“Telecom Italia goes ahead in its strategy of alliances with the greatest national and international content operators, so as to offer our customers the best television productions and incentivise the use of the infrastructure for broadband and ultrabroadband connections, which represent the future not only for the entertainment market, but also for the growth of the Country's economy”, **stated Marco Patuano, Chief Executive Officer of Telecom Italia**. “The agreement with Mediaset confirms once again the trust that the best media companies have in developing their business through TIM'S ultrabroadband, in which we are investing 5 billion euros to ensure dissemination of the new generation networks and European level service quality within the next two years.”

“We are pleased that the Telecom Italia Group has recognised that 'Premium Online' is an undeniable offer for its customers”, said **Marco Giordani, Chief Executive Officer of RTI (Mediaset)**. “The quality and the exclusive nature of Mediaset Group's TV content prove to be essential for the real spread of ultrabroadband in our country. It is a first major step towards the creation of the much sought-after triple/quadruple play offer, which will truly integrate contents and technology. An innovation that in Italy too can change the consumer experience in terms of the convenience and efficiency of the service and in terms of cost”.
