Media Release Communiqué aux Médias Medienmitteilung

Registration of first fungicide designed to fight resistant disease in European cereals

Basel, Switzerland, January 8, 2004

Syngenta announced today the registration in the UK of AMISTAR®Opti, the first fungicide designed to overcome what is becoming a significant resistant disease in European cereals.

AMISTAR®Opti is effective against all strains of this fungal disease, *Septoria*, which standard treatments do not fully control.

AMISTAR®Opti effectively addresses an increasingly severe problem faced by our customers; it will further strengthen our leadership position in the European cereals market, said John Atkin, Chief Operating Officer, Syngenta Crop Protection.

AMISTAR®Opti combines AMISTAR®, the broadest spectrum cereal fungicide, with another well-established fungicide BRAVO®. Extensive field trials have shown that AMISTAR®Opti is able to protect successfully against fungal attacks and to safeguard yield, particularly in areas with resistant *Septoria* strains.

Syngenta is a world-leading agribusiness committed to sustainable agriculture through innovative research and technology. The company is a leader in crop protection and ranks third in the high-value commercial seeds market. Sales in 2002 were approximately US\$6.2 billion. Syngenta employs some 20,000 people in over 90 countries. Syngenta is listed on the Swiss stock exchange (SYNN) and in New York (SYT). Further information is available at www.syngenta.com.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
