-for-sale securities	2,097	6,451	7,587	8,181
Less: Reclassification adjustment for net gains realized in net income	77		2,834	2,040
Other comprehensive gain, before tax	2,020	6,451	4,753	6,141
Less: Income tax expense for other comprehensive gain	680	2,326	1,665	2,238
Other comprehensive gain, net of tax	1,340	4,125	3,088	3,903
Comprehensive income	\$ 14,819	\$ 24,182	\$ 56,779	\$ 66,820

Note D: Credit Card Activities

The Company sells credit card loans, which are converted into securities and sold to investors, a process referred to as securitization. In credit card securitizations, designated pools of credit card loans, including related allowances for credit losses, are removed from the balance sheet and a security is sold to investors. In all of these transactions, the Company retains servicing responsibilities and receives annual servicing fees, which are classified in processing services income. The average servicing fee is approximately two percent of the outstanding balances of the credit card loans securitized. The Company also retains rights to future cash flows arising after investors have received the return for which they are entitled. These retained interests are known as interest-only strips and are subordinate to investor's interests. The value of the interest-only strips is subject to credit, prepayment and interest rate risks on the loans sold. The investors have no recourse to the Company's assets for failure of debtors to pay. However, as contractually required, the Company may designate certain accounts, known as spread accounts, to be used as collateral for the benefit of investors.

During the revolving period of a credit card securitization, additional gains are recognized as additional credit card loans are sold. During the quarter and nine months ended September 30, 2001, the Company recognized pretax gains of \$14.7 million and \$50.8 million, respectively, on securitizations of credit card receivables. As of September 30, 2001, the fair value of interest-only strips was \$24.3 million compared to \$18.2 million at December 31, 2000.

Note E: Recent Accounting Pronouncements

In July 2001, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards No. 141, "Business Combinations", and Statement No. 142, "Goodwill and Other Intangible Assets". Statement No. 141 requires that the purchase method of accounting be used for all business combinations initiated after June 30, 2001. Statement No. 142 requires that goodwill and other intangible assets with indefinite useful lives no longer be amortized, but instead be tested for impairment at least annually. The Company is required to implement Statement No. 142 on January 1, 2002, which will result in the discontinuation of approximately \$8 million of pre-tax goodwill amortization expense during the year ended December 31, 2002. This discontinuation of goodwill amortization may be offset by losses from impairment testing of goodwill as required in Statement No. 142. The Company has not yet performed these impairment tests and consequently, the resulting impact is currently unknown.

Edgar Filing: FIRST NATIONAL OF NEBRASKA INC - Form 10-Q

In June 2001 the FASB issued Statement of Financial Accounting Standard No. 143, "Accounting for Asset Retirement Obligations" effective for fiscal years beginning after June 15, 2002. Statement No. 143 establishes accounting and reporting standards for obligations associated with the retirement of tangible long-lived assets and the associated asset retirement costs. In August 2001, the FASB issued Statement No. 144 "Accounting for the Impairment or Disposal of Long-Lived Assets" effective for fiscal years beginning after December 15, 2001. Statement No. 144 establishes accounting and reporting standards for the impairment or disposal of long-lived assets. Currently, management does not expect these statements to materially affect the Company's financial position or results of operations.

6

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Management's discussion and analysis contains forward-looking statements, which reflect management's current views and estimates of future economic circumstances, industry conditions, company performance and financial results. The statements are based on many assumptions and factors, including economic conditions, performance of financial markets, adequacy of allowance for loan losses, competition, rapid fluctuations in interest rates, and changes in the legislative and regulatory environment. Many of these factors are beyond the Company's ability to control or predict, and any changes in such assumptions or factors could produce future results which may differ from those indicated in this report.

Results of Operations

Overview

The Company's earnings for the quarter and nine months ended September 30, 2001 were negatively impacted by net interest margin compaction, losses in its agricultural loan portfolio, and expenses associated with the Company's growth initiatives including expansion into new markets in Dallas, Texas, Denver, Colorado, Atlanta, Georgia and Lincoln, Nebraska. Net income was \$13.5 million for the quarter ended September 30, 2001, down \$6.6 million, or 32.8%, from \$20.1 million for the same period in 2000. Diluted earnings per common share decreased to \$40.30 for the quarter ended September 30, 2001 from \$59.96 per diluted common share for the same period in 2000. Net income was \$53.7 million for the nine months ended September 30, 2001, down \$9.2 million, or 14.7%, from \$62.9 million for the same period in 2000. Diluted earnings per common share decreased to \$160.51 for the nine months ended September 30, 2001 from \$188.09 per diluted common share for the same period in 2000.

Net interest income

Net interest income is defined as the difference between interest income and fees derived from earning assets and interest expense on interest-bearing liabilities. Interest income and expense are affected by changes in the volume and mix of interest-earning assets and interest-bearing liabilities, in addition to changes in interest rates. The relative performance of net interest income is frequently measured by net interest margin, which is calculated by dividing tax-equivalent net interest income by average interest-earning assets.

Reported net interest income and net interest margin for the Company were impacted in the quarter and nine months ended September 30, 2001 by a shift in the mix of interest-earning assets and differences in the repricing velocity of interest-earning assets and interest-bearing liabilities. On a reported loan basis, the Company continues to experience a reduction in credit card loans as a percentage of total loans primarily as a result of its credit card securitization activities. For an enhanced understanding of the trends impacting net interest income, it is also helpful to analyze performance on a managed loan basis by adding data related to securitized loans to reported loans. See the later section titled "Credit Card Securitizations" for an expanded comparative presentation of financial information on a reported and a managed loan basis.

7

The following table presents a summary of net interest income on a tax-equivalent basis related to average earning assets and net interest margin on both a reported and a managed loan basis. Managed loan financial information includes credit card loans that have been securitized and sold.

Quarter Ended September 30,		Nine Months Ended September 30,	
2001	2000	2001	2000

Edgar Filing: FIRST NATIONAL OF NEBRASKA INC - Form 10-Q

Quarter Ended September 30,

Nine Months Ended September 30,

(\$ in thousands)

Reported:

Net interest income on a tax-equivalent basis (1)	\$ 112,804	\$ 112,973	\$ 321,552	\$ 337,223
Average earning assets	8,722,269	8,105,967	8,586,095	7,817,808
Net interest margin (annualized)	5.13%	5.54%	5.01%	5.76%

Managed:

Net interest income on a tax-equivalent basis (1)	\$ 165,605	\$ 139,644	\$ 458,187	\$ 416,020
Average earning assets	10,461,374	9,068,091	10,165,595	8,714,058
Net interest margin (annualized)	6.28%	6.13%	6.03%	6.38%

(1)

Certain loan fees have been reclassified from interest income to processing services income for the prior year presented to conform to 2001 presentation.

Under GAAP, the Company no longer reports net interest income on securitized and sold credit card loans; rather, income earned on these loans is classified as noninterest income. During the quarter and nine months ended September 30, 2001, \$52.8 million and \$136.6 million, as well as \$26.7 million and \$78.8 million for the quarter and nine months ended September 30, 2000, were classified as non-interest income on a reported loan basis as a result of the GAAP accounting treatment for securitizations of credit card loans.

As discussed below, the Company's net interest income was impacted by shifts in the loan portfolio mix of consumer loans and commercial loans, the repricing velocity of those portfolios versus the repricing velocity of interest-bearing liabilities, and decreases occurring in the level of interest rates nationally. This shift in reported loan mix impacts net interest margin for the quarter and nine months ended September 30, 2001 because credit card loans had an average gross yield of 15.7% for the quarter and 14.8% for the nine months ended September 30, 2001, compared to non-credit card loans which had an average gross yield of 8.1% and 8.5% for the same periods respectively. The decline in average gross yield on interest-earning assets was offset by a reduction in the average cost of interest-bearing liabilities, which was 4.5% and 5.0% for the quarter and nine months ended September 30, 2001 compared to 5.6% and 5.3% for the quarter and nine months ended September 30, 2000.

The following table presents the quarterly yield and net interest margin trends for 2001:

	Quarter Ended		
	March 31, 2001	June 30, 2001	September 30, 2001

(Annualized and on a tax-equivalent basis)

Reported:

Interest-earning assets	10.05%	9.21%	9.15%
Interest-bearing liabilities	5.49%	5.02%	4.53%
Net interest margin	5.16%	4.74%	5.13%

In addition to shifts in the mix of loans, the Federal Reserve reduced the targeted Federal Funds rates from 6.50% at December 31, 2000 to 3.00% at September 30, 2001 causing a downward repricing of the Company's variable rate loans. Ninety-nine percent of the Company's variable rate credit card loans had reached their contractual interest rate floors as of June 30, 2001. The impact of rate reductions on interest-earning assets in the third quarter was lessened since these variable rate loans act as fixed rate loans when they reach their contractual interest rate floors.

The Company primarily funds its loans with certificates of deposit, money market deposit accounts and floating rate wholesale funds. These interest-bearing liabilities also repriced downward consistent with the Federal Reserve rate reductions; however, the velocity of the downward repricing of reported loans exceeded the velocity of the downward pricing of deposits for the first half of 2001, resulting in a decreased net interest margin for the six months ended June 30, 2001. During the third quarter, certificates of deposit have continued to reprice

Edgar Filing: FIRST NATIONAL OF NEBRASKA INC - Form 10-Q

downward while interest-earning asset yields have stabilized, resulting in an improved net interest margin for the third quarter.

Management believes certain factors will contribute to a continued improvement in net interest margin over the remainder of the year, assuming interest rates remain near their current levels. The Company has over \$1 billion in certificates of deposit with interest rates approximating 5.7% maturing during the last three months of 2001. These certificates of deposit should reprice at interest rates less than 4.0%, which will result in interest expense savings. In addition to the interest expense benefits expected from these maturities of certificates of deposit, the sensitivity of further rate reductions on the Company's loans is expected to be minimal since the Company's variable rate credit card loans have reached their contractual interest rate floors.

Provision for loan losses

The provision for loan losses is charged against earnings to cover both current period net loan charge-offs and to maintain the allowance for loan losses at an acceptable level to cover losses inherent in the portfolio as of the reporting date. For the quarter ended September 30, 2001, the provision for loan losses increased \$14.1 million, or 47.7%, to \$43.7 million compared to \$29.6 million for the same period in 2000. The provision for loan losses also increased for the nine months ended September 30, 2001 by \$19.6 million, or 22.7%, to \$105.8 million compared to \$86.2 million for the same period in 2000. This increase in the provision for loan losses is reflective of the increase in loan delinquencies and net loan charge-offs for the quarter and nine months ended September 30, 2001. Included in net loan charge-offs for the quarter ended September 30, 2001, is \$9 million related to the Company's agricultural loan portfolio resulting from an agricultural borrower's fraudulent activities.

Noninterest income and expense

Increases in noninterest income and expense as reflected in the following tables primarily relate to the Company's growth initiatives which have taken place since September 30, 2000. The Company has expanded into new markets in Dallas, Texas, Denver, Colorado, and Lincoln, Nebraska. Additionally, as discussed in the Company's December 31, 2000 Form 10-K and Annual Report, the Company acquired InfiCorp Holdings, Inc. in

9

Atlanta, Georgia in July 2000 and sold an 80.13% interest in a subsidiary, Retriever Payment Systems (Retriever) in December 2000.

Processing services income includes fees related to processing credit card products issued by the Company, fees collected from merchants for credit card transaction processing, and servicing income related to securitized loans. Part of the increase in processing services income, \$5.2 million and \$28.7 million respectively, relates to increased credit card processing volumes during the quarter and nine months ended September 30, 2001, as compared to the corresponding periods last year, largely due to the acquisition of Inficorp Holdings, Inc. in July 2000. Also contributing to the increase in processing services for both the quarter and nine months ended September 30, 2001, was an increase of \$2.9 million and \$8.1 million, respectively, in servicing fees related to securitized credit card loans due to the greater volume of loans securitized during 2001 as compared to the same periods in 2000. These increases in securitization volumes also result in increases in securitization gains of \$8.9 million and \$30.3 million, included in credit card securitization income, for the quarter and nine months ended September 30, 2001, respectively, from the comparable periods last year. The growth in miscellaneous income is partially a result of increases in the gains on sales of mortgage loans of \$3.9 million and \$9.8 million, respectively, for the quarter and nine months ended September 30, 2001.

Salaries and employee benefits increased primarily due to the Company's growth initiatives since September 30, 2000. The 14.7% increase in communications and supplies expense for the nine months ended September 30, 2001 compared to the same period last year is largely due to increased credit card marketing efforts in the first quarter of 2001, and promotional costs related to the Company's expansion into new markets. Professional services increased \$7.1 million and \$21.8 million for the quarter and nine months ended September 30, 2001, respectively, primarily due to fees paid to Retriever as an external independent merchant processing sales organization in 2001. Fees paid to Retriever in 2000 were not reflected in the consolidated statements of income for 2000 when Retriever was consolidated as a wholly-owned subsidiary. The 16.3% decrease in loan servicing expense for the nine months ended September 30, 2001 compared to the same period last year resulted primarily from the recognition of a rebate from a credit card association during the first quarter of 2001.

Loan Portfolio

The Company is diversified in its lending by providing financing to a variety of borrowers throughout the Company's operating regions in Nebraska, Colorado, Kansas, South Dakota, Iowa and Texas. Non-credit card loans are generally secured by underlying real estate, business assets, personal property and personal guarantees. The following table reflects the diversification of the Company's lending activities:

	September 30, 2001	December 31, 2000
(in thousands)		
Credit card	\$ 2,029,281	\$ 2,214,474

Commercial construction	\$ 272,024
Residential land development	115,219
Multi-family construction	74,221
Residential construction	89,419
Commercial land development	95,759
Real estate construction and land development	\$ 646,642

The Company acquired credit card loan portfolios totaling \$80.8 million during the nine months ended September 30, 2001.

Credit Card Securitizations

As described in Note D, the Company securitizes credit card loans on a revolving basis as a funding vehicle to supplement its use of core deposits as its primary source of funding. The following tables provide supplemental financial information on both a reported loan and a managed loan basis to augment the understanding of the impact credit card loan securitizations have on the financial results of the Company. The reported financial

information is presented in accordance with GAAP whereas the managed financial information is presented for competitive analytical and discussion purposes only, and does not represent GAAP accounting treatment.

Asset Quality

The Company's loan delinquency rates and net charge-off activity reflect, among other factors, general economic conditions, the quality of the loans, the average seasoning of the loans and the success of the Company's collection efforts. The Company's objective in managing its loan portfolio is to balance and optimize the profitability of the loans within the context of acceptable risk characteristics. The Company continually monitors the risks embedded in the credit card loan portfolio with the use of statistically-based simulation models which incorporate historical net charge-off trends on past due accounts and net charge-off trends related to bankruptcies, deceased credit card holders and account settlements.

The level of loan delinquencies and charge-offs as of September 30, 2001 has increased from the December 31, 2000 levels given the resulting uncertainty in the economy since the second quarter of 2001 and the events of September 11, 2001. Delinquencies in non-credit card loans remain at lower levels which improves the overall delinquency rate for the Company. Although the level of nonaccrual loans has increased for non-credit card loans, management believes it has provided sufficient loan loss allowances for these loans. The forecast for bankruptcy losses and their resulting impact on the credit quality of credit card loans has become difficult to determine due to ongoing efforts in Congress to amend current bankruptcy laws. Although bankruptcy discussions in Congress have currently been postponed, if these bankruptcy laws are tightened management anticipates a short-term increase in bankruptcy losses as individual consumers may attempt to take advantage of prior legislation. During 2001, credit card charge-offs related to bankruptcies constitute approximately 44% of year-to-

Edgar Filing: FIRST NATIONAL OF NEBRASKA INC - Form 10-Q

date principal credit card charge-offs. In addition, the recovery rate related to bankruptcy charge-offs is considerably less than other credit card charge-offs. At the present time, management cannot predict the outcome of the proposed bankruptcy legislative changes and the effects on future credit card charge-off rates related to bankruptcies. Continued economic uncertainty subsequent to September 30, 2001 may result in a need for additional allowances for loan losses during the fourth quarter of 2001.

The following table reflects the delinquency rates for the Company's total loan portfolio, credit card portfolio and non-credit card portfolio. An account is contractually delinquent if the minimum payment of principal or interest is not received by the specified due date. The overall delinquency rate as a percentage of total loans was 2.72% at September 30, 2001 compared with 2.53% at December 31, 2000.

90 days or more & still accruing	15,054	.31%	8,105	.17%
	<u>\$ 71,008</u>	<u>1.47%</u>	<u>\$ 70,851</u>	<u>1.51%</u>
Nonaccrual loans	\$ 25,756	.53%	\$ 14,839	.32%

The Company's policy is to charge off credit card loans and consumer lines of credit when they become 180 days contractually past due. Generally, other consumer loans are charged off when they become 120 days contractually past due. Net loan charge-offs include the principal amount of losses resulting from borrowers' unwillingness or inability to pay, in addition to bankruptcies, deceased borrowers and account settlements less current period recoveries of previously charged off loans. The amounts reflected as delinquent loans in the table above include

Edgar Filing: FIRST NATIONAL OF NEBRASKA INC - Form 10-Q

loan principal amounts related to loans for which interest, principal or both are past due. On a managed loan basis, the total credit card delinquency rate was 4.90% at September 30, 2001 compared to 4.31% at December 31, 2000.

The allowance for loan losses is intended to cover losses inherent in the Company's loan portfolio as of the reporting date. On a monthly basis, the Company evaluates its allowance for loan losses based upon a review of collateral values, delinquencies, nonaccruals, payment histories and various other analytical and subjective measures relating to the various loan portfolios within the Company. Net charge-offs for the Company's overall portfolio were \$110.1 million for the nine months ended September 30, 2001 compared to \$91.8 million for the same period in 2000. Net charge-offs as a percentage of average loans were 1.58% for the nine months ended

13

September 30, 2001 compared to 1.43% for the same period last year. This increase in net charge-offs reflects a \$9 million charge-off related to the Company's agricultural loan portfolio resulting from a borrower's fraudulent activities. The allowance as a percentage of loans was 1.43% as of September 30, 2001 compared to 1.45% as of September 30, 2000.

The following table presents the activity in the Company's allowance for loan losses with a breakdown of charge-off and recovery activity related to credit card loans.

Allowance for Loan Losses:

	For the Nine Months Ended September 30,	
	2001	2000
(\$ in thousands)		
Balance at January 1	\$ 105,304	\$ 106,484
Provision for loan losses	105,798	86,242
Addition due to acquisitions of loans	1,644	3,500
Reduction due to sales of loans	(4,472)	(6,389)
Loans charged off:		
Credit card loans	(105,665)	(102,618)
All other loans	(20,325) ⁽¹⁾	(6,565)
Loans recovered:		
Credit card loans	13,203	15,269
All other loans	2,641	2,126
Total net charge-offs	(110,146)	(91,788)
Balance at September 30	\$ 98,128	\$ 98,049
Allowance as a percentage of loans	1.43%	1.45%
Total net charge-offs as a percentage of average loans	1.58%	1.43%

(1) This amount includes a third quarter charge-off of \$9 million resulting from fraudulent activities by a single agricultural borrower.

Capital Resources

Edgar Filing: FIRST NATIONAL OF NEBRASKA INC - Form 10-Q

The Company's primary source of capital is its retained earnings. The Company has historically retained approximately 85% of net income in capital to fund growth of future operations and to maintain minimum capital standards.

The Company and its banking subsidiaries are required to maintain minimum capital in accordance with regulatory guidelines. Total capital of the Company and its banking subsidiaries are divided into two tiers:

Core ("Tier 1") capital, which includes common equity, minority interests in consolidated subsidiaries, less goodwill and certain identifiable intangibles

Supplementary ("Tier 2") capital, which includes hybrid capital instruments, subordinated debt, capital notes, and portions of the allowance for loan losses

In addition, for risk-based capital computations, the assets and certain off-balance sheet commitments of the Company and its banking subsidiaries are assigned to four risk-weighted categories based on the level of credit risk ascribed to such assets or commitments.

Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and its banking subsidiaries must meet specific capital guidelines that involve quantitative measures as calculated under regulatory accounting practices. These quantitative measures require the Company and its banking subsidiaries to maintain minimum amounts and ratios of Tier 1 and total capital (sum of Tier 1 and Tier 2 capital) to risk-weighted assets, and of Tier I capital to average assets. The Company and its banking subsidiaries' capital amounts and classifications are also subject to qualitative judgements by the regulators about components, risk weightings and other factors.

14

As of September 30, 2001, the Company's banking subsidiaries are well capitalized under the regulatory framework for prompt corrective action. There are no conditions or events since September 30, 2001, that management believes have changed these categories. To be categorized as well capitalized, the Company's banking subsidiaries must maintain minimum total risk-based capital of 10%, Tier I risk-based capital of 6% and Tier I leverage capital of 5%. The Company intends to maintain sufficient capital in each of its banking subsidiaries for them to remain in the "well capitalized" category.

The Company monitors its capital on a regular basis and performs necessary forecasts of capital needs based upon anticipated growth in loans and earnings. The Company and its banking subsidiaries have potential under current capital rules to increase their capital by the issuance of debt instruments including trust preferred securities and subordinated debt. The parent company receives dividends from its banking subsidiaries which are subject to regulatory restrictions.

In 1995, First National Bank of Omaha issued \$75 million in 15 year subordinated capital notes. In 1999, another banking subsidiary of the Company issued \$2.3 million in capital notes related to the acquisition and merger of a bank. A portion of these capital notes, along with a portion of the parent company's \$15.6 million in capital notes outstanding as of September 30, 2001 issued in connection with the Company's previous acquisitions, count towards meeting the required capital standards, subject to certain limitations.

Liquidity Management

Adequate liquidity levels are necessary to ensure that sufficient funds are available for loan growth and deposit withdrawals. These funding needs are offset by funds generated from loan repayments, investment maturities, and core deposit growth. The Company's Asset and Liability Committee is responsible for monitoring the current and forecasted balance sheet structures to ensure anticipated funding needs can be met at a reasonable cost. Contingency plans are in place to meet unanticipated funding needs or loss of funding sources. Given the resulting uncertainty in the economy since the second quarter of 2001 and the events of September 11, 2001, the Company has experienced modest levels of deposit and loan growth.

The Company continues to place a priority on obtaining retail consumer deposits as its primary source of funding. This strategy is being supported by the Company's entry into the Dallas, Texas, and Denver, Colorado market places. The Company holds the largest market share for total deposits in many of the Nebraska communities which it serves including Omaha, Fremont, Columbus, Kearney, David City, North Platte and Chadron. It also holds the largest market share in Fort Collins, Colorado and most communities which it serves in South Dakota. The Company places in the top three for market share for deposit volume generated in Overland Park, Kansas, Greeley and Boulder, Colorado and Bellevue, Alliance, Beatrice and Scottsbluff, Nebraska.

Edgar Filing: FIRST NATIONAL OF NEBRASKA INC - Form 10-Q

The Company has access to a variety of other funding sources to augment the total funding needs of the Company. Management evaluates the availability of its other funding sources on a regular basis. These other sources include securities sold under repurchase agreements, federal funds purchased, credit card-backed securitizations, Federal Home Loan Bank advances, other debt agreements and subordinated capital notes. Certain funding sources, such as Federal Home Loan Bank advances, are more readily accessible through collateralized borrowing arrangements and provide greater flexibility in funding opportunities. Furthermore, the Company's investment portfolio is primarily comprised of U.S. Treasury and U.S. Agency securities. These securities are highly marketable and represent a source of collateral for additional liquidity needs.

The Company utilizes credit card-backed securitization vehicles to assist in its management of liquidity, interest rate risk and capital. At September 30, 2001 and December 31, 2000, \$1.6 billion and \$1.4 billion, respectively, of the Company's managed credit card portfolio was securitized. Of the \$1.6 billion outstanding as of September 30, 2001, \$850 million was issued in two term securitization series, and \$780 million was outstanding through five conduit securitization facilities. These facilities had \$273 million in unused lines available for liquidity management purposes at September 30, 2001, which increased from \$130 million in unused lines available at December 31, 2000. Furthermore, the Company had outstanding Federal Home Loan Bank advances of \$298.1 million as of September 30, 2001 and \$189.3 million as of December 31, 2000 with an additional borrowing capacity of \$472.6 million at September 30, 2001. The Company had \$36 million and \$23 million at September 30, 2001 and December 31, 2000, respectively, outstanding under a \$125 million syndicated revolving credit facility. On October 5, 2001, the entire outstanding balance of \$36 million under this credit facility was paid. In June 2001, the Company entered into two new short-term lines of credit for a combined availability of \$15 million. As of September 30, 2001, \$5 million was outstanding under these new lines. This amount was also paid on October 5, 2001.

15

On September 7, 2001, the Company entered into an agreement to acquire the outstanding stock of Castle Bancgroup, Inc. The proposed purchase price of \$81.7 million would be funded by existing or new lines of credit. This acquisition is scheduled to close during the first quarter of 2002.

Item 3. Market Risk

The Company's primary component of market risk is interest rate volatility. It is the goal of the Company to maximize profits while effectively managing, rather than eliminating, interest rate risk. The primary measure used to analyze and manage interest rate risk is net interest income simulation modeling.

The Company uses a simulation model to analyze net interest income sensitivity to movements in interest rates. The simulation model projects net interest income based on both upward and downward interest rate shifts over a simulation period. These interest rate shifts are applied to a projected balance sheet for the simulation period.

The targeted Federal Funds rates have decreased from 6.50% at December 31, 2000 to 3.00% at September 30, 2001 which resulted in the rapid compression of net interest margin during the first seven months of 2001. In response to these unusual market conditions, the Company has improved its modeling techniques and strategic planning to consider expanded interest rate scenarios. Additionally, the asset-liability management process is being further enhanced to consider changes in pricing and other strategies used by management for the retention of loan and deposit customers in a volatile rate environment. Management has also taken actions to reduce interest rate risk by adjusting the maturities of new and renewed certificates of deposit and increasing the use of LIBOR-based floating sources of wholesale funding including credit card securitizations.

The improvement in the net interest margin in the third quarter of 2001 as compared to the first half of the year is indicative of the effectiveness of management's strategies to address the rapid decrease in market interest rates that has occurred during the nine months ended September 30, 2001. Sensitivity to further interest rate reductions has been reduced since the Company's variable rate credit card loans reached their minimum contractual interest rate floors by the third quarter of 2001. Management continues to evaluate alternatives for managing interest rate risk in a volatile interest rate market.
