Filed Pursuant to Rule 433
Issuer Free Writing Prospectus Dated June 28, 2006
Relating to Preliminary Prospectus Dated June 13, 2006
Registration Statement No. 333-133021

This free writing prospectus relates only to the securities described below and should be read together with the preliminary prospectus dated June 13, 2006 relating to this offering (the Preliminary Prospectus), included in Amendment No. 2 to the Registration Statement on Form S-1 (File No. 333-133021) relating to these securities. The most recent Registration Statement can be accessed through the following link:

Common stock offered by us: 4,500,000 shares (excluding option to purchase up to 675,000 additional shares to cover over-allotments).

Common stock to be outstanding after this offering: 26,426,497 shares.

Initial public offering price per share: \$10.00 per share.

Net proceeds to Replidyne: Approximately \$40.3 million, after deducting underwriting discounts and commissions and estimated offering expenses payable by us.

Use of proceeds: The net proceeds that we will receive from the offering will be less than the estimated net proceeds set forth under the caption Use of Proceeds in the Preliminary Prospectus, which was based on an assumed initial offering price of \$15 per share.

As a result, we currently expect to use our net proceeds from this offering as follows:

approximately \$20.0 million to fund clinical trials and other research and development activities for Orapem;

approximately \$12.0 million to fund future clinical trials for REP8839;

approximately \$5.0 million to fund activities in preparation for the potential commercial launch of Orapem; and

the remainder, along with our available cash and cash equivalents, short-term investments and interest earned, to fund working capital and other general corporate purposes, including sales, general and administrative expenses and potential further expansion of our employee base and facilities, as well as amounts due to Daiichi Asubio under our license agreement, which amounts are uncertain as to timing and dependent on the achievement of milestones.

We may also use a portion of the proceeds for the potential acquisition of, or investment in, other product candidates, intellectual property rights or

companies that complement our business, although we have no current understandings, commitments or agreements to do so.

We believe that the net proceeds from this offering, together with our existing cash and cash equivalents, short-term investments, funding received from our collaboration agreements and interest earned on these balances, will be sufficient to satisfy our anticipated cash needs for working capital and capital expenditures through at least the next 18 months.
