Heinz Imhof, Chairman, said:

□The results achieved in 2004 amply demonstrate the success of the Syngenta strategy and strength of the product portfolio, which have allowed the company to generate significant, profitable growth. They also bear witness to the hard work and determination of our employees in the first four years of the company's life. Our commitment to create value for our shareholders is further reinforced by the announcement of an enhanced cash return program.□

Michael Pragnell, Chief Executive Officer, said:

□In 2004, Syngenta delivered growth across all businesses and in all regions in improving agricultural markets, consolidating its leadership position. Crop Protection growth was notably high in Latin America, and across Europe excellent local marketing drove sales expansion. New products again grew strongly. The acquisitions of Garst and Golden Harvest, completed in the second half significantly strengthened our position in US corn and soybean seeds. Professional Products and Vegetables and Flowers seeds maintained their five year record of consistent growth. The immense commitment of our people worldwide and our sustained focus on cost and capital efficiency contributed to strong earnings growth and substantially enhanced returns.□

-
- (1) For a definition of constant exchange rates, see Appendix A.
 - (2) EPS on a fully-diluted basis, excluding restructuring, impairment and discontinued operations, and before a one-off tax credit.
 - (3) After acquisitions of \$484 million. For a definition of free cash flow, see Appendix C.
 - (4) The amounts including restructuring and impairment are reported in accordance with International Financial Reporting Standards (IFRS). The impact of restructuring, impairment and discontinued operations in 2004 is \$302m on net income (2003: \$90m).
 - (5) Adjusted in accordance with recent changes in accounting standards.
 - (6) Net income to shareholders of Syngenta AG.
-

Highlights for 2004

Sales at constant exchange rates (CER) increased by seven percent. Underlying demand in the fourth quarter remained strong; reported sales reflect the realignment of sales closer to consumption for the coming season, particularly in the USA, Western Europe and Japan. Full year Crop Protection sales were seven percent higher; Seeds sales rose by six percent.

EBITDA improved by 18 percent (CER) to \$1.4 billion benefiting from the growth in sales and continued cost efficiency.

Earnings per share, excluding restructuring and impairment and a one-off tax benefit, were up 76 percent to \$5.87. After charges for restructuring and impairment earnings per share were \$4.34 (2003: \$2.45) . In addition to the improvement in operating income, the increase reflects lower net financial expense as well as a lower underlying tax rate.

Currency: Sales were positively impacted by four percent due to the weakness of the US dollar, notably against the Euro, although this impact narrowed in the second half. At the EBITDA level the positive effect of US dollar weakness and a benefit from hedging was offset by the strength of the Swiss franc and sterling.

Crop Protection: Sales increased across all product lines and in all regions, with Europe and Latin America

generating the strongest growth. Increased disease pressure, notably from soybean *rust* in Latin America and *septoria* resistance in European cereals, contributed to a double-digit increase in fungicide sales, with AMISTAR® exceeding \$500 million. Insecticides benefited from the roll-out of new combination products while solid growth in herbicides demonstrated the strength of this product line. Professional Products continued a record of top line growth driven largely by the expansion of seed treatment. Total sales of new products grew by 32 percent (CER) to reach \$688 million with continuing growth in the CALLISTO® range (\$289 million) and in ACTARA®/CRUISER® (\$298 million) as well as the successful launch of ENVOKE® on cotton in the USA. The range rationalization program reduced sales by \$49 million (CER) in 2004. This four year program, with a cumulative sales impact of \$301 million, is now complete. EBITDA rose by 22 percent (CER) to \$1463 million.

Seeds: Sales increased across all businesses and in all regions. Sales of Vegetables and Flowers increased by 10 percent. Demand in Field Crops, notably US corn and soybean, was strong; reported sales increased by two percent, impacted by the realignment of sales in the fourth quarter for the coming season's consumption. US field crops seeds have a marked seasonal pattern of sales and profit, heavily weighted to the first half. Following their acquisition in the second half of 2004, Garst and Golden Harvest made a negligible contribution to sales, as expected, and their consolidation resulted in the reduction of Seeds EBITDA by 48 percent (CER) to \$68 million. These acquisitions are expected to be accretive from 2005.

The integration of Garst and Golden Harvest into the North American field crops business is well underway. These acquisitions have significantly increased Syngenta's market share and, from 2005, the US field crops business will benefit from broader geographic reach, enhanced germplasm and a range of biotech input traits.

SYNGENTA FULL YEAR RESULTS 2004 / PAGE 2 OF 32

Plant Science: Following the acquisition of Garst and Golden Harvest, the management of corn and soybean trait development activities with the associated cost has been transferred to Seeds. In August Syngenta signed a long-term technology agreement with Delta and PineLand (D&PL), the US leader in cotton seed, under which D&PL will commercialize Syngenta's insect control technology for cotton.

Restructuring, impairment and Discontinued Operations: Total restructuring and impairment charges during the period were \$354 million (cash: \$171 million; non-cash: \$183 million) of which the majority related to the program to streamline global operations, announced in February 2004. The total cost of the program is expected to be around \$850 million over five years including a non-cash charge of \$350 million. Peak savings of \$300 million are expected by the end of 2008. The sale of SF Chem resulted in an additional charge of \$108m.

Cash flow and balance sheet: Free cash flow, post acquisitions, of \$623 million reflected the increase in operating income, a reduction in working capital in the second half and lower net financial expense. The ratio of average trade working capital as a percentage of sales was 40 percent (2003: 42 percent). Fixed capital expenditure of \$166 million was below depreciation of \$250 million.

At period end net debt was \$864 million (2003: \$1.2 billion) representing a gearing ratio of 15 percent (2003: 24 percent).

Taxation: The underlying tax rate for the year was 25 percent (2003: 37 percent). This significant reduction was due to the earlier-than-expected completion of the tax structure optimization. The ongoing tax rate is expected to remain in the mid to low twenties for the foreseeable future.

Cash return to shareholders: In February 2004 the company announced its intention to return over \$800 million to shareholders between 2004 and 2006. A total dividend of \$142 million was paid in July. In May the company commenced a share repurchase program; by end December 1.7 million shares had been repurchased at an average price of CHF 107.2 which equates to \$143 million. These shares will be cancelled, subject to approval at the Annual General Meeting (AGM) on 26 April.

In view of the ongoing strength of financial performance, the 2004 to 2006 cash return program has been enhanced to more than \$1 billion. As part of this program a dividend of CHF 2.70, to be paid by way of a nominal par value reduction, will be submitted for shareholder approval at the AGM on 26 April.

Outlook

Michael Pragnell, Chief Executive Officer, said:

□2004 marked a new phase in the evolution of Syngenta. Against a background of favorable market conditions, we made significant progress in delivering our strategy. We remain committed to reinforcing market leadership in Crop Protection and Field Crops seeds; driving growth in the consumer-led businesses of Professional Products and Vegetables and Flowers seeds; and capturing opportunity in new businesses. Our confidence in our people, our ability to innovate and to exploit our broad portfolio and commercial reach, leads us to re-affirm our target of high-teens growth in earnings per share* in each of the next two years. It also enables us to enhance our three year cash return program to shareholders to more than \$1 billion by end 2006.□

* Fully diluted, before restructuring, impairment, IFRS 3 adjustment and one-off tax credit.

SYNGENTA FULL YEAR RESULTS 2004 / PAGE 3 OF 32

Crop Protection

For a definition of constant exchange rates and of range rationalization, see Appendix A and Appendix B respectively.

Product line	Full Year					4 th Quarter				
	2004 \$m	2003 \$m	Actual %	Growth CER %	Ex RR (CER) %	2004 \$m	2003 \$m	Actual %	Growth CER %	Ex RR (CER) %
Selective herbicides	1867	1717	+ 9	+ 4	+ 6	296	285	+ 4	+1	+ 4
Non-selective herbicides	645	616	+ 5	+ 2	+ 2	104	107	- 3	- 4	- 4

Others	59	48	+21	+16	+16	26	6	+271	+266	+266
Total	6030	5421	+11	+ 7	+ 8	1181	1099	+ 7	+ 5	+ 6

Selective Herbicides: major brands CALLISTO® family, DUAL®/BICEP® MAGNUM, ENVOKE®, FUSILADE® MAX, TOPIK®

Sales of selective herbicides were driven by the CALLISTO® range, which further extended market penetration in the US corn-belt augmented by the launch of LEXAR® in central and southern states. CALLISTO® also expanded rapidly in Europe. A decline in sales of DUAL®/ BICEP® MAGNUM in the USA was partly offset by growth in other regions. ENVOKE® made a significant contribution following its launch on cotton in the USA and generated further growth in Brazil. TOPIK® was particularly successful in southern Europe and in the expanding markets of Eastern Europe, where sales were up by more than 50 percent.

Non-selective Herbicides: major brands GRAMOXONE®, TOUCHDOWN®

Edgar Filing: SYNGENTA AG - Form 6-K

GRAMOXONE® sales increased strongly in China following planned channel inventory reduction in 2003 but were lower in Australia owing to drought. A strong recovery in TOUCHDOWN® sales in the second half, with volume increases in NAFTA and Latin America, was partially offset by ongoing price pressure in the USA.

Fungicides: major brands ACANTO®, AMISTAR®, BRAVO®, RIDOMIL GOLD®, SCORE®, TILT®, UNIX®

Fungicides registered strong growth across all regions. AMISTAR® sales were driven primarily by soybean *rust* in Brazil and increased demand on several crops in the USA. Growth in Europe reflected recovery from drought in 2003 and the launch of combination programs to combat cereal *septoria* resistance, notably with BRAVO®.

Insecticides: major brands ACTARA®, FORCE®, KARATE®, PROCLAIM®, VERTIMEC®

ACTARA® continued to increase penetration in many markets. KARATE® sales benefited from the strength of Latin American markets and from high pest pressure in Europe. US sales of FORCE® declined due to a reduction in demand for soil-based corn rootworm insecticides in favor of seed treatment; this was partly offset by increased sales in Eastern Europe.

SYNGENTA FULL YEAR RESULTS 2004 / PAGE 4 OF 32

Professional Products: major brands CRUISER®, DIVIDEND®, HERITAGE®, ICON®, MAXIM®

Seed treatments continued to gain popularity among growers in all regions. The main driver of growth was the further success of CRUISER® in the USA, and on soybean in Brazil. Fungicide seed treatments also grew strongly, notably MAXIM® in Brazil and France. Turf sales improved with better weather conditions in the USA and an expansion of direct sales to golf courses in Japan.

Regional	Full Year					4th Quarter				
	2004 \$m	2003 \$m	Actual %	CER %	Ex RR (CER) %	2004 \$m	2003 \$m	Actual %	CER %	Ex RR (CER) %
Europe, Africa & Middle East	2251	1978	+14	+ 5	+ 6	366	358	+ 2	- 5	- 4
NAFTA	1869	1848	+ 1	-	+ 1	194	218	-11	-11	-11
Latin America	1017	748	+36	+36	+37	396	278	+42	+42	+42
Asia Pacific	893	847	+ 6	+ 1	+ 2	225	245	- 8	-10	- 7
Total	6030	5421	+11	+ 7	+ 8	1181	1099	+ 7	+ 5	+ 6

Sales in **Europe, Africa and the Middle East** demonstrated growth across all product lines, following drought in 2003, with notable contributions from the entire fungicide range and selective herbicides, particularly CALLISTO®. Double-digit increases were registered in France and Eastern Europe, the latter benefiting from increased investment in agriculture and economic growth.

In **NAFTA** sales of selective herbicides were stable in a challenging market whilst non-selectives continued to be affected by price pressure in glyphosate in the USA, which offset volume growth. Fungicide sales growth was driven primarily by the success of AMISTAR®. Insecticide sales were lower, due to a reduction in the sales of FORCE® and, to a lesser extent, KARATE®. Professional Products □ notably seed treatment and turf □ performed well. Strong growth continued in Mexico and in Canada, with the roll-out of CRUISER® on canola.

Latin America: Sales expanded across the portfolio in Brazil and Argentina as the international competitiveness of growers and strong export demand encouraged an increase in acreage under cultivation. The strongest growth was generated by insecticides, notably ACTARA®, and by fungicides, with a significant increase in AMISTAR® sales to control the spread of soybean *rust*. The launch of the combination product PRIORI XTRA®, with both preventative and curative action, further strengthened Syngenta's position in this important new market.

In **Asia Pacific** underlying demand in Japan was strong. Sales grew strongly in China where channel inventories have now returned to normal levels. India showed good growth and sales in Australia improved in the second half.

Seeds

For a definition of constant exchange rates, see Appendix A.

SYNGENTA FULL YEAR RESULTS 2004 / PAGE 5 OF 32

Field Crops: major brands NK® corn, NK® oilseeds, HILLESHÖG® sugar beet

Sales of NK® corn grew across all regions. Demand for NK® soybean was strong throughout the year, although reported sales were lower due to the alignment of fourth quarter sales closer to consumption in the USA for the coming season. In oilseeds NK® sunflower performed well; sugar beet sales increased in buoyant Eastern European markets.

Vegetables and Flowers: major brands S&G® vegetables, ROGERS® vegetables, S&G® flowers

Sales of vegetables grew in all regions. In the USA, sales of DULCINEATM products exceeded \$30 million with the continued growth of PUREHEART™ seedless watermelons and the successful launch of a cantaloupe melon. In Europe, a strong performance in S&G® fresh tomatoes, melons and squash more than offset market pressure in the processing segment.

Sales of S&G® flowers also increased across all regions reflecting strong genetics for young plants, effective supply chain management and implementation of a direct sales model.

SYNGENTA FULL YEAR RESULTS 2004 / PAGE 16 OF 32

Notes to the Condensed Consolidated Financial Statements

Note 1: Basis of Preparation

Nature of operations: Syngenta AG (‘‘Syngenta’’) is a world leading crop protection and seeds business that is engaged in the discovery, development, manufacture and marketing of a range of agricultural products designed to improve crop yields and food quality.

Basis of presentation and accounting policies: The condensed consolidated financial statements and notes thereto have been extracted from the consolidated financial statements. The consolidated financial statements for the year ended 31 December 2004 have been prepared in accordance with International Financial Reporting Standards (IFRS), which comprise standards and interpretations approved by the International Accounting Standards Board (IASB), and International Accounting Standards and Standing Interpretations Committee interpretations approved by the International Accounting Standards Committee (IASC) that remain in effect. The condensed consolidated financial statements have been prepared in accordance with our policies as set out in the 2003 Financial Report, except as noted below. These principles differ in certain significant respects from generally accepted accounting principles in the United States (‘‘US GAAP’’). Application of US GAAP would have affected shareholders’ net income and equity for the year ended 31 December 2003 and 2004 as detailed in Note 6.

The condensed consolidated financial statements are presented in United States dollars (‘‘\$’’) as this is the major trading currency of the company.

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual

results could differ from those estimated.

Note 2: Changes in Accounting Policies - IFRS

The IASB issued several new or revised accounting standards between December 2003 and March 2004. These standards are mandatory for Syngenta as from 1 January 2005. Wherever practicable, Syngenta has adopted these standards early as from 1 January 2004. Notes 2 and 34 to the consolidated financial statements contain a full description of the changes. The main points are given below. The adjustments for changes which have been applied retrospectively to 2003 were given in the media release issued by Syngenta on 18 January 2005.

Syngenta adopted IAS 1 (revised 2003), "Presentation of Financial Statements" early, as from 1 January 2004, and has consequently presented minority interests in the condensed consolidated income statement as an allocation of net income, and within equity in the condensed consolidated balance sheet. Previously, minority interests were presented in the income statement as a deduction from net income, and positioned in the balance sheet between liabilities and shareholders' equity.

Syngenta adopted IAS 21 (revised 2003), "The Effects of Changes in Foreign Exchange Rates", early, as from 1 January 2004. This revised standard has had two effects:

Syngenta has accounted for goodwill and fair value adjustments arising on 2004 business combinations in the currencies of the acquired entities. This did not have a material effect on the consolidated financial statements. Goodwill and fair value adjustments on earlier business

SYNGENTA FULL YEAR RESULTS 2004 / PAGE 17 OF 32

combinations continue to be accounted for as previously, mainly in US dollars, as permitted by the revised standard.

Certain long term loans between Syngenta group companies are no longer treated as part of the group's net investment in the borrowing subsidiary for foreign currency translation purposes. As a result, currency translation differences on these loans are now recorded in the income statement, whereas previously they were recorded as a movement on shareholders' equity. This change did not have a material effect on the 2004 consolidated income statement.

Syngenta adopted IFRS 2, "Share Based Payment" early, as from 1 January 2004. IFRS 2 requires Syngenta to record the fair value of share and share option grants to its employees as an expense. Previously, these grants were accounted for within shareholders' equity as transactions with shareholders. Syngenta's employee share and share option schemes are described, and details of transactions given, in Note 27 to the consolidated financial statements. Syngenta has calculated the expense for 2003 using the same model based on the Black-Scholes-Merton formula, and the same inputs, which it used in previous years to prepare the SFAS No.123 pro-forma disclosures required by US GAAP in the consolidated financial statements. Syngenta has recorded share based compensation expense in 2004 of \$33 million before tax, on a consistent basis with 2003.

Syngenta applied IFRS 3, "Business Combinations", to the 2004 acquisitions mentioned in Note 3 below, as immediate application of IFRS 3 to business combinations with an agreement date after 31 March 2004, is mandatory. The main effects of the new standard compared to applying the previous standard, IAS 22, is that goodwill on those acquisitions has not been amortized, and all costs of restructuring the acquired businesses have been shown within restructuring and impairment in the consolidated income statement; under IAS 22, the goodwill would have been amortized and cash restructuring costs of \$9 million would have been recorded as part of purchase accounting. For goodwill on previous acquisitions, Syngenta will apply IFRS 3 and the related changes in IAS 36, "Impairment of Assets" (revised March 2004), and IAS 38, "Intangible Assets" (revised March 2004) as from 1 January 2005, as permitted by those standards. As a result, Syngenta will cease to amortize that goodwill as

from that date. Amortization charged in the consolidated income statement on that goodwill in 2004 was \$56 million.

Syngenta adopted IFRS 5, "Non-current Assets held for Sale and Discontinued Operations" early, as from 1 January 2004. In accordance with IFRS 5, SF-Chem AG has been reported as a discontinued operation. SF-Chem results, together with the loss on disposal, have been shown on a post-tax basis in a single, separate line within the condensed consolidated income statement. As required by IFRS 5, the 2003 income statement has been restated to present it consistently with 2004.

As from 1 January 2004, Syngenta has presented \$46 million of royalty income as part of sales, and related royalty expense of \$28 million within cost of goods sold. The change has no effect on Syngenta's consolidated net income, balance sheet or cash flow statement.

Note 3: Changes in the Scope of Consolidation

On 1 September 2004, after Fox Paine acquired a 10 percent interest in the Advanta corn, soybean and wheat seed business in North America, Syngenta acquired 100 percent of the shares of Advanta B.V. On 8 September 2004, Syngenta sold Advanta B.V.'s European, Asian and Latin American subsidiaries and other parts of its North America business to Fox Paine & Co. ("Fox Paine disposals"). The net cash cost of acquisition, after proceeds for the Fox Paine disposals and cash acquired was \$325 million. After the Fox Paine disposals, Syngenta retains a 90 percent interest in Advanta's former corn, soybean and wheat seed business in North America.

SYNGENTA FULL YEAR RESULTS 2004 / PAGE 18 OF 32

On 31 July 2004, in a single transaction, Syngenta acquired a 90 percent voting interest in each of the following entities which are collectively referred to as "Golden Harvest": Garwood Seed Co.; Golden Seed Co. LLC; Golden Seed Co. Inc.; J C Robinson Seeds Inc.; Sommer Bros Seed Co.; Thorp Seed Co.; Golden Harvest Seeds Inc. The cost of acquisition, net of cash acquired, was \$154 million.

In January 2004, Syngenta acquired additional shares in Dia Engei K.K, increasing its shareholding from 33.5 percent to 100 percent. In March 2004, Syngenta formed Dulcinea Farms LLC, in which it has a 51 percent voting interest. In June 2004, Syngenta purchased additional shares in Syngenta Suzhou Crop Protection Co. Ltd, increasing its holding from 95 percent to 100 percent. In May 2004, Syngenta purchased additional shares in Syngenta Nantong Crop Protection Co. Ltd, increasing its holding from 94 percent to 98 percent. The aggregate cash cost of these acquisitions was \$6 million.

On 30 September 2004 Syngenta sold its 75 percent interest in its sulphur and chlorine-based chemical intermediates business, SF-Chem AG, to a private equity buyer. This business was shown as part of the Crop Protection segment, and has been presented as a discontinued operation in the consolidated income statement and in the consolidated cash flow statement.

Note 4: Restructuring and Impairment

For the year to 31 December	2004		2003	
	\$m	\$m	\$m	\$m
Restructuring costs:				
Write-off or impairment				
- property, plant & equipment	(132)		(44)	
- intangible assets	(1)		-	
- inventories	(1)		-	

Non-cash pension restructuring charges	(50)	9	
Cash costs			
- operational efficiency	(136)	-	
- Seeds acquisition integration	(16)	-	
- merger and other cash costs	(19)	(184)	
Total		(355)	(219)
Other impairment of assets		-	-
Gains from product disposals		1	17
Gain on sale of technology & intellectual property license		-	39
Total restructuring and impairment charge		(354)	(163)

Restructuring represents the effect on reported performance of initiating business changes which are considered major and which, in the opinion of management, will have a material effect on the nature and focus of Syngenta's operations, and therefore require separate disclosure to provide a more thorough understanding of business performance. Restructuring includes the effects of completing and integrating significant business combinations and divestments. The incidence of these business changes may be periodic and the effect on reported performance of initiating them will vary from period to period. Because each such business change is different in nature and scope, there will be little continuity in the detailed composition and size of the reported amounts which affect performance in successive periods. Separate disclosure of these amounts facilitates the understanding of performance including and excluding items affecting comparability. Reported performance before restructuring and impairment is one of the measures used in Syngenta's short term employee incentive compensation schemes. Syngenta's definition of restructuring and impairment may not be comparable to similarly titled line items in financial statements of other companies.

SYNGENTA FULL YEAR RESULTS 2004 / PAGE 19 OF 32

Restructuring and impairment includes the impairment costs associated with major restructuring and also impairment losses and reversals of impairment losses resulting from major changes in the markets in which a reported segment operates.

As part of the operational efficiency program, the closure of three production sites has been announced together with the rationalization of two further production sites. A further focusing of R&T activities, including the closure of one site, has also been announced. The Seeds NAFTA corn and soybean business announced a restructuring program to integrate the Advanta and Golden Harvest acquisitions. The final costs related to the merger restructuring program, associated with the closure of two production sites, were also charged in 2004. Cash costs of \$171 million and asset impairments totaling \$134 million have been recorded in 2004 for these restructuring initiatives. In addition, the rules of Syngenta's Swiss pension plan were amended in April 2004 so that, whilst it continues to be accounted as a defined benefit plan, there is increased sharing of risks with the employee members against a one-time non-cash transition charge of \$60 million. The change will reduce the expense related to early retirement in 2005 and future years, and reduces Syngenta's exposure to pension fund investment returns. This charge has been partially offset by an \$10 million favorable non-cash impact of pension fund curtailments associated with restructuring.

Note 5: Principal Currency Translation Rates

As an international business selling in over 100 countries, with major manufacturing and R&D facilities in Switzerland, the UK and the USA, movements in currencies impact business performance. The principal currencies and adopted exchange rates against the US dollar used in preparing the financial statements contained in this communication were as follows:

	Average 2004	Average 2003	Period end 31 December 2004	Period end 31 December 2003
Brazilian real. BRL	2.94	3.12	2.66	2.90
Swiss franc. CHF	1.25	1.35	1.13	1.24
Euro. EUR	0.81	0.89	0.73	0.79
British pound. GBP	0.55	0.61	0.52	0.56
Japanese yen. JPY	108.1	116.5	102.6	106.9

The above average rates are an average of the monthly rates used to prepare the condensed consolidated income and cash flow statements. The period end rates were used for the preparation of the condensed consolidated balance sheet.

SYNGENTA FULL YEAR RESULTS 2004 / PAGE 20 OF 32

Note 6: Reconciliation to US GAAP from the Condensed Consolidated Financial Statements

The condensed consolidated financial statements have been prepared in accordance with IFRS which, as applied by Syngenta, differs in certain significant respects from US GAAP. The effects of the application of US GAAP to net income and equity are set out in the following tables:

	2004 \$m	2003 \$m
Net income (for the year ended 31 December)		
Net income/(loss) under IFRS attributable to Syngenta AG shareholders	460	250
US GAAP adjustments:		
Purchase accounting:		
Zeneca agrochemicals	62	43
Other acquisitions	(62)	(67)
Impairment losses	(1)	(3)
Restructuring charges	47	32
Pension provisions (including post-retirement benefits)	43	2
Deferred taxes on stock-based compensation	(3)	2
Deferred taxes on unrealized profit in inventory	(61)	36
Other items	(17)	(4)
Deferred tax valuation allowances	(34)	-
Tax on undistributed earnings of subsidiaries	(27)	-
Deferred tax effect on US GAAP adjustments	(55)	(41)
Net income/(loss) under US GAAP attributable to Syngenta AG shareholders	352	250
Weighted average number of ordinary shares in issue (million) □ basic	105.209	101.682
Weighted average number of ordinary shares in issue (million) □ diluted	106.015	101.800

Earnings/(loss) per share under US GAAP (basic)	\$3.35	\$2.46
Earnings/(loss) per share under US GAAP (diluted)	\$3.32	\$2.45

For the year ended 31 December 2004, net income under IFRS attributable to Syngenta AG shareholders was \$460 million, compared to a net income of \$352 million under US GAAP.

The application of the purchase method to business combinations completed in prior periods, and the subsequent accounting for goodwill, are different under IFRS and US GAAP. For intangible assets, this has led to different balance sheet values and amortization charges in each subsequent accounting period, including 2003 and 2004. Also, as Syngenta adopted SFAS No. 142 "Goodwill and Intangible Assets" as of 1 January 2002, it ceased to record goodwill amortization for US GAAP from that date, but has continued to amortize for IFRS. The \$62 million reconciling item for Zeneca agrochemicals principally represents the goodwill amortization expense recorded under IFRS. The \$(62) million reconciling item for other acquisitions mainly arises because the Sandoz and Ciba-Geigy merger was accounted for as a uniting of interests under IFRS. For US GAAP the merger was accounted for as a purchase, including recognition and subsequent amortization of purchased product rights.

The \$47 million reconciling item for restructuring provisions represents employee termination costs which have been recorded under IFRS, but have not been recognized for US GAAP because the employees affected will continue to work beyond the minimum retention period stipulated by SFAS No.146. These costs will be recognized for US GAAP in future periods as the employees complete their remaining service. The \$43 million reconciling item for pensions mainly represents past service cost arising from the amendment to the Swiss pension plan. Under IFRS, this cost has been recognized in full in the period, because the related benefits vested immediately. US GAAP requires the cost to be recognized over the expected future service of the employees affected.

SYNGENTA FULL YEAR RESULTS 2004 / PAGE 21 OF 32

The reconciling item for deferred taxes on unrealized intra-group profit in inventory arises because IFRS requires the tax effect of unrealized profit elimination to be measured using the tax rates of the countries in which inventories are held, and US GAAP requires it to be measured using the tax rates of the countries in which the unrealized profit was made. The \$(61) million adjustment for 2004 reflects changes in the mix of countries holding the inventories and the differential between the applicable IFRS and US GAAP tax rates on the significant increase in the balance of unrealized profit in inventory compared to 2003.

The reconciling item for deferred tax valuation allowances arises because, where a Syngenta entity has a recent history of tax losses due to restructuring plans, and the forecast future benefits of the restructurings are expected to enable the tax losses to be utilized, IFRS allows a deferred tax asset to be recognized whereas US GAAP does not. The reconciling item for tax on undistributed earnings of subsidiaries arises because IFRS requires provision for tax on future internal dividend payments within the Syngenta group only if a dividend payment is expected to be made, whereas US GAAP requires a provision for tax on all dividends which could, in practice, be paid.

Shareholders' equity (as at 31 December)	2004 \$m	2003 \$m
Shareholders' equity under IFRS	5658	5056
US GAAP adjustments:		
Purchase accounting:		
Zeneca agrochemicals	(483)	(494)
Other acquisitions	806	868
Impairment losses	23	23
Restructuring charges	76	26

Pension provisions (including post-retirement benefits)	(176)	(166)
Deferred taxes on stock-based compensation	(13)	4
Deferred taxes on unrealized profit in inventory	(79)	(3)
Other items	32	32
Deferred tax valuation allowances	(35)	-
Tax on undistributed earnings of subsidiaries	(27)	-
Deferred tax effect on US GAAP adjustments	(134)	(144)
Shareholders' equity under US GAAP	5648	5202

The \$176 million reconciling item in shareholders' equity for pension provisions at 31 December 2004 includes \$229 million which has been directly charged to US GAAP shareholders' equity (2003: \$169 million). US GAAP, unlike IFRS, requires this charge to equity so that provisions are at least equal to the unfunded pension liability for each pension plan on an accumulated benefit basis. The discount rate used to measure pension liabilities is based on corporate bond yields, which fell during 2004. This caused an additional \$54 million charge to equity during 2004, which does not affect cash or earnings. The \$229 million was offset by the deferral of past service costs arising from the Swiss pension plan amendment.

Note 7: New US GAAP Accounting Pronouncements

Where permitted, Syngenta has changed its US GAAP accounting policies in 2004 in line with the changes to its IFRS accounting policies described in Note 2 above, including adoption of the fair value method of accounting for stock-based compensation for US GAAP. No other new US GAAP pronouncements with a material effect on the consolidated financial statements were adopted by Syngenta in the year ended 31 December 2004.

SYNGENTA FULL YEAR RESULTS 2004 / PAGE 22 OF 32

Supplementary Financial Information

Appendix A: Constant Exchange Rates (CER)

In this report results from one period to another period are, where appropriate, compared using constant exchange rates (CER). To present that information, current period results for entities reporting in currencies other than US dollars are converted into US dollars at the prior period's exchange rates, rather than at the exchange rates for the current year. CER margin percentages for gross profit and EBITDA are calculated by the ratio of these measures to sales after restating the measures and sales at prior period exchange rates. The CER presentation indicates the underlying business performance before taking into account currency exchange fluctuations. See Note 5: Principal Currency Translation Rates on page 20 for information on average exchange rates in 2004 and 2003.

Appendix B: Sales Excluding Range Rationalization (Ex RR)

Following the formation of Syngenta, the Crop Protection business has sought to improve business quality and create value through the rationalization and modernization of the product portfolio. From 121 active ingredients (AIs) at the time of the merger, the range had been reduced to 78 AIs by the end of 2004 and the program is now complete. In addition, various third party products previously formulated and distributed by Syngenta but generating lower levels of profitability have been exited. Sales growth rates excluding rationalization impact have been calculated by excluding the sales decline at constant exchange rates between current year and prior period caused by these phase-out products.

Appendix C: Free Cash Flow

Free cash flow comprises cash flow after operating activities, investing activities, taxes and operational financing activities prior to discontinued operations and capital financing activities such as drawdown or repayment of debt, dividends paid to Syngenta Group shareholders, share repurchase and other equity movements. Free cash flow is not a measure of financial performance under generally accepted accounting principles and the free cash flow measure used by Syngenta may not be comparable to similarly titled measures of other companies. Free cash flow has been included as it is used by many investors as a useful supplementary measure of cash generation.

For the year to 31 December	2004	2003⁽¹⁾
	\$m	\$m
Cash flow from operating activities	1309	791
Cash flow used for investing activities	(686)	(232)
Free cash flow	623	559

(1) Adjusted in accordance with recent changes in accounting standards, see Note 2 on page 17.

SYNGENTA FULL YEAR RESULTS 2004 / PAGE 23 OF 32

Appendix D: Reconciliation of EBITDA⁽²⁾ to Net Income

EBITDA is defined as earnings before interest, tax, minority interests, depreciation, amortization and impairment. Information concerning EBITDA has been included as it is used by management and by investors as a supplementary measure of operating performance and is used by Syngenta as the basis of part of its employee incentive schemes. Management focuses on EBITDA excluding restructuring as this excludes items affecting comparability from one period to the next. EBITDA is not a measure of cash liquidity or financial performance under generally accepted accounting principles and the EBITDA measures used by Syngenta may not be comparable to other similarly titled measures of other companies. EBITDA should not be construed as an alternative to operating income or cash flow as determined in accordance with generally accepted accounting principles.

	2004	2003⁽¹⁾
	\$m	\$m
Net income attributable to Syngenta AG shareholders	460	250
Minority interests	(32)	4
Income tax (credit)/expense	(70)	134
Financial expenses, net	73	138
Pre-tax restructuring and impairment	354	163
Discontinued operations	108	(6)
Depreciation, amortization and other impairment	502	497
EBITDA excluding restructuring	1395	1180

Appendix E: Reconciliation of Segment EBITDA to Segment Operating Income⁽²⁾

	2004			2003 ⁽¹⁾		
	Crop Protection \$m	Seeds \$m	Plant Science \$m	Crop Protection \$m	Seeds \$m	Plant Science \$m
Operating income	1030	5	(140)	758	59	(133)
Income/(loss) from associates and joint ventures	(2)	2	(2)	(1)	2	(2)
Depreciation, amortization and other impairment	435	61	6	446	44	7
EBITDA	1463	68	(136)	1203	105	(128)

(1) Adjusted in accordance with recent changes in accounting standards, see Note 2 on page 17.

(2) Excluding restructuring and impairment, see Note 4 on page 19.

SYNGENTA FULL YEAR RESULTS 2004 / PAGE 24 OF 32

Appendix F: Net Debt Reconciliation

Net debt comprises total debt net of related hedging derivatives and cash and cash equivalents. Net debt is not a measure of financial position under generally accepted accounting principles and the net debt measure used by Syngenta may not be comparable to the similarly titled measure of other companies. Net debt has been included as it is used by many investors as a useful measure of financial position and risk. The following table provides a reconciliation of movements in net debt during the period:

	2004 \$m	2003 ⁽¹⁾ \$m
Opening balance at 1 January	1209	1671
Acquisitions and other non-cash items	90	(33)
Foreign exchange effect on net debt	(12)	68
Purchase/(sale) of treasury shares	98	(4)
Dividends paid to group shareholders	142	65
Dividends paid to minorities	1	-
Discontinued operations	(41)	1
Free cash flow	(623)	(559)
Closing balance as at 31 December	864	1209
Constituents of closing balance;		
Cash and cash equivalents	(227)	(206)
Current financial debts	423	749
Non-current financial debts	1117	1017
Financing-related derivatives (2)	(449)	(351)

Closing balance at 31 December	864	1209
---------------------------------------	------------	-------------

(1) Adjusted in accordance with recent changes in accounting standards, see Note 2 on page 17.

(2) Included within other current assets.

The following table presents the derivation of the Debt/Equity gearing ratio:

	2004 \$m	2003 ⁽¹⁾ \$m
Net debt	864	1209
Shareholders' equity	5658	5056
Debt/Equity gearing ratio (%)	15%	24%

Appendix G: Period End Trade Working Capital

The following table provides detail of trade working capital at the period end as a percentage of twelve-month sales:

	2004 \$m	2003 ⁽¹⁾ \$m
Inventories	2192	1811
Trade accounts receivable	1887	1707
Trade accounts payable	(1466)	(862)
Net trade working capital	2613	2656
Twelve-month sales	7269	6525
Trade working capital as percentage of sales (%)	36%	41%
