Title: Head Shareholder Services

& Group Administration

#### Item 1

Basel, Switzerland, July 24, 2013

#### 2013 Half Year Results

### Continuing sales momentum

- Sales \$8.4 billion, up 2 percent
- Underlying integrated sales excluding corn rootworm royalty 7 percent higher1
  - growth across all regions
- Double digit growth in emerging markets
- Lower royalty income, higher seeds production costs
- EBITDA \$2.2 billion: 3 percent lower, up 9 percent underlying
- Earnings per share \$15.92: 7 percent lower, up 9 percent underlying

	Reported Financial Highlights							
	1st Half	1st Half						
	2013	20123	Actual	CER1				
	\$m	\$m	%	%				
Sales	8,390	8,265	+2	+2				
Operating income	1,792	1,821	-2					
Net income4	1,409	1,487	-5					
EBITDA	2,179	2,250	-3	-5				
Earnings per share2	\$15.92	\$17.03	-7					

All figures expressed as underlying exclude \$256m corn rootworm trait royalty income in 2012.

- 1 Growth at constant exchange rates.
- 2 Excluding restructuring and impairment; EPS on a fully-diluted basis.
- 3 2012 stated after effect of accounting policy change for employee benefits.
- 4 Net income to shareholders of Syngenta AG (equivalent to diluted earnings per share of \$15.23).

Mike Mack, Chief Executive Officer, said:

"I am pleased that we delivered underlying integrated sales growth of seven percent in the first half despite unfavorable weather and late planting in the northern hemisphere. This reflects the success of full commercial integration and our ongoing expansion in emerging markets. Underlying profitability improved despite higher seeds production costs, with price increases across all product lines and tight control of operating expenses. New product launches demonstrated the power of our innovation and the scope of our integrated offers continues to expand.

"Our customers are becoming increasingly aware of the need for a broad toolbox encompassing chemistry and genetics in order to maximize yield and improve crop quality and reliability. In the emerging markets, we continue to seek out opportunities to expand the range of technologies available to growers. Africa represents a major opportunity in this respect and we have just announced the acquisition of the MRI white corn seed business in Zambia, which is a further step towards our goal of building a \$1 billion business in Africa by 2022. Our performance in the first half attests to our ability to achieve sustainable growth in both emerging and developed markets and reinforces our confidence in achieving integrated sales of \$25 billion in 2020."

Financial highlights 1st Half 2013

Sales \$8.4 billion

Sales increased by two percent on both a reported and constant currency basis. Underlying integrated sales, adjusted for corn rootworm trait revenue in 2012, were up seven percent (CER) with volume up four percent and prices three percent higher.

EBITDA \$2.2 billion

Underlying EBITDA was up nine percent with an EBITDA margin of 26.0 percent (H1 2012: 24.9 percent). Volume growth and price increases, together with further operational efficiency savings, more than offset higher seeds production costs and increased investment in R&D. Reported EBITDA was three percent lower including a positive currency impact of \$44 million.

Net financial expense and taxation

Net financial expense of \$90 million was slightly higher (2012: \$84 million). The tax rate was 18 percent compared with 16 percent in 2012.

Net income \$1.4 billion

Net income including restructuring and impairment was five percent lower. Earnings per share, excluding restructuring and impairment, were seven percent lower at \$15.92 but increased by nine percent on an underlying basis.

Cash flow and balance sheet

Free cash flow of \$(359) million reflected a seasonal build-up of working capital in line with strong sales growth. Average trade working capital as a percentage of sales was slightly higher at 37 percent compared with 36 percent in the first half of 2012. Fixed capital expenditure including intangibles was \$274 million (H1 2012: \$239 million); for the full year 2013 capital expenditure in the range of \$700 to \$750 million is expected.

#### Dividend and share repurchase

A dividend of CHF 9.50 per share (2012: CHF 8.00) was paid on April 30, representing a total payout of \$921 million.

With effect from July 25 the company will open a second trading line on the SIX Swiss Exchange with a view to tactical share repurchases during the remainder of the year.

#### Business highlights 1st Half 2013

	Half Year		G <sub>1</sub>	owth	2nd Q	Quarter	Growth		
	2013	2012	Actual	CER	2013	2012	Actual	CER	
	\$m	\$m	%	%	\$m	\$m	%	%	
Europe, Africa, Middle									
East	3,165	3,008	+5	+6	1,229	1,249	-2	+1	
North America	2,628	2,781	-5	-5	1,287	1,512	-15	-14	
Latin America	1,174	1,043	+13	+12	606	546	+11	+10	
Asia Pacific	1,057	997	+6	+8	532	467	+14	+16	
Total integrated sales	8,024	7,829	+3	+3	3,654	3,774	-3	-2	
Lawn and Garden1	366	436	-16	-14	166	187	-11	-8	
Group sales	8,390	8,265	+2	+2	3,820	3,961	-4	-2	

#### Integrated sales performance

• Sales \$8.0 billion, underlying sales up 7%

volume +4%, price +3%

• EBITDA \$2.1 billion (H1 2012: \$2.2 billion)

• EBITDA margin 26.2% (H1 2012: 28.0%)

Europe, Africa and the Middle East: A strong first quarter was followed by a cold wet spring which reduced the number of crop protection applications, particularly for fungicides in northern Europe. Overall growth for the first half was driven by the CIS, France, Iberia and the emerging markets of South East Europe. Performance in the CIS reflected the ongoing intensification of agriculture and Syngenta's leading market position, with sunflower sales making a strong contribution. Sunflower also drove growth in South East Europe. In France the rapid expansion of AXIAL® on cereals and CALLISTO® on corn continued. The Iberian markets staged a strong recovery following last year's drought and economic constraints.

North America: The reported decline in sales is due to the non-recurrence of milestone royalties for the 604 corn rootworm trait totaling \$256 million in the first half of 2012. Underlying sales were up four percent despite a delayed planting season due to cold weather. Performance was strong across the crop protection portfolio with the largest contribution coming from seed care, reflecting the successful launch of VIBRANCE® on cereals, canola and soybean. Seed sales were constrained by the drought of 2012 which reduced the availability of new traited hybrids.

All sales commentaries are at constant exchange rates.

Syngenta – July 24, 2013 / Page 3 of 45

Latin America: Strong sales growth in the low season was driven by Brazil and Argentina, where grower sentiment remains strong in a buoyant crop price environment. Significant contributions came from sugar cane, seed care and corn seed, where new trait combinations are proving their success. Demand for TOUCHDOWN® benefited from a shortage of glyphosate supply from competitors. Sales in Venezuela were lower due to uncertain credit conditions following the change in government.

Asia Pacific: Growth accelerated in the second quarter, with a rebound from adverse weather in Australasia and good progress across the emerging markets, particularly Indonesia and Thailand. In ASEAN GroMore<sup>TM</sup> protocols continued to expand on rice. In South Asia an early monsoon contributed to double digit growth with particularly strong performances in corn and vegetables. China saw broad-based growth with a notable contribution from AMISTAR®, with a new launch on rice.

Lawn and Garden performance

- Sales \$366 million, 14% lower
- EBITDA \$77 million (H1 2012: \$57 million)
- EBITDA margin 21.2% (H1 2012: 13.2%)

Sales excluding divestments and acquisitions were up four percent. Developed markets saw modest comparable growth despite adverse weather and emerging markets expanded rapidly from a small base. The divestments in 2012 were made in order to focus the business on elite genetics and high-value chemistry. They have resulted in a significant improvement in profitability, in line with the target of a 20 percent full year EBITDA margin in 2015.

Acquisitions: On July 3 Syngenta announced the acquisition of MRI Seed Zambia Ltd and MRI Agro Ltd, a leading developer, producer and distributor of white corn seed in Zambia. By further developing and increasing the availability of the MRI white corn varieties in other East African markets, Syngenta plans to contribute to food security in the region. The MRI distribution network will also facilitate the introduction of integrated offers including crop protection and seed care.

New partnerships: In May Syngenta signed a Memorandum of Understanding (MOU) with the US Agency for International Development (USAID) to support agriculture and food security activities in Africa, Asia and Latin America. Under the MOU, USAID and Syngenta will further collaborate in research and development and smallholder capacity building, working with key agriculture and food security partners. Syngenta and USAID already work together in many countries.

In May Syngenta and DuPont signed a chemistry licensing agreement which gives Syngenta access to the active ingredient oxathiapiprolin which offers a different mode of action for disease control across a range of crops. DuPont receives access to Syngenta's Solatenol<sup>TM</sup> for certain mixtures in Brazil, which will contribute to maximizing market coverage for this product upon launch.

Crop pipelines: At a crop update for Diverse Field Crops held in Krasnodar, Russia on July 9 - 11, Syngenta reaffirmed its target of over \$2.2 billion in sales for these crops by 2020. Key drivers will be sunflower intensification, particularly for the CIS, total farm integrated solutions in Canada and new seed care launches across crops.

Syngenta – July 24, 2013 / Page 4 of 45

#### Outlook

Mike Mack, Chief Executive Officer, said:

"For the second half of the year we expect an acceleration of underlying sales growth based on the positive outlook for Latin America and Asia Pacific. In Latin America, we expect the high commodity price to encourage further investment in soybean, where we continue to have a leading market position underpinned by the increasing integration of our offers. We also see ongoing expansion of the opportunity in sugar cane and significant further potential for our corn trait portfolio. In Asia Pacific, we aim to expand our leadership position in the emerging markets, where strong growth is expected to continue.

"For the full year, we remain on track to deliver sales growth in line with our longer term objective. We also expect to achieve growth in underlying earnings and to generate substantial free cash flow. Looking further ahead, we maintain our target of an EBITDA margin in the range of 22 to 24 percent in 2015, and will focus on delivering sustained sales growth and further increases in profitability supported by cost efficiency and the leverage of our integrated offers."

Syngenta – July 24, 2013 / Page 5 of 45

#### **Crop Protection**

	Half	Ialf Year Growth		2nd	Quarter	Growth		
Crop Protection	2013	2012	Actual	CER	2013	2012	Actual	CER
by product line	\$m	\$m	%	%	\$m	\$m	%	%
Selective herbicides	1,985	1,922	+3	+4	974	1,010	-4	-2
Non-selective								
herbicides	746	597	+25	+26	444	363	+23	+23
Fungicides	1,783	1,732	+3	+4	857	831	+3	+4
Insecticides	72	872	_	+1	392	410	-4	-3
Seed care	581	484	+20	+20	202	170	+18	+19
Other crop protection	50	67	-26	-25	23	29	-20	-21
Total	6,017	5,674	+6	+7	2,892	2,813	+3	+4

Selective herbicides: major brands AXIAL®, CALLISTO® family, DUAL®/BICEP® MAGNUM, FUSILADE®MAX, TOPIK®

A strong first quarter was followed by slightly lower sales in the second quarter as unfavorable weather in the northern hemisphere reduced applications. Growth for the first half was driven by AXIAL® on cereals in France and Canada, resistance management solutions in the USA and the expansion of CALLISTO® in Europe. Corn herbicides also performed well in Asia Pacific, where they are part of 'First 45 day solutions' enabling small scale growers to establish yield potential.

Non-selective herbicides: major brands GRAMOXONE®, TOUCHDOWN®

Growth was driven mainly by TOUCHDOWN®, notably in Latin America. Strong demand and a shortage of supply from competitors resulted in significant volume and price gains. Sales of GRAMOXONE® were also higher with increased demand in a number of ASEAN countries and in China.

Fungicides: major brands ALTO®, AMISTAR®, BRAVO®, REVUS®, RIDOMIL GOLD®, SCORE®, SEGURIS®, TILT®, UNIX®

Growth was sustained throughout the first half despite fewer applications in Europe due to cold weather in the second quarter. North American sales expanded rapidly in the second quarter with inventories resulting from the 2012 drought having been absorbed earlier in the year. The new product SEGURIS® for cereals was successfully launched in Germany; it also recorded growth in Latin America and made initial sales in North East Asia. Growth in AMISTAR® was driven by Brazil and by the emerging markets of Asia Pacific where fungicide adoption is expanding rapidly; in China sales were up by almost 50 percent following a new launch on rice.

Insecticides: major brands ACTARA®, DURIVO®, FORCE®, KARATE®, PROCLAIM®, VERTIMEC®

Sales were driven by growth in Brazil: in Europe and Asia Pacific sales were slightly lower. Globally the largest contribution came from the new product DURIVO®, sold in a variety of formulations across crops, which grew in all regions with sales up nearly 40 percent overall. ACTARA® saw significant growth in Brazil.

Syngenta - July 24, 2013 / Page 6 of 45

Seed care: major brands AVICTA®, CRUISER®, DIVIDEND®, CELEST®/MAXIM®, VIBRANCE®

The largest contribution to growth came from the new product VIBRANCE®, which achieved sales of over \$80 million after its first launch in North America. The product is sold in various formulations for cereals, canola and soybean. CRUISER® also showed double digit growth driven by expansion in Brazil and across Asia Pacific; sales in China doubled.

	Half	Year	Growth		2nd (	Quarter	Gro	wth
Crop Protection	2013	2012	Actual	CER	2013	2012	Actual	CER
by region	\$m	\$m	%	%	\$m	\$m	%	%
Europe, Africa, Middle								
East	2,204	2,132	+3	+4	937	966	-3	-1
North America	1,884	1,739	+8	+9	994	955	+4	+5
Latin America	1,029	926	+11	+11	529	497	+7	+6
Asia Pacific	900	877	+3	+5	432	395	+10	+12
Total	6,017	5,674	+6	+7	2,892	2,813	+3	+4

#### Seeds

	Half Year		Gro	wth	2nd	Quarter	Growth		
Seeds	2013	2012	Actual	CER	2013	2012	Actual	CER	
by product line	\$m	\$m	%	%	\$m	\$m	%	%	
Corn and soybean	1,018	1,268	-20	-20	318	561	-43	-43	
Diverse field crops	646	549	+18	+19	231	193	+20	+23	
Vegetables	390	378	+3	+3	223	216	+3	+4	
Total	2,054	2,195	-6	-6	772	970	-20	-19	

Corn and soybean: major brands AGRISURE®, GOLDEN HARVEST®, NK®

The decline in reported sales is due to the non-recurrence of milestone royalties for the 604 corn rootworm trait totaling \$256 million in the first half of 2012. Underlying sales were slightly higher. In the USA, drought constrained the availability of some hybrids; acres increased however for new traited offers including refuge-in-a-bag (RIB), ENOGEN® for corn ethanol and AGRISURE®ARTESIAN<sup>TM</sup> for water optimization. Strong early season sales in Latin America also reflected the expansion of new trait offers. In Asia Pacific, sales are being driven by intensification and the adoption of integrated solutions.

Diverse field crops: major brands NK® oilseeds, HILLESHÖG® sugar beet

Sales growth accelerated in the second quarter with an excellent performance by sunflower in the CIS and South East Europe. Growth in these markets reflected favorable spring crop conditions, ongoing intensification and strong market recognition for Syngenta's leading hybrids. Sunflower also performed strongly in Argentina. In Asia Pacific, where the business includes rice, sales more than doubled reflecting the acquisition of Devgen and the expansion of TEGRA® programs. Sugar beet sales were lower in the CIS owing to an acreage reduction but grew significantly in China.

Syngenta - July 24, 2013 / Page 7 of 45

Vegetables: major brands DULCINEA®, ROGERS®, S&G®

The vegetables business is confirming its return to growth. With economic recession still having some impact on consumption of high value fresh produce in developed countries, growth was driven by the emerging markets notably Latin America. Sales also showed significant growth in South Asia, reflecting an early monsoon and the ability to capture value from leading hybrids for okra, tomato and cauliflower.

	Half	Year	Growth		2nd Quarter		Grow	/th
Seeds	2013	2012	Actual	CER	2013	2012	Actual	CER

A dividend of CHF 9.50 (\$10.01) (2012: CHF 8.00 (\$8.82)) per share was paid to Syngenta AG shareholders during the period.

Syngenta - July 24, 2013 / Page 13 of 45

Syngenta Group

Notes to Interim Condensed Consolidated Financial Statements

Note 1: Basis of preparation

Nature of operations: Syngenta AG ("Syngenta") is a world leading agribusiness operating in the Crop Protection, Seeds and Lawn and Garden markets. Crop Protection chemicals include herbicides, insecticides, fungicides and seed treatments to control weeds, insects and diseases in crops, and are essential inputs enabling growers around the world to improve agricultural productivity and food quality. In Seeds, Syngenta operates in the high value commercial sectors of field crops (including corn, oilseeds, cereals and sugar beet) and vegetables. The Lawn and Garden business provides professional growers and consumers with flowers, turf and landscape products.

Basis of presentation and accounting policies: The condensed consolidated financial statements for the six months ended June 30, 2013 and 2012 incorporate the financial statements of Syngenta AG and of all of its subsidiaries ("Syngenta Group"). They have been prepared in accordance with IAS 34, "Interim Financial Reporting", and, except as disclosed in Note 3 below, with the accounting policies described in Note 2 to Syngenta's 2012 annual consolidated financial statements. Syngenta prepares its annual consolidated financial statements in accordance with International Financial Reporting Standards (IFRSs) as issued by the International Accounting Standards Board (IASB). The condensed consolidated financial statements were authorized for issue by the Board of Directors on July 23, 2013.

The condensed consolidated financial statements are presented in United States dollars (\$) as this is the major currency in which revenues are denominated.

Impairment losses recognized on goodwill and available-for-sale equity securities in interim financial statements are not reversed in the annual financial statements even if the decline in value which caused the impairment loss to be recognized has reversed by the end of the annual reporting period.

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimated.

Note 2: Seasonality of operations

The timing of Syngenta's sales, profit and cash flows throughout the year is significantly influenced by seasonal factors. Operating in the agriculture sector, sales of Syngenta's products principally occur before and during the growing season. Because many of Syngenta's largest markets are in the northern hemisphere, which has a spring growing season, significantly more sales occur and profit is earned during the first half of the year than in the second half. Collections of trade accounts receivable from customers in these northern hemisphere markets largely occur during the second half of the year. As a result, operating cash flow typically is significantly lower during the first half of the year than during the second half.

Syngenta – July 24, 2013 / Page 14 of 45

Note 3: Adoption of new IFRSs

Adoption of new IFRSs

Syngenta has adopted the following new or revised IFRSs from January 1, 2013, with the following effect. These IFRSs have not been early adopted and, except where stated otherwise, their adoption had no impact on these condensed consolidated financial statements:

IFRS 10, "Consolidated Financial Statements", establishes the control concept as the sole criterion for consolidation, and clarifies that control is an investor's ability to use its power over another entity to affect the variable returns derived from its involvement with that entity. Syngenta's consolidation scope and the accounting treatment of its investments in other entities was unaffected by the adoption of IFRS 10.

IFRS 11, "Joint Arrangements" contains revised guidance for distinguishing joint operations, where each party accounts for its own rights and obligations from jointly controlled entities, for which IFRS 11 requires the equity method of accounting. Syngenta previously applied the equity method to its jointly controlled entities in accordance with IAS 31, "Joint Ventures", which has been replaced by IFRS 11. The accounting treatment of Syngenta's joint arrangements was unaffected by the adoption of IFRS 11.

IFRS 12, "Disclosures of Interests in Other Entities", requires additional disclosures in Syngenta's annual consolidated financial statements.

IFRS 13, "Fair Value Measurement", introduced guidance on how to measure fair value. As part of adopting IFRS 13, Syngenta is required to disclose additional information about the fair values of its financial assets and financial liabilities in its interim condensed consolidated financial statements. Please see Note 11 below for this information.

Syngenta has adopted the amendments in "Annual Improvements to IFRSs, 2009-2011 Cycle", other than those which it had already early adopted in its 2012 consolidated financial statements.

"Disclosures – Offsetting Financial Assets and Financial Liabilities", Amendments to IFRS 7, requires disclosures both about assets and liabilities that have been offset in the balance sheet and about amounts covered by conditional set-off rights which do not meet the criteria for offsetting. Please see Note 11 for information about set-off rights that apply to certain Syngenta financial assets and liabilities.

IAS 19, "Employee Benefits" (revised June 2011). The main changes which this revised IFRS introduces are as follows:

- In respect of defined benefit post-employment plans and other post-retirement benefits:
- -actuarial gains and losses must be recognized in full in OCI. This was already Syngenta's accounting policy, so adoption of this requirement has no impact on Syngenta's condensed consolidated financial statements;
- -interest on the net recognized defined benefit asset or liability must be recognized in profit or loss, in place of the previously separate recognition of interest cost on the benefit obligation and of an expected return on plan assets. This change increased pre-tax benefit expense for the six months ended June 30, 2012 by \$16 million, with a corresponding increase in actuarial gains recognized in OCI. Deferred income tax related to these amounts was also recognized;

Syngenta – July 24, 2013 / Page 15 of 45

- -past service cost arising from plan amendments must be recognized in full in profit or loss in the period in which the plan amendment occurs, in place of the previous requirement to recognize such costs over the vesting period for the amended benefits. At June 30, 2012, Syngenta had a \$14 million pre-tax liability for unrecognized past service gains (December 31, 2012: \$12 million). Upon adoption of the revised IFRS, this past service gain has been recognized retrospectively by reducing pension liabilities and increasing retained earnings brought forward at January 1, 2012, and the related deferred income tax liabilities have been increased. The impact on Syngenta's profit or loss for the six months ended June 30, 2012 was immaterial;
- -for plans requiring plan members to contribute to the cost of their benefits, actuarial calculations now allocate both employee contributions and gross benefits to accounting periods, rather than only the gross benefit before deducting member contributions as has previously been actuarial practice. For Syngenta's Swiss pension plan, which has a cash balance benefit formula, this requirement reduced the amount recognized for its defined benefit obligation by \$24 million at June 30, 2012, before related deferred income tax effects (December 31, 2012: \$25 million). Syngenta has recognized this accounting change retrospectively in retained earnings brought forward at January 1, 2012. The related impact on Syngenta's profit or loss for 2012 was immaterial. Syngenta believes the impact of this requirement on contributory plans with final salary benefit formulae, which include its UK pension plan, is immaterial. This point is the subject of a current IASB Exposure Draft that proposes a further amendment to IAS 19. Syngenta's US pension and other post-employment plans are non-contributory and therefore will not be impacted by this requirement;
- -presentation requirements for changes in the recognized asset or liability have been revised and additional disclosures are required.
- -In respect of termination benefits, restructuring costs incurred to retain the services of employees during a transition period in excess of applicable legal minimums will now be expensed over the required retention period, instead of being recognized in full when the restructuring and the retention benefits are communicated to employees. The impact of adopting this requirement on restructuring expense and provisions for the periods presented in these condensed consolidated financial statements is immaterial.

The impact of adopting IAS 19, "Employee Benefits" (revised June 2011), has been applied retrospectively in accordance with IAS 8 and the effect on the comparative information presented for each financial statement line item is set out in the following tables. Except for the effect on the accounting for the 2013 amendment to Syngenta's Swiss pension plan described in Note 6 below, the effect of adopting IAS 19 (revised June 2011) on each financial statement line item for the six months ended June 30, 2013 is not materially different from the effect on the respective financial statement line item for the six months ended June 30, 2012.

New IFRSs which Syngenta has not yet adopted

The following new or revised IFRSs relevant to the Syngenta Group have not yet been adopted by Syngenta. Except where stated otherwise, Syngenta is still assessing the impact of these new IFRSs and does not intend to adopt them early:

IFRS 9, "Financial Instruments", issued in November 2009 and October 2010 and amended in December 2011, represents the published part of a larger IFRS which the IASB is developing. It contains new measurement and classification rules for financial assets and financial liabilities. The currently published version of IFRS 9 requires adoption by January 1, 2015 at the latest. Given the IASB's stated intention to publish further parts of, and amendments to, IFRS 9 before that date, Syngenta has not yet decided whether to adopt IFRS 9 early.

"Investment Entities", (Amendments to IFRS 10, IFRS 12 and IAS 27), published in October 2012, must be applied with effect from January 1, 2014. The Amendments require a parent company that is an investment entity to account for its investments in subsidiaries at fair value through profit or loss, instead of consolidating them. Syngenta is not an investment entity as defined by the Amendments.

"Offsetting Financial Assets and Financial Liabilities", Amendments to IAS 32, permits financial assets and financial liabilities to be offset against each other for balance sheet presentation only where a currently existing, legally enforceable, unconditional right of offset applies to all counterparties of the financial instruments in all situations, including both normal operations and insolvency. Syngenta must adopt the amendments retrospectively from January 1, 2014.

"Recoverable Amount Disclosures for Non-Financial Assets", Amendments to IAS 36, was published in May 2013 and must be applied retrospectively from January 1, 2014.

IFRIC 21, "Levies", was published in May 2013 and contains guidance on when a liability should be recognized in respect of government levies in accordance with IAS 37. IFRIC 21 must be applied retrospectively from January 1, 2014.

Syngenta – July 24, 2013 / Page 19 of 45

"Novation of Derivatives and Continuation of Hedge Accounting", Amendments to IAS 39, was published in June 2013 and clarifies that, subject to certain conditions, hedge accounting need not be discontinued when existing derivative contracts are novated to a different counterparty as a consequence of laws and regulations. Adoption of the amendments is required retrospectively from January 1, 2014. Syngenta has not yet decided whether to adopt the Amendments early.

Note 4: Business combinations, divestments and other significant transactions

Six months ended June 30, 2013

On January 28, 2013 and March 6, 2013, Syngenta acquired the remaining equity interests in deVGen N.V. ("Devgen") that it did not already own after its initial takeover offer was settled in December 2012. Cash paid for these non-controlling interests was \$37 million and was accounted for as a settlement of the liability Syngenta had recognized for non-controlling shareholders' put rights at December 31, 2012. This amount is shown as cash flows used for financing activities in the condensed consolidated cash flow statement.

As disclosed in its 2012 annual consolidated financial statements, Syngenta acquired Sunfield Seeds Inc. ("Sunfield"), a US based provider of sunflower seeds production and processing services, in November 2012. Goodwill on this acquisition was \$31 million and mainly represents the benefits to Syngenta of integrating Sunfield's additional production and processing into Syngenta's operations. Syngenta does not expect to be able to claim a tax deduction for this goodwill. The unallocated purchase price at December 31, 2012 has been provisionally allocated and the assets and liabilities recognized in respect of Sunfield have changed as follows compared with December 31, 2012:

(\$m)		
Trade receivables and other assets	36	
Intangible assets	14	
Deferred tax and other liabilities	(46	)
Net assets acquired	4	

The changes in the fair values of the net assets acquired and the goodwill recognized are not considered material to the 2012 consolidated financial statements and therefore the consolidated balance sheet at December 31, 2012 has not been restated.

The accounting for the acquisitions of Pasteuria Bioscience Inc. ("Pasteuria") and Devgen, in November and December 2012, respectively, remains provisional in respect of the deferred tax assets recognized for the estimated unused tax loss carryforwards at the acquisition date because the amount of those tax loss carryforwards is in the process of being finalized. Syngenta has made no adjustments to the assets, liabilities, acquisition date fair value of contingent consideration or goodwill for those acquisitions during the six months ended June 30, 2013.

Payments, receipts and changes in estimates of deferred and contingent consideration related to acquisitions and divestments completed in prior periods were not material.

Syngenta – July 24, 2013 / Page 20 of 45

#### Six months ended June 30, 2012

During the six month period ended June 30, 2012, Pioneer Hi-Bred International Inc. ("Pioneer") received U.S. EPA approval for a seed stack containing the MIR604 trait licensed by Syngenta to Pioneer. As a result, it became virtually certain that Syngenta would receive additional contractual minimum consideration with a present value of approximately \$200 million. This amount was recognized as royalty revenue in the six month period ended June 30, 2012 and was receivable in cash over the period to October 2016.

On June 11, 2012, Syngenta divested the Fafard peat unit of its Lawn and Garden business to Sun Gro Horticulture Ltd. on a cash and debt free basis. The income statement and cash flow effects of the transaction were reported in Restructuring within General and administrative and in Acquisitions and divestments, net, respectively.

Acquisition payments of \$15 million in the six months ended June 30, 2012 comprised contingent and deferred consideration related to several acquisitions completed in prior periods.

### Note 5: Segmental information

Syngenta is organized on a worldwide basis into five operating segments: the four geographic regions, comprising the integrated crop protection and seeds business, and the global Lawn and Garden business. Some costs of the integrated organization do not relate to a geographic destination and are reported as non-regional.

No operating segments have been aggregated to form the above reportable segments.

2 After effect of accounting policy change for employee benefits as described in Note 3. \$15 million expense allocated to Non-regional, \$2 million to North America, \$1 million to Lawn and Garden.

All activities were in respect of continuing operations.

Syngenta – July 24, 2013 / Page 22 of 45

#### Note 6: General and administrative

In May 2013, the Board of Trustees of Syngenta's Swiss pension plan adopted revised rules for the plan. The principal change has aligned the required annuity conversion rates for retirement benefits more closely with current actuarial rates. This reduced Syngenta's defined benefit obligation. Syngenta has accounted for the changes as a plan amendment, in accordance with IAS 19 (revised June 2011). Based on an actuarial valuation at the date of the change, Syngenta has recognized an estimated past service gain of approximately \$35 million. This amount has been recognized in full within General and administrative for the six months ended June 30, 2013 because no meaningful allocation of the gain by function is possible. The valuation discount rate used to measure the defined benefit obligation was 2.0 percent (December 31, 2012: 2.0 percent) and the only change in other valuation assumptions compared with December 31, 2012 was to reflect the impact of the revised rules on retirement age. If the previous version of IAS 19 had still been applied, Syngenta estimates that the past service gain amount recognized in the six months ended June 30, 2013 would have been greater, mainly because of the impact of different requirements for recognizing vesting conditions associated with the changes.

As a result of the settlement of litigation related to the herbicide atrazine, a net expense of \$80 million was recognized within General and administrative during the six month period ended June 30, 2012.

General and administrative includes gains of \$4 million (2012: losses of \$12 million) on hedges of forecast transactions, which were recognized during the period.

Note 7: Restructuring

For the six months ended June 30,		
(\$m)	2013	2012
Operational efficiency programs:		
Cash costs	16	32
Non-cash impairment costs	-	1
Integrated crop strategy programs:		
Cash costs	26	51

Other non-current asset impairments	14	5
Total restructuring1	83	121

1\$nil (2012: \$4 million) is included within Cost of goods sold.

Syngenta – July 24, 2013 / Page 23 of 45

Restructuring represents the effect on reported performance of initiating and enabling business changes that are considered major and that, in the opinion of management, will have a material effect on the nature and focus of Syngenta's operations, and therefore require separate disclosure to provide a more thorough understanding of business performance. Restructuring includes the incremental costs of closing, restructuring or relocating existing operations, and gains or losses from related asset disposals. Restructuring also includes the effects of completing and integrating significant business combinations and divestments, including related transaction costs, gains and losses. Recurring costs of normal business operations and routine asset disposal gains and losses are excluded.

Impairment includes impairment losses associated with major restructuring as well as impairment losses and reversals of impairment losses resulting from major changes in the markets in which a reported segment operates.

The incidence of these business changes may be periodic and the effect on reported performance of initiating them will vary from period to period. Because each such business change is different in nature and scope, there will be little continuity in the detailed composition and size of the reported amounts which affect performance in successive periods. Separate disclosure of these amounts facilitates the understanding of performance including and excluding items affecting comparability. Syngenta's definition of restructuring and impairment may not be comparable to similarly titled line items in financial statements of other companies.

Six months ended June 30, 2013

#### Operational efficiency programs

Operational efficiency cash costs of \$16 million include \$11 million of costs related to the completion of the projects to standardize and consolidate global back office operations. A further \$5 million of charges were incurred for various projects including restructuring at the corporate headquarters and outsourcing of information systems.

### Integrated crop strategy programs

Cash costs of \$26 million include \$9 million for information system infrastructure projects, \$11 million of charges for consultancy and advisory services, re-training of employees and project management, and \$6 million of other costs.

#### Acquisitions and divestments

Cash costs of \$11 million include \$7 million incurred to integrate previous acquisitions and \$4 million of charges related to uncompleted transactions.

As part of the Greenleaf acquisition in 2010, Syngenta reacquired exclusive licensing rights that it had previously granted to Greenleaf. In accordance with IFRS, the reacquired rights were recognized as an intangible asset and are being amortized over the remaining term of the original license contract, three years. Divestment losses consist of closing adjustments to the fair value of the consideration on the 2012 divestments of the SHS Horticultural Services business and the Fafard peat unit.

#### Other non-cash restructuring and impairment

Exceptional inventory write-downs of \$6 million were made in connection with the restructuring of the Flowers product range. Other non-current asset impairments include \$8 million for the impairment of an available-for-sale financial asset and \$6 million for the impairment of a trademark, which will be phased out during 2013.

Six months ended June 30, 2012

#### Operational efficiency programs

Operational efficiency cash costs of \$26 million were incurred in the regions for the standardization and consolidation of back office operations, which continued in 2012. \$6 million of other operational efficiency charges included charges for project management, standard process design and restructuring in the corporate headquarters.

### Integrated crop strategy programs

Cash costs of \$18 million were incurred for the continuing integration of commercial operations of sales and marketing teams in the regions. \$30 million was charged to the regions for support function projects, including \$13 million for severance and pension costs and \$17 million for developing and supporting the strategic transition, process re-design, consultancy and advisory services, retention, relocation, and re-training of employees, and project management. \$3 million of costs related to restructuring the organization of the global Research and Development function.

### Acquisitions and divestments

Acquisition and integration cash costs related mainly to uncompleted transactions. Reversal of inventory step-ups related to the acquisitions of Maribo Seeds, the Pybas and Synergene lettuce companies and the buy-out of the Greenleaf non-controlling interest. Amortization of reacquired rights related to exclusive licensing rights that Syngenta had previously granted to Greenleaf, which were reacquired as part of the Greenleaf acquisition. Divestment losses were incurred on the divestment of the Fafard peat unit.

#### Other non-cash restructuring and impairment

Impairment charges related to the write-down of land in the USA that was acquired as part of a business combination.

#### Note 8: Non-cash items included in income before taxes

For the six months ended June 30,				
(\$m)	20	13	2012	1
Depreciation, amortization and impairment of:				
Property, plant and equipment	164		170

<sup>1</sup> After effect of accounting policy change for employee benefits as described in Note 3.

Syngenta – July 24, 2013 / Page 25 of 45

#### Note 9: Principal currency translation rates

As an international business selling in over 100 countries and having major manufacturing and research and development facilities in Switzerland, the UK, the USA and India, movements in currencies impact Syngenta's business performance. The principal currencies and exchange rates against the US dollar used in preparing the condensed consolidated financial statements were as follows:

		Average				
		six months ended	June 30,	June 30,	June 30,	December 31,
Per \$		2013	2012	2013	2012	2012
Swiss franc	CHF	0.93	0.92	0.95	0.96	0.92
British pound	GBP	0.65	0.63	0.66	0.64	0.62
Euro	EUR	0.76	0.76	0.77	0.80	0.76
Brazilian real	BRL	2.03	1.84	2.22	2.02	2.05

The average rates presented above are an average of the monthly rates used to prepare the condensed consolidated income and cash flow statements. The period end rates were used for the preparation of the condensed consolidated balance sheet.

Note 10: Issuances, repurchases and repayments of debt and equity securities

Six months ended June 30, 2013

During the six months ended June 30, 2013, there were no share repurchases and no treasury shares were reissued except in accordance with Syngenta's share based payment plans.

During the six months ended June 30, 2013, a CHF bond with principal of CHF 500 million was fully repaid at maturity.

Six months ended June 30, 2012

During the six months ended June 30, 2012, Syngenta repurchased 13,500 of its own shares at a cost of \$4 million, relating to the share repurchase program announced in February 2012. No treasury shares were reissued except in accordance with Syngenta's share based payment plans.

During the six months ended June 30, 2012, Syngenta issued \$750 million in US dollar denominated bonds, comprising a \$500 million bond with an interest rate of 3.125 percent and a ten year maturity, and a \$250 million bond with an interest rate of 4.375 percent and a thirty year maturity.

Syngenta – July 24, 2013 / Page 26 of 45

#### Note 11: Financial instruments

The following table shows the carrying amounts and fair values of financial assets and liabilities by category of financial instrument and a reconciliation to where they are presented on the balance sheet at June 30, 2013. The fair value hierarchy is shown for those financial assets and liabilities that are carried at fair value in the condensed consolidated balance sheet.

	Carrying amount (based on		
	mea	asurement bas	sis)
At June 30, 2013	Fair value	Fair value	
(\$m)	level 1	level 2	Total
Trade receivables, net:			
Designated at fair value through profit and loss	-	59	59
Loans and receivables			5,588
Total			5,647
Derivative and other financial assets:			
Derivative financial assets	7	115	122
Loans and receivables			31
Total			153
Financial and other non-current assets:			
Available-for-sale financial assets	5	73	78
Designated at fair value through profit and loss	-	20	20
Derivative financial assets – non-current	-	3	3
Loans and receivables			277
Other, not carried at fair value			343
Total			721
Current financial debt and other financial liabilities:			
Derivative financial liabilities - current	-	165	165
Measured at amortized cost			1,994
Total			2,159

The levels of fair value hierarchy used above are defined as follows:

Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 fair value measurements are those derived from inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data.

The valuation techniques and inputs used by Syngenta to derive level 2 fair value measurements of the above financial assets and liabilities are as described in Note 2 to Syngenta's 2012 annual consolidated financial statements.

Syngenta – July 24, 2013 / Page 27 of 45

The fair value of unquoted equity securities is not material. There were no transfers during the six month period ended June 30, 2013 between level 1 and level 2 of the fair value hierarchy; between the fair value and amortized cost categories; nor into or out of level 3 of the fair value hierarchy.

The following tables show the effect of set off rights that apply to financial assets and liabilities subject to enforceable master netting or similar arrangements. These arrangements consist of International Swaps and Derivatives Association (ISDA) master agreements between Syngenta and its derivative counterparties, and for certain derivative positions, Credit Support Annex (CSA) contracts under which cash is exchanged as collateral. Syngenta's rights under these arrangements would become enforceable in the event of a future default of the respective counterparty.

Note 12: Commitments and contingencies

There was no significant change in the total amount of commitments and contingencies at June 30, 2013, compared with December 31, 2012.

Note 13: Subsequent events

On July 3, 2013, Syngenta announced that it has agreed to acquire MRI Seed Zambia Ltd and MRI Agro Ltd ("MRI"), a leading developer, producer and distributor of white corn seed in Zambia. The transaction is subject to regulatory approvals and is expected to close by the end of 2013.

Syngenta – July 24, 2013 / Page 28 of 45

### Supplementary financial information

2012 supplementary financial information is presented after the effect of adoption of IAS 19, "Employee Benefits" (revised June 2011), described in Note 3 to Syngenta's interim condensed consolidated financial statements.

### Supplementary financial information

### Appendix A: Constant exchange rates (CER)

Results in this report from one period to another period are, where appropriate, compared using constant exchange rates (CER). To present that information, current period results for entities reporting in currencies other than US dollars are converted into US dollars at the prior period's exchange rates, rather than at the exchange rates for the current year. CER margin percentages for gross profit and EBITDA are calculated by the ratio of these measures to sales after restating the measures and sales at prior period exchange rates. The CER presentation indicates the underlying business performance before taking into account currency exchange fluctuations.

### Appendix B: Reconciliation of EBITDA to net income

EBITDA is defined as earnings before interest, tax, non-controlling interests, depreciation, amortization, restructuring and impairment. Information concerning EBITDA has been included as it is used by management and by investors as a supplementary measure of operating performance. Management excludes restructuring and impairment from EBITDA in order to focus on results excluding items affecting comparability from one period to the next. EBITDA is not a measure of cash liquidity or financial performance under generally accepted accounting principles and the EBITDA measures used by Syngenta may not be comparable to other similarly titled measures of other companies. EBITDA should not be construed as an alternative to operating income or cash flow as determined in accordance with generally accepted accounting principles.

For the six months	ended June 30,
--------------------	----------------

(\$m)	2013	2012
Net income attributable to Syngenta AG shareholders	1,409	1,487

Syngenta – July 24, 2013 / Page 37 of 45

### Appendix D: Free cash flow

Free cash flow comprises cash flow from operating and investing activities:

- excluding investments in and proceeds from marketable securities, which are included in investing activities;
- •excluding cash flows from and used for foreign exchange movements and settlement of related hedges on inter-company loans, which are included in operating activities; and
- including cash flows from acquisitions of non-controlling interests, which are included in financing activities.

Free cash flow is not a measure of financial performance under generally accepted accounting principles and the free cash flow measure used by Syngenta may not be identical to similarly titled measures in other companies. Free cash flow has been included as many investors consider it to be a useful supplementary measure of cash generation.

For the six months ended June 30,

(\$m)	20	13	20	012
Cash flow (used for)/from operating activities	(68	)	177	
Cash flow used for investing activities	(248	)	(178	)
Cash flow (from)/used for marketable securities	(7	)	16	
Cash flow used for acquisition of non-controlling interests	(37	)	-	
Cash flow used for/(from) foreign exchange movements and settlement of hedges of				
inter-company loans	1		(49	)
Free cash flow	(359	)	(34	)

#### Appendix E: Period end trade working capital

The following table expresses trade working capital as a percentage of sales for the twelve-month periods ended June 30, 2013 and 2012:

(\$m)	2013	2012
Inventories	4,652	3,759
Trade accounts receivable	5,647	5,277
Trade accounts payable	(4,170 )	(3,688)
Net trade working capital	6,129	5,348
Twelve-month sales	14,327	13,831
Trade working capital as percentage of sales (%)	43	39

In addition to period end trade working capital and due to the seasonal nature of its business, Syngenta also monitors average trade working capital as a percentage of sales. This is determined by dividing the average month-end net trade working capital for the past twelve months by sales for the same twelve-month period.

Syngenta – July 24, 2013 / Page 38 of 45

### Appendix F: Net debt reconciliation

Net debt comprises total debt net of related hedging derivatives, cash and cash equivalents and marketable securities. Net debt is not a measure of financial position under generally accepted accounting principles and the net debt measure used by Syngenta may not be comparable to the similarly titled measure of other companies. Net debt has been included as many investors consider it to be a useful measure of financial position and risk. The following table provides a reconciliation of movements in net debt during the period:

For the six months ended June 30,

(\$m)	201	13	201	12
Opening balance at January 1	1,706		1,135	
Debt acquired with business acquisitions and other non-cash items	57		90	
Foreign exchange effect on net debt	(3	)	(59	)
Purchase/(sale) of treasury shares	(62	)	(54	)
Dividends paid	921		791	
Free cash flow	359		34	
Closing balance at June 30	2,978		1,937	
Components of closing balance:				
Cash and cash equivalents	(785	)	(1,664	)
Marketable securities1	(4	)	(19	)
Current financial debt	1,994		1,260	
Non-current financial debt2	1,712		2,357	
Financing-related derivatives3	61		3	
Closing balance at June 30	2,978		1,937	

<sup>1</sup> Long-term marketable securities are included in Financial and other non-current assets. Short-term marketable securities are included in Derivative and other financial assets.

#### 2 Included in Financial debt and other non-current liabilities.

3 Short-term derivatives are included in Derivative and other financial assets and Current financial debt and other financial liabilities. Long-term derivatives are included in Financial and other non-current assets and Financial debt and other non-current liabilities.

The following table presents the derivation of the Debt/equity gearing ratio at June 30, 2013 and 2012:

(\$m)	2013	2012
Net debt	2,978	1,937
Shareholders' equity	9,031	8,227
Debt/equity gearing ratio (%)	33	24

Syngenta – July 24, 2013 / Page 39 of 45

### Appendix G: Adoption of IAS 19 "Employee Benefits" (revised June 2011)

The effect of adopting IAS 19, "Employee Benefits" (revised June 2011), as described in Note 3 to Syngenta's interim condensed consolidated financial statements, is set out in the following tables for the years ended December 31, 2012 and 2011:

Changes to condensed consolidated income statement

Item 2

Basel, Switzerland, July 24, 2013

Syngenta launches second trading line on SIX Swiss Exchange for the repurchase of registered shares

On April 24, 2012 the Annual General Meeting of Syngenta AG authorized the Syngenta Board of Directors to repurchase registered shares under a new share repurchase program up to a maximum value of 10% of the company's share capital, for the purpose of capital reduction.

On the basis of this authorization, Syngenta is establishing a second trading line on the SIX Swiss Exchange, through which a maximum of 9,312,614 registered shares, each with a face value of CHF 0.10, can be repurchased. Syngenta has no plans at present to make full use of the maximum repurchase potential but wishes to secure flexibility for tactical share repurchase transactions.

The share repurchase can take place through the second trading line on the SIX Swiss Exchange between July 25, 2013 and July 22, 2016.

Syngenta is one of the world's leading companies with more than 27,000 employees in over 90 countries dedicated to our purpose: Bringing plant potential to life. Through world-class science, global reach and commitment to our customers we help to increase crop productivity, protect the environment and improve health and quality of life. For more information about us please go to www.syngenta.com.

#### Forward-looking statements

This document contains forward-looking statements which use terms such as "expect", "will", "could", "potential", "planned", "envisages", "estimated value", "target" etc. Such statements contain risks and imponderables which could result in a significant deviation of the actual results from the statements expressed herein. We refer you to the publicly available filings of Syngenta submitted to the American SEC (Securities and Exchange Commission) in relation to these and other risks and imponderables. Syngenta does not undertake to update the forward-looking statements in light of actual results, changed assumptions or other factors. This document represents neither an offer nor an invitation, or even a part of such an offer or such an invitation, to purchase or underwrite common shares issued by Syngenta Inc. or Syngenta ADS. Nor does it represent a request to take up such a purchase offer or public offering and it in no way forms a basis or reliable statement in connection with a contract to this effect.
