**Notes to Consolidated Financial Statements**

**(Unaudited)**

**(1) Basis of Presentation**

The accompanying unaudited consolidated financial statements of Territorial Bancorp Inc. have been prepared in accordance with U.S. generally accepted accounting principles ( GAAP ) for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, certain information and footnote disclosures normally included in financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to such rules and regulations. These interim condensed consolidated financial statements and notes should be read in conjunction with Territorial Bancorp Inc.'s consolidated financial statements and notes thereto filed as part of the Annual Report on Form 10-K for the year ended December 31, 2012. In the opinion of management, all adjustments necessary for a fair presentation have been made and include all normal recurring adjustments. Interim results of operations are not necessarily indicative of results to be expected for the year.

**(2) Organization**

On November 4, 2008, the Board of Directors of Territorial Mutual Holding Company approved a plan of conversion and reorganization under which the Company would convert from a mutual holding company to a stock holding company. The conversion to a stock holding company was approved by the depositors and borrowers of Territorial Savings Bank and the Office of Thrift Supervision (OTS) and included the filing of a registration statement with the U.S. Securities and Exchange Commission. Upon the completion of the conversion and reorganization on July 10, 2009, Territorial Mutual Holding Company and Territorial Savings Group, Inc. ceased to exist as separate legal entities and Territorial Bancorp Inc. became the holding company for Territorial Savings Bank. A total of 12,233,125 shares were issued in the conversion at \$10 per share, raising \$122.3 million of gross proceeds. \$3.7 million of conversion expenses were offset against the gross proceeds. Territorial Bancorp Inc.'s common stock began trading on the NASDAQ Global Select Market under the symbol TBNK on July 13, 2009.

Upon completion of the conversion and reorganization, a special liquidation account was established in an amount equal to the total equity of Territorial Mutual Holding Company as of December 31, 2008. The liquidation account is to provide eligible account holders and supplemental eligible account holders who maintain their deposit accounts with Territorial Savings Bank after the conversion with a liquidation interest in the unlikely event of the complete liquidation of Territorial Savings Bank after the conversion. The liquidation account will be reduced annually to the extent that eligible account holders and supplemental eligible account holders have reduced their qualifying deposits. Subsequent increases will not restore an eligible account holder's or supplemental eligible account holder's interest in the liquidation account. In the event of a complete liquidation of Territorial Savings Bank, and only in such event, each account holder will be entitled to receive a distribution from the liquidation account in an amount proportionate to the adjusted qualifying account balances then held.

**(3) Recently Adopted Accounting Pronouncements**

## Edgar Filing: Territorial Bancorp Inc. - Form 10-Q

In June 2011, the Financial Accounting Standards Board (FASB) amended the Comprehensive Income topic of the FASB Accounting Standards Codification (ASC). The amendment eliminated the option of presenting components of other comprehensive income as part of the statement of changes in stockholders' equity. Nonowner changes in stockholders' equity must be presented either in a continuous statement of comprehensive income or in two separate but consecutive statements. The amendment was effective for interim or annual periods beginning after December 15, 2011, with early

Table of Contents

adoption permitted. In December 2011, the FASB deferred the effective date of the part of this amendment requiring reclassifications out of accumulated other comprehensive income to be shown on the face of the financial statements to allow time for further deliberation. Until final reporting requirements were effective, previous disclosure requirements would remain in effect. The Company adopted this amendment on January 1, 2012, and other than the location of disclosures related to other comprehensive income, the adoption did not have a material effect on its consolidated financial statements. In February 2013, the FASB finalized the reporting requirements for reclassifications out of accumulated other comprehensive income. When an amount reclassified out of accumulated other comprehensive income is required to be reported in net income in its entirety, the effect on income statement items must be disclosed. When an amount reclassified out of accumulated other comprehensive income is not required to be reported in net income in its entirety in the same period, cross references to other required disclosures providing information about the transaction are required. This amendment was effective for reporting periods beginning after December 15, 2012. The Company adopted this amendment on January 1, 2013 and the adoption did not have a material effect on its consolidated financial statements.

In December 2011, the FASB amended the Balance Sheet topic of the FASB ASC. The amendment requires disclosures about the gross and net information related to instruments and transactions eligible for offset in the statement of financial position. The disclosures are meant to assist users of financial statements to more easily compare information that is presented based on the differing offsetting requirements of U.S. generally accepted accounting principles and International Financial Reporting Standards. In January 2013, the FASB issued a clarification that stated the amendment applies only to certain derivatives, repurchase and reverse repurchase agreements, and securities borrowing and securities lending transactions that are either offset or subject to an enforceable master netting arrangement or similar agreement. The amendment was effective for interim and annual periods beginning on or after January 1, 2013. The Company adopted this amendment on January 1, 2013 and the adoption did not have a material effect on its consolidated financial statements.

## Table of Contents

During the three months ended June 30, 2013 and 2012, all sales were related to \$14.5 million and \$2.8 million, respectively, of held-to-maturity debt securities. During the six months ended June 30, 2013 and 2012, all sales were related to \$27.3 million and \$4.3 million, respectively, of held-to-maturity debt securities. The sale of these securities, for which the Company had already collected a substantial portion of the outstanding principal (at least 85%), is in accordance with the Investment topic of the FASB ASC and will not affect the historical cost basis used to account for the remaining securities in the held-to-maturity portfolio.

Investment securities with carrying values of \$227.3 million and \$221.3 million at June 30, 2013 and December 31, 2012, respectively, were pledged to secure public deposits, securities sold under agreements to repurchase and transaction clearing accounts.

Provided below is a summary of investment securities which were in an unrealized loss position at June 30, 2013 and December 31, 2012. The Company does not intend to sell these securities until such time as the value recovers or the securities mature and it is not more likely than not that the Company will be required to sell the securities prior to recovery of value or the securities mature.

**Mortgage-Backed Securities.** The unrealized losses on the Company's investment in mortgage-backed securities were caused by increases in market interest rates. All of the mortgage-backed securities are guaranteed by Freddie Mac or Fannie Mae, which are U.S. government-sponsored enterprises, or Ginnie Mae, which is a U.S. government agency. Since the decline in market value is attributable to changes in interest rates and not credit quality, and the Company does not intend to sell these investments until maturity and it is not more likely than not that the Company will be required to sell such investments prior to recovery of its amortized cost basis, the Company does not consider these investments to be other-than-temporarily impaired as of June 30, 2013 and December 31, 2012.

**Trust Preferred Securities.** At June 30, 2013, the Company owns two trust preferred securities, PreTSL XXIII and XXIV. The trust preferred securities represent investments in a pool of debt obligations issued primarily by holding companies for Federal Deposit Insurance Corporation-insured financial institutions. Both of these securities are classified in the Bank's held-to-maturity investment portfolio.

The trust preferred securities market is considered to be inactive as only three transactions have occurred over the past 18 months in the same tranche of securities owned by the Company. The Company used a discounted cash flow model to determine whether these securities are other-than-temporarily impaired. The assumptions used in preparing the discounted cash flow model include the following: estimated discount rates, estimated deferral and default rates on collateral, and estimated cash flows.

Based on the Company's review, the Company's investment in trust preferred securities did not incur additional impairment during the quarter ending June 30, 2013.

## Table of Contents

PreTSL XXIV has a book value of \$0. PreTSL XXIII has a book value of \$536,000. The difference between the book value of \$536,000 and the remaining amortized cost basis of \$1.1 million is reported as other comprehensive loss and is related to noncredit factors such as the trust preferred securities market being inactive.

It is reasonably possible that the fair values of the trust preferred securities could decline in the near term if the overall economy and the financial condition of some of the issuers continue to deteriorate and the liquidity of these securities remains low. As a result, there is a risk that the Company's remaining amortized cost basis of \$1.1 million on its trust preferred securities could be credit-related other-than-temporarily impaired in the near term. The impairment could be material to the Company's consolidated statements of income.

Table of Contents

In 2012, the Company enhanced its methodology for reviewing its loan portfolio when calculating the general portion of the allowance for loan losses. The modification consisted of additional segmentation of the residential mortgage loan portfolio by items such as year of origination, loan-to-value ratios, owner or nonowner occupancy status and the purpose of the loan (purchase, cash-out refinance, no cash-out refinance or construction). As under our prior methodology, the allowance for loan loss for each segment of the loan portfolio is determined by calculating the historical loss of each segment for a two- to three-year look-back period and adding a qualitative adjustment for the following factors:

- Changes in lending policies and procedures;
- Changes in economic trends;
- Changes in types of loans in the loan portfolio;
- Changes in experience and ability of personnel in the loan origination and loan servicing departments;
- Changes in the number and amount of delinquent loans and classified assets;
- Changes in our internal loan review system;
- Changes in the value of underlying collateral for collateral dependent loans;
- Changes in any concentrations of credit; and
- External factors such as competition, legal and regulatory requirements on the level of estimated credit losses in the existing loan portfolio.

The Company also revised the qualitative factors that were used to determine the allowance for loan losses on construction, commercial and other mortgage loans, home equity loans and lines of credit and consumer and other loans. As a result of these modifications, the Company increased the portion of the allowance for loan losses attributable to construction, commercial and other mortgage loans and decreased the portion of the allowance for loan losses attributable to residential mortgages, home equity loans and lines of credit and consumer and other loans. The allocation of a portion of the allowance to one category of loans does not preclude its availability to absorb losses in other categories. The unallocated allowance is established for probable losses that have been incurred as of the reporting date but are not reflected in the allocated allowance.

Management considers the allowance for loan losses at June 30, 2013 to be at an appropriate level to provide for probable losses that can be reasonably estimated based on general and specific conditions. While the Company uses the best information it has available to make evaluations, future adjustments to the allowance may be necessary if conditions differ substantially from the information used in making the evaluations. To the extent actual outcomes differ from the estimates, additional provisions for credit losses may be required that would reduce future earnings. In addition, as an integral part of their examination process, the Office of the Comptroller of the Currency will periodically review the allowance for loan losses. The Office of the Comptroller of the Currency may require the Company to increase the allowance based on their analysis of information available at the time of their examination.

The Company primarily uses the aging of loans and accrual status to monitor the credit quality of its loan portfolio. When a mortgage loan becomes seriously delinquent (90 days or more contractually past due), it displays weaknesses that may result in a loss. As a loan becomes more delinquent, the likelihood of the borrower repaying the loan decreases and the loan becomes more collateral-dependent. A mortgage loan becomes collateral-dependent when the proceeds for repayment can be expected to come only from the sale or operation of the collateral and not from borrower repayments. Generally, appraisals are obtained after a loan becomes collateral-dependent or is five months delinquent. The carrying value of collateral-dependent loans is adjusted to the fair value of the collateral less selling costs. Any commercial real estate, commercial, construction or equity loan that has a loan balance in excess of a specified amount is also periodically reviewed to determine whether the loan exhibits any weaknesses and is performing in accordance with its contractual terms.

The Company had 19 nonaccrual loans with a book value of \$5.4 million at June 30, 2013 and 19 nonaccrual loans with a book value of \$4.4 million as of December 31, 2012. The Company collected interest on nonaccrual loans of \$77,000 during the six months ended June 30, 2013, but due to regulatory requirements, we recorded it as a reduction of principal. The Company collected and recognized interest

There were no new troubled debt restructurings within the past 12 months that subsequently defaulted.

The Company had 20 troubled debt restructurings totaling \$5.7 million as of June 30, 2013 that were considered to be impaired. This total included 19 one- to four-family residential mortgage loans totaling \$5.5 million and one home equity loan for \$162,000. Eight of the loans, totaling \$2.5 million, are performing in accordance with their restructured terms and accruing interest at June 30, 2013. 11 of the loans, totaling \$2.9 million, are performing in accordance with their restructured terms but not accruing interest at June 30, 2013. One of the loans, for \$329,000, is more than 150 days delinquent and not accruing interest as of June 30, 2013. There were 20 troubled debt restructurings totaling \$5.2 million as of December 31, 2012 that were considered to be impaired. This total included 19 one- to four-family residential mortgage loans totaling \$5.1 million and one home equity loan for \$160,000. Eight of the loans, totaling \$2.5 million, are performing in accordance with their restructured terms and accruing interest at December 31, 2012. 11 of the loans, totaling \$2.4 million, are performing in accordance with their restructured terms but not accruing interest at December 31, 2012. One of the loans, for \$329,000, is more than 150 days delinquent and not accruing interest at December 31, 2012. Restructurings include deferrals of interest and/or principal payments and temporary or permanent reductions in interest rates due to the financial difficulties of the borrowers. We have no commitments to lend any additional funds to these borrowers.

Nearly all of our real estate loans are collateralized by real estate located in the State of Hawaii. Loan-to-value ratios on these real estate loans generally do not exceed 80% at the time of origination.

During the six months ended June 30, 2013 and 2012, the Company sold \$47.1 million and \$46.2 million, respectively, of mortgage loans held for sale and recognized gains of \$1.0 million and \$847,000, respectively. During the three months ended June 30, 2013 and 2012, the Company sold \$22.3 million and \$22.3 million, respectively, of mortgage loans held for sale and recognized gains of \$380,000 and \$406,000, respectively. The Company had 10 loans held for sale totaling \$3.0 million at June 30, 2013 and six loans held for sale totaling \$2.2 million at December 31, 2012.

## Table of Contents

The Company serviced loans for others of \$75.2 million at June 30, 2013 and \$84.8 million at December 31, 2012. Of these amounts, \$3.6 million and \$5.1 million relate to securitizations for which the Company continues to hold the related mortgage-backed securities at June 30, 2013 and December 31, 2012, respectively. The amount of contractually specified servicing fees earned for the six-month periods ended June 30, 2013 and 2012 was \$113,000 and \$145,000, respectively. The amount of contractually specified servicing fees earned for the three-month periods ended June 30, 2013 and 2012 was \$55,000 and \$73,000, respectively. The fees are reported in service fees on loan and deposit accounts in the consolidated statements of income.

### (7) Securities Sold Under Agreements to Repurchase

Securities sold under agreements to repurchase are treated as financings and the obligations to repurchase the identical securities sold are reflected as a liability with the dollar amount of securities underlying the agreements remaining in the asset accounts. Securities sold under agreements to repurchase are summarized as follows:

(Dollars in thousands)	June 30, 2013		December 31, 2012

Total	\$ 65,000	2.87%	\$ 70,000	2.86%

During the quarter ended June 30, 2012, the Company prepaid \$15.0 million of securities sold under agreements to repurchase and incurred a \$198,000 prepayment penalty.

Below is a summary comparing the carrying value and fair value of securities pledged to secure repurchase agreements, the repurchase liability, and the amount at risk at June 30, 2013. The amount at risk is the greater of the carrying value or fair value over the repurchase liability. All the agreements to repurchase are with JP Morgan Securities and the securities pledged are issued and guaranteed by U.S. government-sponsored enterprises.

**(9) Employee Benefit Plans**

The Company has a noncontributory defined benefit pension plan (Pension Plan) that covers substantially all employees with at least one year of service. Effective December 31, 2008, under approved changes to the Pension Plan, there were no further accruals of benefits for any participants and benefits will not increase with any additional years of service. Net periodic benefit cost, subsequent to December 31, 2008, has not been significant and is not disclosed in the table below.

In addition, the Company sponsors a Supplemental Employee Retirement Plan (SERP), a noncontributory supplemental retirement benefit plan, which covers certain current and former employees of the Company for amounts in addition to those provided under the Pension Plan.

The components of net periodic benefit cost were as follows:

(Dollars in thousands)	SERP Three Months Ended June 30,		SERP Six Months Ended June 30,

## Edgar Filing: Territorial Bancorp Inc. - Form 10-Q

Effective January 1, 2009, Territorial Savings Bank adopted an Employee Stock Ownership Plan (ESOP) for eligible employees. The ESOP borrowed \$9.8 million from the Company and used those funds to acquire 978,650 shares, or 8%, of the total number of shares issued by the Company in its initial public offering. The shares were acquired at a price of \$10.00 per share.

## Table of Contents

The loan is secured by the shares purchased with the loan proceeds and will be repaid by the ESOP over the 20-year term of the loan with funds from Territorial Savings Bank's contributions to the ESOP and dividends payable on the shares. The interest rate on the ESOP loan is an adjustable rate equal to the prime rate, as published in The Wall Street Journal. The interest rate adjusts annually and will be the prime rate on the first business day of the calendar year.

Shares purchased by the ESOP are held by a trustee in an unallocated suspense account, and shares are released annually from the suspense account on a pro-rata basis as principal and interest payments are made by the ESOP to the Company. The trustee allocates the shares released among participants on the basis of each participant's proportional share of compensation relative to all participants. As shares are committed to be released from the suspense account, Territorial Savings Bank reports compensation expense based on the average fair value of shares released with a corresponding credit to stockholders' equity. The shares committed to be released are considered outstanding for earnings per share computations. Compensation expense recognized for the three months ended June 30, 2013 and 2012 amounted to \$261,000 and \$248,000, respectively. Compensation expense recognized for the six months ended June 30, 2013 and 2012 amounted to \$523,000 and \$488,000, respectively.

Shares held by the ESOP trust were as follows:

	June 30, 2013	December 31, 2012
Allocated shares	215,058	191,577
Unearned shares	758,455	782,921
Total ESOP shares	973,513	974,498
Fair value of unearned shares, in thousands	\$ 17,149	\$ 17,890

The ESOP restoration plan is a nonqualified plan that provides supplemental benefits to certain executives who are prevented from receiving the full benefits contemplated by the employee stock ownership plan's benefit formula. The supplemental cash payments consist of payments representing shares that cannot be allocated to the participants under the ESOP due to IRS limitations imposed on tax-qualified plans. We accrue for these benefits over the period during which employees provide services to earn these benefits. For the three months ended June 30, 2013 and 2012, we accrued \$31,000 and \$18,000, respectively, for the ESOP restoration plan. For the six months ended June 30, 2013 and 2012, we accrued \$120,000 and \$104,000, respectively, for the ESOP restoration plan.

## (11) Share-Based Compensation

On August 19, 2010, Territorial Bancorp Inc. adopted the 2010 Equity Incentive Plan, which provides for awards of stock options and restricted stock to key officers and outside directors. In accordance with the Compensation - Stock Compensation topic of the FASB ASC, the cost of the 2010 Equity Incentive Plan is based on the fair value of the awards on the grant date. The fair value of restricted stock is based on the closing price of the Company's stock on the grant date. The fair value of stock options is estimated using a Black-Scholes option pricing model using assumptions for dividend yield, stock price volatility, risk-free interest rate and option term. These assumptions are based on our judgments regarding future events, are subjective in nature, and cannot be determined with precision. The cost of the awards will be recognized on a straight-line basis over the five- to six-year vesting period during which participants are required to provide services in exchange for the awards.

# Edgar Filing: Territorial Bancorp Inc. - Form 10-Q

## Table of Contents

The Company recognized compensation expense, measured as the fair value of the share-based award on the date of grant, on a straight-line basis over the vesting period. Share-based compensation is recorded in the statement of income as a component of salaries and employee benefits with a corresponding increase in shareholders' equity. The table below presents information on compensation expense and the related tax benefit for all share-based awards:

(In thousands)	For the Three Months Ended June 30,		For the Six Months Ended June 30,	
	2013	2012	2013	2012
Compensation expense	\$ 667	\$ 660	\$ 1,327	\$ 1,323
Income tax benefit	314	386	652	722

Shares of our common stock issued under the 2010 Equity Incentive Plan shall be authorized but unissued shares. The maximum number of shares that will be awarded under the plan will be 1,712,637 shares.

## *Stock Options*

The table below presents the stock option activity for the six months ended June 30, 2013 and 2012:

## Table of Contents

The following summarizes certain stock option activity of the Company:

(In thousands)	For the Three Months Ended June 30,				For the Six Months Ended June 30,			
	2013		2012		2013		2012	
Intrinsic value of stock options exercised	\$	0	\$	117	\$	0	\$	171

Tax benefits realized from stock options exercised		0		47		0		69
Total fair value of stock options that vested		0		0		0		0

As of June 30, 2013, the Company had \$2.2 million of unrecognized compensation costs related to the stock option plan. The cost of the stock option plan is being amortized over the five- to six-year vesting period. The fair value of the Company's stock options was determined using the Black-Scholes option pricing formula. The following assumptions were used in the formula for options issued in 2012 and 2010:

	2012	2010
Expected volatility	35.82%	31.98%
Risk-free interest rate	1.27%	2.58%
Expected dividends	1.86%	1.61%
Expected life (in years)	6.50	6.75
Grant price for the stock options	\$ 23.62	\$ 17.36

*Expected volatility* - Based on the historical volatility of the Company's stock and a peer group of comparable thrifts.

*Risk-free interest rate* - Based on the U.S. Treasury yield curve and expected life of the options at the time of grant.

*Expected dividends* - Based on the quarterly dividend and the price of the Company's stock at the time of grant.

*Expected life* - Based on a weighted-average of the five- or six-year vesting period and the 10-year contractual term of the stock option plan.

*Grant price for the stock options* - Based on the closing price of the Company's stock at the time of grant.

There were no options granted in 2011 or the six months ended June 30, 2013.

## ***Restricted Stock Awards***

Restricted stock awards are accounted for as fixed grants using the fair value of the Company's stock at the time of grant. Unvested restricted stock awards may not be disposed of or transferred during the vesting period. Restricted stock awards carry with them the right to receive dividends.

# Table of Contents

The table below presents the restricted stock award activity:

**(14) Fair Value of Financial Instruments**

In accordance with the Fair Value Measurements and Disclosures topic of the FASB ASC, the Company groups its financial assets and liabilities at fair value into three levels based on the markets in which the financial assets and liabilities are traded and the reliability of the assumptions used to determine fair value as follows:

- **Level 1** Valuation is based upon quoted prices (unadjusted) for identical assets or liabilities traded in active markets. A quoted price in an active market provides the most reliable evidence of fair value and shall be used to measure fair value whenever available.
  
- **Level 2** Valuation is based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.
  
- **Level 3** Valuation is generated from model-based techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect management's own estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques include use of discounted cash flow models and similar techniques that require the use of significant judgment or estimation.

In accordance with the Fair Value Measurements and Disclosures topic, the Company bases its fair values on the price that it would expect to receive if an asset were sold or the price that it would expect to pay to transfer a liability in an orderly transaction between market participants at the measurement date. Also as required, the Company maximizes the use of observable inputs and minimizes the use of unobservable inputs when developing fair value measurements.

The Company uses fair value measurements to determine fair value disclosures. Investment securities held for sale and derivatives are recorded at fair value on a recurring basis. From time to time, the Company may be required to record other financial assets at fair value on a nonrecurring basis, such as loans held for sale, impaired loans and investments, and mortgage servicing assets. These nonrecurring fair value adjustments typically involve application of the lower of cost or fair value accounting or write-downs of individual assets.

***Cash and Cash Equivalents, Accrued Interest Receivable, Accounts Payable and Accrued Expenses, Current Income Taxes Payable, and Advance Payments by Borrowers for Taxes and Insurance.*** The carrying amount approximates fair value because of the short maturity of these instruments.

***Investment Securities.*** The estimated fair values of U.S. government-sponsored mortgage-backed securities are considered Level 2 inputs because the valuation for investment securities utilized pricing models that varied based on asset class and included trade, bid and other observable market information.

The trust preferred securities represent investments in a pool of debt obligations issued primarily by holding companies for Federal Deposit Insurance Corporation-insured financial institutions. The trust preferred securities market is considered to be inactive since there have been only three sales transactions of similar rated securities over the past 18 months and no new issues of pooled trust preferred securities have occurred since 2007. The fair value of our trust preferred securities was determined using a discounted cash flow model. Our model used a discount rate equal to three-month LIBOR plus 20.00% and provided a fair value estimate of \$15.13 per \$100 of par value for PreTSL XXIII.

Table of Contents

The discounted cash flow analysis included a review of all issuers within the pool. The fair value of the trust preferred securities are classified as Level 3 inputs because they are based on discounted cash flow models.

**FHLB Stock.** FHLB stock, which is redeemable for cash at par value, is reported at its par value.

**Loans.** The fair value of loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities. The fair value of loans is not based on the concept of exit price.

**Loans Held for Sale.** The fair value of loans held for sale is determined based on the prices quoted in the secondary market for similar loans.

**Deposits.** The fair value of checking and Super NOW savings accounts, passbook accounts, and certain money market deposits is the amount payable on demand at the reporting date. The fair value of fixed-maturity certificates of deposit is estimated by discounting future cash flows using the rates currently offered for deposits with similar remaining maturities.

**Advances from the FHLB and Securities Sold Under Agreements to Repurchase.** Fair value is estimated by discounting future cash flows using the rates currently offered to the Company for debt with similar remaining maturities.

**Interest Rate Contracts.** The Company may enter into interest rate lock commitments with borrowers on loans intended to be sold. To manage interest rate risk on the lock commitments, the Company may also enter into forward loan sale commitments. The interest rate lock commitments and forward loan sale commitments are treated as derivatives and are recorded at their fair value determined by referring to prices quoted in the secondary market for similar contracts. Interest rate contracts that are classified as assets are included with prepaid expenses and other assets on the consolidated balance sheet while interest rate contracts that are classified as liabilities are included with accounts payable and accrued expenses.

## Table of Contents

The table below presents the balance of assets and liabilities measured at fair value on a recurring basis:

(Dollars in thousands)		Level 1	Level 2	Level 3	Total
June 30, 2013					
Interest rate contracts	assets	\$ 0	\$ 197	\$ 0	\$ 197
Interest rate contracts	liabilities	0	(217)	0	(217)
December 31, 2012					
Interest rate contracts	assets	\$ 0	\$ 124	\$ 0	\$ 124
Interest rate contracts	liabilities	0	(111)	0	(111)

The fair value of interest rate contracts was determined by referring to prices quoted in the secondary market for similar contracts. Gains and losses are included in gain on sale of loans in the consolidated statements of income.

The table below presents the balance of assets measured at fair value on a nonrecurring basis as of June 30, 2013 and December 31, 2012 and the related losses for the six months ended June 30, 2013 and the year ended December 31, 2012:

(Dollars in thousands)		Level 1	Level 2	Level 3	Total	Total Gains/ (Losses)
June 30, 2013						
Impaired loans		\$ 0	\$ 145	\$ 4,750	\$ 4,895	\$ (20)
Trust preferred securities		0	0	536	536	115
December 31, 2012:						
Impaired loans		\$ 0	\$ 468	\$ 4,907	\$ 5,375	\$ (222)
Mortgage servicing assets		0	0	651	651	(220)
Trust preferred securities		0	0	421	421	389

The fair value of impaired loans that are considered to be collateral-dependent is determined using the value of collateral less estimated selling costs. The fair value of impaired loans not considered to be collateral-dependent is determined using a discounted cash flow analysis. Assumptions used in the analysis include the discount rate and projected cash flows. Gains and losses on impaired loans are included in the provision for loan losses in the consolidated statements of income. Mortgage servicing assets are valued using a discounted cash flow model. Assumptions used in the model include mortgage prepayment speeds, discount rates, cost of servicing and ancillary income. Losses on mortgage servicing assets are included in service fees on loan and deposit accounts in the consolidated statements of income. The fair value of trust preferred securities is determined using a discounted cash flow model. The assumptions used in the discounted cash flow model are discussed above. Gains and losses on trust preferred securities that are credit related are included in net other-than-temporary impairment losses in the consolidated statements of income. Gains and losses on trust preferred securities that are not credit related are included in other comprehensive income in the consolidated statements of comprehensive income.

## (15) Subsequent Events

In July 2013, the Federal Deposit Insurance Corporation and the other federal bank regulatory agencies issued a final rule that will revise their leverage and risk-based capital requirements and the method for calculating risk-weighted assets to make them consistent with agreements that were reached by the Basel Committee on Banking Supervision and certain provisions of the Dodd-Frank Act. Among other things, the rule establishes a new common equity Tier 1 minimum capital requirement (4.5% of risk-weighted assets), increases the minimum Tier 1 capital to risk-based assets requirement (from 4% to 6% of risk-weighted assets) and assigns a higher risk weight (150%) to exposures that are more than 90 days past due or are on nonaccrual status and to certain commercial real estate facilities that finance the acquisition, development or construction of real property. The final rule also requires unrealized gains and losses on certain available-for-sale securities holdings to be included for purposes of calculating regulatory capital requirements unless a one-time opt-in or opt-out is exercised. The rule limits a banking organization's capital distributions and certain discretionary bonus payments if the banking organization does not hold a capital conservation buffer consisting of 2.5% of common equity Tier 1 capital to risk-weighted assets in addition to the amount necessary to meet its minimum risk-based capital requirements.

The final rule becomes effective for Territorial Savings Bank on January 1, 2015. The capital conservation buffer requirement will be phased in beginning January 1, 2016 and ending January 1, 2019, when the full capital conservation buffer requirement will be effective. The final rule also implements consolidated capital requirements for savings and loan holding companies effective January 1, 2015.

Table of Contents

The Company has reviewed the new capital requirements issued by the federal bank regulatory agencies. Based on regulatory capital as of June 30, 2013, the Company and the Bank believe that they would each be considered well-capitalized under these regulations.

On August 1, 2013, the Board of Directors of Territorial Bancorp Inc. declared a quarterly cash dividend of \$0.13 per share of common stock. The dividend is expected to be paid on August 29, 2013 to stockholders of record as of August 15, 2013.

**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

**Cautionary Statement Regarding Forward-Looking Information**

This Quarterly Report contains forward-looking statements, which can be identified by the use of words such as estimate, project, believe, intend, anticipate, plan, seek, expect, will, may and words of similar meaning. These forward-looking statements include, but are not limited to:

- statements of our goals, intentions and expectations;
- statements regarding our business plans, prospects, growth and operating strategies;
- statements regarding the asset quality of our loan and investment portfolios; and
- estimates of our risks and future costs and benefits.

These forward-looking statements are based on our current beliefs and expectations and are inherently subject to significant business, economic and competitive uncertainties and contingencies, many of which are beyond our control. In addition, these forward-looking statements are subject to assumptions with respect to future business strategies and decisions that are subject to change. We are under no duty to and do not take any obligation to update any forward-looking statements after the date of this Quarterly Report.

The following factors, among others, could cause actual results to differ materially from the anticipated results or other expectations expressed in the forward-looking statements:

## Edgar Filing: Territorial Bancorp Inc. - Form 10-Q

- general economic conditions, either internationally, nationally or in our market areas, that are worse than expected;
- competition among depository and other financial institutions;
- inflation and changes in the interest rate environment that reduce our margins or reduce the fair value of financial instruments;
- adverse changes in the securities markets;
- changes in laws or government regulations or policies affecting financial institutions, including changes in regulatory fees and capital requirements;
- our ability to enter new markets successfully and capitalize on growth opportunities;

## Edgar Filing: Territorial Bancorp Inc. - Form 10-Q

### Table of Contents

- our ability to successfully integrate acquired entities, if any;
- changes in consumer spending, borrowing and savings habits;
- changes in accounting policies and practices, as may be adopted by the bank regulatory agencies, the Financial Accounting Standards Board, the Securities and Exchange Commission and the Public Company Accounting Oversight Board;
- changes in our organization, compensation and benefit plans;
- changes in our financial condition or results of operations that reduce capital available to pay dividends; and
- changes in the financial condition or future prospects of issuers of securities that we own.

Because of these and a wide variety of other uncertainties, our actual future results may be materially different from the results indicated by these forward-looking statements.

### **Critical Accounting Policies**

There are no material changes to the critical accounting policies disclosed in Territorial Bancorp Inc.'s Annual Report on Form 10-K for the year ended December 31, 2012.

### **Comparison of Financial Condition at June 30, 2013 and December 31, 2012**

**Assets.** At June 30, 2013, our assets were \$1.562 billion, a decrease of \$12.2 million, or 0.8%, from \$1.575 billion at December 31, 2012. The decrease in assets was primarily the result of a decrease in cash and cash equivalents, which was partially offset by increases in loans receivable and investment securities.

**Cash and Cash Equivalents.** Cash and cash equivalents were \$87.2 million at June 30, 2013, a decrease of \$95.6 million since December 31, 2012. During the six months ended June 30, 2013, cash was used to fund a \$47.7 million increase in total loans and a \$28.0 million increase in investment securities, and to pay off \$5.0 million of FHLB advances and \$5.0 million of securities sold under agreements to repurchase. In addition, the Company repurchased \$7.7 million of common stock and paid \$2.6 million of common stock dividends.

**Loans.** Total loans, including \$3.0 million of loans held for sale, were \$824.7 million at June 30, 2013, or 52.8% of total assets. During the six months ended June 30, 2013, the loan portfolio increased by \$47.7 million, or 6.1%. The increase in the loan portfolio occurred as the production of new one- to four-family residential loans exceeded principal repayments and loan sales. The continued high level of loan originations is due primarily to the current interest rate environment.

**Securities.** At June 30, 2013, our securities portfolio totaled \$582.7 million, or 37.3% of total assets. At June 30, 2013, all of such securities were classified as held-to-maturity and none of the underlying collateral consisted of subprime or Alt-A (traditionally defined as nonconforming loans having less than full documentation) loans. During the six months ended June 30, 2013, our securities portfolio increased by \$28.0 million, or 5.0%, as purchases exceeded repayments and sales.

Table of Contents

At June 30, 2013, we owned trust preferred securities with a carrying value of \$536,000. This portfolio consists of two securities, which represent investments in a pool of debt obligations issued primarily by holding companies for Federal Deposit Insurance Corporation-insured financial institutions.

The trust preferred securities market is considered to be inactive as only three transactions have occurred over the past 18 months in the same tranche of securities owned by the Company. The Company used a discounted cash flow model to determine whether these securities are other-than-temporarily impaired. The assumptions used in preparing the discounted cash flow model include the following: estimated discount rates, estimated deferral and default rates on collateral, and estimated cash flows. We used a discount rate equal to three-month LIBOR plus 20.00% and calculated a fair value estimate of \$15.13 per \$100 of par value for PreTSL XXIII.

Based on the Company's review, the Company's investment in trust preferred securities did not incur additional impairment during the quarter ending June 30, 2013.

It is reasonably possible that the fair values of the trust preferred securities could decline in the near term if the overall economy and the financial condition of some of the issuers continue to deteriorate and the liquidity of these securities remains low. As a result, there is a risk that the Company's remaining amortized cost basis of \$1.1 million on its trust preferred securities could be credit-related other-than-temporarily impaired in the near term. The impairment could be material to the Company's consolidated statements of income.

**Deposits.** Deposits remained steady at \$1.235 billion at June 30, 2013, a decrease of \$2.4 million from \$1.238 billion at December 31, 2012.

**Borrowings.** Our borrowings consist of advances from the Federal Home Loan Bank of Seattle and funds borrowed under securities sold under agreements to repurchase. During the six months ended June 30, 2013, our borrowings decreased by \$10.0 million, or 11.1%, to \$80.0 million due to the net pay off of \$5.0 million of FHLB advances and \$5.0 million of securities sold under agreements to repurchase. We have not required any other borrowings to fund our operations. Instead, we have primarily funded our operations with the net proceeds from our stock offering, additional deposits, proceeds from loan and security sales and principal repayments on loans and mortgage-backed securities.

**Average Balances and Yields**

The following tables set forth average balance sheets, average yields and rates, and certain other information at and for the periods indicated. No tax-equivalent yield adjustments were made, as the effect thereof was not material. All average balances are daily average balances. Nonaccrual loans were included in the computation of average balances, but have been reflected in the table as loans carrying a zero yield. The yields set forth below include the effect of net deferred costs, discounts and premiums that are amortized or accreted to interest income.

**Comparison of Operating Results for the Three Months Ended June 30, 2013 and 2012**

**General.** Net income decreased by \$185,000, or 4.8%, to \$3.7 million for the three months ended June 30, 2013 from \$3.8 million for the three months ended June 30, 2012. The decrease in net income was primarily caused by a \$1.7 million decrease in interest and dividend income, a \$63,000 increase in provision for loan losses, a \$97,000 increase in non-interest expense and a \$129,000 increase in income taxes. This was partially offset by a \$907,000 decrease in interest expense and a \$904,000 increase in noninterest income.

**Net Interest Income.** Net interest income decreased by \$800,000, or 6.2%, to \$12.2 million for the three months ended June 30, 2013 compared to \$13.0 million for the three months ended June 30, 2012. Interest and dividend income decreased by \$1.7 million, or 11.0%, due primarily to a 42 basis point decrease in the average yield on interest-earning assets and a \$12.9 million decrease in the average balance of interest-earning assets. Interest expense decreased by \$907,000, or 36.0%, due to a 28 basis point decrease in the average cost of interest-bearing liabilities and a \$13.1 million decrease in the average balance. The interest rate spread and net interest margin were 3.16% and 3.23%, respectively, for the three months ended June 30, 2013, compared to 3.30% and 3.41%, respectively, for the three months ended June 30, 2012.

**Interest and Dividend Income.** Interest and dividend income decreased by \$1.7 million, or 11.0%, to \$13.8 million for the three months ended June 30, 2013 from \$15.5 million for the three months ended June 30, 2012. Interest income on investment securities decreased by \$1.8 million, or 28.2%, to \$4.5 million for the three months ended June 30, 2013 from \$6.3 million for the three months ended June 30, 2012. The decrease in interest income on securities occurred primarily because of a 76 basis point decrease in the average securities yield and a \$71.5 million decrease in the average securities balance. The decline in the average yield on investments occurred as repayments and sales of higher yielding mortgage-backed securities were reinvested at lower yields. Interest income on loans increased by \$89,000, or 1.0%, to \$9.2 million for the three months ended June 30, 2013 from \$9.1 million for the three months ended June 30, 2012. The increase in interest income on loans occurred because the average balance of loans grew by \$89.7 million, or 12.4%, as new loan originations exceeded loan repayments and loan sales. The increase in average balance was partially offset by a 51 basis point decline in the average loan yield to 4.53% for the three months ended June 30, 2013 compared to 5.04% for the three months ended June 30, 2012. The decline in the average yield on loans occurred because of repayments on higher-yielding loans and additions of new loans with lower yields to the loan portfolio.

**Interest Expense.** Interest expense decreased by \$907,000, or 36.0%, to \$1.6 million for the three months ended June 30, 2013 compared to \$2.5 million for the three months ended June 30, 2012. Interest expense on deposits decreased by \$508,000, or 32.1%, to \$1.1 million for the three months ended June 30, 2013 from \$1.6 million for the three months ended June 30, 2012. During the three months ended June 30, 2013, interest expense on savings accounts and certificates of deposit declined by \$399,000 and \$106,000, respectively, compared to the three months ended June 30, 2012. During the three months ended June 30, 2013, the average interest rate on savings accounts and certificates of deposit decreased by 21 and 11 basis points, respectively, compared to the three months ended June 30, 2012. We lowered the rates we pay on savings accounts and certificates of deposit due to declining market interest rates and increased liquidity from principal repayments on loans and mortgage-backed securities. However, the interest rates on our savings accounts are still higher than market interest rates in Hawaii. The decrease in the average interest rate on deposits was partially offset by a \$28.8 million, or 2.4%, increase in the average balance of deposit accounts. Interest expense on securities sold under agreements to repurchase decreased by \$360,000, or 43.3%, during the three months ended June 30, 2013 compared to the three

months ended June 30, 2012. The decrease was caused by a \$35.3 million, or 35.2%, decrease in the average outstanding balance and a 41 basis point decrease in the average interest rate to 2.90% for the three months ended June 30, 2013 compared to 3.31% for the three months ended June 30, 2012. The decrease in the average outstanding balance was due to the payoff of \$25.3 million of borrowings since June 30, 2012. Interest expense on FHLB advances decreased by \$39,000, or 37.5%, during the three months ended June 30, 2013 compared to the three months ended June 30, 2012. The decrease was caused by a \$6.6 million, or 33.0%, decrease in the average outstanding balance and a 14 basis point decrease in the average interest rate to 1.94% for the three months ended June 30, 2013 compared to 2.08% for the three months ended June 30, 2012. The decrease in the average outstanding balance occurred when \$10.0 million of maturing advances were paid off and a new \$5.0 million advance was obtained during the three months ended June 30, 2013.

**Provision for Loan Losses.** We recorded reversals of provisions for loan losses of \$16,000 and \$79,000 for the three months ended June 30, 2013 and 2012, respectively. The reversals of provisions for loan losses reflected a net charge-off of \$29,000 for the three months ended June 30, 2013 and a net recovery of \$7,000 for the three months ended June 30, 2012. The reversals recorded resulted in ratios of the allowance for loan losses to total loans of 0.20% at June 30, 2013 and 2012. Nonaccrual loans totaled \$5.4 million at June 30, 2013, or 0.65% of total loans at that date, compared to \$2.9 million of nonaccrual loans at June 30, 2012, or 0.39% of total loans at that date. Nonaccrual loans as of June 30, 2013 and 2012 consisted primarily of one- to four-family residential real estate loans. To the best of our knowledge, we have provided for all losses that are both probable and reasonable to estimate at June 30, 2013 and 2012. For additional information see footnote (6), Loans Receivable and Allowance for Loan Losses in our Notes to Consolidated Financial Statements.

**Noninterest Income.** The following table summarizes changes in noninterest income between the three months ended June 30, 2013 and 2012.

	Three Months Ended						
	2013	June 30,	2012		Change	% Change	
				(In thousands)	\$ Change

Other		81		115		(34)	(29.6)%
Total	\$	2,311	\$	1,407	\$	904	64.3%

Noninterest income rose by \$904,000 for the three months ended June 30, 2013 compared to the three months ended June 30, 2012. During the three months ended June 30, 2013 and 2012, we sold \$14.5 million and \$2.8 million, respectively, of held-to-maturity investment securities and recognized gains of \$1.0 million and \$172,000, respectively. The sale of these securities, for which the Company had already received a substantial portion of the outstanding principal (at least 85%), is in accordance with the Investment topic of the FASB ASC and will not affect the historical cost basis used to account for the remaining securities in the held-to-maturity portfolio.

**Noninterest Expense.** The following table summarizes changes in noninterest expense between the three months ended June 30, 2013 and 2012.

	Three Months Ended				
	2013	June 30, 2012		Change	% Change
			(In thousands)

Other general and administrative expenses	1,208	966		242	25.1%
Total	\$ 8,595	\$ 8,498	\$	97	1.1%

Noninterest expense rose by \$97,000 for the three months ended June 30, 2013 compared to the three months ended June 30, 2012. Other general and administrative expenses increased by \$242,000 to \$1.2 million for the three months ended June 30, 2013 from \$966,000 for the three months ended June 30, 2012. The increase in other general and administrative expenses was primarily due to higher legal costs and a loss on a deposit account. This was partially offset by a \$198,000 decrease in loss on extinguishment of debt. During the three months ended June 30, 2012, the Company prepaid \$15.0 million of securities sold under agreements to repurchase, which had a weighted-average interest rate of 4.93%, and incurred a \$198,000 prepayment penalty, which is reported as loss on extinguishment of debt.

**Income Tax Expense.** Income taxes were \$2.2 million and \$2.1 million for the three months ended June 30, 2013 and 2012, respectively, reflecting an effective tax rate of 38.0% and 35.5%, respectively. The effective tax rate for 2013 was higher than the tax rate in 2012 primarily due to a decrease in permanent tax benefits related to our share-based compensation plans.

## **Comparison of Operating Results for the Six Months Ended June 30, 2013 and 2012**

**General.** Net income decreased by \$84,000, or 1.1%, to \$7.3 million for the six months ended June 30, 2013 from \$7.4 million for the six months ended June 30, 2012. The decrease in net income was caused by a \$3.5 million decrease in interest and dividend income, a \$175,000 increase in non-interest expense and a \$65,000 increase in income taxes. This was partially offset by a \$1.8 million decrease in interest expense and a \$1.8 million increase in non-interest income.

**Net Interest Income.** Net interest income decreased by \$1.7 million, or 6.4%, to \$24.4 million for the six months ended June 30, 2013 compared to \$26.0 million for the six months ended June 30, 2012. Interest and dividend income decreased by \$3.5 million, or 11.1%, due primarily to a 46 basis point decrease in the average yield and a \$1.6 million decrease in the average balance of interest-earning assets. Interest expense decreased by \$1.8 million, or 35.0%, due to a 28 basis point decrease in the average cost of interest-bearing liabilities and a \$2.7 million decrease in the average balance. The interest rate spread and net interest margin were 3.15% and 3.22%, respectively, for the six months ended

June 30, 2013, compared to 3.33% and 3.44%, respectively, for the six months ended June 30, 2012.

**Interest and Dividend Income.** Interest and dividend income decreased by \$3.5 million or 11.1%, to \$27.7 million for the six months ended June 30, 2013 from \$31.1 million for the six months ended June 30, 2012. Interest income on investment securities decreased by \$3.7 million, or 29.2%, to \$9.1 million for the six months ended June 30, 2013 from \$12.8 million for the six months ended June 30, 2012. The decrease in interest income on securities occurred because of an \$85.7 million decrease in

the average securities balance and a 73 basis point decrease in the average securities yield. The decline in the average yield on investments occurred as repayments and sales of higher yielding mortgage-backed securities were reinvested at lower yields. Interest income on loans increased by \$290,000, or 1.6%, to \$18.4 million for the six months ended June 30, 2013 from \$18.1 million for the six months ended June 30, 2012. The increase in interest income on loans occurred because the average balance of loans grew by \$88.2 million, or 12.4%, as new loan originations exceeded loan repayments and loan sales. The increase in interest income that occurred because of growth in the loan portfolio was partially offset by a 49 basis point decline in the average loan yield to 4.60% for the six months ended June 30, 2013. The decline in the average yield on loans occurred because of repayments on higher-yielding loans and additions of new loans with lower yields to the loan portfolio.

**Interest Expense.** Interest expense decreased by \$1.8 million, or 35.0%, to \$3.3 million for the six months ended June 30, 2013 compared to \$5.1 million for the six months ended June 30, 2012. Interest expense on deposits decreased by \$958,000, or 30.4%, to \$2.2 million for the six months ended June 30, 2013 from \$3.2 million for the six months ended June 30, 2012. During the six months ended June 30, 2013, interest expense on savings accounts and certificates of deposit declined by \$702,000 and \$252,000, respectively. During the six months ended June 30, 2013, the average interest rate on savings accounts and certificates of deposit decreased by 19 and 16 basis points, respectively, compared to the six months ended June 30, 2012. We lowered the rates we pay on savings accounts and certificates of deposit due to declining market interest rates and increased liquidity from principal repayments on loans and mortgage-backed securities. However, the interest rates on our savings accounts are still higher than market interest rates in Hawaii. The decrease in the average interest rate on deposits was partially offset by a \$38.8 million, or 3.3%, increase in the average balance of deposit accounts. Interest expense on securities sold under agreements to repurchase decreased by \$787,000, or 45.4%, during the six months ended June 30, 2013 compared to the six months ended June 30, 2012. The decrease was caused by a \$38.1 million, or 36.7%, decrease in the average outstanding balance and a 46 basis point decrease in the average interest rate to 2.88% for the six months ended June 30, 2013 compared to 3.34% for the six months ended June 30, 2012. The decrease in the average outstanding balance was due to the payoff of \$25.3 million of borrowings since June 30, 2012. Interest expense on FHLB advances decreased by \$40,000, or 19.2%, during the six months ended June 30, 2013 compared to the six months ended June 30, 2012. The decrease was caused by a \$3.3 million, or 16.6%, decrease in the average outstanding balance and a seven basis point decrease in the average interest rate to 2.01% for the six months ended June 30, 2013 compared to 2.08% for the six months ended June 30, 2012. The decrease in the average outstanding balance occurred when \$10.0 million of maturing advances were paid off and a new \$5.0 million advance was obtained during the three months ended June 30, 2013.

**Provision for Loan Losses.** We recorded provisions for loan losses of \$2,000 and \$5,000 for the six months ended June 30, 2013 and 2012, respectively. The provisions for loan losses reflected net charge-offs of \$52,000 and \$89,000 for the six months ended June 30, 2013 and 2012, respectively. The provisions recorded resulted in ratios of the allowance for loan losses to total loans of 0.20% at June 30, 2013 and 2012. Nonaccrual loans totaled \$5.4 million at June 30, 2013, or 0.65% of total loans at that date, compared to \$2.9 million of nonaccrual loans at June 30, 2012, or 0.39% of total loans at that date. Nonaccrual loans as of June 30, 2013 and 2012 consisted primarily of one- to four-family residential real estate loans. To the best of our knowledge, we have provided for all losses that are both probable and reasonable to estimate at June 30, 2013 and 2012. For additional information see footnote (6), Loans Receivable and Allowance for Loan Losses in our Notes to Consolidated Financial Statements.

Noninterest income rose by \$1.8 million for the six months ended June 30, 2013 compared to the six months ended June 30, 2012. During the six months ended June 30, 2013 and 2012, we sold \$27.3 million and \$4.3 million, respectively, of held-to-maturity investment securities and recognized gains of \$1.9 million and \$300,000, respectively. The sale of these securities, for which the Company had already received a substantial portion of the outstanding principal (at least 85%), is in accordance with the Investment topic of the FASB ASC and will not affect the historical cost basis used to account for the remaining securities in the held-to-maturity portfolio. During the six months ended June 30, 2013 and 2012, we also sold \$47.1 million and \$46.2 million, respectively, of mortgage loans held for sale and recognized gains of \$1.0 million and \$847,000, respectively.

**Noninterest Expense.** The following table summarizes changes in noninterest expense between the six months ended June 30, 2013 and 2012.

## Edgar Filing: Territorial Bancorp Inc. - Form 10-Q

June 30, 2012. The increase in salaries and employee benefits was primarily due to a bank-wide budgeted salary increase of approximately 2.0% that was effective July 1, 2012, higher cash bonus accruals, and increases in health insurance and payroll taxes. This increase was partially offset by a \$181,000 increase in the credit to compensation expense for the cost of originating new mortgage loans because of an increase in new loan originations. The Receivables topic of the FASB ASC allows financial institutions to take a credit against compensation expense for the direct cost of originating loans. Equipment expense increased by \$100,000 to \$1.7 million for the six months ended June 30, 2013 from \$1.6 million for the six months ended June 30, 2012. The increase in equipment expense was primarily due to higher furniture, fixture and equipment and data processing expenses. Other general and administrative expenses increased by

Table of Contents

\$154,000 to \$2.3 million for the six months ended June 30, 2013 from \$2.1 million for the six months ended June 30, 2012. The increase in other general and administrative expenses was primarily due to higher legal costs and a loss on a deposit account. This was partially offset by a \$198,000 decrease in loss on extinguishment of debt. During the six months ended June 30, 2012, the Company prepaid \$15.0 million of securities sold under agreements to repurchase, which had a weighted-average interest rate of 4.93%, and incurred a \$198,000 prepayment penalty, which is reported as loss on extinguishment of debt.

**Income Tax Expense.** Income taxes were \$4.4 million for the six months ended June 30, 2013, reflecting an effective tax rate of 37.7% compared to \$4.3 million for the six months ended June 30, 2012, reflecting an effective tax rate of 37.0%. The increase in the effective tax rate is primarily attributed to a decrease in permanent tax benefits related to our share-based compensation plans.

**Liquidity and Capital Resources**

Liquidity is the ability to meet current and future financial obligations. Our primary sources of funds consist of deposit inflows, cash balances at the Federal Reserve Bank, loan repayments, advances from the Federal Home Loan Bank of Seattle, securities sold under agreements to repurchase, proceeds from loan and security sales and principal repayments on securities. While maturities and scheduled amortization of loans and securities are predictable sources of funds, deposit flows and mortgage prepayments are greatly influenced by general interest rates, economic conditions and competition. We have established an Asset/Liability Management Committee, consisting of our President and Chief Executive Officer, our Vice Chairman and Co-Chief Operating Officer, our Senior Vice President and Treasurer and our Vice President and Controller, which is responsible for establishing and monitoring our liquidity targets and strategies in order to ensure that sufficient liquidity exists for meeting the borrowing needs and deposit withdrawals of our customers as well as unanticipated contingencies. We believe that we have enough sources of liquidity to satisfy our short- and long-term liquidity needs as of June 30, 2013.

We regularly monitor and adjust our investments in liquid assets based upon our assessment of:

- (i) expected loan demand;
- (ii) expected deposit flows and borrowing maturities;
- (iii) yields available on interest-earning deposits and securities; and
- (iv) the objectives of our asset/liability management program.

Excess liquid assets are invested generally in interest-earning deposits or securities and may also be used to pay off short-term borrowings.

## Edgar Filing: Territorial Bancorp Inc. - Form 10-Q

Our most liquid asset is cash. The amount of this asset is dependent on our operating, financing, lending and investing activities during any given period. At June 30, 2013, cash and cash equivalents totaled \$87.2 million. On that date, we had \$65.0 million in securities sold under agreements to repurchase outstanding and \$15.0 million of Federal Home Loan Bank advances outstanding, with the ability to borrow an additional \$376.4 million under Federal Home Loan Bank advances.

Our cash flows are derived from operating activities, investing activities and financing activities as reported in our Consolidated Statements of Cash Flows included in our Consolidated Financial Statements.

## Edgar Filing: Territorial Bancorp Inc. - Form 10-Q

### Table of Contents

At June 30, 2013, we had \$26.5 million in loan commitments outstanding, most of which were for fixed-rate loans, and had \$22.1 million in unused lines of credit to borrowers. Certificates of deposit due within one year at June 30, 2013 totaled \$116.8 million, or 9.5% of total deposits. If these deposits do not remain with us, we may be required to seek other sources of funds, including loan sales, brokered deposits, securities sold under agreements to repurchase and Federal Home Loan Bank advances. Depending on market conditions, we may be required to pay higher rates on such deposits or other borrowings than we currently pay on the certificates of deposit due on or before June 30, 2014. We believe, however, based on past experience that a significant portion of such deposits will remain with us. We have the ability to attract and retain deposits by adjusting the interest rates offered.

Our primary investing activities are originating loans and purchasing mortgage-backed securities. During the three months ended June 30, 2013 and 2012, we originated \$88.6 million and \$78.7 million of loans, respectively, and purchased \$92.6 million and \$37.1 million of securities, respectively. During the six months ended June 30, 2013 and 2012, we originated \$174.7 million and \$167.5 million of loans, respectively, and purchased \$167.2 million and \$67.4 million of securities, respectively.

Financing activities consist primarily of activity in deposit accounts, Federal Home Loan Bank advances and securities sold under agreements to repurchase. We experienced a net decrease in deposits of \$2.4 million for the six months ended June 30, 2013 and a net increase in deposits of \$47.2 million for the six months ended June 30, 2012. Deposit flows are affected by the overall level of interest rates, the interest rates and products offered by us and our local competitors, and by other factors.

Liquidity management is both a daily and long-term function of business management. If we require funds beyond our ability to generate them internally, borrowing agreements exist with the Federal Home Loan Bank of Seattle, which provide an additional source of funds. Federal Home Loan Bank advances decreased by \$5.0 million during the six months ended June 30, 2013 and remained constant at \$20.0 million during the six months ended June 30, 2012. We had the ability to borrow up to an additional \$376.4 million and \$373.0 million from the Federal Home Loan Bank of Seattle as of June 30, 2013 and 2012, respectively. We also utilize securities sold under agreements to repurchase as another borrowing source. Securities sold under agreements to repurchase decreased by \$5.0 million and \$18.0 million for the six months ended June 30, 2013 and 2012, respectively.

Territorial Savings Bank is subject to various regulatory capital requirements, including a risk-based capital measure. The risk-based capital guidelines include both a definition of capital and a framework for calculating risk-weighted assets by assigning balance sheet assets and off-balance sheet items to broad risk categories. At June 30, 2013, Territorial Savings Bank exceeded all regulatory capital requirements. Territorial Savings Bank is considered well capitalized under regulatory guidelines. The tables below present the capital required as a percentage of total and risk-weighted assets and the percentage and the total amount of capital maintained at June 30, 2013 and December 31, 2012.

### **Off-Balance Sheet Arrangements and Aggregate Contractual Obligations**

**Commitments.** As a financial services provider, we routinely are a party to various financial instruments with off-balance sheet risks, such as commitments to extend credit and unused lines of credit. While these contractual obligations represent our potential future cash requirements, a significant portion of commitments to extend credit may expire without being drawn upon. Such commitments are subject to the same credit policies and approval process accorded to loans we make. In addition, we enter into commitments to sell mortgage loans.

**Contractual Obligations.** In the ordinary course of our operations, we enter into certain contractual obligations. Such obligations include operating leases for premises and equipment, agreements with respect to borrowed funds and deposit liabilities and agreements with respect to investments. Except for paying off \$5.0 million of securities sold under agreements to repurchase and \$5.0 million of FHLB advances and a decrease of \$22.8 million in certificates of deposit between December 31, 2012 and June 30, 2013, there have not been any material changes in contractual obligations and funding needs since December 31, 2012.

**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

**General.** Our most significant form of market risk is interest rate risk because, as a financial institution, the majority of our assets and liabilities are sensitive to changes in interest rates. Therefore, a principal part of our operations is to manage interest rate risk and limit the exposure of our net interest income to changes in market interest rates. Our Board of Directors has established an Asset/Liability Management Committee, which is responsible for evaluating the interest rate risk inherent in our assets and liabilities, for determining the level of risk that is appropriate, given our business strategy, operating environment, capital, liquidity and performance objectives, and for managing this risk consistent with the guidelines approved by the Board of Directors.

Because we have historically operated as a traditional thrift institution, the significant majority of our assets consist of long-term, fixed-rate residential mortgage loans and mortgage-backed securities, which we have funded primarily with checking and savings accounts and short-term borrowings. In addition, there is little demand for adjustable-rate mortgage loans in the Hawaii market area. This has resulted in our being particularly vulnerable to increases in interest rates, as our interest-bearing liabilities mature or reprice more quickly than our interest-earning assets.

Our policies do not permit hedging activities, such as engaging in futures, options or swap transactions, or investing in high-risk mortgage derivatives, such as collateralized mortgage obligation residual interests, real estate mortgage investment conduit residual interests or stripped mortgage-backed securities.

**Economic Value of Equity.** We use an interest rate sensitivity analysis that computes changes in the economic value of equity (EVE) of our cash flows from assets, liabilities and off-balance sheet items in the event of a range of assumed changes in market interest rates. EVE represents the market value of portfolio equity and is equal to the present value of assets minus the present value of liabilities, with adjustments made for off-balance sheet items. This analysis assesses the risk of loss in market-risk-sensitive instruments in the event of an instantaneous and sustained 100 to 400 basis point increase or a 100 basis point decrease in market interest rates with no effect given to any steps that we might take to counter the effect of that interest rate movement. A basis point equals one-hundredth of one percent, and 100 basis points equals one percent. An increase in interest rates from 3% to 4% would mean, for example, a 100 basis point increase in the Change in Interest Rates column below. Given the current relatively low level of market interest rates, an EVE calculation for an interest rate decrease of greater than 100 basis points has not been prepared.

## Table of Contents

The following table presents our internal calculations of the estimated changes in our EVE as of June 30, 2013 that would result from the designated instantaneous changes in the interest rate yield curve.

Change in Interest Rates (bp) (1)	Estimated EVE (2)	Estimated Increase (Decrease) in EVE (Dollars in thousands)	Percentage Change in EVE	EVE Ratio as a Percent of Present Value of Assets (3)(4)	Increase (Decrease) in EVE Ratio as a Percent of Present Value of Assets (3)(4)
+400	\$ 193,164	\$ (54,760)	(22.09)%	12.90%	(2.72)%
+300	\$ 209,778	\$ (38,146)	(15.39)%	13.81%	(1.81)%
+200	\$ 228,958	\$ (18,966)	(7.65)%	14.84%	(0.78)%
+100	\$ 247,369	\$ (555)	(0.22)%	15.79%	0.17%
0	\$ 247,924	\$ 0	0.00%	15.62%	0.00%
(100)	\$ 257,249	\$ 9,325	3.76%	16.17%	0.55%

- 
- (1) Assumes an instantaneous uniform change in interest rates at all maturities.
- (2) EVE is the difference between the present value of an institution's assets and liabilities.
- (3) Present value of assets represents the discounted present value of incoming cash flows on interest-earning assets.
- (4) EVE Ratio represents EVE divided by the present value of assets.

Certain shortcomings are inherent in the methodologies used in determining interest rate risk through changes in EVE. Modeling changes in EVE requires making certain assumptions that may or may not reflect the manner in which actual yields and costs respond to changes in market interest rates. In this regard, the EVE table presented assumes that the composition of our interest-sensitive assets and liabilities existing at the beginning of a period remains constant over the period being measured and assumes that a particular change in interest rates is reflected uniformly across the yield curve regardless of the duration or repricing of specific assets and liabilities. Accordingly, although the EVE table provides an indication of our interest rate risk exposure at a particular point in time, such measurements are not intended to and do not provide a precise forecast of the effect of changes in market interest rates on our EVE and net interest income and will differ from actual results.

## ITEM 4. CONTROLS AND PROCEDURES

An evaluation was performed under the supervision and with the participation of the Company's management, including the Chairman of the Board, President and Chief Executive Officer and the Senior Vice President and Treasurer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) promulgated under the Securities and Exchange Act of 1934, as amended) as of June 30, 2013. Based on that evaluation, the Company's management, including the Chairman of the Board, President and Chief Executive Officer and the Senior Vice President and Treasurer, concluded that the Company's disclosure controls and procedures were effective.
