ADDITIONAL TERMS OF THE NOTES

Calculation of the Interest Rate for the Notes. The interest rate for the Notes being offered by this Pricing Supplement for each Interest Period during the term of the Notes will be the 2 Year CMT Rate, described below, determined as of the applicable Interest Determination Date and published by the U.S. Federal Reserve under the heading H. 15(519) in the Statistical Release. In no case, however, will the interest rate for the Notes during any Interest Period be less than the Minimum Interest Rate nor more than the Maximum Interest Rate listed on page 1 of this Pricing Supplement.

2 Year CMT Rate. The 2 Year CMT Rate refers to the Treasury Constant Maturity Rate with an Index Maturity of Two Years displayed by the U.S. Federal Reserve Board on the Federal Reserve's website at <http://www.federalreserve.gov/releases/h15/update> or on Telerate page 7051 or on Bloomberg at ALLX H15T <GO>, by 3:00 p.m. New York City time, on the relevant Interest Determination Date. If the Treasury Constant Maturity Rate with an Index Maturity of Two Years cannot be determined as described in the preceding sentence, such rate will be determined in accordance with the procedures set forth in the prospectus supplement for the Notes relating to determination of the CMT Rate, without regard to any Designated CMT Telerate Page.

Rounding. All values used in the interest rate formula for the Notes will be rounded to the nearest fifth decimal place (one-one hundred thousandth of a percentage point), rounding upwards if the sixth decimal place is five or greater (e.g., 9.876555% (or .09876555) would be rounded up to 9.87656% (or .0987656) and 9.876554% (or .09876554) would be rounded down to 9.87655% (or .0987655)). All percentages resulting from any calculation of the interest rate will be rounded to the nearest third decimal place (one thousandth of a percentage point), rounding upwards if the fourth decimal place is five or greater (e.g., 9.8765% (or .098765) would be rounded up to 9.877% (or .09877) and 9.8764% (or .098764) would be rounded down to 9.876% (or .09876)). All dollar amounts used in or resulting from such calculation on the Notes will be rounded to the nearest cent (with one-half cent being rounded upward).
