**RAVEN INDUSTRIES, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
*(unaudited)*

**(1) Basis of Presentation and Description of Business**

The accompanying unaudited consolidated financial information has been prepared by Raven Industries, Inc. (the company) in accordance with accounting principles generally accepted in the United States of America for interim financial information and the instructions to Form 10-Q and Article 10 of Regulation S-X of the Securities and Exchange Commission (SEC). Accordingly, it does not include all of the information and notes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair statement of this financial information have been included. Financial results for the interim three-month period ended April 30, 2009 are not necessarily indicative of the results that may be expected for the year ending January 31, 2010. The January 31, 2009 consolidated balance sheet was derived from audited financial statements, but does not include all disclosures required by accounting principles generally accepted in the United States of America. This financial information should be read in conjunction with the consolidated financial statements and notes included in the company's Annual Report on Form 10-K for the year ended January 31, 2009.

The primary types of operating expenses are classified in the income statement as follows:

Cost of Good Sold	Selling, General, and Administrative Expenses
Direct material costs	Personnel costs
Material acquisition and handling costs	Professional service fees
Direct labor	Advertising
Factory overhead including depreciation	Promotions
Inventory obsolescence	Information technology equipment depreciation
Product warranties	Office supplies
Research and development	

The company's gross margins may not be comparable to industry peers due to variability in the classification of these expenses across the industries in which the company operates.

**(2) Net Income Per Share**

Basic net income per share is computed by dividing net income by the weighted-average common shares and stock units outstanding. Diluted net income per share is computed by dividing net income by the weighted-average common and common equivalent shares outstanding (which includes the shares issuable upon exercise of employee stock options net of shares assumed purchased with the option proceeds) and stock units outstanding. Certain outstanding options were excluded from the diluted net income per-share calculations because their effect would have been anti-dilutive, as their exercise prices were greater than the average market price of the company's common stock during those periods. For the three months ended April 30, 2009 and 2008, 382,975 and 226,950 options, respectively, were excluded from the diluted net income per-share calculation. Details of the computation are presented below:

	<b>Three Months Ended</b>

**Table of Contents****(3) Segment Reporting**

The company's reportable segments are defined by their common technologies, production processes and inventories. These segments are consistent with the company's management reporting structure and reflect the organization of the company into the three Raven divisions and the Aerostar subsidiary. Raven Canada and Raven GmbH are included in the Applied Technology Division. The company measures the performance of its segments based on their operating income exclusive of administrative and general expenses. Other income, interest expense and income taxes are not allocated to individual operating segments. Intersegment transactions are eliminated in a separate caption entitled intersegment eliminations to arrive at consolidated sales and operating income. First quarter intersegment sales were primarily from Electronic Systems to Applied Technology. The results for these segments follow:

<i>(in thousands)</i>	<b>Three Months Ended</b>	
	<b>April 30, 2009</b>	<b>April 30, 2008</b>
Net sales		
Applied Technology	\$ 29,434	\$ 34,846
Engineered Films	13,358	22,005
Electronic Systems	16,153	13,279
Aerostar	6,565	6,019
Intersegment eliminations	(288)	(983)
Consolidated net sales	\$ 65,222	\$ 75,166
Operating income		
Applied Technology	\$ 9,610	\$ 13,546
Engineered Films	2,715	3,864
Electronic Systems	2,495	640
Aerostar	1,158	806
Intersegment eliminations	28	(29)
Total reportable segment income	16,006	18,827
Administrative and general expenses	(1,893)	(2,186)
Consolidated operating income	\$ 14,113	\$ 16,641

**(4) Financing Arrangements**

Raven has an uncollateralized credit agreement providing a line of credit of \$8.0 million with a maturity date of July 1, 2009, bearing interest at 1.00% under the prime rate. Letters of credit totaling \$1.3 million have been issued under the line, primarily to support self-insured workers compensation bonding requirements. No borrowings were outstanding as of April 30, 2009, January 31, 2009 or April 30, 2008, and \$6.7 million was available at April 30, 2009.

**(5) Dividends**

The company announced on May 21, 2009, that its board of directors approved a quarterly cash dividend of 14 cents per share, payable July 15, 2009 to shareholders of record on June 25, 2009.

**(6) Comprehensive Income**

Comprehensive income consists of two components, net income and other comprehensive income. Other comprehensive income refers to revenue, expenses, gains, and losses that under U.S. generally accepted accounting

principles are recorded as an element of shareholders' equity but are excluded from net income. The components of total comprehensive income and accumulated other comprehensive income (loss) follow:

7

---

**Table of Contents***Comprehensive income*

<i>(in thousands)</i>	<b>Three Months Ended</b>	
	<b>April 30, 2009</b>	<b>April 30, 2008</b>
Net income	\$ 9,231	\$ 10,882
Other comprehensive income (loss):		
Foreign currency translation	20	(12)
Amortization of postretirement benefit plan actuarial losses, net of income tax of \$11 and \$20, respectively	21	37
Total other comprehensive income	41	25
Total comprehensive income	\$ 9,272	\$ 10,907

*Accumulated other comprehensive income (loss)*

<i>(in thousands)</i>	<b>April 30, 2009</b>	<b>January 31, 2009</b>	<b>April 30, 2008</b>
	Foreign currency translation	\$ (104)	\$ (124)
Post-retirement benefits	(1,009)	(1,030)	(1,692)
Total accumulated other comprehensive income (loss)	\$ (1,113)	\$ (1,154)	\$ (1,581)

**(7) Employee Retirement Benefits**

The components of net periodic benefit cost for postretirement benefits are as follows:

<i>(in thousands)</i>	<b>Three Months Ended</b>	
	<b>April 30, 2009</b>	<b>April 30, 2008</b>
Service cost	\$ 14	\$ 17
Interest cost	83	90
Amortization of actuarial losses	32	57
Net periodic benefit cost	\$ 129	\$ 164

**(8) Product Warranty Costs**

Accruals necessary for product warranties are estimated based upon historical warranty costs and average time elapsed between purchases and returns for each division. Any warranty issues that are unusual in nature are accrued individually. Changes in the carrying amount of accrued product warranty costs follow:

**Three Months Ended  
April 30,**

<i>(in thousands)</i>	<b>April 30, 2009</b>	<b>2008</b>
Balance, beginning of period	\$ 1,004	\$ 684
Accrual for warranties	485	459
Settlements made (in cash or in kind)	(390)	(350)
Balance, end of period	\$ 1,099	\$ 793

**(9) Recent Accounting Pronouncements**

At the beginning of fiscal 2010 the company adopted SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities* an amendment of FASB Statement No. 133. SFAS No. 161 requires enhanced disclosures about (a) how and why derivative instruments are used, (b) how derivative instruments and related hedged items are accounted for and (c) how derivative instruments and related hedged items affect an entity's financial position, financial performance and cash flows. The adoption of SFAS No. 161 did not have a material impact on the company's consolidated results of operations, financial condition or cash flows.

At the beginning of fiscal 2010 the company adopted FSP No. FAS 142-3, *Determination of the Useful Life of Intangible Assets*, which amends the list of factors an entity should consider in developing renewal or extension assumptions used in determining the useful life of recognized intangible assets under SFAS No. 142, *Goodwill and Other Intangible Assets*. The new guidance applies to (1) intangible assets that are acquired individually or with a group of other assets, and (2) intangible assets acquired in both business combinations and asset acquisitions. Under FSP No. FAS 142-3, entities estimating the useful life of a recognized intangible asset must consider their historical experience in renewing or extending similar arrangements or, in the absence of historical experience,

**Table of Contents**

must consider assumptions that market participants would use about renewal or extension. The adoption of FSP No. FAS 142-3 did not have a material impact on the company's consolidated results of operations, financial condition or cash flows.

New pronouncements issued but not effective until after April 30, 2009, are not expected to have a material impact on the company's consolidated results of operations, financial condition, or cash flows.

**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

This commentary should be read in conjunction with the company's consolidated financial statements for the three months ended April 30, 2009 and April 30, 2008, as well as the company's consolidated financial statements and related notes thereto and management's discussion and analysis of financial condition and results of operations in the company's Form 10-K for the year ended January 31, 2009.

**EXECUTIVE SUMMARY**

Raven Industries, Inc. is an industrial manufacturer providing a variety of products to customers within the industrial, agricultural, construction and military/aerospace markets, primarily in North America. The company operates in four business segments: Applied Technology (formerly Flow Controls), Engineered Films, Electronic Systems and Aerostar.

Significant financial items related to the first quarter of fiscal 2010 include:

Diluted earnings per share of \$0.51 decreased \$0.09 (15%) from \$0.60 per share in the first quarter of fiscal 2009.

Net sales of \$65.2 million decreased \$9.9 million (13%) compared to \$75.2 million in the first quarter of fiscal 2009. The recession and related economic uncertainty lowered Engineered Films and Applied Technology sales volumes. Electronic Systems and Aerostar sales were not directly impacted.

Gross margins of 29.1% decreased slightly from 29.3% in the first quarter of fiscal 2009 stemming from a five point contraction in Applied Technology gross margins partially offset by increased Engineered Films and Electronic Systems margins.

Net income decreased 15% to \$9.2 million versus \$10.9 million in the first quarter of fiscal 2009.

The company generated first quarter operating cash flow of \$19.7 million versus \$5.1 million in the year ago quarter. The increase was driven by improved inventory management and accelerated collections of accounts receivable.

The company paid dividends of \$2.3 million during the first quarter of fiscal 2010.

***Seasonality***

The Applied Technology segment is predominately focused on the agricultural market and quarterly financial results have typically been impacted by the inherent seasonality of this market. Historically, Applied Technology's first quarter results are the strongest and the second quarter the weakest.

***Results of Operations (Q1 fiscal 2010 versus Q1 fiscal 2009)***

Net sales decreased \$9.9 million (13%) to \$65.2 million from \$75.2 million. The decrease was driven primarily by lower Applied Technology and Engineered Films sales partially offset by stronger Electronic Systems and Aerostar sales. Applied Technology sales decreased \$5.4 million (16%) to \$29.4 million as a result of a less robust agricultural market. Engineered Films sales decreased \$8.6 million (39%) to \$13.4 million versus \$22.0 million due to decreased demand for pit liners and construction film reflecting depressed oil and gas drilling and construction activity. Additionally, downward pressure on Engineered Films selling prices contributed to the year-over-year revenue decline. Electronic Systems sales increased \$2.9 million (22%) to \$16.2 million from \$13.3 million reflecting stronger sales of printed circuit board assemblies for the aviation industry and secure communication devices. Aerostar sales increased \$546,000 (9%) to \$6.6 million versus \$6.0 million due to increased shipments of tethered aerostats and

inflatable decoys.

Operating income decreased \$2.5 million (15%) to \$14.1 million from \$16.6 million. Higher profits at Electronic Systems were offset by lower Applied Technology and Engineered Films results. Applied Technology operating income decreased \$3.9 million (29%) to \$9.6 million from \$13.5 million due to lower sales volume and negative operating leverage stemming from the drop in revenue on a higher cost base versus a year ago. Engineered Films operating income decreased 30% to \$2.7 million from \$3.9 million reflecting the 39% drop in sales (roughly 27% volume and 12% price) partially offset by more favorable plastic resin costs, the primary component of plastic films. Electronic Systems operating income increased \$1.9 million to \$2.5 million from \$640,000 in fiscal 2009 as a result of increased sales, positive operating leverage, and efficiency gains. Aerostar's operating income increased to \$1.2 million from \$806,000 reflecting increased efficiencies and positive operating leverage gained through higher sales volume.

**Table of Contents**

**RESULTS OF OPERATIONS SEGMENT ANALYSIS (Q1 fiscal 2010 versus Q1 fiscal 2009)**

***Applied Technology***

Applied Technology provides electronic and Global Positioning System (GPS) products designed to reduce operating costs and improve yields for the agriculture market.

Net sales of \$29.4 million decreased \$5.4 million (16%) and operating income of \$9.6 million decreased \$3.9 million (29%).

Several factors contributed to the relative change:

Worldwide agricultural conditions remained fairly strong as a result of good prices for corn, soybeans and other feed grains. However, grower and custom spray applicator purchasing decisions were deferred as a result of uncertainty regarding global economic conditions causing a decline in sales across substantially all of the segment's product categories. The volume decrease was partially offset by a modest selling price increase.

First quarter international sales of \$5.8 million fell \$900,000 (13%) year-over-year. Although foreign revenue decreased from last year it accounted for a larger share of Applied Technology sales, increasing from 19% of segment sales one year ago to 20%. While some markets experienced volatile conditions, revenues were enhanced by expanding sales efforts in regions not previously served. This caused the relative decline in international sales to be less than the drop in U.S. sales.

New product sales declined. In the first three months of last year, the division's Cruiser product was introduced. This simple and affordable guidance system targeted new entrants to the precision agricultural market and was well received in the marketplace.

Gross margins of 38.5% contracted from 43.6% as result of negative operating leverage stemming from decreased sales volume.

First quarter selling expense of \$1.8 million was up from the prior year's first quarter, increasing \$121,000 (7%) due mainly to higher personnel cost. As a percentage of sales, selling expense increased to 6.0% versus 4.7% due to higher expense on lower sales volume.

***Engineered Films***

Engineered Films produces rugged reinforced plastic sheeting for industrial, construction, geomembrane and agricultural applications.

Net sales of \$13.4 million decreased \$8.6 million (39%) and operating income of \$2.7 million decreased \$1.2 million (30%).

The following factors contributed to the comparative change:

Sales volume declined approximately 27% due to the freefall of business activity in the fourth quarter of fiscal 2009 as customers in the construction market adapted to a weakening economic outlook and the scarcity of credit. In addition, deliveries of pit liners to the energy exploration market declined from prior year levels. Drilling activity slowed due to lower oil prices and reductions in forecasted demand.

Selling prices declined by roughly 12% year-over-year driven by competitive pricing pressure.

Gross margins increased from 22.3% to 25.8% in the current quarter due to lower plastic resin costs. Opportune purchases of prime-grade plastic resins resulted in approximately \$1.3 million of one-time material savings.

First quarter selling expense of \$725,000 decreased \$260,000 from one year earlier reflecting a reduction in sales personnel and constrained discretionary spending due to the lower sales volume. As a result of the decrease in sales activity, selling expense as a percentage of sales increased to 5.4% versus 4.5%.

***Electronic Systems***

Electronic Systems is a total-solutions provider of electronics manufacturing services, primarily to North American original equipment manufacturers.

Net sales of \$16.2 million increased \$2.9 million (22%) and operating income of \$2.5 million rose \$1.9 million (290%).

The relative change is primarily the result of the following:

The sales improvement was substantially due to higher volume of aviation electronics shipments resulting from increased customer demand.

First quarter hand-held bed control shipments were flat compared with the depressed levels of one year ago due to steadying of consumer spending on non-essential home-related products.

**Table of Contents**

Gross margins expanded from 7.2% to 17.3% for the current quarter. The improvement was attributable to positive operating leverage generated through increased sales. Staff reductions, and facility consolidations helped reduce costs and improve efficiencies.

Selling expense was flat year-over-year and as a percentage of sales fell from 2.3% to 1.9%.

**Aerostar**

Aerostar manufactures military parachutes, protective wear, custom shaped inflatable products, and high-altitude aerostats for government and commercial research.

Net sales of \$6.6 million increased \$546,000 (9%) and operating income of \$1.2 million increased \$352,000 (44%).

The comparative change is primarily due to the following:

Sales volume of tethered aerostats and inflatable decoys were up from one year earlier.

Improved efficiencies on the parachute and protective wear product lines resulted in expanded gross margins to 20.6% from 16.9%.

Selling expense as a percentage of sales decreased to 3.0% from 3.5% due to relatively flat selling expense and increased sales.

**Corporate Expenses (administrative expenses, interest income and other, net and income taxes)**

<i>Dollars in thousands</i>	<b>Three Months Ended</b>	
	<b>April 30, 2009</b>	<b>April 30, 2008</b>
Administrative expenses	\$ 1,893	\$ 2,186
Administrative expenses as a % of sales	2.9%	2.9%
Interest income and other, net	\$ 1	\$ 118
Effective tax rate	34.6%	35.1%

First quarter administrative expenses of \$1.9 million decreased 13% from \$2.2 million reported a year ago. The decrease was due primarily to lower compensation expense.

Interest income and other, net consists mainly of interest income, bank fees and foreign currency transaction gain or loss. Interest income declined year-over-year due to lower interest rates.

The decrease in the effective tax rate is attributable to reinstatement of the U.S. research and development tax credit in October 2008.

**OUTLOOK**

Fiscal 2010 first quarter results were notably affected by the global economic recession and its impact on the company's markets. This is expected to continue throughout the remainder of the current fiscal year, making comparisons to last year's record results challenging. Management does not expect to beat last year's record sales and earnings levels and anticipates second quarter results to be down from one year earlier.

**Applied Technology**

Second quarter sales are expected to continue to fall significantly short of last year's levels. Current year revenue is forecast to be affected by the economic slowdown, in contrast to the strong market environment one year ago.

Sequentially, second quarter revenue is expected to decrease due to seasonality. This segment entered into an agreement to distribute select products through John Deere dealers starting in August 2009. The benefit from this agreement is expected to be material to fiscal 2011 results but its impact on the current year cannot be determined.

Staff cuts and spending constraints implemented late in the first quarter will decrease the cost base going forward but are not expected to offset the effect of the lower sales volume on profits for the full year.

**Engineered Films**

Management expects second quarter revenues to remain depressed and gross margins to decline. Included in the first quarter results were approximately \$1.3 million of material savings due to opportune purchases of resin. This is not expected to be repeated in subsequent quarters. Year-over-year revenue comparisons are expected to remain significantly unfavorable over the course of the fiscal year as management does not anticipate a recovery from current economic conditions to occur until next fiscal year. The two

**Table of Contents**

largest Engineered Films markets are energy (oil and gas drilling) and construction, both of which are dependent on a reversal of the current economic situation in order for sales to recover to prior year levels.

***Electronic Systems***

Electronic Systems second quarter revenue is targeted to increase sequentially and year-over-year due to increased demand for secure communication and aviation electronics. Gross margins in the first quarter benefited from a favorable product mix and are expected to decline during the year.

***Aerostar***

Management expects second quarter sales to be up slightly as compared with one year earlier as lower protective wear sales are expected to be offset by higher MC-6 parachute deliveries. Gross profit rates are expected to be lower than in the first quarter due to a less favorable product mix.

**LIQUIDITY AND CAPITAL RESOURCES**

The company's liquidity and capital resources are strong despite the global economic recession. Management focuses on the current cash balance and operating cash flows in considering liquidity as operating cash flows have historically been the company's primary source of liquidity. Management expects that current cash combined with the generation of positive operating cash flows will be sufficient to fund the company's operating, investing, and financing activities. The company's cash needs are seasonal, with working capital demands strongest in the first quarter. Consequently, the discussion of trends in operating cash flows focuses on the primary drivers of year-over-year variability in working capital.

Cash, cash equivalents, and short-term investments totaled \$32.3 million at April 30, 2009, a \$16.0 million increase compared to cash, cash equivalents, and short-term investments at January 31, 2009 of \$16.3 million. The comparable balances one year earlier totaled \$21.6 million. In November 2008, the company paid a special cash dividend of \$22.5 million.

***Operating Activities***

Cash provided by operating activities was \$19.7 million in the first quarter of fiscal 2010 compared to \$5.1 million in the first quarter of fiscal 2009. The company's operating cash flows result primarily from cash received from customers offset by cash payments for inventories, services, and employee compensation. The increase in quarterly operating cash flows reflects improved working capital management. Specifically, receivables from agricultural customers were lower as a result of accelerated payment terms during the first quarter of fiscal 2010 and inventory declined due to lower plastic resin costs and lower expected demand for Applied Technology and Engineered Films products.

***Investing Activities***

Cash used in investing activities totaled \$1.3 million in the first quarter of fiscal 2010, a \$1.4 million decrease compared to the first quarter of fiscal 2009. The variance was caused primarily by decreased purchases of short-term investments. Net short-term investment purchases totaled \$1.8 million one year ago versus none in the current quarter. Capital expenditures totaled \$1.1 million during the current quarter compared to \$1.0 million in the year ago quarter. Capital expenditures are expected to be in the \$3 million range for the current fiscal year.

***Financing Activities***

Financing activities consumed cash of \$2.3 million for the three months ended April 30, 2009 compared to \$5.3 million used in last year's comparable period. Cash used in financing activities is primarily for dividend payments and repurchases of common stock. The reduced spending was caused by suspension of the share repurchase program in July 2008. Dividends of \$2.3 million or 13 cents per share were paid during the current quarter compared to \$2.4 million in the year ago quarter.

**OFF-BALANCE SHEET ARRANGEMENTS AND CONTRACTUAL OBLIGATIONS**

There have been no material changes since the fiscal year ended January 31, 2009.

**NEW ACCOUNTING STANDARDS**

At the beginning of fiscal 2010 the company adopted SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities* an amendment of FASB Statement No. 133. SFAS No. 161 requires enhanced disclosures about (a) how and why derivative

**Table of Contents**

instruments are used, (b) how derivative instruments and related hedged items are accounted for and (c) how derivative instruments and related hedged items affect an entity's financial position, financial performance and cash flows. The adoption of SFAS No. 161 did not have a material impact on the company's consolidated results of operations, financial condition or cash flows.

At the beginning of fiscal 2010 the company adopted FSP No. FAS 142-3, *Determination of the Useful Life of Intangible Assets*, which amends the list of factors an entity should consider in developing renewal or extension assumptions used in determining the useful life of recognized intangible assets under SFAS No. 142, *Goodwill and Other Intangible Assets*. The new guidance applies to (1) intangible assets that are acquired individually or with a group of other assets, and (2) intangible assets acquired in both business combinations and asset acquisitions. Under FSP No. FAS 142-3, entities estimating the useful life of a recognized intangible asset must consider their historical experience in renewing or extending similar arrangements or, in the absence of historical experience, must consider assumptions that market participants would use about renewal or extension. The adoption of FSP No. FAS 142-3 did not have a material impact on the company's consolidated results of operations, financial condition or cash flows. New pronouncements issued but not effective until after April 30, 2009, are not expected to have a material impact on the company's consolidated results of operations, financial condition, or cash flows.

**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISKS**

The exposure to market risks pertains mainly to changes in interest rates on cash and cash equivalents and short-term investments. The company has no debt. The company does not expect operating results or cash flows to be significantly affected by changes in interest rates. Additionally, the company does not enter into derivatives or other financial instruments for trading or speculative purposes. However, the company does utilize derivative financial instruments to manage the economic impact of fluctuation in foreign currency exchange rates on those transactions that are denominated in currency other than its functional currency, which is the U.S. dollar. The use of these financial instruments had no material effect on the company's financial condition, results of operations or cash flows.

The company's subsidiaries that operate outside the United States use their local currency as the functional currency. The functional currency is translated into U.S. dollars for balance sheet accounts using the period-end exchange rates, and average exchange rates for the statement of income. Adjustments resulting from financial statement translations are included as cumulative translation adjustments in accumulated other comprehensive income (loss) within shareholders' equity. Foreign currency transaction gains or losses are recognized in the period incurred and are included in interest income and other, net in the Consolidated Statements of Income. Foreign currency fluctuations had no material effect on the company's financial condition, results of operations or cash flows.

**ITEM 4. CONTROLS AND PROCEDURES*****Evaluation of Disclosure Controls and Procedures***

As of April 30, 2009, the end of the period covered by this report, management, including the Chief Executive Officer ( CEO ) and the Chief Financial Officer ( CFO ) evaluated the effectiveness of disclosure controls and procedures (as defined in the Exchange Act Rules 13a-15(e) and 15d-15(e)) as of such date. Based on that evaluation, the CEO and CFO have concluded that the company's disclosure controls and procedures were effective as of April 30, 2009.

***Changes in Internal Control over Financial Reporting***

There were no changes in the company's internal control over financial reporting that occurred during the quarter ended April 30, 2009 that have materially affected, or are reasonably likely to materially affect, the company's internal control over financial reporting.

**FORWARD-LOOKING STATEMENTS**

*Certain statements contained in this quarterly report on Form 10-Q are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, including statements regarding the expectations, beliefs, intentions or strategies regarding the future. Without limiting the foregoing, the words anticipates, believes, expects, intends, may, plans and similar expressions are intended to identify forward-looking statements. The company intends that all forward-looking statements be subject to the safe harbor provisions of the Private Securities Litigation Reform Act. Although management believes that the expectations reflected in forward-looking statements are based on reasonable assumptions, there is no assurance that these assumptions are correct or that these expectations will be achieved.*

*Assumptions involve important risks and uncertainties that could significantly affect results in the future. These risks and uncertainties include, but are not limited to, those relating to weather conditions and commodity prices, which could affect sales and profitability in some of the company's primary markets, such as agriculture, construction, and oil and gas well drilling; or changes in competition, raw material availability, technology or relationships with the company's largest customers-any of which could adversely affect any of the company's product lines, as well as other risks described in the company's 10-K under Item 1A. This list is not exhaustive, and the company does not have an obligation to revise any forward-looking statements to reflect events or circumstances after the date these statements are made.*

**Table of Contents**

**RAVEN INDUSTRIES, INC.  
PART II OTHER INFORMATION**

Item 1. Legal Proceedings:

The company is involved as a defendant in lawsuits, claims or disputes arising in the normal course of business. The settlement of such claims cannot be determined at this time. Management believes that any liability resulting from these claims will be substantially mitigated by insurance coverage. Accordingly, management does not believe the ultimate outcome of these matters will be significant to its results of operations, financial position or cash flows.

Item 1A. Risk Factors: No material change.

Item 2. Changes in Securities:

Under a resolution from the Board of Directors dated March 15, 2008, the company was authorized to repurchase up to \$10 million of stock on the open market. No shares were repurchased during the first quarter of fiscal 2010. Approximately \$5.1 million of the repurchase authorization remains open; however, the company temporarily suspended the share repurchase program in July 2008.

Item 3. Defaults upon Senior Securities: None

Item 4. Submission of Matters to a Vote of Security Holders: None

Item 5. Other Information: None

Item 6. Exhibits Filed:

- 31.1 Certification of CEO Pursuant to Section 302 of Sarbanes-Oxley Act
- 31.2 Certification of CFO Pursuant to Section 302 of Sarbanes-Oxley Act
- 32.1 Certification of CEO Pursuant to Section 906 of Sarbanes-Oxley Act
- 32.2 Certification of CFO Pursuant to Section 906 of Sarbanes-Oxley Act

**SIGNATURES**

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
