**Table of Contents****TRIO-TECH INTERNATIONAL AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED, IN THOUSANDS, EXCEPT PER SHARE AND NUMBER OF SHARES)****1. ORGANIZATION AND BASIS OF PRESENTATION**

Trio-Tech International (the Company or TTI thereafter) was incorporated in fiscal 1958 under the laws of the State of California. TTI provides third-party semiconductor testing and burn-in services primarily through its laboratories in Southeast Asia. In addition, TTI operates test facilities in the United States. The Company also designs, develops, manufactures and markets a broad range of equipment and systems used in the manufacturing and testing of semiconductor devices and electronic components. TTI conducts business in three business segments: Testing Services, Manufacturing and Distribution. TTI has subsidiaries in the U.S., Singapore, Malaysia, Thailand, China and Ireland as follows:

	Ownership	Location
Express Test Corporation (Dormant)	100%	Van Nuys, California
Trio-Tech Reliability Services (Dormant)	100%	Van Nuys, California
KTS Incorporated, dba Universal Systems (Dormant)	100%	Van Nuys, California
European Electronic Test Centre (Operation ceased on November 1, 2005)	100%	Dublin, Ireland
European Electronic Test Centre (Operation ceased on November 1, 2005)	100%	Dublin, Ireland
Trio-Tech International Pte. Ltd.	100%	Singapore
Universal (Far East) Pte. Ltd.	100%	Singapore
Trio-Tech Thailand	100%	Bangkok, Thailand
Trio-Tech Bangkok	100%	Bangkok, Thailand
Trio-Tech Malaysia	55%	Penang and Selangor, Malaysia
Trio-Tech Kuala Lumpur 100% owned by Trio-Tech Malaysia	55%	Selangor, Malaysia
Prestal Enterprise Sdn. Bhd.	76%	Selangor, Malaysia
Trio-Tech (Suzhou) Co. Ltd.	100%	Suzhou, China
Trio-Tech (Shanghai) Co. Ltd.	100%	Shanghai, China

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. All significant inter-company accounts and transactions have been eliminated in consolidation. The unaudited consolidated financial statements are presented in U.S. dollars. The accompanying financial statements do not include all the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for fair presentation have been included. Operating results for the three months ended September 30, 2006 are not necessarily indicative of the results that may be expected for the fiscal year ending June 30, 2007. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's annual report for the fiscal year ended June 30, 2006.

**2. INVENTORIES**

Inventories consisted of the following:

Sep. 30,

Edgar Filing: TRIO TECH INTERNATIONAL - Form 10-Q

	2006 (Unaudited)	June 30, 2006
Raw materials	\$ 833	\$ 827
Work in progress	2,667	1,803
Finished goods	390	265
Less: provision for obsolete inventory	(449)	(448)
	\$ 3,441	\$ 2,447

**Table of Contents****3. STOCK OPTIONS**

The Company had two share-based compensation plans, which are described below. The Company historically adopted the APB No. 25 approach intrinsic value method and presented the pro forma information in line with the requirements of SFAS No. 123. Historically, there was no stock based compensation cost charged against income for the fiscal years ended June 30, 2005 and 2004. There was no income tax benefit related to share-based compensation for the fiscal years ended June 30, 2005 and 2004, as the Company did not claim a deduction for corporate income tax purposes.

Effective July 1, 2005, the Company adopted the fair value recognition provisions of Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards (SFAS) No. 123R, *Share-Based Payments*, using the modified prospective application method. Under this transition method, compensation cost recognized in the quarter ended September 30, 2006 includes the applicable amounts of: (a) compensation cost of all share-based payments granted prior to, but not yet vested as of, July 1, 2005 (based on the grant-date fair value estimated in accordance with the original provisions of SFAS No. 123) and (b) compensation cost for all share-based payments granted subsequent to July 1, 2005 (based on the grant-date fair value estimated in accordance with the new provisions of SFAS No. 123R). Amortization of unrecognized fair value of the non-vested options for the three months ended September 30, 2006 and 2005 was \$1.

On December 2, 2005, the Board of Directors terminated these two share-based compensation plans due to the cost of such compensation exceeding the benefits. There were no stock options granted during the three months ended September 30, 2006.

**Assumptions**

The disclosure of the above fair value for these awards was estimated using the Black-Scholes option pricing model with the assumptions listed below:

	Quarter Ended September 30, 2006	June 30, 2006	Years Ended June 30, 2005	June 30, 2004
Expected volatility	73.22%	49.5-51.53%	33.5 - 36.8%	41.9%
Weighted average volatility	73.22%	49.5%	33.9%	41.9%
Risk free interest rate	3.71-4.50%	3.71-4.50%	2.89 - 3.27%	2.76%
Expected life (years)	2.00	2.00	2.00	2.00

The expected volatilities are based on the historical volatility of the Company's stock. The observation is made on a weekly basis. The observation period covered is consistent with the expected terms of options. The expected terms of stock options are based on the average vesting period on a basis consistent with the historical experience of the similar option grants. The risk-free rate is consistent with the expected terms of the stock option and based on the United States Treasury yield curve in effect at the time of grant.

**1998 Stock Option Plan**

The Company's 1998 Stock Option Plan (the 1998 Plan), which is shareholder-approved, permits the grant of stock options to its employees of up to 300,000 shares of common stock. Option awards are generally granted with an exercise price equal to the market price of the Company's stock at the date of grant. These options have a five-year contractual life term. Awards generally vest over four years; with 25% vesting on the grant date, and the balance vesting in equal installments on the next three succeeding anniversaries of the grant date. The share-based compensation will be amortized based on an accelerated method over the four periods. Certain option awards

provide for accelerated vesting if there is a change in control (as defined in the 1998 Plan).

**Table of Contents**

A summary of option activities under the 1998 Plan during the first quarter of fiscal 2007 ended September 30, 2006 is presented as follows:

	<b>Options</b>	<b>Weighted-Average Exercise Price</b>	<b>Weighted-Average Remaining Contractual Term</b>	<b>Aggregate Intrinsic Value</b>
Outstanding at July 1, 2006	28,885	\$ 2.97		
Granted				
Exercised	(1,750)	2.81		
Forfeited or expired	(250)	2.66		
Outstanding at September 30, 2006	26,885	\$ 2.99	2.00	\$ 241,285
Exercisable at September 30, 2006	25,510	\$ 2.91	2.00	\$ 230,890

The intrinsic value of the 1,750 options exercised was \$6. Cash received from options exercised during the three months ended September 30, 2006 was approximately \$5. There were no options granted during the three months ended September 30, 2006 under the 1998 Stock Option Plan.

A summary of the status of the Company's non-vested stock options during the three months ended September 30, 2006 is presented below:

	<b>Options</b>	<b>Weighted-Average Grant-Date Fair Value</b>
Non-vested at July 1, 2006	13,250	\$ 0.81
Granted		
Vested	(11,625)	0.76
Forfeited	(250)	0.68
Non-vested at September 30, 2006	1,375	\$ 1.31

As of September 30, 2006, there was approximately \$4 of accumulated unrecognized stock compensation based on fair value on the grant date related to non-vested options granted under the 1998 Plan. That cost was expected to be recognized during the weighted average period of 1.5 years.

**Directors' Stock Option Plan**

The Directors' Stock Option Plan (the "Directors' Plan"), which is shareholder-approved, permits the grant of stock options to its duly elected non-employee Directors and one of the corporate officers of the Company (if he or she is also a director of the Company) and covers 300,000 shares of common stock. Prior to July 1, 2003, option awards were granted with an exercise price equal to 85% of the fair market price of the Company's stock at the grant date. Subsequent to July 1, 2003, the Board approved an amendment to the Directors' Plan requiring options to purchase

the Company's common stock to be exercisable at a price equal to 100% of the fair market value of the underlying shares on the grant date. These options have five-year contractual terms. Options awards are exercisable immediately as of the grant date.

As of July 1, 2006, there were no stock options outstanding under the Directors' plan, and there were no options exercisable. Because the Directors' plan was terminated in December 2005, there were no options granted during the three months ended September 30, 2006.

**Table of Contents****4. EARNINGS PER SHARE**

The Company adopted Statement of Financial Accounting Standards (SFAS) No. 128, *Earnings per Share* ( EPS ). Basic EPS are computed by dividing net income available to common shareholders (numerator) by the weighted average number of common shares outstanding (denominator) during the period. Diluted EPS gives effect to all dilutive potential common shares outstanding during a period. In computing diluted EPS, the average price for the period is used in determining the number of shares assumed to be purchased from the exercise of stock options and warrants.

Stock options to purchase 26,885 shares at exercise prices ranging from \$2.66 to \$4.40 per share were outstanding as of September 30, 2006. No options were excluded in the determination of common shares equivalents, because the average market price of common shares was greater than the exercise price of the stock options. The resulted common shares equivalents were approximately 19,000 shares and are presented in the following table for earnings per share calculation purposes.

Stock options to purchase 257,050 shares at exercise prices ranging from \$2.25 to \$4.50 per share were outstanding as of September 30, 2005. 40,000 options were excluded in the computation of diluted EPS because the exercise price was greater than the average market price of the common shares and therefore they were anti-dilutive.

The following table is a reconciliation of the weighted average shares used in the computation of basic and diluted EPS for the years presented herein:

	Three Months Ended	
	Sep. 30, 2006 (Unaudited)	Sep. 30, 2005 (Unaudited)
<b>Income from continuing operations</b>	\$ 756	\$ 164

Edgar Filing: TRIO TECH INTERNATIONAL - Form 10-Q

Weighted average number of common shares outstanding	basic	3,220	2,994
Dilutive effect of stock options		19	49
Number of shares used to compute earnings per share	diluted	3,239	3,043

**Table of Contents****5. NEW ACCOUNTING PRONOUNCEMENT**

In June 2006, the Financial Accounting Standard Board (FASB) issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109 (FIN 48), which prescribes a recognition threshold and measurement attribute, as well as criteria for subsequently recognizing, derecognizing and measuring uncertain tax positions for financial statement purposes. FIN 48 also requires expanded disclosure with respect to the uncertainty in income tax assets and liabilities. FIN 48 will be effective as of the beginning of our fiscal year 2008, with the cumulative effect of the change in accounting principle recorded as an adjustment to opening retained earnings. We expect that the adoption of FIN 48 will not have a material impact on our consolidated results of operations or financial position.

In September 2006, the Securities and Exchange Commission (SEC) issued Staff Accounting Bulletin No. 108, Considering the Effects of Prior Year Misstatement when Quantifying Misstatements in Current Year Financial Statements (SAB 108), which will be effective for the fiscal year ending after November 15, 2006. The objective of SAB 108 is to eliminate diversity in practice surrounding how public companies quantify financial statement misstatements. SAB requires quantification of financial statement misstatements based on the effects of the misstatements on the consolidated statement of income, the consolidated balance sheet and related financial statement disclosures.

According to SAB 108, both rollover and iron curtain approaches must be considered when evaluating a misstatement for materiality. This is referred to as the dual approach. For the companies that have previously evaluated misstatements under one, but not both, of these methods, SAB 108 provides companies with a one-time option to record the cumulative effect of their prior unadjusted misstatements in a manner similar to a change in accounting principle in their annual financial statements during the effective time period if (i) the cumulative amount of the unadjusted misstatements at the beginning of the adopting year would have been material under the dual approach to their annual financial statements for the prior year or (ii) the effect of correcting the unadjusted misstatements during the adopting year would cause these annual financial statements to be materially misstated under the dual approach. In accordance with SAB 108, companies are allowed, upon adoption, to record the effects as a cumulative effect adjustment to the retained earnings. We are currently assessing what impact, if any, that adoption of SAB 108 will have on our financial position and results of operations.

**6. ACCOUNTS RECEIVABLE AND ALLOWANCE FOR DOUBTFUL ACCOUNTS**

Accounts receivable are customer obligations due under normal trade terms. We sell our products and services to manufacturers in the semiconductor industry. We perform continuing credit evaluations of our customers' financial condition, and although we generally do not require collateral, letters of credit may be required from our customers in certain circumstances.

Senior management reviews accounts receivable on a monthly basis to determine if any receivables will potentially be uncollectible. We include any accounts receivable balances that are determined to be uncollectible in our allowance for doubtful accounts. After all attempts to collect a receivable have failed, the receivable is written off against the allowance. Based on the information available to us, we believe our allowance for doubtful accounts for the three months ended September 30, 2006 and the twelve months ended June 30, 2006 was adequate.

The following table represents the changes in the allowance for doubtful accounts:

Sep. 30, 2006 (Unaudited)	June 30, 2006

**8. ACQUISITION OF A SUBSIDIARY**

On January 3, 2006, the Company acquired a 100% interest in Globetronics (Shanghai) Co., Ltd. The results of operations of Globetronics, which were not material, have been included in the Condensed Consolidated Statements of Earnings (Loss) of the Company since January 3, 2006.

***Pro Forma Financial Information***

The following pro forma financial information is presented for informational purposes only and is not necessarily indicative of the results of operations that would have been achieved had the acquisition taken place on July 1, 2005. The unaudited pro forma statements of operations combine the historical results of the Company and the historical results of the acquired entity for the periods described above.

FOR THE THREE MONTHS ENDED SEPTEMBER 30, 2005**

	Historical Historical Information of the Company (1)	Historical information of the acquired business (2)	Pro Forma Adjustments (3)	Proforma
Net sales	\$ 5,705	\$ 115	\$	\$ 5,820
Net (loss) income	\$ (214)	\$ 1	\$ (3)	\$ (216)
Basic loss per share	\$ (0.08)			\$ (0.08)
Diluted loss per share	\$ (0.08)			\$ (0.08)
Basic weighted average common shares outstanding	2,994			2,994
Diluted weighted average common shares outstanding	3,043			3,043

1. The historical information of the Company

was based on the Form 10-Q filed with the SEC for the three months ended September 30, 2005.

2. The historical information of the acquired entity covers the three-month operating results from the books and records of Globetronics for the period from July 1, 2005 to September 30, 2005.

**Table of Contents**

3. Pro forma adjustment was based on the assumption that the fair value of the identified customer relationship needs to be amortized over a one-year period of time, assuming the acquisition took place on July 1, 2005.

**9. DISCONTINUED OPERATIONS**

The Company's Ireland operation, as a component of the testing segment, suffered continued operating losses in the past three fiscal years and the cash flow was minimal for the past three years. In August 2005, the Company established a restructuring plan to close the testing operation in Dublin, Ireland. In November 2005, the Company completed the sale of said property. In accordance with EITF 03-13, we presented the operation results from Ireland as a discontinued operation.

**10. BUSINESS SEGMENTS**

The Company operates principally in three industry segments; the testing service industry (which performs structural and electronic tests of semiconductor devices), the designing and manufacturing of equipment (which equipment tests the structural integrity of integrated circuits and other products) and the distribution of various products from other manufacturers in Singapore and Southeast Asia. The following net sales were based on customer location rather than subsidiary location.

The allocation of the cost of equipment, the current year investment in new equipment and depreciation expense have been made on the basis of the primary purpose for which the equipment was acquired.

All inter-segment sales were sales from the manufacturing segment to the testing and distribution segments. Total inter-segment sales were \$8 and \$30 for the three months ended September 30, 2006 and 2005, respectively. Corporate assets mainly consisted of cash and prepaid expenses. Corporate expenses mainly consisted of salaries, insurance, professional expenses and directors' fees.

The following segment information is unaudited:

**Business Segment Information:**

	Quarter Ended	Net Sales	Operating Income (loss)	Total Assets	Depr. and Amort.	Capital Expenditures
Manufacturing	Sep. 30, 2006	\$5,484	\$ 441	\$ 4,718	\$ 42	\$ 114
	2005	1,355	(175)	2,040	23	11

**Table of Contents****TRIO-TECH INTERNATIONAL AND SUBSIDIARIES****ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (IN THOUSANDS, EXCEPT PER SHARE AMOUNTS)**

*The following should be read in conjunction with the condensed consolidated financial statements and notes in Item 1 above and with the audited consolidated financial statements and notes, and with the information under the headings Risk factors and Management's discussion and analysis of financial condition and results of operations in the most recent Annual Report on Form 10-K.*

**Forward-Looking Statements**

The discussions of Trio-Tech International's (the Company) business and activities set forth in this Form 10-Q and in other past and future reports and announcements by the Company may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and assumptions regarding future activities and results of operations of the Company. In light of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, the following factors, among others, could cause actual results to differ materially from those reflected in any forward-looking statement made by or on behalf of the Company: market acceptance of Company products and services; changing business conditions or technologies and volatility in the semiconductor industry, which could affect demand for the Company's products and services; the impact of competition; problems with technology; product development schedules; delivery schedules; changes in military or commercial testing specifications which could affect the market for the Company's products and services; difficulties in profitably integrating acquired businesses, if any, into the Company; risks associated with conducting business internationally and especially in Southeast Asia, including currency fluctuations and devaluation, currency restrictions, local laws and restrictions and possible social, political and economic instability; and other economic, financial and regulatory factors beyond the Company's control. See the discussions elsewhere in this Form 10-Q, including under the heading Certain Risks That May Affect Our Future Results, for more information. In some cases, you can identify forward-looking statements by the use of terminology such as may, will, expects, plans, anticipates, estimates, potential, believes, can impact, continue, or the negative thereof or other comparable terminology.

We undertake no obligation to update forward-looking statements to reflect subsequent events, changed circumstances, or the occurrence of unanticipated events.

**Overview**

Founded in 1958, Trio-Tech International provides third-party semiconductor testing and burn-in services primarily through its laboratories in Southeast Asia. The Company also designs, manufactures and markets equipment and systems, and distributes semiconductor processing and testing equipment manufactured by others. The Company operates in three business segments: Testing Services, Manufacturing and Distribution.

We own and operate facilities that provide testing services for semiconductor devices and other electronic components to meet the requirements of military, aerospace, industrial and commercial applications. We currently operate five testing facilities, one in the United States and four in Southeast Asia. The Company uses its own proprietary equipment for certain burn-in, centrifugal and leak tests, and commercially available equipment for various other environmental tests. The Company conducts the majority of its testing operations in Southeast Asia with facilities in Singapore, Malaysia and Thailand. Our facilities require substantial investment to construct and are largely fixed-costs assets once in operation. Because we own most of the testing capacity, a significant portion of our operating costs is fixed. In general, these costs do not decline with reductions in customer demand or the utilization of our testing capacity, and can adversely affect profit margin as a result. Conversely, as product demand rises and factory utilization increases, the fixed costs are spread over the increased output, which should improve profit margins.

Our manufacturing segment manufactures Artic Temperature Controlled Wafer Chucks, which are used for test, characterization and failure analysis of semiconductor wafers, Wet Process Stations, which wash and dry wafers at a series of 100 to 300 additional processing steps after the etching or deposition of integrated circuits, and other microelectronic substrates in what is commonly called the front-end, or creation of semiconductor circuits. Additionally, we also manufacture centrifuges, leak detectors, HAST (Highly Accelerated Stress Test) systems and burn-in systems that are used primarily in the back-end of the semiconductor manufacturing process to test finished

semiconductor devices and electronic components.

In the United States, our manufacturing segment focused on marketing used and refurbished equipment, which some of our customers are more willing to purchase since it is less expensive than new equipment.

**Table of Contents**

Due to the competitive environment in the manufacturing segment, we anticipate that we will continue to implement our cost reduction plan by outsourcing a portion of our manufacturing process to outside suppliers, such as electrical and mechanical fabrication houses, and seek competitively priced materials.

Our distribution segment operates primarily in Southeast Asia. This segment markets and supports distribution of the Company's own manufactured equipment in addition to distributing complementary products from other manufacturers that are used by the Company's customers and other semiconductor and electronics manufacturers. One of the strategic business units also serves as a distributor of electronic components to customers. In the first quarter ended September 30, 2006, we continued to focus our marketing efforts on Asia. We believe that Asian markets are growing faster than other markets due to the rapid expansion in the China market. We also believe that due to our strategic position in the heart of Asia, we are in a good position to service customers in Southeast Asia.

**First Quarter Fiscal 2007 Highlights**

Revenue increased 731% to \$9,876, compared with revenue of \$5,705 for the first quarter of fiscal 2006.

Income from continuing operations was \$756, an increase of \$592, or 361.0%, compared with the first quarter of fiscal 2006.

Gross profit margins decreased by 6.8% to 25.2% from 32.0% for the first quarter of fiscal 2006.

Selling expenses approximated 2.7% of revenue, down from 5.0% of net revenue for the first quarter of fiscal 2006.

General and administrative expenses approximated 14.1% of revenue, a decrease of 8.5% compared with the first quarter of fiscal 2006.

**Results of Operations and Business Outlook**

The following table sets forth our revenue components for the three months ended September 30, 2006 and 2005, respectively.

	Three Months Ended	
	Sept. 30, 2006	Sept. 30, 2005
<b>Net Sales:</b>		
Manufacturing	55.52%	23.76%
Testing	39.47	62.14
Distribution	5.01	14.10
Total	100.00%	100.00%

Net sales for the three months ended September 30, 2006 were \$9,876, an increase of \$4,171, or 73.1%, compared to \$5,705 for the same quarter in the last fiscal year.

Net sales into and within China, the Southeast Asia regions, and other countries increased by \$4,240 (or 80.4%) for the three months ended September 30, 2006, from \$5,271 to \$9,511, compared to the same quarter last fiscal year. This overall increase was primarily due to an increase in sales from the manufacturing segment. Net sales into and within the United States decreased by \$69 (or 15.9%) for the three months ended September 30, 2006, down from \$434 to \$365, compared to the same quarter last fiscal year, as we believe the customers in the United States are still conservative in capital spending.

The increase in net sales can be discussed within three segments as follows:

***Manufacturing Segment***

Net sales in the manufacturing segment as a percentage of total net sales increased by 31.76% to 55.52% of total net sales for the three months ended September 30, 2006, compared to 23.76% of total net sales in the first quarter of fiscal 2006. The absolute amount of net sales increased by \$4,129 for the three months ended September 30, 2006 from \$1,355 to \$5,484, compared to the first quarter of fiscal 2006. The increase in revenue generated by the manufacturing segment was due to a continuing increase in demand in the personal computer market in Asia, which in turn led to a greater demand for our products. The demand for our burn-in systems appeared to increase concurrently with the need for more microprocessor chips in Southeast Asia. Such increase resulted from a hike in demand from one of our major customers, which was a result of that customer's growing share in the market for microprocessor chips.

**Table of Contents***Testing Segment*

Net sales in the testing segment as a percentage of total net sales were 39.47%, a drop of 22.67% for the three months ended September 30, 2006, compared to 62.14% in the first quarter of fiscal 2006. The absolute amount of net sales in the testing segment actually increased by \$353 for the three months ended September 30, 2006, from \$3,545 to \$3,898, compared to the first quarter of fiscal 2006. The testing segment showed an improvement in revenue, compared to the same quarter last fiscal year, due to a hike in demand for testing services in Southeast Asia. We believe that the increase in demand for testing services resulted from the strong economic growth and robust development in the electronics manufacturing industries in China. In addition, an increased demand from one of our customers, with regard to high-end personal computers, notebooks and server chips, also contributed to the increase. Demand for testing services varies from time to time depending on changes taking place in the market and our customers' forecasts. We anticipate that our customers will continue to request our services to perform burn-in on chips to be used in wireless handsets, automotive applications and wired communications, all of which are currently in high demand in their respective markets.

*Distribution Segment*

The distribution segment accounted for 5.01% of total net sales in the first quarter of fiscal 2007, a decrease of 9.09% compared to 14.10% in the first quarter of fiscal 2006. The absolute amount of net sales decreased by \$311 for the three months ended September 30, 2006, from \$805 in the first quarter of fiscal 2006 to \$494 in the first quarter of fiscal 2007. The drop in revenue was due to lower demand for back-end products such as Vibration equipment and bubble testers in the first quarter of fiscal 2007, and a saturation of equipment and electronic components in the current market.

*Uncertainties and Remedies*

There are several influencing factors which create uncertainties when forecasting performance, such as the ever-changing nature of technology, specific requirements from the customer, decline in demand for certain types of burn-in devices or equipment, and other similar factors. One of these factors is the highly competitive nature of the semiconductor industry. Another is that some customers are unable to provide a forecast of the products required in the upcoming weeks; hence it is difficult to plan for the resources needed to meet these customers' requirements due to short lead time and last minute order confirmation. This will normally result in a lower margin for these products, as it is more expensive to purchase materials in a short time frame. However, the Company has taken action to protect itself and has formulated plans for dealing with these unpredictable factors. For example, in order to meet customers' demands upon short notice, the Company maintains higher inventories, but continues to work closely with its customers to avoid stock piling. We continue to cut costs by upgrading some of our existing facilities to cater to the changing requirements of customers and by maintaining a lean headcount, while still keeping quality high so as to sell new products at a competitive price. We have also been improving customer service from staff by keeping them up to date on the newest technology and stressing the importance of understanding and meeting the stringent requirements of our customers. Finally, the Company is exploring new markets and products, looking for new customers, and upgrading and improving burn-in technology while at the same time searching for improved testing methods of higher technology chips.

**Comparison of First Quarters Ended September 30, 2006 ( Q1 2007 ) and September 30, 2005 ( Q1 2006 )**

The following table sets forth certain consolidated statements of income data as a percentage of net sales for the first quarters of fiscal 2007 and 2006, respectively:

	<b>Q1 2007</b>	<b>Q1 2006</b>
<b>Net Sales</b>	<b>100.0%</b>	<b>100.0%</b>
Cost of Sales	74.8%	68.0%
<b>Gross Margin</b>	<b>25.2%</b>	<b>32.0%</b>
Operating Expenses		
General and administrative	14.1%	22.6%

Selling	2.7%	5.0%
Research and development	0.2%	0.3%
Impairment Loss	0.0%	0.3%
Total Operating Expenses	17.0%	28.2%
<b>Income from operations</b>	<b>8.2%</b>	<b>3.8%</b>

**Table of Contents***Overall Gross Margin*

Overall gross margin decreased by 6.8% for the three months ended September 30, 2006, from 32.0% in the first quarter of last year to 25.2%, primarily due to the drop in average selling prices in our testing segment and increased sales of low margin products in the distribution segment. In terms of dollar value, the overall gross margin increased by \$667 for the three months ended September 30, 2006 from \$1,824 to \$2,491, compared to the same quarter last fiscal year, as a result of the better sales performance by the Singapore manufacturing segment.

Gross profit margin in the manufacturing segment increased from 18.4% in the first quarter of fiscal 2006 to 20.1% in the first quarter of fiscal 2007. In absolute amounts, gross profits increased by \$841 to \$1,102 for the three months ended September 30, 2006, from \$249 for the three months ended September 30, 2005. Such an increase was mainly attributable to a hike in revenue from \$1,355 for the first quarter of 2006 to \$5,484 for the first quarter of 2007.

Gross profit margin in the testing segment decreased by 4.7% for the three months ended September 30, 2006, from 38.3% to 33.6%, compared to the same quarter last fiscal year, and this was primarily due to a drop in the average selling price of services. Our customers changed their demands and requirements, which resulted in a lower average unit selling price for many of our products. However, we expect that the effect of such trend may be offset in the future by the increase in burn-in services demanded for the faster microprocessor chips. Gross profits in the testing segment were \$1,309 and \$1,359 for the three months ended September 30, 2006 and 2005, respectively.

Gross profit margin in the distribution segment dropped by 10.6% for this quarter, from 26.9% in the first quarter of fiscal 2006 to 16.3%, compared to the same quarter last fiscal year. Sales in this quarter were mainly from low margin back-end products, such as Vibration equipment, chambers and wafer fabricators. Gross profits were \$80 and \$216 for the three months ended September 30, 2006 and 2005, respectively.

*Operating Expenses*

The operating expenses for the first quarters of 2007 and 2006 were as follow:

<b>(In Thousands, unaudited)</b>	<b>Q1 2007</b>	<b>Q1 2006</b>
General and administrative	\$ 1,391	\$ 1,289
Selling	\$ 262	\$ 285
Research and development	\$ 17	\$ 17
Impairment Loss	\$	\$ 15
<b>Total</b>	<b>\$ 1,670</b>	<b>\$ 1,606</b>

General and administrative expenses increased by \$102 (or 7.91%) from \$1,289 to \$1,391 for the three months ended September 30, 2006, compared to the same quarter last fiscal year. This was due to the increase in payroll and related expenses as a result of the rise in headcount in the Singapore operations in the first quarter of fiscal 2007. Selling expenses decreased by \$23 (or 8.1%) for the three months ended September 30, 2006 from \$285 to \$262, compared to same quarter last fiscal year, mainly due to a decrease in commission expenses as a result of fewer commissionable sales in the distribution segment.

Research and development costs remained constant compared to the same quarter last fiscal year.

In the first quarter of fiscal 2006, the Company recognized an impairment loss of \$15 with respect to the obsolescence of certain machinery and equipment in the Singapore testing operation, as such machinery and equipment was no longer suitable for performing testing services for the high-speed microprocessor chips.

*Income from operations*

Income from operations increased by \$603 (or 276.6%) from \$218 to \$821 for the three months ended September 30, 2006, mainly due to an increase in the net sales in the manufacturing segment and testing segment as the result of increased market demand.

*Interest Expense*

Interest expense for the first quarters of 2007 and 2006 were as follow:

**(In Thousands, unaudited)**

**Interest expense**

**Q1 2007**

\$29

**Q1 2006**

\$35

19

---

**Table of Contents**

Interest expense decreased by \$6 for the three months ended September 30, 2006 from \$35 to \$29 in the same quarter last fiscal year, primarily due to lower usage of credit line facilities in the Singapore operations, when compared to the same quarter last year.

*Other Income*

Other income for the first quarters of 2007 and 2006 were as follow:

<b>(In Thousands, unaudited)</b>	<b>Q1 2007</b>	<b>Q1 2006</b>
<b>Other income</b>	\$37	\$30

Other income increased by \$7 (or 23.3%) for the three months ended September 30, 2006 from \$30 to \$37, compared to the same quarter last fiscal year, primarily due to the increase in interest income generated from short-term deposits and the increase in rental income, though offset by currency transaction loss. Interest income was \$37 for the three months ended September 30, 2006 and was \$19 higher than the interest income generated in the same quarter last fiscal year due to higher working capital generated from the collection of accounts receivables. Currency transaction loss increased by \$25 for the three months ended September 30, 2006, from \$2 to \$27, compared to the same quarter last fiscal year. This was attributable to the weakening of the U.S. dollar against foreign currency in U.S. denominated assets.

*Income Tax*

Income tax provision for the three months ended September 30, 2006 was \$26, a decrease of \$47 (or 64.4%) compared to the income tax provision of \$73 for the same quarter last fiscal year. Income tax provision of \$99 for this quarter was related to a higher tax provision provided for the increased income generated from the Singapore operations, and \$41 for the finalization of a corporate income tax assessment conducted by the Singapore tax authority for the fiscal years ended June 30, 2001, 2002, and 2003, but offset by the reversal of a deferred tax liability of \$114 in the Singapore operations. The aggregate deferred tax liability of \$114 was recorded for possible future tax liability regarding the allocation of corporate expenses from the United States to the Singapore operations during fiscal 2000 and 2001, respectively. The amount was reversed as the result of the finalization of a corporate income tax assessment conducted by the Singapore tax authority, as it determined that no further income taxes were due by our Singapore subsidiary for these two fiscal years. This meant that allocated corporate expense deduction was allowed for fiscal 2000 and 2001, respectively.

*Minority Interest*

As of September 30, 2006, we held a 55% interest in Trio Tech Malaysia. In the first quarter of fiscal 2007, minority interest in the net income of subsidiaries was \$47, an increase of \$71, or 294.8%, compared to a minority interest in the net loss of \$24 for the same quarter of fiscal 2006. The increase in the minority interest was attributable to the improvement in the net income generated from the Malaysia testing operation and an increase in translation gain as the result of an increase in the exchange rate between U.S. dollars and Singapore dollars.

*Loss from Discontinued Operations*

The loss from discontinued operations of \$378 for the three months ended September 30, 2005 represented restructuring costs incurred in Ireland. The Company had no similar loss for the quarter ended September 30, 2006.

*Net Income*

Net income was \$756 in the first quarter of fiscal 2007, representing an increase of \$970 over a net loss of \$214 for the three months ended September 30, 2005. The main factor that contributed to the increase was the rise in net sales in the manufacturing segment and testing segment.

*Earnings per Share*

Basic and diluted earnings per share from continuing operations for the three months ended September 30, 2006 increased by \$0.18, from \$0.05 to \$0.23 per share, compared to the same quarter last fiscal year. There was no income or loss from discontinued operations for the first quarter of fiscal 2007. Basic and diluted earnings per share attributable to discontinued operations for the three months ended September 30, 2005 were a loss of \$0.13 per share.

**Table of Contents****Segment information**

The revenue, gross margin and income from each segment for the first quarter of fiscal 2007 and first quarter of fiscal 2006, respectively, are presented below. As the segment revenue and gross margin for each segment have been discussed in the previous section, only the comparison of income from operations is discussed below.

*Manufacturing Segment*

The revenue, gross margin and income (loss) from operations for the manufacturing segment for the first quarters of 2007 and 2006 were as follows:

<b>(In Thousands, unaudited)</b>	<b>Q1 2007</b>	<b>Q1 2006</b>
Revenue	\$5,484	\$1,355
Gross margin	20.1%	18.4%
Income (loss) from operations	\$ 441	\$ (175)

Income from operations in the manufacturing segment increased by \$616 to \$441 for the three months ended September 30, 2006, from a loss of \$175 in the same quarter last fiscal year. The improvement in operating profit was attributable to the \$853 increase in gross profit, but offset by an increase in operating expenses of \$237. Operating expenses for the manufacturing segment were \$661 and \$424 for the three months ended September 30, 2006 and 2005, respectively. The increase in operating expenses was mainly attributable to an increase in payroll and related expenses as a result of the rise in headcount in the Singapore operations in the first quarter of fiscal 2007.

*Testing Segment*

The revenue, gross margin and income from operations for the testing segment for the first quarters of 2007 and 2006 were as follows:

<b>(In Thousands, unaudited)</b>	<b>Q1 2007</b>	<b>Q1 2006</b>
Revenue	\$3,898	\$3,545
Gross margin	33.6%	38.3%
Income from operations	\$ 402	\$ 458

Income from the testing segment decreased by \$56 for the three months ended September 30, 2006, to \$402 from \$458 in the same quarter last fiscal year. The decrease in operating income was attributable to the decrease in gross profit of \$50 and the increase in operating expenses of \$6. The decrease in the gross profit was mainly due to the drop in the average selling price of testing services. Operating expenses were \$907 and \$901 for the three months ended September 30, 2006 and 2005, respectively. This jump in operating expenses was mainly due to an increase in payroll and related expenses as a result of the rise in headcount in the Singapore operations in the first quarter of fiscal 2007.

*Distribution Segment*

The revenue, gross margin and (loss) from operations for the distribution segment for the first quarters of 2007 and 2006 were as follows:

<b>(In Thousands, unaudited)</b>	<b>Q1 2007</b>	<b>Q1 2006</b>
Revenue	\$ 494	\$ 805
Gross margin	16.3%	26.9%
Loss from operations	\$ (37)	\$ (1)

Operating loss increased by \$36 for the three months ended September 30, 2006, from an operating loss of \$1 in the first quarter of fiscal 2006 to \$37 in the first quarter of fiscal 2007. The operating loss in this quarter was attributable to a decrease in gross profit of \$136, but offset with a decrease in operating expenses of \$100. Operating expenses were \$117 and \$217 for the three months ended September 30, 2006 and 2005, respectively. Such a reduction in operating expenses was mainly attributable to lower commission expenses as the result of a decrease in commissionable sales.

**Table of Contents***Corporate*

The income (loss) from operations for corporate for the first quarters of 2007 and 2006 were as follow:

<b>(In Thousands, unaudited)</b>	<b>Q1 2007</b>	<b>Q1 2006</b>
Income (loss) from operations	\$ 15	\$(64)

Corporate operating income increased by \$79 for the three months ended September 30, 2006, from an operating loss of \$64 to an operating income of \$15, compared to the same quarter last fiscal year. The improvement in corporate income was attributable to an increase in the fee imposed on all the subsidiaries on a fixed percentage of revenue as the result of increased revenue from subsidiaries.

**Financial Condition**

During the three months ended September 30, 2006, total assets increased \$1,303 from \$29,384 at June 30, 2006 to \$30,687 at September 30, 2006. The majority of the increase was in cash, prepaid expenses, inventory and other assets, but offset by a decrease in accounts receivables, and property, plants and equipments.

At the end of the first quarter of fiscal 2007, total cash and short-term deposits were \$10,932, an increase of \$542 from fiscal year-end 2006. The increase was primarily due to an improvement in the collections of the accounts receivables and increased sales.

Prepaid expenses and other current assets at the end of the first quarter of fiscal 2007 were \$244, an increase of \$74 from the fiscal year-end 2006, primarily due to increased prepayment of insurance premiums in the Singapore operations.

Inventories were \$3,441 at the end of the first quarter of fiscal 2007. This was an increase of \$994 from the fiscal year-end 2006, as we built inventory to support expected product shipments in the second quarter of the year. The turnover of inventory was 36 days at the end of the first quarter of fiscal 2007 compared with 35 days at fiscal year-end 2006.

Other assets were \$688, an increase of \$519 from fiscal year-end 2006, primarily due to advances paid for renovation of new units and facilities for the China operations.

Accounts receivables at the end of the first quarter of fiscal 2007 decreased \$582 from fiscal year-end 2006, primarily due to improvement in the overall collections in the Singapore operations. The total sales from all three segments for the three months ended September 30, 2006 were \$9,931, an increase of \$4,226 or 74.1%, compared to the total sales of \$5,705 for the same quarter last fiscal year. The accounts receivables turnover was 76 days at the end of the first quarter of fiscal 2007 compared with 80 days at fiscal year-end 2006.

Capital expenditures were \$305 for the first three months of fiscal 2007, compared with \$131 for the first three months of fiscal 2006. The increase in capital expenditures was mainly due to higher purchases of machinery and equipment during the first quarter of fiscal 2007 in the Singapore Testing operation to meet customers requirements. Depreciation was \$427 for the first three months of fiscal 2007, compared with \$368 for the first three months of fiscal 2006. The increase in depreciation expenses was mainly due to the increase in property, plant and equipment in the first quarter of 2007 as compared to the first quarter of 2006.

**Liquidity and Capital Resources**

Net cash provided by operating activities for the first three months of fiscal 2007 was \$790, an increase of \$227, or 40.3%, compared to a net cash inflow of \$563 in the same period last fiscal year. Higher levels of cash flows were primarily due to the swing in net income from a loss of \$214 in the first quarter of fiscal 2006 to an income of \$756 during the first quarter of fiscal 2007. The increase in net income mainly resulted from higher revenues generated in the manufacturing segment and from testing services. The increase in cash was offset by increased working capital requirements, particularly for inventory and other assets.

Net cash provided by investing activities was \$2,306 in the first quarter of fiscal 2007, compared to the net cash used by investing activities of \$399 in the first quarter of fiscal 2006, reflecting an increase of \$2,705 in cash flow. In the first quarter of fiscal 2007, the proceeds from maturing short-term deposits of \$6,657 were used for capital expenditures of \$274. In the first quarter of fiscal 2006, the proceeds from maturing short-term deposits of \$382 were not adequate to cover the higher investments in short-term deposits of \$650 in the first quarter of fiscal 2006, thereby incurring a negative cash flow.

**Table of Contents**

Net cash used in financing activities in the first quarter of fiscal 2007 was \$29, an increase of \$5, compared to the net cash used by financing activities of \$24 during the first quarter of fiscal 2006. The increase was due mainly to the higher proceeds from lines of credit of \$247 during the first quarter of fiscal 2007 compared to the net repayment of \$51 for lines of credits incurred in the first quarter of fiscal 2006. However, this was offset by (i) a repayment of \$287 of debt and capital leases made in the first quarter of fiscal 2007 compared to repayments of \$236 in the same period of fiscal 2006, (ii) a decrease of \$193 in the proceeds from debt and capital leases, and (iii) a decrease of \$59 in cash proceeds from stock options exercised.

We believe we have the necessary financial resources to meet our projected cash requirements for at least the next twelve months.

**Corporate Guarantee Arrangement**

The Company provides a corporate guarantee of approximately \$1,576 to one of its subsidiaries in Southeast Asia to secure line-of-credit and term loans from a bank to finance the operations of such subsidiary. With the strong financial position of the subsidiary company, the Company believes this corporate guarantee arrangement will have no material impact on its liquidity or capital resources.

**Critical Accounting Estimates & Policies**

There have been no significant changes in the critical accounting policies disclosed in Management's discussion and analysis of financial condition and results of operations included in the most recent Annual Report on Form 10-K, except that a reclassification on deferred tax liability was made on the balance sheet at June 30, 2006 in order to conform to our current presentation.

We prepare the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements require the use of estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reporting period.

Management periodically evaluates the estimates and judgments made. Management bases its estimates and judgments on historical experience and on various factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates as a result of different assumptions or conditions.

**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

*Interest Rate Risk.* We do not use derivative financial instruments in our investment portfolio. Our investment portfolio is generally comprised of cash deposits. Our policy is to place these investments in instruments that meet high credit quality standards. These securities are subject to interest rate risk, and could decline in value if interest rates fluctuate and thus subject us to market risk due to those fluctuations. Due to the short duration and conservative nature of our investment portfolio, we do not expect any material loss with respect to our investment portfolio, though no assurances can be given that material losses will not occur.

As of September 30, 2006, the outstanding aggregate principal balance on these loans, capital leases and lines of credit was approximately \$1,950. The interest rates on our loans and lines of credit range from 2.98% to 7.50% per annum. These interest rates are subject to change and we cannot predict an increase or decrease in rates, if any.

denominated by Malaysia ringgit with a fixed interest rate at 4.30% per annum	12	14
denominated by U.S. dollars with a fixed interest rate at 0.81% per annum	6	7
Subtotal	\$ 340	\$ 337
<b>Line of credit:</b>		
Denominated by Singapore dollars; interest is at the bank's prime rate (5.75% at September 30, 2006, June 30, 2006) plus 0.25% per annum	\$ 363	\$ 116
Subtotal	\$ 363	\$ 116
Total	\$ 1,950	\$ 1,952

The outstanding aggregate principal balance on these loans, capital leases and lines of credit were mainly utilized by the Testing segment for investments in facilities and equipment to meet customers' requirement. One of the Singapore operations used 55.2% of such credit facility as of September 30, 2006. Nevertheless, the Singapore operation was able to meet repayment of loans and capital obligation, as the majority of the overall net sales were contributed from the operation. The Thailand operation utilized term loans to finance the extension of a building in Bangkok and it will be able to meet its obligations thereunder as the operation has been generating cash for the past few years.

*Foreign Currency Exchange Rate Risk.* Although the majority of our sales, cost of manufacturing and marketing are transacted in U.S. dollars, significant portions of our revenue are denominated in Singapore and Euro dollars,

Malaysian ringgit, Thai Baht and other currencies. Consequently, a portion of our costs, revenues and operating margins may be affected by fluctuations in exchange rates, primarily between the U.S. dollar and such foreign currencies. We are also affected by fluctuations in exchange rates if there is a mismatch between our foreign currency denominated assets and liabilities. Foreign currency translation adjustments resulted in an increase of \$26 and \$21 to shareholders' equity for the three months ended September 30, 2006 and 2005, respectively.

We try to reduce our risk of foreign currency fluctuations by purchasing certain equipment and supplies in U.S. dollars and seeking payment, when possible, in U.S. dollars. However, we may not be successful in our attempts to mitigate our exposure to exchange rate fluctuations. Those fluctuations could have a material adverse effect on the Company's financial results.

**ITEM 4. CONTROLS AND PROCEDURES**

An evaluation was carried out by the Company's Chief Executive Officer and Chief Financial Officer of the effectiveness of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) or 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of September 30, 2006, the end of the period covered by this Form 10-Q. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that these disclosure controls and procedures were effective. During the period covered by this report, there have been no changes in the Company's internal control over financial reporting that have materially affected or are reasonably likely to materially affect the Company's internal control over financial reporting.

**PART II. OTHER INFORMATION**

**Item 1. Legal Proceedings**

Not applicable

**Item 1A. Risk Factors**

**CERTAIN RISKS THAT MAY AFFECT OUR FUTURE RESULTS**

In addition to the other information set forth in this report, shareholders should carefully consider the factors discussed in Item 1A Risk Factors in our Annual Report on Form 10-K for the year ended June 30, 2006, which factors could materially affect our business, financial condition and/or future results. The risks described in our Annual Report on Form 10-K are not the only risks facing the Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results. In addition to the risks so noted, we also note as follows:

**Possible dilutive effect of outstanding options**

As of September 30, 2006, there were 26,885 shares of common stock reserved for issuance upon exercise of outstanding stock options. The outstanding options are currently exercisable at exercise prices ranging from \$2.66 to \$4.40 per share. We anticipate that the trading price of our common stock at the time of exercise of any such outstanding options will exceed the exercise price under those options. Thus such exercise will have a dilutive effect on our shareholders.

**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**

Malaysian and Singapore regulations prohibit the payment of dividends if the Company does not have sufficient retained earnings and tax credit. In addition, the payment of dividends can only be made after making deductions for income tax pursuant to the regulations. Furthermore, the cash movements from the Company's 55% owned Malaysian subsidiary to overseas are restricted and must be authorized by the Central Bank of Malaysia. California law also prohibits the payment of dividends if the Company does not have sufficient retained earnings or cannot meet certain asset to liability ratios.
