On October 21, 2002, HEI issued the following news release:

HAWAIIAN ELECTRIC INDUSTRIES, INC. REPORTS THIRD QUARTER 2002 EARNINGS

HONOLULU Hawaiian Electric Industries, Inc. (NYSE-HE) today reported income from continuing operations for the three months ended September 30, 2002 of \$32.8 million, or 90 cents per share, compared with \$28.7 million, or 85 cents per share in the same quarter of 2001. For the nine months ended September 30, 2002, income from continuing operations was \$90.7 million, or \$2.51 per share, compared with \$82.5 million, or \$2.47 per share in the same period last year.

Thirty-two percent net income growth from our bank this quarter versus the same quarter last year boosted HEI s income from continuing operations by 14%, said Robert F. Clarke, HEI chairman, president and chief executive officer. Lower interest expense at the holding company also contributed to HEI s income from continuing operations growth. Utility results were stable this quarter as compared with the same quarter of 2001. Although income from continuing operations was up 14% this quarter, earnings per share from continuing operations were up only 6% due to an 8% increase in the average number of shares outstanding, primarily resulting from HEI s November 2001 common stock offering.

Electric utility net income during the quarter was \$25.6 million versus \$25.7 million in the same quarter last year. Electric utility net income for the nine months was consistent with the same period last year at \$69.8 million.

Increases in usage and the number of residential customers caused kilowatthour sales to grow by 1.8% for the quarter despite slightly cooler weather, said Clarke. Increased operation and maintenance expenses and depreciation as compared with the same quarter last year offset the earnings impact of the kilowatthour sales increase. Other operations expense was higher primarily due to a \$1.6 million decrease in net pension credits. In addition, maintenance expenses were higher primarily due to the timing and larger scope of generating unit overhauls.

Bank net income in the third quarter was \$14.7 million compared to \$11.1 million in the same quarter last year. Bank net income for the nine months was \$42.8 million versus \$33.2 million in the same period of 2001.

Our bank s net income continues to benefit from favorable interest rates that kept its cost of funds low, said Clarke. The interest rate spread was 3.28% in the recent quarter versus 3.08% for the same quarter of 2001. Also, delinquencies have been at five-year lows, which translated into a lower provision for loan losses in the third quarter as compared with the same quarter last year, added Clarke. Increased financial services and deposit fee income were partially offset by increases in general and administrative expenses and writedowns of mortgage servicing rights as loans have experienced high prepayments in the current low interest rate environment. The adoption of new accounting rules established by the Financial Accounting Standards Board calling for the discontinuation of goodwill amortization added \$1 million of the \$3.6 million increase in bank net income for the third quarter as compared to the same quarter last year. For the nine months, the discontinuation of goodwill amortization resulted in a \$2.9 million increase in bank net income.

Edgar Filing: HAWAIIAN ELECTRIC INDUSTRIES INC - Form 8-K

Continued low interest rates and record mortgage refinancing volume are, however, beginning to pressure the bank s interest rate spread as the bank s loan portfolio reprices lower while deposit rates are already at low levels.

HEI is the largest Hawaii-based company, providing electric utility services to 95% of Hawaii s residents and a wide array of banking services to consumers and businesses through the state s third largest bank.

Forward-Looking Statements

GOODWILL (Unaudited)

The Company adopted the provisions of Statement of Financial Accounting Standards (SFAS) No. 142, Goodwill and Other Intangible Assets on January 1, 2002. SFAS No. 142 requires that goodwill and intangible assets with indefinite useful lives no longer be amortized, but instead be tested for impairment at least annually.

The Company's \$83.2 million of goodwill is in the bank segment and was tested for impairment as of January 1, 2002 and will be tested for impairment annually in the fourth quarter using data as of September 30, 2002. As of January 1, 2002, there was no impairment of goodwill. The fair value of the bank was estimated using a valuation method based on a market approach, which takes into consideration market values of comparable publicly traded companies and recent transactions of companies in the industry.

Application of the provisions of SFAS No. 142 has affected the comparability of current period results of operations with prior periods because the goodwill in the bank segment is no longer being amortized over a 25 year period. Thus, the following transitional disclosures present net income and earnings per common share adjusted as shown below:
