NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Note 1 Summary of Significant Accounting Policies

Basis of Presentation and Management Representation

The consolidated financial statements include accounts, after elimination of intercompany accounts and transactions, of Meadowbrook Insurance Group, Inc. (the Company), its wholly owned subsidiary Star Insurance Company (Star), and Star's wholly owned subsidiaries, Savers Property and Casualty Insurance Company, Williamsburg National Insurance Company, and Ameritrust Insurance Corporation (which are collectively referred to as the Insurance Company Subsidiaries), and Preferred Insurance Company, Ltd. The consolidated financial statements also include Meadowbrook, Inc. and its subsidiaries, and Crest Financial Corporation and its subsidiaries.

Effective January 1, 2004, the Company deconsolidated its wholly-owned subsidiary, American Indemnity Insurance Company, Ltd., (AIIC), due to the adoption of Financial Accounting Standards Board Interpretation Number (FIN) 46(R) discussed further under heading New Accounting Pronouncements.

In the opinion of management, the consolidated financial statements reflect all normal recurring adjustments necessary to present a fair statement of the results for the interim period. Preparation of financial statements under generally accepted accounting principles requires management to make estimates. Actual results could differ from those estimates. The results of operations for the six months ended June 30, 2004, are not necessarily indicative of the results expected for the full year.

These financial statements and the notes thereto should be read in conjunction with the Company's audited financial statements and accompanying notes included in its Annual Report on Form 10-K, as filed with the United States Securities and Exchange Commission, for the year ended December 31, 2003.

Certain amounts in the 2003 financial statements and notes to consolidated financial statements have been reclassified to conform to the 2004 presentation.

Revenue Recognition

Premiums written are recognized as earned on a pro rata basis over the life of the policy term. Unearned premiums represent the portion of premiums written that are applicable to the unexpired terms of policies in force. Provisions for unearned premiums on reinsurance assumed from others are made on the basis of ceding reports when received and actuarial estimates. Certain premiums are subject to retrospective premium adjustments. The estimated ultimate premium is recognized over the term of the insurance contract.

Fee income, which includes risk management consulting, loss control, and claims services, is recognized in the period the services are provided. The claims processing fees are recognized as revenue over the estimated life of the claims. For those contracts that provide services beyond the contractually defined termination date of the related contracts, fees are deferred in an amount equal to management's estimate of the Company's obligation to continue to provide services.

Commission income, which includes reinsurance brokerage, is recorded on the later of the effective date or the billing date of the policies on which they were earned. Commission income is reported net of sub-broker commission expense. Commission and other adjustments are recorded when they occur and the Company maintains an allowance for estimated policy cancellations and commission returns.

The Company reviews, on an ongoing basis, the collectibility of its receivables and establishes an allowance for estimated uncollectible accounts.

Realized gains or losses on sale of investments are determined on the basis of specific costs of the investments. Dividend and interest income are recognized when earned. Discount or premium on debt securities purchased at other than par value is amortized using the constant

yield method. Investments with

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

other than temporary declines in fair value are written down to their estimated net fair value and the related realized losses are recognized in income.

Earnings Per Share

Basic earnings per share are based on the weighted average number of common shares outstanding during the period, while diluted earnings per share includes the weighted average number of common shares and potential dilution from shares issuable pursuant to stock options using the treasury stock method.

Outstanding options of 1,035,796 and 2,092,149 for the six months ended June 30, 2004 and 2003, respectively, have been excluded from the diluted earnings per share, as they were anti-dilutive. Shares issuable pursuant to stock options included in diluted earnings per share were 340,659 and 30,834 for the six months ended June 30, 2004 and 2003, respectively. In addition, shares issuable pursuant to outstanding warrants included in diluted earnings per share were 82,567 for the six months ended June 30, 2004. Outstanding warrants of 300,000 for the six months ended June 30, 2003, have been excluded from the diluted earnings per share, as they were anti-dilutive.

Outstanding options of 1,035,796 and 2,092,149 for the three months ended June 30, 2004 and 2003, respectively, have been excluded from the diluted earnings per share, as they were anti-dilutive. Shares issuable pursuant to stock options included in diluted earnings per share were 319,358 and 46,556 for the three months ended June 30, 2004 and 2003, respectively. In addition, shares issuable pursuant to outstanding warrants included in diluted earnings per share were 77,318 for the three months ended June 30, 2004. Outstanding warrants of 300,000 for the three months ended June 30, 2003, have been excluded from the diluted earnings per share, as they were anti-dilutive.

Stock Options

Effective January 1, 2003, the Company adopted the requirements of Statement of Financial Accounting Standards (SFAS) No. 148, Accounting for Stock-Based Compensation Transition and Disclosure an amendment of FASB Statement No. 123 , utilizing the prospective method. Under the prospective method, stock-based compensation expense is recognized for awards granted after the beginning of the fiscal year in which the change is made. Upon implementation of SFAS No. 148 in 2003, the Company is recognizing stock-based compensation expense for awards granted after January 1, 2003.

Prior to the adoption of SFAS No. 148, the Company applied the intrinsic value-based provisions set forth in APB Opinion No. 25. Under the intrinsic value method, compensation expense is determined on the measurement date, that is the first date on which both the number of shares the employee is entitled to receive, and the exercise price are known. Compensation expense, if any, resulting from stock options granted by the Company is determined based on the difference between the exercise price and the fair market value of the underlying common stock at the date of grant. The Company s stock option plans require the exercise price of the grants to be at the current fair market value of the stock.

The Company, through its 1995 and 2002 Stock Option Plans (the Plans), may grant options to key executives and other members of management of the Company and its subsidiaries in amounts not to exceed 2,000,000 shares of the Company s common stock allocated for each plan. The Plans are administered by the Compensation Committee (the Committee) of the Board of Directors. Option shares may be exercised subject to the terms of the Plans and the terms prescribed by the Committee at the time of grant. Currently, the Plans options have either five or ten-year terms and are exercisable and vest in equal increments over the option term.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

If compensation cost for stock option grants had been determined based on a fair value method, net income and earnings per share on a pro forma basis for the periods ending June 30, 2004 and 2003 would be as follows (in thousands):

	For the Six Months Ended June 30,	
	2004	2003
Net income, as reported	\$6,052	\$5,435
Add: Stock-based employee compensation expense included in reported income, net of related tax effects	29	79
Deduct: Total stock-based employee compensation expense determined under fair-value-based methods for all awards, net of related tax effects	(251)	(515)
Pro forma net income	<u>\$5,830</u>	<u>\$4,999</u>
Earnings per share:		
Basic as reported	\$ 0.21	\$ 0.19
Basic pro forma	\$ 0.20	\$ 0.17
Diluted as reported	\$ 0.21	\$ 0.18
Diluted pro forma	\$ 0.20	\$ 0.17

	For the Three Months Ended June 30,	
	2004	2003
Net income, as reported	\$2,820	\$2,679
Add: Stock-based employee compensation expense included in reported income, net of related tax effects	11	22
Deduct: Total stock-based employee compensation expense determined under fair-value-based methods for all awards, net of related tax effects	(117)	(229)
Pro forma net income	<u>\$2,714</u>	<u>\$2,472</u>
Earnings per share:		
Basic as reported	\$ 0.10	\$ 0.09
Basic pro forma	\$ 0.09	\$ 0.08
Diluted as reported	\$ 0.10	\$ 0.09
Diluted pro forma	\$ 0.09	\$ 0.08

The Black-Scholes valuation model utilized the following annualized assumptions for 2003: Risk-free interest rate of 2.90%, no dividends were declared in 2003, the volatility factor for the expected market price of the Company's common stock is 0.586, and the weighted average expected life of options is 5.0 for the 2003 grants. No options were granted during the six months ended June 30, 2004.

Compensation expense of \$44,000 and \$120,000 has been recorded in the six months ended June 30, 2004 and 2003, respectively, under SFAS 148. Compensation expense of \$17,000 and \$34,000 has been recorded in the three months ended June 30, 2004 and 2003, respectively.

New Accounting Pronouncements

Edgar Filing: MEADOWBROOK INSURANCE GROUP INC - Form 10-Q

On May 15, 2003, the Financial Accounting Standards Board (FASB) issued SFAS No. 150 Accounting for Certain Financial Instruments with Characteristics of Both Liabilities and Equity. The statement requires issuers to classify as liabilities (or assets in some circumstances) three classes of freestanding financial instruments that embody obligations for the issuer. Generally, the statement is effective

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

for financial instruments entered into or modified after May 31, 2003, and is otherwise effective at the beginning of the first interim period beginning after June 15, 2003. The adoption of this standard had no effect on the Company's financial statements.

In November 2002, the FASB issued FIN No. 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others*. FIN No. 45 clarifies the requirements of SFAS No. 5, *Accounting for Contingencies*, relating to a guarantor's accounting for, and disclosure of, the issuance of certain types of guarantees. For certain guarantees issued after December 31, 2002, FIN No. 45 requires a guarantor to recognize, upon issuance of a guarantee, a liability for the fair value of the obligations it assumes under the guarantee. Guarantees issued prior to January 1, 2003, are not subject to liability recognition, but are subject to expanded disclosure requirements.

In January 2003, the FASB issued FIN No. 46, *Consolidation of Variable Interest Entities*. The primary objective of FIN No. 46 is to provide guidance on the identification of, and financial reporting for, entities over which control is achieved through means other than voting rights; such entities are known as variable interest entities. FIN No. 46 requires variable interest entities to be consolidated by the primary beneficiary of the variable interest entities and expands disclosure requirements for both variable interest entities that are consolidated as well as those within which an enterprise holds a significant variable interest. In accordance with FIN No. 46, the Company performed an evaluation of its business relationships and determined that Meadowbrook Capital Trust I (Trust) was a variable interest entity; however, it was also determined that the Trust did not meet the qualifications for consolidation as the Trust equity was deemed to not be at risk. The adoption of FIN No. 46 did not have a material impact on the Company's consolidated balance sheet or its consolidated statement of income. See Note 3 for additional information regarding the Company's unconsolidated subsidiary trust.

In December 2003, FIN No. 46 was revised as FIN No. 46(R) to address certain implementation issues and to defer full adoption into financial statements for periods ending after March 15, 2004, with earlier adoption permitted. In accordance with FIN No. 46(R), the Company performed an evaluation of its business relationships and determined that its wholly-owned subsidiary, AIIC, did not meet the tests for consolidation, as neither the Company, nor its subsidiary Star, are the primary beneficiaries of AIIC. Therefore, effective January 1, 2004, the Company deconsolidated AIIC on a prospective basis in accordance with the provisions of FIN No. 46(R). The adoption of FIN No. 46(R) and the deconsolidation of AIIC did not have a material impact on the Company's consolidated balance sheet or consolidated statement of income.

Note 2 Reinsurance

The Insurance Company Subsidiaries cede insurance to other insurers under pro-rata and excess-of-loss contracts. These reinsurance arrangements diversify the Company's business and minimize its exposure to large losses or from hazards of an unusual nature. The ceding of insurance does not discharge the original insurer from its primary liability to its policyholder. In the event that all or any of the reinsuring companies are unable to meet their obligations, the Insurance Company Subsidiaries would be liable for such defaulted amounts. Therefore, the Company is subject to a credit risk with respect to the obligations of its reinsurers. In order to minimize its exposure to significant losses from reinsurer insolvencies, the Company evaluates the financial condition of its reinsurers and monitors the economic characteristics of the reinsurers on an ongoing basis. The Company also assumes insurance from other insurers and reinsurers, both domestic and foreign, under pro-rata and excess-of-loss contracts.

At June 30, 2004, the Company had reinsurance recoverables for paid and unpaid losses of \$167.7 million. The Company customarily collateralizes reinsurance balances due from non-admitted reinsurers through funds withheld trusts or letters of credit. The largest unsecured reinsurance recoverable is due from an admitted reinsurer with an A A.M. Best rating and accounts for 34.1% of the total recoverable for paid and unpaid losses.

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The Company maintains an excess-of-loss reinsurance program designed to protect against large or unusual loss and loss adjustment expense activity. The Company determines the appropriate amount of reinsurance based on the Company's evaluation of the risks accepted and analysis prepared by consultants and reinsurers and on market conditions including the availability and pricing of reinsurance. To date, there have been no material disputes with the Company's excess-of-loss reinsurers. No assurance can be given, however, regarding the future ability of any of the Company's excess-of-loss reinsurers to meet their obligations.

Under the workers' compensation reinsurance program, the reinsurers are responsible for 100% of each loss in excess of \$350,000 up to \$5.0 million for each claimant. In addition, there is coverage for loss events involving more than one claimant up to \$50.0 million per occurrence.

Under the core liability reinsurance treaty, the reinsurers are responsible for 100% of each loss in excess of \$350,000 up to \$2.0 million per occurrence. The Company also purchases an additional \$3.0 million of reinsurance clash coverage in excess of the \$2.0 million to cover amounts that may be in excess of the \$2.0 million policy limit, such as expenses associated with the settlement of claims or awards in excess of policy limits. The Company has a separate structure to cover liability specifically related to commercial trucking, where reinsurers are responsible for 100% of each loss in excess of \$350,000, up to \$1.0 million. In addition, the Company purchases an additional \$1.0 million of reinsurance clash coverage.

Under the property reinsurance program, reinsurers are responsible for 100% of the amount of each loss in excess of \$500,000 up to \$5.0 million per location for an occurrence. In addition, there is coverage for loss events involving multiple locations up to \$20.0 million after the Company has incurred \$750,000 in loss.

Effective August 1, 2003, the Company entered into a reinsurance agreement for reinsurance coverage of \$4,500,000 in excess of \$500,000 for each occurrence for policies covering losses in excess of the self-insured retention level for public entities. The reinsurance charge for this coverage is a minimum of 11% of subject premium plus 110% of losses ceded under this agreement; however, the adjusted premium cannot exceed 54%, the maximum rate under the agreement, or be less than the 11% minimum. Based upon an actuarial study, the probability of a loss to reinsurers under this treaty is less than 15% and does not transfer significant timing or underwriting risk, therefore under the provisions of SFAS No. 113 Accounting and Reporting for Reinsurance of Short-Duration and Long-Duration Contracts and Statement of Position 98-7 Deposit Accounting: Accounting for Insurance and Reinsurance Contracts That Do Not Transfer Insurance Risk, the transactions under this treaty are accounted for using the interest method of deposit accounting. At June 30, 2004, for transactions under this contract, the Company carried a prepaid asset of \$1.2 million and a deposit liability of \$941,000. For the six months and the three months ended June 30, 2004, the Company recorded an operating expense of \$1.5 million and \$816,000, respectively, for the subject premium described above.

In addition, the Company purchases \$10.0 million in excess of \$5.0 million for each occurrence which is layered on top of the underlying \$5.0 million of coverage for a specific program. Under this agreement, reinsurers are responsible for 100% of each loss in excess of \$5.0 million for all lines except workers' compensation, which is covered by the Company's core catastrophic workers' compensation structure up to \$50.0 million per occurrence.

Additionally, several small programs have separate reinsurance treaties in place, which limit the Company's exposure to \$300,000 or less.

Facultative reinsurance is purchased for property values in excess of \$5.0 million and casualty limits excess of \$2.0 million or for coverage not protected by the treaty.

In its risk-sharing programs, the Company is also subject to credit risk with respect to the payment of claims by its clients' captive, rent-a-captive, large deductible programs, indemnification agreements, and on the portion of risk exposure either ceded to the captives, or retained by the clients. The capitalization and credit worthiness of prospective risk-sharing partners is one of the factors considered by the Company in entering into and renewing risk-sharing programs. The Company collateralizes balances due from its risk-sharing partners through funds withheld trusts or letters of credit. At June 30, 2004, the Company had risk

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

exposure in excess of collateral in the amount of \$10.5 million, on these programs, of which the Company has an allowance of \$7.5 million, related to these exposures. The Company has historically maintained an allowance for the potential uncollectibility of certain reinsurance balances due from some risk-sharing partners, some of which are in litigation with the Company. At the end of each quarter, an analysis of these exposures is conducted to determine the potential exposure to uncollectibility. As of June 30, 2004, management believes that this allowance is adequate. To date, the Company has not, in the aggregate, experienced material difficulties in collecting balances from its risk-sharing partners. No assurance can be given, however, regarding the future ability of any of the Company's risk-sharing partners to meet their obligations. At June 30, 2004, the exposure amount in litigation with former risk-sharing partners which is not reserved or collateralized is \$1.2 million.

Note 3 Debt***Term Loan and Lines of Credit***

The Company has a credit agreement that includes a term loan and a revolving line of credit. This credit agreement consists of a \$20.0 million term loan and a revolving line of credit for up to \$8.0 million. The Company uses the revolving line of credit to meet short-term working capital needs. At June 30, 2004, the Company's term loan had an outstanding balance of \$11.5 million. The Company had no outstanding balance on the revolving line of credit at June 30, 2004. At December 31, 2003, the outstanding balance on the term loan was \$14.0 million. The Company had no outstanding balance on the revolving line of credit at December 31, 2003. The term loan calls for quarterly amortization through July 1, 2006, at which time the term loan will be paid in full. The quarterly amortization requires payments of \$1.25 million in 2004, 2005 and 2006, with a final payment of \$1.5 million on July 1, 2006. The revolving line of credit will expire on September 1, 2004, and is thereafter renewable on an annual basis. The Company is currently renegotiating the terms of the line of credit with its lender. As part of the loan agreement, certain of the Company's non-regulated subsidiaries guaranteed repayment of the credit facility and the Company pledged the stock of its non-regulated subsidiaries as collateral. The eurocurrency based rate as of June 30, 2004, for the term loan was 3.3%.

Both the term loan and revolving line of credit provide for interest at a variable rate based, at the Company's option, upon either the prime rate or eurocurrency based rate. The applicable margin, which ranges from 200 to 300 basis points above eurocurrency based rates, is determined by the level of the fixed charge coverage ratio. Of all the covenants, the most restrictive covenant is the fixed charge coverage ratio. The fixed charge coverage ratio, as defined by the credit facility, is the ratio of the non-regulated earnings before interest and taxes for the four preceding fiscal quarters to the sum of fixed charges which include interest expense, principal payments payable, stock repurchases, and dividends declared during the period. Any unused portion of the revolving credit as of the date of determination reduces the sum of these fixed charges. At June 30, 2004, this ratio was 10.4 to 1.0, compared to the covenant minimum of 1.2 to 1.0.

As of June 30, 2004, the Company was in compliance with all debt covenants.

A non-insurance premium finance subsidiary of the Company maintains a line of credit with a bank, which permits borrowings up to 75% of the accounts receivable, which collateralize the line of credit. At June 30, 2004, this line of credit had an outstanding balance of \$4.7 million. The terms of this line of credit were amended on May 7, 2004. The amendments to the line of credit agreement included a change in the permitted borrowings from 80% to 75% of the accounts receivable, an increase in the line of credit from \$6.0 million to \$8.0 million, and amendments to the interest rates. The interest terms were amended to interest at the Prime Rate minus 0.5%, or a LIBOR-based rate option, plus 2.0%. On May 24, 2004, \$3.5 million was moved into the LIBOR-based rate. At June 30, 2004, the Prime Rate minus 0.5%, was 3.75% and the LIBOR-based option was 3.3%.

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Senior Debentures

On April 29, 2004, the Company issued senior debentures in the amount of \$13.0 million. The senior debentures mature in thirty years and provide for interest at the three-month LIBOR, plus 4.00%, which is non-deferrable. The senior debentures are callable by the Company at par after five years from the date of issuance. Associated with this transaction the Company incurred \$390,000 of commissions paid to the placement agents. These issuance costs have been capitalized and are included in other assets on the balance sheet, which will be amortized over seven years as a component of interest expense.

On May 26, 2004, the Company issued senior debentures in the amount of \$12.0 million. The senior debentures mature in thirty years and provide for interest at the three-month LIBOR, plus 4.20%, which is non-deferrable. The senior debentures are callable by the Company at par after five years from the date of issuance. Associated with this transaction the Company incurred \$360,000 of commissions paid to the placement agents. These issuance costs have been capitalized and are included in other assets on the balance sheet, which will be amortized over seven years as a component of interest expense.

The proceeds from the issuance of the senior debentures may be used to support future premium growth through contributions to its Insurance Company Subsidiaries and general corporate purposes.

Junior Subordinated Debentures

On September 30, 2003, an unconsolidated subsidiary trust (the Trust) of the Company issued \$10.0 million of mandatorily redeemable trust preferred securities (TPS) to a trust formed by an institutional investor. The Company's trust received a total of \$9.7 million in net proceeds, after the deduction of approximately \$300,000 of commissions paid to the placement agents in the transaction.

The gross proceeds from the issuance of the TPS were used to purchase floating rate junior subordinated deferrable interest debentures (the Debentures) issued by the Company. The Debentures have financial terms similar to those of the TPS, which includes the deferral of interest payments at any time or from time to time for a period not exceeding five years, provided there is no event of default. The Debentures mature in thirty years and provide for interest at the three-month LIBOR, plus 4.05%, which started in December 2003. The Debentures are callable by the Company at par beginning in October 2008. Associated with the Debentures, the Company incurred \$300,000 of issuance costs, which have been capitalized and are included in other assets on the balance sheet. Issuance costs will be amortized over seven years as a component of interest expense. The Company estimates that the fair value of the Debentures issued approximates the gross proceeds of cash received at the time of issuance.

The Debentures are unsecured obligations of the Company and are junior to the right of payment to all senior indebtedness of the Company. The Company has guaranteed that the payments made to the Trust will be distributed by the Trust to the holders of the TPS.

The Company contributed \$6.3 million of the proceeds from the issuance of the Debentures to its Insurance Company Subsidiaries and the remaining balance was used for general corporate purposes.

Note 4 Shareholders Equity

At June 30, 2004, shareholders' equity was \$157.0 million, or a book value of \$5.41 per common share, compared to \$155.1 million, or a book value of \$5.34 per common share, at December 31, 2003.

On September 17, 2002, the Company's Board of Directors authorized management to repurchase up to 1,000,000 shares of the Company's common stock in market transactions for a period not to exceed twenty-four months. On August 6, 2003, the Company's Board of Directors authorized management to repurchase up to an additional 1,000,000 shares of the Company's common stock under the existing share repurchase plan. Unless terminated earlier by resolution of the Company's Board of Directors, the share repurchase plan will expire on the earlier of September 17, 2004, or when the Company has repurchased all shares authorized for

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

repurchase. As of June 30, 2004, the cumulative amount the Company repurchased and retired was 764,800 shares of common stock for a total cost of approximately \$2.0 million. The Company did not repurchase any common stock during the quarter ended June 30, 2004. As of June 30, 2004, the Company has 1,235,200 shares remaining which could be purchased.

Note 5 Regulatory Matters and Rating Agencies

A significant portion of the Company's consolidated assets represent assets of the Insurance Company Subsidiaries that at this time, without prior approval of the State of Michigan Office of Financial and Insurance Services (OFIS), cannot be transferred to the holding company in the form of dividends, loans or advances. The restriction on the transferability to the holding company from its Insurance Company Subsidiaries is dictated by Michigan insurance regulatory guidelines which, in general, are as follows: the maximum discretionary dividend that may be declared, based on data from the preceding calendar year, is the greater of each insurance company's net income (excluding realized capital gains) or ten percent of the insurance company's surplus (excluding unrealized gains). These dividends are further limited by a clause in the Michigan law that prohibits an insurer from declaring dividends, except from surplus earnings of the company. Earned surplus balances are calculated on a quarterly basis. Since Star is the parent insurance company, its maximum dividend calculation represents the combined Insurance Company Subsidiaries' surplus. Based upon the 2003 statutory financial statements, Star may only pay dividends to the Company during 2004 with the prior approval of OFIS. Star's earned surplus position at December 31, 2003 was negative \$24.6 million. At June 30, 2004, earned surplus was negative \$25.1 million. No statutory dividends were paid in 2003.

Insurance operations are subject to various leverage tests (e.g. premium to statutory surplus ratios), which are evaluated by regulators and rating agencies. The Company's targets for gross and net written premium to statutory surplus are 3.0 to 1.0 and 2.5 to 1.0, respectively. As of June 30, 2004, on a statutory consolidated basis, the gross and net premium leverage ratios were 2.8 to 1.0 and 2.2 to 1.0, respectively.

The National Association of Insurance Commissioners (NAIC) has adopted a risk-based capital (RBC) formula to be applied to all property and casualty insurance companies. The formula measures required capital and surplus based on an insurance company's products and investment portfolio and is used as a tool to evaluate the capital of regulated companies. The RBC formula is used by state insurance regulators to monitor trends in statutory capital and surplus for the purpose of initiating regulatory action. In general, an insurance company must submit a calculation of its RBC formula to the insurance department of its state of domicile as of the end of the previous calendar year. These laws require increasing degrees of regulatory oversight and intervention as an insurance company's RBC declines. The level of regulatory oversight ranges from requiring the insurance company to inform and obtain approval from the domiciliary insurance commissioner of a comprehensive financial plan for increasing its RBC to mandatory regulatory intervention requiring an insurance company to be placed under regulatory control in a rehabilitation or liquidation proceeding.

At December 31, 2003, all of the Insurance Company Subsidiaries were in compliance with RBC requirements. Star reported statutory surplus of \$99.9 million at December 31, 2003, compared to the threshold requiring the minimum regulatory involvement of \$45.7 million in 2003. At June 30, 2004, Star's statutory surplus was \$99.3 million.

The Insurance Company Subsidiaries' A.M. Best financial strength rating is a B+ (Very Good) with a positive outlook. A positive outlook is placed on a company's rating if its financial and market trends are favorable, relative to its current rating level.

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 6 Commitments and Contingencies

On December 3, 2003, the Company entered into a Development Agreement with an unaffiliated third party for the construction of an office building on land currently owned by the Company for a contract price of \$11.0 million. The office building will serve as the new location for the Company's corporate offices.

On June 6, 2003, the Company entered into a Guaranty Agreement with a bank. The Company is guaranteeing payment of a \$1.5 million term loan issued by the bank to an unaffiliated insurance agency. In the event of default on the term loan by the insurance agency, the Company is obligated to pay any outstanding principal (up to a maximum of \$1.5 million), as well as any accrued interest on the loan, and any costs incurred by the bank in the collection process. In exchange for the Company's guaranty, the president and member of the insurance agency pledged 100% of the common shares of two other insurance agencies that he wholly owns. In the event of default on the term loan by the insurance agency, the Company has the right to sell any or all of the pledged insurance agencies' common shares and use the proceeds from the sale to recover any amounts paid under the guaranty agreement. Any excess proceeds would be paid to the shareholder. As of June 30, 2004, no liability has been recorded with respect to the Company's obligations under the guaranty agreement, since the collateral is in excess of the guaranteed amount.

The Company, and its subsidiaries, are subject at times to various claims, lawsuits and proceedings relating principally to alleged errors or omissions in the placement of insurance, claims administration, consulting services and other business transactions arising in the ordinary course of business. Where appropriate, the Company vigorously defends such claims, lawsuits and proceedings. Some of these claims, lawsuits and proceedings seek damages, including consequential, exemplary or punitive damages, in amounts that could, if awarded, be significant. Most of the claims, lawsuits and proceedings arising in the ordinary course of business are covered by errors and omissions insurance or other appropriate insurance. In terms of deductibles associated with such insurance, the Company has established provisions against these items, which are believed to be adequate in light of current information and legal advice. In accordance with SFAS No. 5, Accounting for Contingencies, if it is probable that an asset has been impaired or liability has been incurred as of the date financial statements and the amount of loss is estimable, an accrual for the costs to resolve these claims is recorded by the Company in its consolidated balance sheets. Period expenses related to the defense of such claims are included in other operating expenses in the accompanying consolidated statements of income. Management, with the assistance of outside counsel, adjusts such provisions from time-to-time according to new developments or changes in the strategy in dealing with such matters. On the basis of current information, the Company does not expect the outcome of the claims, lawsuits and proceedings to which the Company is subject to, either individually, or in the aggregate, will have a material adverse effect on the Company's financial condition. However, it is possible that future results of operations or cash flows for any particular quarter or annual period could be materially affected by an unfavorable resolution of any such matters.

Note 7 Segment Information

The Company defines its operations as specialty risk management operations and agency operations based upon differences in products and services. The separate financial information of these segments is consistent with the way results are regularly evaluated by management in deciding how to allocate resources and in assessing performance. Intersegment revenue is eliminated in consolidation. It would be impracticable for the Company to determine the allocation of assets between the two segments.

Specialty Risk Management Operations

The specialty risk management operations segment focuses on specialty or niche insurance business in which it provides various services and coverages that are tailored to meet specific requirements of defined client groups and their members. This includes, but is not limited to, providing services, such as risk management consulting, claims administration and handling, loss control, and reinsurance brokering, along

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

with various types of property and casualty insurance coverage, including workers' compensation, commercial multiple peril, general liability, commercial auto liability, and inland marine. Insurance coverage is provided primarily to associations or similar groups of members and to specified classes of business of the Company's agent-partners. The Company recognizes revenue related to the services and coverages the specialty risk management operations provides within seven categories: net earned premiums, management fees, claims fees, loss control fees, reinsurance brokerage, investment income, and net realized gain (loss) on investments.

Agency Operations

The Company earns commissions through the operation of its retail property and casualty insurance agency, which was formed in 1955. The agency has grown to be one of the largest agencies in Michigan and, with acquisitions, has expanded into California. The agency operations primarily produce commercial insurance, as well as personal property, casualty, life and accident and health insurance, with more than fifty insurance carriers.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 8 Subsequent Events

On May 19, 2004, the Company entered into a Purchase and Sale Agreement (the Purchase Agreement) with an unaffiliated third-party, whereby, the Company sold the land and building located at 12641 W. 166th Street, Cerritos, California 90703 (the Transaction). The Transaction closed on July 19, 2004, with the acquirer paying \$2,942,000 to the Company for the land and building. Contemporaneously, a subsidiary of the Company, Meadowbrook, Inc. entered into a Lease Agreement (the Lease) of the building with the acquirer commencing on July 19, 2004 and ending on July 19, 2014. Under the Lease, the initial rental rate was \$18,380 per month, which shall be increased at the rate of 1.5% annually on each anniversary date of the lease term. The Company is currently evaluating the impact of the sale/leaseback agreement on its financial statements.

As a part of the Transaction, the Company entered into an Exclusive Sale/Lease Agency Agreement (the Agency Agreement) with GVA Strategis. Michael Ziecik, a principal of GVA Strategis, is the son-in-law of the Chairman, Merton J. Segal. Under the Agency Agreement, the Company paid GVA Strategis a brokerage commission of \$73,550 for its services in the Transaction.

The Company owns certain real estate in Southfield, Michigan, which consists of approximately 9.2 acres. As indicated in Note 6 Commitments and Contingencies, on December 3, 2003, the Company entered into a Development Agreement with Kirco Development, LLC, for the construction of the Company s new corporate offices and certain common areas. This new building will be located on approximately 4.5 acres of the land.

On December 4, 2003, the Company entered into a Purchase and Sale Agreement, wherein the Company sold the remaining 4.5 acres to Kirco Acquisition, LLC for the purpose of constructing an office building adjacent to the Company s new corporate offices.

Kirco Acquisition, LLC agreed to pay the Company \$2,116,000, for the real estate and \$1,239,310 for its share of the costs related to the common areas. A Land Contract was executed, whereby Kirco Acquisition, LLC agreed to pay the principal balance of \$2,722,110, plus seven percent (7%) interest. The Land Contract will mature in 36 months and is subject to a balloon payment for the outstanding balance and the accrued interest thereon.

This transaction closed in escrow on July 29, 2004, subject to the conveyance of certain land by the City of Southfield to the Company and Kirco Acquisition, LLC.

Table of Contents

ITEM 2

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS
For the Periods ended June 30, 2004 and 2003**

Meadowbrook Insurance Group, Inc. (the Company) is a publicly traded specialty risk management company, specializing in alternative market insurance and risk management solutions for agents, brokers, professional and trade associations, and insureds of all sizes. The alternative market includes a wide range of approaches to financing and managing risk exposures, such as captives, risk retention and risk purchasing groups, governmental pools and trusts, and self-insurance plans. The alternative market developed as a result of the historical volatility in the cost and availability of traditional commercial insurance coverages, and usually involves some form of self-insurance or risk-sharing on the part of the client. The Company develops and manages alternative risk management programs for defined groups and their members. The Company also operates as an insurance agency representing policyholders in placing their insurance coverages with unaffiliated insurance companies. Management defines its business segments as specialty risk management operations and agency operations.

Results of Operations for the Six Months Ended June 30, 2004 and 2003

Overview

Net income for the six months ended June 30, 2004 was \$6.1 million, or \$0.21 per dilutive share, compared to net income of \$5.4 million, or \$0.18 per dilutive share, for the comparable period of 2003. This improvement reflects the earning pattern of controlled growth of premium in profitable programs which were written in the last two quarters of 2003 and the first quarter of 2004, continued rate increases, growth in agency commission, control over expenses, and leveraging of fixed costs.

Revenues for the six months ended June 30, 2004 increased \$34.2 million, or 35.7%, to \$129.9 million from \$95.7 million for the comparable period in 2003. This increase reflects a \$39.2 million, or 61.6%, increase in net earned premium. The growth in net earned premium reflects the earning pattern of programs written in the last two quarters of 2003 and the first quarter of 2004. These programs include the conversion of an existing west-coast commercial transportation program to the Company's insurance subsidiaries, the impact of a renewal rights contract for a select group of association-endorsed workers' compensation programs which had decades of profitable underwriting experience, the implementation of an excess liability program for public entities with a statistically proven twenty-year track record, the return of profitable programs, the impact of an overall 13.6% rate increase achieved in 2003, and an overall 5.7% rate increase in 2004, which consisted of 2.3% in the workers' compensation line of business and 10.6% in all other lines of business combined. This increase was partially offset by the anticipated reduction in managed fee revenue from two limited duration or closed end administrative services and claims contracts in the State of Missouri.

Pre-tax income		
Specialty risk management operations	\$ 6,870	\$ 5,517

Revenues from specialty risk management operations increased \$34.3 million, or 37.8%, to \$125.0 million for the six months ended June 30, 2004, from \$90.7 million for the comparable period in 2003.

Net earned premium increased \$39.2 million, or 61.6%, to \$102.8 million for the six months ended June 30, 2004, from \$63.6 million in the comparable period in 2003. As previously mentioned, this increase is the result of increased written premium in the last two quarters of 2003 and the first quarter of 2004 that is recognized as earned premium in 2004.

Management fees decreased \$1.6 million, or 15.5%, to \$8.6 million for the six months ended June 30, 2004, from \$10.2 million for the comparable period in 2003. The decrease in management fees reflects an anticipated shift in fee-for-service revenue previously generated from a third-party contract to internally generated fee revenue that is eliminated upon consolidation. The transition of such fees is directly related to the Company's previously mentioned renewal rights contract. Excluding revenue generated from the third-party contract, management fee revenue increased approximately \$660,000 in comparison to 2003. This increase is primarily the result of higher premium volumes, which is the basis for the calculation of fee-for-service revenue, related to existing managed programs.

Claim fees decreased \$2.7 million, or 33.3%, to \$5.4 million, from \$8.1 million for the comparable period in 2003. The decrease in claim fees reflects a similar anticipated shifting of revenue previously generated from third-party contracts to internally generated fee revenue that is eliminated upon consolidation. The transition of such fees is directly related to the Company's renewal rights contract. Excluding revenue generated from the third-party contract, claim fee revenue increased approximately \$350,000 in comparison to 2003. This increase is primarily the result of higher premium volumes, which is the basis for the calculation of fee-for-service revenue, related to existing managed programs.

Net investment income increased \$229,000, or 3.3%, to \$7.1 million in 2004, from \$6.9 million in 2003. Average invested assets increased \$39.3 million, or 13.2%, to \$336.1 million in 2004, from \$296.8 million for the comparable period in 2003. The increase in average invested assets reflects cash flows from underwriting activities and growth in gross written premiums during 2003 and 2004, as well as, net proceeds from capital raised through the issuance of long-term debt. The average investment yield for June 30, 2004 was 4.3%, compared to 4.7% for the comparable period in 2003. The current pre-tax book yield is 4.0% and current after-tax book yield is 2.9%. The decline in investment yield reflects the accelerated prepayment speeds in mortgage-backed securities and the reinvestment of cash flows in municipal bonds and other securities with lower interest rates. Over the past two years, the reinvestment of cash flows has shifted from maturing

Table of Contents

securities with higher yields being replaced by securities with lower yields in a declining interest rate environment. In addition, the capital raised during the period, which will be utilized before the end of the year, has been invested in short-term investments.

Specialty risk management operations generated pre-tax income of \$6.9 million for the six months ended June 30, 2004, compared to pre-tax income of \$5.5 million for the comparable period in 2003. This increase in pre-tax income demonstrates the improvement in underwriting results and the further leveraging of fixed costs as the Company continues to experience controlled growth of premium volume. The generally accepted accounting principles (GAAP) combined ratio was 101.7% for the six months ended June 30, 2004, compared to 106.0% for the same period in 2003.

Net loss and loss adjustment expenses (LAE) increased \$24.0 million, or 58.2%, to \$65.3 million for the six months ended June 30, 2004, from \$41.3 million for the same period in 2003. The Company's loss and LAE ratio decreased by 1.9 percentage points to 68.3% for the six months ended June 30, 2004, from 70.2% for the same period in 2003. This ratio is the unconsolidated net loss and LAE in relation to net earned premium. The decrease in the loss and LAE ratio reflects the impact of a \$2.5 million, or 2.4 percentage points, increase in net ultimate loss estimates for prior accident years in 2004 compared to \$2.3 million, or 3.5 percentage points, increase in net ultimate loss estimates, for the comparable period of 2003. The change in net ultimate loss estimates in 2004 is described in the reserve section below. This increase is partially offset by an improvement in the current accident year loss ratio which reflects rate increases achieved during 2004 and the addition of earned premium from profitable programs.

The Company's expense ratio improved 2.4 percentage points to 33.4% for the six months ended June 30, 2004, from 35.8% for the same period in 2003. This ratio is the unconsolidated policy acquisition and other underwriting expenses in relation to net earned premium. This improvement reflects an overall improvement in gross commissions in relation to an increased net earned premium basis. In addition, this improvement reflects the leveraging of fixed costs and a decrease in insurance related assessments. These improvements were slightly offset by an increase in ceded excess reinsurance expense primarily related to the previously mentioned excess liability program for public entities.

Agency Operations

The following table sets forth the revenues and results from operations for agency operations (in thousands):

	For the Six Months Ended June 30,	
	2004	2003
Net commission	\$8,772	\$7,822
Pre-tax income*	\$4,236	\$3,600

* Excluding the allocation of corporate overhead

Revenue from agency operations, which consists primarily of agency commission revenue, increased \$950,000, or 12.1%, to \$8.8 million for the six months ended June 30, 2004, from \$7.8 million for the comparable period in 2003. This increase is primarily the result of rate increases and increases in new business and contingent commissions.

Agency operations generated pre-tax income, before corporate overhead, of \$4.2 million for the six months ended June 30, 2004, compared to \$3.6 million for the comparable period in 2003. The improvement in the pre-tax margin is primarily attributable to the overall increase in revenue.

Table of Contents**Other Items****Reserves**

At June 30, 2004, management's best estimate for the ultimate liability for loss and LAE reserves, net of reinsurance recoverables, was \$205.8 million. Management established a reasonable range of reserves of approximately \$191.8 million to \$220.6 million. This range was established primarily by considering the various indications derived from standard actuarial techniques and other appropriate reserve considerations. The following table sets forth this range by line of business (in thousands):

Line of Business	Minimum Reserve Range	Maximum Reserve Range	Selected Reserves
Workers Compensation(1)	\$ 108,048	\$ 120,415	\$ 114,317
Commercial Multiple Peril/General Liability	38,710	48,580	43,511
Commercial Automobile	27,898	31,787	29,498
Other	17,130	19,775	18,440
Net Reserves	\$ 191,786	\$ 220,557	\$ 205,766

(1) Includes Residual Markets

Reserves are reviewed by internal and independent actuaries for adequacy on a quarterly basis. When reviewing reserves, the Company analyzes historical data and estimates the impact of numerous factors such as (i) per claim information; (ii) Company and industry historical loss experience; (iii) legislative enactments, judicial decisions, legal developments in the imposition of damages, and changes in political attitudes; and (iv) trends in general economic conditions, including the effects of inflation. This process assumes that past experience, adjusted for the effects of current developments and anticipated trends, is an appropriate basis for predicting future events. There is no precise method for subsequently evaluating the impact of any specific factor on the adequacy of reserves, because the eventual deficiency or redundancy is affected by multiple factors.

The key assumptions used in management's selection of ultimate reserves included the underlying actuarial methodologies, a review of current pricing and underwriting initiatives, an evaluation of reinsurance costs and retention levels, and a detailed claims analysis with an emphasis on how aggressive claims handling may be impacting the paid and incurred loss data trends embedded in the traditional actuarial methods. With respect to the ultimate estimates for losses and LAE, the key assumptions remained consistent for the six months ended June 30, 2004, and the years ended December 31, 2003 and 2002.

For the six months ended June 30, 2004, the Company reported an increase in net ultimate loss estimates for accident years 2003 and prior to be \$2.5 million, or 1.3% of \$192.0 million of net loss and LAE reserves at December 31, 2003. The increase in net ultimate loss estimates reflected revisions in the estimated reserves as a result of actual claims activity in calendar year 2004 that differed from the projected activity. There were no

Table of Contents

significant changes in the key assumptions utilized in the analysis and calculations of the Company's reserves during 2004. The major components of this change in ultimates are as follows (in thousands):

Line of Business	Reserves at December 31, 2003	Reserves of Deconsolidated Subsidiary at December 31, 2003(1)	Incurred Losses			Paid Losses			Reserves at June 30, 2004
			Current Year	Prior Years	Total Incurred	Current Year	Prior Years	Total Paid	
Workers Compensation	\$ 91,587	\$ (2,250)	\$ 30,036	\$ 935	\$ 30,971	\$ 2,605	\$ 20,030	\$ 22,635	\$ 97,673
Residual Markets	14,506		6,297	(927)	5,370	2,064	1,168	3,232	16,644
Commercial Multiple Peril/ General Liability	42,389	(737)	9,347	1,498	10,845	(249)	9,235	8,986	43,511
Commercial Automobile	27,515		10,688	1,015	11,703	1,753	7,967	9,720	29,498
Other	16,022	(2)	6,516	(70)	6,446	1,162	2,864	4,026	18,440
Net Reserves	192,019	\$ (2,989)	\$ 62,884	\$ 2,451	\$ 65,335	\$ 7,335	\$ 41,264	\$ 48,599	205,766
Reinsurance Recoverable	147,446								154,372
Consolidated	\$ 339,465								\$ 360,138

Line of Business	Reserves at December 31, 2003	Reserves at January 1, 2004(1)	Re-estimated Reserves at June 30, 2004 on Prior Years	Development as a Percentage of Prior Year Reserves
Workers Compensation	\$ 91,587	\$ 89,337	\$ 90,272	1.0%
Commercial Multiple Peril/ General Liability	42,389	41,652	43,150	3.5%
Commercial Automobile	27,515	27,515	28,530	3.6%
Other	16,022	16,020	15,950	-0.4%
Sub-total	177,513	174,524	177,902	1.9%
Residual Markets	14,506	14,506	13,579	-6.8%
Total Net Reserves	\$ 192,019	\$ 189,030	\$ 191,481	1.3%

- (1) In accordance with FIN 46(R), the Company performed an evaluation of its business relationships and determined that its wholly-owned subsidiary, American Indemnity Insurance Company, Ltd., (AIIC), did not meet the tests for consolidation, as neither the Company, nor its subsidiary Star, are the primary beneficiaries of AIIC. Therefore, effective January 1, 2004, the Company deconsolidated AIIC on a prospective basis in accordance with the provisions of FIN 46(R). The adoption of FIN 46(R) and the deconsolidation of AIIC did not have a material impact on the Company's consolidated balance sheet or consolidated statement of income. Refer to New Accounting Pronouncements of Management's Discussion and Analysis.

Workers Compensation Excluding Residual Markets

The projected net ultimate loss estimate for the workers compensation line of business excluding residual markets increased \$935,000, or 1.0% of net workers compensation reserves. This net overall increase reflects an increase of \$3.9 million and \$1.0 million in accident years 2003 and 2000, respectively. The increase in ultimate loss estimates for accident year 2003 reflects higher than expected emergence of claim activity related to one Alabama program and the acceleration of amortization of prepaid claims handling costs, while the increase in accident year 2000 reflects a re-allocation of estimated reserves between accident years 2000 and 1999. These increases were partially offset by reductions of \$1.4 million, \$1.6 million, and \$1.8 million in the ultimate loss estimate for accident years 2002, 2001 and 1999, respectively. The decrease in ultimate loss estimates for 2002 and 2001 reflect better than expected experience on the Company's core workers compensation programs, primarily in Massachusetts and Tennessee, while the decrease in 1999 reflects a re-allocation of estimated reserves between accident years 2000

and 1999. The change in ultimate loss estimates for all other accident years was insignificant.

Table of Contents

Commercial Multiple Peril/ General Liability

The commercial multiple peril line/general liability line of business had an increase in net ultimate loss estimates of \$1.5 million, or 3.5% of net commercial multiple peril/general liability reserves. The net increase reflects an increase of \$847,000, \$736,000, \$535,000 and \$461,000 in accident years 2003, 2002, 2001 and 1999, respectively. The increases in accident years 2003 and 2002 ultimate loss estimates reflect higher than expected emergence in claim activity in a general liability occurrence program within the Kansas City Branch during the six months ended June 30, 2004. The increase in accident year 2001 reflects higher than expected claims activity in one program in the Alabama branch. The increase in accident year 1999 reflects an increase in one claim in an excess professional liability program and development on a settlement in one discontinued program. These increases were partially offset by a reduction of \$894,000 in the ultimate loss estimate for accident year 2000. The improvement in accident year 2000 reflects better than expected claims activity in two previously discontinued programs. The change in ultimate loss estimates for all other accident years was insignificant.

Commercial Automobile

The projected net ultimate loss estimate for the commercial automobile line of business increased \$1.0 million, or 3.6% of net commercial automobile reserves. This net overall increase reflects an increase of \$516,000, \$668,000 and \$701,000 in accident years 2002, 2001 and 2000, respectively. These increases reflect the impact of the change in the case reserve for one claim in a California program and the impact of higher than expected emergence in claims activity in a previously discontinued program. These increases were partially offset by a reduction of \$802,000 in the ultimate loss estimate for accident year 2003 related to automobile physical damage claim activity and a \$271,000 reallocation of ultimate losses between 2003 and 2002. The change in ultimate loss estimates for all other accident years was insignificant.

Other

The other lines of business had a decrease in net ultimate loss estimates of \$70,000, or 0.4% of net reserves on the other lines of business. The change in ultimate loss estimates for all accident years was insignificant.

Residual Markets

The workers compensation residual market line of business had a decrease in net ultimate loss estimates of \$927,000, or 6.8% of net reserves on the workers compensation residual market line of business. The change reflects a reduction of \$1.0 million in accident year 2003. The Company records loss reserves as reported by the National Council on Compensation Insurance (NCCI), plus a provision for the reserves incurred but not yet analyzed and reported to the Company due to a two quarter lag in reporting. This 2003 change reflects a difference between the Company's estimate of the lag incurred but not reported and the amounts reported by the NCCI in the quarter. The change in ultimate loss estimates for all other accident years was insignificant.

Salary and Employee Benefits and Other Administrative Expenses

Salary and employee benefits for the six months ended June 30, 2004, increased \$1.3 million, or 5.6%, to \$25.1 million, from \$23.8 million for the comparable period in 2003. This increase primarily reflects both merit increases and the accrual of anticipated variable compensation, which is directly tied to performance and profitability. These increases were partially offset by a slight decrease in staffing levels.

Other administrative expenses increased \$943,000, or 7.6%, to \$13.3 million, from \$12.4 million for the comparable period in 2003. This increase is primarily attributable to an increase in policyholder dividends for 2004 as opposed to a \$1.7 million reduction in anticipated policyholder dividends reflected in 2003. Partially offsetting this decrease was a reduction in overall bad debt expense in 2004 as compared to increases in related allowances recorded in 2003 on previously discontinued programs.

Table of Contents

Salary and employee benefits and administrative expenses include both corporate overhead and the holding company expenses included in the reconciling items of the Company's segment information.

Interest Expense

Interest expense for the six months ended June 30, 2004, increased by \$394,000, or 87.8%, to \$843,000, from \$449,000 for the comparable period in 2003. Interest expense is primarily attributable to the Company's term loan, line of credit, and debentures, which are described below. Interest expense increased \$454,000 as a result of the senior debentures and junior subordinated debentures. Offsetting this increase was a reduction in interest associated with the Company's term loan and line of credit of \$59,000, or 13.1%, to \$390,000, from \$449,000 in comparison to 2003. This decrease reflects a reduction in the average outstanding balance, offset by an increase in the average interest rate. The average outstanding balance during the six months ending June 30, 2004, was \$16.9 million, compared to \$26.6 million for the same period in 2003. The average interest rate increased in 2004 to 4.6%, compared to 3.4% in 2003 as a result of increases in the underlying eurocurrency based rate.

Taxes

Federal income tax expense for the six months ended June 30, 2004, was \$2.7 million, or 30.9% of income before taxes. For the comparable period in 2003, the Company reflected a federal income tax expense of \$2.6 million, or 32.6% of income before taxes. The Company's effective tax rate differs from the 34% statutory rate primarily due to a shift towards increasing investments in tax-exempt securities in an effort to maximize after-tax investment yields.

At June 30, 2004, the Company had a deferred tax asset of \$17.4 million, \$548,000 of which is related to a net operating loss carryforward (NOL). Realization of the deferred tax asset is dependent on generating sufficient taxable income to absorb both the applicable reversing temporary differences and the NOL. At June 30, 2004, management concluded that the positive evidence supporting the generation of future taxable income sufficient to realize the deferred tax asset outweighed the negative evidence of the previous cumulative losses reported for the periods ended December 31, 2001, 2000, and 1999, which generated the NOL. This positive evidence includes cumulative pre-tax income of \$7.0 million for the three years ended December 31, 2003, in addition to pre-tax income of \$8.8 million for the six months ended June 30, 2004. Also, the Company continues to have alternative tax strategies, which could generate capital gains from the potential sale of assets and/or subsidiaries. These capital gains would fully utilize the net operating loss of \$548,000 at June 30, 2004.

Other than Temporary Impairments

The Company's policy for the valuation of temporarily impaired securities is to determine impairment based on analysis of the following factors: market value less than amortized cost for a six month period; rating downgrade or other credit event, e.g., failure to pay interest when due; financial condition and near-term prospects of the issuer, including any specific events which may influence the operations of the issuer such as changes in technology or discontinuance of a business segment; prospects for the issuer's industry segment; intent and ability of the Company to retain the investment for a period of time sufficient to allow for anticipated recovery in market value. The Company evaluates its investments in securities to determine other than temporary impairment, no less than quarterly. Investments which are deemed impaired are written down to their estimated net fair value and the related losses recognized in income.

At June 30, 2004, the Company had 183 securities that were in an unrealized loss position. These investments all had unrealized losses of less than ten percent. Positive evidence considered in reaching the Company's conclusion that the investments in an unrealized loss position are not other than temporarily impaired consisted of: 1) there were no specific events which caused concerns; 2) there were no past due interest payments; 3) there has been a rise in market prices; 4) the Company's ability and intent to retain the investment for a sufficient amount of time to allow an anticipated recovery in value; and 5) the Company also

Table of Contents

determined that the changes in market value were considered normal in relation to overall fluctuations in interest rates.

The fair value and amount of unrealized losses segregated by the time period the investment has been in an unrealized loss position is as follows (in thousands):

	June 30, 2004			
	Less than 12 Months		Greater than 12 Months	
	Fair Value of Investments with Unrealized Losses	Gross Unrealized Losses	Fair Value of Investments with Unrealized Losses	Gross Unrealized Losses
Debt Securities:				
Debt securities issued by U.S. government and agencies	\$ 22,832	\$ (343)	\$ 5,755	\$(264)
Obligations of states and political subdivisions	41,396	(1,172)	1,077	(66)
Corporate securities	28,651	(723)	2,918	(221)
Mortgage-backed securities	26,672	(570)	5,974	(93)
Totals	<u>\$ 119,551</u>	<u>\$(2,808)</u>	<u>\$ 15,724</u>	<u>\$(644)</u>

As of June 30, 2004, gross unrealized gains and (losses) on securities were \$7.8 million and (\$3.5) million, respectively.

Results of Operations for the Three Months Ended June 30, 2004 and 2003**Overview**

Net income for the three months ended June 30, 2004 was \$2.8 million, or \$0.10 per dilutive share, compared to net income of \$2.7 million, or \$0.09 per dilutive share, for the comparable period of 2003. Net income for the three months ended June 30, 2004 reflects the earning pattern of controlled growth of premium in profitable programs which were written in the last two quarters of 2003 and the first quarter of 2004, continued rate increases, growth in agency commission, and control over expenses.

Revenues for the three months ended June 30, 2004 increased \$13.9 million, or 27.2%, to \$65.4 million from \$51.5 million for the comparable period in 2003. This increase reflects a \$16.9 million, or 46.5%, increase in net earned premium. The growth in net earned premium reflects the earning pattern of programs written in the last two quarters of 2003 and the first quarter of 2004. These programs include the conversion of an existing west-coast commercial transportation program to the Company's insurance subsidiaries, the impact of a renewal rights contract for a select group of association-endorsed workers' compensation programs which had decades of profitable underwriting experience, the implementation of an excess liability program for public entities with a statistically proven twenty-year track record, the return of profitable programs, and the impact of rate increases achieved in 2003 and 2004. This increase was partially offset by the anticipated reduction in managed fee revenue from two limited duration or closed end administrative services and claims contracts in the State of Missouri.

Table of Contents*Specialty Risk Management Operations*

The following table sets forth the revenues and results from operations for specialty risk management operations (in thousands):

	For the Three Months Ended June 30,	
	2004	2003
Revenue:		
Net earned premiums	\$53,083	\$36,230
Management fees	3,898	4,840
Claims fees	2,728	3,755
Loss control fees	532	549
Reinsurance brokerage	(30)	106
Investment income	3,542	3,564
Net realized (losses) gains on investments	(32)	374
Total revenue	\$63,721	\$49,418
Pre-tax income		
Specialty risk management operations	\$ 3,774	\$ 2,881

Revenues from specialty risk management operations increased \$14.3 million, or 28.9%, to \$63.7 million for the three months ended June 30, 2004, from \$49.4 million for the comparable period in 2003.

Net earned premium increased \$16.9 million, or 46.5%, to \$53.1 million for the three months ended June 30, 2004, from \$36.2 million in the comparable period in 2003. As previously mentioned, this increase is the result of increased written premium in the last two quarters of 2003 and the first quarter of 2004 that are recognized as earned premium in 2004.

Management fees decreased \$942,000, or 19.5%, to \$3.9 million for the three months ended June 30, 2004, from \$4.8 million for the comparable period in 2003. The decrease in management fees reflects an anticipated shift in fee-for-service revenue previously generated from a third-party contract to internally generated fee revenue that is eliminated upon consolidation. The transition of such fees is directly related to the Company's previously mentioned renewal rights contract. Excluding revenue generated from the third-party contract, management fee revenue increased approximately \$600,000 in comparison to 2003. This increase is partially the result of higher premium volumes, which is the basis for the calculation of fee-for-service revenue, related to specific existing managed programs. Also contributing to this increase was the recognition of \$250,000 in profit sharing revenue related to a specific managed program. The profit sharing revenue related to this program for 2003 was recognized in the first quarter of 2003.

Claim fees decreased \$1.0 million, or 27.4%, to \$2.7 million, from \$3.7 million for the comparable period in 2003. The decrease in claim fees reflects a similar anticipated shifting of revenue previously generated from third-party contracts to internally generated fee revenue that is eliminated upon consolidation. The transition of such fees is directly related to the Company's renewal rights contract. Excluding revenue generated from the third-party contract, claim fee revenue increased approximately \$320,000 in comparison to 2003. This increase is partially the result of higher premium volumes, which is the basis for the calculation of fee-for-service revenue, related to specific existing managed programs.

Net investment income decreased \$22,000, or 0.6%, to \$3.5 million in 2004. Average invested assets increased \$42.6 million, or 14.2%, to \$343.0 million for the three months ended June 30, 2004, from \$300.4 million for the comparable in 2003. The increase in average invested assets reflects cash flows from underwriting activities and growth in gross written premiums during 2003 and 2004, as well as, net proceeds from capital raised through the issuance of long-term debt. The average investment yield for June 30, 2004 was 4.1%, compared to 4.8% for the comparable period in 2003. The current pre-tax book yield is 4.0% and current after-tax book yield is 2.9%. The decline in investment yield reflects the accelerated prepayment speeds in mortgage-backed securities and the reinvestment of cash flows in municipal bonds and other

Table of Contents

securities with lower interest rates. Over the past two years, the reinvestment of cash flows has shifted from maturing securities with higher yields being replaced by securities with lower yields in a declining interest rate environment. In addition, the capital raised during the period, which will be utilized before the end of the year, has been invested in short-term investments.

Specialty risk management operations generated pre-tax income of \$3.8 million for the three months ended June 30, 2004, compared to pre-tax income of \$2.9 million for the comparable period in 2003. This increase in pre-tax income demonstrates the improvement in underwriting results as the Company continues to experience controlled growth of premium volume. The GAAP combined ratio was 101.3% for the three months ended June 30, 2004, compared to 106.4% for the same period in 2003.

Net loss and loss adjustment expenses (LAE) increased \$8.7 million, or 36.2%, to \$32.8 million for the three months ended June 30, 2004, from \$24.1 million for the same period in 2003. The Company's loss and LAE ratio decreased by 4.6 percentage points to 66.5% for the three months ended June 30, 2004, from 71.1% for the same period in 2003. This ratio is the unconsolidated net loss and LAE in relation to net earned premium. The decrease in the loss and LAE ratio reflects a reduction in the increase in net ultimate loss estimates for prior accident years in 2004 compared to the same period in 2003. In 2004, the increase in net ultimate loss estimates for prior accident years was \$648,000, compared to \$1.9 million in 2003. This remaining improvement in the current accident year loss ratio reflects rate increases achieved during 2004 and the addition of earned premium from profitable programs.

The Company's expense ratio improved 0.5 percentage points to 34.8% for the three months ended June 30, 2004, from 35.3% for the same period in 2003. This ratio is the unconsolidated policy acquisition and other underwriting expenses in relation to net earned premium. This improvement reflects a decrease in insurance related assessments. This decrease was partially offset by an increase in ceded excess reinsurance expense primarily related to the previously mentioned excess liability program for public entities.

Agency Operations

The following table sets forth the revenues and results from operations for agency operations (in thousands):

	For the Three Months Ended June 30,	
	2004	2003
Net commission	\$ 3,993	\$ 3,675
Pre-tax income*	\$ 1,740	\$ 1,548

* Excluding the allocation of corporate overhead

Revenue from agency operations, which consists primarily of agency commission revenue, increased \$318,000, or 8.7%, to \$4.0 million for the three months ended June 30, 2004, from \$3.7 million for the comparable period in 2003. This increase is primarily the result of rate increases and increases in new business.

Agency operations generated pre-tax income, before corporate overhead, of \$1.7 million for the three months ended June 30, 2004, compared to \$1.5 million for the comparable period in 2003. The improvement in the pre-tax margin is primarily attributable to the overall increase in revenue.

Other Items**Reserves**

For the quarter ended June 30, 2004, the Company reported an increase in net ultimate loss estimates for accident years 2003 and prior to be \$648,000, or 0.3% of \$192.0 million of net loss and LAE reserves at December 31, 2003. There were no significant changes in the key assumptions utilized in the analysis and calculations of the Company's reserves during 2004.

Table of Contents

Salary and Employee Benefits and Other Administrative Expenses

Salary and employee benefits for the three months ended June 30, 2004, increased \$457,000, or 3.9%, to \$12.3 million, from \$11.9 million for the comparable period in 2003. This increase primarily reflects both merit increases and the accrual of anticipated variable compensation, which is directly tied to performance and profitability. These increases were partially offset by a slight decrease in staffing levels.

Other administrative expenses increased \$1.4 million, or 26.4%, to \$6.7 million, from \$5.3 million for the comparable period in 2003. This increase is primarily attributable to an increase in policyholder dividends for 2004 as opposed to an \$872,000 reduction in anticipated policyholder dividends reflected in 2003.

Salary and employee benefits and administrative expenses include both corporate overhead and the holding company expenses included in the reconciling items of the Company's segment information.

Interest Expense

Interest expense for the three months ended June 30, 2004, increased by \$316,000, or 149.1%, to \$528,000, from \$212,000 for the comparable period in 2003. Interest expense is primarily attributable to the Company's term loan, line of credit, and debentures, which are described below. Interest expense increased \$318,000 as a result of the senior debentures and junior subordinated debentures. Excluding the interest related to the debentures, interest expense remained constant in comparison to 2003. This is a result of a reduction of the average outstanding balance of the company's term loan and line of credit being offset by an increase in the average interest rate. The average outstanding balance during the three months ending June 30, 2004, was \$16.9 million, compared to \$20.9 million for the same period in 2003. The average interest rate for the three months ended June 30, 2004, increased to 5.0%, compared to 4.1% for the comparable period in 2003. This increase is a result of increases in the underlying eurocurrency based rate.

Taxes

Federal income tax expense for the three months ended June 30, 2004, was \$1.3 million, or 30.9% of income before taxes. For the same period last year, the Company reflected a federal income tax expense of \$1.3 million, or 32.4% of income before taxes. The Company's effective tax rate differs from the 34% statutory rate primarily due to a shift towards increasing investments in tax-exempt securities in an effort to maximize after-tax investment yields.

Liquidity and Capital Resources

The principal sources of funds, which include both regulated and non-regulated cash flows, for the Company and its subsidiaries, are insurance premiums, investment income, proceeds from the maturity and sale of invested assets, risk management fees, and agency commissions. Funds are primarily used for the payment of claims, commissions, salaries and employee benefits, other operating expenses, shareholder dividends, and debt service. The regulated sources of funds are insurance premiums, investment income, and proceeds from the maturity and sale of invested assets. These regulated funds are used for the payment of claims, policy acquisition and other underwriting expenses, and taxes relating to the regulated portion of net income. The non-regulated sources of funds are in the form of commission revenue, outside management fees, and intercompany management fees. These non-regulated sources of funds are used to meet debt service, shareholder dividends, and other operating expenses of the holding company and non-regulated subsidiaries. The following tables illustrate net income, excluding interest, depreciation, and amortization, between the

Table of Contents

Company's regulated and non-regulated subsidiaries, which reconciles to the Company's consolidated statement of income and statement of cash flows (in thousands):

	For the Six Months Ended June 30,

Consolidated net cash provided by operating activities	\$ 10,141	\$ 17,377

Consolidated cash flow provided by operations for the six months ended June 30, 2004, was \$26.3 million, compared to consolidated cash flow provided by operations of \$30.2 million for the comparable period in 2003.

Regulated subsidiaries cash flow provided by operations for the six months ended June 30, 2004, was \$24.5 million, compared to \$17.1 million for the comparable period in 2003. The increase in regulated cash flow from operations primarily reflects growth in written

premiums and overall improved underwriting results.

Non-regulated subsidiaries cash flow provided by operations for the six months ended June 30, 2004, was \$1.8 million, compared to \$13.1 million for the comparable period in 2003. The decrease in non-regulated cash flow from operations primarily reflects the inflow of cash related to the previously mentioned limited duration administrative services and claims contracts entered in the State of Missouri, beginning in 2003. At inception, these contracts resulted in a higher inflow of cash during the first quarter of 2003. As anticipated, for the duration of the remaining life of these contracts, there will be a decrease in the associated inflow of cash in comparison to prior periods. In addition, the decrease in cash flow from operations is the result of variable compensation payments made in the first quarter of 2004, related to 2003 performance and profitability. The decrease in cash flow from operations is also the result of intercompany tax payments made in the first quarter

Table of Contents

of 2004 to the regulated subsidiaries in accordance with the Company's tax sharing agreement. These intercompany tax payments were made to compensate the regulated subsidiaries for the utilization of the previously mentioned NOL. These intercompany tax payments also contributed to the increase in regulated cash flow from operations. Although the non-regulated cash flow from operations significantly decreased in comparison to 2003, which was mainly the result of timing variances associated with the inflow of cash, net income, excluding interest, depreciation, and amortization, remained relatively consistent in comparison to 2003.

On September 30, 2003, an unconsolidated subsidiary trust of the Company issued \$10.0 million of mandatory redeemable trust preferred securities (TPS) to a trust formed by an institutional investor. The Company's trust received a total of \$9.7 million in net proceeds, after the deduction of approximately \$300,000 of commissions paid to the placement agents in the transaction. The gross proceeds from the issuance of the TPS were used to purchase floating rate junior subordinated deferrable interest debentures (the Debentures) issued by the Company. Debentures mature in thirty years and provide for interest at the three-month LIBOR, plus 4.05%.

On April 29, 2004, the Company issued senior debentures in the amount of \$13.0 million. The senior debentures mature in thirty years and provide for interest at the three-month LIBOR, plus 4.00%, which is non-deferrable. The senior debentures are callable by the Company at par after five years from the date of issuance. Associated with this transaction the Company incurred \$390,000 of commissions paid to the placement agents. These issuance costs have been capitalized and are included in other assets on the balance sheet, which will be amortized over seven years as a component of interest expense.

On May 26, 2004, the Company issued senior debentures in the amount of \$12.0 million. The senior debentures mature in thirty years and provide for interest at the three-month LIBOR, plus 4.20%, which is non-deferrable. The senior debentures are callable by the Company at par after five years from the date of issuance. Associated with this transaction the Company incurred \$360,000 of commissions paid to the placement agents. These issuance costs have been capitalized and are included in other assets on the balance sheet, which will be amortized over seven years as a component of interest expense.

The Company has a credit agreement that includes a term loan and a revolving line of credit. This credit agreement consists of a \$20.0 million term loan and a revolving line of credit for up to \$8.0 million. The Company uses the revolving line of credit to meet short-term working capital needs. At June 30, 2004, the Company's term loan had an outstanding balance of \$11.5 million. The Company had no outstanding balance on the revolving line of credit at June 30, 2004. At December 31, 2003, the outstanding balance on the term loan was \$14.0 million. The Company had no outstanding balance on the revolving line of credit at December 31, 2003. The term loan calls for quarterly amortization through July 1, 2006, at which time the term loan will be paid in full. The quarterly amortization requires payments of \$1.25 million in 2004, 2005 and 2006, with a final payment of \$1.5 million on July 1, 2006. The revolving line of credit will expire on September 1, 2004, and is thereafter renewable on an annual basis. The Company is currently renegotiating the terms of the line of credit with its lender. As part of the loan agreement, certain of the Company's non-regulated subsidiaries guaranteed repayment of the credit facility and the Company pledged the stock of its non-regulated subsidiaries as collateral. The eurocurrency based rate as of June 30, 2004, for the term loan was 3.3%.

Both the term loan and revolving line of credit provide for interest at a variable rate based, at the Company's option, upon either the prime rate or eurocurrency based rate. The applicable margin, which ranges from 200 to 300 basis points above eurocurrency based rates, is determined by the level of the fixed charge coverage ratio. Of all the covenants, the most restrictive covenant is the fixed charge coverage ratio. The fixed charge coverage ratio, as defined by the credit facility, is the ratio of the non-regulated earnings before interest and taxes for the four preceding fiscal quarters to the sum of fixed charges which include interest expense, principal payments payable, stock repurchases, and dividends declared during the period. Any unused portion of the revolving credit as of the date of determination reduces the sum of these fixed charges. At June 30, 2004, this ratio was 10.4 to 1.0, compared to the covenant minimum of 1.2 to 1.0.

As of June 30, 2004, the Company was in compliance with all debt covenants.

Table of Contents

A non-insurance premium finance subsidiary of the Company maintains a line of credit with a bank, which permits borrowings up to 75% of the accounts receivable, which collateralize the line of credit. At June 30, 2004, this line of credit had an outstanding balance of \$4.7 million. The terms of this line of credit were amended on May 7, 2004. The amendments to the line of credit agreement included a change in the permitted borrowings from 80% to 75% of the accounts receivable, an increase in the line of credit from \$6.0 million to \$8.0 million, and amendments to the interest rates. The interest terms were amended to interest at the Prime Rate minus 0.5%, or a LIBOR-based rate option, plus 2.0%. On May 24, 2004, \$3.5 million was moved into the LIBOR-based rate. At June 30, 2004, the Prime Rate minus 0.5%, was 3.75% and the LIBOR-based option was 3.3%.

At June 30, 2004, shareholders' equity was \$157.0 million, or \$5.41 per common share, compared to \$155.1 million, or \$5.34 per common share, at December 31, 2003.

On September 17, 2002, the Company's Board of Directors authorized management to repurchase up to 1,000,000 shares of the Company's common stock in market transactions for a period not to exceed twenty-four months. On August 6, 2003, the Company's Board of Directors authorized management to repurchase up to an additional 1,000,000 shares of the Company's common stock under the existing share repurchase plan. Unless terminated earlier by resolution of the Company's Board of Directors, the share repurchase plan will expire on the earlier of September 17, 2004, or when the Company has repurchased all shares authorized for repurchase. As of June 30, 2004, the cumulative amount the Company repurchased and retired was 764,800 shares of common stock for a total cost of approximately \$2.0 million. The Company did not repurchase any common stock during the quarter ended June 30, 2004. As of June 30, 2004, the Company has 1,235,200 shares remaining which could be purchased.

A significant portion of the Company's consolidated assets represent assets of the Insurance Company Subsidiaries that at this time, without prior approval of the State of Michigan Office of Financial and Insurance Services (OFIS), cannot be transferred to the holding company in the form of dividends, loans or advances. The restriction on the transferability to the holding company from its Insurance Company Subsidiaries is limited by Michigan insurance regulatory guidelines which, in general, are as follows: the maximum discretionary dividend that may be declared, based on data from the preceding calendar year, is the greater of each insurance company's net income (excluding realized capital gains) or ten percent of the insurance company's surplus (excluding unrealized gains). These dividends are further limited by a clause in the Michigan law that prohibits an insurer from declaring dividends, except from surplus earnings of the company. Earned surplus balances are calculated on a quarterly basis. Since Star is the parent insurance company, its maximum dividend calculation represents the combined Insurance Company Subsidiaries' surplus. Based upon the 2003 statutory financial statements, Star may only pay dividends to the Company during 2004 with the prior approval of OFIS. Star's earned surplus position at December 31, 2003 was negative \$24.6 million. At June 30, 2004, earned surplus was negative \$25.1 million. No statutory dividends were paid in 2003.

Disclosure of Contractual Arrangements

During the three months ended June 30, 2004, the Company's contractual obligations changed materially from those discussed in the Company's Annual Report and Form 10-K for the year ended December 31, 2003 in relation to the senior debentures described above and in Note 3 to the Consolidated Financial Statements. The debentures described above and in Note 3 mature in thirty years, therefore the Company's contractual obligations for more than a five year period increased \$25.0 million.

Regulatory and Rating Issues

The National Association of Insurance Commissioners (NAIC) has adopted a risk-based capital (RBC) formula to be applied to all property and casualty insurance companies. The formula measures required capital and surplus based on an insurance company's products and investment portfolio and is used as a tool to evaluate the capital of regulated companies. The RBC formula is used by state insurance regulators to monitor trends in statutory capital and surplus for the purpose of initiating regulatory action. In general, an

Table of Contents

insurance company must submit a calculation of its RBC formula to the insurance department of its state of domicile as of the end of the previous calendar year. These laws require increasing degrees of regulatory oversight and intervention as an insurance company's RBC declines. The level of regulatory oversight ranges from requiring the insurance company to inform and obtain approval from the domiciliary insurance commissioner of a comprehensive financial plan for increasing its RBC to mandatory regulatory intervention requiring an insurance company to be placed under regulatory control in a rehabilitation or liquidation proceeding.

At December 31, 2003, all of the Insurance Company Subsidiaries were in compliance with RBC requirements. Star reported statutory surplus of \$99.9 million at December 31, 2003, compared to the threshold requiring the minimum regulatory involvement of \$45.7 million in 2003. At June 30, 2004, Star's statutory surplus decreased \$600,000 to \$99.3 million.

Statutory accounting principles differ in some respects from generally accepted accounting principles (GAAP). These differences, among other differences, include the costs of acquiring and renewing business. Under statutory accounting principles these acquisition costs are expensed as premium is written, while under GAAP these costs are deferred and recognized as premium is earned over the terms of the policies or reinsurance treaties to which the costs relate. At June 30, 2004, the Company's asset for deferred policy acquisition costs increased \$2.8 million, or 14.3%, to \$22.4 million, compared to \$19.6 million at December 31, 2003. This increase reflects the increase in gross unearned premiums of \$15.8 million, or 14.4%, to \$125.5 million at June 30, 2004, compared to \$109.7 million at December 31, 2003.

Insurance operations are subject to various leverage tests (e.g. premium to statutory surplus ratios), which are evaluated by regulators and rating agencies. The Company's targets for gross and net written premium to statutory surplus are 3.0 to 1 and 2.5 to 1, respectively. As of June 30, 2004, on a statutory consolidated basis, gross and net premium leverage ratios were 2.8 to 1.0 and 2.2 to 1.0, respectively.

The Insurance Company Subsidiaries' A.M. Best financial strength rating is a B+ (Very Good) with a positive outlook. A positive outlook is placed on a company's rating if its financial and market trends are favorable, relative to its current rating level.

Off-Balance Sheet Arrangements

On June 6, 2003, the Company entered into a Guaranty Agreement with a bank. The Company is guaranteeing payment of a \$1.5 million term loan issued by the bank to an unaffiliated insurance agency. In the event of default on the term loan by the insurance agency, the Company is obligated to pay any outstanding principal (up to a maximum of \$1.5 million), as well as any accrued interest on the loan, and any costs incurred by the bank in the collection process. In exchange for the Company's guaranty, the president and member of the insurance agency pledged 100% of the common shares of two other insurance agencies that he wholly owns. In the event of default on the term loan by the insurance agency, the Company has the right to sell any or all of the pledged insurance agencies' common shares and use the proceeds from the sale to recover any amounts paid under the guaranty agreement. Any excess proceeds would be paid to the shareholder. As of June 30, 2004, no liability has been recorded with respect to the Company's obligations under the guaranty agreement, since the collateral is in excess of the guaranteed amount.

New Accounting Pronouncements

On May 15, 2003, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 150, Accounting for Certain Financial Instruments with Characteristics of Both Liabilities and Equity. The statement requires issuers to classify as liabilities (or assets in some circumstances) three classes of freestanding financial instruments that embody obligations for the issuer. Generally, the statement is effective for financial instruments entered into or modified after May 31, 2003, and is otherwise effective at the beginning of the first interim period beginning after June 15, 2003. The adoption of this standard had no effect on the Company's financial statements.

Table of Contents

In November 2002, the FASB issued FASB Interpretation (FIN) No. 45, Guarantor s Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others. FIN No. 45 clarifies the requirements of SFAS No. 5, Accounting for Contingencies , relating to a guarantor s accounting for, and disclosure of, the issuance of certain types of guarantees. For certain guarantees issued after December 31, 2002, FIN No. 45 requires a guarantor to recognize, upon issuance of a guarantee, a liability for the fair value of the obligations it assumes under the guarantee. Guarantees issued prior to January 1, 2003, are not subject to liability recognition, but are subject to expanded disclosure requirements.

In January 2003, the FASB issued FIN No. 46, Consolidation of Variable Interest Entities. The primary objective of FIN No. 46 is to provide guidance on the identification of, and financial reporting for, entities over which control is achieved through means other than voting rights; such entities are known as variable interest entities. FIN No. 46 requires variable interest entities to be consolidated by the primary beneficiary of the variable interest entities and expands disclosure requirements for both variable interest entities that are consolidated as well as those within which an enterprise holds a significant variable interest. In accordance with FIN No. 46, the Company performed an evaluation of its business relationships and determined that Meadowbrook Capital Trust I (Trust) was a variable interest entity; however, it was also determined that the Trust did not meet the qualifications for consolidation as the Trust equity was deemed to not be at risk. The adoption of FIN No. 46 did not have a material impact on the Company s consolidated balance sheet or its consolidated statement of income. See Note 3 for additional information regarding the Company s unconsolidated subsidiary trust.

In December 2003, FIN No. 46 was revised as FIN No. 46(R), to address certain implementation issues and to defer full adoption into financial statements for periods ending after March 15, 2004, with earlier adoption permitted. In accordance with FIN No. 46(R), the Company performed an evaluation of its business relationships and determined that its wholly-owned subsidiary, AIIC, did not meet the tests for consolidation, as neither the Company, nor its subsidiary Star, are the primary beneficiaries of AIIC. Therefore, effective January 1, 2004, the Company deconsolidated AIIC on a prospective basis in accordance with the provisions of FIN No. 46(R). The adoption of FIN No. 46(R) and the deconsolidation of AIIC did not have a material impact on the Company s consolidated balance sheet or consolidated statement of income.

Subsequent Events

On May 19, 2004, the Company entered into a Purchase and Sale Agreement (the Purchase Agreement) with an unaffiliated third-party, whereby, the Company sold the land and building located at 12641 W. 166th Street, Cerritos, California 90703 (the Transaction). The Transaction closed on July 19, 2004, with the acquirer paying \$2,942,000 to the Company for the land and building. Contemporaneously, a subsidiary of the Company, Meadowbrook, Inc. entered into a Lease Agreement (the Lease) of the building with the acquirer commencing on July 19, 2004 and ending on July 19, 2014. Under the Lease, the initial rental rate was \$18,380 per month, which shall be increased at the rate of 1.5% annually on each anniversary date of the lease term. The Company is currently evaluating the impact of the sale/leaseback agreement on its financial statements.

As a part of the Transaction, the Company entered into an Exclusive Sale/Lease Agency Agreement (the Agency Agreement) with GVA Strategis. Michael Ziecik, a principal of GVA Strategis, is the son-in-law of the Chairman, Merton J. Segal. Under the Agency Agreement, the Company paid GVA Strategis a brokerage commission of \$73,550 for its services in the Transaction.

The Company owns certain real estate in Southfield, Michigan, which consists of approximately 9.2 acres. As indicated in Note 6 Commitments and Contingencies, on December 3, 2003, the Company entered into a Development Agreement with Kirco Development, LLC, for the construction of the Company s new corporate offices and certain common areas. This new building will be located on approximately 4.5 acres of the land.

On December 4, 2003, the Company entered into a Purchase and Sale Agreement, wherein the Company sold the remaining 4.5 acres to Kirco Acquisition, LLC for the purpose of constructing an office building adjacent to the Company s new corporate offices.

Table of Contents

Kirco Acquisition, LLC agreed to pay the Company \$2,116,000, for the real estate and \$1,239,310 for its share of the costs related to the common areas. A Land Contract was executed, whereby Kirco Acquisition, LLC agreed to pay the principal balance of \$2,722,110, plus seven percent (7%) interest. The Land Contract will mature in 36 months and is subject to a balloon payment for the outstanding balance and the accrued interest thereon.

This transaction closed in escrow on July 29, 2004, subject to the conveyance of certain land by the City of Southfield to the Company and Kirco Acquisition, LLC.

Forward-Looking Statements

This quarterly report may provide information including certain statements which constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These include statements regarding the intent, belief, or current expectations of the Company's management, including, but not limited to, those statements that use the words believes, expects, anticipates, estimates, or similar expressions. You are cautioned that any such forward-looking statements are not guarantees of future performance and involve a number of risks and uncertainties, and results could differ materially from those indicated by such forward-looking statements. Among the important factors that could cause actual results to differ materially from those indicated by such forward-looking statements are: the frequency and severity of claims; uncertainties inherent in reserve estimates; catastrophic events; a change in the demand for, pricing of, availability or collectibility of reinsurance; increased rate pressure on premiums; obtaining of certain rate increases in current market conditions; investment rate of return; changes in and adherence to insurance regulation; actions taken by regulators, rating agencies or lenders; obtaining of certain processing efficiencies; changing rates of inflation; general economic conditions and other risks identified in the Company's reports and registration statements filed with the Securities and Exchange Commission. The Company is not under any obligation to (and expressly disclaims any such obligation to) update or alter its forward-looking statements whether as a result of new information, future events or otherwise.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market risk is the risk of loss arising from adverse changes in market rates and prices, such as interest rates as well as other relevant market rate or price changes. The volatility and liquidity in the markets in which the underlying assets are traded directly influence market risk. The following is a discussion of the Company's primary risk exposures and how those exposures are currently managed as of June 30, 2004. The Company's market risk sensitive instruments are primarily related to fixed income securities, which are available for sale and not held for trading purposes.

Interest rate risk is managed within the context of asset and liability management strategy where the target duration for the fixed income portfolio is based on the estimate of the liability duration and takes into consideration the Company's surplus. The investment policy guidelines provide for a fixed income portfolio duration of between three and five years. At June 30, 2004, the Company's fixed income portfolio had a modified duration of 3.43, compared to 3.27 at December 31, 2003.

At June 30, 2004 the fair value of the Company's investment portfolio was \$300.2 million, 99.2% of which is invested in debt securities. The remaining 0.8% is invested in preferred stocks. The Company's market risk to the investment portfolio is interest rate risk associated with debt securities. The Company's exposure to equity price risk is not significant. The Company's investment philosophy is one of maximizing after-tax earnings and has historically included significant investments in tax-exempt bonds. In 2002, the Company emphasized taxable securities over tax-exempt securities in order to maximize after-tax income and the utilization of the net operating loss carryforward. During 2003 and continuing in 2004, the Company began to increase its holdings of tax-exempt securities based on the Company's return to profitability and its desire to maximize after-tax investment income. For the Company's investment portfolio, there were no significant changes in the Company's primary market risk exposures or in how those exposures are managed compared to the year ended December 31, 2003. The Company does not anticipate significant changes in the Company's

Table of Contents

primary market risk exposures or in how those exposures are managed in future reporting periods based upon what is known or expected to be in effect.

A sensitivity analysis is defined as the measurement of potential loss in future earnings, fair values, or cash flows of market sensitive instruments resulting from one or more selected hypothetical changes in interest rates and other market rates or prices over a selected period. In the Company's sensitivity analysis model, a hypothetical change in market rates is selected that is expected to reflect reasonable possible near-term changes in those rates. Near term means a period of up to one year from the date of the consolidated financial statements. In its sensitivity model, the Company uses fair values to measure its potential loss of debt securities assuming an upward parallel shift in interest rates to measure the hypothetical change in fair values. Based upon this sensitivity model, a 100 basis point immediate increase in interest rates produces a loss in fair value of market sensitive instruments of approximately \$11.2 million, or 3.73%. This loss in fair value only reflects the impact of interest rate increases on the fair value of the Company's debt securities. This loss after tax constitutes 4.7% of shareholders' equity. The other financial instruments, which include cash and cash equivalents, equity securities, premium receivables, reinsurance recoverables, line of credit and other assets and liabilities, when included in the sensitivity model, do not produce a material loss in fair values.

Item 4. *Controls and Procedures*

As of June 30, 2004, the Company's management, with the participation of its Chief Executive Officer (CEO) and Chief Financial Officer (CFO), carried out an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rules 13a-14(c) and 15d-14(c) under the Securities and Exchange Act of 1934, as amended). It should be noted that in designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. The Company has designed its disclosure controls and procedures to reach a level of reasonable assurance of achieving desired control objectives and, based on the evaluation described above, the Company's CEO and CFO concluded that the Company's disclosure controls and procedures were effective at reaching that level of reasonable assurance, except as discussed in the paragraph below.

During the quarter ended June 30, 2004, the CFO identified an error in the accounting for a reinsurance contract as it applies to a unique and newly implemented program. Upon investigation of this error, management concluded that a significant deficiency in internal controls over the reinsurance process existed. This deficiency was the result of the lack of adequate control procedures to incorporate on a timely basis specific provisions of reinsurance contracts into the financial reporting process. For the second quarter of 2004, and going forward, the reinsurance process now incorporates a second level of review for the accounting relating to new or changed reinsurance provisions by the Controller or CFO and the reinsurance department. This review also includes a verification of the accounting impact of all new or changed reinsurance provisions to the general ledger.

Management has reviewed the impact of the error on the financial statements of prior periods and believes it does not have a material effect on the reported earnings in any quarter for 2003 and 2004. As a result, management has not restated its prior period financial statements.

Management is assigning high priority to the short-term and long-term correction of this internal control deficiency. Management will continue to evaluate the effectiveness of the Company's internal controls and procedures on an on-going basis and will take further action as appropriate. Other than implementing the improvements discussed above, there have been no other changes required in the Company's internal controls over financial reporting during its most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting.

PART II OTHER INFORMATION

Item 1. *Legal Proceedings*

The information required by this item is included under Note 6 Commitments and Contingencies of the Company's Form 10-Q for the six months ended June 30, 2004, which is hereby incorporated by reference.

Item 2. *Changes in Securities, Use of Proceeds and Issuer Purchases of Equity Securities*

The information required by this item is included under Note 4 Shareholders Equity of the Company's Form 10-Q for the six months ended June 30, 2004, which is hereby incorporated by reference.

Item 4. *Submission of Matters to a Vote of Security Holders*

On May 11, 2004, the Company held its Annual Meeting of Shareholders (Annual Meeting) to consider and act upon the following proposals:

- (1) The election of five (5) members to the Board of Directors of the Company;
- (2) Ratification of the appointment of the Company's independent accountants, PricewaterhouseCoopers, LLP; and
- (3) The approval of the Restatement and Amendment of the 1995 and 2002 Stock Option Plans to permit restricted stock awards.

The following Directors stood for election at the Annual Meeting: (1) Joseph S. Dresner; (2) Ralph Milo; (3) David Page; (4) Merton J. Segal; and (5) Herbert Tyner. The shareholders re-elected the Directors at the Annual Meeting and therefore, each shall continue in office. The vote tabulation for each Director was: (1) Joseph S. Dresner 27,491,311 in favor and 171,021 withheld; (2) Ralph Milo 27,575,909 in favor and 86,423 withheld; (3) David K. Page 27,581,491 in favor and 80,841 withheld; (4) Merton J. Segal 27,487,678 for and 174,654 withheld and (5) Herbert Tyner 27,490,311 for and 172,021 withheld. Other Directors continuing in office after the meeting were as follows: Robert S. Cubbin, Hugh W. Greenberg, Florine Mark, Robert H. Naftaly, Robert W. Sturgis, Irvin F. Swider, Sr., and Bruce E. Thal.

The shareholders ratified the appointment of PricewaterhouseCoopers, LLP by a vote of 27,622,442 in favor, 30,212 against and 9,678 abstained.

The shareholders approved the Restatement and Amendment of the 1995 and 2002 Stock Option Plans to permit restricted stock awards by a vote of 18,314,377 in favor, 986,028 against, and 20,294 abstained. There were 8,341,633 broker non-votes on this proposal.
