QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2017

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 001-13387

AeroCentury Corp.

(Exact Name of Registrant as Specified in Its Charter)

Delaware

(State or Other Jurisdiction of Incorporation or Organization)

1440 Chapin Avenue, Suite 310

Burlingame, California 94010

(Address of Principal Executive Offices)

(650) 340-1888

(Registrant's Telephone Number Including Area Code)

None

(Former Name, Former Address and Former Fiscal Year, if Changed Since Last Report)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer

Edgar Filing: AEROCENTURY CORP - Form 10-Q

Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

The number of shares of the Registrant's Common Stock outstanding as of May 11, 2017 was 1,416,699.

PART I
FINANCIAL INFORMATION
Forward-Looking Statements

This Quarterly Report on Form 10-Q includes "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act") and Section 21E of the Securities Exchange Act of 1934, as amended ("the Exchange Act"). All statements in this Report other than statements of historical fact are "forward-looking statements" for purposes of these provisions, including any statements of plans and objectives for future operations and any statements of assumptions underlying any of the foregoing. Statements that include the use of terminology such as "may," "will," "expects," "plans," "anticipates," "estimates," "potential," or "continue," or the negative thereof, or other comparable terminology are forward-looking statements. Forward-looking statements include these statements: (i) in Item 1, "Notes to Financial Statements," that the Company believes that the accounting for its existing operating and finance leases will not be affected by adoption of ASU 2016-02, nor does it expect classification of its future leases to be significantly affected by such adoption; that the Company expects that certain pre-lease costs that are currently capitalized and amortized over operating lease terms or offset against gain on sale in sales-type leases will instead be expensed when incurred under such new standards; and that the Company does not expect to adopt ASU 2016-02 early, and expects to elect practical expedients in connection with its adoption, including not re-evaluating lease classification or capitalized initial direct costs on existing leases; that the outcome of any existing or known threatened proceedings, even if determined adversely, should not have a material adverse effect on the Company's business, financial condition, liquidity or results of operations; the Company expects to acquire two Embraer 175 aircraft during the second quarter and one during the third quarter; (ii) in Item 2, "Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources," that the Company believes that it will be in compliance with all of its Credit Facility covenants at future calculation dates; and that the Company will have adequate cash flow to meet its ongoing operational needs, including any required repayments under the Credit Facility due to borrowing base limitations; (iii) in Item 2, "Management's Discussion and Analysis of Financial Condition and Results of Operations – Outlook," that the Company does not anticipate any future weakening of the financial condition of regional carriers in general, but believes that there may be further shakeouts of weaker carriers in the industry before the financial situation improves across the board; that the Company could experience delays in remarketing its assets, as well as lower rental rates for assets that are remarketed; that the Company will be in compliance with all of its Credit Facility covenants at future calculation dates; and that available borrowings under the Credit Facility will be sufficient to meet the Company's continuing obligations and, if the Credit Facility is expanded from its current amount of \$150 million to the maximum of \$180 million, to fund anticipated acquisitions; (iv) in Item 2, "Management's Discussion and Analysis of Financial Condition and Results of Operations – Factors that May Affect Future Results," that the Company believes it will continue to be in compliance with all of the covenants under its debt agreements; that as competition increases, the competition will likely continue to create upward pressure on acquisition prices for many of the aircraft types that the Company has targeted to buy and, at the same time, create downward pressure on lease rates, resulting in lower margins for the Company and, therefore, fewer acceptable acquisition opportunities for the Company; that the Company will have sufficient cash funds to make any required principal repayment that arises due to any borrowing limitations; that there may be further shakeouts of weaker carriers in economically troubled regions; that the overall industry experience of JMC's personnel and its technical resources should permit the Company to effectively manage new aircraft types; that effective mitigating factors exist against undue compensation-incented risk-taking by JMC; that the burden and cost of complying with environmental regulatory requirements will fall primarily upon lessees of equipment or the Company as owner of the equipment; that the costs of complying with environmental regulations will not have a material adverse effect on the Company; that the Company has sufficient cyber-security measures in place; that the Company's main vulnerability would be interruption to email communication, internally and with third parties, loss of customer and lease archives, and loss of document sharing between the Company's offices and remote workers; and that sufficient replacement mechanisms exist such that there would not be a material adverse financial impact on the Company's business. These forward-looking statements involve risks and uncertainties, and it is important to note that the Company's actual results could differ materially from those projected or assumed in such forward-looking

statements. Among the factors that could cause actual results to differ materially are the factors detailed under the heading "Management's Discussion and Analysis of Financial Condition and Results of Operations — Factors That May Affect Future Results," including the lack of any unexpected lessee defaults or insolvency; the continued availability of financing for acquisitions under the Credit Facility; the Company's success in finding appropriate assets to acquire with such financing; a deterioration of the market values of aircraft types owned by the Company; an unanticipated surge in interest rates; compliance by the Company's lessees with obligations under their respective leases; no sudden current economic downturn or unanticipated future financial crises; deviations from the assumption that future major maintenance expenses will be relatively evenly spaced over the entire portfolio; large unanticipated maintenance expenses; and future trends and results that cannot be predicted with certainty. The cautionary statements made in this Report should be read as being applicable to all related forward-looking statements wherever they appear herein. All forward-looking statements and risk factors included in this document are made as of the date hereof, based on information available to the Company as of the date hereof, and the Company assumes no obligation to update any forward-looking statement or risk factor. You should consult the risk factors listed from time to time in the Company's filings with the Securities and Exchange Commission.

Item 1. Financial Statements.

AeroCentury Corp.
Condensed Consolidated Balance Sheets
(Unaudited)

ASSETS

	March 31, 2017	December 31, 2016
Assets:		
Cash and cash equivalents	\$2,808,600	\$2,194,400
Accounts receivable, including deferred rent of \$874,700 and \$604,800 at March 31, 2017 and December 31, 2016, respectively	4,695,100	4,046,100
Finance leases receivable	26,145,000	17,468,300
Aircraft and aircraft engines held for lease, net of accumulated depreciation of \$34,344,700 and \$32,639,600 at March 31, 2017 and December 31, 2016, respectively	186,015,000	192,799,800
Assets held for sale	1,995,800	1,998,100
Prepaid expenses and other	372,100	229,400
Total assets	\$222,031,600	\$218,736,100
LIABILITIES AND STOCKHOLDERS' EQUITY		
Liabilities:		
Accounts payable and accrued expenses	\$1,097,900	\$1,218,100
Notes payable and accrued interest, net of unamortized debt issuance costs of \$1,799,600 and \$1,999,900 at March 31, 2017 and December 31, 2016, respectively	129,253,200	125,837,900
Maintenance reserves	29,167,500	29,424,100
Accrued maintenance costs	355,100	965,000
Security deposits	4,361,200	3,933,200
Unearned revenues	3,832,900	1,903,900
Deferred income taxes	13,145,300	12,830,500
Income taxes payable	209,500	123,200
Total liabilities	181,422,600	176,235,900
Commitments and contingencies		
Stockholders' equity:		
Preferred stock, \$0.001 par value, 2,000,000 shares authorized, no shares issued and outstanding	-	-
Common stock, \$0.001 par value, 10,000,000 shares authorized, 1,629,999 shares issued, 1,416,699 and 1,566,699 shares outstanding at March 31, 2017 and December 31, 2016, respectively	1,600	1,600
Paid-in capital	14,780,100	14,780,100
Retained earnings	28,864,100	28,222,600
	43,645,800	43,004,300
Treasury stock at cost, 213,300 and 63,300 shares at March 31, 2017 and December 31, 2016, respectively	(3,036,800)	(504,100)
Total stockholders' equity	40,609,000	42,500,200
Total liabilities and stockholders' equity	\$222,031,600	\$218,736,100

The accompanying notes are an integral part of these statements.

AeroCentury Corp.
Condensed Consolidated Statements of Cash Flows
(Unaudited)

	For the Three Months Ended March 31,	
	2017	2016
Net cash provided by operating activities	\$4,258,100	\$5,529,000
Investing activities:		
Proceeds from sale of aircraft and aircraft engines held for lease, net of re-sale fees	570,100	1,485,600
Proceeds from sale of assets held for sale, net of re-sale fees	16,200	1,755,900
Investment in direct financing leases	(7,354,100)	-
Investment in aircraft parts and acquisition costs	(62,800)	-
Net cash (used in)/provided by investing activities	(6,830,600)	3,241,500
Financing activities:		
Issuance of notes payable – Credit Facility	7,000,000	-
Repayment of notes payable – Credit Facility	(2,800,000)	(8,600,000)
Repayment of notes payable – special purpose financing	(1,013,300)	-
Net cash provided by/(used in) financing activities	3,186,700	(8,600,000)
Net increase in cash and cash equivalents	614,200	170,500
Cash and cash equivalents, beginning of period	2,194,400	2,721,000
Cash and cash equivalents, end of period	\$2,808,600	\$2,891,500

During the three months ended March 31, 2017 and 2016, the Company paid interest totaling \$1,402,600 and \$1,115,500, respectively. The Company paid no income taxes during the three months ended March 31, 2017 or 2016.

The accompanying notes are an integral part of these statements.

AeroCentury Corp.
Notes to Condensed Consolidated Financial Statements (Unaudited)
March 31, 2017

1. Organization and Summary of Significant Accounting Policies

(a) The Company and Basis of Presentation

AeroCentury Corp., a Delaware corporation incorporated in 1997, typically acquires used regional aircraft and engines for lease to foreign and domestic regional carriers.

In August 2016, AeroCentury Corp. formed two wholly-owned subsidiaries, ACY 19002 Limited ("ACY 19002") and ACY 19003 Limited ("ACY 19003") for the purpose of acquiring aircraft using a combination of cash and financing separate from the parent's credit facility. Financial information for AeroCentury Corp., ACY 19002 and ACY 19003 (collectively, the "Company") is presented on a consolidated basis in accordance with accounting principles generally accepted in the United States of America ("GAAP") for interim financial information, the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three-month period ended March 31, 2017 are not necessarily indicative of the results that may be expected for the year ending December 31, 2017. All intercompany balances and transactions have been eliminated in consolidation.

For further information, refer to the financial statements and footnotes thereto included in the Company's annual report on Form 10-K for the year ended December 31, 2016.

(b) Use of Estimates

The Company's condensed consolidated financial statements have been prepared in accordance with GAAP. The preparation of consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The Company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable for making judgments that are not readily apparent from other sources.

The most significant estimates with regard to these condensed consolidated financial statements are the residual values and useful lives of the Company's long lived assets, the amount and timing of future cash flows associated with each asset that are used to evaluate whether assets are impaired, accrued maintenance costs, accounting for income taxes, and the amounts recorded as allowances for doubtful accounts.

(c) Fair Value Measurements

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Valuation techniques used to measure fair value must maximize the use of observable inputs and minimize the use of unobservable inputs, to the extent possible. The fair value hierarchy under GAAP is based on three levels of inputs.

Level 1 - Quoted prices in active markets for identical assets or liabilities.

Level 2 - Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Assets and Liabilities Measured and Recorded at Fair Value on a Recurring Basis

The carrying amount of the Company's money market funds included in cash and cash equivalents was \$1,848,300 and \$1,348,100 at March 31, 2017 and December 31, 2016, respectively. The fair value of the Company's money market funds is categorized as Level 1 under the GAAP fair value hierarchy.

As of March 31, 2017 and December 31, 2016, there were no liabilities that were required to be measured and recorded at fair value on a recurring basis.

Assets Measured and Recorded at Fair Value on a Nonrecurring Basis

The Company determines fair value of long-lived assets held and used, such as aircraft and aircraft engines held for lease and assets held for sale, by reference to independent appraisals, quoted market prices (e.g., offers to purchase) and other factors. An impairment charge is recorded when the Company believes that the carrying value of an asset will not be recovered through future net cash flows and that the asset's carrying value exceeds its fair value.

Assets held for sale

The Company recorded no impairment charges on its aircraft held for sale during the three months ended March 31, 2017. During the three months ended March 31, 2016, the Company recorded impairment charges of \$75,000 on two assets prior to their sale during the year.

Fair Value of Other Financial Instruments

The Company's financial instruments, other than cash and cash equivalents, consist principally of finance leases receivable, amounts borrowed under its credit facility (the "Credit Facility") and notes payable under special purpose financing. The fair value of accounts receivable, finance leases receivable, accounts payable and the Company's maintenance reserves and accrued maintenance costs approximates the carrying value of these financial instruments.

Borrowings under the Company's Credit Facility bear floating rates of interest that reset periodically to a market benchmark rate plus a credit margin. The Company believes the effective interest rate under the Credit Facility approximates current market rates for such indebtedness at the balance sheet date, and therefore that the outstanding principal and accrued interest of \$114,393,800 and \$110,183,600 at March 31, 2017 and December 31, 2016, respectively, approximate their fair values on such dates. The fair value of the Company's outstanding balance of its Credit Facility would be categorized as Level 3 under the GAAP fair value hierarchy.

The amounts payable under the Company's special purpose financing are payable through the fourth quarter of 2020 and bear a fixed rate of interest, as described in Note 4(b) to the condensed consolidated financial statements. The outstanding principal and accrued interest of \$16,639,000 and \$17,654,200 approximates the fair value of such notes at March 31, 2017 and December 31, 2016. Such fair value would be categorized as Level 3 under the GAAP fair value hierarchy.

(d) Finance Leases

As of March 31, 2017, the Company had nine aircraft finance leases that contain lessee purchase options at prices substantially below the assets' estimated residual values at the exercise date for the options. Consequently, the Company considers the purchase options to be bargain purchase options and has classified the leases as finance leases for financial accounting purposes. The Company reports the discounted present value of (i) future minimum lease payments (including the bargain purchase option) and (ii) any residual value not subject to a bargain purchase option as a finance lease receivable on its balance sheet and accrues interest on the balance of the finance lease receivable based on the interest rate inherent in the applicable lease over the term of the lease. For sales-type finance leases, the Company recognizes as a gain or loss the amount equal to (i) the net investment in sales-type finance leases plus any initial direct costs and lease incentives less (ii) the net book value of the aircraft.

The Company recognized interest earned on finance leases as "finance lease revenue" in the amount of \$325,400 and \$185,100 in the three months ended March 31, 2017 and 2016, respectively.

(e) Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update No. 2014-09 that created the new Topic 606 ("Topic 606") in the Accounting Standards Codification ("ASC"). Topic 606 also included numerous conforming additions and amendments to other Topics within the ASC. Topic 606 established new rules that affect the amount and timing of revenue recognition for contracts with customers, but does not affect lease accounting and reporting. As such, adoption of these provisions will not affect the Company's lease revenues but may affect the reporting of other of the Company's revenues. On August 12, 2015, the FASB deferred the effective date of the provisions included in Topic 606 to years commencing after December 15, 2017. Topic 606 can be adopted early for years commencing after December 15, 2016, and may be reflected using either a full retrospective method or a simplified method that does not recast prior periods but does disclose the effect of the adoption on the current period consolidated financial statements. The Company has not yet determined either the potential impact on its consolidated financial statements or the method it will elect to use in connection with the adoption of the changes included in Topic 606.

In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842) ("ASU 2016-02"). ASU 2016-02 is effective for public companies for years beginning after December 15, 2018, although early adoption is permitted. ASU 2016-02 substantially modifies lessee accounting for leases, requiring that lessees recognize lease assets and liabilities for leases extending beyond one year. Leases will be classified as either finance or operating, with classification affecting the pattern of expense recognition in the income statement.

The new standard requires a lessor to classify leases as sales-type, finance or operating. A lease will be treated as a sale if it transfers all of the risks and rewards, as well as control of the underlying asset, to the lessee. If risks and rewards are conveyed without the transfer of control, the lease is treated as a financing. If the lessor does not convey risks and rewards or control, an operating lease results. A modified retrospective transition approach is required for lessors for sales-type, direct financing, and operating leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements, with certain practical expedients available.

The Company has reviewed those agreements under which it is the lessor, and believes that the accounting for its existing operating and finance leases will not be affected by adoption of ASU 2016-02, nor does it expect classification of its future leases to be significantly affected by adoption. The Company does expect that certain pre-lease costs that are currently capitalized and amortized over operating lease terms or offset against gain on sale in sales-type leases will instead be expensed when incurred under the new standards, but since such future amounts will be based on future facts and circumstances, the Company cannot determine the future effect of such requirement. The Company does not expect to adopt ASU 2016-02 early, and does expect to elect practical expedients in connection with its adoption, including not re-evaluating lease classification or capitalized initial direct costs on existing leases.

The Company is not an obligor under any agreements that would be considered leases under ASU 2016-02, and so would be unaffected with respect to its adoption with respect to lessee accounting.

In January 2017, the FASB issued ASU 2017-01, Business Combinations (Topic 805) ("ASU 2017-01"). ASU 2017-01 is effective for public companies for years beginning after December 15, 2017, although early adoption is permitted. ASU 2017-01 clarifies the definition of a business with the objective of adding guidance to assist entities with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. The Company has early adopted ASU 2017-01 effective beginning the first quarter ended March 31, 2017 and has determined that none of its acquired assets qualifies as a business, such that no gain, loss or adjustment to the carrying value of assets was required in connection with such adoption.

In January 2017, the FASB issued ASU 2017-04, Intangibles -- Goodwill and Other (Topic 350) ("ASU 2017-04"), which provides for simplification of the test for goodwill impairment. Under the revised standard, "step 2" of the test under the previous standard is eliminated and (i) the fair value of the reporting unit is compared to its carrying value, with (ii) an impairment charge up to the amount of goodwill recognized for the excess of carrying value over fair value (considering the income tax effects of deductible goodwill, if applicable). The new provisions are required to be adopted for fiscal years beginning after December 15, 2019, although the Company has elected to early adopt the new provisions beginning with its quarter ended March 31, 2017. Adoption of ASU 2017-04 had no effect on the financial results or position of the Company.

2. Finance Leases Receivable

During the first quarter of 2017, the Company leased a turboprop aircraft pursuant to a sales-type finance lease and recorded a related gain of \$297,400. During the same period, the Company used cash of \$7,354,100 for the acquisition of three regional jet aircraft, which are recorded as direct financing leases.

During the first quarter of 2016, the Company recorded a gain of \$5,400 related to a lessee's exercise of its purchase option under a sales-type finance lease.

At March 31, 2017 and December 31, 2016, the net investment included in finance leases and direct financing leases receivable were as follows:

	March 31, 2017	December 31, 2016
Gross minimum lease payments receivable	\$30,904,500	\$20,829,200
Less unearned interest	(4,759,500)	(3,360,900)
Finance leases receivable	\$26,145,000	\$17,468,300

As of March 31, 2017, minimum future payments receivable under finance leases were as follows:

Years ending	
Remainder of 2017	\$4,280,700
2018	5,811,600
2019	7,087,600
2020	5,036,600
2021	5,381,000
Thereafter	3,307,000
	\$30,904,500

3. Aircraft and Aircraft Engines Held for Lease or Sale

(a) Assets Held for Lease

At March 31, 2017 and December 31, 2016, the Company's aircraft and aircraft engines held for lease consisted of the following:

Type	March 31, 2017		December 31, 2016	
	Number owned	% of net book value	Number owned	% of net book value
Turboprop aircraft	11	23%	12	23%
Regional jet aircraft	12	74%	12	73%
Engines	3	3%	4	4%

In addition to its investment in direct financing leases discussed in Note 2, during the first quarter of 2017, the Company used \$62,800 for equipment to be installed on an aircraft and for acquisition costs related to aircraft acquired in 2016. During the first quarter of 2016, the Company used no cash for asset acquisitions.

As discussed in Note 9, during the first quarter of 2017, the Company exchanged one of its spare engines for 150,000 shares of common stock of the Company held by a stockholder. The Company recorded no gain or loss related to the exchange.

During the first quarter of 2017, the Company leased a turboprop aircraft that had been off lease at December 31, 2016.

Three of the Company's assets held for lease, comprised of two turboprop aircraft and one engine, were off lease at March 31, 2017, representing 4% of the net book value of the Company's aircraft and engines held for lease. As discussed in Note 9, two turboprop aircraft and two engines were returned to the Company in April 2017.

As of March 31, 2017, minimum future lease revenue payments receivable under noncancelable operating leases were as follows:

Years ending	
Remainder of 2017	\$ 18,931,000
2018	22,282,900
2019	21,855,200
2020	19,403,000
2021	12,301,600
Thereafter	30,908,100
	\$ 125,681,800

(b) Assets Held for Sale

Assets held for sale at March 31, 2017 consist of three turboprop airframes being sold in parts and a turboprop aircraft.

During the three months ended March 31, 2017 and 2016, the Company received \$16,100 and \$38,800, respectively, from the sale of parts installed on the airframes. Of such amounts, \$2,300 and \$38,800, respectively, reduced the carrying value of the airframes. In the 2017 period, the Company received an amount in excess of the carrying value for one of the airframes, and recorded a gain of \$13,900.

4. Notes Payable and Accrued Interest

At March 31, 2017 and December 31, 2016, the Company's notes payable and accrued interest consisted of the following:

	March 31, 2017	December 31, 2016
Credit Facility:		
Principal	\$ 114,300,000	\$ 110,100,000
Unamortized debt issuance costs	(1,779,600)	(1,999,900)
Accrued interest	93,800	83,600
Special purpose financing:		
Principal	16,610,300	17,623,600
Accrued interest	28,700	30,600
	\$ 129,253,200	\$ 125,837,900

(a) Credit facility

The Company's \$150 million Credit Facility is provided by a syndicate of banks and is secured by all of the assets of the Company, including its aircraft and engine portfolio. The Credit Facility, which expires on May 31, 2019, can be expanded to a maximum of \$180 million. The Company was in compliance with all covenants under the Credit Facility at March 31, 2017 and December 31, 2016.

The unused amount of the Credit Facility was \$35,700,000 and \$39,900,000 as of March 31, 2017 and December 31, 2016, respectively.

The weighted average interest rate on the Credit Facility was 4.40% and 4.15% at March 31, 2017 and December 31, 2016, respectively.

(b) Special purpose financing

In August 2016, the Company acquired two regional jet aircraft using cash and financing separate from its Credit Facility. The financing resulted in note obligations of \$9,805,600 and \$9,804,300, which are being paid from a portion of the rent payments on the related aircraft leases through October 3, 2020 and November 7, 2020, respectively, and which bear interest at the rate of 4.455%. The borrower under each note obligation is the special purpose entity that owns each aircraft. The notes are collateralized by the aircraft and are recourse only to the special purpose entity borrower and its aircraft asset, subject to standard exceptions for this type of financing. Payments due under the notes consist of quarterly principal and interest. The combined balance of the notes payable and accrued interest on these notes at March 31, 2017 and December 31, 2016 was \$16,639,000 and \$17,654,200, respectively.

5. Acquisition Costs

During the first quarter of 2017, the Company accrued \$101,800 of expenses related to a potential corporate acquisition. Such expenses are included in professional fees, general and administrative and other in the Company's condensed consolidated statements of operations.

6. Contingencies

In the ordinary conduct of the Company's business, the Company is subject to lawsuits, arbitrations and administrative proceedings from time to time. The Company believes that the outcome of any existing or known threatened proceedings, even if determined adversely, should not have a material adverse effect on the Company's business, financial condition, liquidity or results of operations.

7. Computation of Earnings Per Share

Basic and diluted earnings per share are calculated as follows:

	For the Three Months Ended March 31,	
	2017	2016
Net income	\$641,500	\$433,700
Weighted average shares outstanding for the period	1,550,032	1,566,699
Basic earnings per share	\$0.41	\$0.28
Diluted earnings per share	\$0.41	\$0.28

Basic earnings per common share is computed using net income and the weighted average number of common shares outstanding during the period. Diluted earnings per common share are computed using net income and the weighted average number of common shares outstanding, assuming dilution. Weighted average common shares outstanding, assuming dilution, include potentially dilutive common shares outstanding during the period.

8. Related Party Transactions

The Company's portfolio of leased aircraft assets is managed and administered under the terms of a management agreement with JetFleet Management Corp. ("JMC"), which is an integrated aircraft management, marketing and financing business and a subsidiary of JetFleet Holding Corp. ("JHC"). Certain officers of the Company are also officers of JHC and JMC and hold significant ownership positions in both JHC and the Company.

Under the management agreement, JMC receives a monthly management fee based on the net asset value of the assets under management. JMC also receives an acquisition fee for locating assets for the Company. Acquisition fees are included in the cost basis of the asset purchased. JMC may receive a remarketing fee in connection with the re-lease or sale of the Company's assets. Remarketing fees are amortized over the applicable lease term or included in the gain or loss on sale.

Fees incurred during the three months ended March 31, 2017 and 2016 were as follows:

	For the Three Months Ended March 31,	
	2017	2016
Management fees	\$ 1,506,800	\$ 1,264,000
Acquisition fees	220,500	-
Remarketing fees	51,100	-

In August 2009, the Company entered into an agreement (the "Assignment Agreement") with Lee G. Beaumont in which Mr. Beaumont assigned to the Company his rights to purchase certain aircraft engines from an unrelated third party seller. In January 2012, Mr. Beaumont became a "related person" with respect to the Company due to his open market acquisitions of shares representing over 5% of the Company's common stock. In March 2017, the Company exchanged one of the engines for 150,000 shares of common stock of the Company held by Mr. Beaumont. The Company recorded no gain or loss related to the exchange.

9. Subsequent Events

In April 2017, one of the Company's lessees returned two turboprop aircraft prior to lease expiration. The Company recorded gains totaling \$271,600, which represents the difference between the maintenance reserves held by the Company and retained by it upon the such return and the amount of deferred rent that had been recorded as income by the Company in previous periods.

In April 2017, two spare engines that had been on lease were returned to the Company at lease expiration.

In May 2017, the Company signed a letter of intent and made a deposit for the purchase of three Embraer 175 aircraft. The Company expects to acquire two of the aircraft during the second quarter and one during the third quarter.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion should be read in conjunction with the Company's Form 10-K for the year ended December 31, 2016 and the unaudited financial statements and related notes that appear elsewhere in this report.

Critical Accounting Policies, Judgments and Estimates

The Company's discussion and analysis of its financial condition and results of operations are based upon the financial statements which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires management to make estimates and judgments that affect the reported amounts of assets and liabilities, revenues and expenses, and the related disclosure of contingent assets and liabilities at the date of the financial statements. In the event that actual results differ from these estimates or the Company adjusts these estimates in future periods, the Company's operating results and financial position could be materially affected. For a discussion of Critical Accounting Policies, Judgments and Estimates, refer to Note 1 to the Company's financial statements in Item 1 of this Quarterly Report on Form 10-Q.

Results of Operations

The Company recorded net income of \$0.6 million for the quarter ended March 31, 2017, compared to net income of \$0.4 million in the same period of 2016.

Operating lease revenue increased 21% to \$7.3 million in the first quarter of 2017 from \$6.0 million in the first quarter of 2016, primarily due to revenue from assets that were purchased during the third quarter of 2016, the effect of which was partially offset by: (i) the loss of revenue from assets that were on lease during the 2016 quarter, but off lease in 2017, (ii) the loss of revenue from an aircraft that was involved in an accident in April 2016 and was declared a total loss, and (iii) the loss of revenue from an asset that was sold pursuant to a sales-type finance lease in 2016.

Average portfolio utilization increased to approximately 96% during the first quarter of 2017 from approximately 95% during the first quarter of 2016.

During the first quarter of 2017, the Company exchanged one of its spare engines for 150,000 shares of the Company's common stock held by a stockholder. The Company recorded no gain or loss related to the exchange. During the first quarter of 2016, the Company sold two regional jet aircraft that had been held for sale at an amount equal to their carrying value.

During the first quarters of 2017 and 2016, the Company recorded gains of \$297,400 and \$5,400, respectively, related to the sale of an aircraft in each period.

During the first quarter of 2017, the Company acquired three aircraft and entered into direct financing leases for such aircraft. The Company added no equipment to its portfolio during the first quarter of 2016.

As a result of asset acquisitions and sales during 2016, as well as changes in residual value assumptions from year-to-year, depreciation increased by 41% in the first quarter of 2017, as compared to the first quarter of 2016.

The average net book value of assets held for lease during the first quarters of 2017 and 2016 was approximately \$188.7 million and \$153.9 million, respectively. Management fees, which are based on the net book value of the Company's aircraft and engines as well as finance lease receivable balances, were 20% higher for the first quarter of 2017 as compared to the same period of 2016.

The Company's interest expense increased by 25% to \$1.6 million in the first quarter of 2017 from \$1.3 million in the same period of 2016, primarily as a result of both a higher average debt balance and a higher average interest rate in the 2017 period.

Professional fees, general and administrative and other expenses in the 2017 period included \$101,800 incurred in connection with a potential corporate acquisition.

Liquidity and Capital Resources

The Company is currently financing its assets primarily through debt financing and excess cash flows.

(a) Credit Facility

The Company has a \$150 million Credit Facility, as described in Note 4 to the Company's condensed consolidated financial statements in Item 1 of this Quarterly Report on Form 10-Q. The Company was in compliance with all covenants at March 31, 2017 and December 31, 2016.

Based on its current projections, the Company believes that it will be in compliance with all of its Credit Facility covenants at future calculation dates. Although the Company believes that the assumptions it has made in forecasting its compliance with the Credit Facility covenants are reasonable in light of experience, actual results could deviate from such assumptions and there can be no assurance that the Company's beliefs will prove to be correct. Among the more significant factors that could have an impact on the accuracy of the Company's covenant compliance forecasts are (i) unanticipated decreases in the market value of the Company's assets, or in the rental rates deemed achievable for such assets that cause the Company to record an impairment charge against earnings, (ii) lessee non-compliance with lease obligations, (iii) inability to locate new lessees for returned equipment within a reasonable remarketing period, or at a rent level consistent with projected rates, (iv) inability to locate and acquire a sufficient volume of additional assets at prices that will produce acceptable net returns, (v) increases in interest rates, or (vi) inability to timely dispose of off-lease assets at prices commensurate with their market value.

Although the Company believes it will continue to be in compliance with all of the Credit Facility covenants, there can be no assurance of such compliance and, in the event of any non-compliance, the Company would need to seek waivers or amendment of applicable covenants from its lenders if such compliance failure is not timely cured. Any default under the Credit Facility, if not cured in the time permitted under the facility or waived by the lenders, could result in the Company's inability to borrow any further amounts under the Credit Facility, the acceleration of the Company's obligation to repay amounts borrowed under the Credit Facility, or foreclosure upon any or all of the assets of the Company.

(b) Special purpose financings

In August 2016, the Company acquired, using wholly-owned special purpose entities, two regional jet aircraft, using cash and third-party financing separate from its Credit Facility, as described in Note 4(b) to the Company's condensed consolidated financial statements in Item 1 of this Quarterly Report on Form 10-Q.

(c) Cash flow

The Company's primary sources of cash are payments due under the Company's operating and finance leases, maintenance reserves, which are billed monthly to lessees based on asset usage, and proceeds from the sale of aircraft and engines.

The Company's primary uses of cash are for (i) purchase of assets, (ii) Credit Facility and special purpose financing interest and principal payments, (iii) maintenance expense and reimbursement to lessees from collected maintenance reserves, (iv) management fees, and (v) professional fees, including legal, accounting and directors' fees costs.

The Company's payments for maintenance consist of reimbursements to lessees for eligible maintenance costs under their leases and maintenance incurred directly by the Company for preparation of off-lease assets for re-lease to new customers. The timing and amount of such payments may vary widely between quarterly and annual periods, as the required maintenance events can vary greatly in magnitude and cost, and the performance of the required maintenance events by the lessee or the Company, as applicable, are not regularly scheduled calendar events and do not occur at

uniform intervals throughout any calendar period. The Company's maintenance payments typically constitute a large portion of its cash needs, and the Company may from time to time borrow additional funds under the Credit Facility to provide funding for such payments.

Management fees paid by the Company are relatively predictable because they are based on the net asset value of the Company's portfolio and finance lease receivable balances. Because of this, the risk of increased costs for employee salaries and benefits, worldwide travel related to the management of the Company's aircraft portfolio, office rent, outside technical experts and other overhead expenses is entirely placed on JMC.

The amount of interest paid by the Company depends primarily on the outstanding balance of its Credit Facility, which carries a floating interest rate as well as an interest rate margin, and is therefore also dependent on changes in prevailing interest rates. Interest related to the Company's special purpose financings is payable at a fixed rate.

Management believes that the Company will have adequate cash flow to meet its ongoing operational needs, including any required repayments under the Credit Facility, based upon its estimates of future revenues and expenditures, which include assumptions regarding (i) revenues for assets to be re-leased, (ii) cost and anticipated timing of maintenance to be performed, (iii) required debt payments, (iv) timely use of proceeds of unused debt capacity for additional acquisitions of income producing assets and (v) interest rates. Although the Company believes that the assumptions it has made in forecasting its cash flow are reasonable in light of experience, actual results could deviate from such assumptions. As discussed above, in "Liquidity and Capital Resources – (a) Credit Facility," there are a number of factors that may cause actual results to deviate from such forecasts.

(i) Operating activities

The Company's cash flow from operations decreased by \$1.3 million in the first quarter of 2017 compared to the same period in 2016. As discussed below, the decrease in cash flow was primarily a result of increases in payments for maintenance, management fees and interest. This negative effect was partially offset by increases in payments received for operating lease revenue, maintenance reserves and security deposits.

Payments for maintenance

Although maintenance expense was lower in the first quarter of 2017 than in the same period in 2016, payments for maintenance increased by \$1.6 million in the 2017 period compared to the 2016 period as a result of a difference in the timing of payments for maintenance.

Payments for management fees

Payments for management fees increased by \$0.7 million in the first quarter of 2017 compared to the same period in 2016, as a result of aircraft acquisitions during 2016 and the first quarter of 2017, as well as a difference in the timing of payments from year to year.

Payments for interest

Payments for interest increased by \$0.2 million in the first quarter of 2017 compared to the first quarter of 2016 as a result of a higher average debt balance and higher rates during the 2017 period.

Payments for operating lease revenue

Rent receipts from lessees increased by \$0.4 million in the first quarter of 2017 compared to the same period in 2016, primarily due to higher rent from assets purchased and leased to customers during 2016.

As of the date of this filing, the Company is receiving no lease revenue for two aircraft and three engines held for lease that are off lease. The total book value of these assets is \$8.2 million, representing 4% of the Company's total assets held for lease. In addition, an off-lease turboprop aircraft, with a book value of \$1.5 million, is being held for sale and is not generating any lease revenue.

Payments for maintenance reserves

Receipts for maintenance reserves from lessees increased by \$0.5 million in the first quarter of 2017 compared to the same period in 2016, primarily as a result of additional assets for which the Company collected maintenance reserves in the 2017 period.

Payments for security deposits

Net security deposits received by the Company increased by \$0.5 million in the first quarter of 2017 compared to the same period in 2016, primarily as a result of lease deposits received in connection with aircraft purchased by the Company and leased pursuant to direct financing leases during the 2017 period.

(ii) Investing activities

During the first quarters of 2017 and 2016, the Company received net cash of \$0.6 million and \$3.2 million, respectively, from the sale of assets. During the first quarter of 2017, the Company used cash of \$7.4 million for acquisitions of aircraft leased pursuant to direct financing leases.

(iii) Financing activities

The Company borrowed an additional \$7.0 million under the Credit Facility during the first quarter of 2017 and none in the same period in 2016. In the first quarters of 2017 and 2016, the Company repaid \$2.8 million and \$8.6 million, respectively, of its total outstanding debt under the Credit Facility. Such repayments were funded by excess cash flow and the sale of assets. During the first quarter of 2017, the Company's special purpose entities repaid \$1.0 million of principal.

Outlook

(a) General

During the global downturn, there was an overall reduction in passenger traffic in some markets where the Company's lessees operate. This weakened the financial condition of some of these lessees, which resulted in these lessees and other regional carriers slowing expansion or reducing capacity. As a result, the demand for aircraft by these lessees and other regional carriers decreased, reducing the Company's acquisition and remarketing opportunities. The Company does not anticipate any future weakening of the financial condition of regional carriers in general, but believes that there may be further shakeouts of weaker carriers in the industry before the financial situation improves across the board.

The Company has identified three areas that could challenge the Company's growth and operating results by negatively affecting its collateral base and, therefore, its ability to access sources of financing:

- Notwithstanding recent interest rate increases by the U.S. Federal Reserve Bank, the current low-interest rate environment has increased competition in the Company's market niche caused by new acquisition and leasing market entrants, some of which are funded by investment banks and private equity firms seeking higher yields on investment assets than are currently available from traditional income investment types. The increased competition has resulted in higher acquisition prices for many of the aircraft types that the Company has targeted to buy and, at the same time, has put downward pressure on lease rates, resulting in lower margins and, therefore, fewer acceptable acquisition opportunities for the Company.
- The Company could experience delays in remarketing its assets, as well as lower rental rates for assets that are remarketed.
- Lessees that are located in low- or no-growth areas of the world carry heightened risk of an unanticipated lessee default. A lessee's default and the unscheduled return of an asset to the Company for remarketing could result not only in reduced operating lease revenue but also in unanticipated, unrecoverable expenses arising from the lessee's default on its maintenance and return condition obligations. The Company monitors the performance of all of its customers and has noted that some of the Company's customers continue to experience weakened operating results and have not yet achieved financial stability.

(b) Operating Segments

The Company operates in one business segment, the leasing of regional aircraft and engines to foreign and domestic regional air carriers, and therefore does not present separate segment information for lines of business. Because engine leasing is typically characterized by short-term, non-triple net leases, which result in high overall transaction costs, unpredictable off-lease periods and extensive human resource allocation to remarketing, the Company has chosen to own only a few engines that are compatible with its aircraft types.

In addition to six turboprop aircraft and three regional jet aircraft that are subject to finance leases, at April 30, 2017, the Company's aircraft and aircraft engines that were on lease or held for lease consisted of the following:

Type	Number owned	% of net book value
Turboprop aircraft	11	23%
Regional jet aircraft	12	74%
Engines	3	3%

For the month ended April 30, 2017, approximately 29%, 20%, 15% and 15% of the Company's operating lease revenue was derived from customers in Slovenia, Spain, Mozambique and the United States, respectively. Operating lease revenue does not include interest income from the Company's finance leases. The table below sets forth geographic information about the Company's operating lease revenue for leased aircraft and aircraft equipment, grouped by domicile of the lessee:

Region	Number of lessees	% of operating lease revenue
Europe	3	53%
North America	3	23%
Africa	1	15%
Asia	1	5%
Australia	1	4%

For the month ended April 30, 2017, approximately 70% and 30% of the Company's finance lease revenue was derived from customers in Africa and Europe, respectively.

(c) Remarketing Efforts

The Company is seeking remarketing opportunities for two turboprop aircraft and three engines that are held for lease, as well as for four aircraft with leases that expire in the remainder of 2017 and that are expected to be returned to the Company. However, the Company may also consider selling some or all of these assets. The Company is analyzing the amount and timing of maintenance required to remarket the assets, the amount of which may differ significantly if the assets are sold rather than re-leased.

The Company also owns a turboprop aircraft that is held for sale, for which the Company is seeking sales opportunities.

(d) Credit Facility

The unused amount of the Credit Facility was \$35.7 million as of the date of this filing. Based on its current projections, the Company believes that it will be in compliance with all of its Credit Facility covenants at future calculation dates. The Company also believes that available borrowings under the Credit Facility will be sufficient to meet its continuing obligations and, if the Credit Facility is expanded from its current amount of \$150 million to the maximum of \$180 million, to fund anticipated acquisitions. However, there can be no assurance that the Company's beliefs will prove to be correct or that the lenders under the Credit Facility will agree to expand the Credit Facility when requested by the Company.

Factors that May Affect Future Results

Noncompliance with Debt Financial Covenants. The Company's use of debt as the primary form of acquisition financing subjects the Company to increased risks associated with leverage. In addition to payment obligations, the Company's debt agreements include financial covenants, including some requiring the Company to have positive earnings, meet minimum net worth standards and be in compliance with certain other financial ratios.

Although the Company believes it will continue to be in compliance with all of the covenants under its debt agreements, there can be no assurance of such compliance, and in the event of any non-compliance, the Company would need to seek further waivers or amendments of applicable covenants from its lenders if such compliance failure is not timely cured. Any default under a debt agreement, if not cured in the time permitted or waived by the respective lender, could result in the Company's inability to borrow under the Credit Facility, the acceleration of the Company's debt obligations, or the foreclosure upon any or all of the assets of the Company.

Availability of Financing. The Company's continued growth will depend on its ability to continue to obtain capital, either through debt or equity financings. There can be no assurance that the Company will succeed in obtaining capital in the future at terms favorable to the Company.

Ownership Risks. The Company's leases typically are for a period shorter than the entire, anticipated, remaining useful life of the leased assets. As a result, the Company's recovery of its investment and realization of its expected yield in such a leased asset is dependent upon the Company's ability to profitably re-lease or sell the asset following the expiration of the lease. This ability is affected by worldwide economic conditions, general aircraft market conditions, regulatory changes, changes in the supply or cost of aircraft equipment, and technological developments that may cause the asset to become obsolete. If the Company is unable to remarket its assets on favorable terms when the leases for such assets expire, the Company's financial condition, cash flow, ability to service debt, and results of operations could be adversely affected.

The Company typically acquires used aircraft equipment. The market for used aircraft equipment has been cyclical, and generally reflects economic conditions and the strength of the travel and transportation industry. The demand for and value of many types of used aircraft in the recent past has been depressed by such factors as airline financial difficulties, airline consolidations, the number of new aircraft on order and the number of aircraft coming off lease, as well as introduction of new aircraft models and types that may be more technologically advanced, more fuel efficient and/or less costly to maintain and operate. Values may also increase or decrease for certain aircraft types that become more or less desirable based on market conditions and changing airline capacity.

In addition, a successful investment in an asset subject to a lease depends in part upon having the asset returned by the lessee in the condition as required under the lease. Each lease typically obligates a customer to return an asset to the Company in a specified condition, generally in equal or better condition than at delivery to the lessee. The Company strives to ensure this result through onsite management during the return process. However, if the lessee were to become insolvent during the term of its lease and the Company had to repossess the asset, it is unlikely that the lessee would have the financial ability to meet these return obligations. In addition, if the lessee filed for bankruptcy and rejected the aircraft lease, the lessee would be required to return the aircraft but would be relieved from further lease obligations, including return conditions specified in the lease. In either case, it is likely that the Company would be required to expend funds in excess of any maintenance reserves collected to return the asset to a remarketable condition.

Several of the Company's leases with financially strong lessees do not require payment of monthly maintenance reserves, which serve as the lessee's advance payment for its future repair and maintenance obligations. If repossession due to lessee default or bankruptcy occurred under such a lease, the Company would be left with the costs of unperformed repair and maintenance under the applicable lease and the Company would likely incur an unanticipated expense in order to re-lease or sell the asset.

Furthermore, the occurrence of unexpected adverse changes that impact the Company's estimates of expected cash flows generated from an asset could result in an asset impairment charge against the Company's earnings. The Company periodically reviews long-term assets for impairment, particularly when events or changes in circumstances indicate the carrying value of an asset may not be recoverable. An impairment charge is recorded when the carrying amount of an asset is estimated to be not recoverable and exceeds its fair value. The Company recorded impairment charges for some of its aircraft in 2015 and 2016, and may be required to record asset impairment charges in the future as a result of a prolonged weak economic environment, challenging market conditions in the airline industry, events related to particular lessees, assets or asset types or other factors affecting the value of aircraft or engines.

Lessee Credit Risk. The Company carefully evaluates the credit risk of each customer and attempts to obtain a third party guaranty, letters of credit or other credit enhancements, if it deems them necessary, in addition to customary security deposits. There can be no assurance, however, that such enhancements will be available, or that, if obtained, will fully protect the Company from losses resulting from a lessee default or bankruptcy.

If a lessee that is a certified U.S. airline were in default under a lease and sought protection under Chapter 11 of the United States Bankruptcy Code, Section 1110 of the Bankruptcy Code would automatically prevent the Company from exercising any remedies against such lessee for a period of 60 days. After the 60-day period had passed, the lessee would have to agree to perform the lease obligations and cure any defaults, or the Company would have the right to repossess the equipment. However, this procedure under the Bankruptcy Code has been subject to significant litigation, and it is possible that the Company's enforcement rights would be further adversely affected by a bankruptcy filing by a defaulting lessee.

Several of the Company's customers have experienced significant financial difficulties, become insolvent, or have been declared or have filed for bankruptcy. An insolvency or bankruptcy of a customer usually results in a total loss of the receivables from that customer, as well as the Company incurring additional costs in order to repossess and, in some cases, repair the aircraft. The Company closely monitors the performance of all of its lessees and its risk exposure to any lessee that may be facing financial difficulties, in order to guide decisions with respect to such lessee that would mitigate losses in the event the lessee is unable to meet or rejects its lease obligations. There can be no assurance that additional customers will not become insolvent or file for bankruptcy or that the Company will be able to mitigate any of the resultant losses.

It is possible that the Company may enter into deferral agreements for overdue lessee obligations. When a customer requests a deferral of lease obligations, the Company evaluates the lessee's financial plan, the likelihood that the lessee can remain a viable carrier, and whether the deferral will be repaid according to the agreed schedule. The Company may elect to record the deferred rent and reserve payments from the lessee on a cash basis, which could have a material effect on the Company's financial results in the applicable periods. Deferral agreements with lessees also reduce the Company's borrowing capacity under its Credit Facility.

Competition. The aircraft leasing industry is highly competitive. The Company competes with aircraft manufacturers, distributors, airlines and aircraft operators, equipment managers, leasing companies, equipment leasing programs, financial institutions and other parties engaged in leasing, managing or remarketing aircraft, many of which have significantly greater financial resources. The Company believes that it is competitive because of JMC's expertise and operational efficiency in identifying and obtaining financing for the transaction types desired by regional air carriers. This market segment, which in many cases involves customers that are private companies without well-established third party credit ratings, is not well served by large financial institutions. JMC has developed a reputation as a competent global participant in this segment of the market, and the Company believes that JMC's reputation benefits the Company. Competition in the Company's market niche, however, has increased significantly recently as a result of new entrants to the acquisition and leasing market and consolidation of certain competitors in the Company's niche. As competition increases, it has and will likely continue to create upward pressure on acquisition prices for many of the aircraft types that the Company has targeted to buy and, at the same time, create downward pressure on lease rates, resulting in lower margins for the Company and, therefore, fewer acceptable acquisition opportunities for the Company.

Risks Related to Regional Air Carriers. The Company's continued focus on its customer base of regional air carriers subjects the Company to additional risks. Many regional airlines rely heavily or even exclusively on a code-share or other contractual relationship with a major carrier for revenue, and can face financial difficulty or failure if the major carrier terminates the relationship or if the major carrier files for bankruptcy or becomes insolvent. Some regional carriers may depend on contractual arrangements with industrial customers such as mining or oil companies, or franchises from governmental agencies that provide subsidies for operating essential air routes, which may be subject to termination or cancellation on short notice. Furthermore, many lessees in the regional air carrier market are

start-up, low-capital, and/or low-margin operators.

Credit Facility Debt Limitations. The amount available to be borrowed under the Credit Facility is limited by asset-specific advance rates. Lease arrearages or off-lease periods for a particular asset that is collateral under the Credit Facility may reduce the loan advance rate permitted with respect to that asset and, therefore, reduce the permitted borrowing under the facility. Amounts subject to payment deferral agreements also reduce the amount of permitted borrowing. The Company believes it will have sufficient cash funds to make any required principal repayment that arises due to any such borrowing limitations.

General Economic Conditions and Lowered Demand for Travel. While the United States economy has seen substantial improvement, not all global regions are experiencing growth, and some remain in recession. The Company does not anticipate any worsening of the financial condition of its overall customer base, but believes that there may be further shakeouts of weaker carriers in economically troubled regions.

A growing concern arises from the fact that much of the recent growth in demand for regional aircraft in developing countries has arisen from mineral and natural resource exploitation operations by Chinese enterprises in these countries. A future, sustained major downturn in the Chinese domestic economy that reduces demand for imported raw materials could have a significant negative impact on the demand for business and regional aircraft in these developing countries, including in some of the markets in which the Company does, or seeks to do, business.

Furthermore, any further upheavals due to instability in the European Union ("EU") due to "Brexit" and potential future departures of other countries from the EU could have a negative impact on intra-European carriers and the current "open-sky" policies under which they operate freely within the EU. Losing open-sky flight rights could have a significant negative impact on the health of the Company's European lessees and, as a result, the financial performance and condition of the Company.

If a major flu outbreak occurs, international conflicts erupt into military hostilities, heightened visa requirements make international travel more difficult, or terrorist attacks involving aircraft or airports occur, passengers may avoid air travel altogether, and global air travel worldwide could be significantly affected. This would have an adverse impact on many of the Company's customers.

Airline reductions in capacity in response to lower passenger loads have resulted in reduced demand for aircraft and aircraft engines and a corresponding decrease in market lease rental rates and aircraft values for many aircraft types. This reduced market value could affect the Company's results if the market value of an asset or assets in the Company's portfolio falls below carrying value, and the Company determines that a write-down of the value on its balance sheet is appropriate. Furthermore, if older, expiring leases are replaced with leases at decreased lease rates, the lease revenue from the Company's existing portfolio is likely to decline, with the magnitude of the decline dependent on the length of the downturn and the depth of the decline in market rents.

Economic downturns can affect certain regions of the world more than others. As the Company's portfolio is not entirely globally diversified, a localized downturn in one of the key regions in which the Company leases assets could have a significant adverse impact on the Company. The Company's significant sources of operating lease revenue by region are summarized in "Outlook - Operating Segments," above.

International Risks. The Company leases assets in overseas markets. Leases with foreign lessees, however, may present different risks than those with domestic lessees. Most of the Company's expected growth is outside of North America.

A lease with a foreign lessee is subject to risks related to the economy of the country or region in which such lessee is located, which may be weaker than the U.S. economy. An economic downturn in a particular country or region may impact a foreign lessee's ability to make lease payments, even if the U.S. and other foreign economies remain stable.

Foreign lessees are subject to risks related to currency conversion fluctuations. Although the Company's current leases are all payable in U.S. dollars, the Company may agree in the future to leases that permit payment in foreign currency, which would subject such lease revenue to monetary risk due to currency fluctuations. In addition, if the Company undertakes certain obligations under a lease to contribute to a repair or improvement and if the work is performed in a foreign jurisdiction and paid for in foreign currency, currency fluctuations resulting in a weaker dollar between the time such agreement is made and the time payment for the work is made may result in an unanticipated increase in U.S. dollar-denominated cost for the Company.

Even with U.S. dollar-denominated lease payment provisions, the Company could still be affected by a devaluation of the lessee's local currency and a stronger U.S. dollar that would make it more difficult for a lessee to meet its U.S. dollar-denominated payments, increasing the risk of default of that lessee, particularly if its revenue is primarily derived in the local currency.

Foreign lessees that operate internationally may also face restrictions on repatriating foreign revenue to their home country. This could create a cash flow crisis for an otherwise profitable carrier, affecting its ability to meet its lease obligations. Foreign lessees may also face restrictions on payment of obligations to foreign vendors, including the Company, which may affect their ability to timely meet lease obligations to the Company.

Foreign lessees are not subject to U.S. bankruptcy laws, although there may be debtor protection similar to U.S. bankruptcy laws available in some jurisdictions. Certain countries do not have a central registration or recording system which can be used to locally record the Company's interest in equipment and related leases. This could make it more difficult for the Company to recover an aircraft in the event of a default by a foreign lessee. In any event, collection and enforcement may be more difficult and complicated in foreign countries.

Finally, ownership of a leased asset operating in a foreign country and/or by a foreign carrier may subject the Company to additional tax liabilities that are not present with aircraft operated in the United States. Depending on the jurisdiction, laws governing such tax liabilities may be complex, not well formed or not uniformly enforced. In such jurisdictions, the Company may decide to take an uncertain tax position based on the best advice of the local tax experts it engages, which position may be challenged by the taxing authority. If the taxing authority later assesses a liability, the Company may be required to pay penalties and interest on the assessed amount, which penalties and interest would not give rise to a corresponding foreign tax credit on the Company's U.S. tax return.

Interest Rate Risk. The Credit Facility carries a floating interest rate based upon short-term interest rate indices. Lease rates typically, but not always, move over time with interest rates, but market demand and numerous other asset-specific factors also affect lease rates. Because the Company's typical lease rates are fixed at lease origination, interest rate changes during the lease term have no effect on existing lease rental payments. Therefore, if interest rates rise significantly and there is relatively little lease origination by the Company following such rate increases, the Company could experience decreased net income as additional interest expense outpaces revenue growth. Further, even if significant lease origination occurs following such rate increases, other contemporaneous aircraft market forces may result in lower or flat rental rates, thereby decreasing net income.

Concentration of Lessees and Aircraft Type. For the month ended April 30, 2017, the Company's four largest customers accounted for a total of approximately 79% of the Company's monthly lease revenue. A lease default by or

collection problem with one or a combination of any of these significant customers could have a disproportionate negative impact on the Company's financial results and borrowing base under the Credit Facility, and, therefore, the Company's operating results are especially sensitive to any negative developments with respect to these customers in terms of lease compliance or collection. In addition, if the Company's revenues become overly concentrated in a small number of lessees, the Company could fail to comply with certain financial covenants in its Credit Facility related to customer concentration. In the event of any non-compliance that is not cured in the time permitted under the Credit Facility, the Company would need to seek waivers or amendment of the applicable covenants if such compliance failure is not timely cured. Any default under the Credit Facility, if not cured in the time permitted under the Credit Facility or waived by the lenders, could result in foreclosure upon any or all of the assets of the Company.

The Company's aircraft portfolio is currently focused on a small number of aircraft types and models compared to the variety of aircraft used in the commercial air carrier market. A change in the desirability and availability of any of the particular types and models of aircraft owned by the Company could affect valuations and future rental revenues of such aircraft, and would have a disproportionately significant impact on the Company's portfolio value. Such aircraft type concentration would diminish if the Company acquires assets of other types. Conversely, acquisition of additional aircraft of types currently owned by the Company will increase the Company's risks related to its concentration of those aircraft types.

Investment in New Aircraft Types. The Company intends to continue to focus solely on regional aircraft. Although the Company has traditionally invested in a limited number of types of turboprop aircraft, the Company has also acquired several types of regional jet aircraft, and may continue to seek acquisition opportunities for new types and models of aircraft used in the Company's targeted customer base of regional air carriers. Acquisition of aircraft types not previously acquired by the Company entails greater ownership risk due to the Company's lack of experience managing those assets. The Company believes, however, that the overall industry expertise of JMC's personnel and its technical resources should permit the Company to effectively manage such new aircraft types. Further, the broadening of the asset types in the aircraft portfolio may have a benefit of diversifying the Company's portfolio (see "Factors That May Affect Future Results – Concentration of Lessees and Aircraft Type," above).

Engine Leasing Risk. Because the Company believes that engine leasing, absent a long-term triple net lease, is inherently riskier than aircraft leasing, the Company does not focus on this segment. The Company, however, currently has three engines in its portfolio, making up 3% of the Company's total net book value of aircraft and aircraft engines held for lease. The Company may from time to time lease one or more of these engines to lessees under industry standard short-term engine leases that place the risk of an engine failure not caused by lessee negligence or foreign object damage upon the lessor. It is not economically practicable for an engine lessor to insure against that risk. If an engine failure occurs and is not covered by a manufacturer's warranty or is not otherwise caused by circumstances that the lessee is required to cover, the Company's investment in the engine could be a significant loss or the Company might incur a significant maintenance expense.

Reliance on JMC. All management of the Company is performed by JMC under a Management Agreement between the Company and JMC that expires in August of 2025 and provides for an asset-based management fee. JMC is not a fiduciary of the Company or its stockholders. The Company's Board of Directors (the "Board") has ultimate control and supervisory responsibility over all aspects of the Company and owes fiduciary duties to the Company and its stockholders. The Board has no control over the internal operations of JMC, but the Board does have the ability and responsibility to manage the Company's relationship with JMC and the performance of JMC's obligations to the Company under the Management Agreement, as it would have for any third party service provider to the Company. While JMC may not owe any fiduciary duties to the Company by virtue of the Management Agreement, all of the officers of JMC are also officers of the Company, and in that capacity owe fiduciary duties to the Company and its stockholders. In addition, an officer of the Company holds significant ownership positions in the Company and JHC, the parent company of JMC, and JHC is the Company's largest shareholder. Therefore, the economic interests of the Company should be aligned with the interests of JHC and JMC, and JMC should have substantial incentive to make financial decisions as the management company for the Company that are in the best interests of the Company.

The Management Agreement may be terminated if JMC defaults on its obligations to the Company. However, the agreement provides for liquidated damages in the event of its wrongful termination by the Company. A director of the Company is also a director of JMC and, as discussed above, the officers of the Company are also officers of JMC, and one such officer holds significant ownership positions in both the Company and JHC, the holding company for JMC. Consequently, the director and officers of JMC may have a conflict of interest in the event of a dispute between the Company and JMC. Although the Company has taken steps to prevent conflicts of interest arising from such dual roles, such conflicts may still occur.

Management Fee Structure. All decisions regarding acquisitions and disposal of aircraft from the Company's portfolio are made by JMC. JMC is paid a management fee based on the net asset value of the Company's portfolio. It may also receive a one-time asset acquisition fee upon purchase of an asset by the Company, and a one-time remarketing fee in connection with the sale or re-lease of an asset. Optimization of the results of the Company depends on timing of the acquisition, lease yield on the acquired assets, and re-lease or sale of its portfolio assets. Under the current management fee structure, a larger volume of acquisitions generates acquisition fees and also increases the periodic management fee by increasing the size of the aircraft portfolio. Since the Company's current business strategy involves continued growth of its portfolio, with the intention to buy and hold assets until the appropriate time to sell them, a compensation structure that results in greater compensation with an increased portfolio size is consistent with

that strategy. The compensation structure does, nonetheless, create a situation where a decision by JMC for the Company to forego an asset transaction deemed to be an unacceptable business risk due to the lessee or the aircraft type is in conflict with JMC's own short-term pecuniary interest. As a result, the compensation structure could act to incent greater risk-taking by JMC in asset acquisition decision-making. However, because JMC's sole business and source of revenue arises from and is expected to continue arising from acting as the management company for the Company, the long-term financial health and viability of the Company are important to JMC's own long-term health and viability. Therefore, in assessing risk-taking in the Company's acquisition transactions, JMC's and the Company's motivations are closely aligned, as JMC is incented to make asset acquisitions that are expected to contribute to the long-term viability of the Company. In addition, the Company has established objective target guidelines for yields on acquired assets and the Company's Board, including a majority of the outside independent directors, must approve any acquisition that involves a new asset type. While the Company currently believes the foregoing are effective mitigating factors against undue compensation-incented risk-taking by JMC, there is no assurance that such mechanisms can entirely and effectively eliminate such risk.

Government Regulation. There are a number of areas in which government regulation may result in costs to the Company. These include aircraft registration safety requirements, required equipment modifications, maximum aircraft age, and aircraft noise requirements. Although it is contemplated that the burden and cost of complying with such requirements will fall primarily upon lessees, there can be no assurance that the cost will not fall on the Company. Furthermore, future government regulations could cause the value of any non-complying equipment owned by the Company to decline substantially.

Casualties, Insurance Coverage. The Company, as owner of transportation equipment, may be named in a suit claiming damages for injuries or damage to property caused by its assets. As a triple-net lessor, the Company is generally protected against such claims, since the lessee would be responsible for, insure against and indemnify the Company for such claims. A "triple net lease" is a lease under which, in addition to monthly rental payments, the lessee is generally responsible for the taxes, insurance and maintenance and repair of the aircraft arising from the use and operation of the aircraft during the term of the lease. Although the United States Aviation Act may provide some protection with respect to the Company's aircraft assets, it is unclear to what extent such statutory protection would be available to the Company with respect to its assets that are operated in foreign countries where such provisions of the United States Aviation Act may not apply.

The Company's leases generally require a lessee to insure against likely risks of loss or damage to the leased asset, and liability to passengers and third parties pursuant to industry standard insurance policies and require lessees to provide insurance certificates documenting the policy periods and coverage amounts. The Company tracks receipt of the certificates and calendars their expiration dates. Prior to the expiration of an insurance certificate, if a replacement certificate has not been received, the Company reminds the lessee of its obligation to provide current insurance certificates to avoid a default under the lease.

Despite these requirements and procedures, there may be certain cases where the loss is not entirely covered by the lessee or its insurance. The possibility of such an event is remote, but any such uninsured loss with respect to the equipment or insured loss for which insurance proceeds are inadequate might result in a loss of invested capital in and any profits anticipated from, such equipment, as well as a potential claim directly against the Company.

Compliance with Future Environmental Regulations. Compliance with future environmental regulations may harm the Company's business. Many aspects of aircraft operations are subject to increasingly stringent environmental regulations, and growing concerns about climate change may result in the imposition by the U.S and foreign governments of additional regulation of carbon emissions, aimed at either requiring adoption of technology to reduce the amount of carbon emissions or putting in place a fee or tax system on carbon emitters. It is likely that any such regulation will be directed at the Company's customers, as operators of aircraft, or at the Company, as owners of aircraft. Under the Company's triple-net lease arrangements, the Company would likely shift responsibility for compliance to its lessees, but there might be some costs of regulation that the Company could not shift and would itself have to bear. Although it is not expected that the costs of complying with current environmental regulations will have a material adverse effect on the Company's financial position, results of operations, or cash flows, no assurance can be given that the costs of complying with environmental regulations adopted in the future will not have such an effect.

Cyber-Security Risks. The Company believes that it has sufficient cyber-security measures in place commensurate with the risks to the Company of a successful cyber-attack or breach of security. The Company believes that its main vulnerability to a cyber-attack would be interruption of the Company's email communications internally and with third parties, loss of customer and lease archives, and loss of document sharing between the Company's offices and remote workers. Such an attack could temporarily impede the efficiency of the Company's operations; however, the Company believes that sufficient replacement mechanisms exist in the event of such an interruption that there would not be a material adverse financial impact on the Company's business.

Possible Volatility of Stock Price. The market price of the Company's common stock is subject to fluctuations following developments relating to the Company's operating results, changes in general conditions in the economy, the financial markets, the airline industry, changes in accounting principles or tax laws applicable to the Company or its lessees, or other developments affecting the Company, its customers or its competitors, or arising from other investor sentiment unknown to the Company. Because the Company has a relatively small capitalization of approximately 1.4 million shares outstanding, there is a correspondingly limited amount of trading and float of the Company's shares. Consequently, the Company's stock price is more sensitive to a single large trade or a small number of simultaneous trades along the same trend than a company with larger capitalization and higher trading volume and float.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

This report does not include information described under Item 305 of Regulation S-K pursuant to the rules of the Securities and Exchange Commission that permit "smaller reporting companies" to omit such information.

Item 4. Controls and Procedures.

CEO and CFO Certifications. Attached as exhibits to this Quarterly Report on Form 10-Q (the "Report") are certifications of the Company's Chief Executive Officer (the "CEO") and the Company's Chief Financial Officer (the "CFO"), which are required pursuant to Section 302 of the Sarbanes-Oxley Act of 2002 (the "Section 302 Certifications"). This section of the Report includes information concerning the evaluation of disclosure controls and procedures referred to in the Section 302 Certifications and this should be read in conjunction with the Section 302 Certifications for a more complete understanding of the topics presented.

Evaluation of the Company's Disclosure Controls and Procedures. Disclosure controls and procedures ("Disclosure Controls") are controls and other procedures that are designed to ensure that information required to be disclosed in the Company's reports filed under the Securities Exchange Act of 1934, such as this Report, is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission and that such information is accumulated and communicated to the Company's management, including the CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure.

The Company's management, with the participation of the CEO and CFO, evaluated the effectiveness of the design and operation of the Company's Disclosure Controls and concluded that the Company's Disclosure Controls were effective as of March 31, 2017.

Changes in Internal Control Over Financial Reporting. No change in the Company's internal control over financial reporting occurred during the fiscal quarter ended March 31, 2017 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II
OTHER INFORMATION

Item 6. Exhibits

Exhibit Number	Description
10.31	Exchange Agreement between Lee G. Beaumont and the Company, dated March 21, 2017, incorporated by reference to Exhibit 10.1 to the Report on Form 8-K filed by the Company with the Securities and Exchange Commission ("SEC") on March 22, 2017
10.32	Securities Purchase Agreement between Lee G. Beaumont and the Company, dated March 22, 2017, incorporated by reference to Exhibit 10.2 to the Report on Form 8-K filed by the Company with the SEC on March 22, 2017
10.33	Third Modification Agreement to Second Amended and Restated Loan and Security Agreement between the Company and MUFG Union Bank as Agent and lender ("MUFG"), California Bank and Trust, Umpqua Bank and U.S. Bank National Association, dated March 22, 2017, incorporated by reference to Exhibit 10.3 to the Report on Form 8-K filed by the Company with the SEC on March 22, 2017
31.1	Certification of Michael G. Magnusson, Chief Executive Officer, pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
31.2	Certification of Toni M. Perazzo, Chief Financial Officer, pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
32.1*	Certification of Michael G. Magnusson, Chief Executive Officer, pursuant to Section 906 of the Sarbanes-Oxley Act of 2002
