- \* Non-income producing security.
- ☐ All ratings are by Standard & Poor□s Ratings Service, unless otherwise footnoted.
- (a) Security is currently in default.
- (b) Pre-Refunded bonds are escrowed with government securities and are considered by the manager to be triple-A rated even if issuer has not applied for new ratings.
- (c) Income from this issue is considered a preference item for purposes of calculating the alternative minimum tax (AMT).
- (d) All or a portion of this security is segregated for open futures contracts.
- (e) All or a portion of this security is segregated for extended settlements.
- (f) All or a portion of this security is held at the broker as collateral for open futures contracts.
- (g) Rating by Moody's Investors Service.
- (h) Bonds are escrowed to maturity by government securities and are considered by the manager to be triple-A rated even if issuer has not applied for new ratings.
- (i) Rating by Fitch Rating Service.
- (j) Maturity date shown represents the mandatory tender date.
- (k) Illiquid security.
- (l) Security is valued in good faith at fair value by or under the direction of the Board of Directors.
- (m) Variable rate demand obligation has a demand feature under which the Fund could tender it back to the issuer on no more than 7 days notice. Date shown is the date of the next interest rate change.
- # Aggregate cost for federal income tax purposes is substantially the same.

#### **Bond Ratings**

(unaudited)

The definitions of the applicable rating symbols are set forth below:

of a plus (+) or minus ([]) sign to show relative standings within the major rating categories.

Standard & Poor\s Ratings Service (\subseteq Standard & Poor\s\subseteq)\subseteq Ratings from \subseteq AA\subseteq to \subseteq CCC\subseteq may be modified by the addition

Bonds rated [AAA] have the highest rating assigned by Standard & Poor[s]s. Capacity to pay interest

AAA and

repay principal is extremely strong.

Bonds rated [AA] have a very strong capacity to pay interest and repay principal and differ from

AA the

highest rated issues only in a small degree.

Bonds rated  $\square A \square$  have a strong capacity to pay interest and repay principal although they are

somewhat

more susceptible to the adverse effects of changes in circumstances and economic conditions

than debt

in higher rated categories.

Bonds rated [BBB[] are regarded as having an adequate capacity to pay interest and repay

BBB principal.

Whereas they normally exhibit adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay interest and

repay

principal for bonds in this category than in higher rated categories.

BB, B, CCC,

A

with respect to capacity to pay interest and repay principal in accordance with the terms of the obligation.  $\Box BB\Box$  represents the lowest degree of speculation and  $\Box C\Box$  the highest degree of

speculation.

While such bonds will likely have some quality and protective characteristics, these are

outweighed by

large uncertainties or major risk exposures to adverse conditions.

D Bonds rated  $\square D \square$  are in default and payment of interest and/or repayment of principal is in arrears.

Moody[s] Investors Service ([Moody[s])] Numerical modifiers 1, 2 and 3 may be applied to each generic rating from <math>Aa to Ca, where 1 is the highest and 3 the lowest ranking within its generic category.

Aaa Bonds rated [Aaa] are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as [gilt edge.] Interest payments are protected by a large or by an exceptionally stable margin and principal is secure. While the various protective elements are likely

to

change, such changes as can be visualized are most unlikely to impair the fundamentally strong position

of such issues.

Bonds rated <code>[Aa[]</code> are judged to be of high quality by all standards. Together with the <code>[Aaa[]</code> group they comprise what are generally known as high grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in <code>[Aaa[]</code> securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long-term

risks appear somewhat larger than in [Aaa] securities.

A Bonds rated [A] possess many favorable investment attributes and are to be considered as upper medium grade obligations. Factors giving security to principal and interest are considered adequate but

elements may be present which suggest a susceptibility to impairment some time in the future.

Baa Bonds rated [Baa] are considered as medium grade obligations, i.e., they are neither highly protected nor poorly secured. Interest payments and principal security appear adequate for the present but certain

protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics

as well.

9

- Ba Bonds rated [Ba] are judged to have speculative elements; their future cannot be considered as well assured. Often the protection of interest and principal payments may be very moderate and therefore not well safeguarded during both good and bad times over the future. Uncertainty of position characterizes bonds in this class.
- B Bonds rated [B] are generally lack characteristics of desirable investments. Assurance of interest and principal payments or of maintenance of other terms of the contract over any long period of time may be small.
- Caa Bonds rated [Caa] are of poor standing. These may be in default, or present elements of danger may exist with respect to principal or interest.
- Ca Bonds rated [Ca] represent obligations which are speculative in a high degree. Such issues are often in default or have other marked short-comings.
- C Bonds rated  $\Box C\Box$  are the lowest class of bonds and issues so rated can be regarded as having extremely poor prospects of ever attaining any real investment standing.

Fitch Rating Service ( $\square$ Fitch $\square$ ) $\square$ Ratings from  $\square$ AAA $\square$  to  $\square$ CC $\square$  may be modified by the addition of a plus (+) or minus ( $\square$ ) sig to show relative standings within the major rating categories

- AAA Bonds rated [AAA] have the highest rating assigned by Fitch. Capacity to pay interest and repay principal is extremely strong.
- AA Bonds rated [AA] have a very strong capacity to pay interest and repay principal and differ from the highest rated issues only in a small degree.
- A Bonds rated [A] have a strong capacity to pay interest and repay principal although they are somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than debt

in higher rated categories.

BBB Bonds rated [BBB] are regarded as having an adequate capacity to pay interest and repay principal. Whereas they normally exhibit adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay interest and repay principal for bonds in this category than in higher rated categories.

BB,

B, CCC

and

CC Bonds rated [BB[], [B]], [CCC[] and [CC[] are regarded, on balance, as predominantly speculative with respect to capacity to pay interest and repay principal in accordance with the terms of the obligation.

 $\Box$ BB $\Box$  represents a lower degree of speculation than  $\Box$ B $\Box$ , and  $\Box$ CC $\Box$  the highest degree of speculation. While such bonds will likely have some quality and protective characteristics, these are outweighed by

large uncertainties or major risk exposures to adverse conditions.

NR Indicates that the bond is not rated by Standard & Poor∏s, Moody∏s, or Fitch.

#### **Short-Term Security Ratings**

(unaudited)

Standard & Poor\s highest rating indicating very strong or strong capacity to pay principal and SP-1 interest: those issues determined to possess overwhelming safety characteristics are denoted with a plus (+) sign. A-1 Standard & Poor\s highest commercial paper and variable-rate demand obligation (VRDO) rating indicating that the degree of safety regarding timely payment is either overwhelming or very those issues determined to possess overwhelming safety characteristics are denoted with a plus (+) sign. VMIG 1 Moody∏s highest rating for issues having a demand feature∏ VRDO. Moody∏s highest rating for commercial paper and for VRDO prior to the advent of the VMIG 1 P-1 rating. Fitch∏s highest rating indicating the strongest capacity for timely payment of financial F-1 commitments; those issues determined to possess overwhelming strong credit feature are denoted with a plus (+) sign.

#### 1. Organization and Significant Accounting Policies

Municipal High Income Fund Inc. ("Fund"), a Maryland corporation, is registered under the Investment Company Act of 1940, as amended, as a diversified, closed-end management investment company.

The following are significant accounting policies consistently followed by the Fund and are in conformity with U.S. generally accepted accounting principles ([GAAP]).

- (a) Investment Valuation. Securities are valued at the mean between the bid and asked prices provided by an independent pricing service that are based on transactions in municipal obligations, quotations from municipal bond dealers, market transactions in comparable securities and various relationships between securities. Securities for which market quotations are not readily available or for which market quotations are determined not to reflect fair value, will be valued in good faith by or under the direction of the Fund□s Board of Directors. Short-term obligations with maturities of 60 days or less are valued at amortized cost, which approximates value.
- **(b) Financial Futures Contracts.** The Fund may enter into financial futures contracts typically to hedge a portion of the portfolio. Upon entering into a financial futures contract, the Fund is required to deposit cash or securities as initial margin. Additional securities are also segregated up to the current market value of the financial futures contracts. Subsequent payments, known as variation margin, are made or received by the Fund each day, depending on the daily fluctuation in the value of the underlying financial instruments. The Fund recognizes an unrealized gain or loss equal to the daily variation margin. When the financial futures contracts are closed, a realized gain or loss is recognized equal to the difference between the proceeds from (or cost of) the closing transactions and the Fund\(\partial\)s basis in the contracts.

The risks associated with entering into financial futures contracts include the possibility that a change in the value of the contract may not correlate with the changes in the value of the underlying instruments. In addition, investing in financial futures contracts involves the risk that the Fund could lose more than the original margin deposit and subsequent payments required for a futures transaction. Risks may also arise upon entering into these contracts from the potential inability of the counterparties to meet the terms of their contracts.

- (c) Credit and Market Risk. The Fund invests in high-yield instruments that are subject to certain credit and market risks. The yields of high-yield obligations reflect, among other things, perceived credit risk. The Fund investments in securities rated below investment grade typically involve risks not associated with higher rated securities including, among others, greater risk related to timely and ultimate payment of interest and principal, greater market price volatility and less liquid secondary market trading.
- (d) Security Transactions. Security transactions are accounted for on a trade date basis.

#### 2. Investments

At July 31, 2005, the aggregate gross unrealized appreciation and depreciation of investments for federal income tax purposes were substantially as follows:

Gross unrealized appreciation Gross unrealized depreciation	\$ 8,007,403 (9,023,883)
Net unrealized depreciation	\$ (1,016,480)

At July 31, 2005, the Fund had the following open futures contracts:

Number of	Expiration	Basis	Market	Unrealized
Contracts	Date	Value	Value	Gain

Contracts to Sell: U.S. Treasury Bonds	400	9/05	\$46,525,000	\$46,125,000	\$400,000
